STRAITS SETTLEMENTS.

[In continuation of Colonial Report No. 100, Old Series.]

Sir C. C. SMITH to LORD KNUTSFORD.

Government House, Singapore,
August 25, 1891.

MY LORD,

I HAVE the honour to forward the report by the Colonial Secretary on the Blue Book of the Straits Settlements for the year 1890.

I have, &c.
(Signed) CECIL C. SMITH.

The Right Hon.
Lord Knutsford, G.C.M.G.
&c. &c. &c.
Colonial Office.

REPORT on the STRAITS SETTLEMENTS BLUE BOOK for the Year 1890.

Finance.

1. The revenue of the Colony for the year 1890, amounting to $4,269,125, was less than that for 1889 by $140,802. The principal decreases were under licenses, $149,977, of which about two-thirds is due from the opium and spirit farms and is nearly all recoverable, while the remaining third represents an absolute loss on pawnbrokers' licenses owing to a change in the law which involves a loss of about $100,000 a year; revenue stamps, $19,375; fines, fees, and forfeitures, $11,418; miscellaneous receipts, $34,721. On the other hand there were increases under postage of $17,462; and under interest of $50,953. There were outstanding on 1st January 1891 arrears of revenue amounting to $115,950, of which $110,000 is probably recoverable; this latter sum includes a sum of $104,000 due under the head of licenses for the opium and spirit farms of Singapore and Penang.

2. The expenditure for 1890 amounted to $3,757,693, and shows a decrease as compared with 1889 of $54,920. There were, however, considerable increases under some heads in 1890 as compared with 1889, namely, under salaries, $104,081, accounted for in part by a liberal increase to the salaries of the higher civil appointments; under pensions, $13,483; police, $8,626; gaols, $16,425; military expenditure, $49,770; to which should be added $585,262 paid early in 1891 as arrears of military contribution for

STRAITS SETTLEMENTS.

1890. The principal decreases were under postal services, $11,813; under public works, $268,285.

3. The assets and liabilities on 31st December 1890 show a balance in favour of assets of $1,223,447, as against $1,541,102 on 31st December 1889, being a decrease of $317,655; the balance to the credit of the Colony amounting, as shown above, to $1,223,447. This sum in fact represents mainly outstanding assets of the Colony awaiting recovery and leaves only a small working cash balance. The balance of $1,223,447 does not include the "Investments" given under the head of dependencies, amounting to $1,318.752, being loans to the Native States and to the municipalities, which cannot be classed as marketable securities, though in course of time they will be doubtless recovered. At the close of 1890 the balance on the public debt of the Colony amounted only to 5,800*l.*, and on the 15th November 1891 the whole of the small loan of 100,000*l.* raised under Ordinance 1 of 1877 will be paid off and the Colony will be free from debt.

4. Towards the latter end of the year the Penang opium farmer became bankrupt, and later it became necessary to give some relief to the Singapore opium farmer; and at the end of the year it was finally decided by Her Majesty's Government to raise the military contribution of the Colony from 50,145*l.* to 100,000*l.* per annum; consequently the financial outlook at the close of 1890 was worse than that at the close of 1889 by no less than $971,272, for on the revenue side the revenue from opium and spirits shows a decrease of $576,600, of which, $336,600 is in Penang and $240,000 in Singapore, while on the expenditure side the military contribution shows an increase of $394,672. There will fall to be paid in 1891 a sum of $84,858 in redemption of the remainder of the Malacca land annuities: this is a capital investment, and not expenditure out of current revenue. The transaction results in a permanent gain to the revenue of about $2,000 a year.

5. The following statement gives particulars of the assets and liabilities on the 1st January 1890 and 1891, including dependencies under assets of $1,318,752, and under liabilities of $31,636:—

Assets.			Liabilities.		
—	1st January 1890.	1st January 1891.	—	1st January 1890.	1st January 1891.
	$	$		$	$
Cash on current account with local banks -	394,261	839,047	Balance in favour of the Crown Agents - -	1,901	7,295
Investments, gold - -	1,013,762	1,013,762	Debenture loan - -	103,233	31,636
Invested in Government of India loans - -	350,000	350,000	Deposits, &c. - -	526,345	650,640
Loans to Native States -	527,044	765,452	Expenditure in arrears -	19,217	686,297
Loans to municipalities -	553,800	553,300		650,696	1,375,778
Other investments -	175,631	188,459			
Miscellaneous advances, &c., &c. - -	145,196	60,371	Net balance to the credit of the Colony -	2,559,977	2,510,564
Singapore defences -	41,262	—			
Revenue in arrears -	9,717	115,951			
Total - -	3,210,673	3,886,342	Total - -	3,210,673	3,886,342

6. The course of exchange is shown in the following table:—

Bank Bills.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
On London:— Sterling, on demand, Highest -	3 3	3 2⅝	3 2⅛	3 4¾	3 5½	3 6	3 8	3 10¾	3 10⅝	3 7	3 6¾	3 7¼
Lowest -	3 2⅜	3 1⅜	3 1½	3 1⅞	3 4¼	3 4½	3 5½	3 8⅜	3 6½	3 5½	3 4¼	3 5½

The highest rate of exchange during the year was in August, viz., 3*s.* 10¾*d.*, and the lowest rate of exchange during the year was in February, viz., 3*s.* 1⅜*d.* The average rate for the year was 3*s.* 6⅛*d.*

Public Works.

7. The following are the principal works undertaken, carried on, or completed in 1890:—

Principal Works.	Estimated Cost.	
Singapore.	$	c.
Telok Ayer reclamation - - - -	300,000	00
Improvements to Singapore River and Esplanade - -	230,000	00
New river wall and quay at Kampong Saigon - - -	72,763	00
New Johnston's pier - - - - - -	90,000	00
Tanjong Pagar police station - - - - -	20,000	00
New Quarters for 40 married constables - - -	10,000	00
Beach Road (Raffles Institute) reclamation - - -	30,000	00
Reconstruction of river walls in Government charge - -	25,000	00
Penang and Province Wellesley.		
New Government offices - - - - -	250,000	00
Resident councillor's house - - - - -	48,000	00
Reconstruction of south wing Government Hill bungalow -	12,000	00
Pontoon for landing jetty - - - - -	5,500	00
New police administration block - - - -	18,500	00
Clerks' quarters, Balik Pulau - - - - -	5,820	00
New convalescent bungalow - - - - -	18,000	00
Construction of sea wall in front of beach property - -	10,000	00
Water supply to Bukit Mertajam Village - - -	38,900	00
Metalling road from Balik Pulau to Pulau Betong - -	19,000	00
Construction of road from Tanjong Tokong to Batu Feringgi -	50,500	00
Construction of pontoon bridge, Nibong Tebal - - -	31,000	00

Singapore.

8. The Telok Ayer reclamation has been in progress for the last ten years and is now approaching completion. By this undertaking a large bay has been filled in and a wide extent of valuable building land secured in a direction where the town had become most congested. A direct road has been opened to the

STRAITS SETTLEMENTS.

docks, and a steam tramway brings them in close connexion with the commercial quarters of Singapore.

9. The works at the mouth of the Singapore River are those recommended by Sir J. Coode. They have been completed, and with the mud from the river the esplanade has been doubled in width, much to the satisfaction of the European and Eurasian community, who find there the necessary accommodation for various means of recreation.

10. Kampong Saigon is an island which was a few years ago covered with huts upon piles occupied by some of the worst characters in Singapore. They were cleared out, the island raised several feet with town refuse and mud from the river, and the whole has been surrounded by a neat river wall on a novel and economical plan. One portion has been given to the municipality for an abattoir, and that body have constructed one handsome iron bridge leading thereto, and contemplate building another.

11. The construction of a new Johnston's Pier, a much desired work, made rapid progress during the year, and was completed in the middle of 1891, with the exception of the wave screen, which is intended to secure smooth water alongside the landing pontoons.

12. The growing importance of the docks and wharves called for the construction of a more commodious police station at Tanjong Pagar than the one which had existed from the early days of the Colony. The new station has been built on a commanding site at the corner of the Keppel Road, the ground for the purpose being given to the Government by the Tanjong Pagar Dock Company.

13. It having been represented that it was subversive to the discipline of the police force that many of the married constables were obliged to live in hired lodgings on account of the paucity of Government quarters, the remedy has been provided by the construction of 40 new quarters on a site adjacent to the People's Park. They are now quite complete and are much appreciated by the force.

14. By the Beach Road Reclamation two advantages are secured—(*a*) the flat beach in front of the town is reclaimed in continuation of the esplanade and provides room for the recreation and amusement of the large community living in Kampong Bencoolen; (*b*) it provides a place of deposit for the dredgings from the river which otherwise would have to be taken out to sea.

15. The vote for the re-construction of river walls has for its object to gradually put in proper order the river walls and quays still in charge of the Government and to hand them over to the municipality, when their annual maintenance will be no longer a charge on the revenues of the Colony.

Penang.

16. The new Government offices have been completed, and now furnish every facility for carrying on the administration of the various departments located therein.

17. The Resident Councillor's house provides that officer with a commodious residence well suited to meet the requirements of the executive head of that Settlement.

18. The south wing of the Government Hill Bungalow (Bel Retiro) has been completed in a solid and permanent manner. Attention is still required to the laying out of the grounds.

19. The small quarter formerly occupied as a residence and office by the Superintendent of Police having proved far too cramped for the efficient administration of the Department, and the building itself being in a tumbledown condition, it was determined to build the new administrative block in which accommodation could be conveniently provided for carrying on the different duties. A new site was selected at the corner of Leith Street just opposite the public offices. A fine building has now been erected, and the various police requirements fully met.

20. Beach property was acquired by Government from the Presbyterian Mission. For long past the sea during the south-west monsoon has been making serious inroads on the foreshore. The substantial sea-wall which has been erected will stop any further changes in this respect.

21. Bukit Mertajam is one of the most thriving centres of Province Wellesley, and during times of drought it suffers greatly from want of water. An excellent gravitation supply was found on the far side of the range of hills and is being brought by a line of iron pipes to the village, which will greatly benefit thereby.

22. The road traffic in the Balik Pulau district has immensely increased since the opening of the Ginting Road which connects Balik Pulau with George Town. The earthen road from Balik Pulau to Pulau Betong was found to be unable to stand this traffic, and had to be properly metalled.

23. The commencement of the Batu Feringgi Road marks a policy which has obtained general approval by which a circular road will run round the island of Penang. It is rather a heavy undertaking, and will gradually be carried out in four sections that now commenced being the first section only.

24. Of the Province Wellesley roads and bridges, the only one requiring any particular notice is the pontoon bridge at Nibong Tebal. It was originally proposed to construct this bridge lower down the river at Telok Epil, but the site was subsequently changed. The work is now complete, and roads in the Trans-Krian are in progress.

Malacca.

25. No works of importance were undertaken in Malacca, except some preliminary steps in connexion with the new water works, which will bring a much-needed supply of water into the town from the northern side of Bukit Bruang, some eight miles distant.

STRAITS SETTLEMENTS.

MUNICIPALITIES.

26. The following statement gives the actual revenue and expenditure, cash balances, and outstanding loans of the municipalities of the three Settlements respectively, for 1889 and 1890:—

Municipalities.	1889.	1890.
	$	$
REVENUE:		
Singapore - - - -	664,684	635,082
Penang - - - -	330,946	237,940
Malacca - - - -	26,990	25,245
	1,022,620	898,267
EXPENDITURE:		
Singapore - - -	600,915	703,748
Penang - - - -	203,217	314,251
Malacca - - - -	23,626	23,244
	827,758	1,041,243
CASH BALANCE AT CLOSE OF YEAR:		
Singapore - - - -	233,769	333,333
Penang - - - -	204,228	127,862
Malacca - - - -	6,364	2,001
	444,361	463,1[illegible]3
LOANS OUTSTANDING AT CLOSE OF YEAR:		
Singapore - - - -	400,000	550,000
Penang - - - -	250,000	250,000
Malacca - - - -	24,000	23,500
	674,000	823,500

27. The following shows the amount of the rates and taxes for the three Settlements outside municipal limits; and the amount expended on roads and bridges in the same districts during the year:—

Amount of Rates and Taxes collected in 1890.			Amount expended by Government during 1890 on Roads and Bridges.		
	$	c.		$	c.
Singapore - -	2,617	25	Singapore - -	59,147	18
Penang - -	66,819	67	Penang and P.W. -	186,105	27
Malacca - -	12,427	80	Malacca - -	155,650	98

Excess of Expenditure over Receipts.

	$	c.
Singapore - - - -	56,529	93
Penang - - - -	119,253	04
Malacca - - - -	143,583	18

LEGISLATION.

28. The Legislative Council met 17 times during the year, and 16 Ordinances were passed, in regard to none of which has Her Majesty the Queen exercised Her power of disallowance. Among these may be mentioned:—

An Ordinance (II.) relating to reformatories and industrial schools, adapted from the English Act which had already been brought into operation in Ceylon and Hongkong.

An Ordinance (IV.) for the protection of coco-nut trees from the ravages of certain beetles. Very great destruction was going on among coco-nut trees in the Colony owing to the attacks of these beetles (the *Oryctes rhinoceros* and the *Rhynchophorus ferrugineus*), so much so that it seemed likely that, unless some steps were taken to remedy the evil, coco-nut cultivation would cease. By this Ordinance it becomes the duty of owners of coco-nut trees attacked by beetles to destroy such trees.

An Ordinance (VII.) to consolidate and amend the law relating to passenger ships.

Ordinances XI. and XII., which are adaptations of English Acts of Parliament—(1.) relating to the law of evidence with respect of bankers' books, by which bankers are relieved from the necessity of producing their books in court; and (2) consolidating the law relating to arbitration.

29. The most important matter discussed in the Council was the demand of Her Majesty's Government for an increased military contribution, which was strongly opposed by all the unofficial members of the Council.

30. During the year two commissions were issued by the Governor, upon requisitions from the Legislative Council, the first for an inquiry into the management of native religious trusts in Penang, and the second for an inquiry into the state of labour in the Colony and in the protected Native States, with a view to devising a scheme for encouraging immigration, and thereby supplying the demand for labour.

REGISTRY OF DEEDS AND REGISTRY OF BILLS OF SALE.

31. The amount of fees collected under "the Registration of Deeds Ordinance, 1886," was $7,498 25, as against $8,852 75 in 1889, and the amount of fees collected under "The Bills of Sale Ordinance, 1886," was $1,509 25, as against $1,648 in 1889. A Bill to amend "The Registration of Deeds Ordinance, 1886,"

was published towards the close of the year. The principal changes proposed by the Bill were—(*a*) an alteration in the form of the certificate of identity on deeds; (*b*) better provisions for enabling the Registrar to refuse to register deeds not duly stamped, and deeds relating to land on which an arrear of land revenue is due to the Colony; and (*c*) a provision for the protection of registering officers, so long as they act *bonâ fide*. In November a solicitor from England was appointed deputy registrar of deeds, and was also appointed by the Supreme Court a Commissioner to administer oaths for the purpose of enabling him to attest and explain bills of sale and to take statutory declarations under "The Bills of Sale Ordinance, 1886."

POSTAL DEPARTMENT.

32. The business of this Department exhibits a satisfactory increase. In 1890, 2,276,258 articles were received, and 2,285,628 were despatched, as compared with 1,996,113 and 2,097,609 in the previous year.

33. The revenue during the year under review was $148,001, being $17,454 more than was collected in 1889. Every post office in the Colony contributed to this increase, but the improvement is most noticeable in Penang, which shows a total nearly 100 per cent. higher than 1888.

34. The expenditure for 1890 amounted to $110,708, being $37,393 less than the revenue.

35. The operations of the money order branch amounted in 1890 to the large sum of $395,834, which is an increase of $139,674 over the transactions of the previous year. The principal business done was with the United Kingdom, India, and the Native States.

36. The postal service in Province Wellesley and Malacca was improved and extended, and it is satisfactory to note that greater efficiency is reported of all the subordinate offices.

37. The registration and late fees were reduced from 8 and 12 cents respectively to 5 cents, and arrangements were completed for the adoption, on the 1st January 1891, of an uniform rate of postage for letters of 5 cents the half-ounce to all parts of the world beyond the Colony and the Native States, the local postage remaining unchanged at 2 cents.

SAVINGS BANK.

38. The total amount deposited in the three savings banks of the Colony during 1890 was $112,020, being $382 less than the sum withdrawn. The sum at the credit of depositors on the 31st December 1890 was $126,961 46, and the aggregate sum lodged in the bank from its establishment in 1887 to the same day was $785,706.

39. Particulars of the business transacted by the branches in Singapore, Penang, and Malacca respectively are given in the following statement:—

——	Singapore.	Penang.	Malacca.
New accounts opened - - -	465	220	24
Accounts closed - - -	346	106	23
Accounts open at the end of the year -	743	206	38
	$	$	$
Deposited, 1890 - - -	82,085	25,581	4,354
Repaid, 1890 - - - -	83,786	24,203	4,413
Balance due to depositors at close of 1890 - - - - -	95,655	27,289	4,018

EDUCATION.

40. The population of the Colony, while including all nationalities, consists principally of Malays, Chinese, and Tamils from the Madras coast of India.

41. In addition to private schools which give instruction in English and the native languages, the schools of the Colony may be divided into two classes:—

(1.) Schools both Government and aided, in which English is taught to all nationalities.

(2.) Government Malay schools in which Malays are taught their own language.

42. There are also in Singapore and Penang mission schools for Tamils receiving Government aid, in which instruction is given either in Tamil alone or in Tamil and English.

43. From the returns of the 1881 census the number of male children of a school-going age, viz., between the ages of 6 and 15, is as follows:—

Europeans, Eurasians, &c. - -	845
Chinese - - - - -	6,501
Malays - - - - -	18,937
Klings - - - - -	2,590
Other Asiatics - - - -	2,142
Total - - -	31,015

44. The school-going age extends over a period of nine years, while it is found that a Malay boy can acquire a knowledge of the reading and writing of his own language in three years. The total Malay population will, therefore, have been educated if about one third of the number of boys of a school-going age are constantly

at school. In the case of other languages, and of English, a course of study of about nine years is required. The number of male children for whom education has to be provided may, therefore, be considered to be as follows:—

Europeans, Eurasians, &c. - -	845
Malays, about - . - - -	7,000
Other races - - - -	11,233
Total - - -	19,078

This is, however, subject to some doubt as regards the figures for other races, the greater number of whom are male adults unmarried.

The number of male children at present attending is:—

Europeans, Eurasians, &c. - -	744
Malays - - - - -	7,267
Other races - - - -	3,880
Total - - -	11,891

45. The educational progress made during the past 10 years is shown by the following figures:—

——	1880.	1890.
Attendance at boys' schools :—		
Government English schools - -	623	1,002
Aided do. - -	2,337	3,793
Government Malay schools - -	1,290	7,072
Total - - - -	4,250	11,867

Not only is there this large increase in the number of pupils in attendance, but there has been a considerable improvement in the condition of the schools, and a very much larger proportion of the pupils now remain at school until they have completed their education. From every point of view, therefore, the progress made during the past 10 years has been most rapid. Great difficulty is still experienced in extending female education. The total number of female children at present receiving instruction in the Government aided and in the private schools of the Colony is about 1,216.

POPULATION.

46. The number of births registered in 1890 in all the settlements was 10,010, of which 5,261 were those of male, and 4,749 those of female children.

47. The deaths registered in 1890 numbered 16,813, as against 18,206 in 1889, or a decrease of 1,393, the highest rate of mortality having been recorded at Singapore. The greatest number of deaths occurred among persons between the ages of 25 and 35, the death-rate being 21·63 of the total number.

48. The following table gives the number of births and deaths registered in each Settlement during the past two years :—

Settlement.	Births.		Deaths.	
	1889.	1890.	1889.	1890.
Singapore - -	2,837	2,799	6,385	6,557
Dindings - -	84	97	104	119
Penang - - -	2,166	1,864	3,998	4,002
Province Wellesley -	3,014	2,697	3,571	2,624
Malacca - - -	3,417	2,553	4,148	3,511
Total -	11,518	10,010	18,206	16,813

49. The population of the Colony, according to the rough totals of the Census taken on the 5th April 1891, as compared with the Census of 1881, is as follows:—

Settlement.	1881.			1891.		
	Males.	Females.	Total.	Males.	Females.	Total.
Singapore - - - -	105,423	33,785	139,208	141,330	43,224	184,554
Penang, Province Wellesley, and Dindings - - -	124,205	66,392	190,597	149,419	82,061	231,480
Malacca - - - -	52,059	41,520	93,579	49,695	41,255	90,950
Total - - -	281,687	141,697	423,384	340,444	166,540	506,984

Total population of the Colony, 1891, 506,984

Total increase since 1881 - - 83,600 or 19·7 per cent.

Increase in males since 1881 - 58,757 or 20·8 „

Increase in females since 1881 - 24,843 or 17·5 „

Singapore.

Total increase since 1881 -	- 43,346 or 32·5	per cent.
Increase in males since 1881	- 35,907 or 25·4	„
Increase in females since 1881	- 9,439 or 21·3	„

Penang, Province Wellesley and Dindings.

Total increase since 1881 -	- 40,883 or 21·4	„
Increase in males since 1881	- 25,214 or 20·3	„
Increase in females since 1881	- 15,669 or 23·5	„

Pahang - - - -	28,032	24,771	52,803
Total - -	292,049	121,648	413,697

CHINESE IMMIGRATION.

51. The total number of Chinese immigrants—men, women and children—was 127,936; this shows a decrease of 22,873 in the number of Chinese immigrants, as compared with the number of Chinese immigrants in 1889. An analysis of this decrease shows that of free immigrants there were 16,625, of unpaid immigrants 6,248, and of female immigrants 529, less than in the previous year.

52. Chinese immigration to the Straits increased steadily from 1880 up to 1888, when it began to steadily decline. It has still continued to decline in 1890. This decline is due to natural

causes, and not to any failure on the part of the Straits Settlements as a Colony to offer less attraction to Chinese immigrants than before. This decline in Chinese immigration is chiefly due to the falling off in the demand for tin labour in the Native States; for example, in 1887 as many as 16,714 Chinese immigrants were signed on to work in Perak and Selangor in the tin mines; in 1890 only 3,934 contracts were made by Chinese immigrants for the two States. The competition of Sumatra and Borneo for cooly labour has further diminished Chinese immigration to the Straits. Since the planting associations of these two countries have opened up a direct route from Swatow and Hong Kong to Borneo and Sumatra, the immigration from Swatow and Hong Kong to the Straits has fallen off very considerably. There can be no doubt, too, that the general depression of trade in 1890 decreased the demand for labour throughout the Colony and Native States. The number of unpaid Chinese immigrants that arrived in the Colony was 14,965. Of this number 8,152 entered the depôts licensed by the Government in Singapore, and 6,813 were admitted into the licensed depôts in Penang. The number of unpaid Chinese passengers that arrived in the Colony in 1889 was 21,213. This shows a decrease of 6,248 in 1890 in the number of Chinese immigrants whose passages were unpaid. The same causes that have tended to decrease the general flow of Chinese immigration into the Colony, have no doubt acted on the unpaid passenger immigration in a similar way. A decision of the Supreme Court as to the meaning of "unpaid passenger," when the judges construed it to mean a passenger still owing money to the vessel which brought him, caused a panic among the depôt-keepers in the Straits and the recruiting agencies in Hong Kong and China, in consequence of which Ordinance I. of 1891 was passed.

53. There was a falling off of 529 in the number of women who arrived in the Colony as against 1889. Of the 5,542 females who arrived, 3,820 landed in Singapore, 1,710 proceeded to Penang, and 12 to other ports.

54. There were 26,204 contracts to labour executed in the Colony, as against 32,666 in 1889, showing a decrease of 6,462 in the number of contracts signed for the year. Coolie contracts to the Dutch possessions decreased by 3,140, and to the Native States by 1,525, as compared with 1889. The number of contracts made for Province Wellesley was only 1,235, the lowest number of contracts on record. This falling off in the number of contracts can only be attributed to the fact that the Dutch are succeeding in getting their labour direct from China, and that the surface tin mining industry of the Native States does not now pay as well as it formerly did. The general tightness of the money market, too, has no doubt tended to diminish the demand for labour. Of the total number of contracts (26,204) signed in the Colony, 6,502 were made for labour in the Colony and Protected Native States, and 19,702 for labour in other places.

STRAITS SETTLEMENTS.

INDIAN IMMIGRATION.

55. During the year, 2,960 statute immigrants with 158 dependents arrived in the Colony for service in the Settlements and Native States, showing an increase of 213 on the figures for the previous year. 18,301 immigrants not under agreements also arrived in the Colony, showing an increase of 3,016 as compared with the number in 1889.

56. The following table gives the statistics of the department since 1880:—

——	1880.	1881.	1882.	1883.	1884.	1885.	1886.	1887.	1888.	1889.	1890.
Immigrants under indenture -	1,191	879	1,452	1,450	1,539	1,642	2,748	4,736	4,684	2,747	2,960
Dependents - -	107	159	209	176	177	49	244	310	317	104	158
Free immigrants	3,755	5,769	8,276	8,979	14,365	19,819	17,316	12,156	15,812	15,285	18,301
Total arrivals -	5,053	6,807	9,937	10,605	16,081	21,510	20,308	17,202	20,813	18,136	21,419
Returned to India	—	5,269	5,947	9,041	10,749	13,417	18,105	12,596	13,190	14,099	15,276
Remained in the Colony - -	—	1,538	3,990	1,564	5,332	8,093	2,203	4,606	7,623	4,037	6,143

The years 1885 and 1886 were, however, exceptional years, as extraordinary facilities were afforded to immigrants by the competition that existed between two rival lines of steamers. The figures for the past year compare favourably on the whole with those for the two preceding years.

TRADE AND SHIPPING.

57. Towards the close of the year the import and export branch of the Master Attendant's Office was re-organised, and a registrar of imports and exports was appointed. The trade returns are now dealt with in a more systematic and thorough manner, conducive to as great accuracy as the conditions of a free port will allow.

58. The following tables give the value of the imports and exports at the three Settlements in 1889 and 1890 respectively:—

Imports.

——		Singapore.	Penang.	Malacca.
MERCHANDISE.		$	$	$
United Kingdom - -	1890	15,862,524	4,000,856	—

Total Exports of Merchandise and Treasure.	1890	94,131,804	41,349,247	2,244,093
	1889	88,683,134	41,833,488	2,702,659
Grand Total Value of Exports of the Straits Settlements - - - -	1890			137,725,144
	1889			133,219,281

59. It will be seen from the above tables that while there is an increase in the total value of both imports and exports compared with the previous year, this is entirely due to the trade in treasure,

STRAITS SETTLEMENTS.

and that there is a decline under both heads in the real trade of the Colony.

In the total imports, Singapore and Penang show increases, while Malacca declines; and in the total exports, Singapore alone gives an increased value.

60. The falling off is accounted for by the severe depression of trade which existed throughout the year. The local money market was depressed in consequence of mining speculations in the first half of 1889, which seriously crippled the resources, more especially, of the Chinese trading community, and resulted in a large number of business failures. This state of affairs was intensified by falling prices in th home markets.

61. In looking at these figures it is to be remembered that in comparing any two or more years a not insignificant factor has to be considered in the fluctuations in exchange. Thus in 1890 the average value in sterling of the dollar gave an increase of over 9 per cent. above the average of 1889, and it is obvious that in any comparison of quantities and values this difference must be kept in view, as a smaller value might not mean a lesser quantity, or a cheaper class of goods.

62. A very considerable decrease in the export trade with the Netherlands India is observable, and there are also decreases in value from Selangor and Sungei Ujong; but a greater quantity of tin was received from Selangor than in 1889. The tin imported from Malacca and the West Malay Peninsula was less by 730 tons.

63. It will be noticed that, for the first time, the value of treasure is shown separate from that of merchandise.

64. The following are a few of the principal imports to and exports from the Straits Settlements:—

Imports.

—	1889.	1890.	Increase.	Decrease.
Cotton piece goods -	Pieces. 4,674,674	Pieces. 7,117,374	2,442,700	—
Coal - - -	Tons. 367,528	Tons. 324,624	—	42,904
Rice - - -	Pikuls. 5,131,015	Pikuls. 6,762,772	1,631,757	—
Opium - - -	Chests. 15,511	Chests. 14,448	—	1,063
Silk piece goods - -	Pieces. 277,167	Pieces. 377,905	100,738	—

REGISTRY OF SHIPPING.

New Vessels built.

—	No.	Tonnage.
Singapore, 1890 - - -	79	4,727
Do., 1889 - - -	87	5,288

67. Singapore has a decrease in number and tonnage in both classes of vessels, Penang an increase all over, and Malacca an increase in square-rigged vessels only.

68. The decreases in revenue are caused by the falling off in shipping and a change of system in collecting the light dues from local vessels.

69. The relative importance of shipping and commerce in 1889 and 1890 for Singapore and Penang is shown by the following returns:—

SHIPPING (EXCLUSIVE OF NATIVE CRAFT).

Singapore.

1889 - 7,715 vessels measuring 6,113,977 tons.
1890 - 7,267 „ „ 5,945,034 „

Penang.

1889 - 5,852 vessels measuring 3,177,536 tons.
1890 - 6,078 „ „ 3,293,645 „

TRADE.

Singapore.

	$
1889 - - - -	199,429,724
1890 - - - -	206,765,764

1889 - - - -	85,014,885
1890 - - - -	85,137,647

LIGHTHOUSES.

70. The lighthouses, launches, buoys, and beacons have been kept in an efficient condition. The newly appointed engineer has arrived, and commenced work.

The lightship on Ajax Shoal was established in February 1890, and has proved an immense boon to shipping, enabling vessels to gain considerable time in approaching the new harbour in the mornings, and to leave at a later hour in the afternoon with perfect safety.

The new and more powerful harbour gas light on Fort Canning was exhibited in May 1890, and now shows over 20 miles. Numerous reports have been received from shipmasters stating that it gives an entirely satisfactory light and can no longer be mistaken for the riding lights of vessels at anchor.

PUBLIC HEALTH.

71. The health of the Straits Settlements has been good during the past year, there having been, with the exception of an outbreak of influenza in the early part of the year throughout the Colony, no prevalence of any epidemic disease in any one of the Settlements.

72. A new hospital was opened during the year in Province Wellesley, at Bukit Mertajam, one that existed formerly at Bukit Minyak having been pulled down. The situation of the new hospital appears to be far more advantageous in every way than that of the former one.

73. The following table gives the number of patients treated, and of the deaths among them, during 1890, as compared with 1889:—

—	Number of Patients treated.			Number of Deaths.			Percentage of Deaths to Total treated.		
	Europeans.	Natives.	Total.	Europeans.	Natives.	Total.	Europeans.	Natives.	Total.
1890 - - -	832	19,947	20,779	37	2,414	2,451	4·44	12·10	11·79
1889 - - -	1,030	20,426	21,456	51	2,297	2,348	4·95	11·24	10·94

STRAITS SETTLEMENTS.

74. The following table shows the number of patients treated, and the deaths that occurred in hospital in each of the Settlements :—

Settlement.	Total treated.	Deaths.
Singapore - - - -	9,632	1,071
Penang and the Dindings - -	5,801	552
Province Wellesley - -	1,908	295
Malacca - - - -	3,436	534

75. The numbers in the leper hospital, Singapore, and leper asylum, Penang, during 1889 and 1890, were as follows :—

Hospitals.	1889.				1890.			
	Cases.	Died.	Discharged or Absconded.	Remained.	Cases.	Died.	Discharged or Absconded.	Remained.
Leper Hospital - - -	93	26	45	22	132	18	87	27
Leper Asylum, Pulau Jerejak -	280	100	20	160	155	91	40	24

BANKRUPTCY ORDINANCE.

76. The Official Assignee reporting on the working of the Bankruptcy Ordinance, 1888, states as follows :—

The total number of receiving orders made and proceeded with during the year 1890 was :—

	No. of Proceedings.	No. of Debtors.
In Singapore - - -	54	60
In Penang - - - -	7	7
In Malacca - - - -	—	—
Total - -	61	67

which, compared with the bankruptcy proceedings in 1889, shows an increase in the three Settlements of 16 estates.

77. The following table will show the estimated loss to creditors in the three Settlements. The estimate is, however, that of the debtors themselves, and the actual loss will probably far exceed this estimate :—

Settlement.	Estimated Assets.	Estimated Liabilities.	Nett estimated Loss to Creditors.
	$ c.	$ c.	$ c.
Singapore - -	402,065 05	862,627 64	460,562 59
Penang - - -	6,297 60	69,599 84	63,302 24
Malacca - - -	—	—	—
Total - -	408,362 65	932,227 48	523,864 83

78. Six compositions or schemes of arrangements were sanctioned by the Supreme Court, as against three in 1889. Out of 829 creditors scheduled by debtors in their statements of affairs, 692 lodged proofs of their claims amounting to $940,833 55. The number of proofs lodged exceeded by 278 those lodged in 1889.

REGISTRATION OF JOINT STOCK COMPANIES.

79. The number of joint stock companies registered during the year was as follows :—

—	Number.	Amount of Capital.
		$
Singapore - - - -	5	1,035,350
Penang - - - -	2	509,000
Total - -	7	1,544,350

METEOROLOGY.

80. The following statement shows the maximum, minimum, and mean temperature of the air at each of the Settlements during the year :—

—	Maximum.	Minimum.	Mean.
	Fahr. ° ′	Fahr. ° ′	Fahr. ° ′
Singapore - - - -	91 2	67 5	78 9
Penang - - - - -	93 0	69 5	80 0
Province Wellesley - - -	93 5	70 0	82 7
Malacca - - - -	90 0	65 4	81 8

STRAITS SETTLEMENTS.

81. Complete returns of rainfall for the whole year were received from 39 stations in the Colony. The heaviest rainfall was in Penang and Singapore.

82. The following table shows the total rainfall at each of the Settlements, the maximum and minimum rainfall registered in one month, and the maximum in 24 hours:—

Settlement.	Total Rainfall.	Maximum Fall in one Month.	Minimum Fall in one Month.	Maximum Fall in 24 hours.
	Inches.	Ins.	Ins.	Inches.
Singapore - -	117·78	July - 22·28	May - 2·94	6·85

Province Wellesley.	100·40	Oct. - 24·20	Dec. - 0·42	10·00
Malacca - -	72·29	Jan. - 20·50	June - 0·20	8·50
Dindings - -	82·29	Aug. - 11·85	Dec. - 0·41	4·50

POLICE AND CRIME.

83. The report of the committee appointed in 1889 to inquire into and suggest remedies for the unsatisfactory state of the administration and work of the police force was issued and dealt with in 1890. Some of the chief recommendations of the committee adopted after full consideration by the Executive Council were:—

(*a.*) The Inspector-General of Police to be Inspecting Officer for the three Settlements, and not, as hitherto, chief police officer in Singapore, the chief police officer at each Settlement, including Singapore, being the Superintendent.

(*b.*) Higher rates of pay to be given to the Native contingent — Sikhs, Malays, and Klings.

(*c.*) Introduction of Chinese constables.

(*d.*) Police regulations to be compiled anew.

(*e.*) The higher appointments in the police to be filled by the cadets of the Civil Service.

84. The authorised strength of the police force at the end of 1890 was:—

1 Inspector-General.
3 Superintendents.
3 Assistant Superintendents.
3 Chief Inspectors.
21 Inspectors.
66 European contingent of all ranks.
229 Sikh contingent of all ranks.
1,813 Malay, Kling and Chinese contingent of all ranks.

But there still was a deficiency in the Malay and Kling contingent in all three Settlements.

85. The report on the conduct of the European contingent is not entirely favourable, and the Malays and Klings show no improvement, but the Sikhs are said to have given satisfaction.

86. One hundred and fifty-eight (158) men were dismissed from the force during the year for police offences, and 56 cases were sent for trial before the Magistrates of Police.

87. The number of cases reported to the police was 962 more, and the number of arrests 3,374 less, than 1889. There was a considerable increase in the number of serious cases.

88. The Inspector-General of Police reports that the secret societies were suppressed under the law on 1st July 1890. In the latter part of 1890 a society having for its motto "Sui Lok Ping On," meaning "Peace and comfort by sea and land," by which name it is called, but more truly and commonly known as the "Broken Coffin Society," the operations of which consisted chiefly in the blackmailing and robbing on board ship of passengers between the Straits and China, showed itself in strength, but the banishment of two of its leaders completely stopped its operations for a time.

JUDICIAL.

89. There was a small increase in the number of prisoners brought before the Supreme Court during the year. The percentage of convictions was 73, as compared with 63 in 1889.

90. The total number of civil cases showed a decrease, but the amount involved was $5,700,000, as compared with $3,100,000 in the previous year.

91. There were 89 bankruptcy petitions, as compared with 49 in 1889.

92. The number of prisoners brought before the police and marine magistrates was less than in 1889, and the cases instituted in the courts of requests (which have jurisdiction when the amount does not exceed $50) also showed a decrease.

PRISONS.

93. The statistics of the prisons of the Colony differ little from those for the year 1889, though there is a slight increase in the numbers, as might be expected with the increasing population.

94. The conduct of the native prisoners was better than in 1889. The number of minor offences showed a decrease, and the serious offences were only about half as many as in the previous year. There were no serious cases of assault on prison officers, and only one escape, the prisoner being recaptured a few days later. Three cases of suicide by hanging, all of Chinese, occurred in the Singapore Prison.

95. The health of the prisoners in all three Settlements was good.

STRAITS SETTLEMENTS.

96. The penal scale of diet used since 1887 for all prisoners of six weeks and under was extended during the year to all prisoners sentenced to three months and under. The reports called for later on showed that the extension had no prejudicial effect on the health or discipline of the prisoners, while a very substantial saving in the cost of the prison rations resulted, the total annual saving to the Colony being between $6,000 and $7,000.

THE DINDINGS.

97. The revenue for 1890 was $1,018 11 below that of 1889, the Opium Farm being reduced in proportion with the Penang Farm. The land revenue was also slightly less than in 1889, being $7,038 50 against $7,626 75. The offices have, with the exception of the Post Office, been all removed from Pangkor to Lumut, where a timber depôt for the Colony has been established.

There have been cases of fever at the new station, but they have generally been of a slight character, and on the whole Lumut appears to be healthy.

(Signed) J. F. DICKSON,
Colonial Secretary,
Straits Settlements.

Singapore, 17th August 1891.

STRAITS SETTLEMENTS.

[For Report for 1890, *see* Colonial Report (Annual) No. 14.]

Sir C. C. SMITH to the MARQUESS of RIPON.

Government House, Singapore.
September 7, 1892.

MY LORD,

I HAVE the honour to forward copies of the report by the Colonial Secretary, in anticipation of the Blue Book of the Straits Settlements for the year 1891.

I have, &c.
(Signed) CECIL C. SMITH.

The Most Hon.
The Marquess of Ripon, K.G.
&c. &c. &c.

REPORT on the STRAITS SETTLEMENTS BLUE BOOK for the Year 1891.

Finance.

1. The revenue of the Colony for the year 1891, amounting to $3,826,603, was less than that for 1890 by $442,523. The principal decreases were under licenses, $403,177; postal revenue, $29,206; revenue stamps, $44,062; miscellaneous receipts, $9,897. On the other hand there were increases under interest of $16,098; land revenue, $54,908. There was a decrease in premia of nearly $20,000, but a sale of land on the Telok Ayer reclamation (the first since 1887) realised $67,594. Land rents also showed a satisfactory increase. There were outstanding on 1st January 1892 arrears of revenue amounting to $64,745; this sum includes a sum of $49,000 due under the head of licenses for the opium and spirit farms of Singapore and is recoverable.

Although the revenue derived from the Excise Farms (licenses) shows such a large falling off, it may be stated that the rents were higher than for 1886 to 1888 ($2,292,600 per annum) while the farms have been let for the three years 1892–1894 at $2,364,000 per annum.

STRAITS SETTLEMENTS. 1891.

2. The expenditure for 1891 amounted to $4,598,978, and shows an increase, as compared with 1890, of $841,285. There were, however, considerable decreases under some heads in 1891, as compared with 1890, namely, under public works, $186,007; land and houses purchased, $14,702; police, $8,892. The principal increases were under salaries, education, steam launches, postal, interest, miscellaneous services, and special expenses. The payments in respect of the military contribution during the year, including arrears, amounted to $1,087,649.

3. The assets and liabilities on the 31st December 1891 show a balance in favour of assets of $1,302,153, as against $1,221,593 on the 31st December 1890, being an increase of $80,560. The balance of $1,302,153 does not include the "Investments" given under the head of dependencies, amounting to $886,564, these being loans to the Native States and to the Malacca municipality, which are not at call, though they are of course ultimately recoverable. At the close of 1890, the balance of the public debt of the Colony amounted only to 5,800*l.*, and since then the whole of the loan of 100,000*l.* raised under Ordinance No. 1 of 1877 has been paid off and the Colony is free from debt.

4. The following statement gives particulars of the assets and liabilities on the 1st January 1891 and 1892, including dependencies under assets of $886,564:—

Assets.			Liabilities.		
—	1st January 1891.	1st January 1892.	—	1st January 1891.	1st January 1892.
	$	$		$	$
Cash on current account with local banks -	839,047	914,742	Balance in favour of the Crown Agents - -	7,205	—
Do. with Crown Agents -	—	120,356	Debenture loan - -	31,636	—
Investments, gold - -	1,013,762	1,013,762	Deposits, &c. - -	650,641	681,174
Invested in Government of India loans - -	350,000	796	Temporary loan -	—	745,135
Loans to Native States -	765,452	1,062,564	Expenditure in arrears -	685,738	184,561
Loans to municipalities -	553,300	330,500		1,375,220	1,610,870
Other investments -	188,459	242,253			
Miscellaneous advances, &c., - - -	60,371	49,869	Net balance to the credit of the Colony -	2,508,709	2,188,717
Revenue in arrears -	113,538	64,745			
Total - -	3,883,929	3,799,587	Total - -	3,883,929	3,799,587

5. The course of exchange is shown in the following table:—

Bank Bills.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
On London:— Sterling, on demand, Highest -	3 6¼	3 4½	3 3¼	3 2¾	3 3	3 4	3 4	3 3¾	3 3¼	3 2¾	3 2¼	3 3¾
Lowest -	3 5½	3 2¼	3 2¼	3 2¼	3 2¼	3 2¼	3 3¾	3 3¼	3 2¾	3 2¼	3 1¾	3 1¾

The highest rate of exchange during the year was in January, viz., 3*s.* 6¼*d.*, and the lowest rate of exchange during the year was in December, viz., 3*s.* 1⅜*d.*

6. The total bank note circulation of the Colony on the 31st of December 1891 was $5,820,870.

PUBLIC WORKS.

7. The following are the principal works undertaken, carried on, or completed, in 1891 :—

Principal Works.	Estimated Cost.	
SINGAPORE.	$	c.
Drill Shed for Volunteer Artillery	12,000	00
Telok Ayer reclamation	300,000	00
Beach Road reclamation	51,183	00
Reconstruction of river walls	25,000	00
New Johnstone's pier	24,000	00
PENANG.		
New Government offices	250,000	00
Water supply to Bukit Mertajam	32,500	00
New convalescent bungalow	18,000	00
Clerks' quarters, Butterworth	11,300	00
Quarters for district officer and clerks, Nibong Tebal	12,000	00
Court house, Bukit Tambun	10,000	00
Reconstruction of quarters, central police station	38,000	00
New police administrative block	18,550	00
Tanjong Tokong—Batu Feringgi Road	50,500	00
Kubang Semang—Ara Rendang Road	35,600	00
MALACCA.		
New Water Works	230,000	00

Singapore.

8. On account of the necessity for providing for the augmented military charges now chargeable to the Colony by a decision of the Imperial Government, no new works of importance could be undertaken in 1891, and several which had been included in the estimates for the year had to be indefinitely postponed. Works which were in progress at the commencement of 1891, and which were referred to in the Annual Report for 1890, were completed, but beyond this little was done. The Telok Ayer reclamation was completed, but a small subsidence afterward occurred, which will necessitate alterations estimated to cost $22,000.

Penang.

9. The works executed at this Settlement were also, for the reason above given, confined in the main to such as had been commenced ; others had to be deferred or stopped.

STRAITS SETTLEMENTS. 1891.

10. The new Government offices were finally completed at a total cost of $228,639, on an estimate of $250,000. It has been found possible to provide in this building for the Post Office, which was not one of the departments intended to be accommodated there. The proposal to construct a new Post Office has therefore been abandoned.

11. The Bukit Mertajam water supply was completed at the end of the year, and an unexpended balance of the money voted for this work is being applied in extending the service to the village of Sungei Rambai. The scheme has been successfully carried out, and the supply of drinking water is much appreciated by those who benefit from it.

12. The new convalescent bungalow on Penang Hill is a solid structure, built of granite quarried on the spot, and good progress was made with this building during the year.

13. It was decided to postpone the commencement of the new Supreme Court at Penang, but the necessity of this work will no doubt be again considered when the funds at the command of the Colony permit of it.

14. Other services had also to be postponed, including the new road to Batu Feringgi, giving access to the spice plantations at the north of the Island.

15. In accordance with the recommendations of the police commission, the old quarters at the Central Station have been replaced by new and more extensive quarters, which include barracks for 118 single men, and a two-storey barrack for married men. The administrative block was practically completed at the end of 1890, and when the barrack accommodation is finished the police requirements will have been fully met.

16. The Kubang Semang—Ara Rendang Road has been in progress since 1889, and should be completed in 1892, thus opening up a section of country in Province Wellesley which has hitherto been difficult of access.

Malacca.

17. The much needed water-works were commenced during the year, contracts being concluded for the construction of an impounding reservoir at Ayer Keroh and a service reservoir on St. Paul's Hill.

General

18. The following is a list of works and services which remained in abeyance owing to want of funds:—

	$
Supreme Court, Singapore - - -	45,000
Sailors' Home - - - -	50,000
Town Market - - - -	45,000
Supreme Court Penang - - -	150,000
Sundry Works, Penang and Singapore -	75,000
Roads, Streets, and Bridges - - -	100,000
Military Barracks (60,000*l.*) - -	400,000
Revenue Survey - - - -	150,000
Total - - -	$1,015,000

19. Without having recourse to a loan, it may be difficult to proceed with these works, nearly all of which have received the sanction of the Secretary of State for the Colonies.

MUNICIPALITIES.

20. The following statement gives the actual revenue and expenditure, cash balances, and outstanding loans of the municipalities of the three Settlements respectively for 1890 and 1891 :—

Municipalities.	1890.	1891.
REVENUE:	$	$
Singapore - - - -	635,082	*a* 884,003
Penang - - - -	237,940	*b* 364,888
Malacca - - - -	25,245	*c* 24,486
	898,267	1,273,377
EXPENDITURE:		
Singapore - - - -	703,748	805,639
Penang - - - -	314,251	355,921
Malacca - - - -	23,244	23,280
	1,041,243	1,184,840
CASH BALANCE AT CLOSE OF YEAR:		
Singapore - - -	333,333	411,698
Penang - - - -	127,862	136,828
Malacca - - - -	2,001	3,206
	463,196	551,732
LOANS OUTSTANDING AT CLOSE OF YEAR:		
Singapore - - - -	550,000	800,000
Penang - - - -	250,000	350,000
Malacca - - - -	23,500	23,000
	823,500	1,173,000

a—Including balance of loan, $250,000.
b— Do. do. do., $100,000.
c— Including $3,000 grant-in-aid for drainage works.

21. Rates and taxes are levied by Government under powers conferred by section 274 of "The Municipal Ordinance, 1887," in the districts outside the municipalities of Singapore, George Town and Malacca, and the following statement shows the amounts so collected and the account on which they have been expended :—

Moneys levied.		Amount expended on Roads and Bridges.	
	$		$
Singapore - -	4,081	Singapore - -	43,436
Penang and P.W. -	62,769	Penang and P.W. -	167,670
Malacca - -	11,463	Malacca - -	89,014
	78,313		300,120

Excess of Expenditure over Receipts.

	$
Singapore - - - -	39,355
Penang and Province Wellesley -	104,901
Malacca - - - -	77,551
	221,807

The excess of expenditure is, of course, a charge upon the general revenue of the Colony.

LEGISLATION.

22. There were 16 meetings of the Legislative Council during the year, and 17 Ordinances were passed, in regard to none of which has Her Majesty the Queen exercised Her power of disallowance.

The following are among the more important Ordinances passed :—

An Ordinance to prohibit the importation of Foreign Coins. A large quantity of copper coins from North Borneo and Sarawak was being introduced into the Colony, and it was against this that the Ordinance was originally directed. Later on it became necessary to prohibit the importation of the subsidiary silver coins issued from the Chinese and Japanese Mints.

An Ordinance to amend the Savings Bank Ordinance, 1879 authorising the investment of the funds in Indian Government securities.

An Ordinance to regulate Chinese Labour on Agricultural Estates.

An Ordinance to amend the Post Office Ordinance, 1879.

In order to remove doubts as to whether the Letters Patent of the 17th June 1885 conferred on the Legislative Council the power of legislating for aliens, new Letters Patent, dated the 30th December 1891, were issued, in which such power is expressly given. The point had been raised in the Supreme Court on an application for a writ of *Habeas Corpus* in connexion with a Banishment order made by the Governor in Council, but had not been settled by judicial decision.

REGISTRY OF DEEDS AND REGISTRY OF BILLS OF SALE.

23. The fees collected under "The Registration of Deeds Ordinance, 1886," amounted to $6,115, being a decrease of $1,382 as compared with the receipts for 1890. The fees collected under "The Bills of Sale Ordinance, 1886," amounted to $1,195, as against $1,509 for 1890.

24. An Ordinance to amend "The Registration of Deeds Ordinance, 1886," was passed in 1891. The principal changes introduced by this enactment are :—

(*a.*) An alteration in the form of the certificate of identity which renders it unnecessary for persons to attend at the Registry to acknowledge the execution of deeds when a solicitor is willing to make the necessary certificate of inquiry.

(*b.*) Better provisions to enable the Registrar to refuse to register deeds not duly stamped, and deeds relating to land on which an arrear of land revenue is due to the Colony.

(*c.*) Provision for the protection of registering officers, acting *bonâ fide*.

POSTAL DEPARTMENT.

25. There was conspicuous increase in the business of this Department. In 1891, 2,315,590 articles were received, and 2,507,810 despatched, as compared with 2,276,258 and 2,285,628 respectively in 1890. There was, however, a decrease of 22,000 coolie letters passing through the Chinese Sub-Post Office in Singapore.

26. The revenue during the year was $119,768, being $29,206 less than the receipts in 1890. This decrease was not unexpected and is only natural when it is remembered that during the year the two chief items of revenue were reduced by 40 per cent.

27. The following reductions in postage have been made during the last two years :—

(1.) On August 1st, 1890, the late fee was reduced from 12 cents to five cents.

(2.) On January 1st, 1891, postage was generally reduced, namely, for the United Kingdom and the Western

Hemisphere from 10 cents, for the continent of Europe, Asia and Northern Africa from eights cents, for Australia from 12 cents, and for South Africa from 24 cents, to an uniform rate of five cents per ½ oz.

(3.) In August, the postage on newspapers and printed papers for Australia and South Africa was materially reduced.

(4.) In November, the prices of foreign post cards were reduced by 33 per cent.

It is satisfactory to notice that, notwithstanding these reductions, the falling off in revenue amounted to less than 16 per cent. compared with the year before.

28. The expenditure for 1891 amounted to $123,580, being $3,811 more than the revenue, and $12,872 more than the expenditure for 1890. It may be noticed that this is the first time since this became a separate Colony that the Post Office has not paid its expenses.

29. There was a very large increase in the operations of the Money Order Branch, the transactions amounting to $538,953 an increase of $143,120 over the transactions of 1890. The Money Order service has been extended to the out-stations of Butterworth, Bukit Mertajam, Nibong Tebal, Balik Pulau and Bukit Tambun, in all of which places the business has exceeded expectations.

SAVINGS BANK.

30. There was a satisfactory increase in the amount deposited during the year, which was $121,559, being $17,988 more than the sum withdrawn. The total sum at the credit of depositors on the 31st December 1891 was $152,923, and the aggregate sum lodged in the bank since its establishment in 1887 was $907,266.

31. Particulars of the business transacted by the branches in Singapore, Penang, and Malacca respectively are given in the following statement:—

——	Singapore.	Penang.	Malacca.
New accounts opened - - -	537	262	30
Accounts closed - - -	380	94	26
Accounts open at the end of the year -	794	216	39
	$	$	$
Deposited, in 1891 - - -	89,505	27,232	4,822
Repaid, in 1891 - - - -	73,797	25,432	4,340
Balance due to depositors at close of 1891 - - - - -	115,249	33,238	4,435

32. In February 1891 an Ordinance was passed which enabled the funds of the bank to be invested in Indian Government securities and since then the sum of $28,117.18 has been invested in 4 per cent. rupee paper.

EDUCATION.

33. The Education Code was revised during the year, the revised Code being published in the Gazette of the 21st August, 1891.

34. The principal changes are the addition of a 7th Standard to the Standards of Examination, thereby extending the period of the course of study of English from six to seven years; and the addition of a large number of subjects to the list of extra subjects. The first examination under the revised Code will be held in 1892.

35. One hundred and eighty-nine (189) schools were inspected and 7,716 pupils examined during the year, as against 184 schools and 7,264 pupils in 1890.

36. The expenditure on Education amounted to $174,510.78, as compared with an expenditure of $164,138.86 in 1890.

37. Educational progress during the year is shown by the following table:—

	1890.	1891.
Average enrolment at boys' schools :—		
Government English schools - -	1,002	1,114
Aided do. - -	2,854	3,016
Government Malay schools - -	6,759	6,805
Total - - - -	10,615	10,935

38. The average enrolment in the Government and private Girls' Schools in 1891 was 1,566.

POPULATION.

39. The population of the Colony, according to the Census taken on the 5th April 1891, as compared with the Census of 1881, is as follows:—

Settlement.	1881.			1891.		
	Males.	Females.	Total.	Males.	Females.	Total.
Singapore - - - -	105,423	33,785	139,208	141,330	43,224	184,55
Penang, Province Wellesley, and Dindings - - -	124,205	66,392	190,597	152,884	82,734	235,618
Malacca - - - -	52,059	41,520	93,597	50,337	41,833	92,17
Total - - -	281,687	141,697	423,384	344,551	167,791	512,342

STRAITS SETTLEMENTS. 1891.

Total population of the Colony, 1891, 512,342.

Total increase since 1881 -	-	88,958 or 21·0 per cent
Increase in males since 1881	-	62,864 or 22·3 „
Increase in females since 1881	-	26,094 or 18·4 „

Singapore.

Total increase since 1881 -	-	45,346 or 32·5 per cent.
Increase in males since 1881	-	35,907 or 34·0 „
Increase in females since 1881	-	9,439 or 27·9 „

Penang, Province Wellesley and Dindings.

Total increase since 1881 -	-	45,021 or 23·6 per cent.
Increase in males since 1881	-	28,679 or 23·0 „
Increase in females since 1881	-	16,342 or 24·6 „

Malacca.

Total decrease since 1881 -	-	1,427 or 1·5 per cent.
Decrease in males since 1881	-	1,722 or 3·4 „
Decrease in females since 1881	-	313 or 0·7 „

The decrease of the population of Malacca is believed to be temporary and to be due to special causes, the opening up of the Native States of Selangor, Sungei Ujong, and Negri Sembilan having offered a field of enterprise of which many Malacca Malays have availed themselves.

40. The population of the Protected Native States, in which a census was taken at the same time as that of the Colony, is as follows:—

——	Males.	Females.	Total.
Perak - - - -	156,408	57,846	214,254
Selangor - - -	67,051	14,541	81,592
Sungei Ujong - - -	17,234	6,368	23,602
Negri Sembilan - - -	23,327	18,290	41,617
Pahang - - - -	Not given.		57,462
Total - -	—	—	418,527

41. In Pahang great difficulty was experienced in taking the Census, and the Resident of Selangor has reported his doubts of the correctness of the returns of that State. With these exceptions the above returns may be considered fairly accurate.

42. The total cost of taking the Census in the Colony and compiling the returns was $28,024.84.

CHINESE IMMIGRATION.

43. There was only a slight decrease in the arrivals of Chinese deck-passengers from China, the number arriving in 1891 being 126,088, as compared with 127,936 in 1890.

44. It is satisfactory to notice that there was an appreciable increase in the female immigration, the numbers for 1890 and 1891 being 5,542 and 6,685 respectively. Of these, 4,710 landed in Singapore, 1,958 proceeded to Penang, and 17 to other ports. Of those who landed in Singapore, 548 afterwards proceeded to Selangor and a few to other places.

45. There was a considerable increase in the number of coolies arriving from Hongkong and Amoy, and a falling off in the immigrants from Swatow and Hainan, which is attributed to the failure of Sumatra tobacco and the consequent cessation of the demand for labour on estates.

46. There was a great decrease in the number of contracts to labour executed in the Colony, the total number being 17,956 as against 26,211 in 1890. Contracts to labour in the Dutch possessions were fewer by 4,770, but there was an increase of 592 in the Native States and 599 in Province Wellesley. Of the total number of contracts (17,956) signed in the Colony, 8,950 were for labour in the Colony and Protected Native States and 9,006 for labour in other places. The numbers in 1890 were respectively 6,502 and 19,702.

47. During the year under review, an Ordinance was passed for the purpose of regulating Chinese Labour on Agricultural Estates.

INDIAN IMMIGRATION.

48. During the year, 3,443 statute immigrants with 293 dependents arrived in the Colony, showing an increase of 618 as compared with 1890. Of this number, 2,644 were for service in the

STRAITS SETTLEMENTS. 1891.

Colony, and 799 for the Native States. 26,446 immigrants not under indenture arrived, being an increase of 8,145, while 23,912 returned to India.

49. The following table gives the statistics of the department since 1881 :—

——	1881.	1882.	1883.	1884.	1885.	1886.	1887.	1888.	1889.	1890.	1891.
Immigrants under indenture -	879	1,452	1,450	1,539	1,642	2,748	4,736	4,684	2,747	2,960	3,443
Dependents - -	159	209	176	177	49	244	310	317	104	158	293
Free immigrants	5,769	8,276	8,979	14,365	19,819	17,316	12,156	15,812	15,285	18,301	26,446

Returned to India	5,269	5,947	9,041	10,749	13,417	18,105	12,596	13,190	14,099	15,276	23,913
Remained in the Colony - -	1,538	3,990	1,564	5,332	8,093	2,203	4,606	7,623	4,037	6,143	6,269

50. In March, the Commission appointed to inquire into the state of labour in the Colony issued their report. It has been found necessary to indefinitely postpone action upon one of their principal recommendations—the appointment of an Agent-General for Emigration in the Madras Presidency—owing to the state of the Colonial finances and the necessity for strict economy.

TRADE AND SHIPPING.

51. The following tables give the value of the imports and exports at the three Settlements in 1890 and 1891 respectively :—

Imports.

——		Singapore.	Penang.	Malacca.
MERCHANDISE.		$	$	$
United Kingdom - -	1891	13,454,765	3,553,089	—
	1890	15,862,524	4,000,856	—
British Possessions - -	1891	25,048,149	13,281,514	—
	1890	23,634,101	15,718,175	—
Foreign Countries - -	1891	49,814,458	16,673,827	260,629
	1890	53,224,760	18,378,036	461,502

——		Singapore.	Penang.	Malacca.
MERCHANDISE—*cont.*		$	$	$
Between the Settlements -	1891	3,804,300	1,864,557	1,065,681
	1890	6,735,380	1,802,293	1,616,896
Total Value of Merchandise	1891	92,121,672	35,372,987	1,326,260
	1890	99,456,765	39,899,360	2,078,398

	1890	94,131,804	41,349,247	2,244,093
Grand Total Value of the Exports of the Straits Settlements - - - - -	1891			134,783,145
	1890			137,725,144

52. It will be seen from the above returns that if the item "Treasure" be excluded, the nett decrease in the total trade of

STRAITS SETTLEMENTS. 1891.

the Colony as compared with 1890 amounted to 14,616,307*l.* or about 5½ per cent.

53. The Trade Returns may now be considered to be as accurate as it is possible to make them, and in the preparation of them the European firms have, as a rule, readily assisted.

54. Low exchange and a general tightness of money account for the commercial depression which prevailed throughout the Colony throughout the year, while the situation was accentuated by the failure of important firms in the Colony and in Siam to meet their liabilities.

55. The following are a few of the principal imports to and exports from the Straits Settlements:—

Imports.

——	1890.	1891.	Increase.	Decrease.
	Pieces.	Pieces.		
Cotton piece goods -	7,117,374	5,038,657	—	2,078,717
	Tons.	Tons.		
Coal - - -	324,624	375,045	50,421	—
	Pikuls.	Pikuls.

Total, 1891 -	14,481	519,474	11,185	229,127	3,972	64,440	29,638	813,041
Do. 1890 -	11,061	421,325	11,291	236,068	4,319	66,760	26,671	724,153

REGISTRY OF SHIPPING.

58. The number and tonnage of the new vessels built in the Colony in 1890 and 1891 is shown in the following table:—

——	No.	Tonnage.
1891 - - - - -	70	4,506
1890 - - - - -	79	4,727

59. Some idea of the relative importance of shipping and commerce in 1891 and 1890 for Singapore and Penang may be gathered from the following returns:—

SHIPPING (EXCLUSIVE OF NATIVE CRAFT).

Singapore.

1891 - 8,339 vessels, measuring 6,613,257 tons.
1890 - 7,267 „ „ 5,945,034 „

Penang.

1891 - 5,917 vessels, measuring 3,501,813 tons.
1890 - 6,078 „ „ 3,298,261 „

TRADE.

Singapore.

	$
1891 - - - -	194,737,695
1890 - - - -	206,765,764

Penang.

	$
1891 - - - -	1,777,899
1890 - - - -	85,137,647

60. Out of the increase in the revenue of $9,193, light dues contributed an increase of $7,558. This is accounted for, in a great measure, by the increase in the arrivals and departures of steamers and square-rigged vessels. The enforcement of the regulation requiring the annual renewal of Junk and Tongkang licenses more than doubled the fees for registration of these vessels.

LIGHTHOUSES.

61. Lighthouses, launches, buoys, and beacons have been kept in an efficient condition, new rollers have been supplied to the Muka Head and Fort Cornwallis Lights, and the Malacca Harbour Lighthouses has been fitted up with part of the old Horsburgh light, the re-arrangement giving general satisfaction.

PUBLIC HEALTH.

62. The health statistics for 1891 are fairly satisfactory, but the Colony cannot be said to have been entirely free from epidemic disease.

63. Cholera appeared in all the Settlements—to a slight extent in Singapore, but more noticeably in Penang, while in Malacca it may be said to have been epidemic for a short time.

64. The following return shows the number of cases of cholera, and deaths from that disease, in the three Settlements respectively :—

—	Cases.	Deaths.
Singapore - -	36	24
Penang - - -	70	48
Malacca - - -	119	89

65. There were 168 cases of small-pox in the Colony, and 44 deaths.

66. There was a decrease in the number of cases of *beri-beri* treated, and the death-rate among patients suffering from this disease was lower.

67. Only three authenticated cases of hydrophobia were brought under the notice of the medical authorities during the year.

68. The following table gives the number of patients treated in all Government hospitals, and of the deaths among them, during 1891, as compared with 1890 :—

—	Number of Patients treated.			Number of Deaths.			Percentage of Deaths to Total treated.		
	Europeans.	Natives.	Total.	Europeans.	Natives.	Total.	Europeans.	Natives.	Total.
1891 - - -	944	22,176	23,120	43	2,710	2,753	4·55	12·22	11·90
1890 - - -	832	19,947	20,779	37	2,414	2,451	4·44	12·10	11·79

69. The number of patients treated and the deaths that occurred in hospital in each of the Settlements were as follows:—

Settlement.	Total treated.	Deaths.
Singapore - - - -	11,015	1,282
Penang and the Dindings - -	6,801	777
Province Wellesley - -	2,485	360
Malacca - - - -	2,819	334

70. The numbers in the leper hospital, Singapore, and leper asylum, Penang, during 1890 and 1891, were as follows:—

Hospitals.	1890.				1891.			
	Cases.	Died.	Discharged or Absconded.	Remained.	Cases.	Died.	Discharged, Absconded, or transferred.	Remained.
Leper Hospital -	132	18	87	27	155	49	49	57
Leper Asylum, Pulau Jerejak -	326	91	—	235	353	123	—	230

71. A serious explosion of cartridges which occurred at the Central Police Station, Singapore, in March, caused the death of 11 constables.

BANKRUPTCY ORDINANCE.

72. The total number of receiving orders made during the year 1891 was:—

—	No. of Proceedings.	No. of Debtors.
In Singapore - - -	51	65
In Penang - - - -	8	11
In Malacca - - - -	—	—
Total - -	59	76

of these 55 were proceeded with, as against 58 in 1890.

73. Liabilities, according to the debtors' estimates, amounted to $2,687,114, as against $932,227 in the previous year, and the proofs lodged with the Official Assignee gave a total of $3,903,962, as against $940,833 in 1890.

REGISTRATION OF JOINT STOCK COMPANIES.

73. The number of joint stock companies registered during the year was as follows :—

——	Number.	Amount of Capital.
Singapore - - - -	6	$ 1,041,005

74. The directors of several companies were prosecuted in Penang for breach of the provisions of "The Companies Ordinance, 1889," nominal fines being imposed in most cases.

METEOROLOGY.

75. The following statement shows the maximum, minimum, and mean temperature of the air at each of the Settlements during the year :—

——	Maximum.	Minimum.	Mean.
	Fahr.	Fahr.	Fahr.
Singapore - - - -	88·2	70·8	79·5
Penang - - - -	91·9	73·0	80·6
Province Wellesley - - -	93·0	70·0	80·5
Malacca - - - -	92·0	68·0	79·1

76. Returns of rainfall for the whole year were received from 52 stations in the Colony. The heaviest rainfall was in Penang.

77. The following table shows the total rainfall at each of the Settlements, the maximum and minimum rainfall registered in one month, and the maximum in 24 hours :—

Settlement.	Total Rainfall.	Maximum Fall in one Month.	Minimum Fall in one Month.	Maximum Fall in 24 hours.
	Inches.	Ins.	Ins.	Inches.
Singapore - -	88·48	Mar. - 15·09	Aug. - 1·90	5·82
Penang - -	126·69	Sept. - 31·74	April - 1·75	8·12
Province Wellesley.	103·91	Sept. - 20·26	Mar. - 1·51	5·12
Malacca - -	[illegible] 09	Oct. - 29·12	Feb. - 0·10	9·35
Dindings - -	77·39	Sept. - 14·20	Aug. - 0·56	5·60

POLICE AND CRIME.

78. The following table shows the stength and distribution of the police force in 1891:—

Settlement.	Europeans.			Native Contingent.		Sikh Contingent.		Total.
	Officers.	Non-Commissioned Officers.	Men.	Non-Commissioned Officers.	Men.	Non-Commissioned Officers.	Men.	
Singapore - - -	14	6	30	64	700	7	105	926
Penang - - -	18	4	24	71	689	6	73	879
Malacca - -	5	2	—	38	253	4	34	336
Total - -	37	12	54	173	1,642	17	202	2,141

79. Towards the end of the year, five stations in Malacca and two in Singapore were closed owing to diminution in crime in their neighbourhood.

80. The Chinese contingent, which was introduced on the recommendation of the police commission of 1889, has not proved entirely satisfactory.

81. One hundred and fourteen (114) men were dismissed from the force during the year for police offences, and 77 were sent for trial before the magistrates.

82. Twenty-five thousand four hundred (25,400) arrests were made during the year as against 23,952 in 1890. 12,828 offences were reported to the police, of which 4,086 remained undiscovered.

83. Proceedings were taken against a secret society in Singapore called "Tong Beng," which had been suppressed some years ago. Eleven of the members were convicted and two of the headmen banished after inquiry by his Excellency the Governor in Council.

84. Cases of serious crime were somewhat less numerous in 1891 than in the preceding year. There were fewer cases of murder, gang-robbery, and causing grievous hurt. Four criminals were executed, as against eight in 1890.

85. There was, on the other hand, an increase in Singapore and Malacca of minor offences against the person and against property, while in Penang there was a slight decrease.

JUDICIAL.

86. There was a decrease in the number of prisoners brought before the Supreme Court in 1891, as compared with 1890, the numbers being respectively 303 and 431.

87. The courts of two magistrates relieve the Supreme Court of a considerable amount of work, but even accounting for the cases tried in these courts, there was still a satisfactory decrease in the more serious crimes in 1891.

88. The number of acquittals was very high, being 105, as against 180 convictions. Penang is responsible for this high rate, there being no less than 77 acquittals to 81 convictions in that Settlement.

89. Thirty-three thousand six hundred and fifty-three (33,653) cases, in which 49,773 defendants were implicated, were brought before the police courts of the Colony. The increase is considerable, the numbers for 1890 being 30,671 and 44,715 respectively.

90. There was a decrease in the civil business of the Supreme Courts, 2,862 cases being commenced in 1891, as compared with 3,734 in 1890. The amount of debt and damages involved was $5,038,000.

91. There was an increase in the number of cases begun in the Courts of Requests, but the aggregate of the sums in dispute was slightly less than in 1890.

92. Six hundred and thirty-two (632) ecclesiastical petitions were filed during the year, including 115 applications for probate and administration under "The District Delegates Ordinance, 1887," which is now finding favour with the poorer classes of Penang and Province Wellesley. Under this Ordinance probate and letters of administration are granted in respect of estates under $500 by the district officers, the fee being $2, which includes all charges.

PRISONS.

93. The health of the prisoners in the three Settlements was good during the year, the number of deaths being 31. Two suicides occurred in the Singapore prison.

94. One convict effected his escape from the Penang prison and was not re-taken. There were two executions in Penang.

DINDINGS.

95. Little noticeable progress can be recorded in this district, and the receipts under many heads of revenue have continued to decrease. The Census showed an increase of 1,263 in the population since the previous Census.

96. Malarial fever was rife throughout the year, which is reported to have been an exceptionally unhealthy one.

97. Encouragement is being given to the introduction of new settlers at the Dindings and these include some from Achin.

(Signed) W. E. MAXWELL,
Colonial Secretary,
Straits Settlements.

No. 81.

STRAITS SETTLEMENTS.

[For Report for 1891, *see* Colonial Report (Annual) No. 59.]

Sir C. C. SMITH to the MARQUESS of RIPON.

Government House, Penang,
May 9, 1892.

MY LORD,

I HAVE the honour to forward copies of the report by the Colonial Secretary, in anticipation of the Blue Book of the Straits Settlements for the year 1892.

I have, &c.
(Signed) CECIL C. SMITH.

The Most Hon.
The Marquess of Ripon, K.G.,
&c. &c. &c.

REPORT IN ANTICIPATION OF THE STRAITS SETTLEMENTS BLUE BOOK FOR THE YEAR 1892.

Finance.

1. The revenue of the Colony for the year 1892 amounted to $3,652,789 (Singapore, $2,054,279; Penang, $1,304,003; Malacca, $294,507), being less than the revenue for 1891 by $173,814.

2. The principal heads under which a falling-off is noticeable are:—

	$
Land revenue - - - -	58,069
Interest - - - - -	193,263

In the case of land revenue the decrease is very easily explained. In 1892 no special sales of town lands were held, and consequently, under this head alone, the year 1892 showed a decrease of $62,081 on the receipts of the previous year.

Sales, which may or may not take place, are an intermittent source of revenue, and their omission in a particular year is not to be taken into consideration in reviewing the financial position

of the Colony. The gradual growth of the permanent land revenue is highly satisfactory. The Crown rents have, in consequence of improved administration, risen steadily in all the Settlements—in Singapore from $27,891 in 1883 to $40,876 in 1892, in Penang from $26,179 in 1883 to $58,654 in 1892, and in Malacca from $55,441 in 1883 to $81,267 in 1892.

A falling off under the head of interest was to be expected under the altered circumstances of the Colony, the surplus balances, which had been invested, having been realized to meet the increased military contribution and other charges. Again, the Negri Sembilan States and Pahang have been unable to pay interest on their loans, and the anticipated receipts of the Colony for 1892 have been diminished accordingly. These payments are, however, only deferred.

3. The principal increases were as follows :—

	$
Licenses	26,395
Stamps	5,891
Postage	18,341
Fines, forfeitures and fees of court	3,135
Fees of office	2,903
Reimbursements	15,212
District collections	4,765
Total	$76,642

Under the head of Licenses the increase is principally to be attributed to pawnbrokers' licenses, which show an increase of $14,395.

Postal revenue shows an increase under all its heads, but chiefly in postage stamps ($12,653).

The increase in reimbursements ($16,332) is due to the progress of survey and revenue settlement in Penang and Province Wellesley, the amount recovered for erecting boundary stones being $23,390.19.

4. The expenditure for 1892 amounted to $4,270,575, showing a decrease, as compared with 1891, of $328,403. The principal decreases were as follows :—

	$
Military expenditure	249,682
Special expenses	81,184
Miscellaneous services	70,884
Roads, streets and bridges	61,664
Marine Department	12,678
Education	9,525
Transport	8,768

There was an increase under the following heads :—

	$
Salaries - - - - -	40,684
Pensions - - - - -	9,690
Medical - - - - -	7,309
Interest - - - - -	75,327
Works and Buildings - - -	40,469

5. The assets and liabilities on the 31st December, 1892, show a balance in favour of assets of $674,682, as against $1,302,123 on the 31st December, 1891, being a decrease of $627,471.

The balance of $674,682 does not include the investments given under the head of Dependencies, amounting to $1,048,465, these being loans to the Native States and to the Malacca Municipality. These loans are not at call, and though eventually recoverable, cannot be realised for some time to come.

6. The following statement gives particulars of the assets and liabilities on the 1st January, 1892 and 1893, including Dependencies under assets of $1,048,465 :—

Assets.			Liabilities.		
—	1st January 1892.	1st January 1893.	—	1st January 1892.	1st January 1893.
	$	$		$	$
Cash on current account with local banks -	914,742	853,981	Deposits, &c. - - -	681,174	876,792
Do. with Crown Agents -	120,356	26,189	Temporary loan -	745,135	—
Investments, gold - -	1,013,762	136,869	Expenditure in arrears -	184,561	21,500
Invested in Government of India loans - -	796	—		1,610,870	898 ,22
Loans to Native States -	1,062,564	1,025,965			
Loans to municipalities -	330,500	22,500			
Other investments -	242,253	359,722			
Miscellaneous advances, &c., - - -	49,869	142,413	Net balance to the credit of the Colony -	2,188,717	1,723,147
Revenue in arrears -	64,745	53,800			
Total - -	3,799,587	2,621,439	Total - -	3,799,587	2,621,439

7. The course of exchange during the year 1892 is shown in the following table :—

Bank Bills.	January.		February.		March.		April.		May.		June.		July.		August.		September.		October.		November.		December.	
	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.	s	d.	s.	d.	s.	d.	s.	d.	s.	d.
On London :— Sterling, on demand, Highest -	3	0¼	2	11⅜	2	10⅞	2	9⅝	2	9⅝	2	10⅝	2	10½	2	9⅝	2	9½	2	9⅞	2	9½	2	9
Lowest -	3	0	2	11	2	10⅜	2	9	2	9¼	2	10⅛	2	10½	2	9¼	2	9	2	9¼	2	9¼	2	8

The average rate of exchange during the year on demand was 2*s.* 10$\frac{2}{5}$*d.*, and at four months' sight was 2*s.* 10$\frac{3}{5}$*d.*

8. The total estimated bank-note circulation of the Colony on 31st December, 1892, was $6,353,191, but it should be remarked that on that date the notes of the Chartered Mercantile Bank of India, London, and China had been to a great extent withdrawn from circulation owing to the reconstruction of the Bank. The return deals, therefore, almost altogether with the note issue of the Chartered Bank of India, Australia and China, and of the Hongkong and Shanghai Banking Corporation.

PUBLIC WORKS.

9. The works undertaken, carried on, or completed, in 1892 were few and unimportant. The following return comprises the more important of the items of expenditure :—

Principal Works.	Estimated Cost.	
	$	c.
SINGAPORE.		
Extra female leper ward and new male ward - - -	6,600	00
Extension of Beach Road reclamation - - - -	9,500	00
Completion of Telok Ayer reclamation - - -	22,000	00
PENANG.		
New convalescent bungalow - - - - -	20,500	00
Clerks' quarters, Butterworth - - - - -	11,300	00
Quarters for district officer and clerks, Nibong Tebal - -	14,150	00
Court house, Bukit Tambun - - - - -	10,000	00
Kubang Semang-Ara Rendang Road - - - -	35,600	00
Trans-Krian Road - - - - - -	17,500	00
Reconstruction of quarters, central police station - -	38,000	00
Tanjong Tokong-Batu Feringgi Road - - - -	50,500	00
MALACCA.		
Water Works - - - - - - -	249,963	00

Singapore.

10. In Singapore, owing to want of funds, many pressing works had to be abandoned and little has been done beyond ordinary maintenance. The leper wards were in such a ruinous state that they had to be removed. The Beach Road Reclamation is a service necessitated by the dredging of the Singapore River and by the importance of covering in the spoil thus obtained with red earth to prevent malaria. The Telok Ayer Reclamation gave some further trouble, but the bank has now almost settled down, and this useful and profitable work may be said to be practically complete.

Penang.

11. The first six works named in the list were finished within the year. At the central police station the barracks for 118

single men were completed, and considerable progress was made with the two-storied barrack for 40 married men.

The works begun on the Tanjong Tokong-Batu Feringgi Road had to be stopped owing to want of funds, which is much to be regretted.

MUNICIPALITIES.

12. The following statement gives the actual revenue and expenditure, cash balances, and outstanding loans of the municipalities of the three Settlements respectively for 1891 and 1892:—

Municipalities.	1891.	1892.
REVENUE:	$	$
Singapore - - - -	*a* 884,003	608,081
Penang - - - -	*b* 364,888	281,717
Malacca - - - -	24,486	21,049
	1,273,377	910,847
EXPENDITURE:		
Singapore - - - -	805,639	762,702
Penang - - - -	355,921	394,439
Malacca - - - -	23,280	22,786
	1,184,840	1,179,927
CASH BALANCE AT CLOSE OF YEAR:		
Singapore - - -	411,698	199,607.57
Penang - - - -	136,828	24,107.00
Malacca - - - -	3,206	1,469.00
	551,732	225,183·57
LOANS OUTSTANDING AT CLOSE OF YEAR:		
Singapore - - - -	800,000	800,000
Penang - - - -	350,000	350,000
Malacca - - - -	23,000	22,500
	1,173,000	1,172,500

a—Including balance of loan, $250,000.
b— Do. do. do., $100,000.

The municipalities of Singapore and George Town, Penang, are pressing for increased borrowing powers, being dissatisfied with those which are now allowed to them by "The Municipal Ordinance 1887."

There is no doubt that the present limit (three times the annual income from rates and taxes) is small compared with that which has been fixed for municipalities in other places, and urgent sanitary works are required in both towns.

The water works at Malacca, estimated to cost $247,000, are being constructed at Government expense, the municipality, which

has an annual income of $22,500 only, being unable to undertake an enterprise of this magnitude. The water rate will be Colonial revenue, but will be collected by the municipality for the Government.

13. In the country districts beyond the limits of the municipalities of Singapore, George Town, and Malacca, rates and taxes were collected during the year 1892, under section 274 of the Municipal Ordinance, and the following statement shows the amounts so collected and how far they contribute towards the expenditure which they are designed to meet.

Rates and Taxes levied.		Amount expended on Roads and Bridges.	
	$		$
Singapore - -	5,182.17	Singapore - -	40,300.00
Penang - -	63,535.59	Penang - -	125,692.62
Malacca - -	13,470.45	Malacca - -	75,640.54
Total - -	82,188.21	Total - -	241,633.16

The excess of expenditure over revenue ($159,444.95) falls, of course, on the general revenue of the Colony.

LEGISLATION.

14. Twenty-three meetings of the Legislative Council were held during the year, and 17 Ordinances were passed.

The list is as follows :—

No. I.—An Ordinance to remove doubts as to the validity of certain marriages solemnized in the Colony, by Clergymen of the Church of England without previous publication of Banns.

No. II.—An Ordinance for the Enrolment of Coast Defence Volunteers.

No. III.—An Ordinance for giving to a foreign Company called the Netherlandsche Handel Maatschappij certain facilities for carrying on its business in the Colony.

No. IV.—An Ordinance to amend "The Petroleum Ordinance, 1883."

No. V.—An Ordinance for the regulation and control of Jinrikishas.

No. VI.—An Ordinance for restricting Labour on Sunday on board Vessels in the Waters of the Colony.

No. VII.—An Ordinance to establish a Code of Criminal Procedure.

No. VIII.—An Ordinance to repeal certain enactments regulating Criminal Procedure.

No. IX.—An Ordinance for making provision for the Public Service for the year 1893.

No. X.—An Ordinance for making final provision for the Public service for the year 1891.

No. XI.—An Ordinance to remove doubts as to the validity of the Ordinances enacted subsequently to the issue of the Queen's Letters Patent of the 17th of June 1885.

No. XII.—An Ordinance to amend Ordinance No. VIII. of 1892.

No. XIII.—An Ordinance to amend "The Steam Vessels Ordinances, 1882 and 1887."

No. XIV.—An Ordinance to amend "The Crimping Ordinance, 1877."

No. XV.—An Ordinance to amend "The Widows and Orphans' Pension Fund Ordinance, 1885."

No. XVI.—An Ordinance to amend "The Indian Immigration Ordinance, 1884."

No. XVII. An Ordinance to amend "The Marine Court of Inquiry Ordinance, 1870."

Of these Ordinances, the most important were Nos. V., VI., and VII. Ordinance No. V. effected a change in the law relating to Jinrikishas by tranferring the responsibility for such offences as loitering for hire, street obstruction, plying for hire with jinrikishas unfit for use, &c. from the puller to the owner of the vehicle, the penalty provided being the detention of the jinrikisha in the depôt or the suspension of the license. It came into force in the Settlement of Singapore, on the 1st of September, 1892. Ordinance No. VI. put a stop to the working of cargo on board ships within the waters of the Colony on Sundays, except under certain special circumstances. It came into force on the 1st of July 1892; it has worked smoothly and it is acknowledged to be a boon to the seafaring community, while it does not unduly interfere with the requirements of trade. Ordinance No. VII. of 1892 consolidated and amended the law of Criminal Procedure, supplying, it may be hoped, a measure the want of which has been complained of constantly since 1872, when the penal code was brought into force. It has not, however, as yet come into force, as some further amendments are contemplated.

His Excellency has been informed by the Secretary of State that Her Majesty will not be advised to exercise her powers of disallowance in respect of these Ordinances.

REGISTRY OF DEEDS.

15. The fees collected under "The Registration of Deeds Ordinance, 1886," (which is based on the principle of the Yorkshire Act, and has been so far only applied to the Settlement of Singapore) amounted to $5,290.75, being $825 below the total receipts of the previous year. This falling off is to be attributed to the depression in the Singapore land market which existed throughout the year, only a small amount of property changing ownership. The

registration and mutation of titles to land in Penang and Malacca is still carried on (pending the completion of survey) under a condemned system which dates from 1839, and no penalty attaches to non-registration or delay in registering.

POSTAL DEPARTMENT.

16. The business of this Department still continues to increase. During the year, 2,385,280 articles were received and 2,639,190 despatched, as against 2,315,590 and 2,507,810 respectively in 1891. The number of Chinese coolie letters passing the Chinese Sub-Post Office in Singapore shows an increase of 13,057, against a falling-off of 22,000 the year before.

The revenue of the Department amounted to $138,350, an increase of $18,581 over the receipts in 1891, showing that the reduction in the rates of postage in 1891 has had only a temporary effect, and that there is reason to anticipate a steady rise in the receipts in future years.

On 1st January, 1892, postage on a packet of printed papers addressed to any part of the postal world was reduced from 2 cents to 1 cent for every 2 ozs.

The expenditure for 1892 amounted to $132,941, being $5,409 less than the revenue and $9,361 more than the expenditure in the previous year. There must, of course, be an increase of staff proportionate to the expansion of the Department, and it is to this that the rise in expenditure above remarked on is due.

The transactions of the Money Order Branch amounted to $588,126, showing an increase of $49,173 over those of 1891. In Singapore, the superintendence of the Money Order Branch and of the Savings Bank has been entrusted to a special officer appointed by the Home Government.

SAVINGS BANK.

17. The following statement gives the particulars of the business transacted by the branches at Singapore, Penang, and Malacca during the year:—

——	Singapore.	Penang.	Malacca.
New accounts opened - - -	537	146	45
Accounts closed - - -	440	136	30
Accounts open at the end of the year -	1,048	262	43
	$	$	$
Deposited in 1892 - - -	104,657	27,622	7,487
Repaid in 1892 - - - -	86,571	29,131	6,809
Balance due to depositors at close of 1892 - - - - -	138,040	37,692	6,963

The increase in the amount deposited during the year over that deposited in the previous year was $17,315. The deposit during 1891 showed a similar increase over the figures for 1890.

The total sum at the credit of depositors on the 31st December, 1892, was $182,695, and the aggregate amount lodged since the establishment of the Bank in 1877 proved to be $1,047,032. Under Ordinance III. of 1891, the sum of $70,404.64 has been invested in Government of India 4 Per Cent. Rupee Paper.

The rate of interest allowed to depositors was lowered from 4 per cent. to 3½ per cent. from and after the 1st of October, 1892.

EDUCATION.

18. The first examinations under the revised Code of 1891 were held at the inspections at the end of 1892.

Two hundred (200) schools were inspected, and 8,468 pupils examined during the year, as compared with 189 schools and 7,716 pupils in 1891.

The expenditure on Education amounted to $180,350,* as compared with an expenditure of $174,510 in 1891.

The average enrolment at the Boys' Schools in the Colony is shown in the following table:—

—	1891.	1892.
Government English schools - -	1,114	1,027
Aided do. - -	3,016	[illegible],419
Government Malay schools - -	6,805	[illegible],216
Total - - - -	10,935	11,662

The average enrolment in the Government and Private Girls' Schools in 1892 was 1,781, as against 1,566 in the previous year.

POPULATION.

19. The number of births registered in 1892 in all the Settlements was 12,690, of which 6,660 were those of male, and 6,030 those of female, children.

20. The deaths registered in 1892 numbered 16,033, as against 17,570 in 1891, or a decrease of 1,537, the highest rate of mortality having been recorded at Singapore. The greatest number of deaths occurred among persons between the ages of 25 and 35, the death-rate being 31·29 of the total number.

* Approximately only, Crown Agents' account not being finally adjusted.

STRAITS SETTLEMENTS. 1892.

21. The following table gives the number of births and deaths registered in each Settlement during the past two years:—

Settlement.	Births.		Deaths.	
	1891.	1892.	1891.	1892.
Singapore - -	3,004	3,326	6,449	5,621
Dindings - - -	115	104	106	79
Penang - - -	2,248	2,395	4,903	4,241
Province Wellesley -	3,182	3,262	3,441	3,331
Malacca - - -	2,732	3,603	2,671	2,761
Total - -	18,211	12,690	17,570	16,033

The total population of the Colony, according to the Census of 1891, was 512,342.

As, judging from the results of the last Census, the population increases at the rate of 2·1 per cent. per annum, the population may now be roughly estimated to be 534,000.

CHINESE IMMIGRATION.

22. During the year 1892 there was a further decrease in the arrivals of Chinese deck passengers from China, the number being 122,029, as compared with 126,088 in 1891 and 127,936 in 1890.

There was an increase in the number of female immigrants, 6,867 having arrived, as against 6,685 in 1891. Of these, 4,804 landed in Singapore, 2,024 proceeded to Penang, and 39 to other ports. Eight hundred and twenty-two (822) of the Singapore arrivals proceeded subsequently to the Protected Native States and other places. Coolies have arrived from Hongkong and Swatow in increased numbers, but there was a great falling off in the immigration from Amoy and Hainan.

The total number of labour contracts executed in the Colony was 23,448, as against 17,956 in 1891. Contracts to labour in the Dutch Possessions were fewer by 3,195, while, on the other hand, the Native States contracts show an increase of 10,474. Contracts for Province Wellesley show a decrease of 60.

Out of the total number of contracts made in the Colony, 18,991 were for labour in the Colony and Protected Native States, and 4,457 for labour in other places. The corresponding figures for 1891 were respectively 8,950 and 9,006.

During the year, an Ordinance (No. XIV. of 1892) was passed to amend "The Crimping Ordinance, 1877," which restricts the

issue of licenses for recruiting coolies to labour without the Colony at any place which is not part of Her Majesty's Dominions or under the protection of the British Government.

Preparations were made at the close of the year for bringing into operation on the 1st January, 1893, "The Chinese Agricultural Labourers' Ordinance, 1891," and a special officer was detailed for the purpose of supervising its initiation.

INDIAN IMMIGRATION.

23. During the year, 1,628 statute immigrants with 423 dependants arrived in the Colony.

Of this number, 1,192 were for service in the Colony, and 436 for service in the Native States. The figures show a decrease in the number of immigrants of 1,750 as compared with 1891. Sixteen thousand three hundred and seventy (16,370) immigrants not under indenture arrived in the Colony, showing a decrease of 10,076 as compared with the previous year's arrivals. Seventeen thousand seven hundred and twenty-two (17,722) immigrants returned to India.

The following table gives the statistics of the Department for the last 11 years :—

——	1882.	1883.	1884.	1885.	1886.	1887.	1888.	1889.	1890.	1891.	1892.
Immigrants under indenture -	1,452	1,450	1,539	1,642	2,748	4,736	4,684	2,747	2,960	3,443	1,628
Dependants - -	209	176	177	49	244	310	317	104	158	293	423
Free immigrants	8,276	8,979	14,365	19,819	17,316	12,156	15,812	15,285	18,301	26,446	16,370
Total arrivals -	9,937	10,605	16,081	21,510	20,308	17,202	20,813	18,136	21,419	30,182	18,421
Returned to India	5,947	9,041	10,749	13,417	18,105	12,596	13,190	14,099	15,276	23,913	17,722
Remained in the Colony - -	3,990	1,564	5,332	8,093	2,203	4,606	7,623	4,037	6,143	6,269	699

24. At the close of the year, an Ordinance (No. XVI. of 1892) was passed to amend the Indian Immigration Ordinance of 1884, in accordance with the recommendations of the Labour Commission which were made in 1891.

The chief changes introduced are as follows :—

The rate of wages is raised during the first year of contract from 12 to 14 cents for males and from 8 to 10 cents per day for females.

The total sum for advances and smart money is fixed at $24, and task work is recognized. The period of contract, when for three years, is to be determined whenever 720 days' work have been completed.

The maximum of three years is allowed to be extended in cases where absence from work occurs under certain circumstances.

STRAITS SETTLEMENTS. 1892.

TRADE AND SHIPPING.

25. The following tables give the valu of the imports and exports at the three Settlements in 1892 and 1891 respectively :—

Imports.

——		Singapore.	Penang.	Malacca.
MERCHANDISE.		$	$	$
United Kingdom - -	1892	12,435,751	3,374,373	147,457

	1891			134,283,145

26. It will be seen from the above returns that, if the item "Treasure" be excluded, the net increase in the total trade of the Colony as compared with 1891 amounted to $16,907,936, or nearly 7 per cent.

27. From the nature of the Colony's trade a year of large exports means also increased imports, and an average depreciation in the sterling value of the dollar of over 11 per cent. compared with 1891, tended to stimulate exports, which show increases in all the principal articles, copra and tapioca excepted. This depreciation, on the other hand, unfavourably affected the import of cotton piece goods and European manufactures generally.

28. For the first time in the history of the Colony's trade imports of China-grown opium have to be recorded.

29. The following are a few of the principal imports to and exports from the Straits Settlements:—

Imports.

—	1891.	1892.	Increase.	Decrease.
Cotton piece goods -	Pieces. 5,038,657	Pieces. 4,627,745	—	410,912
Coal - - -	Tons. 375,045	Tons. 334,305	—	40,740

REGISTRY OF SHIPPING.

32. The number and tonnage of the new vessels built in the Colony in 1892 and 1891 is shown in the following table :—

—	No.	Tonnage.
1892 - - - - -	57	3,593
1891 - - - - -	70	4,506

33. Some idea of the relative importance of shipping and commerce in 1892 and 1891 for Singapore and Penang may be gathered from the following Returns :—

SHIPPING (EXCLUSIVE OF NATIVE CRAFT).

Singapore.

1892 - 8,257 vessels, measuring 6,462,023 tons.

1891 - 8,339 „ „ 6,613,257 „

Penang.

1892 - 5,923 vessels, measuring 3,260,522 tons.

1891 - 5,917 „ „ 3,501,813 „

TRADE.

Singapore.

	$
1892 - - - -	204,820,511
1891 - - - -	194,737,695

Penang.

	$
1892 - - - -	85,096,394
1891 - - - -	81,777,899

34. Out of the decrease in the revenue of $3,851, light dues decrease by $2,376. In this item of revenue, Singapore contributed an increase of $809, Malacca of $261, while Penang showed a decrease of $3,446.

LIGHTHOUSES, &c.

35. Lighthouses, launches, buoys, and beacons have been kept in an efficient condition.

PUBLIC HEALTH.

36. The general health of the Colony for 1892 has been fairly good, the vital statistics showing a decline in the general mortality as compared with those of former years, and this despite the fact that smallpox prevailed in all the Settlements, more especially in Penang and Province Wellesley, where it was almost epidemic.

Cholera.—With the exception of three sporadic cases in the Singapore Gaol, no case of this disease occurred throughout the Settlements, though seven deaths are recorded from this cause amongst passengers landed at the Quarantine Station on St. John's Island.

Chicken-pox and Measles were not, perhaps, more prevalent than usual.

Beri-beri appears to be on the decline, and the mortality from this cause is considerably lower than it has been in recent years.

Hydrophobia.—Not one case of this disease is reported from any of the Settlements, showing beyond dispute the value of the stringent regulations relating to the ownership and custody of dogs.

The District Officer, Dindings, reports that his district has been exceptionally healthy throughout the year, particularly the new town of Lumut, and that malarial fever (which was formerly unhappily so prevalent in the district) was almost unknown.

37. Appended are tables showing—

38. The following table gives the number of patients treated in all Government hospitals, and of the deaths among them, during 1892, as compared with 1891 :—

—	Number of Patients treated.			Number of Deaths.			Percentage of Deaths to Total treated.		
	Europeans.	Natives.	Total.	Europeans.	Natives.	Total.	Europeans.	Natives.	Total.
1892 - - -	809	21,822	22,631	31	2,250	2,251	3·83	10·17	9·94
1891 - - -	944	22,176	23,120	43	2,710	2,753	4·55	12·22	11·90

39. The number of patients treated and the deaths that occurred in hospital in each of the Settlements were as follows:—

Settlement.	Total treated.	Deaths.
Singapore - - - -	10,573	891
Penang and the Dindings - -	6,338	764
Province Wellesley - -	2,340	418
Malacca - - - -	3,381	178

40. The numbers in the Leper Hospital, Singapore, and Leper Asylum, Penang, during 1891 and 1892, were as follows :—

Hospitals.	1891.				1892.			
	Cases.	Died.	Discharged or absconded.	Remained.	Cases.	Died.	Discharged, absconded, or transferred.	Remained.
Leper Hospital - -	155	49	49	57	165	33	100	32
Leper Asylum, Pulau Jerejak -	353	123	—	230	475	122	—	353

BANKRUPTCY ORDINANCE.

41. The total number of receiving orders made and proceeded with during the year is shown in the following table :—

——	No. of Proceedings.	No. of Debtors.
In Singapore - - -	32	41
In Penang - - - -	9	9
In Malacca - - - -	—	—
Total - -	41	50

In 1891 the number of the proceedings was 59, and the number of debtors 76.

Liabilities according to the debtors' estimates amounted to $667,305, as against $2,687,114 in 1891, and the proofs lodged with the Official Assignee gave a total of $663,242, as against $3,903,062 in 1891.

During the year a committee of the Legislative Council sat to enquire into the working of the Ordinance, and their report was laid before the Legislative Council during the beginning of the current year.

It may be remarked that in the Colony the chief difficulty which has to be overcome in the realization of Chinese bankrupt estates is the collection of debts due to the bankrupts in foreign ports, and this is a difficulty which practically cannot be remedied by legislation.

REGISTRATION OF JOINT-STOCK COMPANIES.

42. Four joint-stock companies were registered at Singapore during the year 1892, with a total nominal capital of $665,000, while three companies went into voluntary liquidation. The amount of fees collected was $420.

At Penang no companies were registered.

METEOROLOGY.

43. The following statement shows the temperature of the air at each of the Settlements during the year :—

——	Maximum.	Minimum.	Mean.
	Fahr. °	Fahr. °	Fahr. °
Singapore - - - -	86·8	73·5	79·4
Penang - - - - -	88·1	74·6	80·3
Province Wellesley - - -	93·1	73·4	81·2
Malacca - - - -	88·8	68·0	78·3

44. Returns of rainfall for the whole year were received from 49 stations in the Colony. The heaviest rainfall was in Singapore.

The following table shows the mean total rainfall at each of the Settlements, the maximum and minimum rainfall registered in one month, and the maximum in 24 hours :—

Settlement.	Total Rainfall.	Maximum Fall in one Month.	Minimum Fall in one Month.	Maximum Fall in 24 hours.
	Inches.	Ins.	Ins.	Inches.
Singapore - -	99·70	Dec. - 21·03	Feb. - 0·84	9·30
Penang - -	93·99	Oct. - 19·06	Jan. - 0·35	5·40
Province Wellesley.	75·05	May. - 14·65	an. - 0·05	5·25
Malacca - -	78·35	Aug. - 26·35	July - 0·25	10·00
Dindings - -	99·09	May. - 18·22	Mar. - 1·79	5·80

STRAITS SETTLEMENTS. 1892.

POLICE AND CRIME.

45. The following table shows the strength and distribution of the Police Force in 1892 :—

Settlement.	Europeans.			Native Contingent.		Sikh Contingent.		Total.
	Officers.	Non-Commissioned Officers.	Men.	Non-Commissioned Officers.	Men.	Non-Commissioned Officers.	Men.	
Singapore - - -	13	6	30	64	700	6	105	924
Penang - - -	17	4	24	71	689	6	73	884
Malacca - - -	5	2	—	30	226	4	34	301
Grand total -	35	12	54	165	1,615	16	212	2,109

A reduction in the strength of the force in Malacca of 8 corporals and 27 constables was made in consequence of the closing of certain country stations.

The Chinese contingent, which was introduced in Singapore in 1890, has not proved a success, and consequently the vacancies caused by dismissals, &c. have not been filled up.

One hundred and ninety-four (194) men were dismissed from the force during the year for police offences, and 113 were sent for trial before the magistrates.

Twenty-four thousand three hundred and eighty-seven (24,387) cases were arrested during the year, as against 25,400 in 1891. Thirteen thousand eight hundred and fifty-eight (13,858) offences were reported to the Police, as against 12,828 in 1891, of which 4,033 remained undiscovered. A large proportion of the reports made at police stations are of a most trivial nature, and many of them are either untrue or gross exaggerations.

Seventeen (17) reports of culpable homicide were made at police stations. Twelve (12) cases of murder were sent for trial, and 9 of gang robbery. There were 13 cases of gang robbery reported to the police, several of which, in Singapore, were cases of robbery, but certainly not of "gang robbery." The actual number of cases of gang robbery was 9, viz., 2 in Singapore, 6 in Penang, and 1 in Malacca.

The Colony has been free from serious disturbances of any kind.

JUDICIAL.

46. The following tables contain returns for 1891 and 1892, of the cases dealt with by the Supreme Court on the Civil and

Criminal sides, by the Courts of Requests, and by the Police and Marine Magistrates:—

PRISONS.

48. The health of the prisoners in the three Settlements was good during the year, although the death-rate at Singapore was rather heavy during the very wet weather towards the end of the year. The number of deaths was, at Singapore 39 and at Penang 7, while at Malacca there were none. Three suicides occurred in the Penang prison, and two convicts escaped, one of whom was re-captured. There were two executions at Penang in October. The Inspector of Prisons in his annual report, speaking of the Singapore prison, where all prisoners sentenced to more than six months' imprisonment are sent, reports as follows:—

"There has been no suicide, no serious assault, no escape during the year, the daily average of prisoners decreased considerably towards the close of the year, and offences are fewer in proportion to the number in prison."

The number of prisoners in the Singapore prison on the 31st December 1892, was 890.

Sir C. B. H. MITCHELL to the MARQUESS of RIPON.

Tanjong Kling, Malacca,
September 9, 1894.

MY LORD,

I HAVE the honour to forward copies of the report by the Colonial Secretary, in anticipation of the Blue Book of the Straits Settlements for the year 1893.

I have, &c.
(Signed) C. B. H. MITCHELL.

REPORT IN ANTICIPATION OF THE STRAITS SETTLEMENTS BLUE BOOK FOR THE YEAR 1893.

(Extract.*)

FINANCIAL.

For the Straits Settlements, as for other silver-using countries, the year 1893 was one of exceptional difficulty and crisis. The, sudden appreciation of gold, and the consequent rapid decline in the exchange value of the local currency, not only caused such a dislocation of trade as to create considerable anxiety among the mercantile community (a result the gravity of which can hardly be over-estimated in a Colony whose importance and prosperity have from the first been based on the volume of trade attracted to its two great commercial centres—Singapore and Penang) but placed the Colonial Government face to face with a number of problems connected with the successful carrying on of the administration under largely altered conditions.

2. The possibility of such changes in the currency itself as might secure, in some measure, that fixity of exchange without which, it was contended by some, the trade of the Colony could not rest on a sure and stable basis, engaged the attention both of the Government and the mercantile community throughout the year. Insignificant in point of area, even if their dependencies—the Protected States of the Malay Peninsula—are counted in, the Straits Settlements take no mean place in the trade statistics of the Empire, and the question of placing

* NOTE.—Some of the statistics contained in the original report have been omitted.

I 83930. Wt. 20348.

STRAITS SETTLEMENTS. 1893.

their trade on a satisfactory basis deserves, therefore, and should command, the interest of many outside the narrow limits of the Colony itself.

3. In the month of July, a Committee, comprising some of the leading European and Chinese merchants, as well as several of the senior officers of Government, commenced its sittings in Singapore, and in September their report, with various appendices, including notes of the evidence taken, was remitted to the Colonial Office.

4. Although all were agreed as to the serious effect which the condition of the local currency was having on trade and capital, a notable divergence revealed itself among the members of the Committee as to the remedy which should be adopted. The proposal which received the support of the largest number was the inclusion of the Settlements within the currency area of British India, and even those who did not take this view recognised that one great difficulty in dealing with the question arises from the fact that, unlike India, the Settlements have, except subsidiary coins, no coinage of their own.* The position of the Colony in this respect is anomalous, the legal tender being the Mexican dollar and the Japanese yen—coins obtained from foreign countries, and over the supply of which the local Government is not able to exercise any control.

5. The consideration of the other questions arising from the same cause, viz., the decline in the exchange value of silver, was necessarily postponed till the end of the year, in the hope that some solution of the currency problem might be found. While, on the one hand, many of the existing sources of revenue were seriously threatened by the dislocation of trade, on the other, great caution had to be exercised in devising new means of raising revenue without interfering with the freedom of trade which had enabled the Settlements to grow into great entrepôts of commerce. Moreover, a largely enhanced proportion of the revenue had, under the new conditions, to be set aside to meet those items of expenditure which have to be paid in England, such as stores, &c. procured through the Crown Agents, and the contribution paid by the Colonial to the Home Government towards the maintenance of an Imperial garrison in Singapore. And again, while it was generally felt that the decline in the value of salaries paid in silver inflicted unmerited hardship upon the European officers of Government, it was not possible to offer them any compensation until the financial position of the Colony should be more assured.

6. The influence of the above considerations will be apparent in the following review of the finances of the Colony, while at the same time the statistics of trade and shipping for the year (which will be found below) offer satisfactory evidence of the stable foundation of the prosperity of the Settlements.

* NOTE.—Since the above was written it has been decided to coin a British dollar for the Straits Settlements and Hong Kong.

7. The Revenue of the Colony for the year 1893 amounted to $3,706,308 (Singapore $2,099,029, Penang $1,323,340, Malacca $283,939) being more than the Revenue of 1892 by $53,430.

8. The principal heads under which the increase is noticeable are:—

	$
Land revenue - - - -	19,991
Fees of office - - - -	24,482
Interest - - - - -	38,700

In the case of Land Revenue, the increase is mainly due to the recovery of payment for certain Crown lands which had been the subject of encroachment by private persons For these, on approved terms, grants were issued. There were no special sales of town lands during the year.

The growth of the permanent Land Revenue continues to be satisfactory. The steady rise of Crown Rents in all three Settlements, in consequence of improved administration, was the subject of remark in last year's report. The rise has been as follows:—In Singapore, from $27,891 in 1883 to $41,676 in 1893; in Penang, from $26,179 in 1883 to $61,887 in 1893; and in Malacca, from $55,441 in 1883 to $77,497 in 1893. The increase under the head of Fees of Office is due to the collection of new fees for the veterinary inspection of animals imported into the Colony, and to increased receipts under the Chinese Immigration Ordinance.

9. The principal decrease was under the head of Licences, the receipts for 1892 having been swelled by an item of $49,000 received in that year for arrears for 1890 on the Singapore opium and spirit farms.

10. The expenditure for 1893 amounted to $3,915,482, showing a decrease as compared with 1892 of $350,925.

The principal heads under which a decrease is apparent are as follows:—

	$
Works and buildings - - -	192,480
Military expenditure - - -	85,444
Interest - - - - -	51,410
Roads, streets and bridges - - -	34,775
Revenue services - - - -	15,593

It should be observed, however, that the amount paid away in 1892 under the heading of Military expenditure included a final payment of $162,162 for arrears.

The most noticeable increase is under the head of Miscellaneous Services, and amounts to $23,874.

11. A comparison of the assets and liabilities on 31st December 1893 gives a balance in favour of assets of $1,534,514, as against $1,726,683 on the 31st December 1892, showing that the available balances have been encroached upon to the extent of $192,169. In the balance of $1,533,874 are included the investments given under the head of Dependencies, amounting to $1,110,464. these

being loans to the Native States and the municipality of Malacca.

12. The downward tendency of exchange after May 1893, is exhibited in the following table, which is inserted in order to show the course of exchange during the year :—

Bank Bills.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
On London :— Sterling, on demand, Highest -	2 8¾	2 8⅞	2 8¾	2 8⅝	2 9⅛	2 8⅞	2 7¼	2 6¼	2 5⅝	2 5⅝	2 4⅝	2 4⅝
Lowest -	2 8⅝	2 8¾	2 8⅛	2 8⅜	2 8½	2 7	2 4⅝	2 5⅝	2 5¼	2 4¼	2 4	2 4⅛

The average rate of exchange during the year on demand was 2*s.* 7$\frac{1}{5}$*d.*, and at four months' sight was 2*s.* 7$\frac{4}{5}$*d.*, as compared with 2*s.* 10$\frac{2}{5}$*d.* and 2*s.* 10$\frac{3}{5}$*d.* in the preceding year.

The total estimated bank note circulation of the Colony on the 31st December 1893, was $7,119,480. It is confined entirely to the note issue of the Chartered Bank of India, Australia and China, and of the Hong Kong and Shanghai Banking Corporation, as the reconstructed Mercantile Bank of India, Limited, issued no notes during the year.

MUNICIPALITIES.

13. It is impossible, within the limits of this report, to do more than give a general view of the financial position of the municipal bodies in the Colony.

The expenditure has exceeded the revenue in all the Municipalities. The Singapore Municipality has obtained a new loan of $150,000, and the Penang cash balance has been much reduced. The Malacca Waterworks were completed in 1893 by Government, at a total cost, including up-keep for six months, of $250,083. The quality of the water is not, however, yet satisfactory, and further expenditure to improve the supply may become necessary. In the meantime, no water-rate can be levied in Malacca.

The bulk of the expenditure on roads and bridges falls on the general revenue of the Colony, and not on the rates.

LEGISLATION.

14. In comparison with some previous years, there was little fresh legislation in 1893. Ten meetings of the Legislative Council were held, and seven Ordinances were passed, intituled as follows :—

No. I.—An Ordinance to provide for the Recognition in the Colony of Probates and Letters of Administration granted in the United Kingdom and in British Possessions.

No. II.—An Ordinance to amend the law as to Appeals in Civil Matters.

No. III.—An Ordinance to consolidate, define, and amend the Law of Evidence.

No. IV.—An Ordinance for the Incorporation of the Titular Anglican Bishop of Singapore, Labuan, and Sarawak.

No. V.—An Ordinance for making provision for the Public Service for the year 1894.

No. VI.—An Ordinance for making Final Provision for the Public Service for the year 1892.

No. VII.—An Ordinance to amend "The Societies Ordinance 1889."

The most important of these, viz., No. III., the Evidence Ordinance, is based on the Indian Evidence Act. The new Criminal Procedure Code, which passed the Council in 1892, has not yet been brought into force, the principal difficulty being those parts of this measure which prescribe the duties of the Public Prosecutor and his deputies, which, it is feared, may involve special expenditure if put in force.

REGISTRY OF DEEDS.

15. The fees collected under "The Registration of Deeds Ordinance, 1886" (which is based on the principle of the Yorkshire Act, and has been so far only applied to the Settlement of Singapore), amounted to $5,290, being 75 cents below the total receipts of the previous year. Preparation was commenced for the application of this Ordinance to the Settlement of Penang, where the extent of occupied land, and consequently the number of titles and dealings in land, are larger than in Singapore.

PUBLIC WORKS AND SURVEYS.

16. The financial outlook debarred the Government from initiating any costly works during the year, and rigid economy had to be exercised even in respect of the up-keep and maintenance of existing roads and buildings. Under these circumstances, the completion of the Malacca Water Works, already mentioned, constitutes the only undertaking to which reference need here be made. It has been seen above that the expenditure for the year shows a decrease under the two headings of Works and Buildings, and Roads, Streets and Bridges, of no less than $225,447 on the figures for 1892.

The close of the year saw the completion of the revenue survey of Penang Island, George Town, and Province Wellesley.

POSTAL DEPARTMENT.

17. There was a considerable increase in the correspondence which passed through this Department, evidenced by the fact that 5,313,340 articles were received and despatched in 1893, as compared with 5,023,340 in 1892.

STRAITS SETTLEMENTS. 1893.

The postal revenue amounted to $138,322, and exceeded the expenditure by $590, but fell short of the total receipts of 1892 by $28.

The silver crisis in June had a very depressing effect on the business of the Money Order Branch during the second half of the year. The transactions in 1893 numbered 32,900 for an aggregate amount of $572,791, as compared with 33,651 for $588,126 in the previous year. The decrease was chiefly in business with India, but, in spite of exchange continuing to be unfavourable to remitters, there are signs of returning activity in this branch.

In view of the heavy fall in the value of silver, steps have been taken to re-adjust the scale of Straits postage rates to a closer equivalent of the Postal Union tariff, with effect from the 1st March 1894.

SAVINGS BANK.

18. The following statement gives the particulars of the business transacted by the branches at Singapore, Penang, and Malacca during the year:—

	Singapore.	Penang.	Malacca.
New accounts opened - - -	553	147	43
Accounts closed - - -	417	98	28
Accounts open at the end of the year -	1,188	308	72
	$	$	$
Deposited in 1893 - - -	102,346	30,904	7,798
Repaid in 1893 - - - -	89,457	30,584	6,638
Balance due to depositors at close of 1893 - - - - -	155,890	40,693	8,354

The increase in the amount deposited during the year over that deposited in the previous year was $1,282. The deposits during 1892 showed an increase over the figures for 1891 of $17,315.

The total sum at the credit of depositors on the 31st December, 1893, was $204,937, and the aggregate amount lodged since the establishment of the Bank in 1877 proved to be $1,188,080. Under Ordinance III. of 1891, the sum of $90,670 has been invested in Government of India 4 per cent. Rupee Paper.

EDUCATION.

19. Two hundred and thirty-six (236) schools were inspected, and 8,581 pupils examined during the year, as compared with 200 schools and 8,468 pupils in 1892.

The expenditure on Education amounted to $183,345, as compared with an expenditure of $180,350 in 1892.

The average enrolment at the boys' schools in the Colony is shown in the following table:—

——	1892.	1893.
Government English schools - -	1,027	980
Aided English Schools - - -	3,419	4,861
Government Malay schools - - -	7,216	7,106
Total - - - -	11,662	12,947

The average enrolment in the Government and Private Girls' Schools in 1892 was 1,912, as against 1,781 in the previous year.

During the year, a special Committee appointed by the Governor investigated and reported on the system of Malay Vernacular Education in vogue in the Colony.

POPULATION.

19. The number of births registered in 1893 in all the Settlements was 12,388, of which 6,555 were those of male, and 5,833 those of female, children.

The deaths registered in 1893 numbered 16,945 as against 16,033 in 1892, or an increase of 912, the highest rate of mortality having been recorded at Singapore. As in 1892, the greatest number of deaths occurred among persons between the ages of 25 and 35.

The following table gives the number of births and deaths registered in each Settlement during the past two years:—

Settlement.	Births.		Deaths.	
	1892.	1893.	1892.	1893.
Singapore - -	3,326	3,332	5,621	6,776
Dindings - - -	104	110	79	95
Penang - - -	2,395	2,303	4,241	4,167
Province Wellesley -	3,262	3,487	3,331	2,956
Malacca - - -	3,603	3,156	2,761	2,951
Total - -	12,690	12,388	16,033	16,945

21. In this connexion, it may not be without advantage to guard against a misconception which might not unnaturally arise from the comparison of the above figures with those of other tropical Colonies with a large settled indigenous population. A death-rate so largely in excess of the recorded birth-rate might be taken to indicate either exceptional unhealthiness of climate or a deplorable deficiency in sanitary precautions. The disproportion may, however, be explained in the main by a glance at the composition

of the population of the Colony. The Census returns for 1891 gave a total for the three Settlements of 512,342 persons, of whom less than a third were females. The Chinese, excluding Straits-born, numbered in all 193,232, the bulk of these being immigrants from South China, who have left their wives and families behind them. The proportion of males to females among the Chinese in the Colony was more than six to one. A similar disproportion between the sexes is to be noticed, though in less degree, among the Tamils from the Coromandel coast, who form another important element in the population, as well as among the Europeans and the various races of the Archipelago represented. The only stable elements are the Malays and Jawi Pekans (196,243), the Eurasians (7,057) and the Straits-born Chinese (34,757), which all show a slight preponderance of females. The decade 1881 to 1891 showed an average annual increase in the population of 2·1 per cent. The present population may, therefore, be roughly estimated at 545,000.

Statistics relating to the health of the Settlements during the year will be found lower down under the heading "Public Health."

CHINESE IMMIGRATION.

22. During the year 1893 there was a large increase in the arrivals of Chinese deck passengers from China, the number being 189,843, as compared with 122,029 in 1892 and 126,088 in 1891. Coolies have arrived from Hong Kong, Swatow, Amoy, and Hainan in increased numbers.

There was an increase of 2,773 in the number of female immigrants, 9,640 having arrived, as against 6,867 in 1892. Of these, 6,387 landed in Singapore, 3,215 proceeded to Penang and 38 to other ports. One thousand two hundred and eighty-three (1,283) of the Singapore arrivals proceeded subsequently to the Protected Native States and other places.

The total number of labour contracts executed in the Colony was 38,326, as against 23,448 in 1892. Contracts to labour in the Dutch Possessions show an increase of 4,392, and the Native States contracts an increase of 9,725. Contracts for Province Wellesley also show an increase of 376.

Out of the total number of contracts made in the Colony, 29,179 were for labour in the Colony and Protected Native States, and 9,147 for labour in other places. The corresponding figures for 1892 were, respectively, 18,991 and 4,457.

INDIAN IMMIGRATION.

23. During the year, 2,106 statute immigrants with 237 dependents arrived in the Colony.

Of this number, 1,189 were for service in the Colony, and 917 for service in the Native States. The figures show an increase in the number of statute immigrants of 385, as compared with 1892.

Fifteen thousand eight hundred and seventy-seven (15,877) immigrants not under indenture arrived in the Colony, showing a decrease of 493, as compared with the previous year's arrivals. Fourteen thousand and forty-four (14,044) immigrants returned to India.

The following table gives the statistics of the Indian Immigration Department for the last 11 years :—

—	1883.	1884.	1885.	1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.
Immigrants under indenture -	1,450	1,539	1,642	2,748	4,736	4,684	2,747	2,960	3,443	1,628	2,106
Dependents - -	176	177	49	244	310	317	104	158	293	423	237
Free immigrants	8,979	14,365	19,819	17,316	12,156	15,812	15,285	18,301	26,446	16,370	15,877
Total arrivals -	10,605	16,081	21,510	20,308	17,202	20,813	18,136	21,419	30,182	18,421	18,220
Returned to India	9,041	10,749	13,417	18,105	12,596	13,190	14,099	15,276	23,913	17,722	14,044
Remained in the Colony - -	1,564	5,332	8,093	2,203	4,606	7,623	4,037	6,143	6,269	699	4,176

TRADE.

24. The following tables give the value of the imports and exports at the three Settlements in 1893 and 1892 respectively :—

Imports.

—		Singapore.	Penang.	Malacca.	Total.
MERCHANDISE.		$	$	$	$
United Kingdom - -	1893	11,582,432	3,878,943	—	15,461,375
	1892	12,435,751	3,374,373	147,457	15,957,581
British Possessions - -	1893	25,297,299	14,899,133	—	40,196,432

Grand Total Value of the Exports of the Straits Settlements	1893				154,154,982
	1892				143,011,967

25. The trade of the year (as shown in the above table) has not been wholly unsatisfactory, notwithstanding the continuous decline in exchange. The loss caused by the depreciation fell most heavily on the wage-earning classes and upon those firms principally concerned with import business. In all cases where the produce of the Straits has had to compete with that of gold countries, the low exchange has operated in favour of the export trade of the Colony. The political complication which arose in Siam about the middle of the year caused an interruption to the important trade between Singapore and Bangkok, which was, however, largely made up for by the rush of business which ensued when matters again settled down. On the other hand, the new Tariff for French Indo-China threatens to extinguish the trade of the Straits with that country, the same right under the minimum tariff clause being denied to the Colony which is allowed to the mother country. The imports from French Indo-China (Colony or Protectorate) declined from $6,894,551, to $6,408,980, and the exports from $2,038,213 to $1,376,890.

26. The Colony's total trade in merchandise reckoned in silver shows an increase of over 10 per cent. on 1892, there being an increase on the Import side of nearly 11 per cent., and on the Export side of over 9½ per cent. The increase is, however, counterbalanced by the decline of nearly 10½ per cent. in the average sterling exchange value of the dollar in 1893 compared

with the average in 1892. The following are the totals for 1892 and 1893, deducting Treasure :—

—	1893.	1892.
	$	$
Value of Imports - - -	152,445,237	137,384,950
Value of Exports - - -	134,536,932	122,832,096
Total - - -	286,982,169	260,217,046

Converting these totals into sterling at the rates of 2*s.* 6¾*d.* per dollar for 1893, and 2*s.* 10¾*d.* per dollar for 1892, we have the following results :—

—	1893.	1892.
	£	£
Value of Imports - - -	19,532,046	19,605,977
Value of Exports - - -	17,237,544	17,529,164
Total - - -	36,769,590	37,135,141

While, therefore, there is an increase in dollar value of $26,765,123 in the trade in merchandise, its sterling value exhibited a decrease of 365,551*l.*

27. It will be convenient to deal with the results, in the first instance, as they affect the principal countries with which the Straits have commercial relations, and afterwards to point out the effects upon the trade in certain leading commodities of import or export.

28. Taking value alone, the imports from the United Kingdom show a decrease of nearly half a million of dollars, in spite of the higher value put on the goods on arrival, so that it is clear that the actual decrease was even more serious. The principal falling off has been in cotton piece goods and coal. The exports to the United Kingdom show an increase of $4,970,144, principally in tin, gambier, hides and sugar. Exports to the United States fell from $10,917,099 to $6,443,659.

From British India and Burma the imports were valued at $22,374,573, as against $21,832,491 in 1893, the increase in this case being counterbalanced by the fall in the rupee exchange value of the dollar consequent on the closing of the Calcutta Mint. The exports rose from $7,592,955 in 1892 to $9,004,468 in 1893. The trade with Netherlands India (which has the same currency as Holland, and is therefore to be reckoned among gold countries) shows a small increase in imports ($21,409,443, against $20,242,002 in 1892) and a larger increase in exports, viz., $26,156,035, against $23,816,632.

STRAITS SETTLEMENTS. 1893.

29. Turning now to the principal silver countries with which the Colony deals, the trade with which has been only indirectly affected by the silver crisis, a very satisfactory advance may be observed.

The imports from Hongkong and China amounted in 1893 to $19,385,774 (Hongkong $16,035,507, China direct $3,350,277) as against $16,757,420 in 1892. The exports amounted to $12,372,177 (Hongkong $8,231,456 and China direct $4,140,721) against $11,275,773 in 1892. The trade with Japan shows also a marked increase—in Imports from $857,791 in 1892 to $2,204,425 in 1893, and in Exports from $170,665 to $454,127 in the year under review.

The Imports from the Malay Peninsula (including the Siamese States) reached $34,422,611, as against $29,185,087—the increase being largely due to the greatly stimulated output of tin and tin ore in the Protected States, while the Exports advanced from $12,611,914 to $14,979,724.

30. The following table exhibits the increase and decrease in the Export and Import of certain commodities as compared with the preceding year :—

Imports.

—	1893.	1892.	Increase.	Decrease.
	Pieces.	Pieces.		
Cotton piece goods -	3,765,832	4,627,745	—	861,913
	Tons.	Tons.		
Coal - - -	334,138	334,305	—	167

Tapioca - - -	631,017	539,962	91,055	—
Tin - - -	739,743	636,002	103,741	—
Copra - - -	484,381	429,870	54,511	—

31. A few remarks will help to give significance to the above figures.

Cotton Goods.—The falling off in cotton goods is entirely on those imported from the United Kingdom. A trade with Japan sprang up suddenly during the year, the value of the Singapore imports of these goods from that country having risen from $1,520 in 1892 to $105,014 in 1893. There has been a notable decrease on the export of cotton goods from Singapore to Saigon.

Coal.—Low exchange and labour difficulties at home told heavily against Cardiff and in favour of Japan coal. The import figures from the latter country reached 118,379 tons, against 51,047 tons in 1892. The imports from the United Kingdom and Australia show decreases of 34,166 tons and 37,594 tons respectively.

Rice.—The principal feature calling for remark in respect to this trade was an advance on the imports from Siam balanced by a decreased importation from Saigon, Calcutta and Rangoon—the last of these in spite of an abundant *padi* harvest in Burma. The large trade in this commodity between Penang and Rangoon received, indeed, a severe check from the appreciation of the rupee.

Opium.—There was an increase of 1,665 chests imported and an increased export of 810 chests as compared with 1892. The total imports amounted to 15,397 chests, and the exports to 12,501. In addition to these totals, 3,050 chests were transhipped in Singapore for Manila, Saigon, and Java.

Petroleum.—There was an increased import of petroleum of over 200,000 cases, compared with the previous year. The increases were from Russia 112,986 cases, and from Sumatra 172,494 cases. The American import fell off by 81,629 cases. Prices fell about 25 per cent., owing to competition.

Gambier.—The total export of gambier shows a decrease of 44,127 pikuls on the figures of the previous year, but was higher than that of any year before 1892. The total import was larger than in any preceding year.

Gums.—Increased exports were observable in most gums, and the few decreases were unimportant, with the exception, perhaps, of gutta, which fell off nearly 4,000 pikuls.

Spices.—The most important increase is in areca-nuts by 74,014 pikuls, and the chief decreases in black pepper, 36,637 pikuls, white pepper, 17,787 pikuls, and nutmegs 3,593 pikuls.

Tapioca.—The increase is solely in flour, other kinds remaining stationary. Singapore received from Malacca 232,833 pikuls, being an increase of 19,056 pikuls.

Tin.—The tin industry was very prosperous during the year The tin comes mostly from the Protected States of the Peninsula The quantity exported was 103,741 pikuls in excess of the returns for 1892.

The following table gives the exports in pikuls and tons for the last five years:—

1889	-	-	-	554,747	pikuls = 33,021	Tons.
1890	-	-	-	537,190	„ = 31,976	„
1891	-	-	-	605,829	„ = 36,061	„
1892	-	-	-	636,002	„ = 37,857	„
1893	-	-	-	739,743	„ = 44,032	„

A very large falling off in the export to the United States was one of the features of the year. The exports to the United Kingdom, however, increased by 131,020 pikuls.

SHIPPING.

32. The following table shows the arrivals and departures of shipping in the Colony during 1893 and 1892:—

Steamers and Square-rigged Vessels.

—	Singapore.		Penang.		Malacca.		Total.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.
Arrivals, 1893 -	4,435	3,519,063	2,898	1,597,441	1,376	239,898	8,709	5,356,402

33. The number and tonnage of the new vessels built in the Colony in 1893 and 1892 is shown in the following table :—

——	No.	Tonnage.
1893 - - - - -	66	4,003
1892 - - - - -	57	3,593

34. Some idea of the relative importance of shipping and commerce in 1893 and 1892 for Singapore and Penang may be gathered from the following Returns :—

SHIPPING (EXCLUSIVE OF NATIVE CRAFT).

Singapore.

1893 - 8,837 vessels, measuring 6,944,346 tons.
1892 - 8,257 „ „ 6,462,023 „

Penang.

1893 - 5,800 vessels, measuring 3,189,522 tons.
1892 - 5,923 „ „ 3,260,522 „

TRADE.

Singapore.

	$
1893 - - - -	232,430,724
1892 - - - -	204,820,511

Penang.

	$
1893 - - - -	87,603,854
1892 - - - -	85,096,394

The total increase in the revenue was $7,122.56, of which $6,511.32 was in Light Dues. To this item of revenue, Singapore contributed an increase of $4,791.16, Penang $1,494.45, and Malacca $225.71.

35. The revenue (Light Dues and Miscellaneous Fees) collected by the Marine Department in each Settlement during 1892 and 1893 appears in the subjoined table :—

——	Singapore.		Penang.		Malacca.		Total.	
	$	c.	$	c.	$	c.	$	c.
1893 - - -	85,695	78	23,868	92	2,325	78	111,890	48
1892 - - -	80,482	09	22,321	61	1,964	14	104,767	84

LIGHTHOUSES, &c.

36. The lighthouses, launches, buoys, and beacons were maintained in an efficient condition. It was decided towards the close of the year to erect a lighthouse on the Sultan Shoal, near the western approach to Singapore Harbour. Time-balls were set up at Singapore and time-signals commenced to be given on the 8th July.

PUBLIC HEALTH.

37. The general health of the Colony for 1893 has been fairly good, the mortality being 32·10 per mille.

Small-pox was prevalent in all the Settlements, particularly in Province Wellesley. In Singapore and Malacca the numbers were slightly in excess of those for 1892, whilst in Penang there was a very marked decrease.

Cholera.—An outbreak of this disease occurred at Malacca during the dry months of March and April; there were in all 78 cases, 51 of which proved fatal; the disease at once declined on the advent of rain. In Singapore, six cases, all fatal, were reported, whilst Penang and Province Wellesley had complete immunity.

Chicken-pox and Measles were met with occasionally, and outbreaks of *Mumps* were reported from Singapore and Province Wellesley, in both instances very mild.

Beri beri.—Cases of this disease have been slightly more numerous than during 1892, but the mortality amongst them has not risen.

Hydrophobia.—No case of this disease is reported as having occurred in the Colony, emphasizing the value of the preventive measures adopted in 1890. One case of this disease, contracted in Java, was seen at the General Hospital, Singapore.

38. The following table gives the number of patients treated in all Government Hospitals, and of the deaths among them, during 1893, as compared with 1892 and 1891 :—

—	Number of Patients treated.			Number of Deaths.			Percentage of Deaths to Total treated.		
	Europeans.	Natives.	Total.	Europeans.	Natives.	Total.	Europeans.	Natives.	Total.
1893 - - -	910	22,589	23,499	37	2,297	2,334	4·06	10·16	9·92
1892 - - -	809	21,822	22,631	31	2,250	2,251	3·83	10·17	9.94
1891 - - -	944	22,176	23,120	43	2,710	2,753	4·55	12·[illegible]2	11·90

39. The number of patients treated, and the deaths that occurred, in hospital in each of the Settlements were as follows:—

Settlement.	Total treated.	Deaths.
Singapore - - - -	10,853	1,101
Penang and the Dindings - -	6,078	709
Province Wellesley - -	2,376	320
Malacca - - - -	4,692	204

At the lunatic asylum, the numbers treated were 439, with 48 deaths.

Maternity Hospital, 58 patients were admitted.

40. The numbers who received treatment as out-patients at the Government out dispensaries is shown in the annexed table:—

Settlement.	No.	Visits paid.
Singapore - - - -	4,226	16,086
Penang and Dindings - -	5,138	10,710
Malacca - - - -	4,005	4,795
Total - -	13,369	31,591

BANKRUPTCY ORDINANCE.

41. The total number of Receiving Orders and of Administration Orders under sections 99 and 113 made and proceeded with during the year is shown in the following table:—

——	No. of Proceedings.	No. of Debtors.
In Singapore - - -	32	38
In Penang - - - -	12	2
In Malacca - - - -	1	1
Total - -	45	51

In 1892, the number of the proceedings was 41, and the number of debtors 50.

Liabilities, according to the debtors' estimates, amounted to $490,921, as against $667,305 in 1892, and the proofs lodged

with the Official Assignee gave a total of $219,580, as against $663,242 in 1892.

REGISTRATION OF JOINT-STOCK COMPANIES.

42. No company was registered at Singapore under the "Companies Ordinance, 1889," during the year 1893. One registered company increased its capital, and one went into voluntary liquidation. The amount of fees collected under the Ordinance mentioned was $418.60.

METEOROLOGY.

43. The following statement shows the mean temperature of the air at each of the Settlements during the year :—

——	Maximum.	Minimum.	Mean.
	Fahr. °	Fahr. °	Fahr. °
Singapore - - - -	86·8	72·3	78·7
Penang - - - -	87·7	73·1	79·8
Province Wellesley - - -	92·0	73·0	79·9
Malacca - - - -	88·3	69·4	78·7

44. Returns of rainfall for the whole year were received from 47 stations in the Colony. The heaviest rainfall was in Penang.

The following table shows the mean total rainfall at each of the Settlements, the maximum and minimum rainfall registered in one month, and the maximum in 24 hours :—

Settlement.	Total Rainfall.	Maximum Fall in one Month.	Minimum Fall in one Month.	Maximum Fall in 24 hours.
	Inches.	Inches.	Inches.	Inches.
Singapore - -	111·41	Jan. - 32·23	May - 1·68	Jan. 18, - 8·61
Penang - -	113·57	Oct. - 33·62	Feb. - 0·47	June 8, - 9·25
Province Wellesley.	88·47	Oct. - 25·04	Feb. - 0·20	June 8, - 5·75
Dindings - -	85·19	Oct. - 24·02	Mar. - 1·70	April 13, 4·46
Malacca - -	71·37	Aug. - 24·10	Feb. - 0·12	Aug. 28, - 10·60

POLICE AND CRIME.

45. A reduction of two European sergeants, and one native corporal and 14 constables, was made in the strength of the force in Malacca, and further reductions will be made in 1894. There is but little crime in that Settlement.

One hundred and seventy-two (172) men were dismissed from the force for police offences, and 83 were charged before the

magistrates. This shows an improvement as compared with 1892.

Nineteen thousand five hundred and eighty-four (19,584) cases were arrested during the year, as against 24,387 in 1892. Fourteen thousand six hundred and eighty-eight (14,688) offences were reported to the police, as against 13,858 in 1892, of which 3,555 remained undiscovered.

Eleven (11) cases of murder and six of gang robbery (five of which occurred in Penang) were reported during the year.

The Colony has been free from serious disturbances.

PRISONS.

46. The health of the prisoners in the three Settlements was good during the year, although the death-rate at Singapore was rather heavy during the very wet weather towards the end of the year. The number of deaths was, at Singapore 44, and at Penang six, while at Malacca there were none. Three suicides occurred in the Penang Prison, and two convicts escaped, one of whom was re-captured. There was one execution at Penang in June. The Inspector of Prisons, in his annual report, speaking of the Singapore Prison, where all prisoners sentenced to more than six months' imprisonment are sent, reports as follows :—

"There has been no suicide, no serious assault, no escape during "the year, the daily average of prisoners decreased considerably "towards the close of the year, and offences are fewer in pro-"portion to the number in prison."

The number of prisoners in the Singapore Prison on the 31st December, 1893, was 897.

REGISTRATION OF SOCIETIES.

47. The Protector of Chinese reports that no disturbance occurred during the year that could be ascribed to the influence of Chinese Secret Societies. The time has now arrived when the success of the new policy with respect to these associations, inaugurated by Ordinance I. of 1889, may be regarded as assured. In all, 208 societies of various kinds have been registered, and 146 exempted from registration, since the introduction of the Ordinance. Twenty-two Chinese were deported during the year under the power vested in the Governor in Council, as against 44 in 1892.

RAILWAYS.

48. Owing to the small area of the three Settlements and their geographical position along the shores of the Straits of Malacca, the necessity of railways has not hitherto been felt, and, with the exception of a few miles of tramway in Singapore and Penang, nothing has yet been done in this direction, although considerable progress has been made in the Protected States of the West Coast,

the principal industrial and mining centres in Perak, Selangor, and Sungei Ujong being all connected by rail with the coast. During 1892 a scheme was set on foot for a railway across the peninsula passing through Siamese territory to connect Senggora with Kedah and with Prye (in Province Wellesley). The surveys for this undertaking were proceeded with in the year under review. A plan was also mooted, not for the first time, for a railway across Singapore Island connecting the city with a point opposite the chief town of Johor State. The motive power to be employed was in this case electricity, but the undertaking fell through, owing to insufficient support. Towards the end of the year a concession was applied for by Messrs. Grassi Brothers, of Bangkok, for a railway through Malacca territory. It is claimed by the promoters that the building of this line will give an impetus to the opening up of the country behind Malacca for tapioca and other cultivation. The export of tapioca from Malacca in 1893 amounted to 232,833 pikuls, all of which is at present conveyed to the coast on bullock-carts. It has since been suggested to continue the line as far as Kuala Pilah, the head-quarters of the British Resident of the Negri Sembilan. The above-mentioned schemes, it should be mentioned, are all of them private enterprises.

MISCELLANEOUS.

49. Sir Cecil Clementi Smith, G.C.M.G., appointed Governor in 1887, left the Colony in August, 1893. His successor, Sir C. B. H. Mitchell, K.C.M.G., did not assume his duties until after the conclusion of the year. In the interim, the Government was administered by the Honourable W. E. Maxwell, C.M.G., Colonial Secretary.

50. As the matter was much under discussion during the earlier part of the year, something may here be said as to the relations of the two most important of the Settlements. First united in 1826 under one administration, Penang, Singapore and Malacca have, since 1867, constituted the Colony of the Straits Settlements, with the seat of Government in Singapore. Although the great development of the resources of Perak and North Sumatra has of late years brought increasing prosperity to the northern settlement, Singapore, owing to its greater facilities for working cargo and also to its more advantageous situation on the great trade route to the Far East, has begun to draw to itself the trade in certain commodities, such as tin and tobacco, which formerly passed for the most part through Penang. When, in 1892, an ambitious scheme for providing Penang with wharves failed to command Government support, in consequence of the large expenditure which it would have required to carry it out, a murmur arose in that Settlement that Singapore engrossed more than her fair share of the expenditure of the Colonial Government. The discontent culminated early in 1893 in a motion in the Legislative Council for a Royal Commission to enquire into the distribution of the revenues of the Colony, which was, however, rejected. In

connection therewith, a number of real or supposed grievances were also ventilated, but when the chief ground of complaint had been proved by a reference to statistics to be without foundation, the agitation, to which some of the Penang Chinese had somewhat blindly given their support, rapidly died away.

51. In conclusion, a few remarks as to the position and prospects of Malacca may not be out of place. The revenue for the year amounted to $283,938, and the expenditure to $368,028. The corresponding figures for 1892 were $294,477, and $454,647. Once a great trade centre, the town has become, in a commercial sense, a mere suburb of Singapore. The Settlement, however, includes a stretch of rich and fertile country inhabited by Malay peasantry, unfortunately by nature wanting in industry. The chief source of revenue is the cultivation of tapioca, in which a considerable amount of Chinese capital is invested. The Acting Resident Councillor concludes his report in these words:—

"From a Malay agricultural population it is vain to look for a large revenue. Much can, no doubt, be done by encouraging Chinese to take up land, especially as permanent cultivators, but an equilibrium between revenue and expenditure can at present only be effected by cutting down expenditure of the Police, Public Works Department, and other great spending branches of the service.

"It is unfair to compare Malacca with one of the Protected Native States, whose revenue, derived from the tin industry, increases by leaps and bounds. Time was when the greater part of the mineral wealth of the Peninsula found its way to Malacca. She has passed through the 'tin age' and now remains a favourable example of a prosperous agricultural district, where crime is almost unknown and the people are happy and contented."

(Signed) WILLIAM MAXWELL,
Colonial Secretary.

[For Report for 1893, *see* Colonial Report (Annual) No. 121.]

Acting-Governor SWETTENHAM to Mr. CHAMBERLAIN.

Government Hill, Singapore,
July 24, 1895.

SIR,

I HAVE the honour to forward copies of the Report on the Straits Settlements for the year 1894.

I have, &c.

J. A. SWETTENHAM.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1894.

FINANCIAL.

1. For the first time for several years the revenue of the Colony exceeded the expenditure in the year under review. This result was due in part to increased rates of fees charged in various departments, but principally to the rigid economy which was exercised in all branches of expenditure. A retrenchment committee sat in the beginning of the year, and recommended a large number of economies, many of which were carried out during the year.

2. The revenue for 1894 amounted to $3,904,774, divided among the three Settlements as follows:—

	$
Singapore - - - - -	2,185,431
Penang - - - - -	1,407,907
Malacca - - - - -	311,436

This exceeded the revenue for 1893 by $198,466.

3. The principal heads of revenue under which an increase is noticeable are:—

	$
Land revenue - - -	86,998
Licenses - - - - -	56,120
Postage - - - - -	51,481

The increased land revenue is partly accounted for by an item of $51,770 realised by special sales of town lands, of which there were none in 1893. There was also an increase in the amount of fees received for registration of $13,180, owing to the introduction of the Registration of Deeds Ordinance in Penang on 1st July—a large number of titles having been presented for registration before that date to escape the increased scale of fees. The introduction of a revised scale of fees for Pawnbrokers' Licenses explains the increase under the head of licenses. The increase in postage is due in part to increased correspondence and in part to the revised rates of postage introduced in consequence of the fall in exchange.

The principal decrease was under the head of interest ($13,582), the Sungei Ujong debt having been paid off by Selangor.

4. The expenditure of 1894 shows a decrease of $200,862, as compared with the preceding year, owing to the retrenchments which were carried out in almost all departments.

The total expenditure for each of the last three years has been as follows :—

	$
1892 - - - - -	4,266,407
1893 - - - - -	3,915,482
1894 - - - - -	3,714,620

The expenditure of 1892, however, included a payment of $162,162 for arrears under the head of military expenditure.

5. The principal decreases apparent in the items of expenditure, as compared with 1893, are as follows :—

	$
Works and buildings - - -	117,773
Roads, streets and bridges - - -	51,451
Military expenditure - - -	16,075
Miscellaneous services - - -	101,773

Under the last of these heads were included, in 1893, sums of $45,000, balance of contribution to the cost of the Telok Ayer Market and $50,801 re-survey of the Colony.

The chief increases are—

	$
Salaries - - - - -	51,094
Interest - - - - -	39,545
Pensions - - - - -	9,824
Postal - - - - -	6,751

The total for salaries included in 1894 a sum of $99,300, for exchange compensation to officers domiciled in gold countries. The increases under headings "Interest" and "Postal" are explained by loss in exchange on remittances to Crown Agents for salaries and pensions payable in England and for the contribution to the Imperial Post Office, respectively.

6. A comparison of the assets and liabilities on 31st December 1894, gives a balance in favour of assets of $1,758,948, as against $1,534,514 on 31st December 1893. In the balance of $1,758,948

are included the investments given under the head of Dependencies, amounting to $1,104,732, these being loans to the native States of Negri Sembilan and Pahang and the municipality of Malacca. The following tabular statement shows the balances as they stood at the beginning of 1894 and 1895, respectively:—

—	Assets.		—	Liabilities.	
	Jan. 1st, 1894.	Jan. 1st, 1895.		Jan. 1st, 1894.	Jan. 1st, 1895.
	$	$		$	$
Cash on current account with local banks - -	639,525	822,156	Deposits, &c. - -	676,142	614,355
Cash on current account with Crown Agents - -	16,345	17,031	Temporary loan -	141,424	141,424
Investments, gold -	136,869	136,869	Suspense account -	—	58,856
Loans to native States	1,088,464	1,083,232	Expenditure in arrears - - -	25,348	31,701
Loans to municipalities	22,000	21,500		835,020	846,336
Other investments -	356,636	390,870	Net balance to the credit of the Colony	1,534,514	1,758,948
Miscellaneous advances &c., &c. -	35,663	18,963			
Revenue in arrears -	74,632	114,663			
Total - -	2,369,534	2,605,284	Total - -	2,369,534	2,605,284

EXCHANGE.

7. The downward tendency of exchange during the year is exhibited in the following table:—

Bank Bills.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
On London:— Sterling, on demand—												
Highest -	2 3¾	2 3¼	2 0½	2 2⅛	2 1⅛	2 1¼	2 1⅜	2 2⅜	2 2⅜	2 2¼	2 1⅝	2 0⅞
Lowest -	2 3	2 0	1 11⅝	2 0¼	2 0¼	2 1	2 1⅛	2 1	2 1⅜	2 1⅛	2 0¼	1 11⅝

The average rate of exchange during the year on demand was 2*s.* 1¼*d.*, and at four months' sight was 2*s.* 1⅘*d.*, as compared with 2*s.* 7⅕*d.* and 2*s.* 7⅘*d.* in the preceding year.

The total estimated bank note circulation of the Colony on 31st December 1894 was $7,394,488. It is confined entirely to the note issue of the Chartered Bank of India, Australia, and China, and of the Hong Kong and Shanghai Banking Corporation. The Mercantile Bank of India Limited has at present no note issue in the Colony.

MUNICIPALITIES.

8. The totals of the revenue and expenditure of the municipalities of the three Settlements were less than in 1893, but their financial condition is satisfactory, while steady progress has been made with various sanitary improvements.

The amount of rates and taxes levied outside municipal limits was about half that expended on roads and bridges.

In Singapore a large extension of the existing reservoir, in Malacca, a new reservoir, and in Penang the strengthening of the existing reservoir, were completed during the year.

Two slaughter-houses were built in Singapore, and their use was made compulsory from the 1st of December. The number of animals slaughtered in these houses in December was 9,913, as compared with 1,451 in the preceding month, and the number has since increased.

There were the usual frequent changes in the membership of the Boards, but there is rarely a contest for vacancies, and it is sometimes difficult to fill them, the Chinese and other merchants particularly exhibiting reluctance to give up their time to municipal business.

LEGISLATION.

9. The Legislative Council held 22 meetings during the year, and 20 Ordinances were passed, of which the most important were the Opium and Liquor Ordinances, the Prevention of Disease Ordinance, and the Municipal Slaughter-house Ordinance.

The law relating to opium and spirits had hitherto been contained in one Ordinance—No. IV. of 1870, with numerous subsequent amendments. Two Ordinances dealing separately with opium and with spirituous and fermented liquors now take their place.

In the Opium Ordinance the changes from the old law were not numerous or important, but the fee for a farm-shop was increased, and all such fees were paid to the Government instead of to the farmer.

As regards spirituous and fermented liquors, on the other hand, important changes have been made. The duty on spirits has been doubled, and is now $1.50 a gallon, and duties have been imposed on wines and and beer, which were formerly free. The duties are on sparkling wines $1 a gallon, on still wines 50 cents, and on malt liquors, cider, and perry 18 cents. Licensed warehouses are established, in which liquors can be stored on arrival, the duty being paid on removal from the warehouse. The duty on all liqour imported and not stored in a licensed warehouse has to be paid on landing. These duties are collected by the spirit farmer. All fees for licenses under the Ordinance—for public houses, hotels, retail liquor-shops, and farm-shops—are paid to the Government.

The Prevention of Disease Ordinance was passed on the 18th June 1894, on the outbreak of "bubonic plague" in the south of China and in Hong Kong. It gives the Governor in Council power to prevent the immigration of Chinese coolies from any named ports where any dangerous infectious or contagious disease has broken out, and, in accordance with its provisions, a proclamation was issued immediately after its passing, which had the effect of prohibiting immigration from the ports of Southern China, and remained in force until the plague ceased in September.

The Municipal Slaughter-house Ordinance gives to the Municipal Commissioners of each town, when they have provided a sufficient number of slaughter-houses in convenient places, the monopoly of slaughtering, within municipal limits, all animals intended for human food. The Ordinance is at present in operation only in Singapore.

Under instructions from Her Majesty's Government, an Ordinance (No. XII.) was passed to abolish the registration of brothels and prostitutes, which had hitherto been supervised by the Chinese Protectorate with good effect.

REGISTRATION OF DEEDS.

10. This system of registration is very similar to that established in Yorkshire by the Imperial Acts known as the "Yorkshire Registries Acts, 1884 and 1885." It has now been in force in Singapore since the year 1887.

One of the most important changes introduced by this mode of registration is the provision for the registration of deeds at full length, the person wishing to register a deed leaving at the registry, together with the original deed, a copy written on paper of the size prescribed by the rules, and these copies being subsequently bound up in volumes for future use.

The system has tended to shorten deeds relating to land, and one result has been the use of short statutory forms wherever practicable.

The Ordinance came into operation in Penang in July 1894. The sub-division of land is already causing a good deal of trouble, and it will be necessary to provide for the registration of small parcels of land in order to make the Index of Lands the valuable guide which it is intended to be.

The fees collected in Singapore amounted to $5,849.25, an increase of $552.25 on the receipts of last year. The fees collected in Penang for the six months ending 31st December 1894 amounted to $3,489.25.

PUBLIC WORKS.

11. There is nothing calling for remark under this head. The work of the Department was confined to the maintenance of existing works and buildings.

POSTAL DEPARTMENT.

12. During the year under review, 5,539,380 articles passed through the Postal Department of the Colony, as compared with 5,313,340 articles received and despatched in 1893. There was an unusually large increase in the correspondence received, but in each of the two years mentioned the number of articles despatched was about the same.

The postal revenue amounted to $189,789, exceeding that of 1893 by $51,467. This very large increase is due to the rates of postage having been raised by about 50 per cent. in March 1894. The total expenditure comes to $149,497, being $11,765 more than the year before. The revenue exceeded the expenditure by $40,292.

The continued fall in the sterling value of the dollar has had an injurious effect on the money-order business throughout the year. There 36,312 transactions, amounting altogether to $671,231, against 32,900 for $572,791 in 1893. There was a decrease in business with all gold-using countries, but the local business and the operations with India, China and the Protected States in the Malay Peninsula showed improvement.

SAVINGS BANK.

13. The following statement gives the particulars of the business transacted by the branches at Singapore, Penang, and Malacca during the year:—

——	Singapore.	Penang.	Malacca.
New accounts opened - - -	528	143	22
Accounts closed - - -	476	108	33
Accounts open at the end of the year -	1,240	345	62
	$	$	$
Deposited in 1894 - - -	112,796	34,235	6,704
Repaid in 1894 - - -	102,392	29,549	6,006
Balance due to depositors at close of 1894 - - - - -	171,267	50,060	9,362

The increase in the amount deposited during the year over that deposited in the previous year was $12,687. The deposits during 1893 showed an increase over the figures for 1892 of $1,282.

The total sum at the credit of depositors on the 31st December 1894 was $230,689, and the aggregate amount lodged since the establishment of the Bank in 1877 proved to be $1,341,813. Under Ordinance III. of 1891, the sum of $111,575 has been invested in Government of India 4 per cent. Rupee Paper.

An Ordinance has been introduced to increase the limits of deposits from $250 to $500 in a year, and the aggregate from $750 to $1,500. Steps have been taken to reduce the interest to be allowed on deposits from 3½ to 3 per cent. from 1st July 1895, on account of the reduction in the interest on the Indian investments from 4 per cent. to 3½ per cent.

EDUCATION.

14. No change requiring special notice took place in this Department during the year, though certain reductions were decided upon towards the close of the year, which have since been carried out.

The number of schools inspected in 1894 and the number of pupils presented were slightly less than in 1893, viz., 234 schools, as against 236 in 1893, and 8,518 pupils presented, as against 8,581.

The total number of schools is composed as follows:—

Grant-in-aid Schools (boys) - - -	26
Do. (girls) - - -	11
Government English Schools (boys) - -	8
Government Vernacular Schools (boys) - -	149
Do. (girls) - -	27
Night Schools - - - - -	13
	234

As regards English education, the Inspector of Schools says:—

"In this Colony there are special difficulties connected with the teaching of English, as pupils who attend the schools consist of so many nationalities. It is, of course, desirable that English should be taught through the medium of the pupils' own language, but, under the circumstances of our schools, this is impossible, and, as a rule, Malay is chosen as the medium of instruction—a language which, although known to some extent by most of the pupils, is one with which many of the pupils are not thoroughly acquainted.

"The English education of the Colony is almost entirely in the hands of missionary bodies or of committees over which Government has not direct control. That these bodies do their work most efficiently will, I think, be admitted. In spite of the difficulties to which reference has been made above, high percentages are obtained yearly by the principal schools, although the course of instruction extends over seven years only, and the tests of these annual examinations are more severe than those given in the case of board schools in England. This really means, that we expect from our pupils, to the majority of whom English is a foreign

language, more rapid progress than is required from pupils in England studying their own language."

The attendance at the Government Vernacular Schools shows a considerable falling off, which has not been satisfactorily accounted for.

The gross expenditure for the year of the Education Department amounted to $186,444, or 4·7 per cent. of the total revenue of the Colony. The principal items are the grants for results to the aided schools and the cost of the Government English and Vernacular Schools. The grants for results amount to about half of the total expenditure of the aided schools.

POPULATION.

15. The number of births registered in 1894 in all the Settlements was 12,690, of which 6,636 were those of male, and 6,054 those of female, children.

The deaths registered in 1894 numbered 17,234 as against 16,945 in 1893, or an increase of 289, the highest rate of mortality having been recorded at Penang. As in 1892 and 1893, the greatest number of deaths occurred among persons between the ages of 25 and 35.

The following table gives the number of births and deaths registered in each Settlement during the past two years:—

Settlement.	Births.		Deaths.	
	1893.	1894.	1893.	1894.
Singapore - -	3,332	3,327	6,776	6,216
Dindings - - -	110	128	95	111
Penang - - -	2,303	2,306	4,167	4,428
Province Wellesley -	3,487	3,578	2,956	3,654
Malacca - - -	3,156	3,351	2,951	2,825
Total - -	12,388	12,690	16,945	17,234

The great preponderance of deaths over births is accounted for, as has been explained in previous reports, by the peculiarly constituted population of the Straits Settlements, less than a third of which, in consequence of the large amount of male Chinese and Tamil immigration, is female.

The present population may be roughly estimated at 535,000. Statistics relating to the health of the Settlements during the year will be found lower down under the heading "Public Health."

CHINESE AND INDIAN IMMIGRATION.

16. There was a marked decrease in the numbers of immigrants from China and India during the year, as shown in the following table :—

——	1893.	1894.
Chinese deck passengers - -	189,843	137,695
Chinese female immigrants - -	2,640	7,068
Contracts - - -	38,326	22,302
Indian statute immigrants - -	2,106	1,688
Indian free immigrants - -	15,877	13,155
Indian labour contracts - -	2,034	1,744

Chinese immigration to the Straits Settlements was practically closed for nearly five months in 1894, owing to the plague in Hong Kong, and to the action of the Government in prohibiting coolie immigration from Hong Kong and the treaty ports of China for nearly four months.

The decrease in the Indian figures is due to a smaller demand for labour (this in its turn being chiefly caused by the inferior class of labourers hitherto imported, the large per-centage of them unfit for agricultural labour, and the numerous desertions from the Province Wellesley estates) and to increase of passage rates and the diminished value of the dollar in relation to the rupee.

The Indian Immigation Agent, Mr. A. M. MacGregor, went to England on leave during the year, and retired in January 1895, and, owing to the necessity for economy, the appointment will not again be filled.

TRADE.

17. The following tables give the value of the imports and exports at the three Settlements in 1894 and 1893 respectively :—

Imports.

——	Total.
MERCHANDISE.	$
United Kingdom, 1894 - - - - -	20,840,887
Do. 1893 - - - - -	15,461,375
British Possessions, 1894 - - - - -	45,389,112
Do. 1893 - - - - -	40,196,432
Foreign countries, 1894 - - - - -	107,101,149
Do. 1893 - - - - -	88,596,316
Between the Settlements, 1894 - - - -	9,354,881
Do. do. 1893 - - - -	8,191,114
Total value of merchandise, 1894 - - - -	182,686,029
Do. Do. 1893 - - - -	152,445,237

Imports—continued.

	Total.
TREASURE.	
	$
Total value of treasure, 1894 - - - -	41,465,263
Do. do. 1893 - - - -	17,170,811
Total imports of merchandise and treasure, 1894 - -	224,151,292
Do. do. do. 1893 - -	169,616,048

Exports.

	Total.
MERCHANDISE.	
	$
United Kingdom, 1894 - - - - -	31,171,649
Do. 1893 - - - - -	29,970,401
British Possessions, 1894 - - - - -	19,978,151
Do. 1893 - - - - -	18,734,374
Foreign countries, 1894 - - - - -	98,622,480
Do. 1893 - - - - -	77,506,078
Between the Settlements, 1894 - - - -	8,974,269
Do. do. 1893 - - - -	8,326,079
Total value of merchandise, 1894 - - - -	158,746,549
Do. do. 1893 - - - -	134,536,932
TREASURE.	
Total value of treasure, 1894 - - - -	28,039,515
Do. do. 1893 - - - -	19,618,050
Total exports of merchandise and treasure, 1894 - -	186,786,064
Do. do. do. 1893 - -	154,154,982

18. The trade of the year shows general expansion in nearly every important article of commerce, and the exports, upon which the commercial prosperity of the Colony depends, afford conclusive evidence of permanency and progress. Values and bulk have been well maintained, and a depreciation in the sterling value of the dollar has counterbalanced any fall in home quotations. Thus although tin had fallen in the London market by over 19½ per cent. compared with 1893, the difference in the average local price was inappreciable. In the imports into the Colony increases are apparent all round, but it is doubtful whether European importers have found the trade so remunerative as in past years, the enhanced dollar values operating in favour of restriction. The low sterling value of silver has encouraged eastern manufactures, and Japan in particular has become an influential power in the market, especially as regards the supplying of coal and cotton piece goods.

19. The Colony's total trade in merchandise reckoned in silver shows an increase of over 19½ per cent. with other countries

compared with 1893. On the import side the the increase is over 20 per cent. and over 18½ per. cent on the export side. These increases are counterbalanced by a decline of nearly 18 per cent. in the average sterling exchange value of the dollar in 1894, compared with 1893.

The following are the totals for 1894 and 1893, deducting treasure :—

—	1894.	1893.
	$	$
Value of imports - - -	182,686,029	152,445,237
Value of exports - - -	158,746,549	134,536,932
Total - - -	341,432,578	286,982,169

Converting the above amounts into sterling shows —

—	1894.	1893.
	£	£
Value of imports - - -	19,217,966	19,561,040
Value of exports - - -	16,704,978	17,247,693
Total - - -	35,922,944	36,808,733

There is thus an increase in the silver value of imports of $30,240,792, and in the silver value of exports of $24,209,617, an aggregate dollar increase of $54,450,409, but a decrease in the gold value of imports of 343,074*l.*, and in the gold value of exports of 542,715*l.*, an aggregate decrease of 885,789*l.*

Singapore shows a dollar increase of over 23 per cent. in imports, and of nearly as much in exports, and this Settlement also has a small increase in both imports and exports when the trade has been converted into sterling. Penang imports increased by about 11½ per cent. in dollar value, and her exports by over 7 per cent., but in sterling values her trade shows a decrease on both sides.

20. Dealing with the trade of the Colony on its relation to countries, and taking dollar values only, it may be convenient to point out the variations.

The United Kingdom imports of merchandise show an increase of nearly $5,400,000. Of this increase, cotton goods account for nearly four and three-quarter millions, and coal for over three-quarters of a million. The exports to the United Kingdom show an increase of over $1,200,000. Gutta-percha accounts for nearly this increase.

From British India and Burma the imports were valued at $27,709,293, an increase of nearly $5,335,000, of which opium contributed an increase of over $1,800,000 and rice from Rangoon nearly $2,900,000. The exports amounted to $8,419,205, a

STRAITS SETTLEMENTS. 1894.

decrease of $585,000, caused largely by decreased exports of raw silk to Burma and black pepper and tin to Calcutta. From Netherlands India imports were valued at $29,704,622, an increase of $8,205,179 over the 1893 returns. The increases are in produce which the Dutch Indies supply. The exports valued $31,480,844 an increase of $5,324,809.

Turning now to the principal silver-standard countries with which the Colony trades, which are not so directly affected by sterling exchange, it is found that imports do not show nearly so large proportional increases as they do with gold countries, but that, on the other hand, the exports show enhanced proportional increases for silver countries, as the following table shows :—

(Exclusive of Treasure and Inter-Settlement Trade.)

['000 omitted.]

	Gold Countries.		Silver Countries.	
	1894.	1893.	1894.	1893.
	$	$	$	$
Imports - - -	88,786	68,649	84,544	75,605
Exports - - -	105,613	89,914	44,160	36,297
Total	194,399	158,563	128,704	111,902

The imports from Hong Kong and China amounted in 1894 to $19,497,142 (Hong Kong $16,205,126, China direct $3,292,016), as against $19,385,774 in 1893. The exports amounted to $13,289,459, as against $12,372,177 in 1893. Of the exports in 1894, Hong Kong received to the value of $9,894,032, and China $3,395,427. Japan trade shows steady progress—Imports in 1894 valued $3,661,758, against $2,204,425 in 1893, and $857,791 in 1892. Exports valued $774,970, compared with $454,127 in 1893, and $170,665 in 1892. The imports from the Malay Peninsula (including the Siamese States) amounted to $41,496,190, as against $34,422,613 in 1893, the increase resulting from the larger output of tin from the Protected States. The exports reached $18,779,225, against $14,979,724 in 1893.

21. The following table exhibits the increase and decrease in the export and import of certain commodities :—

Imports.

	1893.	1894.	Increase.	Decrease.
	Pieces.	Pieces.		
Cotton piece goods -	3,765,832	5,595,310	1,829,478	—

Rattans - - -	474,386	424,911	—	49,475

Cotton Goods.—The large increase is partly due to repletion of stocks, which were very low at the close of 1893, and to some extent also to increased demand. Yarns show heavy increases. From Japan and Hong Kong 578,702 pieces of cotton goods were received, as against 227,600 pieces in 1893, and from British India 369,021 pieces received, compared with 375,038 pieces in 1893.

Coal.—The feature of note in the imports of coal is the position now taken by Japan, which supplied 192,409 tons, compared with 187,025 tons from the United Kingdom. Australian imports show a falling off, but the supplies of Sarawak and Labuan coal rose enormously.

Rice.—The imports from Bangkok and Saigon fell off, but this was more than compensated for by the greater supplies from Burma.

Opium.—In spite of the very high prices ruling during the year, the trade shows little or no diminution in bulk, and the demand from Siam and the Protected Native States was fully maintained. The exports amounted to 12,632 chests, against 12,501 chests in 1893.

Petroleum.—The increased importations are entirely from the Dutch Indies, the Langkat oil showing an increased import of nearly 500,000 cases. A large quantity of this oil finds its way to Siam, Saigon and the Netherlands Indies.

American oil imported fell by nearly 40,000 cases and Russian oil, which is largely imported in bulk, by nearly 240,000 cases, compared with the imports in 1893.

Gambier.—The local price of gambier was, on the average, higher than in 1893, and a small increase in the quantity exported is recorded.

Gums.—The exports of gums have been well kept up. The important increases are in gutta-percha, gum copal, gum damar, sticklac and India-rubber. The only large decrease is in resin.

Spices.—Increased exports are seen in areca-nuts, cloves, white pepper, and cubebs. There is a trifling decrease in black pepper.

Tapioca.—There is a large increase in pearl tapioca exports, but decreases in the other two kinds. A total increase of 18,642 pikuls exported is recorded, when compared with the 1893 exports.

Copra.—A remarkable rise has taken place in the output of copra, showing nearly 98 per cent. of an increase over the exports of 1893.

Sago.—The decrease of 68,605 pikuls exported is entirely in sago flour, there being a small increase in pearl sago.

Tin.—The tin industry continues to prosper. The tin is received, both unsmelted and smelted, from the Protected States of the Malay Peninsula. The increased export over 1893 reached 126,049 pikuls.

The following table gives the exports in pikuls and tons for the last five years:—

1890	537,190	pikuls	=31,976 tons.
1891	605,829	„	=36,061 „
1892	636,002	„	=37,857 „
1893	739,743	„	=44,032 „
1894	865,792	„	=51,535 „

There were largely-increased exports to the United States and Holland.

SHIPPING.

22. The following table shows the arrivals and departures of shipping in the Colony during 1893 and 1894:—

Steamers and Square-rigged Vessels.

—	Total.	
	No.	Tons.
Arrivals 1893 - - - -	8,709	5,356,402
Do. 1894 - - - -	8,567	5,534,761
Departures 1893 - - -	8,675	5,257,404
Do. 1894 - - -	8,548	5,220,260
Total 1893 - - -	17,384	10,613,806
Do. 1894 - -	17,115	10,755,021

Native Craft and Steamers under 50 Tons.

—	Total.	
	No.	Tons.
Arrivals 1893 - - - -	12,999	399,001
Do. 1894 - - - -	12,971	391,614
Departures 1893 - - -	12,861	389,490
Do. 1894 - - - -	13,035	398,507
Total 1893 - -	25,860	788,491
Do. 1894 - -	26,006	790,121

23. The number and tonnage of the new vessels built in the Colony in 1893 and 1894 is shown in the following table:—

—	No.	Tonnage.
1893 - - - - -	66	4,003
1894 - - - - -	77	5,232

STRAITS SETTLEMENTS. 1894.

24. The revenue (light dues and miscellaneous fees) collected by the Marine Department in each Settlement during 1893 and 1894 appears in the subjoined table:—

——	Singapore.		Penang.		Malacca.		Total.	
	$	c.	$	c.	$	c.	$	c.
1893 - - -	85,695	78	23,868	92	2,325	78	111,890	48
1894 - - -	88,624	07	25,092	69	2,354	94	116,071	70

LIGHTHOUSES, &c.

25. The lighthouses, launches, buoys, and beacons were maintained in an efficient condition. A new lighthouse on the Sultan Shoal, near the western approach to Singapore Harbour, is in course of construction, and will be completed by the latter end of 1895.

PUBLIC HEALTH.

26. The general health of the Colony for 1894 has been fairly good, the mortality being 32·22 per mille.

Cases of small-pox occurred in all the Settlements, but were not numerous, except in the Northern Division of Province Wellesley, where the disease was prevalent to a considerable extent. The number of cases in Singapore was unusually small.

No cholera occurred during the year in any of the Settlements with the exception of one sporadic case in the Singapore Gaol.

Cases of beri-beri were somewhat less numerous, and the death rate was lower than usual.

Three cases of hydrophobia occurred, one in Singapore, the patient having been bitten in Sourabaya; and two in Malacca, from bites by stray dogs in the town.

Some apprehension was felt during the middle months of the year lest bubonic plague, which was then epidemic in Hongkong, should be introduced into these Settlements, and precautionary measures, including a nine days' quarantine of ships from Hong Kong, and careful inspection of all immigrants arriving, were taken. For some three months it was also considered advisable to stop immigration from China. Only one case of plague arrived here, and this was detected on arrival, and the patient removed to the quarantine station, where he made a slow recovery. Influenza was not prevalent during the year.

Appended are tables showing :—

A. Birth and death rates.

B. Special death-rate (Racial).

C. Deaths due to the more important specific infectious diseases.

Dindings - -	75·09	Sept. - 10·19	April - 2·09	July 10 - 7·01
Malacca - -	91·24	Mar. - 34·42	Feb. - 0·05	April 29 10·42

BANKRUPTCY ORDINANCE.

30. The revenue and expenditure, as compared with the previous year, show a slight increase ($14,732.30, as against $13,664.56; and $16,888.74, as against $15,087.23, respectively, in Singapore). In Penang the expenditure exceeded the revenue by over $4,000.

There has been a decrease in the number of failures which occurred in Singapore in 1894, but a marked increase in the liabilities and estimated loss to creditors as well as in the estimated value of the assets, so that it may be said that, while the number has considerably decreased, the individual importance of each failure has somewhat increased.

In Penang there has been a considerable decrease, both in the number of failures and in the liabilities and the estimated value of the assets.

Official statistics do not, however, give a correct view of the amount of insolvency in the Colony, as private settlements are frequent and are much preferred both by creditors and debtors, by the former owing to the pecuniary advantages resulting from arrangements where there is no exposure of the dealings of the debtors, and by the latter as there is no public investigation into their commercial conduct.

REGISTRATION OF JOINT STOCK COMPANIES.

31. Six joint stock companies, with a total capital of $196,000, were registered during the year. Four of them are mining ventures, but it cannot be said that they represent any important operations.

One company went into voluntary liquidation.

POLICE AND CRIME.

32. In accordance with the recommendations of the retrenchment committee, the authorised strength of the police force was reduced during the year by three inspectors, 22 European constables, and 101 natives, and 14 stations were closed.

The Inspector-General of Police, Mr. R. W. Maxwell, retired on pension in July, and Lieut.-Colonel E. G. Pennefather, 6th (Inniskilling) Dragoons, was subsequently appointed in his place.

The Chinese contingent instituted in 1889, being found most unsatisfactory, was entirely done away with.

There were serious complaints of the conduct of some European inspectors and constables.

There were no serious disturbances during the year, but there were 17 cases of murder and 19 of gang robbery.

The abolition of strict supervision of brothels has resulted, as was expected, in great activity amongst brothel bullies, and compulsory levies on the keepers and inmates are rife, but difficult to stop.

There is an immense sale of lottery tickets in Singapore, the lotteries being managed in Johor, agents from there pushing the sale in Singapore. It is said that as much as $100,000 worth of tickets has been sold in one month.

JUDICIAL.

33. The following tables exhibit the work of the various courts, civil and criminal, of the Colony, viz.:—

The Supreme Court (Criminal side).
The Supreme Court (Civil side).
The Courts of two Magistrates (established in lieu of Courts of Quarter Sessions).
The Police and Marine Magistrates' Courts.
The Courts of Requests.

Found dead, causes unknown, &c. - -	32	27	7	66
Total - -	248	152	45	445

PRISONS.

35. In Penang and Malacca the health of the prisoners was very good, in Singapore not so good as in former years. The following table gives the figures for the year :—

Settlement.	Daily average in Prison.*	Daily average Sick.	Deaths.	Total Number treated.	Per-centage of Deaths to Total treated.	Ratio of Deaths per Mille of daily average Number.
Singapore - -	865·00	48·70	46	1,122	4·0	53·10
Penang - -	321·36	4·37	4	112	3·5	12·44
Malacca - -	22·58	0·32	—	4	—	—

* Including Civil Prison.

One suicide and two escapes occurred in the Penang Prison: there were none in Singapore and Malacca. No serious cases of assault occurred in any of the prisons.

There was one execution at Penang in March, and one at Singapore in October.

The numbers in the criminal prisons on the 31st December 1894 were as follows :—

Singapore - - - - -	807
Penang - - - - -	303
Malacca - - - - -	9

The daily average in the Singapore Prison was 68 less than in 1893, and 132 less than in 1892.

A most important step was taken by the Government during the year, viz., the banishment of habitual criminals (aliens) under the powers given by "The Banishment Ordinance, 1888." A list of the most notorious habitual criminals in the Singapore Prison was made out, and, as their sentences expired, they were banished. In this way 30 incorrigible scoundrels were got rid of from Singapore, and one (a professional gambler) from Penang.

The prices of some of the most important prison manufactures, which had formerly been almost prohibitive, were considerably reduced in 1894—in some cases by as much as 50 per cent. Notwithstanding the reduction, the value of articles sold during the year was only about $5 less than in 1893.

Well-behaved prisoners of the upper grade were, for the first time, tried as sub-warders with satisfactory results. The staff of native sub-warders was reduced by 9 and a saving of $864 per annum was effected.

During the year orders were given that prisoners with sentences of one year or less should be kept in Penang. Hitherto it had been the practice for all prisoners with sentences exceeding six months to be transferred to Singapore.

STRAITS SETTLEMENTS. 1894.

MISCELLANEOUS.

36. Lieutenant-Colonel Sir C. B. H. Mitchell, K.C.M.G., appointed Governor October 20th, 1893, arrived in the Colony and assumed the Government on 1st February 1894.

37. In order to render the Colony less absolutely dependent for current coin upon supplies of dollars from Mexico and Japan, a drawback pointed out in section 4 of the Report for 1893, sanction was received from the Secretary of State, in October, for introduction into the Straits and Hong Kong of a new British dollar identical in weight and fineness with the Japanese yen.

38. Advantage was taken of the termination of the existing opium and spirit farm contracts at the end of the year 1894 to introduce various amendments in the law dealing with the subject, as has already been pointed out under the heading of Legisl tion.

The re-letting of the farms for the triennial period 1895–97 resulted in a slight increase on the revenue for the preceding period, 1892–94, as follows:—

	1895–97.	1892–94.
	$	$
Singapore - - - -	1,416,000	1,368,000
Penang - - - -	855,600	852,000
Malacca - - - -	159,000	144,000
Total - - - -	2,430,600	2,364,000

Singapore, 22nd July 1895.

J. A. SWETTENHAM,
Colonial Secretary.

STRAITS SETTLEMENTS.

(For Report for 1894, *see* No. 149 of this Series.)

GOVERNOR SIR C. B. H. MITCHELL to MR. CHAMBERLAIN.

Government House,
Singapore,
14th August, 1896.

SIR,

I HAVE the honour to forward copies of the Colonial Secretary's Report on the Colony for the year 1895.

I have, &c.,

C. B. H. MITCHELL.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1895.

Financial.

1. The Revenue for 1895 amounted to $4,048,360, the three Settlements contributing as follows:—

Singapore - - - -	$2,290,642
Penang - - - -	1,418,521
Malacca - - - -	339,197

There was an increase of $143,586 as compared with the Revenue for 1894, and $342,051 as compared with the Revenue for 1893.

The principal increases were under the heads of Licenses ($112,011) and Reimbursements ($38,299). The increase in Licenses is mainly due to the fact that the fees for Public Houses, Opium and Spirit-shops and Warehouses were paid direct to the Treasury and not to the Farmer as formerly. There was also an increase from the re-letting of the Farms which took effect from the 1st January, 1895.

The increase under the head of Reimbursements, which is not strictly Revenue, was caused principally by the increased

Contributions from the Municipalities of Singapore and Penang towards the cost of Police. There was also a marked increase in Hospital charges recovered, as well as in the Revenue derived from Postage and Fees of Office.

On the other hand, there was a decrease of $4,180 in the Fees for Pawnbrokers' Licenses, the increased rates having caused several shops to close. Land Revenue shews a decrease of $41,811, which is accounted for by there being fewer special sales of the Telok Ayer Reclamation land during 1895. Fees for Search, Registration, &c., which in 1894 produced $29,135, amounted in 1895 to $1,545. This is explained by the fact that the work of registration in Penang was removed from the Land Office in 1894, and the fees are now classed as Fees of Office.

The Expenditure for the year was $3,782,456, which shews an increase of $67,836 over 1894, but is less than the Expenditure for 1893 by $133,026. There was an increase of $54,928 in Postal expenditure, owing to payment in 1895 of certain arrears in respect of the years 1892 and 1894 then outstanding, and an increase of $41,278 in Military Expenditure. The expenditure in connection with the Defences of the Colony was $777,725. The question of the Colony's Defence Contribution, which had caused much irritation in the Colony for many years, finally resulting in the resignation of most of the Singapore Unofficial Members of the Legislative Council and of the unofficial holders of other appointments, was at length set at rest by the decision of the Home Government to fix the Contribution at 17½ per cent. of the gross Revenue, exclusive of that derived from Land Sales and Premium on Land.

This decision has been accepted by the Colony as a satisfactory settlement of the matter.

2. Appendix *A** shews the Assets and Liabilities of the Colony as they stood at the beginning of 1895 and 1896, respectively. The nett balance to the credit of the Colony on the 31st December, 1895, was $2,063,454, as compared with $1,748,939 on the same date in 1894. The Colony has no debt.

Generally speaking, it may be said that the finances of the Colony are in a more satisfactory condition than they have been for some years, and it is hoped that some of the projected public works which have so long been delayed from want of funds may now be taken in hand.

Exchange.

3. The rates of exchange between the local dollar and the British sovereign during the year are shewn in Appendix *B*.* The average value of the dollar throughout 1895 was 2/1¼, and in bills at 4 months' sight 2/1½, as compared with 2/1¼ and 2/1⅜, respectively, in 1894.

* Not printed.

The estimated Bank Note circulation of the Colony on 31st December was $7,234,807. The Colony is at present dependent on the Chartered Bank of India, Australia and China, and the Hongkong and Shanghai Banking Corporation for its Bank Notes, but a Government note issue, guaranteed by the Colony, has been sanctioned, and will be introduced at an early date.

Municipalities.

The total Revenue of the three Municipalities was $1,146,280, and their Expenditure $1,092,383.

Legislation.

4. The Legislative Council held 20 meetings during the year, and 15 Ordinances were passed, the most important being "The Vision Ordinance," "The Telegraph Ordinance," "The Pawnbrokers Ordinance," and "The Theatres Ordinance."

"The Vision Ordinance" provides for the examination of masters, helmsmen, and gunners in colour vision and in Snellen's test for acuteness of vision for form.

"The Telegraph Ordinance" reserves to the Colonial Government the exclusive privilege of establishing telegraphs in the Colony, and provides for their working generally. Some of the existing telegraphs, although the property of the Colonial Government, have hitherto been constructed and maintained under no statutory authority.

"The Pawnbrokers Ordinance" provides penalties for certain offences by pawnbrokers, and is an addition to the existing law on the subject, the principal object being to render it more difficult for stolen property to be disposed of through the pawnshops. It has met with some opposition on the part of the pawnbrokers, but it is believed that there will be no insuperable difficulty in carrying out the law.

"The Theatres Ordinance" supplies a want which has been much felt in the Colony, the numerous theatres and performances usual in a Chinese population having been carried on hitherto with practically no control.

Registration of Deeds.

5. The Ordinance of 1886, which came into operation in Penang during the latter half of 1894, is now fairly established in that Settlement. The fees collected during the year amounted to $10,094, and in Singapore to $6,076.

The multiplication of small sub-divisions in the Northern Settlement formed the subject of discussion during the year, and resulted in an amendment of the law by which it is now necessary

that every sub-division shall be demarcated and surveyed before deeds relating to it can be received for registration. Provision is also made by which the Land Office becomes cognisant of every transaction affecting land.

Public Works.

6. The Sultan Shoal Light-house, which was commenced in August, 1894, was completed on the 31st December, 1895.

The Special Reclamation, Weld Quay, Penang, was well advanced at the end of the year.

No other works of any importance were executed during the year, except new barracks for the troops :—

Barracks for the Royal Engineers on Pulau Brani, overlooking the New Harbour, were commenced and pushed on with vigour, and considerable progress was made with barracks for the Royal Artillery on the adjacent island of Blakang Mati.

An addition to the existing Infantry barracks at Tanglin was commenced, to facilitate the future accommodation of the Penang detachment in Singapore.

Postal Department.

7. During the year under review, 5,756,940 articles passed through the Post Office of the Colony, as compared with 5,539,380 in 1894. The Registration, Insurance, and Parcel Post branches, as well as the Chinese Sub-Post Office, all shew steady progress.

The postal revenue amounted to $200,949, which is an excess of $11,157 over the income of the Department for the preceding year. The expenditure charged to 1895 was $204,105, being an excess of $54,607 over the expenditure of the year before. This large excess was caused by arrears, amounting to $25,132, for transit charges due to foreign countries for 1892 and 1893, having been paid in 1895, and to an item of $10,000 in respect of a subsidy paid by the Colony to the British India Steam Navigation Company to improve postal communication between the United Kingdom and Penang, *viâ* India. The expenditure exceeded the revenue by $3,158, but omitting the arrears referred to, the revenue would shew a surplus of $22,000 over the expenditure properly appertaining to 1895.

In consequence of more favourable rates of exchange having prevailed for remittances to gold-using countries and to India, there was a very large increase in the Money Order business done in 1895, in fact, greater than in any previous year. The transactions in sterling amounted to £9,939, in Indian currency to nearly Rs. 1,000,000, and in local currency to $200,000 ; the total business done aggregated $811,159, against a total of $671,231 in 1894.

Savings Bank.

8. Appendix *C** shews the particulars of the transactions at the branches in Singapore, Penang, and Malacca, during the year.

The amounts deposited during the year exceed the amounts for the previous year by $20,680, and the amounts for 1893 by $33,367.

The total sum at the credit of depositors on the 31st December, 1895, was $248,468, and the total amount deposited since the establishment of the Bank has been $1,362,493.

The sum invested, under Ordinance III. of 1891, in Government of India 3½ per cent. rupee paper is $186,179.

In September, the limit of deposits was increased from $250 to $500 in a year, and the aggregate amount from $750 to $1,500. From the 1st July, the interest allowed on deposits was reduced from 3½ to 3 per cent. on account of the reduction from 4 to 3½ per cent. in the interest on the Indian investments.

Education.

9. The number of schools inspected during the year and the number of pupils presented for examination were considerably less than in 1894. Two hundred and two schools were inspected and 7,734 pupils were presented.

The expenditure of the Education Department amounted to $180,847, as compared with $186,444 in 1894.

The results of the inspection of the aided schools do not, on the whole, appear to be so good as in recent years.

Population.

10. The number of births registered in 1895 in all the Settlements was 12,544, of which 6,565 were those of male, and 5,979 those of female children.

The deaths registered numbered 20,397, as against 17,234 in 1894, or an increase of 3,163, the highest rate of mortality having been recorded at Singapore. As in 1892, 1893 and 1894, the greatest number of deaths occurred among persons between the ages of 25 and 35.

Appendix *D** shews the number of births and deaths registered in each Settlement during the past two years.

The great preponderance of deaths over births is accounted for, as has been explained in previous reports, in great part, by the peculiarly constituted population of the Straits Settlements, less than a third of which, in consequence of the large amount of

* Not printed.

male Chinese and Tamil immigration, is female; but in 1895 the death-rate was also unusually high.

The present population may be roughly estimated at 542,000. Statistics relating to the health of the Settlements during the year will be found lower down under the heading "Public Health."

An examination of the vaccination returns affords ground for suspicion that a considerable number of births are not reported.

Chinese and Indian Immigration.

11. The numbers of immigrants from China and India during 1895 and 1894 are shewn in Appendix *E*.* There was a considerable increase in Chinese immigration, which had been almost entirely checked during the outbreak of plague in Hongkong in 1894.

The total number of Chinese deck passengers was 201,292, and of these, 36,388 signed contracts in the Chinese Protectorate, as compared with 22,302 in 1894.

There was also an increase in the Indian free immigrants, 14,413 arriving in the Colony, but the number of statute immigrants decreased. This decrease is partly due, no doubt, to the unfavourable exchange with India, which has not been counterbalanced by a sufficient increase in the wages of statute immigrants. It has been found necessary to partly re-organise the Indian Immigration Department, and arrangements have been made by which the Assistant Protector of Chinese at Penang will superintend both Chinese and Indian Immigration, his Department being strengthened by the appointment of a Tamil-speaking Assistant.

Trade.

12. The value of the imports and exports of the Colony in 1894 and 1895, respectively, are shewn in Appendix *F**.

The trade of the year has not been altogether unsatisfactory, in spite of the depressed state of the home markets, largely on account of the continued cheapness of silver, which enables Eastern producers to compete at an advantage with their gold country rivals.

The value of the imports in merchandise from countries outside shews an increase of about $915,000 over the returns for 1894, but that of the exports shews a small decrease of about $169,000, while the sterling value of the dollar fell less than 2 per cent.

13. The total value of imports and exports for 1894 and 1895, deducting Treasure, is shewn in Appendix *G*.* There was an

* Not printed.

increase in the silver value of Imports of $2,665,461, and of Exports of $2,071,194, making an aggregate dollar increase of $4,736,655. There were increases in the gold values respectively of £313,871 and £222,524, being an aggregate increase of £536,395.

Singapore shews increased trade with other countries on both sides, as also does Malacca, but Penang has decreases in both imports and exports.

Imports shew increases under Raw Materials—Metal, Manufactured Articles—Metal, and Textiles generally, except Cotton Piece Goods, which were above normal in 1894, and decreases under Food Stuffs, &c., chiefly Opium.

In exports, Tin shews a decrease in value of over 1½ million dollars, entirely on account of the low prices ruling. The average local quotation for the year was $35.10 per pikul, compared with $38 per pikul in 1894, and the average London prices were £63.8.4 and £68.3.9 per ton, respectively. Peppers and Copra also shew decreased values, but Gambier has a largely increased export value, as well as, to a smaller extent, Hides, Rattans and Gums generally, including Gutta Percha.

The imports of Merchandise from the United Kingdom decreased in value by about $696,000, but this is more than accounted for by the falling off in Cotton Piece Goods, in which there was a decrease of $1,756,000, not unexpected, considering that the previous year's imports were abnormal. Coal imported also fell in value by $450,000. Other Cotton Goods, such as Sarongs, &c., shew increased imports and so do other articles generally with the exception of Malt Liquors and Brandy.

Exports to the United Kingdom decreased by $1,732,000, Tin alone shewing a falling off of over 2¾ million dollars, and Gutta, Peppers, Rattans and Coffee also shewing less values exported. Increases are apparent in Preserved Fruits, Gambier, Tapioca, Gums generally, Sago and most of the Spices.

From British India and Burma, the imports valued $29,070,000, an increase of $1,361,000, attributable to increased imports of Rangoon Rice and Bran, Hides and Madras Sarongs and Kains. Imports of Opium fell by about a million dollars, and Cotton Twist also fell, but Gunnies and Coal shew increases. The exports amounted to $8,629,000, an increase of $210,000.

From Netherlands India, to the value of $27,896,000 were imported, a decrease of $1,809,000, on account of smaller supplies of Pepper, Sugar, Copra, Petroleum and other produce. The value of the exports was $31,514,000, being a small increase on the 1894 export value.

The value of the imports from Hongkong and China amounted to $19,707,000, an increase of $210,000 over last year, and $322,000 more than in 1893. Hongkong sent to the value of

STRAITS SETTLEMENTS. 1895.

$16,413,000, and China direct to the value of $3,295,000, compared with $16,205,000 from the former and $3,292,000 from the latter in 1894. The exports amounted to $12,266,000, a decrease of $1,024,000, or $107,000 below the exports in 1893. Hongkong took in 1895 to the value of $8,323,000, a decrease of $1,571,000, and China $3,943,000, an increase of $548,000. The falling off in exports to Hongkong was probably due to quarantine and other restrictions rendered necessary by the prevalence of epidemic diseases.

Japan has sent increased quantities and values, but a distinct decline is seen in supplies of Cotton Piece Goods, owing to the market having been probably overstocked in the previous years with that class of piece goods to which she has hitherto confined her attention. The imports amounted to $3,738,000, an increase of $76,000 over those for 1894, and the exports to $917,000, an increase of $142,000. In 1892, the imports amounted to $858,000 only, and the exports to $171,000.

The imports from the Malay Peninsula, including the Siamese States, reached $42,998,000, an increase of $1,502,000, and the exports $19,330,000, an increase of $551,000.

14. Appendix *H** shews the increase and decrease in the imports and exports of certain important commodities.

Cotton Goods.—The imports of Cotton Piece Goods were abnormally high in 1894, and stocks were still large at the close of 1895. A decrease of about a thousand bales of Plain Yarn is shewn, but this was met by a larger increase in the supplies of Dyed Yarn. Sarongs, &c., Sewing Thread and Handkerchiefs all shew increases, but a decline in Cotton Blankets is recorded, although the imports are above the average of former years. Japanese Cottons have not found a market to such a large extent, owing to stocks being still large.

Coal.—Imports in quantity are in excess of former years, but a decline of 30,000 tons is noted from the United Kingdom. Borneo, Calcutta and Australia sent increased quantities, the former country in particular, while Japan imports were much the same as in 1894.

Rice.—A falling off in the quantity supplied from Bangkok and Saigon was partly met by increased supplies from Rangoon, but there remains a total decreased import by nearly 18,000 tons.

Opium.—Frequent and large fluctuations in price have, no doubt, tended to restrict dealings, and the imports fell from 15,054 chests in 1894 to 12,456 chests in 1895, the exports also declining by 2,594 chests. The class chiefly affected is Patna Opium, the transactions in the Benares description having increased.

* Not printed.

Petroleum.—The total imports shew a falling off by nearly 220,000 cases, this decline being in shipments of American and Sumatra Oil. The decrease of Sumatra imports is due to the introduction of direct shipments for other countries, which were previously landed in Singapore. Russian oil, which comes both in bulk and case, increased by 190,000 cases, while American fell by 91,000 cases, and Sumatra, subject to the above explanation, by 328,000 cases. A small trade has been started in Burma oil, but it is as yet insignificant.

Gambier.—The distinctly marked increase in the exports of Gambier has been largely caused by the better prices obtainable owing to an anticipated small production, which was not realized, and also to the low exchange. The average local price was $8.86 per pikul, compared with $7.84 in 1894.

Gums.—Increased quantities generally were exported, notably in Gum Benjamin, Copal, Cutch and Dammar, and, to lesser extents, in Rubbers, Sticklac, and Vegetable Tallow. The decreases are small and unimportant.

Spices.—The exports shew increases in Nutmegs, Mace, Ginger, Cassia, Cubebs, and Cloves, but in Peppers and Arecanuts as well as in Cardamums and Cinnamon decreases are observable.

Tapioca.—A fairly substantial increase marks the trade in Tapioca, flour and flake, but in the pearl class a small decrease of about 600 tons is chronicled.

Copra.—The trade in this commodity is noted for the serious fluctuations in the quantity dealt in. In 1895 the exports shew a decrease of over 35 per cent. compared with 1894, which with 1891 were exceptional years, so that the 1895 export is still considerably above the average of previous outputs.

Sago.—The increase of over 1,500 tons is confined to Sago Flour, the description known as Pearl Sago averaging much the same quantity exported as previously.

Tin.—Although the output has been more than maintained, yet the high percentage of increase, which it has been customary to find when comparing each year with its predecessor, has been greatly reduced. The increased export is about 2 per cent. only, as against 17 per cent. in 1894 over the 1893 exports. A feature of the 1895 trade is the largely increased imports of the unsmelted tin (ore) by about 46 per cent. over 1894 imports, followed, of course, by a decrease in refined tin. This is due to the Singapore smelters reducing their charges, so that the Chinese smelters in the Native States are less able to compete.

There were reduced exports to the United Kingdom and Continental countries generally, but a very large increase to the United States.

Shipping.

15. The arrivals and departures of shipping during 1894 and 1895 are shewn in Appendix *K**. The total tonnage was 11,065,780, as compared with 10,755,021 in 1894.

The number and tonnage of the new vessels built in the Colony in 1894 and 1895 are as follows :

	No.	Tonnage.
1894 - -	77	5,232
1895 - -	251	7,464

The enterprise of local firms, aided by cheap silver and cheap labour, has successfully initiated the construction in this port of iron ships, one of which was launched in the year under review.

The Revenue (derived principally from Light Dues) of the Marine Department for each Settlement is shewn in Appendix *L*.* The total Revenue for the Colony from this source was $122,583, as compared with $116,583 received in 1894.

Light-houses, &c.

16. The Light-houses, Launches, Buoys, and Beacons throughout the Straits of Malacca were maintained in an efficient condition. The new Light-house on the Sultan Shoal was completed on the 31st December.

Public Health.

17. The general health of the Colony for 1894 has not been satisfactory, the mortality rate having been unusually high—37.66 per mille for the whole Colony. The rate was higher in Singapore (44.08), and Malacca (38.24) and also, though to a less marked degree, in Penang (35.14) ; in Province Wellesley alone (28.81) was the rate lower than that for the previous year. Colonial Surgeons report unusual prevalence of fever, beri-beri, and diseases of bowels and respiratory system as accounting for the higher mortality, which was not caused by prevalence of any epidemic disease.

There was an outbreak of cholera in Singapore in the middle of the year, some 430 cases in all having been reported, with 317 deaths. There were also a few cases in Penang.

Except for this outbreak, the Colony was singularly free from epidemic disease, the number of cases of small-pox that occurred having been comparatively few. The decrease of small-pox in the Northern District of Province Wellesley was very marked.

The Contagious Diseases Acts have been entirely repealed. Of the persons admitted to the Criminal Prison during the year, 527 in every thousand had suffered from venereal disease. In

* Not printed.

the Chinese population, by last Census, there were 143 women to every thousand adult souls in Singapore, the proportion of women immigrating being even less. As already stated under the head of Population, the greater death-rate is amongst males in the prime of manhood, between the ages of 25 and 35.

The number of persons treated in the Government Hospitals during the year was 25,177, as compared with 22,770 in 1894 and 23,499 in 1893.

The number of Lepers treated in the Leper Hospital, Singapore, and the Asylum, Pulau Jerejak, was 596, and there remained 335 at the end of the year. The deaths amounted to 177.

Meteorology.

18. The mean temperature of the air at each of the Settlements during the year and the mean total rainfall together with the maximum and minimum registered in one month will be seen in Appendices *S* and *T*.*

The temperature shews little variation, as compared with 1894, but the rainfall was considerably greater, except in Malacca, where only 76.60 inches fell during the year. In Penang, the total rainfall was 102.38 inches, and in Singapore 98.14. The mean temperature of the Colony was 79.7.

Bankruptcy Ordinance.

19. The Revenue of Singapore was $4,127, as against $7,887 in 1894, while in Penang it was $1,509, as against $1,568 in 1894. The number of failures has decreased both in Singapore and Penang, and the estates administered, for the most part, possessed but small assets. The tendency amongst creditors, naturally, is to wind up privately those estates which are at once substantial and easy to administer, and to throw into the hands of the Bankruptcy Department those cases only in which the assets are small and difficult to recover. For this reason, the number of failures dealt with by the Bankruptcy Department does not furnish an accurate index to the amount of insolvency occurring in the Colony.

Registration of Joint Stock Companies.

20. Seven Joint Stock Companies, with a total nominal capital of $728,000, were registered during the year. The amount of fees collected was $657.20. One of these companies, together

* Not printed.

with two others previously registered, went into voluntary liquidation, and in the case of another, also registered during 1895, an order was made for winding up under the directions of the Court.

Police and Crime.

21. The only alteration in the authorised strength of the Force during 1895 was the reduction of one Corporal and two Constables from the Penang Police.

Lieut-Colonel E. G. Pennefather, late of the Inniskilling Dragoons, was appointed Inspector-General in place of Mr. R. W. Maxwell, retired on pension. He took up his duties in Singapore on the 25th April.

Mr. C. E. Wegg-Prosser, late Lieutenant, Rifle Brigade, was appointed Assistant Superintendent by His Excellency the Governor on 28th June, and took up his appointment in Penang on that date, being in the Colony.

The conduct of the Inspectors has, on the whole, been good. The conduct of the Sergeants and Constables of the European Contingent has improved, with the exception that several men who had been locally enlisted had to be dismissed, some within a few weeks of their engagement. This contingent is now eight men below the authorised strength ; it is hoped that the men from the Royal Irish Constabulary for whom application has been made will be sent out soon.

There were no serious disturbances during the year. There were ten cases of murder and eight of gang robbery ; the latter crime appears to be steadily decreasing.

There is much extortion and disorderly conduct on the part of brothel bullies, the brothel-keepers having been refused the protection for which they asked.

The gambling suppression has been vigorously carried on, and some important convictions have been obtained, especially in Penang. The sale of lottery tickets in Singapore has been managed from Johore ; the agents in Singapore have a regular contract for indemnification by the principal, in case of suffering fine or imprisonment, and it has been very difficult to establish a case against them.

Judicial.

22. The work of the various Criminal and Civil Courts of the Colony is shewn in Appendices *U* to *Z** :—

In the Supreme Court, there has been a certain increase of work both on the Criminal and Civil side, in all the Settlements.

* Not printed.

There has been a very large increase also in the number of cases tried by the Police Magistrates, the total number brought before the Courts being 45,615, as compared with 37,145 in 1894.

The proportion of acquittals both in the Supreme Court and in the Police Courts was very high.

Inquests.

23. The number of inquests held during the year was 461.

Prisons.

24. The health of the prisoners in the Penang and Malacca Prisons continued satisfactory. In Singapore, the death-rate was nearly double that of the previous year, although the daily average sick and the number of admissions to hospital were nearly the same. The increase in the mortality is attributed to the feeble condition of many of the prisoners remaining from the previous year and also of those admitted during the year, and not to any defect in the Prison itself.

Three suicides and one escape occurred in the Singapore Prison, and one suicide in the Malacca Prison. There were no suicides or escapes in Penang. No serious cases of assault occurred in any of the Prisons.

There were three executions in Penang, but none in Singapore or Malacca.

On the 31st December, 1895, the number in the Criminal Prisons were as follows :—

Singapore - - - -	820
Penang - - - -	293
Malacca - - - -	4

The daily average in the Singapore Prison was 19 less than in 1894, and in Penang 19 higher. In both Singapore and Penang, there was a decrease in the number of long-sentence prisoners received, and an increase in the number of short-sentence and revenue grade prisoners. The increase in the daily average in Penang is principally due to the retention in Penang of prisoners with sentences between six and twelve months, who were formerly sent to Singapore.

In 1894, the staff of Sub-Warders was reduced by 9, and well-behaved prisoners of the Upper Grade were temporarily employed as Sub-Warders. Under instructions, however, from the Secretary of State this practice is being discontinued, and prisoners will not be so employed in future.

Miscellaneous.

25. Mr. W. E. Maxwell, C.M.G., (now Sir W. E. Maxwell, K.C.M.G.) having been appointed Governor of the Gold Coast, Mr. J. A. Swettenham, C.M.G., was appointed Colonial Secretary, and assumed duties on the 16th April, 1895.

The new British Dollar, the introduction of which, as mentioned in the report for 1894, was sanctioned by the Secretary of State in October of that year, was coined at the Bombay Mint. During the year 1895, the amount of this currency introduced into the Straits Settlements through the medium of the Banks was $2,201,890.

J. A. SWETTENHAM,

Colonial Secretary.

Singapore, 30th July, 1896.

8	Western Pacific	Solomon Islands.

No. 205.

STRAITS SETTLEMENTS.

(For Report for 1895, *see* No. 204 of this Series.)

GOVERNOR SIR C. B. H. MITCHELL to MR. CHAMBERLAIN.

Government House,
Singapore,
5th July, 1897.

SIR,

I HAVE the honour to forward copies of the Report on the Straits Settlements for the year 1896.

I have, &c.,

C. B. H. MITCHELL.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1896.

Financial.

1. The Revenue for 1896 amounted to $4,266,064, including Land Sales, the three Settlements contributing as follows :—

Singapore - - - -	$2,500,985
Penang - - - -	1,415,631
Malacca - - - -	349,448

There was an increase of $217,704 as compared with the Revenue for 1895, and $361,290 as compared with the Revenue for 1894.

The principal increases were under the heads of Interest ($75,430), Stamps ($[illegible]5,341), Port and Harbour Dues ($23,646), Land Sales ($22,657), and Land Revenue ($10,250). The increase

14501—750—8/97 Wt 20613 D & S—5 (B)

in Interest is mainly due to a payment of part of the arrears of interest due by Pahang received from Selangor.

The increase under the head of Stamps is chiefly due to Probate Duty paid on a very large estate; under the head of Port and Harbour Dues, to increase in the Shipping business; and under the other two heads to more activity in the Land market.

On the other hand, there was a decrease of $3,605 in the Fees for Pawnbrokers' Licences, the increased rates having caused several shops to close.

The Expenditure for the year was $3,957,262, which shews an increase of $174,806 over 1895, and $242,642 as compared with the Expenditure for 1894. There was an increase of $122,465 in Military Expenditure, due to the expenditure on the new Barracks, which in 1895 was $74,561, and in 1896 $188,427. There was also an increase under the head of Pensions of $88,711, which is mainly due to difference of rate for payment of Pensions in England, which was in previous years charged to Interest. On the other hand, Interest shewed a decrease of $86,716.

2. Appendix *A** shews the Assets and Liabilities of the Colony as they stood at the beginning of 1896 and 1897, respectively. The nett balance to the credit of the Colony on the 31st December, 1896, was $2,328,270, as compared with $2,063,459 on the same date in 1895. The Colony has no debt.

The Colony's financial position cannot be considered as otherwise than good, and it is now found possible to take in hand some of the most needed public works.

Exchange.

3. There was a slight improvement in the sterling value of the local dollar, the average value of which was 2 $2\frac{1}{16}$, and for bills at 4 months' sight 2 $2\frac{3}{16}$, as compared with 2 $1\frac{1}{4}$ and 2 $1\frac{1}{2}$, respectively, in 1895. The monthly variation in the value of the dollar is shown in Appendix *B*.*

The estimated Bank Note circulation of the Colony on 31st December was $6,734,049. The introduction of a Government Note Issue has been unavoidably delayed.

Municipalities.

The Revenue of the three Municipalities amounted to $1,215,469, and their Expenditure to $1,188,580. Under powers

* Not printed.

conferred by the Municipal Ordinance, a sum of $92,445 was levied in the districts outside the Municipalities. The Expenditure on Roads and Bridges in these districts amounted to $164,445.

Legislation.

4. Thirty-two meetings of the Legislative Council were held during the year, 21 Ordinances being passed.

Ordinances were passed consolidating the law with regard to the carriage and storage of Petroleum, &c., the law relating to Municipalities, and with regard to the protection of Women and Girls, and for the suppression of Brothels; and various important amendments were embodied in them.

Other important Ordinances were passed prohibiting persons banished from Johore or the Native States from residing in the Colony, for the suppression of the practice of injecting morphia by unqualified persons, for the registration and control of Native Passenger Lodging-houses, and for the regulation of burial and burning grounds outside the several Municipalities.

The Municipal Ordinance contains certain provisions for the control of burial and burning grounds within Municipal limits, and although these provisions might, under section 325, have been applied to country districts, it was considered advisable to have different regulations for country burial grounds.

Registration of Deeds.

5. The land market, as evidenced by the number of deeds registered, shows increased activity, the fees received in Singapore being $7,537, and in Penang, $8,702. Some delay is caused in the latter Settlement in the final registration of deeds owing to the inability of the Survey Department to keep pace with the demands for survey of sub-divisions, the number of which proved greater than was anticipated.

Public Works.

6. Barracks for the Royal Engineers (Officers and Men) at Pulau Brani which were begun in 1895 were finished in June, 1896, at a total cost of $64,000.

On Blakang Mati Island, barracks for Royal Artillery (married and single men), Officers' mess, and detached quarters for Medical and Field Officers were finished in December, 1896, while the construction of the Hospital was well advanced.

Two blocks providing 20 married quarters and an Infant School at Tanglin were brought near completion at the end of the year.

The only other works of importance were the completion of the Telok Ayer Reclamation, which was begun in June and finished in December, an extension to the Treasury containing space for about four million dollars in anticipation of the introduction of the Government Note Issue, and a further extension to the Beach Road Reclamation which formed a place to deposit dredgings from the Singapore River, and at the same time added about 90,000 square feet of area suitable for building sites.

The erection of the remaining portion of the sea-wall at Telok Ayer Reclamation brought to completion this very successful reclamation scheme. The total area reclaimed was 1,808,028 square feet, of which, 88,000 square feet have been reserved for public purposes. The total cost of the reclamation has been $917,244, and the amount already recovered is $739,482, the annual rents reserved on the grants issued amounting to $1,600. The average price obtained for the land sold in 1896 was $2.77 per square foot. The area still available for sale is 1,067,000 square feet.

The only other work of any importance was the continuation of Weld Quay Reclamation at Penang.

Postal Department.

7. During the year under review, 5,928,730 articles passed through the Post Office of the Colony, as compared with 5,756,940 in 1895. The Registration, Insurance and Parcel Post branches, as well as the Chinese Sub-Post Office, all show steady progress. The Postal Revenue amounted to $208,408, which is an excess of $7,461 over the income of the Department for the preceding year. The expenditure charged to 1896 was $183,440.43, being a decrease of $20,665, as compared with the expenditure of the year before. There is a small decrease on "British Postage," due to reduction of the special charges for Continental transit, and a large decrease on Foreign Postage, which is more apparent than real, as a large sum of arrears was paid in 1895, and in all probability a considerable sum will have to be paid for 1896 during this year, owing to adjustments consequent on the new statistics taken in 1896.

In consequence of less favourable rates of exchange having prevailed for remittances to India and Ceylon, there was a large

decrease in the Money Order business done with those countries. The transactions in sterling amounted to £10,920, in Indian currency to nearly Rs. 930,000, and in local currency to $208,705; the total business done aggregated $822,135, against a total of $811,159 in 1895.

Savings Bank.

8. Notwithstanding the reduction in the rate of interest from 3½ to 3 per cent., there was a large increase in Savings Bank transactions, as compared with the preceding year, and the amount standing to the credit of depositors at the close of the year was $326,877, an increase of $78,409, as compared with 1895. The deposits amounted to $227,980, and withdrawals to $157,399.

The investments in Indian 3½ per cent. rupee paper amounted to $257,857.

Education.

9. Two hundred and one schools were [illegible]cted in 1896, and 7,969 pupils were presented for exa[illegible]on. The results generally as shewn by the percentages of marks gained shew a considerable falling off, but this is attributed to a higher standard being required by the examiners, especially in English subjects, and not to a falling off in efficiency.

The existing system under which grants in aid depend on individual passes of pupils is thought to be defective, and it is hoped that a new Education Code, modelled on the English Code, may be introduced at an early date.

The total expenditure of the Education Department amounted to $178,004.

Population.

10. The population of the Colony, which was 512,342 by the Census of 1891, is now estimated to be 549,000. During the year 1896, there were registered 12,620 births, of which 6,627 were of male, and 5,993 of female children. The number of deaths registered was 24,014, as compared with 20,397 in 1895.

Chinese and Indian Immigration.

11. The number of Chinese immigrants was about normal, but there was a decrease in the number of contracts signed in the Chinese Protectorate, there being a smaller number

of contracts signed by unpaid passengers from lodging-houses.

It is satisfactory to record a substantial increase in the number of both free and statute immigrants from India. The present scarcity in India should do much towards stimulating emigration to countries such as this Colony and the Malay States, where there is a constant demand for labour.

Trade.

12. The trade of the year has not been as satisfactory as was anticipated in the first few months.

There was a large decline in the value of the principal articles of export—Tin, Gambier, and Pepper—caused by falling prices in the case of the first two products and by a decrease in the output of Pepper.

What may be taken as the feature of the year's trade has been the practical close to a period of successive advances in the export of Tin, owing to an end of the system of surface mining.

The market for Manchester goods has been depressed and unremunerative.

Notwithstanding these drawbacks, the trade of the Colony with outside countries has increased, chiefly on account of the heavy rise in the value of certain staple foodstuffs and an increase in the export of most important products except Pepper.

13. The value of the imports and exports of the three Settlements for 1895 and 1896 is seen in Appendix *F*.*

Merchandise imported from all places outside the Colony amounted to 176½ million dollars, an increase of 2¼ millions, and exports to over 151½ million dollars, an increase of nearly 2 millions.

From all places, including Inter-Settlement movements, an increase of $845,000 is seen in the silver value and of £687,000 in the gold value of goods.

To all places, including Inter-Settlement movements, the silver increase of merchandise sent is $960,000 and the gold increase £638,000.

* Not printed.

The sterling increase is largely owing to an average rise of over 3 per cent. in the gold value of the dollar, compared with 1895.

Imports show increased values under Foodstuffs, Manufactured Metals generally and Miscellaneous Manufactured Goods, but show a fall of over 2 million dollars in Textiles, and declines in Coal and Oil.

Exports shew increased values in Foodstuffs, Metals, Manufactured Gutta, Copra, Rattans, Hides, Timber, many products and Miscellaneous Manufactured Goods, but declines in Spices, Textiles, Tin, and Gambier.

Imports from the United Kingdom fell by 6¼ per cent. or 1¼ million dollars, chiefly in Cotton Goods, Coal, Iron Bar and Telegraph Materials.

Exports to the United Kingdom declined by 13 per cent. or 4 million dollars chiefly seen in Tin, Gambier, Gutta, Nutmegs, and Copra.

British India and Burma had an increase in imports received by the Colony of over 1⅓ million dollars owing to enhanced values of Rice, Opium, Raw Cotton and Hides, but exports thither declined by nearly half a million dollars on account of a falling off in Sticklac, Pepper, Sugar, Silk, Teel Seeds, and Umbrellas.

The Hongkong and China trade increased by 5 per cent. in imports and by nearly 20 per cent. in exports. There were increased imports of Wheat Flour, Beans and Peas, Hides, Vegetables, Tea, Paper, and Matches, and increased exports of Rice, the enhanced value of which alone was 1½ million dollars, Padi, Tin and Timber.

Japan imports slightly increased, but the exports fell by 41 per cent. or $375,000. Coal received increased in value, but Cotton Goods and Umbrellas fell off. Rice, Hides and numerous goods of little importance shew declines in the values sent.

Netherlands India is the source of the great bulk of the produce exported. Imports shew an increase of over half a million dollars and exports an increase of over a million.

Large increases are apparent in the value received of Copra and Rattans and by smaller amounts in Gambier, Gutta, Pepper and Beche-de-Mer, but there were serious declines in Sugar, Petroleum, Kachang Oil, Coffee and Nutmegs.

STRAITS SETTLEMENTS. 1896.

The greater value of the Rice sent accounts for the increased export, besides which, Cattle, Matches, Wheat Flour, and Beans and Peas shew fair increases, but there was a heavy falling off in Fish.

From the Malay Peninsula, including the Western Siamese States, a decrease of $1\frac{1}{3}$ million dollars is recorded, but in exports there is an increase of over half a million dollars.

Tin Ore, Rice, Fish and Rattans shew increased import values, but decreases are found in Tin, Gambier, Pepper, and Arecanuts.

Larger export values are recorded under Rice, Timber, Wheat Flour and various articles of minor importance, and decreases under Apparel, Cottons, Swine, and Opium.

The Continent of Europe sent larger values in the cases of Germany, Belgium and Italy, and less values from Austria, France, Holland, and Russia.

Exports to Holland declined, but rose in the case of every other country. Bangkok import values increased by over half a million dollars, but exports shew a trifling decline.

An insignificant advance is observable in trade with Saigon.

14. Appendix *H** affords a view of the fluctuations in the more important commodities.

Cotton Goods.—The imports of Cotton Piece Goods fell by over half a million pieces. Grey and Bleached Yarn shewed a little difference between the two years in the quantity imported, but in Dyed Yarn there was a decline of over 4,000 bales. Of this Yarn, large stocks were in hand during the year. Sewing Thread shews decrease in the import value of nearly $90,000, and Cotton Handkerchiefs, Sarongs, Slendangs and Kains, as well as Blankets, all shew decreases.

Coal.—There were received over 25,000 tons less than in 1895. From the United Kingdom supplies fell by 57,000 tons, while from Japan they rose by over 45,000 tons and from Borneo by over 4,000 tons. Australian imports fell by 10,000 tons, and Bengal coal by 1,000 tons. A silver currency favours the Japan and Borneo descriptions.

Rice.—Imports rose to nearly 429,000 tons, an increase of 28,500 tons, and, combined with a heavy rise in price, enormously increased the value of this foodstuff. Supplies from Rangoon

* Not printed.

increased, and, to a smaller extent, from Saigon, but a slight falling off occurred in the imports from Siam.

Opium.—An increase of nearly 1,100 chests was received on a total import in 1895 of 12,455 chests.

Opium from China, declared by importers as China Opium and Persian Opium, has been coming down in larger quantities, 250 chests being received in 1896, compared with 80 chests in the previous year. Patna Opium, which formerly was imported on as large a scale as the Benares description, is gradually dwindling to a mere fraction of its former proportion.

Tapioca.—The total export of all three kinds of Tapioca reached 45,358 tons, an increase of 3,500 tons. The increase was especially marked in Tapioca Flour.

Copra.—The production is larger than in 1895 by 9,300 tons, but with a total export of 45,950 tons is still less than the outputs in 1891 and 1894.

Sago.—Exports rose from 46,300 tons in 1895 to 51,500 tons in 1896. The increase was in both Sago Flour and Pearl Sago.

Rattans.—The year's export is the highest on record, exceeding by 4,000 tons the figures for 1895.

Tin.—A climax has been reached in the tin mining industry, and it is doubtful whether, for some years at least, such large supplies will be recorded. Yet the Peninsula is known to abound in mineral wealth, and it is difficult to say what would be the effect of a stimulant in the shape of high prices and increased demands.

A small increase is seen in the quantity sent to all places, the total production for the year touching 53,114 tons, an advance of about 400 tons.

There was a large falling off in exports to the United Kingdom, but an increase in the quantity sent to the United States of America.

Shipping.

15. The total tonnage of the vessels arriving and departing was 12,244,383, as compared with 11,065,780 in 1895. The light dues amounted to $110,623.

STRAITS SETTLEMENTS. 1896.

Two hundred and seventy-four (274) new vessels of 10,822 tons were built in the Colony during the year, including three steel screw steamers of 1,389 tons gross, which were built to the order of Netherland subjects.

Light-houses.

16. The new Light-house on the Sultan Shoal, which was first lit on the 1st January, 1896, has given satisfaction, while all the Light-houses, Launches, Buoys and Beacons have been maintained in an efficient condition.

Public Health.

17. The state of health throughout the Colony continues to be very unsatisfactory, and the very high death-rate of 43.78 per mille was reached. The rate was higher in all the Settlements, the difference being most marked in Singapore and Province Wellesley and, to a somewhat less degree, in Penang and the Dindings, and to a still less degree in Malacca. Fever and beri-beri continue to be prevalent.

There was again an outbreak of cholera in Singapore in the middle of the year, 592 cases being reported and 511 deaths. Many cases were discovered only after death. A few cases also occurred in Penang and Province Wellesley.

There was a large increase in the number of persons treated in the Government Hospitals, the admissions being 29,647, as compared with 25,177 in 1895.

The question of death registration has occupied the attention of the Government during the year, the returns of the causes of deaths being very untrustworthy. Assistant Registrars were appointed to ascertain by inspection and personal enquiry the causes of deaths reported to the Police in Singapore. The experiment, the cost of which is being shared by the Government and the Municipality, has been tried hardly long enough to enable one to speak as to its success, but sufficient cause has been shewn for amending the existing law as to death registration, and a Bill dealing with this important subject is now before the Legislative Council.

Meteorology.

18. A rainfall of 136.27 inches was recorded in Penang, the greatest fall in one day being 6.82 inches and in one month

(October) 26.49 inches. In Singapore and Malacca, the rainfall was considerably less than usual. The mean temperature of the Colony was of 80.1.

Bankruptcy.

19. There was a considerable increase in the number of Bankruptcies in Singapore, but the fees recovered do not pay the cost of the establishment. The question of raising the fees has been discussed, but it has been decided to wait until the Amending Ordinance passed in 1896 has been in force for some time in order that its results may be seen. The cost of the establishment in Penang has been reduced by the abolition of the appointment of Assistant in the Bankruptcy Department, the late holder having retired during the year.

Registration of Joint Stock Companies.

20. Five Joint Stock Companies, with a nominal capital of $609,000, were registered during the year. Three Companies went into liquidation, and an order was made for winding up another under the direction of the Court.

Police and Crime.

21. No change of any importance has taken place in the strength or constitution of the Police Force of the Colony. The general conduct of the Force has been satisfactory. The European Contingent is not up to its full strength. The service is not popular, and two Constables, one of them being a recruit from the Royal Irish Constabulary, deserted during the year.

No serious disturbances occurred during the year throughout the Colony.

There were 17 murders and 9 cases of gang robbery, and the latter crime appears to be on the increase in Singapore.

In Singapore, gambling appears to have been checked to some extent, though in Penang the efforts of the Police have not been very successful. In the former Settlement, for a time, certain cliques of Chinese women, mostly the wives of respectable shopkeepers, carried on a regular system of gambling, their husbands professing to be unable to put a stop to it. After careful watching on the part of the Police, a few convictions were obtained and there have been no further complaints.

The great Waiseng Lotteries have been suppressed for the time being.

Judicial.

22. In the Courts of Summary Jurisdiction, there was a large increase of work, and it is noteworthy that, while the number of acquittals increased by only 81, the number of convictions increased by 3,544. The proportion of acquittals is still very high and is, doubtless, accounted for by the system of private prosecutions for indictable offences which prevails in the Colony. There was also a considerable increase in the work of the Courts of Requests in all three Settlements.

There was a decrease in the Criminal work of the Supreme Court, and a large decrease in the number of Civil actions commenced during the year. The number of Civil actions disposed of was 1,348, and 971 cases were pending at the close of the year, as compared with 893 at the close of 1895. A fourth Judge has now been appointed, the existing Bench having proved insufficient to cope with the work.

Inquests.

23. Four hundred and ninety-eight (498) inquests were held during the year, and in 345 cases death was due to natural causes, accidental, &c. There were 71 suicides.

Prisons.

24. The increase in the number of convictions mentioned in paragraph 22 above, which was principally in the Settlement of Singapore, resulted naturally in an increase in the number of prisoners in the Gaols, the average daily number in the Singapore Prison being 905, as compared with 842 in 1895. The increase was principally in the Revenue Grade, composed of prisoners committed for non-payment of fines. Although the daily average of sick was greater than in 1895, there was a marked decrease in the death-rate in the Singapore Prison, which was 4.37 of the total treated, as against 7.05 per cent. in the previous year. In Penang, the increase was considerable, both in general sickness and the death-rate.

There was one execution in Penang, but none in Singapore or Malacca.

A serious assault occurred in Penang Prison, a sub-warder being struck by a prisoner on the head with a stone-breaking

hammer. The warder succumbed to the injury on the following day.

There were three suicides in the Singapore Prison, but none in Penang or Malacca, and there were no escapes in any of the Settlements.

C. W. S. KYNNERSLEY,
Acting Colonial Secretary.

Singapore, 18th June, 1897.

STRAITS SETTLEMENTS.

(For Report for 1896, *see* No. 205.)

ACTING GOVERNOR SWETTENHAM to MR. CHAMBERLAIN.

Government House, Singapore,
2nd June 1898.

SIR,

I HAVE the honour to forward copies of the undermentioned annual departmental report for the year 1897 :—

Report on the Straits Settlements.

I have, &c.,
J. A. SWETTENHAM.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1897.

FINANCIAL.

1. The revenue for 1897 amounted to $4,320,207, including land sales, the three Settlements contributing as follows :—

			$
Singapore	...	...	2,536,428
Penang ...	...	...	1,425,421
Malacca ...	...	...	358,358

There was an increase of $54,144 as compared with the revenue for 1896, and $271,847 as compared with the revenue for 1895.

The principal increases were under the heads of Land Sales ($53,255), Interest ($11,722), and Land Revenue ($10,797).

There are also satisfactory increases under Port and Harbour Dues, Postage, and Reimbursements.

On the other hand, there were decreases of $12,871 in Fees of Office and $12,531 in Stamps. The former is chiefly due to the decrease in the number of cattle imported, on account of cattle disease in the neighbouring countries, the latter to a decrease in death duties. Fines, Forfeitures, and Fees of courts also show a decrease of $6,686.

159—750—7/98 Wt 21620 D & S—5 (B)

STRAITS SETTLEMENTS. 1897.

The expenditure for the year was $4,430,603, which shews an increase of $473,513 over 1896, and $618,147 as compared with the expenditure for 1895. There was an increase of $126,974 in military expenditure, the cost of the new emplacements having been paid for during the year. There was a large increase under the head of Special Expenditure—$123,325. This expenditure includes $100,000 voted for the permanent memorial of Her Majesty the Queen's Diamond Jubilee, and $19,089 in connexion with the celebrations. There were also considerable increases under the following heads :—

	$
Personal Emoluments	93,915
Public Works Department Expenditure ...	65,382
Extraordinary Expenditure	29,362
Interest	16,020
Other charges	14,516

The large increase under the head Personal Emoluments is due to the addition of 10 per cent. to the salaries of the clerical branch of the service, the rice allowance of $1 a month to native subordinates, and the increase to exchange compensation in consequence of the fall in the value of the dollar.

ASSETS AND LIABILITIES.

2. The net balance to the credit of the Colony on the 31st December 1897 was $2,161,913, as compared with $2,328,270 on the same date in 1896. The Colony has no debt.

The financial position of the Colony continues to be very satisfactory. The excise farms have been let for three years at an enhanced rent of $645,000, and it is proposed to carry out a large scheme for the improvement of the harbour of Penang on an estimate of $459,000, and other important works, out of current revenue.

EXCHANGE.

3. There was a marked fall in the sterling value of the dollar, the average value of which was 1/11 13/16 on demand and for bills at 4 months' sight 1/11 15/16, as compared with 2/2 1/16 and 2/2 3/16, respectively, in 1896.

The average bank note circulation of the Colony for the year was $7,326,693.

MUNICIPALITIES.

4. The revenue of the three municipalities amounted to $1,273,283, and the expenditure to $1,371,716. Under powers conferred by the Municipal Ordinance, a sum of $89,998 was levied in the districts outside the municipalities. The expenditure on roads and bridges in these districts amounted to $241,083. The Singapore Municipality have taken in hand the important question of the disposal of town sewage, and large sums have also been spent in connection with the filter beds.

LEGISLATION.

5. Twenty-four meetings of the Legislative Council were held during the year, 18 Ordinances being passed.

Ordinances were passed consolidating and amending the law with regard to the registration of births and deaths, the law relating to lepers, and for the protection of Indian immigrants. The two last named Ordinances have not come into force. Certain provisions of the Indian Immigration Ordinance met with opposition from the planters, and will be dealt with in an amending Ordinance.

Other important Ordinances were passed to provide for the issue of Government paper currency, and to make better provision for the regulation of pilgrim ships.

REGISTRATION OF DEEDS.

6. The land market, as evidenced by the number of deeds registered, shews increased activity, the fees received in Singapore being for deeds, $8,479.70, and for bills of sale, $1,401.25; and in Penang, for deeds, $9,342·50, and for bills of sale, $1,050.50.

PUBLIC WORKS.

7. In Singapore, as in 1895 and 1896, the principal works were the construction of new barracks.

On Blakang Mati Island, the hospital and barracks for non-commissioned officers and married native soldiers were completed.

In Tanglin, two blocks providing twenty married quarters, an infant school, five quarters which are intended for the use of ten single sergeants, and the non-commissioned officers' mess were finished, and five married quarters and schoolmaster's quarters were begun.

At Pearl's Hill, 2 warrant officers' quarters and 6 married staff sergeants' quarters were commenced.

In addition to these works, a sum of $228,096 was handed to the Military Department for constructing the new emplacements for the quick-firing guns.

The only other undertaking of importance in Singapore was the extension of the Master Attendant's office at a cost of $15,000.

In Penang, the only service of importance was the construction of a jetty for the accommodation of local steamers. This work was brought near completion out of the Harbour Improvement vote, and it is expected to be finished early in 1898.

A sum of $9,000 was expended in enlarging the reservoir in Province Wellesley, to admit of Butterworth being supplied with water from Bukit Mertajam.

Under Roads and Bridges, a vote of $67,350 was taken for the renewal of 4 timber bridges with iron in Province Wellesley.

The abutments of these bridges were erected, and the superstructure of iron is expected to arrive soon from home, so that this much needed improvement will be accomplished early in 1898.

The Perak Railway system is being extended by the Government of the Federated Malay States to Prai in Province Wellesley, and a steam ferry boat service will connect it with Penang, a special jetty being about to be erected at Weld Quay.

POSTAL DEPARTMENT.

8. During the year under review, 6,031,136 articles passed through the Post Office of the Colony, as compared with 5,928,730 in 1896. The Registration, Insurance, and Parcel Post branches, as well as the Chinese Sub-Post Office, all continue to show steady progress. The postal revenue amounted to $215,246, which is an excess of $6,838 over the income of the department for the preceding year. The expenditure charged to 1897 was $198,136, being an increase of $14,695, as compared with the expenditure of the year before. There is an increase on "British postage," due to increased weight of mails and low rate of exchange.

In consequence of very unfavourable rates of exchange having prevailed for remittances to India and Ceylon, there was a large decrease of no less than Rs. 205,807 in the money order business done with those countries. The transactions in sterling amounted to £11,049, in Indian currency to nearly Rs. 725,000, and in local currency to $227,640; the total business done aggregated only $806,885, against a total of $822,135 in 1896.

SAVINGS BANK.

9. There was a large increase in savings bank transactions, as compared with the preceding year, and the amount standing to the credit of depositors at the close of the year was $363,545, an increase of $36,668 as compared with 1896. The deposits amounted to $269,313, and withdrawals to $242,341.

The investments in Indian 3½ per cent. rupee paper amounted to $273,391, and amounts placed on fixed deposits at the Chartered Bank to $34,000.

EDUCATION.

10. Two hundred schools were inspected in 1897, and 8,301 pupils were presented for examination.

During the year, a scheme for improving the pay and prospects of the Government European masters was drawn up and has been approved.

Singapore and Penang were both made centres for the Cambridge local examination in December for the first time. The result was, on the whole, an indication that this Colony has still a great deal of work before it in order to attain as good results as shewn by some other Colonies. The Penang Free School gained both the Queen's scholarships.

The total expenditure of the Education Department amounted to $179,769.

POPULATION.

11. The population of the Colony, which was 512,342 by the census of 1891, is now estimated to be 580,563. During the year 1897 there were registered 12,090 births, of which 6,250 were of male and 5,840 of female children. The number of deaths registered was 21,427, as compared with 24,014 in 1896.

CHINESE AND INDIAN IMMIGRATION.

12. The number of Chinese immigrants was very much below the normal supply, and there was a marked decrease in the number of contracts signed in the Chinese Protectorate. This was partly due to a prosperous year in the provinces of China from which our labour supply is chiefly drawn, and also to the restrictions placed on immigration in consequence of the prevalence of bubonic plague in China. The demand for tin-miners in Selangor having almost ceased no doubt also affected the supply to some extent.

It is satisfactory to record a further increase in the number of both free and statute immigrants from India. The late scarcity in India no doubt had the effect of stimulating emigration to countries such as this Colony and the Malay States, where there is a constant demand for labour. Arrangements have been made for cheap passages for intending immigrants to the Protected States.

TRADE IMPORTS AND EXPORTS.

13. The figures for the year shew large increases over those for 1896.

There was a decline in the value of the principal articles of export—tin, gambier, and copra—but an improvement is recorded in the pepper trade.

The trade of the Colony with other countries has largely increased. There was an increase in the export of coffee, gambier, hides, and pepper.

STRAITS SETTLEMENTS. 1897.

Merchandise imported from all places outside the Colony amounted to 187½ million dollars, an increase of 11 millions, and exports to 162½ million dollars, an increase of 11 millions.

From all places, including Inter-Settlement movements, an increase of $12,082,000 is seen in the silver value, but a decrease of £564,500 in the gold value, of goods.

To all places, including Inter-Settlement movements, the silver increase of merchandise sent is $11,869,000, the gold value decreasing by £387,500.

Imports shew increased values under food-stuffs (the increase in rice alone being over 6 million dollars), in manufactured textiles, machinery, telegraph materials, and coal, and declines in hardware, cutlery, and cattle.

Exports shew increased values in food-stuffs, gutta, rattans, hides, areca nuts, and pepper, but declines in tin, gambier, and copra.

Imports from the United Kingdom shew an advance of about 25 per cent., or 5 million dollars, chiefly in cotton goods, yarns, telegraph materials, and machinery.

Exports to the United Kingdom declined by about 1 per cent., or $262,000; the decrease was chiefly seen in tin, gambier, and copra.

From British India and Burma there was a decrease in imports of over 4 million dollars, owing to smaller supplies being received of rice and opium, but exports thither increased by 3½ millions. Larger exports of raw silk, areca nuts, and fish account for this. A large quantity of rice also was exported to British India, amounting in value to 1¾ million dollars over and above the value exported in 1896. The success of the experiment of closing the mints in India has favoured exports to that country, while diminishing exports therefrom to places with a silver standard.

The Hongkong and China trade increased by about 1½ per cent. in imports, but decreased by a little over 3 per cent. in exports. There were increased imports of wheat flour, joss sticks and joss paper, and raw silk, but decreased exports of tin, rattans, and pepper.

There was a fair increase in imports from Japan, due to a larger import of coal and matches. Exports thither nearly doubled in value, larger quantities of tanned hides, rice, and gambier, among other articles, having been sent out.

Netherlands Indian imports shew an increase of over two million dollars, and exports an increase of over four million dollars.

The largest increases are in sugar, gutta-percha and other rubbers received, and among the export articles shewing large increases are rice, cotton piece goods, sarongs, and kains.

From the Malay Peninsula, including the Western Siamese States, a decrease of over three million dollars is recorded in imports, but in exports there is a trifling increase.

Tin ore, rice, fish, rattans, areca nuts, and gambier shew increased import values, but a large decrease is found in tin, and a decrease to a smaller extent in pepper.

The Continent of Europe sent larger values in the case of all countries.

Exports to the Continent declined in the case of every country, with the exception of Belgium and Russia, to which places they slightly increased.

From Saigon imports increased by over 4 million dollars. The export value fell slightly. The large increase in imports is due mainly to the growth of the rice trade.

Cotton Goods.—The imports of cotton piece goods increased by nearly a million pieces. Yarns of both kinds also shew increases. Sewing thread shews an increase of $75,000 in its import value, but cotton handkerchiefs, sarongs, slendangs, and kains, as well as blankets, all shew decreases.

Coal.—There were received over 108,396 tons more than in 1896. From the United Kingdom supplies fell by about 3,000 tons, and from Borneo by 15,000, while from Japan they rose by over 40,000 tons. Australian imports rose by over 24,000 tons, and Bengal coal by about 55,000 tons.

Rice.—Imports rose to nearly 457,000 tons, an increase of 27,000 tons, and combined with a heavy rise in price, enormously increased the value of this food-stuff. The largest supplies came from Siam. Rangoon imports declined largely. Supplies from Saigon shew a large increase.

Opium.—Imports decreased by 769 chests. Opium from China declined by 131 chests. Patna opium fell from 525 in 1896 to 275 chests in 1897.

Tapioca.—The total export of all three kinds of tapioca was 39,973 tons, a decrease of 5,385 tons.

Copra.—Exports declined by 9,800 tons.

Sago.—Exports fell from 51,500 tons in 1896 to 44,959 tons in 1897. The decrease was in both flour and pearl sago.

Rattans.—The year's export is the highest on record, exceeding by 492 tons the figures for 1896.

Tin.—Exports largely declined, being 8,446 tons less than in 1896.

CURRENCY.

14. The decision of the Japanese Government to revert to a Gold Standard, which took effect during 1897, led to the recall of the Japanese yen, which had been current in the Colony and in its vicinity since 1872. A very large number of these coins was withdrawn from circulation and sent to Japan.

The coins were replaced by the new British dollar minted in Bombay, of which no less than $15,782,908 were imported into the Colony during 1897 by the banks alone. This new coin is already greatly in request in Siam, and its introduction into the Colony in such large quantities was a great convenience, as it may be doubted whether sufficient Mexican dollars could have been easily obtained to replace the large number of Japanese yen withdrawn.

During the year, the Chartered Bank of India, Australia, and China obtained authority from Her Majesty's Treasury to increase its local note circulation by $1,000,000.

SHIPPING.

15. The total tonnage of the vessels arriving and departing was 12,206,782, as compared with 12,244,383 in 1896. The light dues amounted to $115,887.

Three hundred and fifty-three (353) new vessels of 13,252 tons were built in the Colony during the year.

LIGHT-HOUSES.

16. All the light-houses, launches, buoys, and beacons have been maintained in an efficient condition and periodically inspected.

PUBLIC HEALTH.

17. The public health of the Colony during 1897 has been considerably better than it was during 1896, the number of deaths registered being less by more than 2,500 than it was during that year. The death-rate is still high, averaging about 36·00 per mille for the whole Colony, but this is a great improvement on 1896. The death-rate for 1896 was given as 43·78 per mille, but there is reason to think the population was underestimated in calculating this rate. A new method of calculation has been used this year, and it is on this that the rate of 36·00 per mille is based; were this calculation used for 1896, the rate of mortality would appear as 40·66.

The Colony has been remarkably free from zymotic disease during the year.

The number of patients treated in the Government Hospital was somewhat less than that during 1896, but greater than that of 1895 or any preceding year.

The arrangements described last year as being carried out in relation to the registration of deaths have been continued during 1897 with satisfactory results.

METEOROLOGY.

18. A rainfall of 138·88 inches was recorded in Penang, the greatest fall in one day being 5·76 inches, and in one month (October) 41·17 inches. In Singapore and Malacca the rainfall was above the average. The mean temperature of the Colony was 80·6.

BANKRUPTCY.

19. There were 31 receiving orders and 23 adjudications made in Singapore, and 12 receiving orders and 10 adjudications in Penang, shewing an increase in the number made in the previous year.

Few of the bankruptcies were of any great importance, and there has been a decrease in the amount of liabilities as well as assets as shewn by the bankrupts' statements of affairs. One important failure occurred during the year in Penang.

The revenue and expenditure both shew a small decrease on those of last year.

REGISTRATION OF JOINT STOCK COMPANIES.

20. Seven joint stock companies, with a nominal capital of $1,330,003, were registered during the year.

POLICE AND CRIME.

21. There has been no change of importance during the year in the strength or constitution of the police force of the Colony. The European contingent is still six men under strength. The conduct of the inspectors and of the European contingent has on the whole been good. The police are much hampered by the want of efficient detectives.

There has been a serious falling off in the numbers of the Sikh contingent, but now that the pay has been increased and additional privileges given, it is hoped that a sufficient number of recruits will be induced to join. The Malay contingent has been kept well up to strength in Penang and Malacca, but not so well in Singapore. The conduct of this branch of the force is on the whole improving.

In January there was a strike of jinrikisha coolies in Singapore, which, as some 16,000 men of the coolie class were involved, gave rise to some apprehension, but the strike subsided after a few days without anything worse than inconvenience to a large section of the public.

A good deal of uneasiness was caused in the end of September by the appearance of two placards inciting to murder and riot. The authors of the placards were not discovered. Precautions were taken and no riot whatever took place.

Twenty-two cases of murder and twenty-three of gang-robbery were reported; of the former, three took place on the high seas; of the latter, one was certainly false.

Gambling is increasingly difficult to deal with, and in the existing state of the law the police appear to want power to cope with the forms in which gambling is now carried on.

JUDICIAL.

22. In the Supreme Court on the criminal side there was a large increase in the number of cases at each Settlement, and on the civil side the number of actions commenced showed a considerable increase at Singapore.

In the Courts of Summary Jurisdiction, the work at Singapore and Malacca was greater than in the previous year, while it decreased at Penang. The number of convictions again showed a considerable increase, while the number of acquittals was less than last year. This increase in the number of convictions and decrease in the number of acquittals was especially marked at Penang.

INQUESTS.

23. Five hundred and eighty-two inquests were held during the year, as compared with 498 last year. The number in Penang showed an increase of over 50 per cent. In 399 cases the verdict was death from natural causes, accidental, &c. There were 82 suicides.

PRISONS.

24. The daily average of prisoners in the Singapore Prison is less than last year. The worst of the habitual criminals are now banished as their sentences expire.

There is again a marked decrease in the death-rate in the Singapore Prison, but an increase in the rate at Penang Prison.

There was one suicide in Singapore Prison. No escapes from prison took place in any of the Settlements.

C. W. S. KYNNERSLEY,
Acting-Colonial Secretary.

Singapore, 12th May 1898.

COLONIAL REPORTS—ANNUAL.

No. 287.

STRAITS SETTLEMENTS.

REPORT FOR 1898.

(For Report for 1897, *see* No. 236.)

Presented to both Houses of Parliament by Command of Her Majesty.
January, 1900.

LONDON:
PRINTED FOR HER MAJESTY'S STATIONERY OFFICE,
BY DARLING & SON, LTD., 1-3, GREAT ST. THOMAS APOSTLE, E.C.

And to be purchased, either directly or through any Bookseller, from
EYRE & SPOTTISWOODE, EAST HARDING STREET, FLEET STREET, E.C.; and
32, ABINGDON STREET, WESTMINSTER, S.W.; or
JOHN MENZIES & Co., 12, HANOVER STREET, EDINBURGH, and
90, WEST NILE STREET, GLASGOW; or

STRAITS SETTLEMENTS.

(For Report for 1897, *see* No. 236.)

GOVERNOR SIR C. B. H. MITCHELL to MR. CHAMBERLAIN.

Government House,
Singapore,
28th September 1899.

SIR,

I HAVE the honour to forward the Report on the Straits Settlements for the year 1898.

I have, &c.,
C. B. H. MITCHELL.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1898.

FINANCIAL.

1. The revenue for 1898 amounted to $5,071,282, corrected to $5,029,689 for arrears, the three Settlements contributing as follows :—

	$
Singapore	3,024,777
Penang	1,653,757
Malacca	392,746

There was an increase of $761,304 as compared with the revenue for 1897, and of $805,808 as compared with that for 1896.

4120—800—11/99 Wt 24600 D & S—5 (B)

The principal increases were under licences ($645,951), interest ($62,818), stamps ($30,159), postage ($18,707), and fines, fees, and forfeitures ($16,712).

There were also satisfactory advances under port and harbour dues ($4,512), fees of office ($14,682), reimbursements ($8,959), and district collections ($5,828).

There is a decrease under land sales of $79,749, but this is accounted for by the fact that no special sales of town lands in Singapore town took place.

The expenditure for the year was $4,582,951, as compared with $4,437,516 in 1897 and $3,958,898 in 1896.

The chief increases were :—

	$
Personal emoluments	153,842
Public Works Department expenditure...	134,661
Other charges	26,179
Pensions	19,347
Interest	12,038

The increase under personal emoluments is due to the increased cost of exchange compensation owing to the low rates of exchange during the year, to the 10 per cent. addition granted to the salaries of the Clerical Branch of the Service, and to grants to native subordinates as compensation for a high ruling price for rice, their staple food. The increase on Public Works Department expenditure is principally due to deferred expenditure of previous years. On the other hand, special expenses, which Her Majesty's Jubilee festivities had increased in 1897, showed a decrease of $111,201, and military expenditure $82,338, owing to completion of barracks and other works.

The Pawnbrokers' Ordinance, 1898, while defining more carefully the law affecting pawnbrokers, and limiting more narrowly their gains, has an indirect result on the revenue as section 35 permitted the farming out of the exclusive permission to keep a pawn-shop in a limited and defined locality.

The balance to the credit of the Colony on 31st December 1898 was $2,803,803, as compared with $2,236,457 on the same date in 1897. The Colony has no debt.

Exchange.

Exchange was very steady during the year. The average value was 1/11$\frac{1}{16}$ on demand and 1/11$\frac{1}{4}$ at four months' sight, as compared with 1/11$\frac{13}{16}$ and 1/11$\frac{15}{16}$ in 1896. The highest rate for demand drafts was 1/11$\frac{7}{8}$ in January and the lowest 1/10$\frac{1}{16}$ in March. In the last half of the year there was very little variation.

Currency.

The currency of the Colony consisted of Mexican, Japanese, and British dollars circulating at equal value.

In 1897, Japan decided to adopt a gold standard at a ratio with silver of 1 to 32⅓. This measure was adopted in the belief that silver would not fall below that ratio, and also that the enormous number of Japanese dollars held as currency abroad was there required as currency and would not be presented for exchange for the new coins. Five-and-a-half years were allowed to holders of the old coin before it should be demonetised.

Both these beliefs proved to be errors. Silver fell below the ratio of 32⅓ to 1, and enormous quantities of (old) Japanese dollars were presented for exchange for new coins, an operation which the fall in exchange rendered profitable. In April, May, and June, 1898, large quantities of Japanese dollars were bought up and sent to Japan for exchange.

On discovering their errors the Japanese authorities suddenly curtailed the five-and-a-half years' period, making it terminate 31st July 1898.

In April, the Government of the Colony took steps to ascertain public feeling as regards demonetising Japanese dollars, and their proposal to demonetise them was referred to the home authorities, it being necessary to consult Her Majesty's Treasury; while the proposal was under consideration, Japanese dollars began to be reimported, and an Ordinance 11 of 1898 was passed in October to prevent importation. In December, authority was received from England to demonetise the Japanese dollar after giving three months' public notice of the intended step. These measures prevented the Colony being flooded with rejected Japanese dollars. The Federated Malay States also took steps to exclude Japanese dollars.

British dollars to the value of $19,492,168 were imported by the local banks alone, as compared with $15,782,908 in 1897. Other dollars to the value of $10,198,904 were imported by the banks.

The average bank note circulation of the Colony for the year was $7,737,057, as compared with $7,326,693 in 1897.

The consent of the home authorities was obtained to Government note currency for the Colony and the Federated Malay States, and steps were taken to design and print notes. The design adopted bears the value marked on it in four places, with a description in English, Malay, Chinese and Tamil, and on the back the figure of a tiger.

The revenue of the three municipalities amounted to $1,337,500, and their expenditure to $1,339,602.

STRAITS SETTLEMENTS, 1898.

TRADE.

The trade of the year 1898 shews considerable expansion, the fluctuation in exchange having been less serious than in previous years a fairer comparison can be made.

The trade with gold standard countries amounted to 254 million dollars, an increase of 39⅕ millions, and with silver standard countries, exclusive of inter-settlement movements, to 144 millions, an increase of 10¾ millions.

The prices of the principal products have been high, with the exception of coffee and gambier, and the large trade in cotton piece goods has been done at not unremunerative rates.

Freights have ruled high during the year owing to the action of the Shipping Conference, and indications are not wanting that the effects have been more or less prejudicial to certain low priced and bulky goods, while shipments from Batavia and Macassar direct to Europe have become more frequent. The large increase in the value of exports direct to the United States is due to the same cause.

The aggregate trade for the last five years—inter-settlement trade excluded—shews as follows ('000 omitted) :—

—	1894.	1895.	1896.	1897.	1898.
(Per thousand.)	$	$	$	$	$
Merchandise ...	323,103	323,849	328,065	348,852	398,052
Specie	60,153	47,343	46,999	62,515	62,367
Total ...	383,256	371,192	375,064	411,367	460,419

The increase in merchandise is thus over 14 per cent.

Imports.

The value of imports increased by more than 13½ per cent., and that of exports by over 14½ per cent.

Including the inter-settlement movements, which have been excluded in the above figures, imports of foodstuffs and opium increased by 6⅛ million dollars.

Black and white pepper increased by 2$\frac{7}{10}$ million dollars, opium by 1⅜ millions, live animals by 1⅐ millions, areca-nuts by

nearly three-quarters of a million, fish by nearly half a million, sugar and spirits by over one-third of a million each, and tea, tobacco, nutmegs, malt liquors, medicines, provisions, and sago follow with smaller advances.

Decreases are marked in coffee by $1\frac{4}{5}$ million dollars, and rice by over three-quarters of a million.

Imports of manufactured textiles increased by over 5 million dollars.

Of this increase, cotton piece goods contributed $2\frac{1}{4}$ millions, sarongs and slendangs and gunnies nine-tenths of a million each, silk piece goods two fifths of a million, and apparel seven-twentieths of a million, followed by woollen cloth, umbrellas, silk sarongs, and hats and caps with smaller increases.

There are practically no decreases in this class.

Imports of manufactured metals increased by nearly one million dollars, shewn by increases in telegraph materials, hardware and ironware and tin plates, with smaller advances in machinery, corrugated iron, nails, and iron bar and nail rod.

Steel and zinc sheathing fell off in value.

The imports of miscellaneous manufactured goods increased by over $1\frac{2}{5}$ million dollars, seen principally in the enhanced value of cement, earthenware, charcoal, clocks and watches and fancy goods, toys and sporting materials, followed by smaller advances in coke, glass, cabinetware, soap, paints, and carriage materials. Decreases are seen in paper, lamps, and fireworks.

Exports.

Exports of foodstuffs reflect more or less the imports, but the following may be noted :—Spices of all kinds increased in value by $3\frac{1}{2}$ million dollars, sago by one-sixth of a million, tapioca by nearly half a million, and preserved fruits by seven-tenths of a million.

Coffee declined by nearly $1\frac{7}{10}$ millions and coco-nuts by six-tenths of a million.

Exports of raw produce, excluding the abovementioned goods, increased in value by $4\frac{1}{2}$ million dollars.

Gutta and rubbers increased by over $4\frac{3}{4}$ millions, copra by over $1\frac{3}{10}$ millions, coco-nut oil by four-tenths of a million, and gum copal by one-fifth of a million ; but decreases are seen in gambier of nine-tenths of a million, hides of over half a million, rattans of three-tenths of a million, followed by sandal wood and timber with less marked decreases.

The exports of tin increased in value by $3\frac{3}{4}$ million dollars.

General Observations on Trade.

The most important foodstuff (rice) fell off in supplies from Siam owing to the unsatisfactory crops, large quantities of the padi being composed of little more than husk, and as supplies from Saigon also fell off, large importations were made from Rangoon, but a distinct advance in price took place.

The low price of Liberian coffee, combined with a shortage of crop in Bali, accounts for the great decline in this trade of nearly 1,200 tons exported. Opium imports increased by 1,668 chests, and although less China opium was declared, it is probable much of that classed as Turkey and Persian received from Hong Kong is of that description.

Under raw materials imported, the chief are coal, petroleum, and tin ore. Coal imports fell off by 43,000 tons, the United Kingdom sending 48,000 tons only, a decrease of 49,000 compared with 1897, and of 139,000 compared with 1894. Japan supplies also fell off by 17,000 tons, but amounted in 1898 to 263,000 tons. While it is seen that Japan coal has practically cut out Cardiff coal, which, owing to strikes and political complications in the far East enhancing the price, has had its sale restricted for bunkering mercantile marine vessels, Indian and Australian coal shew increased supplies, cheap freights favouring these classes. Petroleum imports fell off from Russia and Sumatra, but Burma became a source of supply. From Sumatra nearly 3¼ million cases were transhipped at Singapore. It has, however, been reported for some time that some of these wells are failing; on the other hand Borneo supplies are being developed. A good deal of private enterprise originating from Singapore has been shewn in obtaining concessions for oil in the Dutch Indies, so far, however, with only limited success as to results.

The imports of tin ore received for smelting increased by nearly 60,000 pikuls. Of this increase, 12,000 pikuls were from the Dutch possessions, the remainder being from the Malay Peninsula. The tendency is to import less tin and more ore, owing to the facilities offered to miners in the way of money advances.

Imports of textiles have increased, especially in cotton piece goods, and sarongs, slendangs, and kains.

The United Kingdom held the same percentage in the quantity of piece goods sent to the Colony, *viz.*, 81 per cent., while shewing an increase of 850,000 pieces.

The imports of sarongs, slendangs, &c., from the United Kingdom show the gratifying increase of 40 per cent., while the quantity received from the Continent remained practically stationary.

In woollen cloth, the United Kingdom more than doubled her supply, while that from the Continent increased by 21 per cent.

The United Kingdom retains its hold in the cheapest class of blankets, in sewing thread, and in handkerchiefs.

The competition of India and the Continent in yarns resulted in a small decline from the mother country.

The large business done in apparel, hosiery, millinery, and haberdashery from Europe reached a value of nearly 2 million dollars, of which the United Kingdom sent three-fourths of a million, compared with a total European trade of 1⅘ million dollars in 1897, of which the United Kingdom held $715,000 value. Men's singlets, socks, and haberdashery generally comprise the bulk of the Continental imports, while drapery is a large item in the United Kingdom figures. Before the advent of Japan as a manufacturing country a fair business was done in cloth and alpaca umbrellas of British make, and in view of the unsatisfactory materials used by the Japanese manufacturers, French imports have risen from $47,000 value in 1894 to $162,000 value in 1898. A strong effort on the part of the mother country might now result in the recovery of a portion of this trade.

The United Kingdom has an increased import of $651,000 value in all metals, or over 13 per cent., and the Continent an increase of $234,000, or over 20 per cent. Metals from the United States fell from a value of $160,000 in 1897 to $99,000 in 1898, almost entirely in machinery.

The United Kingdom increases in tin plates and telegraph materials, of which she practically holds a monopoly, valued only half a million dollars, leaving for all other metals an increase of $150,000 only, of which machinery accounted for $100,000 and corrugated iron $74,000.

The decreases are noted in steel from the United Kingdom $109,000 less and gas electric lighting materials $19,000 less.

The figures for the Continent show increases in nails sent of $63,000, hardware and ironware of $185,000, and steel $22,000, but decreases in zinc sheathing of $58,000, and tinware of $25,000.

In the imports of miscellaneous manufactured goods, the United Kingdom held her own fairly well, but while she has largely increased her output in cement the Continental supplies have risen by 152 per cent. in value, showing a total trade of $192,000 in value and 30,500 barrels, an increase of 110 per cent., in quantity. The United Kingdom imports stand at $498,000 value and 82,000 casks, an increase of less than 39 per cent. in value and 24 per cent. in quantity.

British cement is high priced and manufacturers do not care to send inferior qualities to compete. Another point which has operated in favour of foreign cement is that some of it is packed in iron drums, thus obviating the risk of deterioration from exposure, so that planters, in Sumatra especially, prefer the cement

thus packed. Up to the end of 1895 dynamite was imported from Britain only, but in 1896 a German hand came into the market with the result that prices were greatly reduced and lower qualities had to be imported, and at the close of 1898 another German manufacture began to be brought in. Continental imports now value half those from the United Kingdom.

The mother country has no important decrease in any article of importance and shews considerable advance in fancy goods, toys and sporting materials, paints, soap, paper, cake, stationery, boots and shoes, earthenware and cabinetware.

The Continent has also increased her hold in most miscellaneous goods. In cycles the United States entered into competition and about 20 per cent. are of American make, but, low grade cheap machines having been found unsatisfactory, the best American productions have suffered in repute.

The increase in the export of tin is attributable to the high prices obtainable, but labour has become scarce and the prospects for 1899 are not promising.

Exports of inferior guttas and rubbers have upset comparisons, but the demand has encouraged export, as the enormously increased values testify.

Gambier exports fell off owing to the low price, the expense of labour rendering its production unremunerative.

High prices stimulated the trade in pepper and the large increase of 2,500 tons from Acheen is notable. From Johor a decrease of 1,500 tons was caused by the death of the old plants before the new ones had come into bearing. The rise in the price of food helped to create a scarcity of labour, and enterprise in replanting was not conspicuous.

An examination of the trade with different countries shews that the United Kingdom holds 13·8 per cent. of the whole, British possessions 22·5 per cent., the Malay Peninsula, Sarawak, and French India (the last named country having no trade of its own with the Colony) 16·4 per cent., and foreign countries 47·3 per cent., as compared with 14·1 per cent., 20·5 per cent., 16·6 per cent., and 48·8 per cent. respectively in 1897.

United Kingdom imports increased by 13 per cent., and exports by 9½ per cent.

Increased values of textiles, metals, cement, liquors, and tobacco are most marked.

Enhanced exports are seen in guttas and rubbers, pepper, tapioca, fruits, and gums.

Decreased imports are recorded in coal, yarn, and steel, and decreased exports in tin, hides, gambier, and sago.

The Continent shows an increase in imports of 14 per cent. and in exports of 25 per cent. Germany and Italy have the largest

increases in imports, followed by France and Holland, Belgium remaining practically stationary, while Austria shews an actual decrease.

The increases from Germany are in metals, textiles, liquors, cement, and earthenware ; from Italy in cottons, dyed yarns, sarongs, and milk ; from Holland in gin, sarongs, and hardware, and from France in brandy, umbrellas, and apparel.

Earthenware, cement, and glassware give increases from Belgium, but nearly every other article shows a decrease. Austria also has decreases in nearly every class, except apparel and dyed yarn.

The United States shewed large increases in the value of petroleum, lubricating oil, and carriage materials, including cycles.

The increased exports are seen in most of the principal articles of produce and are accounted for by direct shipments.

Imports from the Malay Peninsula increased by 13 per cent., chiefly in tin and tin ore.

Increased values of opium, textiles, metals and provisions, &c. sent give an increase of 11 per cent. in exports.

Notwithstanding a large decrease in the rice received, imports from Siam gave a small increase. Exports increased by 14 per cent., chiefly in opium and cotton piece goods.

Saigon trade fell off on the import side in rice, but the exports increased chiefly in piece goods, grey yarn, and provisions.

Imports from Hong Kong and China slightly increased, notwithstanding a decline in rice received of $1\frac{1}{8}$ million dollars. Rice, sugar, and opium shew increased exports.

From British India and Burma an increase in the value of imports of nearly 49 per cent. is recorded. Rice from Burma alone accounted for an increase of $8\frac{3}{4}$ million dollars, followed by increases in opium, gunnies, coal, &c.

Exports decreased by $5\frac{3}{4}$ per cent. entirely accounted for by rice having been sent to Bombay in 1897—an exceptional circumstance.

From Netherlands India imports increased by over 19 per cent., seen chiefly in enhanced values of gutta and rubber, copra, areca-nuts, and sugar, but there was a serious decline in coffee.

Exports increased by over 3 per cent., principally in cotton piece goods, cattle, coco-nut oil, sarongs, tea, &c.

Increased values of coal, jinrikishas, and matches account for a rise in imports from Japan of 12 per cent. Large exports of rice account for the difference between the two years on that side of the trade.

MINES, MANUFACTURES, AND FISHERIES.

Under this head there is little to chronicle. Malacca as a mining centre has been almost abandoned in favour of the Federated Malay States, which are richer in ore deposits.

The Government was sounded on the question of granting a monopoly of possible petroleum deposits in Province Wellesley.

The fisheries of the Colony are very rich, and fishing is a favourite pursuit of the Malay population, but very little fish is preserved by salting, nearly all being sold fresh.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

The sugar industry in Province Wellesley continued to give satisfactory results on the whole, notwithstanding increasing competition from bounty fed countries.

In Malacca a good tea plantation has been thoroughly established, which finds a local market for its produce. An enterprising syndicate of Chinese has begun to plant rubber largely in that Settlement.

In all the Settlements the cultivation of coco-nuts is progressing.

In Malacca a very successful agricultural show was held. It is intended in future that there should be a show every year in some one Settlement of the Colony.

The Botanical Garden at Singapore continued to aid planters by seeds and advice. This station is a centre for British North Borneo, Sarawak, Labuan, Johor, the Federated Malay States, and even Siam, and there was very keen competition for all the rubber seeds which could be spared. Orders were booked for quite twenty times as much seed as was available.

The Director, Mr. Ridley, visited the various Settlements and reported on the diseases prevalent amongst plantations. Some slight progress was made in the destruction of the beetles attacking coco-nut trees, but until the planters take a more lively interest in their destruction the pest will not be extinguished.

Land Grants.

For land in Singapore Island for agricultural grants the Government nearly doubled its rates of premium, with comparative success.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 12,661,442, as compared with 12,206,782 in 1897. The light dues amounted to $114,501.39.

Three hundred and eighty-six (386) new vessels aggregating 10,888 tons were built in Singapore during the year.

PUBLIC INSTRUCTION.

The schools in the Colony are all under Government inspection. Those which teach English receive grants-in-aid, dependent on the Inspector's reports. In these schools there are seven standards, and there are also grants for special subjects. Of schools teaching English there were forty, which received as grants-in-aid $47,417. Six English-teaching schools were maintained by the Government, at a cost of $31,698.

Vernacular (Malay) instruction is given in separate village schools maintained by the Government. There were 165 of such schools, costing $55,649.

A scholarship of £200 a year, tenable for four years, to any British University which exercises supervision over resident students is granted annually. This involved during 1898 an expenditure of $13,040. For this scholarship there is keen competition, and the winner usually graduates in honours.

Three industrial scholarships are annually granted to local scholars apprenticed to the local dock-yards, iron foundries, and the like.

Compared with other Colonies, public instruction is decidedly backward; there are several reasons for this; the demand for youths instructed in English is so great that the supply barely keeps pace with it; any youth who knows sufficient English to write a decent letter is sure of employment at once, and ceases to carry his studies further.

Parents are not sufficiently alive to the importance of their children being well instructed, and they will not make the sacrifice necessary to ensure their children being sufficiently long at school.

Again the language difficulty is very great. The vast majority of pupils in the English-teaching schools never hear a word of that language at home. The language of the playground and of the lowest classes in every school is Malay—and Malay of a very low and elementary type. The language of the pupil at home is generally some dialect of Chinese, Tamil, or Malay. This renders the task of acquiring English thoroughly and idiomatically very difficult.

During the year the establishment of a reformatory was sanctioned.

The large and excellently managed sugar estates in Province Wellesley are in themselves fine examples of agricultural instruction for those who desire to study that branch.

The dock-yards and the large iron foundries at Singapore and Penang supply technical instruction on a large scale. There is steadily increasing local demand for engineers for steam launches, steamships, and stationary engines, supplied from the local population.

LEGISLATION.

Twenty-six meetings of the Legislative Council were held during the year and 14 Ordinances were passed. Of these the more important ones are the Christian Marriage Ordinance III. of 1898, to consolidate and amend the law relating to the marriage of persons professing the Christian religion, and the Lepers Ordinance X. of 1898.

GOVERNMENT INSTITUTIONS.

Hospitals.

Except the Chinese hospital at Singapore, all the general hospitals in the Colony are under Government management. The plantation hospitals on the sugar estates at Province Wellesley, maintained by the planters, are frequently supervised by Government officers. In 1898 the principal causes for admission were malaria, beri-beri (less prevalent than in 1897), and venereal disease, for which the highest recorded number of admissions occurred.

The Colony escaped plague altogether, although it prevailed in China and in British India. Cholera caused 9 deaths in Singapore and 39 deaths in Penang. Small-pox prevailed extensively in Burma and this Colony; cases occurred in all three Settlements.

The hospitals received in the year 23,662 new patients. The Government maintains a lunatic asylum at Singapore, and a leper asylum at Singapore and another at Pulau Jerejah, an island close to Penang. The year began with 221 lunatics in the asylum and the number had dwindled down to 173 on the 31st December, 1898.

Cases of beri-beri occurred in the asylum throughout the year.

The quarantine regulations were admirably carried out during 1898.

Savings Bank.

There was a large increase in savings bank transactions, as compared with the preceding year, and the amount standing to the credit of depositors at the close of the year was $410,915, an increase of $47,370, as compared with 1897. The deposits amounted to $288,781, and withdrawals to $252,386.

The total of investments at the end of the year amounted to $401,391, the particulars of which are as follows, viz.:—

Indian 3½ per cent. rupee paper, $273,391.

Singapore municipal debenture stock, $48,000, bearing interest at 5 per cent., and $52,000 at 4 per cent. = $100,000.

Fixed deposits at chartered bank, bearing interest at 4 per cent., $28,000.

POLICE, PRISONS, AND JUDICIAL STATISTICS.

The following changes were authorised during the year in the strength of the police force :—

Increases.—Two chief detective inspectors (European contingent), twelve sergeants and seven constables.

Decreases.—Three inspectors, vacancies to be absorbed as they occur.

On the 1st January, 1898, the force of Europeans was five constables under strength, and on the 31st December, one drill instructor and four men under strength.

The increased advantages offered to the Sikh contingent had the effect of bringing the establishment rapidly up to strength, and the extra fifty men required for Penang were obtained without any difficulty.

The Malay contingent has been kept well up to strength; there has been a marked improvement in recruiting for this contingent in Singapore since June.

The detectives, both in Singapore and Penang, have worked more efficiently this year, especially in the latter Settlement.

No serious strikes or disturbances of any kind have taken place.

There were twenty-three cases of murder and twelve of gang-robbery.

There were two arrests for murder in extradition cases, and one for a murder committed in 1894, which are not included in the above figures.

Gambling on an extensive scale by means of lotteries was exceedingly prevalent in Singapore and Penang. Great patience

and care on the part of the police in the conduct of these usually difficult prosecutions was rewarded by a large proportion of convictions.

An attack of beri-beri rendered the Singapore Prison unhealthy for a time, and a batch of sick prisoners was transferred to the Quarantine Depôt, with a very beneficial result to their health.

VITAL STATISTICS.

The population of the Colony, which was 512,342 by the census of 1891, is now estimated to be 592,587. During the year 1898 there were registered 12,781 births, of which 6,625 were of male and 6,156 of female children. The number of deaths registered was 18,032, as compared with 21,427 in 1897.

The public health of the Colony during 1898 was better than during 1897, as may be seen by the great diminution in the death-rate and by the admissions to the hospitals. The only exception was that venereal disease increased. The death-rate for the whole Colony was 30·43 per mille, as compared with 36·90 per mille in 1897. No death-rate so low has been experienced for the last fifteen years.

Except for small-pox the Colony was remarkably free from zymotic disease in 1898.

The arrangements described two years ago for the registration of deaths have been continued during 1898, with satisfactory results.

In Singapore and Penang the general arrangements for the sanitation of the populace are carried out by the municipality, and both places enjoy a good water supply.

Malacca has been furnished with a water supply, also Balik Pulau, Bukit Mertajam, Butterworth, and Nibong Tebal in the Northern Settlement, and arrangements are being made to extend the areas served by some of these reservoirs.

Small improvements in drainage have been made to villages in Province Wellesley.

Climate.

The mean temperature of the Colony was 79° Fah. The mean rainfall was in inches 106·19 in Singapore; 124·51 in Penang; 90·21 in the Dindings; and 78·83 in Malacca. The greatest fall in 24 hours was 7½ inches at the Dindings on the 9th April. At the Quarantine Station, Singapore, as much rain as 25·56 inches fell in one month.

The monsoon winds make themselves felt at Singapore some two or three weeks later than in the Indian Ocean.

POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

During the year under review, 6,660,968 articles passed through the Post Office of the Colony, as compared with 6,031,136 in 1897. The registration, insurance, and parcel post branches, as well as the Chinese Sub-Post Office, all continue to show steady progress. The postal revenue amounted to $234,860, which is an excess of $19,614 over the income of the department for the preceding year. The expenditure charged to 1898 was $204,984, being an increase of $6,848, as compared with the expenditure of the year before. There is an increase on "British Postage," due to increased weight of mails.

The increase in money order business was quite extraordinary. The transactions in sterling amounted to £13,505, in Indian currency to nearly Rs.1,046,755, and in local currency to $263,717; the total business done aggregated $1,141,606, against a total of $806,885 in 1897.

Imperial penny postage was introduced on Christmas Day.

The Government owns the telegraphs in Penang and Province Wellesley, and also the inland telegraphs at Malacca which are all connected with the Government lines in the Federated Malay States. The cables between the Settlements which form the Colony belong to the Eastern Extension Telegraph Company. The mileage belonging to Government is as follows :—

Penang Settlement nearly .....80 miles
Malacca .....36 „

The Government telephone lines in Singapore are maintained and worked by a company; in Penang and Province Wellesley they are worked by the Government. Three hundred and nine miles of wire are open which are the property of the Government.

MILITARY.

The garrison consists of Her Majesty's regular forces and Asiatic artillery. No militia force exists.

A valuable volunteer artillery force, 105 strong, exists in Singapore; only Europeans are enlisted in it. It possesses some Maxim guns in the use of which it is proficient, and it has learned to work some of the guns belonging to the regular armament of the garrison.

The constabulary force exceeds 1,900 men, of whom more than 300 are Sikhs. They are well drilled and armed.

GENERAL OBSERVATIONS.

A long standing difference of opinion between the Colony and the State of Johore, as to the exact boundary between Malacca and Muar, was settled amicably by arbitration early in the year, and the boundary has been delineated.

The proposed railway from Singapore to Johore Strait was unfortunately delayed by an adverse vote in the Legislative Council, due to the magnitude of the estimated cost, which was nearly a million dollars.

Designs were adopted and the ironwork was ordered for an extensive wharfage scheme in Penang.

In Singapore the principal works were the construction of new barracks.

At Blakang Mati the Asiatic Artillery Barracks and quarters for hospital sergeant were practically completed, and the work of constructing roads and paths well advanced.

At Tanglin five married quarters and the schoolmaster's quarters were finished, and work in connection with the water supply to Tanglin Barracks made considerable progress.

At Pearl's Hill two warrant officers' quarters and six married staff sergeants' quarters were completed.

The construction of emplacements for the new quick firing armament of the harbour defence forts was nearly completed by the Royal Engineers' Department and a number of the guns have been mounted.

The only other work of importance at Singapore was the extension of Beach Road Reclamation.

In Penang the Public Works Department undertook the construction of a storage reservoir and settling tanks at Bukit Seraya.

In Malacca a new court house at Jasin was completed.

Under Roads and Bridges.—In Penang, the Batu Ferringi Road was extended, and in Province Wellesley three steel bridges were completed and opened to traffic.

The Perak Railway system is under extension from Parit Buntar to Prye in Province Wellesley.

Necessary quarantine regulations restricted the flow of Chinese immigration below the average (140,000) for the last ten years, but the numbers of immigrants (133,558, including females 9,146) were considerably in excess of those for 1896. The demand for labour was very great during the year. There is still a lamentable disproportion between the sexes.

From British India there was an increase in statute labourers but a decrease in free immigrants.

The climate is a very trying one for Europeans, and the field for employment of white men is small. No man should come to the Colony without a special engagement. The disturbances in the Philippines largely increased the number of unemployed loafers, whom the community had to deport as being unable to maintain themselves.

Owing to the high price of rice the rate of wages increased, and the large influx of foreigners into Singapore raised the rates of house rent considerably.

Provided the surrounding markets in China and Siam be kept open the future prospects of trade seem encouraging. The policy of those responsible for French Indo-China seems to be to try to compel that Colony to trade almost exclusively with the mother country; with a liberal policy its trade with Singapore would be five times the present amount.

The war in the Philippines has curtailed all exports to that country, except military stores from America, and has diminished exports from it. But the Malay Peninsula and Netherlands India are being developed rapidly, and the increasing prosperity in Siam makes it likely that it will afford a more profitable market in future.

On the whole the general condition of the Colony during the year was satisfactory.

STRAITS SETTLEMENTS.

STRAITS SETTLEMENTS, 1899.

(For Report for 1898, *see* No. 287.)

MR. EGERTON to MR. CHAMBERLAIN.

Government House, Singapore,
17th August, 1900.

SIR,

I HAVE the honour to forward copies of the Report on the Straits Settlements for the year 1899.

I have, &c.,

W. EGERTON.

Deputy of the Officer Administering the Government.

6784—800—9/1900 Wt 24600 D & S—5

STRAITS SETTLEMENTS, 1899.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1899.

FINANCIAL.

1. The Revenue for 1899 amounted to $5,200,026, corrected to $5,199,150 for arrears, the three Settlements contributing as follows:—

Settlement.	Amount.
	$
Singapore	3,104,376
Penang	1,671,448
Malacca	424,202

There was an increase of $128,745 as compared with the Revenue for 1898, and of $879,819 as compared with that for 1897.

The principal increases were under Licences $60,936, Land Sales $49,232, Stamps $29,501, Fees of Office $13,339, Reimbursements $12,755, and Fines, Fees, and Forfeitures $11,616.

The Pawnbrokers Ordinance, 1898, is the cause of the increase under licences. Under it the number of shops is limited, and the right to keep them let by public tender. The former system was to allow an unlimited number of shops at fixed fees.

There were also satisfactory advances under Land Revenue, $8,128, and District Collections, $7,642.

There is a decrease under Interest of $57,798, accounted for by the fact that in 1898 Pahang paid two years' interest on its loan to the Colony. There was also a special sum brought to credit in 1898 for profit on Government of India 3½ per cent. stock sold.

The Expenditure for the year was $5,062,299, as compared with $4,587,366 in 1898, and $4,429,694 in 1897.

The chief increases were:—

Expenditure.	Amount.
	$
Public Works Department Expenditure	211,822
Other Charges	133,310
Personal Emoluments	82,115
Special Expenses	52,627
Military Expenditure	24,428

The increase under Public Works Department expenditure is due to the erection of the Penang pier having been commenced; large payments for the material ordered from England were made during the year. The increase under "Other Charges" is chiefly caused by expenditure in connection with the currency note issue. Personal emoluments expenditure is greater, owing principally to the scheme for increased pay of the European police contingent. Special expenses were swollen by the colonial contribution of $50,000 to the South African War Relief Fund.

On the other hand, there is a decrease of $18,790 under Extraordinary Expenditure, the preliminary expenses of the Penang pier works having been charged to this vote in 1898; pension charges also diminished by $10,039, principally under the subhead of "Difference of Rate for Payment of Pensions in England."

The balance to the credit of the Colony on 31st December, 1899, was $2,696,295 as compared with $1,480,300 on the same date in 1898. The large increase in the credit balance during the year is due to the repayment by the Native States of Negri Sembilan and Pahang of their debts to the Colony, amounting to $1,077,000. This amount appeared last year under Dependencies.

The Colony has no debt.

EXCHANGE.

Exchange was very steady during the year. The average value was 1/11$\frac{11}{16}$ on demand, and 1/11$\frac{15}{16}$ at four months' sight, as compared with 1/11$\frac{1}{16}$ and 1/11$\frac{1}{4}$ in 1898. The highest rate for demand drafts was 2/0$\frac{1}{8}$ in April and May, and the lowest 1/11 in October.

CURRENCY.

The currency of the Colony consists of Mexican and British dollars, circulating at equal value, and the Government currency notes.

The proposed demonetization of the Japanese silver yen or dollar, referred to in the report for 1898, was carried into effect in April, 1899, on the expiration of the three months' notice given in the previous December. It caused very little, if any, disturbance to trade, as the banks had provided British dollars in ample quantity to take the place of the demonetized coin, and the Government currency note issue commenced on 1st May.

British dollars to the value of $29,349,725 were imported by the local banks alone, as compared with $19,492,168 in 1898. Other dollars to the value of $852,591 were imported by the banks.

The annual importation of British dollars since their first coinage in 1895 has been:—

Year.	Amount.
	$
1895	2,201,890
1896	3,623,000
1897	25,704,908
1898	19,492,168
1899	29,349,725

The average bank note circulation of the Colony for the year was $8,082,209, as compared with $7,737,057 in 1898.

The consent of the home authorities was obtained in 1898 to the issue of a Government note currency for the Colony and the Federated Malay States, and steps were taken in that year to design and print the notes. The design adopted bears the value marked on it in four places, with a description in English, Malay, and Chinese, and on the back the figure of a tiger.

The new notes were first issued on 1st May, the amount in circulation on the 10th of May and of each subsequent month being:—

Month.	Amount.
	$
10th May	405,000
„ June	780,000
„ July	1,118,000
„ August...	1,676,000
„ September	2,626,000
„ October	3,100,000
„ November	3,285,000
„ December	3,820,000

They at once circulated freely throughout the Colony and the Federated Malay States, and the amount issued was only limited by the supplies received from England. At the end of the year all the notes received were in circulation, except $245,000 worth of $5 notes, which had been received only on 27th of December. Notes to the value of $2,535,000 ordered in 1898 had not been supplied.

Municipal Revenue and Expenditure.

The revenue of the three municipalities, including a loan by Government of $250,000 to Penang, and a contribution from Government of $10,000 towards the expenses incurred in stamping out a small outbreak of plague in that Settlement, amounted to $1,680,287, and their expenditure to $1,389,009.

TRADE.

The year 1899 was profitable to importers, and trade increased both in bulk and value.

Prices of manufactured imports were generally higher towards the last half of 1899, and the principal articles of export, especially

tin, pepper, and tapioca, shew enhanced annual average values of from 20 per cent. to 70 per cent.

Coffee alone has declined in price.

Trade with gold standard countries rose 15 per cent., with silver standard countries 16 per cent., the greatest increases being in imports from silver countries and in exports to gold countries.

Homeward freights are now controlled by the Shipping Conference, and the abnormally high rates of 1898 were still further increased in 1900, and are a very heavy burden on producers of bulky and low priced goods, such as tapioca. There is little doubt that the conference is driving away trade from our ports—merchandise that was formerly sent to Singapore for transhipment being now sent direct to Europe. The effect of the conference is not felt as severely now when there is such general expansion and commercial activity as will be the case should its operations continue until an era of depression occurs.

The price of Cardiff coal rose to $30 = £3 per ton *ex* wharf at the close of the year, partly owing to the scarcity of tonnage caused by the demands made on steamships by the South African War, and also by the action of the conference, which prevents all but certain regular lines of steamers obtaining homeward freights at Singapore.

During the year the line of British steamers plying between Singapore, Bangkok, and Borneo was purchased by a German firm, and now sails under the German flag.

The aggregate trade for the last five years—Inter-Settlement trade excluded—shews as follows:—('000 omitted)

—	1895.	1896.	1897.	1898.	1899.
	$	$	$	$	$
Merchandise ...	323,849	328,065	348,852	398,052	462,136
Specie	47,343	46,999	62,515	62,367	60,854
Total ...	371,192	375,064	411,367	460,419	522,990

The increase in merchandise is thus over 16 per cent. in value.

IMPORTS.

The value of imports increased by over 33 million dollars, or 13·4 per cent. The total amounting to $246¼ million dollars, or £24¼ million sterling.

Under foodstuffs, opium, sugar, and tapioca, shew the largest increases, with smaller advances under spices, provisions, fish, medicines, spirits, and malt liquors.

The largest decline was 5½ million dollars in rice. A decrease of $645,000 in coffee is to be noted.

Increases are general in other imported foods.

Imports of manufactured textiles generally increased, but a decline occurred in the value of cotton piece goods.

Gunnies, silk piece goods, apparel, hosiery, &c., sarongs, cotton, blankets, and woollens all increased; grey yarn alone exhibiting a decline. Manufactured metals in nearly every class display advances, but a falling off in the value of telegraph materials imported reduces the favourable balance. Hardware and ironware, steel, tin plates, corrugated iron, zinc, tools, machinery, and copperware exhibit conspicuous increases.

Miscellaneous manufactured goods shew a serious decrease in cement only, but against this increases are widespread and important, particularly in paper and paper ware, and fancy goods, followed by fireworks, lamps, books, clocks, and matches, joss sticks, perfumery, japanware, paints, crockeryware, &c.

EXPORTS.

The value of exports of merchandise from the Colony increased by 31 million dollars or 16·9 per cent.; the total export trade in 1899 being nearly 216 million dollars or £21¼ million.

Increases in imports of foodstuffs and manufactured goods are reflected more or less on the export side.

Produce not used as food increased by 6¾ million dollars, chiefly observable in the enhanced values in guttas and rubbers, copra, planks, timber, ground nuts, rattans, raw hides, and bark. Decreases occurred in the values of gambier and cocoa-nut oil.

The extraordinary rise in the price of tin, from a little over £91 per ton at the beginning of the year to nearly £150 at the end of September, though followed by a decline to £103 in December, accounts for an increase of no less than £2,300,000 in the value of the exports of that metal.

The weight exported was, however, less, being 759,551 pikuls in 1899 against 766,216 pikuls in 1898.

GENERAL OBSERVATIONS ON TRADE.

The quantity of rice received reached nearly 360,000 tons, of which over 315,000 tons were re-exported. Supplies from Rangoon fell off by nearly 90,000 tons, while the quantity from Siam and Saigon slightly increased.

STRAITS SETTLEMENTS, 1899.

Opium imports rose by 611 chests, and represented an enormously increased value, owing to the price having risen from an average of $696 per chest in 1898 to $805 in 1899, the figures being:—

Year.	Chests.				
	Indian.	Persian.	Chinese.	Other.	Value.
					$
1898 ...	14,191	231	5	17	10,053,024
1899 ...	14,486	541	—	28	12,119,275

The continued low price of Liberian coffee is restricting cultivation, and the exports fell 16½ per cent. in quantity and 30½ per cent. in value.

A great rise occurred in the price of tapioca, the average for the year being $6·84 per pikul against $4·34 in 1898.

The exports of this product, which exceeded in quantity and value those of any previous year, nearly reached 52,000 tons.

The figures for the last three years are:—

Year.	Tons.	Value.
		$
1897	39,940	2,563,220
1898	47,738	3,480,680
1899	51,667	5,937,120

The principal spices as a rule shew well over last year's figures, with the exception of pepper, which has a decrease of about 2 per cent. The feature of the year in gums is the extraordinary increase in guttas.

Exports of gutta percha of good and inferior quality reached 194,000 pikuls compared with 114,000 pikuls in 1898. The exports consist of previously imported gutta, very little being produced in the Colony.

Benjamin, sticklac, and copal shew increased quantities, but dammar, camphor, and india-rubber fell off.

From the Celebes and Sumatra greater quantities of rattans were received.

Exports of gambier decreased, but large stocks, it is believed, were held at the close of the year, owing to the low prices then ruling.

Copra has the largest export on record, owing to increased importations from the Dutch Indies.

Tin exports, in spite of the high price, barely reached the last year's record.

The formation of several large companies for hydraulic sluicing of hill sides; the arrival of large numbers of Chinese miners in the latter half of the year, and the immigration of many more expected in the current year will probably very largely increase the production of this metal in the Federated Malay States in 1900. Nearly 33,000 tons of tin ore were imported for smelting in Singapore, all (with the exception of 1,600 tons from the Dutch Indies) being from the Malay Peninsula.

Coal imports exceeded those of previous years. 45,000 tons more were received from the United Kingdom. Japan steadily retains her hold of this trade, having sent 281,000 tons, an increase of 18,000 tons, and more than half the total import. Imports of both Bengal and Australian coal were smaller, the last-named class having been shipped to other eastern parts direct. A reduced amount of Borneo coal was also imported.

Liquid fuel from Cotie, in Dutch Borneo, was brought in to the extent of 24,000 tons, and it is probable that trade in this fuel will show considerable expansion in the near future.

Petroleum consignments increased from all places except Sumatra; supplies from Burma being double the 1898 figures.

It is noteworthy that the importation in cases and tins of Russian oil from Batoum has been entirely superseded by consignments in bulk.

The rise in the price of Manchester goods towards the latter half of 1899 was taken advantage of locally to indent heavily on stocks, but delay in making purchases took place, in spite of an active market, so that an actual decrease is apparent in piece goods imported.

The share of the United Kingdom in piece goods sent to the Colony fell from 82 per cent. of the total quantity and 86 per cent. in total value in 1898 to 75½ per cent. in quantity and about 80 per cent. in value.

The increased proportion received from other countries was chiefly in favour of Asiatic countries.

The large trade in sarongs, slendangs, and kains, which some years ago was entirely in the hands of Continental manufacturers, is being rapidly acquired by the United Kingdom, and in 1899, for the first time for many years, supplies from the United Kingdom exceeded those from all other European ports.

STRAITS SETTLEMENTS, 1899.

Imports of plain yarn from Britain fell off, as is to be expected in face of the competition from India, but dyed yarn imports increased both from the United Kingdom and the Continent.

Over 90 per cent. in the value of sewing thread imported, 77 per cent. of the quantity of handkerchiefs, and over 80 per cent. in quantity of cotton blankets, came from the United Kingdom.

Imports of apparel, millinery, hosiery and haberdashery from Europe show an increase of about £20,000 from the Mother Country, and of about £40,000 from the Continent.

The value of imports from France of umbrellas amounted to about £16,000 out of a total trade from that country of about £30,000.

The supply of gunny bags from Calcutta reached a total value of about £350,000, an increase of £50,000.

Metals of all kinds, except telegraph materials and nails, shew greater quantities and values. Home manufacturers failed to comply with orders for machinery, being unable to cope with the business offered; the prices of metals and manufactures were very high.

Omitting telegraph materials, it is seen that the values received from the Mother Country increased by 36 per cent., and from the Continent by about 14 per cent.

Machinery imports from Europe and America together are valued at £90,000, of which £75,000 came from the United Kingdom, the balance being equally divided between the Continent and the United States.

European imports of hardware and ironware valued £200,000; £115,000 coming from the United Kingdom, over £80,000 from the Continent, and the balance from the United States.

Iron bar and nail rod European imports are valued at £50,000, of which over £40,000 came from the United Kingdom, and the balance from the Continent. The whole of the corrugated iron trade, valued at £47,000, is with the United Kingdom.

Tin plates, coming almost entirely from the Mother Country, are valued at nearly £65,000. In the nail trade the Continent sent goods to the value of £24,000 out of a total of £27,000. Zinc sheathing is largely imported from the Continent. Telegraph cables and materials imported from the United Kingdom fell from a value of £208,000 to £77,000.

Miscellaneous manufactured goods exhibit increases generally. Explosives under various names, which are classified as dynamite, continue to arrive in large quantities from Germany.

The cement trade is gradually passing into the hands of Continental traders. At one time the Continental imports fluctuated between a ninth and a fourth of the amount received from England, but in 1899, for the first time, Continental imports actually exceed those from the Mother Country.

Increasing quantities of American bicycles are imported—principally of second and third grade machines, which are sold from £7 10*s*. upwards. The very cheap class of British manufacture, which would be bought by Natives and Chinese, is entirely absent from this market.

Imports from the United Kingdom increased by 2½ per cent., with a total trade of £2,800,000.

Decreases occurred in cotton piece goods and telegraph materials, yarn and cement. Most other articles shew increases. Exports to the United Kingdom amounted in value to £4,600,000, an increase of 67 per cent. This large apparent increase is, no doubt, in part attributable to the growing custom of optional bills of lading. It is not uncommon to have three and four ports declared as the optional destination of produce, and as shippers allege inability to specify the port, the first named, generally London, is taken as the port of consignment, and the United Kingdom credited with the goods.

The extraordinary rise in the value of tin alone accounts for £1½ million of the increase, guttas and rubbers for £275,000. The other headings showing the largest increases are hides, rattans, tapioca, and sago.

Exports of pepper declined.

Imports from the Continent increased 18 per cent., with a total trade of £1,380,000; Germany, Belgium, and Italy being the gainers.

A consignment of artificial indigo from Belgium, the products of the Badische Analine and Soda Works, of Ludwigshafen, Germany, may fore-shadow the extinction of an important local industry.

Imports of apparel and hosiery, malt liquors, lamps, dynamite, provisions, and hardware from Germany increased. On the other hand, matches and cement received from that country decreased.

From Belgium increased quantities of crockeryware and zinc sheathing were received, but less machinery.

Imports from Italy of dyed yarn and condensed milk increased; but cotton piece goods received from that country diminished.

Denmark, with increased shipping facilities, almost doubled her previous figures. Sweden sent more matches and bar iron.

France largely increased her hold on the umbrella trade, and the trade with Holland and Austria shows little variation in the total value.

Russian imports are confined to petroleum, which shows an increase in value owing to rise in price.

Exports to the Continent increased by 14 per cent., with a total value of £2¾ millions.

STRAITS SETTLEMENTS, 1899.

Our exports to France alone exceeded in value those to all the other continental countries combined, with an increase of over 40 per cent., and a trade of £1 $\frac{2}{5}$ millions. This again may be partly due to the use of optional bills of lading; the chief increases occurring in copra, tin, guttas, rubbers, tapioca, and rattans, while a smaller value of coffee and white pepper were sent to that country.

Exports to Germany show a trifling increase in the total value sent, chiefly in pepper, but there was a decline in tin, gambier, and copra.

Exports to Italy increased chiefly in tin, copra, and sago flour. The value of pepper exported, however, was less.

Consignments to Austria of copra and pepper increased.

A fall of half the whole trade took place in the case of Holland, caused by the falling off in tin sent, but the remarks relative to optional bills of lading are very applicable in this case. An apparent decrease occurred in sago flour sent to Holland.

To Russia less copra, tin, and pepper were sent.

Imports from the United States rose from £80,000 to £130,000, and the exports to that country from £2$\frac{1}{4}$ million to nearly £3 million.

Petroleum, lard and tallow, clocks and watches, and metals generally account for the increased imports. Tin contributed the increase in exports.

Heavy declines occurred in gambier, coffee, copal, and rattans exported.

Imports from the Dutch Indies increased by 22 per cent., chiefly in copra, guttas, rubbers, tin ore, sugar, raw cotton, ground nuts, oils, live animals, spices, fish, gums generally, rice and produce generally.

Coffee, rattans, gambier, black pepper, tin, tobacco, charcoal, planks, teel seeds, and gum copal decreased.

Exports to Dutch Indies totalled nearly the same value as in 1898, but increased to Java and Dutch Borneo.

Fish, cotton goods, oil cakes, gunnies, opium, and sarongs, &c., sent, all shew increases, rice, cocoa-nut oil, wheat flour, matches, coffee, confectionery, and cattle declined.

There was a decreased import trade with India and Burma of 7 per cent. more than accounted for by the fall in the value of rice received from Rangoon, owing probably to famine demands in India.

Imports of opium, gunnies, cotton piece goods, oil cakes, live animals, books, fruits, ghee, and twine increased. A fall in the value of coal and plain yarn are the only other declines of note.

The exports to India show a small increase, chiefly in areca-nuts, rice, sago, gambier, apparel, sugar, matches, and fish,

while those of tin, pepper, camphor, teel seeds, coffee, and petroleum decreased.

Trade with the States of the Malay Peninsula shows an increase in imports of over 43 per cent., tin and tin ore accounting for the greater portion; pepper, arecanuts, gambier, copra, tapioca, curry stuff, live animals, rattans, &c. for the remainder.

Exports to the Peninsula increased 7 per cent., opium, swine, machinery, cotton, lard, kachang oil, tobacco, and sugar contributing to the expansion. Exports of rice show a large decline; smaller decreases occurred in apparel, cement, and gunnies sent.

Trade with Siam and Siamese States increased slightly, both in imports and exports, chiefly owing to an increase in tin, and to a much smaller extent in cattle, rice, and bark. The value of exports of bran, silk piece goods, black pepper and timber, sugar and gunnies largely increased.

Exports of cotton goods fell off largely.

Hongkong and China trade rose by 21 per cent. in imports, mainly seen in medicines, provisions, paper, tea, silk piece goods, apparel, and hosiery.

Exports chronicle a small increase, especially noticeable in raw cotton, black pepper, and timber. A large decrease occurred in rice exports.

French Indo-China trade increased 13 per cent. in imports, and fell off slightly in exports. The export trade is being slowly killed by increased protective duties, against which even the French colonial merchants protest in vain.

Imports from Japan of apparel, hosiery, japanware, and coal increased. The smaller exports of rice more than account for the heavy decrease in the total value of our export trade with that country.

It should not be overlooked that, in the several cases where large increases are noted in tin and tin ore, they are almost entirely due to the abnormally high price of that metal in 1899; the average price in 1898 being £69 6*s.* 8*d.* a ton, and in 1899 £121.

Attention is also called to the fact that a correct estimation of our trade with the different countries of Europe is becoming impossible, owing to the large adoption of optional bills of lading. Where goods are exported under optional bills of lading, the country first mentioned is credited with their contents, and there exist at present no means of ascertaining the actual destination of the goods.

MINES, MANUFACTURES, AND FISHERIES.

There are practically no mines in the Colony. The tin deposits of Malacca are usually left undisturbed, though prospectors visit the Settlement from time to time, and small quantities of the

metal are still exported. The rich deposits of the rapidly developing Federated Malay States attract all the most experienced miners. No other metal has ever been mined in the Colony, though traces of the gold-bearing quartz veins of the interior are found within the boundaries of Malacca.

The laterite deposits of Singapore and Malacca supply an excellent and cheap metalling for the country roads, while granite of good quality from the islands to the east of Singapore is used for the roads of the town.

Laterite is absent from the Island of Penang, and from Province Wellesley. The roads in that settlement being formed of granite, which is abundant in every locality where the land rises much above sea level.

The Colony has few manufactures, the prosperity of the towns of Singapore and Penang being due to their positions as collecting and distributing centres for the trade of the surrounding countires. Singapore, however, has the largest tin-smelting works in the world; 31,567 tons of ore were converted into tin at these works in 1899.

The fisheries of the Colony are very rich, and give occupation to a large number of people. Most of the fish caught near Singapore and Penang is consumed fresh. That caught at the Dindings is salted for consumption in Penang and Perak. In both Penang and Malacca large quantities of a very small species of shrimp are manufactured into "belachan"—a favourite native condiment for eating with curry.

Large establishments for the tinning of pine-apples exist in Singapore, where this industry first originated, and which is still the chief source of supply to the European and Australian markets.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

Coco-nuts are very widely grown throughout the Colony, the largest plantations existing in Penang and Province Wellesley.

Singapore is not an agricultural settlement, but coco-nuts are grown round the coast, and pine-apples for the tinning manufactories cover most of the hills within easy reach of the town. Indigo is grown for local use in dyeing the cloth used by the Chinese.

In Penang, after coco-nuts and padi, the chief products are sugar from European and Chinese estates, the former being the largest and most important, with the most modern machinery; tapioca from one large European owned estate, and spices cultivated by Chinese on the hills.

Large fruit plantations also exist, which supply the towns in the Settlement and Perak.

Rubber cultivation is also attracting attention.

A very successful agricultural show was held at Butterworth, in Province Wellesley.

In Malacca are large and profitable tapioca estates, owned exclusively by Chinese. The method of cultivation is wasteful. Forest land is cleared and planted with three crops or four crops (the plant takes from 18 to 24 months to mature), and then abandoned. Much land, however, is fit for cultivation again after lying fallow from 15 to 20 years, and it has, as yet, been found impossible to cultivate tapioca profitably in this settlement in any other manner.

The price of this product rose during the year to nearly double the average of the last few years, and in consequence there was an eager demand for land, no less than 10,985 acres being alienated during 1899 for tapioca cultivation.

Coco-nuts are largely grown along the littoral, and the Malay population plant padi sufficient for their own consumption. Some rice has always to be imported for the Chinese in the town, and on the large estates.

Malacca is famed for its fruit, and is one of the chief sources of fruit supply to Singapore.

The low price of gambier during recent years has caused this cultivation to be much neglected.

The tea estate at Durian Tunggal produces tea of good quality. The area under cultivation has been extended, and new machinery erected.

Rubber is attracting the attention of Chinese estate owners, and is being largely planted on the Bukit Asahan estate, owned by a Chinese syndicate. Both Para rubber (*Hevea Brasiliensis*) and india rubber (*Ficus Elastica*) thrive in the settlement, and the cultivation is only limited by the difficulty in obtaining seed and cuttings. The Government plantations of both these trees should, in a few years, be capable of supplying all demands.

Towards the close of the year preparations were made for starting a large Government plantation of gutta-percha-producing trees.

The Botanical Gardens of Singapore and Penang continue to supply planters with seeds and plants.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 13,187,010, as compared with 12,661,442 in 1898. The Light dues amounted to $114,501·39.

Two hundred and ninety-eight new vessels, aggregating 7,273 tons, were built in Singapore during the year.

PUBLIC INSTRUCTION.

The principal schools of the Colony are either entirely maintained by Government or in receipt of a substantial Grant-in-Aid. There are 31 schools in which the English language is alone taught, 10 schools in which Tamil is taught as well as English, 2 schools in which Chinese only is taught, and 168 schools in which Malay is the only medium of instruction.

The expenditure on Government English schools was $28,032, and on Aided schools (English, Anglo-Tamil, and Chinese) $46,338.

The Malay schools, all of which are entirely supported by Government, cost $57,807.

Compared with other Colonies, public instruction is decidedly backward; there are several reasons for this—the demand for youths instructed in English is so great that the supply barely keeps pace with it; any youth who knows sufficient English to write a decent letter is sure of employment at once, and ceases to carry his studies further.

Parents are not sufficiently alive to the importance of their children being well instructed, and they will not make the sacrifice necessary to allow their children being sufficiently long at school.

Again, the language difficulty is very great. The vast majority of pupils in the English-teaching schools never hear a word of that language at home. The language of the play-ground, and of the lowest classes in every school is Malay—and Malay of a very low and elementary type. The language of the pupil at home is generally some dialect of Chinese, Tamil, or Malay. This renders the task of acquiring English thoroughly and idiomatically very difficult.

There are no organized technical or industrial schools in the Colony. A certain amount of practical instruction is, however, obtainable in mills, work-shops, and building-yards, and industrial scholarships are granted to enable boys to support themselves during the period of their apprenticeships. Two such scholarships were awarded in 1899.

Two valuable scholarships, known as the Queen's Scholarships, of the value of £200* a year for 4 years, are annually awarded after competitive examination to enable the best instructed youths from the Colony to continue their studies at a British residential University. One of these students obtained his degree in first class honours in natural science during the year 1899. Higher education is also fostered by the grant of local Government

* Increased in 1900 to £250.

scholarships, and of a bonus for passes in the Cambridge Senior Locals.

The number of pupils in the English-teaching schools of the Colony has been yearly increasing. One Government English school was closed during the year as being unnecessary, the pupils for the most part joining the large and efficient Penang Free School. Two new Grant-in-Aid schools were opened.

In Vernacular instruction the year was marked by the sanction given to the establishment of a Malay Training College for teachers at Malacca, the creation of scholarships to enable Malay boys to receive free instruction in English, and the re-organisation of Tunku Syed Husain's Home at Penang, to enable poor scholars from the country to obtain board and lodging while attending town schools.

A new education code was passed; it substitutes a grant by inspection for the former system of grants by result of individual examination of each scholar. Schools now receive Government aid in the form of a capitation grant, varying according to the classification of the school as a whole; and the older methods, which made the finances of a school dependent in a great measure upon the uncertain results of a single examination, have now been done away with.

LEGISLATION.

Thirty-five meetings of the Legislative Council were held during the year, and 22 Ordinances were passed. Of these the more important ones are:—

Ordinance I., of 1899, to regulate the manufacture, use, sale, storage, transport, importation, and exportation of explosive substances.

Ordinance IV., of 1899, to provide for the issue of Government paper currency.

Ordinance V., of 1899, to repeal and re-enact with amendments "The Lepers' Ordinance, 1898."

Ordinance VII., of 1899, for the protection of Indian immigrants.

Ordinance VIII., of 1899, to regulate the construction of a railway through a portion of Province Wellesley, and

Ordinance XX., of 1899, to prevent the propagation of plague.

GOVERNMENT INSTITUTIONS.

HOSPITALS.

Except the Chinese hospital at Singapore, all the general hospitals in the Colony are under Government management. The plantation hospitals on the sugar estates at Province Wellesley maintained by the planters, are frequently visited by Government officers. In 1899, the principal causes for admission were malaria, beri-beri and venereal disease.

There was a slight outbreak of plague in Penang during May, June, and July. Forty-nine cases occurred, resulting in 37 deaths. The origin of the outbreak was not definitely ascertained.

Cholera caused two deaths in Singapore, and one death in Penang. Cases of small-pox continued to be reported from all three Settlements, the numbers being—

Settlement.	Cases.	Deaths.
Singapore	339	106
Penang and Province Wellesley ...	707	163
Malacca	47	4

The hospitals (exclusive of the lunatic asylum) received in the year 23,265 new patients. The Government maintains a lunatic asylum at Singapore, a leper asylum at Singapore, and another at Pulau Jerejak—an island close to Penang. The year began with 173 lunatics in the asylum, and the number had increased to 178 on the 31st December, 1899.

Cases of beri-beri occurred in the asylum throughout the year.

The quarantine regulations were admirably carried out during 1899.

SAVINGS BANK.

There was a steady increase in savings bank transactions as compared with the preceding year, and the amount standing to the credit of depositors at the close of the year was $431,263, an increase of $20,347 as compared with 1898. The deposits amounted to $316,017, and withdrawals to $297,411.

The total of investments at the end of the year amounted to $419,907, the particulars of which are as follows, *viz.*:—

Indian 3½ per cent. rupee paper, $273,391.

Singapore municipal debenture stock, $48,000 bearing interest @ 5 per cent., and $57,000 @ 4 per cent. = $105,000.

Fixed deposits at Chartered Bank bearing interest @ 4 per cent., $33,000.

Cape stock bearing interest @ 3 per cent., $8,516.

POLICE, PRISONS, AND JUDICIAL STATISTICS.

The following changes, which were authorised in 1898, were carried out during the year:—

Increases.—Two chief detective inspectors were appointed.

Fourteen European constables were enrolled, of whom twelve came from England. It was not found possible to bring the number of sergeants up to the estimate provided for, owing to the absence of constables qualified by conduct and experience for promotion.

Decreases.—Three inspectorships, which fell vacant, were absorbed.

On 1st January, 1899, the force was one drill instructor, eight sergeants, and five constables under strength, and on the 31st December, one inspector and five sergeants under strength, and one constable over strength.

One inspector was added during the year to the Singapore force for duty with the marine police.

There is no difficulty in keeping the Sikh contingent up to full strength with good men.

The general rise of wages throughout the Colony has been prejudicial to the enlistment of Malays.

No Klings or Bengalis are now enlisted for the Malay contingent in Singapore, which tends to keep it below strength, but taking the three Settlements as a whole the contingent has been kept fairly up to strength.

There have been no disturbances.

The detective force has worked fairly well.

There were twenty cases of murder, and sixteen of gang-robbery.

There has been much less serious gambling in Singapore than in 1898, but it is still rife in Penang. Lotteries are somewhat common in Singapore.

VITAL STATISTICS.

The population of the Colony, which was 512,342 by the census of 1891, is now estimated to be 604,916. During the year 1899 there were registered 14,537 births, of which 7,598 were of male and 6,939 of female children. The number of deaths registered was 19,150 as compared with 18,032 in 1898.

The public health of the Colony during 1899 was fairly good, the death rate being very slightly higher than that for 1898 (31·66 as against 30·43).

Except for small-pox, the Colony was remarkably free from zymotic disease in 1899. A very limited outbreak of plague occurred in Penang, but was soon stamped out.

The arrangements described three years ago for the registration of deaths have been continued during 1899 with satisfactory results.

In Singapore and Penang the general arrangements for the sanitation of the populace are carried out by the municipality, and both places enjoy a good water supply.

The town of Malacca, and the villages of Balik Pulau, in the island of Penang, Bukit Mertajam, Butterworth, Prye (and the adjacent sugar estate), and Nibong Tebal, in Province Wellesley, enjoy water supplies from reservoirs erected and maintained at Government expense.

CLIMATE.

The mean temperature of the Colony was 80·0 Fahrenheit. The mean rainfall was, in inches, 108·60 in Singapore; 131·22 in Penang; 96·91 in the Dindings; 117·62 in Province Wellesley; and 74·25 in Malacca. The greatest fall in 24 hours was 9·30 inches at Penang on the 5th September. At Government Hill station, Penang, as much as 27·92 inches of rain was recorded in one month (August).

The monsoon winds make themselves felt at Singapore some two or three weeks later than in the Indian Ocean.

POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

During the year under review 8,068,788 articles passed through the Postal Department of the Colony as compared with 6,660,968 in 1898. The registration, insurance, and parcel post branches, as well as the Chinese sub-post office, all continue to show steady progress. The postal revenue amounted to $227,271, as compared with $234,860 for 1898. Imperial penny postage was introduced on Christmas day, 1898, and the first year's working has thus resulted in only the very small decrease of revenue, $7,589 or 3¼ per cent. This is a triumphant vindication of the arguments of the advocates of universal penny postage. There is little doubt that the receipts in 1900 will more than cover the small loss in 1899, and that the accustomed yearly increase of postal revenue will be resumed. The expenditure charged to 1899 was $211,958, being an increase of $6,973 as compared with the expenditure of the year before.

The sum payable as the Colony's share of the amount due to the Peninsular and Oriental Company, under the new mail contract, is still undecided.

The money order business continues to increase. The transactions in sterling amounted to £15,646, in Indian currency to nearly Rs.1,296,162, and in local currency to $328.812; the total business done aggregated $1,374,520 against a total of $1,141,606 in 1898.

The Government owns the telegraphs in Penang and Province Wellesley, and also the inland telegraphs at Malacca, which are all connected with the Government lines in the Federated Malay States. The cables between the Settlements which form the Colony, belong to the Eastern Extension Telegraph Company. The mileage belonging to Government is as follows:—

Penang Settlement nearly	...		85 miles.
Malacca	...	...	36 „

The Government telephone lines in Singapore are maintained and worked by a company. In Penang, Province Wellesley, and Malacca they are worked by the Government. Three hundred and nine miles of wire are open, which are the property of the Government.

MILITARY.

The garrison of Singapore consists of Her Majesty's regular forces and Asiatic artillery. No militia force exists.

A valuable volunteer artillery force, 105 strong, exists in Singapore; only Europeans are enlisted in it.

Its principal armament consists of a complete battery of six 2·5-inch R.M.L. screw guns, utilised with 7 pr. limbers as a field battery with pony draught, an experiment which has proved successful. It also possesses some Maxim guns (·45), in the use of which it is proficient. A volunteer rifle corps is in course of formation.

During the year a movement was set on foot among the British residents of Penang which resulted in the enrolment of a volunteer infantry corps, 150 strong. The corps received a great deal of local support, and was almost immediately brought up to full strength. Its armament consists of Martini-Enfield rifles with sword bayonets.

The constabulary force exceeds 1,900 men, of whom more than 300 are Sikhs. They are well drilled and armed.

GENERAL OBSERVATIONS.

The boundary between the Settlement of Malacca and the State of Johol, the settlement of which had been deferred pending the fixing of the Malacca-Muar boundary, was agreed upon in November, at a conference consisting of the Resident Councillor, Malacca, the British Resident, Negri Sembilan, and two of the Negri Sembilan Chiefs. It was subsequently confirmed by the Officer Administering the Government, and by the Yang Di Per Tuan, of the Negri Sembilan, with the advice of the British Resident. It will be permanently demarcated during the current year, and follows the line which has long been observed as the boundary.

The first railway in the Colony, from Prai to Bukit Mertajam, being the first section of the line through Province Wellesley to join the Perak railway system, which is being constructed by the Federated Malay States Government, was opened by the late Governor Sir C. Mitchell on the 28th of June.

Though the section opened is under 7 miles in length, a large passenger traffic was at once developed, the numbers carried during the remaining six months of the year being 104,704.

The long proposed railway from the town of Singapore to the Straits dividing the Island from Johore and the Peninsula, was approved by the Legislative Council, and preparations made to commence its construction early in 1900.

Work was commenced on the new iron pier and wharf at Penang.

Other important works were:—In Singapore, the completion of the Asiatic artillery barracks, quarters for hospital sergeant at Blakang Mati, and the Tanglin water supply.

The emplacements for the quick-firing armament of the harbour defence forts were completed by the Royal Engineers, and the guns mounted.

Substantial progress was made with the new civil prison, the reformatory, and with the erection of quarters for the senior police officers.

Four miles were added to the road system.

In Penang progress was made with new quarters for the Superintendent of Police, and for the Assistant Postmaster-General.

The large block of buildings to accommodate the Marine Department boarding officers and lascars and the Marine Police was commenced.

A large new police station was built at Jalan Bahru, near the Prai terminus of the Province Wellesley railway.

The Nibong Tebal water supply was improved, and the construction of a new and more elevated reservoir for Balik Pulau commenced.

In Malacca a new ward was added to the Durian Daun hospital, and the telephone system was extended.

The roads were well maintained, and a number of timber culverts and bridge abutments renewed in masonry.

Owing to the prevalence of plague in Hong Kong, coolie immigration from that port was entirely prohibited from June to October, and from the rest of China from June until August. Notwithstanding this restriction, the number of Chinese immigrants (149,697, including 7,717 women) was in excess of the average of the last ten years. The figures for the last three years are:—

Year.	Male.	Female.	Total.
1897	101,722	8,271	114,978*
1898	124,412	9,146	133,558
1899	141,980	7,717	149,697

* In addition to these immigrants 4,985 children arrived.

The lamentable disproportion between the sexes tends to increase.

The supply of labour was far below the demand.

A South African War Relief Fund was opened in Singapore by the editor of the *Straits Times*, and largely subscribed to. Other funds were opened in Penang, Malacca, and in the Federated Malay States.

A large public meeting was held on the 30th December, when the *Straits Times* fund was merged in a general fund, to be organised by a representative committee appointed at the meeting.

A case of plague was detected in Penang on the 11th of May, and between that date and the 16th July 49 cases were reported, of which 37 proved fatal. Vigorous and successful steps were taken to stamp out the disease, and no cases occurred after the 16th July. The outbreak caused considerable loss to Penang, as its trade was seriously impeded by the quarantine regulations imposed by foreign powers.

A large sum was also spent by the municipality in sanitary measures taken to suppress the disease. A pleasing feature of the outbreak was the assistance rendered by all races in carrying out the measures advised by the medical officers. This contrasts very favourably with the rioting and bigoted opposition to sanitation and segregation met with in India and elsewhere in Asia.

German trade flourished during the year, and a fleet of eleven steamers trading to Siam, Borneo, and Hong Kong, with an aggregate tonnage of 8,621 tons, was transferred from the British to the German flag as feeders to the German mail line from Hamburg to China.

This large German mail line also commenced running their boats fortnightly instead of monthly, and far larger and finer boats than the Peninsular and Oriental use on their eastern section were placed on the line.

The doubling of the German line, and the purchase of the Bangkok-Singapore fleet of 11 vessels, and other extensions of German shipping in Eastern waters, has probably been much hastened, if not directly caused, by the large profits now being realised by members of the Shipping Conference. This conference is a confederation of all the regular lines of steamers running between China and Europe. They fix the rates of freight, and allow to all merchants shipping exclusively by Conference steamers a rebate of 10 per cent.

This rebate is paid at the end of each year, and is forfeited if the merchant ships goods by any outside steamer, or otherwise breaks the Conference regulations. The result, of course, is that all must ship by Conference steamers, as other boats are few and uncertain. The effect of the Conference has been to raise freight

to London from a normal rate of from 23/- to 27/- a ton to one from 37/6 to 52/6. Freights, when the Conference started, had owing to excess of competing tonnage, dropped as low as 15/- per ton, and even less in some cases. This led to the Conference, and, though its members are now profiting largely by the high freights they receive, its effects are likely to be very injurious to British trade.

Some of the effects so far have been—

(*a.*) The rapid extension of German shipping in the far East.

(*b.*) Rise in the price of coal, owing to colliers being unable to obtain return freights from conference ports. This will probably cause, and perhaps has already caused, steamers to avoid coaling at Singapore where possible.

(*c.*) The extinction of shipments *viâ* the Cape of Good Hope, which is forbidden by the conference.

(*d.*) The restriction of all trade with Europe to steamers of the Conference lines.

(*e.*) Lower rates of freight to countries to which Conference regulations do not extend. Thus freights to London and Europe are from 50 per cent. to nearly 100 per cent. dearer than to New York, though the distance is much less.

The high price of rice noticed in last year's report continued.

Owing to this, and the rapid expansion of trade in the Colony and the Federated Malay States, the rate of wages continued to increase. Town lands rose in value. House rents have been steadily rising for some years past.

The scheme for the erection of a railway to the summit of Penang Hill, the only hill sanitarium in the Colony, took definite shape. A company styled the "Penang Hills Railway Company, Limited," was formed, and an Ordinance (No. XIX., of 1899) passed giving the company the necessary powers to construct the line.

The sanitarium on Penang Hill was formerly frequented by invalids from stations as far distant as Calcutta and Madras, before the hill stations of India were easily accessible.

In more recent years it has become the favourite health resort for Europeans in the Colony and Federated Malay States as well as from the Dutch Settlements in East and Northern Sumatra, no means of ready access to the extensive mountain ranges of that island yet existing.

The elevation of the inhabited portion of Penang Hill varies between 2,550 and 2,000 feet; this, combined with its proximity to the sea, gives it a perfect climate, and when the railway has been constructed it will be within an hour's journey from the town and harbour.

STRAITS SETTLEMENTS, 1899.

The sudden death of the Governor on the 7th of December, from a stroke of paralysis after less than one day's illness, threw a gloom over the closing month of the year. Sir Charles Mitchell had been amongst us nearly six years, and was universally liked by all classes of the community, and esteemed as a valued friend by all who knew him.

WALTER EGERTON,

Acting Colonial Secretary, Straits Settlements.

Singapore,
July 23rd, 1900.

No. 330.

STRAITS SETTLEMENTS.

(For Report for 1899, *see* No. 304.)

ACTING GOVERNOR SIR F. A. SWETTENHAM to MR. CHAMBERLAIN.

Government House,
Singapore,
9th July, 1901.

SIR,

I have the honour to forward copies of the Report on the Straits Settlements for the year 1900.

I have, &c.,

F. A. SWETTENHAM,
Acting Governor.

9719—875—8/1901 Wt 25152 D & S—5

STRAITS SETTLEMENTS, 1900.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1900.

FINANCIAL.

The Revenue for 1900 amounted to $5,386,927, the three Settlements contributing as follows:—

Settlement.	Amount.
	$
Singapore	3,244,431
Penang	1,736,130
Malacca	406,366

There was an increase of $186,901 as compared with the Revenue for 1899 and of $315,645 as compared with that for 1898.

The principal increases were under Stamps $90,418, Special Receipts $58,001, Port and Harbour Dues, $15,939, Fines, Forfeitures and Fees of Court $15,660, Fees of Office $14,677, Postage $12,508, Reimbursements $12,298, District Collections $11,603.

Under Special Receipts is included the refund of the Government share of contribution towards the Permanent Jubilee Memorial. There was an advance of $7,270 under "Miscellaneous Receipts."

There were decreases under the heads of "Interest" and "Land Sales," amounting to $28,631 and $23,507 respectively. The former may be attributed to the interest on the Loans to Native States having been paid up in 1899. There was a smaller value of land sold during the year under review.

The Expenditure for the year was $6,037,084, as compared with $5,060,523 in 1899 and $4,587,366 in 1898.

As compared with 1899 the Expenditure shews an increase of $976,561, the principal item being under Works and Building, Special Services $925,543. This increase is due to two large works, viz.:—The Singapore-Kranji Railway and Penang Pier, which were well in hand during the year. There were also some minor increases, $29,976 under Expenditure under "The Volunteer Ordinance," due to the forming of the Volunteer Rifle Corps at Singapore and Penang; $24,188 under Interest,

due to the writing off of a sum of $20,653 for difference in Exchange on balances in England; $23,757 under Roads, Streets, and Bridges, Special Services; $16,893 under Land and Houses purchased.

Of the decreases the most important is under Special Expenses, viz.:—$44,213. The payments in 1899 included $50,000 subscribed towards the South African War Relief Fund. Under Military Expenditure there was a decrease of $12,602 due to the adjustment of the contribution in respect of 1898 (paid in 1899) being of a larger amount than was paid in 1900 for adjusting the 1899 Contribution.

The balance to the credit of the Colony on 31st December, 1900, was $2,053,134, as compared with $2,698,065 on the same date in 1899.

The Colony has no debt.

EXCHANGE.

Exchange was unsteady during the year. The average value of the dollar was 2/0$\frac{3}{8}$ on demand, and 2/0$\frac{9}{16}$ at four months' sight, as compared with 1/11$\frac{11}{16}$ and 1/11$\frac{15}{16}$ in 1899. The highest rate for demand drafts was 2/1$\frac{5}{16}$ in October and the lowest 1/11$\frac{3}{8}$ in January.

CURRENCY.

The currency of the Colony consists of Mexican and British dollars, circulating at equal value, and the Government Currency Notes.

British dollars to the value of $21,571,488 were imported by the local Banks alone, as compared with $29,349,725 in 1899. Other dollars to the value of $3,988,750 were imported by the Banks.

The annual importation of British dollars by the Banks since their first coinage in 1895 has been:—

Year.	Amount.
	$
1895	2,201,890
1896	3,623,000
1897	25,704,908
1898	19,492,168
1899	29,349,725
1900	21,571,488

STRAITS SETTLEMENTS, 1900.

The average Bank Note Circulation of the Colony for the year was $6,713,133, as compared with $8,082,209 in 1899. The falling off is due principally to the reduction by the Hongkong and Shanghai Banking Corporation of the amount of its local issue.

The amount of Government Currency Notes in circulation on the tenth of each month (when statistics are published) was:—

Month.	Amount.
	$
January	4,165,000
February	4,875,000
March	5,025,000
April	5,300,000
May	5,300,000
June	5,300,000
July	5,300,000
August...	5,500,000
September	5,660,000
October	5,885,000
November	5,725,000
December	5,928,000

MUNICIPAL REVENUE AND EXPENDITURE.

The Revenue of the three Municipalities amounted to $1,684,149, and their Expenditure, including a sum of $138,260 expended on Loan Works in Singapore, to $1,737,962.

TRADE

The year 1900 was one of high prices in both manufactured goods and raw materials, but in the closing months the fall at home in the price of cotton and iron tended to a reduction in the former class.

The China War had a disturbing influence on Trade, and other causes, such as the prevalence of epidemic diseases and consequent traffic restrictions, also contributed to curtail business.

Trade with countries having a gold standard increased by 17%, and with silver countries by 5½%, but included in the former class are places under Dutch rule, where silver dollars are for all purposes the only medium of exchange.

Freights are still controlled by the Shipping Conference, and during the year frequent alterations of rates have taken place. New York tin importers pay 15/- a ton, compared with 27/6 paid by the Liverpool consignee,—a distinct advantage to the American Tin-plate maker over his Welsh rivals. Meanwhile it is reported that Macassar and Java are receiving cargo formerly sent to Singapore.

The growing influence of Germany as an oversea carrying power in these waters is more marked than ever, and this result is largely due to the tactics of the Shipping Conference, who, not content with ousting British tramp steamers from these seas, now notify that "Shippers are warned that shipments by "sailer may be prohibited (except to Marseilles) to all Con-"ference supporters."

In connection with this prohibition claim it may be noted that 13 sailing vessels cleared from Singapore with cargoes in 1900, of which 2 only were for Marseilles.

The aggregate Trade for the last five years—Inter-Settlement Trade excluded—shews as follows:—

(,000 omitted.)

—	1896.	1897.	1898.	1899.	1900.
	$	$	$	$	$
Merchandise ...	328,065	348,852	398,052	462,136	519,483
Treasure ...	46,999	62,515	62,367	60,854	57,225
Total ...	375,064	411,367	460,419	522,990	576,708

The increase in Merchandise is thus about 12½% in value.

IMPORTS.

The value of Imports of Merchandise increased by over 33½ million dollars, or over 13½%, the total amounting to nearly 279 9/10 million dollars, or £28¼ million sterling.

STRAITS SETTLEMENTS, 1900.

Under Foodstuffs,—Opium, Rice, and Sugar shew enormous increases, with smaller advances in Coffee and Pepper, followed by Tobacco, Medicines, Lard, and Fish.

Almost without exception the items forming this class yield substantial increases.

Of Raw Materials treated as Imports, Coal and Petroleum increased in value by 2 million dollars each, followed by Timber with over $\frac{1}{4}$ of a million increase.

In the Textile Class, Cotton Piece Goods imported increased by $1\frac{3}{4}$ million dollars, Sarongs by nearly as much, Gunnies by over $1\frac{1}{4}$ million, and Silk Piece Goods by over $\frac{1}{2}$ a million. Yarns and Sewing Thread both shew a decrease, especially the former.

Imports of Manufactured Metals yielded an increase of $1\frac{3}{4}$ million dollars over the whole class, of which Machinery accounted for nearly $\frac{1}{2}$ a million dollars, Hardware and Ironware for over $\frac{3}{5}$ of a million, and Nails for $\frac{1}{5}$ of a million, followed by Iron Bar and Steel with an increase of about $150,000 each, and Tools, Tramway Materials, and Brassware with smaller increases. The decreases are most marked in Telegraph Materials, Cycles and Accessories, Zinc Sheathing, and Yellow Metal.

Miscellaneous Manufactured Goods imported increased by about $1\frac{1}{2}$ million dollars, of which Glassware and Matches each contributed over $\frac{1}{4}$ of a million, and Cement about a fourth of the same amount. Other principal increases are seen in Candles, Woodenware, Chinese Shoes, Japanware, Cabinetware, Lamps, Joss Sticks, Beads, Bamboo, and Rattanware.,

Declines are noticeable in Fancy Goods and Toys, Fireworks, Dynamite, Tanned Hides, Earthenware, and Oil Cakes, but the amount of reductions are nearly all between $70,000 and $100,000 only.

EXPORTS.

The value of Exports of Merchandise from the Colony increased by $23\frac{3}{4}$ million dollars, or 11%, the total export trade in 1900 being nearly 240 million dollars or £$24\frac{1}{4}$ million sterling.

Increases in Imports of Foodstuffs and Manufactured Goods are shewn more or less on the Export side.

Pepper, Coffee, and Sugar exported increased by over a million dollars each in value.

Nutmegs and Padi shewed decreases.

Raw Materials generally, not used as Foodstuffs, rose by nearly $6\frac{3}{4}$ million dollars, of which Guttas accounted for over 4 million, Rattans for $2\frac{7}{20}$ million, Petroleum for $1\frac{3}{4}$ million, and Gambier for about $1\frac{3}{20}$ million, followed by Raw Hides,

Coco-nut Oil and Gum Copal. Of the decreases, Copra alone shewed $2\frac{3}{10}$ million dollars, Borneo and India Rubbers over $\frac{17}{20}$ of a million, and Kachang Oil $\frac{1}{6}$ of a million.

Tin exports valued over 61 million dollars, an increase of nearly 5 million, due to an increased output, combined with an increased average price.

TRADE RETURNS.

The quantity of Rice received reached nearly 388,000 tons, of which nearly 83% was re-exported. Supplies from Rangoon rose by nearly 18,000 tons, while the quantities from Siam and Saigon also increased.

Opium imports rose by nearly 2,000 chests, and represented an increased proportional value owing to the price having risen from an average of $805 per chest in 1899 to $929 in 1900.

Year.	Chests.			
	Indian.	Persian.	Other.	Value.
				$
1899	14,486	541	28	12,119,275
1900	15,853	1,145	20	15,427,897

Wines and Spirits as a rule declined in the quantity imported, with the exception of native liquor. The fall in Malt Liquors is especially noticeable owing to the substitution of Indian for European troops in Singapore.

The Imports of Fish, Dried and Salted, reached the total of 50,000 tons, a decrease of nearly 1,200 tons.

Wheat Flour imports rose from 21,000 to 23,000 tons—nearly the whole of which was of American production, and brought from Hongkong.

Coal Imports are the heaviest on record, having increased by 123,000 tons.

Japan Coal has considerably increased its average price, and shews an increase of 162,000 tons over the previous year's figures.

Cardiff Coal imported decreased in quantity by 13,000 tons.

Australian Coal imported decreased by 20,000 tons, and Borneo Coal by 16,000, while Bengal Coal shewed the same as in 1899, viz., 75,000 tons.

The enormous expansion in the Sumatra petroleum industry is worthy of note. No less than a quantity equal to over $1\frac{1}{5}$ million cases of 65 lbs. each was imported, representing two-thirds of the whole supply. Dutch Borneo, for the first time, figures in the returns as a supplier of this oil, having sent 132,000 cases. American and Russian Oils both declined, and Burma sent only 52,000 cases—less than half the previous year's supply.

The year was marked by unusually violent fluctuations in the Cotton trade, but the tendency was towards a higher level of prices, although these invariably lagged behind Manchester quotations, and, in the absence of margins, the process of buying in and replacement of stocks was considerably curtailed. Those who were fortunate in having stocks on hand had a successful year.

Nearly $5\frac{2}{5}$ million pieces of Cotton Piece Goods and $\frac{4}{10}$ of a million corges (one corge=20 pieces) of Sarongs were imported, an increase of about 90,000 pieces and the same number of corges respectively. Of the total import of Piece Goods over 3 million pieces were declared as plain, $1\frac{1}{2}$ million as dyed, and over $\frac{4}{5}$ of a million as printed.

The United Kingdom supplied 73% of the total imports of Piece Goods in quantity, and 74% in value, shewing a decline of $2\frac{1}{2}$% in quantity and 6% in value compared with 1899.

An increase from India of $\frac{1}{5}$ of a million pieces was observable.

The increase of 30% in the quantity of Sarongs imported was accompanied by an increase of 42% in value. The United Kingdom, although barely keeping her relative position when compared with the Continent, shews she has got a firm hold of a business so long monopolised by her rivals.

The trade in Dyed Yarns displays a decline of 38% in imports, the figures for Grey and Bleached Yarn remaining practically the same as in 1899.

The United Kingdom sent 3,350 bales less of Dyed, and over 1,000 bales less of Grey Yarn.

Silk Piece Goods imported record an advance of 70,000 pieces, chiefly from Hongkong and France.

Umbrellas again shew a large increase from France, amounting to $135,000 on a total trade of $300,000 in 1899.

Manufactured Metals fell considerably in price in the latter half of the year, leaving holders with large stocks of high priced goods, much of which had to be disposed of at an actual loss. This is especially seen in Wire Nails, Steel, and Corrugated Iron.

Of those metals whose quantities as well as values are declared, Tin Plates, Zinc Sheathing, and Yellow Metal alone shew declines.

The Continent of Europe has largely increased its hold in metals, having risen by 41%, while the United Kingdom, after the exclusion of Telegraph Materials, is found to have risen by 22%.

The United States of America has entered the market in competition with the Continent in supplying Wire Nails, and is steadily securing a hold in Machinery, Tools, and Hardware.

Hongkong is taking a front place in the Cement trade, and it is satisfactory to see attempts on the part of British merchants to regain their position from Continental importers.

In supplying Paints the United Kingdom well retained the premier position, but Germany takes first place in the export to the Colony of aniline Dyes.

In providing this market with Paper, Beads, Crockeryware, Clocks and Watches, Glassware and Lamps, the United Kingdom has to entirely give way to Continental manufacturers, but as regards Perfumery, Soap, Cycles, and Shoes, she takes front rank.

The average price of Coffee was $2.40 per pikul higher than in 1899, but quotations weakened towards the close of the year, and the prospects of this industry are not promising.

The quantity exported increased by 57%, reaching over 7,300 tons.

Tapioca exports fell in quantity by over 16%, the total export figures amounting to a little over 43,000 tons. The declines were in the Flake and Flour varieties, Pearl Tapioca having an increased export.

Sagos exported declined by 475 tons on a total of about 43,000 tons.

The quantities of Spices sent out were, on the whole, well up to last year's figures.

Peppers increased by 1¾%, Areca-nuts by 7½%, but Nutmegs, Mace, and Cloves fell slightly.

Tin exports recorded 48,000 tons, an increase of about 3,000, or 6%, although the anticipation was general that a considerable advance would take place. The local average price declared was $74.90 per pikul, an increase of nearly $2 on the 1899 average price. To the United Kingdom nearly 26,000 tons were sent, an increase of over 8,000 tons, and to the United States of America nearly 14,000 tons, a decrease of 5,500 tons.

Gambier exports fell by 3,500 tons on a total trade of over 50,000 tons in 1899. A gradual yearly decline is observable in the output since 1897.

Copra exports record the phenomenal decrease of over 20,700 tons on a total trade of nearly 61,000 tons. The Celebes alone account for more than a third of this decrease, and Dutch Borneo for about another third, but all sources of supply shew more

or less marked decreases. To France alone the exports declined by nearly 27,000 tons. Prices altered little from those of the previous year.

Gutta of good quality increased its export figures by over 1,000 tons, but inferior kinds fell off by about the same amount. This low priced produce, chiefly Gutta Jelotong, is sent principally to the United Kingdom and the United States.

Borneo and India Rubber exports decreased by over 500 tons.

Gum Copal, Gum Benjamin, and Sticklac each shew increases.

The Rattan output increased by nearly 7,000 tons, the whole trade amounting to 37,000 tons.

Exports of Manufactured Goods reflect more or less the imports.

TRADE WITH PRINCIPAL COUNTRIES.

The United Kingdom imports increased by close on 5%, or by £135,000. This increase is chiefly apparent in greater values of Cotton Piece Goods and Sarongs, Machinery, Hardware, and Ironware, with other Metals generally, Coal, Cement, and Paper.

The decreases were few and unimportant, the largest being Telegraph Materials, which declined by £20,000.

Exports increased by nearly 30%, or by £1,360,000. In Tin alone an increase of over a million pounds is seen, and in Gutta of £375,000, followed by Hides and Gambier with increases of over £20,000 each, and by Rattans and Rice with smaller advances. A falling off in Pepper by £40,000 is followed by smaller declines in Rubbers, Nutmegs, Preserved Fruits, and Isinglass.

From the Continent of Europe imports increased by 23%, or £320,000, of which Germany contributed £170,000, Holland £53,000, France £30,000, Belgium £22,000, and Austria £20,000. From Germany, Apparel, Hosiery, and Smallwares, &c., account for over a third of the increase, but advances are also seen in the values of Hardware, Nails, Glassware, and Malt Liquors received. The only article of note having a decline was Dynamite.

Dutch supplies shew enhanced values in Cotton Piece Goods and Sarongs, Hardware, Railway and Tramway Materials. Gin alone exhibits a decline.

From France, Umbrellas, Brandy, and Silk Piece Goods give important advances.

Imports from Belgium were well distributed; but Earthenware shewed a decline.

Sugar from Austria accounted for three-fourths of the increase in this country's supplies, the Indian protective tariff against bounty-fed beet causing exporters to look round for other openings, but our close proximity to cane-producing countries offers little scope for enterprise here.

Matches from Denmark, Apparel from Spain, and Apparel and Sarongs from Italy shew increased values, but Dyed Yarns and Cottons from Italy decreased, as well as Petroleum from Russia.

Exports to the Continent of Europe decreased by 9%, or over £250,000.

To France alone the falling off was nearly £400,000, followed by Holland with a decrease of £80,000, and Austria and Denmark with small declines.

Russia took a value of nearly £95,000 more, Italy of £50,000 more, and Spain, Belgium, and Germany each of about £30,000 more.

To France, Copra fell off by £300,000 value, Tin by £125,000, and Borneo Rubber by nearly £20,000, followed by Gambier with a smaller decline.

Gutta to France increased by £35,000, White Pepper and Coffee by about £25,000 each, and Rattans by £9,000.

To Holland, Tin alone decreased by £60,000, and to Austria exports of Tin also fell, but Coffee and White Pepper slightly increased in value.

Rattans to Germany increased by £50,000, followed by Pepper and Copra, but there was an enormous decline in Gutta, followed by falls in Gambier and Tin.

Tin and Gambier increased to Belgium, and Copra declined.

Tin to Italy increased by £40,000, and Copra by about £10,000.

Enhanced values of Black Pepper, Copra, and Tin accounted for the increase to Russia.

To Spain, Copra and Black Pepper explain the cause of increase.

The practice of granting optional bills of lading, "London, Antwerp, Amsterdam, Swansea, New York," is extremely common, and in such cases the first port named is taken as the destination.

The imports from the United States increased by 32%, or £43,000.

Coal from America figures in the trade returns for the first time, and, combined with advances in the values of Lard, Lubricating Oil, and Metals generally, more than accounts for the increase. Petroleum imports fell off.

Exports decreased by 10%, or £295,000,

STRAITS SETTLEMENTS, 1900.

The decline in Tin sent alone was £580,000, but Rattans increased by £120,000, Coffee by over £50,000, Gambier by nearly £40,000, Black Pepper by £30,000, and Tapioca Pearl, and Preserved Fruits each by £20,000.

From Netherlands India, imports increased by over 16%, or by £730,000.

Petroleum, Guttas, Sugar, Rattans, Pepper, Coffee, Tobacco, Tin Ore, Oils, Gambier, and produce generally yielded advances, but a heavy decline is seen in Copra received.

Exports increased by nearly 16%, or £604,000.

To Java alone an increase of £345,000 is noted, chiefly seen in Rice, Fish, and Gambier, and to a less extent in Petroleum, Matches, Sarongs, Oil Cakes, Yarn, &c.

To Sumatra, Cotton Piece Goods and Sarongs, with Rice, shew the most important increases. Opium alone had a decline. To Dutch Borneo, Cotton Piece Goods shewed an increase of £30,000, followed by Coco-nut Oil, Tramway Materials, Provisions, Biscuits, Petroleum, &c., with small increases.

To this country the value sent of Rice, Sarongs, and Hardware declined.

To other parts of the Dutch Indies, Opium, Cotton Piece Goods, Provisions, Rice, and Gambier, &c., shew advances.

British India and Burma sent to the Colony goods of an increased value of 21%, or £750,000. From Bombay, Grey Yarn and Piece Goods shew the increased imports.

Opium alone from Calcutta increased by over £300,000, and Gunnies by over £125,000.

Sarongs and Cottons from Madras increased by £145,000, and from Burma, Rice alone accounted for £140,000, followed by Tin and Bran with enhanced values, but declines are apparent in Raw Cotton, Petroleum, India Rubber, and Precious Stones received.

Exports increased by about 15%, or about £170,000.

To Bombay, Tin and Coffee rose, but the value of Rice and Areca-nuts sent decreased.

To Calcutta, Sugar, Gambier, Tin and Areca-nuts mark the chief advances.

To Burma, Sarongs, Teel Seeds, Raw Silk, Matches, Preserves, Provisions, Piece Goods, and Sugar shew increases, but a heavy decline in Salt Fish sent is recorded.

Imports from the East Malay Peninsula increased by £27,000, seen in greater values of Tin, Gutta, Cattle, Fish, and Padi received, but Tin Ore fell off in quantity.

The Imports from the Western States increased by £675,000, or 13%, of which Tin Ore alone yielded an enhanced value of £450,000, Tin £75,000, Black Pepper £70,000, Gambier £50,000, and Coffee £40,000.

White Pepper, Areca-nuts, and Rattans were the only declines worth noting.

Exports to the East Malay Peninsula decreased by £2,000, chiefly seen in Piece Goods, Opium, and Yarn sent, Rice alone shewing an increase.

To the West Malay Peninsula exports increased by over £390,000, or 19½%.

Rice sent out increased by £120,000, Opium by over £75,000, Provisions by £35,000, followed by Lard, Machinery, and Tobacco, with about £15,000 each.

The only decline of note was in the value of Kachang Oil sent.

Trade with Siam and the Siamese States increased in imports by about £28,000, and exports by above £88,000.

Imports of Rice rose by nearly £70,000, Cattle by £15,000, and Black Pepper by about £10,000, but Tin alone fell off by over £50,000 value and Fish by nearly £30,000.

Benares Opium sent increased by £56,000, and Petroleum, Areca-nuts, Sugar, and Sarongs by £15,000 each, but Cotton Piece Goods declined by nearly £25,000, Yarn by £10,000, Gunnies and Corrugated Iron by £6,000 each.

Imports from French Indo-China increased by 19½%, or £115,000, chiefly seen in enhanced value of Rice, Fish, Swine, and Raw Silk received, but Hides fell off in value.

Exports rose by £66,000, of which the value of Gunnies sent accounted for £57,000.

The Hongkong and China Trade increased in imports by 11%, and decreased in exports by 2%. Greater values of Medicines, Silk Piece Goods, Beans and Peas, and Opium, followed by Precious Stones, Fish, Cotton Piece Goods, Provisions, and Raw Silk account for the increased imports. Apparel, however, shewed a decline.

Rice, Timber, Precious Stones, Sugar Candy, Areca-nuts, Raw Cotton, Padi, and many other articles sent shew declines.

Tin, Opium, Sugar, Rattans, Beche-de-mer, and Planks record increases.

Japan Coal had an advance of £200,000 in value received out of a total increase in imports of £207,000, and of the increase of £100,000 in exports Petroleum alone accounted for £72,000, followed by Tin and Cardiff Coal.

From Australia a small decline is seen in imports, for which Coal and Sandalwood are responsible. Tin Ore and Wheat Flour received increased in value.

Exports to Australia increased by £15,000, chiefly seen in greater values of Rice, Tapioca, Pepper, and Preserved Fruits sent.

GENERAL OBSERVATIONS ON TRADE.

The tonnage of German shipping in these waters has enormously increased of late, and the Germans have principally benefited from the action of the Shipping Conference, which, by arbitrarily raising freights, has tended to drive trade to other neighbouring ports. Produce, for instance, is now shipped direct from Macassar which formerly found its way to Singapore. Of late years trade with the Philippines has declined, copra, coffee, and other produce being now shipped direct to Europe or America. There is still a considerable import of hides. It is impossible to say at present what effect the transfer of these islands from Spanish to American rule will have on the trade of this Colony.

From a Bangkok paper it appears that whereas formerly 80% of the shipping that entered that port was British, now Germany has the lead. Of the 440 steamers that entered the port in 1900, 44% were under the German flag, and 38% under the British. Of the total value of cargoes from foreign countries, 58% came by German vessels and 34% by British. Of the outward cargoes to foreign countries, 54% went in German, and 34% in British bottoms.

It is of the utmost importance that, in view of the increasing competition for the carrying trade in these waters, the Government should endeavour to increase the facilities of its ports and take every means in its power to foster trade. The Tanjong Pagar Dock Company has, by a large expenditure of capital, provided wharves and docks which have, until recent years, proved sufficient for the requirements of the Port; but it has become a matter for serious consideration whether the time has not come for the formation of a Harbour Trust.

The Tanjong Pagar Dock Company has secured a virtual monopoly of the Wharves and Docks at Singapore, and there is a danger lest the imposition of increased tariff charges for the immediate benefit of shareholders may tend to direct shipping to foreign Ports.

When the Steamer Pier at Penang is completed it is intended that a Harbour Board shall be vested with the management of the wharves and goods landing sheds.

Of late years considerable attention has been paid in England to the important question of supplying information for British Merchants at home as to the state of the Markets and the openings for commercial enterprise in the Colonies and elsewhere.

The Commercial Intelligence Branch of the Board of Trade, which was opened in 1899, should be of great assistance in this matter.

The aims of this Office have recently been brought under the notice of the Chambers of Commerce in this Colony, and

it is to be hoped that these bodies will co-operate in carrying out these objects in the interests of British Trade.

It must be borne in mind, however, that these Chambers are in no sense British Chambers—foreign firms being largely represented—and also that the Straits Merchants are for the most part middlemen acting as Agents for Foreign as well as British Houses.

It can hardly be expected that foreigners will be disposed to assist in ousting their own manufactures from the Market.

It therefore is incumbent on the Government to use every means in its power to collect and place at the disposal of the Commercial Intelligence Branch of the Board of Trade the fullest and latest information as to the conditions of the local Markets, the openings for new ventures, and the different classes of goods for which there is a demand.

With this object it is contemplated to charge a Government Officer, who is in a position to obtain trustworthy information in commercial matters, with the duty of receiving and answering enquiries addressed to him officially by the Commercial Intelligence Branch, or unofficially by Merchants and others who may seek advice direct.

MINES, MANUFACTURES, AND FISHERIES.

There are practically no mines worked in the Colony, though deposits of tin exist in the Dindings territory and in Malacca. The rich deposits of the rapidly developing Federated Malay States attract all the most experienced miners.

The Colony has few manufactures, the prosperity of Singapore and Penang being due to their positions as collecting and distributing centres for the produce of the surrounding countries. Singapore, however, has at Pulau Brani the largest tin smelting works in the world.

Tin smelting works are also being erected at Butterworth in Province Wellesley.

Large establishments for the tinning of pineapples exist in Singapore, where this industry first originated, and which is still the chief source of supply to the European and Australian markets.

A large Chinese Biscuit factory has been started, which turned out during the year 10,800 pikuls of Biscuits, and a total of 344,000 tins. An average of 70 workmen are employed.

The fisheries of the Colony are very rich and give occupation to a large number of people. Most of the fish caught near Singapore and Penang is consumed fresh. That caught at the Dindings is salted for consumption in Penang and Perak. In both Penang and Malacca large quantities of a species of shrimp are manufactured into "belachan," a favourite native condiment for eating with curry.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

Coco-nuts are very widely grown throughout the Colony, the largest plantations existing in Penang and Province Wellesley.

Singapore is not an agricultural Settlement, but Coco-nuts are grown round the Coast, and Pineapples for the tinning manufactories cover most of the hills within easy reach of the town. Indigo is grown for local use in dyeing the cloth used by the Chinese.

In Penang and Province Wellesley, after Coco-nuts and Padi the chief products are Sugar, from European and Chinese Estates, the former being the largest and most important, with the most modern machinery, Tapioca from one large European owned estate, and Spices cultivated by Chinese on the hills.

Large fruit plantations also exist which supply the towns in the Settlement and Perak.

Rubber cultivation is steadily increasing.

In pursuance of the recently instituted policy of encouraging Agriculture among the native population of the Colony by the holding, with the assistance of Government, of an Agricultural Show in some one of the Settlements annually, a Show similar to that held in Province Wellesley in 1899, was opened at Alor Gajah, in Malacca, in July. It was well attended and was equally successful.

In Malacca are large and profitable Tapioca estates, owned exclusively by Chinese. The method of cultivation is wasteful. Forest land is cleared and planted with three or four crops (the plant takes from 18 to 24 months to mature) and then abandoned. Much land, however, is fit for cultivation again after lying fallow from 15 to 20 years, and it has as yet been found impossible to cultivate Tapioca profitably in this Settlement in any other manner.

Coco-nuts are largely grown along the littoral, and the Malay population plant padi sufficient for their own consumption. Some rice has always to be imported for the Chinese in the town and on the large estates.

Malacca is famed for its fruit, and is one of the chief sources of fruit supply to Singapore.

The low price of Gambier during recent years has caused this cultivation to be much neglected.

The tea estate at Durian Tunggal produces Tea of good quality. The area under cultivation has been extended and new Machinery erected.

Rubber is attracting the attention of Chinese estate owners, and is being largely planted on the Bukit Asahan Estate, owned by a Chinese Syndicate, and at Durian Tunggal. Both Para rubber (*Hevea Brasiliensis*) and India rubber (*Ficus Elastica*) thrive in the Settlement, and the cultivation is only limited by the difficulty in obtaining seed and cuttings. The Government plantations of both these trees should in a few years be capable of supplying all demands.

During the year plantations of Gutta Percha producing trees were started in Singapore and Malacca. The supply of young plants and seeds is limited, and it is difficult to obtain any large number at a time. Five hundred young "Getah Taban" (*Dichopsis Gutta*) trees were, however, obtained from Penang and planted in Malacca. Most of these are doing well. About six hundred "Getah" trees (*Dichopsis Gutta* and *Dichopsis oblongifolia*) of various ages were also discovered growing in different parts of Malacca and were cleared of under-growth and marked.

The Botanical Gardens of Singapore and Penang continue to supply planters with seeds and plants.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 14,469,405, as compared with 13,187,010 in 1899. The Light dues amounted to $158,572.

Four hundred and twelve new vessels, aggregating 9,487 tons, were built in Singapore during the year.

LEGISLATION.

Twenty-three Ordinances were passed by the Legislative Council of the Colony during the year under review. Thirteen of these contain amendments of previous enactments.

The most important of the new Ordinances was the Criminal Procedure Code, an enactment somewhat modified from that of 1892, which was passed but never brought into force.

The new Code will radically alter the practice of the Police Courts, and also contains certain provisions affecting Juries and the Conduct of Inquests, and is also designed to amend and improve the initiation of criminal prosecutions by the Police. It will entail a largely increased expenditure by Government, which it is hoped may be justified by the improvements in criminal procedure generally.

Another Ordinance provided for the better administration of Christmas Island, a new dependency of Singapore, lying some 500 miles south of Java. The Island is leased to a Company, who have established a highly remunerative industry by working the rich beds of Phosphates which it contains, and upon which the Government of the Colony receives a royalty. A District Officer has now (1901) been permanently stationed on the Island to conduct its administration.

Other important Ordinances passed were Ordinance VIII., of 1900, for making and maintaining a Railway between Singapore and Johore, and Ordinance IX., of 1900, to further amend the Opium Ordinance.

EDUCATION.

The principal schools of the Colony are either entirely maintained by Government or are in receipt of a substantial Grant-in-Aid. There are 30 schools in which the English language is alone taught, 9 schools in which Tamil is taught as well as English, 2 schools in which Chinese only is taught, and 169 schools in which Malay is the only medium of instruction.

The expenditure on Government English schools was $22,181, and on Aided schools (English, Anglo-Tamil, and Chinese) $54,210.

The Malay schools, all of which are entirely supported by Government, cost $58,739.

The new Educational Code introduced in the previous year has worked well and given general satisfaction. English education is showing a marked advance, both in the number of pupils taught and the quality of the instruction given. The variety of languages spoken by the pupils at most of the English Schools constitutes, however, a very serious obstacle to the work of the teachers at these schools.

Two valuable Scholarships, known as the Queen's Scholarships, of the value of £250 a year for four years, are annually awarded after competitive examination to enable the most

eligible candidates from the schools of the Colony to continue their studies at a British University. Higher education is also fostered by the grant of local Government Scholarships and of a bonus for passes in the Cambridge Senior Locals.

A Malay College for the training of teachers for vernacular schools was opened in Malacca at the beginning of the year. The course is a two year one, and it is as yet too early to estimate the likelihood of the college proving successful. Admission to it has, however, been eagerly sought. Unfortunately, towards the end of the year an outbreak of beri-beri among the students caused the college to be prematurely closed for the annual long vacation.

The Industrial Scholarships which are given for the encouragement of technical instruction, chiefly in engineering, have not yet secured the popularity among the Eurasian community to which they are entitled. But, though not so eagerly sought for as they should be, there appear to be signs that they will shortly attract more and better competitors.

GOVERNMENT INSTITUTIONS.

HOSPITALS.

Except the Chinese hospital at Singapore, all the general hospitals in the Colony are under Government management. The hospitals on the Sugar Estates in Province Wellesley, maintained by the planters, are frequently visited by Government Officers. In 1900, the principal causes for admission were malaria, beri-beri, and venereal disease.

The hospitals, exclusive of the lunatic asylum, received throughout the year 24,983 patients. The Government maintains a lunatic asylum at Singapore and another on Pulau Jerejak, an island adjoining Penang.

Cases of beri-beri occurred in the Singapore asylum throughout the year, as did also a short outbreak of cholera.

REFORMATORY.

A Reformatory was built during the year, but not opened till after its close. Technical instruction in carpentry, shoe-making, and other trades will be given to the boys, as well as instruction in reading, writing, and arithmetic.

SAVINGS BANK.

There was a slight increase in Savings Bank transactions, as compared with the preceding year, and the amount standing to the credit of depositors at the close of the year was $434,590, an increase of $3,327, as compared with 1899. The deposits amounted to $312,098, and withdrawals to $320,950.

The total investments at the end of the year amounted to $440,707, the particulars of which are as follows:—

Indian 3½% rupee paper, $273,391.

Singapore Municipal Debenture Stock, $48,000, bearing interest @ 5%, and $72,300 @ 4% = $120,300.

Fixed Deposits at Chartered Bank, bearing interest @ 4%, $23,500.

Cape Stock, bearing interest @ 3%, $8,516.

Queensland Stock, bearing interest @ 3%, $10,000.

South Australian Stock, bearing interest @ 3%, $5,000.

POLICE.

The following increases, which were authorised in 1899, were provided for:—

European Sergeants	5
European Constables	4

Fourteen European Constables were enrolled, of whom ten came from England.

One Inspector died, three were pensioned, and two were reduced: one of the latter was subsquently re-promoted for good work done.

Four Sergeants were promoted to Inspectorships.

Eleven Constables were promoted to Sergeants.

One Constable died and three were dismissed.

It is anticipated that there will be no difficulty in bringing the European Contingent up to strength during the coming year.

The Sikh Contingent has been kept fairly up to strength: but continued severe fever at the Dindings is beginning to act adversely on recruiting for this contingent.

Recruiting for the Malay Contingent has been exceptionally bad, more especially in Singapore, where at the end of the year this contingent was 90 men, or 13%, under strength.

The detective force has worked well.

There were eighteen cases of murder and sixteen cases of gang-robbery.

Gambling, especially in the form of lotteries, has been satisfactorily dealt with in Singapore and Penang.

VITAL STATISTICS.

The Population of the Colony, which was 512,342 by the Census of 1891, is now estimated to be 617,595. During the year 1900 there were registered 14,814 births, of which 7,700 were of male and 7,114 of female children.

The number of deaths registered was 23,385, as compared with 19,150 in 1899.

The public health of the Colony during 1900 was not good, the death-rate being very considerably higher than that for 1899, as is shewn by a comparison of the figures for the two years, 36·25 as against 31·66.

Zymotic disease was prevalent in all three Settlements, and there was a sharp outbreak of cholera in Singapore during the last two months of the year, during which 243 cases, of which 216 proved fatal, were reported. 22 cases occurred in Penang. Cases of small-pox continued to be reported from all three Settlements. The numbers being:—

Settlement.	Cases.	Deaths.
Singapore	220	91
Penang and Province Wellesley ...	297	77
Malacca	89	16

Two fatal cases of plague occurred in Penang in October. Precautionary measures were at once taken by the authorities, and no further cases were discovered.

The arrangements described four years ago for the registration of deaths have been continued with satisfactory results.

In Singapore and Penang the general arrangements for sanitation and conservancy are carried out by the Municipalities. Both places have a good water supply, but there is a certain amount of overcrowding in the towns, and the measures for the disposal of night-soil and sewage are inadequate.

The town of Malacca and the villages of Balik Pulau, in Penang Island, Bukit Mertajam, Butterworth, Prai (and the adjacent Sugar Estate), and Nibong Tebal, in Province Wellesley, enjoy water supplies from Reservoirs erected and maintained at Government expense.

CLIMATE.

The mean rainfall was, in inches, 90·98 in Singapore; 108·94 in Penang; 71·94 in the Dindings; 101·15 in Province Wellesley; and 65·69 in Malacca. The greatest fall in 24 hours was 5·71 inches at Singapore, on the 19th August.

POSTAL, TELEGRAPH, AND TELEPHONE SERVICE.

A heavy increase is to be recorded as well in the number of articles as in the weight of the mails which passed through the hands of the Postal Department during the year 1900, as compared with 1899. Insurance and Parcel Post branches, as also the Chinese Sub-Post Office, continue to show steady progress. The Postal Revenue amounted to $233,478, as compared with $224,392 for 1899. The expenditure charged to 1900 was $209,695, a decrease of $2,263 from the expenditure of the previous year.

The money order business continues to increase. The transactions in sterling amounted to £16,669, in Indian currency to Rs. 1,795,744, and in local currency to $336,000, the total business done thus aggregating $1,729,791, and shewing a substantial advance upon the total of $1,374,520 for the year 1899.

The telegraphs in Penang and Province Wellesley, and also the inland telegraphs in Malacca, all of which are connected with the Government system in the Federated Malay States, are the property of the Government. The cables connecting the three Settlements which comprise the Colony belong to the Eastern Extension Telegraph Company. The length of lines belonging to the Government is as follows:—

Penang	85 miles.
Malacca	39¼ „

The Government telephone lines in Singapore are maintained and worked by a Company; in Penang, Province Wellesley, and Malacca they are worked by the Government. Three hundred and eighteen miles of wire are open, which are the property of the Government.

MILITARY.

The garrison of Singapore consists of His Majesty's regular forces and Asiatic Artillery. No Militia force exists.

A valuable Volunteer Artillery force, 111 strong, exists in Singapore. Only Europeans are enlisted in it.

Its principal armament consists of a complete Battery of six 2·5-inch R.M.L. screw guns, utilised with 7-pr. limbers as a field battery, with pony draught, an experiment which has proved successful. It also possesses some Maxim guns (·45), in the use of which it is proficient. A Volunteer Rifle Corps, 173 strong, also exists, composed of Europeans. Its armament consists of Lee-Enfield rifles and sword bayonets.

A Volunteer Infantry Corps, 150 strong, also exists in Penang. Its armament consists of Martini-Enfield rifles with sword bayonets.

The Constabulary force numbers nearly 2,000 men, of whom more than 300 are Sikhs. They are well drilled and armed.

PUBLIC WORKS.

Progress has been made on the construction of the Singapore-Johore Railway. The execution of this work has been much hampered by delay in the supply of Rolling Stock and Permanent Way, and by local difficulties as regards labour.

In Singapore, the following buildings were completed during the year:—

Sub-Post Office, Tanglin.

Quarters for Senior Dresser, General Hospital.

Quarters for Chief Police Officer.

Detective Station, with Quarters for Staff.

Reformatory.

Extension of Drill Shed.

New Native Hospital Ward, Quarantine Station.

Two Quarters for Assistant Superintendents of Police.

Two cells for violent Native patients, General Hospital.

Temporary Supreme Courts.

Progress was also made on the following Works and Buildings:—

Quarters for Boarding Officers.

Telok Ayer Reclamation.

Dredging entrance to Singapore River.

Addition of an upper storey to Women's Block, General Hospital.

New Civil Prison.

Disinfector Building.

Ward for Female Lunatics at Pasir Panjang.

Reconstruction of Balestier Range.

Enlargement of Patent Slip.

Alterations and additions to Supreme Court.

Experimental Ward at Tan Tock Seng's Hospital.

A new ladder Dredger for the Singapore River was constructed, and has worked very satisfactorily.

A steam launch has been purchased, and the construction of six Hopper Barges commenced. The Departmental Plant received a much needed addition in the shape of a four-ton Traction Engine and two three-ton trucks.

All works, buildings, and roads in charge of the Public Works Department were maintained on the usual votes, assisted in a few instances by special provision.

Owing to the large number of private buildings under erection, and to the absorption of any available labour by the Singapore-Johore Railway, considerable difficulty was experienced in procuring an adequate supply of materials and labour.

In Penang, progress was made with new quarters for the Superintendent of Police and for the Assistant Postmaster-General.

The block of buildings to accommodate the Marine Department Boarding Officers and Lascars and the Marine Police which was commenced in 1899 was completed and occupied.

A large iron shed and two smaller ones, for storage of transshipment cargo, were built along the sea front to the north of the iron pier in course of erection. The existing Jetty Sheds were extended.

The Public Telephone Exchange was commenced and will be opened in March, 1901.

The conversion of the Government English Branch School, Chaurasta, into a Detective Police Station, and the erection of Quarters for the Chief Detective Inspector, Detective Inspector, and a European Detective Sergeant were carried out.

The Nibong Tebal Pontoon Bridge was repaired, and six new pontoons provided.

In Malacca, a new ward, substantially built on brick piles, and roofed with tiles, was erected at Durian Daun Hosptial, the Servants' Quarters being pulled down and re-erected outside the compound to make room for it.

The renewal of the timber superstructure of the pier was completed.

The channel at the mouth of the Malacca river was slightly enlarged both in depth and width.

New Quarters for an Assistant Forest Ranger were constructed at Jasin, and the Overseer's Quarters removed from Kesang to Jasin.

Additional accommodation was provided for the Portuguese Mission Boys' School, and a new Vernacular School was constructed at Paya Rumput.

Two new cooly lines were constructed to replace old decayed lines.

Two cuttings were made across acute bends in the Kesang River, with a view to increase the discharge during floods.

The telephone was extended from Batang Tiga Police Station to Sungei Udang Police Station.

The Malacca-Johol Frontier Boundary was surveyed by contract.

The principal road works have been the construction of a second class road near the Town and the making up of about three miles of road near Bukit Asahan.

Several gradients on the main road from Malacca to Tampin have been eased either by cutting or filling or by small deviations.

A footpath was completed from Sungei Rambei to Tasek.

The roads were well maintained. Upwards of 30 miles were entirely regravelled.

Several bridges and culverts previously constructed of wood were rebuilt in masonry and iron.

The bridge over the Duyong River was completed.

IMMIGRATION.

During the year immigration from Hongkong was prohibited from June till August, and from Hoihow from March till July. Amoy and Swatau were both declared infected, but immigration was not prohibited. Notwithstanding these restrictions, the number of Chinese Immigrants (200,947, including 20,470 women and children) was the largest recorded since the foundation of the Colony. The figures for the last three years are:—

Year.	Male.	Female.	Total.
1898	124,412*	9,146	133,558
1899	141,980†	7,717	149,697
1900	188,965‡	11,982	200,947

The disproportion between the sexes still increases.

The supply of labour remained far below the demand.

The number of Immigrants from Southern India largely increased, as will be seen from these figures:—

Immigrants.	1899.	1900.
1. Statute Immigrants	4,677	7,615
2. Free Coolies (with aided tickets)	2,217	7,052
3. Other Immigrants	12,625	23,862

In addition to these there were 3,178 minors.

During the year 10,995 left for Southern India, so that the Tamil population of the Colony and Federated Malay States has largely increased.

The physique of the coolies generally was very bad and rendered them very liable to disease after arrival. In consequence the death-rate on the Estates was abnormally high.

Since the appointment of a new Superintendent of Emigration at Negapatam, there has been a decided improvement in the class of men sent over.

* Of these 6,252 were children. † Of these 6,650 were children.
‡ Of these 8,488 were children.

Towards the end of the year negotiations were entered into with the British India Steam Navigation Company for a weekly service of steamers between Negapatam and the Straits. An agreement was made providing for a fortnightly mail service homewards and outwards *viâ* Negapatam and Bombay, and for the transport on favourable terms of immigrants under contracts to labour in the Colony and Federated Malay States. This agreement has worked most satisfactorily.

GENERAL OBSERVATIONS.

Sir Alexander Swettenham, K.C.M.G., continued to administer the Government throughout the year, no appointment to the Governorship, rendered vacant by the death of Sir Charles Mitchell, in December, 1899, being made.

The European Regiment was withdrawn in May on account of the South African War, and was replaced by a Madras Native Infantry Regiment.

A European Volunteer Rifle Corps was formed in Singapore.

The Singapore-Kranji Railway was commenced. This undertaking is being carried out by a special Railway Engineer working under instructions received from the Consulting Engineers at home.

It was decided to import Tamil labour for the work, and a certain number of Statute Immigrants were engaged. There was a large amount of sickness among them as also among the Chinese employed, especially where earth had to be excavated.

The latest Estimates prepared by the Consulting Engineers are largely in excess of those prepared in the Colony. The amount to be paid as compensation for lands and houses was found to be much under-estimated.

The Excise Farms were let in July for three years at an increase of a million-and-a-half dollars a year. The largely increased revenue anticipated enabled the Government to bring forward various schemes for Harbour Improvement and other important Public Works. Steps were taken to carry out the recommendations of a Commission which was appointed to enquire into the congested state of traffic in the Singapore River.

The construction of a Canal through to Keppel Harbour is contemplated.

Schemes for Harbour Improvement at Penang also received attention, increased accommodation being provided by Government for goods landed.

The question of extending the iron steamer pier which is being constructed has been left over for the Report of an Expert Harbour Engineer, who is expected to visit the Colony towards the end of this year.

An additional section of the Prai-Parit Buntar Railway in Province Wellesley was opened during the year from Bukit Mertajam to the Perak boundary. The traffic receipts have proved satisfactory, and when the bridge over the Krian River has been finished, and a short length of line in Perak territory constructed, Penang will be connected with the main system of the Federated Malay States. Excellent ferry steamers run between George Town, Penang, and Prai.

It is probable that Malacca will soon be connected with the line which is projected through Johore and Negri Sembilan.

A survey of the line through Malacca territory, the construction of which presents practically no difficulties, has been already made.

GENERAL CONDITION OF THE COLONY.

Speaking generally, it may be said that there are many signs of the increasing prosperity of the Colony as a whole, intimately connected as it is with the welfare of the Federated Malay States. The towns of Singapore and George Town, Penang, continue to extend. Immigration from China and India shows a satisfactory increase. The value of town property has enormously increased. The letting of the Excise Farms for the next triennial period at such a greatly enhanced rate, notwithstanding the high price of opium, may be taken as an index of the prosperity of the place.

Concurrently with the general increase in trade and business the cost of living has advanced enormously. House rent, both in Singapore and Penang, has risen greatly, while the price of labour and building materials deters many from investing their capital in building operations.

The increased output and high price of tin in the Federated Malay States, the bulk of which finds its way to the Smelting Works in the Colony, have largely contributed to the wealth of the population, especially the Chinese, many of whom have made fortunes out of tin and invest a large proportion of their gains in the Colony.

The town of Singapore must be considered very backward as compared with other cities of similar size in the East. The streets are badly lighted by gas—incandescent gas being only employed in certain thoroughfares. The Municipality has now purchased the Gas Works, and it is intended to improve the system and to introduce electric light as a subsidiary scheme.

The Singapore-Kranji Railway is a Government undertaking which as yet meets with little favour from the representatives of the mercantile community.

Tramways do not exist, although it cannot be doubted that a well organized system of electric tramways would be a boon to the place.

It was decided in November that the Government should purchase the Penang Steam Tramways, which were in liquidation.

It is proposed to substitute as a Municipal undertaking electricity for oil lamps by which the streets in George Town are at present lighted, and if an electric installation is decided on it may be found desirable to work the Tramways by electric power. The Tramway service would be worked in connection with the Hill Railway Scheme.

C. W. S. KYNNERSLEY,

Acting Colonial Secretary,

Straits Settlements.

Singapore,

STRAITS SETTLEMENTS.

(For Report for 1900, *see* No. 330.)

GOVERNOR SIR F. A. SWETTENHAM to MR. CHAMBERLAIN.

Government House, Singapore,
10th July, 1902.

SIR,

I HAVE the honour to forward copies of the Report on the Straits Settlements for the year 1901.

I have, &c.,
F. A. SWETTENHAM.

---

e12411—875—8/1902 Wt 28616 D & S—5 A 2

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1901.

FINANCIAL.

The Revenue for 1901 amounted to $7,041,595, the three Settlements contributing as follows:—

Singapore	$4,327,462
Penang	2,221,919
Malacca	492,214

There was an increase of $1,655,038, as compared with the Revenue for 1900, and of $1,841,569 as compared with that for 1899.

The principal increases were under Licences, $1,491,853; Land Sales, $90,311; Stamps, $30,980; Port and Harbour Dues, $20,926; Miscellaneous Receipts, $18,449; Postage $12,845; Land Revenue, $11,477; Fines, Forfeitures and Fees of Court, $11,049.

The principal decrease was under Special Receipts ($59,524), which in 1900 included the refund of the Government share of contribution towards the Permanent Jubilee Memorial.

The Expenditure for the year was $7,322,236, as compared with $6,030,740 in 1900 and $5,060,523 in 1899.

As compared with 1900, the Expenditure shows an increase of $1,291,486.

The principal increases were:—

Military expenditure	$326,457
Personal emoluments	292,468
Land and houses purchased ...	264,807
Works and buildings, special services.	193,324
Other charges	78,327
Special expenses	65,832
Miscellaneous services	31,056
Works and buildings, annually recurrent.	24,652
Pensions, &c.	14,404
Roads, streets, &c., annually recurrent.	10,313

The increase under Military Expenditure is due to the increased Revenue receipts, on which 20 per cent. is payable. The increase under Personal Emoluments is due to the grant of

double exchange compensation and to the bonus granted to the subordinate and clerical branches of the Service. Of the item Land and Houses purchased,—Goodwood Estate and Nassim Hill Estate were acquired by the Government during the year. There was a larger amount expended on the Singapore-Johore Railway during this year than in the previous one, which item is included under the head of "Works and Buildings, Special Services," which is the main cause of the increase. The increase under "Other charges" is inevitable, owing to the expansion of the Colony where departments are extending and the price of stores and labour goes on increasing. The expenditure in connection with the visit of Their Royal Highnesses the Duke and Duchess of Cornwall and York, $45,000, and the purchase of the Penang Tramways, $40,000, were charged to the head "Special Expenses" in 1901. On the other hand, the contribution towards the Indian Famine Fund, $20,000, was included under the same head in 1900. The increase under "Miscellaneous Services" is due to the Expenses in taking the Census. The increases in "Public Works Department, Annually Recurrent," in "Works and Buildings" and "Roads, Streets, and Bridges" are owing to more buildings and roads having to be looked after. The increase under "Pensions" is partly due to a larger amount charged to "Difference in Exchange on Pensions payable in England," owing to the fall in exchange and partly due to new pensions granted.

Of the decreases, the most important is under "Interest," viz., $14,834, due to the writing off of a certain sum for difference in exchange on balances in England in 1900.

The balance to the credit of the Colony on 31st December, 1901, was $1,806,968, as compared with $2,059,378 on the same date in 1900.

The Colony has no public debt.

Exchange.

Exchange was very unsteady during the year. The average value of the dollar was 1/11$\frac{3}{8}$ on demand and 1/11$\frac{11}{16}$ at four months' sight, as compared with 2/0$\frac{3}{8}$ and 2/0$\frac{9}{16}$ in 1900. The highest rate for demand drafts was 2/1$\frac{5}{8}$ in October, and the lowest 1/9$\frac{7}{8}$ in January.

Currency.

The currency of the Colony consists of Mexican and British dollars circulating at equal value and of Government currency notes.

British dollars to the value of $17,281,263 were imported by the local banks alone, as compared with $21,571,488 in 1900. Other dollars to the value of $2,087,260 were imported by the banks.

The annual importation of British dollars by the banks since their first coinage in 1895 has been:—

Year.	Amount.
	$
1895	2,201,890
1896	3,623,000
1897	25,704,908
1898	19,492,168
1899	29,349,725
1900	21,571,488
1901	17 281,263

The average bank note circulation of the Colony for the year was $5,473,755, as compared with $6,713,133 in 1900. The falling off is due principally to the reduction by the Hongkong and Shanghai Banking Corporation of the amount of its local issue.

The amount of Government currency notes in circulation on the tenth of each month (when statistics are published) was:—

Month.	Amount.
	$
January	6,205,000
February	6,946,000
March	7,046,000
April	7,046,000
May	7,046,000
June	7,220,000
July	7,535,000
August...	8,114,000
September	8,484,000
October	8,703,000
November	8,753,000
December	8,753,000

Municipal Revenue and Expenditure.

The Revenue of the three municipalities amounted to $2,067,611, and their expenditure, including sums expended on loan works, to $2,161,131.

TRADE.

The condition of trade for the period under review appears to have been fairly prosperous though the large percentage of increase of the immediately preceding years was not maintained.

The total volume of trade—inter-Settlement trade excluded—is shown as under:—

—	1897.	1898.	1899.	1900.	1901.
	$	$	$	$	$
Merchandise	348,853,428	398,051,723	462,136,001	519,482,193	528,162,575
Treasure ...	62,515,245	62,366,718	60,853,178	57,225,012	48,772,939
Total ...	411,368,673	460,418,441	522,989,179	576,707,205	576,935,514

The increase in the value of merchandise as compared with the trade of 1900 is about 2 per cent.

Trade with countries having a gold currency decreased by something less than one per cent.; trade with silver currency countries increased some 6 per cent.

The Imports of merchandise in 1901 reached a total of 283 million dollars, while Exports accounted for some 245 million dollars. Converted into sterling at the average rate of exchange for the year these values are equivalent to about 27¾ million pounds and 24 million pounds, respectively.

These values, expressed in dollars, show an increase, as compared with the figures of 1900, of over one per cent. in Imports and over 2¼ per cent. in Exports. But the values, expressed in sterling, show a decrease of Imports of half a million pounds, and in Exports a decrease of nearly a quarter of a million pounds.

The percentages of increase for the four preceding years were, for Imports, 6¼, 13½, 15½, and 13½ respectively, and for Exports, 6½, 14½, 10¾ and 11, respectively.

Imports of manufactured goods fell off as regards metals and cotton goods, except yarns. Yarns show a large increase both of quantity and of value.

The average prices of Straits produce were, generally speaking, lower than in 1900, except for gutta percha, gambier, rattans and sticklac, the prices of which showed a distinct advance. This dullness of the market, combined with a decline in the quantity of the principal articles exported, necessarily tended to lower values.

Smaller quantities of gambier, rattans, copra, coffee, hides and gutta percha were exported, while tin, jelutong rubber and tapioca were sent out in increased quantities.

IMPORT.

The net increase, as compared with the year 1900, in the values of Imports, was some $3,250,000.

In the "Food and Drink" class there was an important increase (upwards of $6,500,000) in rice and padi; and increases of less magnitude in sugar, bran, tapioca, spirits, onions, fish, birds' nests and nutmegs.

In the "Raw Materials" class, the value of tin ore imported shows an increase of $2,750,000. Wood goods, too, give increased returns, while in the cases of petroleum and coal there is a decrease.

Under the head of "Manufactured Articles" the value of cotton piece goods imported reached the very large total of $14,800,000, a slight increase as compared with the preceding year, the value of sarongs imported reached $5,200,000, a decrease on the year of $500,000; but yarns increased by $800,000 to a total value of $2,600,000. Sewing threads, handkerchiefs and blankets are amongst the articles that show an increase, while in jute bags there is a falling off in value of nearly a million dollars.

The value of silk piece goods imported increased largely; the value of the imports of hosiery and millinery and drapery reached close on $4,500,000, a decrease, as compared with the values of 1900, of $200,000, the falling off being in imports from Germany.

From the United Kingdom piece goods to the value of $12,000,000 were received, equal to about 80 per cent. of the whole trade, and an increase on the imports of the previous year of some 6 per cent. The value of piece goods imported from the continent of Europe was upwards of $1,000,000, about 7 per cent. of the whole trade, and a decrease of half per cent. as compared with the trade of 1900.

Imports from Bombay and Madras decreased in value by nearly one half.

There was a falling off in the value of sarongs imported from the United Kingdom of 16 per cent., and from the continent of Europe of 15 per cent.

From the United Kingdom came nearly 27 per cent. of the imports of plain yarn and some 71 per cent. of the dyed yarn imported.

Of sewing thread, the United Kingdom sent us 83 per cent. of the total value imported.

Taken as a whole, the imports of piece goods were fairly maintained, but the year is considered not to have been a good one for importers; the steady fall in Manchester prices made importers anxious to clear stocks. Demand was not at any time good and was occasionally distinctly poor, nor were signs of

improvement visible at the close of the year. Tightness of money locally was an important factor in the case; and stocks were rather heavy, especially in grey goods.

In metals, imports did not attain to the dimensions of the preceding year, but stocks were low and an average business was done with a tendency to lower rates.

The total value of manufactured metals imported decreased by nearly a million dollars, the falling off being observable mainly in nails, corrugated iron, bar and rod iron, and in a less degree in steel and machinery. The apparent decrease would be considerably greater were it not for the value of imports of telegraph materials included under this head.

Excluding telegraph materials, the imports of metals from the United Kingdom show a decrease of nearly $900,000, or some 15 per cent., while supplies from Continental ports fell off by $324,000, equal to a decrease of 14 per cent.; imports from the United States also decreased by some 14 per cent.

An increase of $347,000 in the value of miscellaneous manufactures is due to increased values of fireworks, earthenware, mats, paper, carriages, and carriage materials, saddlery, beads, and rattanware. Some decrease under this head is apparent in the case of oil cakes, matches, fancy goods and toys, lamps and lampware, wood goods, clocks and watches, perfumery, glassware and cabinetware.

It is noticeable that in the case of candles imported from Europe less than a tenth appears to have been received from the United Kingdom; in crockeryware, out of a total value of $1,700,000, the United Kingdom contributed only $136,000; and in the case of glassware, the imports from the United Kingdom amounted to only $170,000 out of a total trade with European ports in this article of $800,000. In the matter of carriages imported a more satisfactory result is shown, the imports from the United Kingdom being 90 per cent. of the whole trade.

The value of imports of lamps and lampware was over $340,000, of which Germany sent goods to the value of $150,000, a decrease as compared with 1900 of 50 per cent.; the United Kingdom accounted for $85,000, and the United States of America $12,000, the figures being much the same as in the preceding year.

Paints and dyes to the value of $640,000 were imported, a falling off as compared with the imports of 1900 of $30,000. The imports from the United Kingdom amounted to upwards of one-half of the total, about the same as in the previous year.

The value of paper and paperware and stationery of European manufacture imported in 1901 is $870,000—imports from the United Kingdom accounting for nearly $400,000; Austria, $350,000; and Germany, $80,000. In 1900, the total receipts were $700,000; of which imports from the United Kingdom represented some $320,000, from Austria, $250,000, and from Germany, $90,000.

The imports of perfumery reached a value of $400,000; of which the United Kingdom contributed $135,000, the same as in 1900; Belgium, $79,000, an increase of $5,000; France, $62,000, as in 1900; and Germany, $56,000, a decrease of 50 per cent.

European Continental countries, more especially Germany, continue to be our main source of supply for musical instruments, though 1901 shows an increase in this respect from both the United Kingdom and the United States.

The United Kingdom continues to maintain its pre-eminence for the supply of cycles, 85 per cent. of the total imports coming from there. Machines of American and Continental makes show a falling off.

Export.

Exports show a net increase in value of nearly $5,500,000 as compared with the figures of 1900.

In the "Food and Drink" class the imports of rice increased in value to the extent of nearly $6,000,000. Increases of smaller amount appear in sugar and sugar candy, pepper, preserved pineapples, bêche-de-mer, tapioca, birds' nests, beans and peas, and opium.

Decreases took place in the value of exports of coffee, fish, live stock, sago, tea and areca-nuts.

Under the head of "Raw Materials," produce generally shows a small decrease in value, including the value of tin exported, the decrease in this latter being due to the low average price realised. The decreases are large in Borneo and india rubbers, raw hides, ground-nuts, petroleum, canes and gutta percha.

Increases are observable in the values of gutta jelutong (pontianak), and other inferior rubbers. Increases are also to be found in coconut oil, gum copal, planks, timber, sticklac and sandalwood, though in a less degree.

In manufactured goods there is an increase of a million dollars.

Textile manufactures show an increase of $1,350,000, chiefly in piece goods and yarn; metals show a trifling increase of value, spread generally over all the articles in the class, and miscellaneous manufactures show a decrease of $400,000.

Import and Export Quantities.

The total quantity of coal imported remained about the same as in 1900, 668,000 tons. Japan varieties increased by 32,000 tons; Cardiff coal fell off by 17,000 tons; Australian and Borneo coal show a reduction of about 6,000 tons each; and Indian coal retained its position in the list with some 77,000 tons.

The imports of petroleum attained large dimensions during the year, reaching close on 2½ million cases of 65 lbs. each, an increase of 28½ per cent. This increase was due mainly to the large quantity of Russian bulk oil introduced—930,000 cases, as compared with 277,000 cases in 1900. From the Dutch possessions there came nearly 1⅓ million cases; American shipments improved slightly; and shipments from Burma ceased.

The declared imports of liquid fuel amounted to 23,000 tons, much the same as in the preceding year.

Sixteen thousand five hundred and eighty-four chests of opium were imported in the course of the year; of this quantity, 14,395 chests were of Benares quality. The exports of opium amounted to 13,593 chests, in addition to 266,000 taels which went mostly to Australia. The average declared import price of the Benares quality was $909 a chest, slightly less than the price for 1900. Serious fluctuations, as usual, marked the trade in this article.

Not included in these figures are transhipments from Calcutta aggregating 505 chests, of which 400 chests went to Java.

Rice, the staple foodstuff of the Colony, was imported to the extent of half a million tons, an increase in quantity of 30 per cent.; over 83 per cent. of this was re-exported. Rangoon and Bangkok largely increased their output to these Settlements while the supply from French Indo-China fell off. The average export price was slightly under that of the preceding year, and complaints were frequent as to the quality of the Rangoon article supplied.

Cattle imported exceeded by 2,200 the imports of 1900, but the number of pigs brought in decreased from 68,000 to 55,000.

The imports of fish aggregated 815,000 pikuls, a decrease in quantity of 36,000 pikuls, but the average price was much higher.

The supplies of wheat flour fell from 23,000 to 21,000 tons. American flour imported *viâ* Hong Kong practically rules this market, but the quantity received from Australia reached the substantial figure of 2,000 tons, an increase of 75 per cent.

The total quantity of malt liquors imported shows a decrease of upwards of 5 per cent.; 118,000 gallons of whiskey, 4,000 gallons less than in 1900, were imported; and the imports of arrack and samsoo fell off by 27,000 gallons; but other spirits, more especially brandy and gin, show an increase.

The decrease in the importation of wine is chiefly in respect of champagne and port.

Cotton piece goods imported decreased by 300,000 pieces. Upwards of 5 million pieces in all were imported, of which 3⅓ million pieces were declared as plain cottons, upwards of 900,000 pieces as coloured, and upwards of 800,000 pieces as printed. The imports into Singapore absorbed 74 per cent. of the whole quantity, an increase of 2 per cent.

Over 4 million pieces were received from the United Kingdom, an increase as compared with the previous year of 7 per cent.

From the continent of Europe the receipts were 440,000 pieces —equal to 8½ per cent. of the whole—a decrease of ½ per cent.

The imports from Madras and Bombay decreased by one half.

Sarongs and slendangs were imported in less quantity by 82,000 corges. Supplies of these articles from the United Kingdom decreased by 19 per cent., and from Continental ports by 25 per cent., while from Madras they remained much the same as in 1900.

Dyed yarn imports nearly doubled in quantity, the receipts being larger than in any previous year. Plain yarn increased by upwards of 20 per cent. to about an average year's importation —the years 1899 and 1900, it should be remembered were remarkable for small imports of this article.

Of the plain yarn, nearly 20 per cent. came from the United Kingdom; and of the dyed yarn, some 73 per cent. Upwards of 9,000 bales of grey and bleached yarn were received from India, being an increase of 1,300 bales; and of dyed yarn, 3,200 bales, an increase of about 1,200 bales, came from Continental ports.

The imports of silk piece goods, much of which is of mixed material, amounted to 403,500 pieces, a decrease of upwards of 20,000 pieces; but the average price in 1901 was much better than for 1900.

Of woollen cloth, of pure and mixed quality, 30,000 pieces were imported, a falling off as compared with the previous year of some 8,000 pieces.

The imports of cement reached 103,000 casks, an increase of 13,000 casks. Of this quantity about a fifth came from Hong Kong, an increase as compared with 1900 of upwards of 50 per cent.; while 50,000 casks were received from the United Kingdom against 46,000 in the preceding year. From the Continental ports there came about 30,000 casks, about the same quantity as in 1900.

The quantity of dynamite imported, though actually of small amount, is relatively important. Besides the Anglo-Swedish Nobel brand there are two other marks, both German, to be found in this market.

Turning now to exports, we find that the shipments of tin again increased this year by upwards of 9 per cent., reaching a total of 52,500 tons. The home market in respect of this article was marked by violent fluctuations said to be caused by a continuous struggle between conflicting interests. On the whole, a retrogade movement in prices may be said to have taken place.

Gambier exports have steadily decreased since 1897, and for the year under review amounted to 40,000 tons. The quantity exported in 1901 decreased by 14 per cent., but the average price of bale and cube gambier combined increased by 25 per cent.

The shipments of tapioca and sago increased 6½ and 1½ per cent., respectively, in quantity; but coffee again fell off, this time by 35 per cent.; hides, raw and tanned, the export of which is alleged to be seriously affected by high freights, fell off by 25 per cent.

The export of horns increased in quantity.

The exports of spices kept well up to the level of the previous year. Areca-nuts, black pepper, and nutmegs exhibit increases of 4, 10 and 17 per cent. respectively. In other descriptions there were trifling decreases except in the case of cloves.

Shipments of copra again decreased, the decrease as compared with the results of 1900 being nearly 18 per cent. It is suggested that the continued decrease in the shipments of this article may be due to the high rates of freight ruling at Singapore, possibly combined with decreased output at the places of production.

There is a fair increase in the total quantity of gums exported. The particular articles included under this head, in which the largest decreases are seen, are gutta percha and rubbers (except jelutong). The decrease in quantity of gutta percha is compensated for by the higher prices obtainable for the finer qualities, due to purchases made on account of the cable companies. The output of jelutong (pontianak) rubber increased 60 per cent. for the year.

Rattans exported fell off from 37,000 tons in 1900 to 30,900 tons in 1901, a decrease of 16½ per cent.

The trade in preserved pineapples continues to steadily increase. The shipments to Europe and America in 1901 reached a total of 400,000 cases, 75 per cent. of which went to the United Kingdom.

Trade with Other Countries.

A classification of the trade of the Colony according to countries shows that 15·9 per cent. is with the United Kingdom, 19·8 per cent. with British Possessions, and 19·2 per cent. with the Malay Peninsula, Sarawak and French India, the last-mentioned of which exports chiefly British goods. Thus what may be called British trade may be said to absorb 54·9 per cent. of the total against 45·1 per cent. with other countries.

Imports from the United Kingdom increased by 4 per cent. Cotton piece goods accounted for an increase of upwards of a million dollars; yarns for nearly $750,000; and telegraph materials for $400,000.

In metals imported from the United Kingdom there is a marked decrease, especially in corrugated iron, steel, bar iron and machinery; and in textiles there is a decrease in sarongs.

Exports to the United Kingdom decreased by nearly 11 per cent. Tin showed a decrease in value of $4,360,000; pepper upwards of $800,000; hides, $600,000; india rubber nearly $400,000; and gutta percha nearly $300,000. There was a decrease in value also in sugar, rattans, rice, and liquid fuel.

The only articles exported to the United Kingdom in which important increases appear are gambier, sago, flour, and preserved fruits.

The increase in imports from the continent of Europe is only 3 per cent.; in 1900 the increase was 23 per cent. Germany, which headed the list for 1900 with an increase of 30 per cent., shows, in 1901, a decrease of 14 per cent. The falling off in the imports from Germany is in all principal articles except crockeryware, and is especially noticeable in apparel and hosiery, nails, lamps and provisions.

The imports from Holland show a decrease as compared with the imports of 1900. The falling off is in cotton piece goods, hardware, tramway materials and tobacco; in other articles an increase appeared, notably in gin.

The value of imports from Austria nearly doubled in amount, sugar alone accounting for an increase of $700,000. The value of the imports of paper exceeded those of the previous year by over $90,000.

The imports from France also show a reduction in value, due to smaller importations of umbrellas, clocks, and watches. The import of brandy increased.

The value of petroleum introduced from Russia shows an increase.

The decreased value of matches from Sweden accounts for the most part for the decline in the value of imports from that country. Apparel from Spain exhibits, as was the case in 1900, an increased value.

The total value of the exports to the continent of Europe fell off, as compared with 1900, to the extent of less than one per cent.

The exports to France fell off in value to the amount of two million dollars, tin being responsible for $526,000 and copra for $824,000, followed by coffee with a decrease of nearly half a million dollars and, at a distance, by hides, gambier, rattans, white pepper and flake tapioca. The only article exported to France that showed a marked increase is gutta percha.

The exports to Germany and Holland also declined in value, to the former country mainly in gutta percha and copra and to the latter country in tin and rattans.

Tin and copra of greater value than in the preceding year were exported to Italy and Russia respectively, but there was a falling off in the export of copra to Italy and of pepper to Russia.

The exports of tin and pepper to Austria show an increase while copra shows a decrease.

The total value of exports to Belgium is much the same as in 1900. Tin and copra, however, show a decrease of nearly a quarter of a million dollars, the decrease being made up by increases of smaller amount in various other articles.

Tin and copra are responsible for the increase in the value of exports to Spain.

As compared with 1900, the import trade with the United States of America shows a marked decrease—a decrease in value of nearly 23 per cent.—but the export trade was in a very flourishing condition, the increased demand for produce for ports of the United States of America being doubtless due to the great manufacturing activity of that country as well as to the very low freights offering from Singapore. Tin exports increased in value by $3,630,000; black pepper by nearly one million; jelutong rubber by upwards of half a million; rattans and gambier showed an increase each of upwards of $310,000; and increases of smaller amount appear under white pepper, gutta percha and tapioca pearl. The only article of importance in which there was a falling off is coffee.

The imports from the Netherlands India show a decrease as compared with 1900 of 10 per cent., but even so the total exceeds that of any year previous to 1900. The principal falling off is in supplies from Sumatra and Java.

From Sumatra there is a falling off, amounting in the aggregate to 2½ millons of dollars, in nearly all the chief articles of produce—gutta percha, petroleum, fish, tobacco, rubber and rattans.

From Java there is a decrease in the value of imports of gutta, coffee, ground-nuts, kachang oil and sarongs, while rattans show a fair increase.

The imports from Dutch Borneo though in the aggregate slightly below the amount of the imports of the preceding year were on the whole well maintained. Copra increased to the extent of nearly $700,000, and gutta percha by an almost equal amount; rattans decreased by $700,000, Borneo rubber by nearly $300,000, and petroleum with residue by a still larger sum.

The trade with the Celebes equalled in value that of 1900; the imports from the Dutch islands increased.

The principal articles imported from the Celebes which show a falling off are copra and rattans; nutmegs, dammar, and precious stones show an increase.

From the Dutch islands was received more tin ore, petroleum and gambier, but less (in value) of copra and pepper.

From Acheen the imports, mainly into Penang, show a decrease in areca-nuts, black pepper and gutta percha.

The imports from Bali decreased by upwards of $500,000 in coffee, by $400,000 in copra, and to a smaller extent in raw cotton; the imports of cattle increased in value.

The value of copra brought from the Natunas and Anambas Islands increased by $200,000; while from Rhio there was a falling off in cube gambier and in pepper.

The exports from the Colony to the Netherlands India increased as compared with the exports of 1900 by nearly 6½ per cent.

This increase is more than accounted for by the increased exports to Java of rice, the export of which exceeded the export of 1900 by nearly $4,000,000. All the other principal articles of export to Java, except earthenware, show a decrease, amounting in the aggregate to some $1,500,000.

Rice was exported to Sumatra and to Dutch Borneo also in increased quantities; but cotton piece goods and sugar exported to these places showed a decrease.

There was an increase in the export to Achinese ports of cotton piece goods, confectionery, rice, opium, and cattle.

The export trade with Bali, Natunas Islands and Rhio calls for no remark except that in the case of the first named there was a decrease in piece goods and opium.

The value of imports from British India as a whole is much the same as in 1900. Taken separately, however, a decrease appears in the imports from all parts of that Empire with the exception of Burma. Rice is responsible for the increase from Burma.

The decrease of two million dollars in imports from Calcutta is made up of a diminution in the value of imports of opium and of gunnies in nearly equal proportions.

Imports from Madras decreased by upwards of a million dollars, towards which cotton piece goods contributed some $800,000. There was a decrease also in oil cakes, cattle and goat skins; in sarongs there was an increase.

The volume of exports to India increased about 3¾ per cent. as compared with an increase of 15 per cent. in 1900.

In respect of exports to Bombay and to Calcutta there was a decrease; the decrease in the exports to Bombay being in coffee, gum benjamin and pearl sago, while there was an increase in both rice and tin. In the case of exports to Calcutta, areca-nuts fell off to the extent of upwards of half a million dollars, pepper to the amount of $110,000; gambier, sugar and tin each $100,000; in sticklac there was a large increase.

The increase of $700,000 in the case of Madras is mainly accounted for by the increased value of cotton piece goods sent from Penang—an increase of upwards of $500,000. There were increases of smaller amount in areca-nuts and tin, while petroleum exported decreased in value by $100,000.

Of the advance in value of nearly one million dollars in goods despatched to Burmese ports, fish, dry and salted, contributed upwards of half a million dollars; increases are also to be noted in areca-nuts, curry-stuffs, matches, hides and rice, while raw silk and Chinese preserves show a falling off.

The value of imports from the East Malay Peninsula increased by 3½ per cent. while exports increased by $230,000—equal to nearly 14 per cent. There was increase in the value of fish, cattle, padi and birds' nests imported, but a decrease in refined tin, copra and swine. Much of the copra that used to come to Singapore for shipment now finds its way to Bangkok. In the matter of exports there was an advance in value of cotton goods and yarn, rice alone showing a falling off.

From the West Malay States the imports increased in value by nearly $5,800,000 dollars, or nearly 10 per cent. From Selangor alone the increase is $3,372,000. Tin ore gave an increased value of $2,700,000; tin, an increase of $2,400,000; and gambier nearly a million dollars. A heavy decrease occurred in pepper imported and, though of less moment, in rice.

The exports show a net increase of upwards of $300,000, equal to about one per cent. Rice exported increased in value nearly $900,000, and Benares opium decreased by $200,000; other fluctuations though numerous are unimportant.

The imports from Siam and the Siamese States increased by some $4,500,000, equal to some 23 per cent. of the value of the imports of 1900.

Tin fell off by upwards of a million dollars, but rice accounted for an increase of $5,300,000. The imports of cattle decreased by $250,000; pepper, too, decreased, though to a smaller extent, but in fish there was an increase of nearly half a million dollars and in padi an increase of $160,000.

The exports increased by 10½ per cent. Cotton piece goods show an increase of nearly $600,000; gunnies nearly $500,000; yarns upwards of $250,000; and sarongs upwards of $235,000. In the value of exports of apparel and of sugar there was a fair increase, while in rice and petroleum are to be found the chief decreases.

The imports from French Indo-China decreased by 31 per cent.—nearly $2,200,000, of which rice was responsible for close on $2,000,000.

Exports decreased upwards of 12 per cent.—$370,000, of which $325,000 were for gunnies, $32,000 for sharks' fins, and $25,000 for opium.

The total value of imports from Hong Kong and China remained about the same; there were many fluctuations in the way of both increase and decrease, but none calling for special comment.

The exports increased in value upwards of 11 per cent., or $2,100,000. The more important increases were in sugar and sugar candy, $1,400,000; petroleum, $700,000; black pepper and other articles. On the other hand, there is a decrease in tin ($500,000), ground-nuts, rattans, padi, etc.

The imports from Australia decreased upwards of 10 per cent, the decrease being due chiefly to reduced imports of tin ore and coal. The value of sandalwood imported was nearly doubled as compared with the imports of the preceding year; the value of the imports of wheat flour also increased largely.

The total value of exports to Australia shows a slight increase. In the value of prepared opium there is an important increase, but in rice and pearl tapioca a decrease.

The value of the imports from Japan increased upwards of 6 per cent. the advance being accounted for by the increased values of coal, jinrikishas, cigars and matches.

The exports decreased upwards of 21 per cent., the decrease being visible chiefly in petroleum, while rice and indigo show increases.

General Observations on Trade.

The feature of the trade as judged from the total values of imports and exports is a want of expansion. While there has been no going back there has been an absence of the forward movement so observable in preceding years, and so far as an opinion can be formed from figures practically no progress was made.

While this was the case with respect to the goods and produce trade of the Colony a very different condition of affairs held good in respect of the shipping trade. Of the large increase in the tonnage of shipping entered and cleared at ports in the Colony, the British shipping of the United Kingdom comes first with an increase of tonnage of 800,000 tons, then Germany with an increase of 480,000 tons, Russia 210,000 tons, and Norway and Sweden with 145,000 tons.

Towards the end of 1901 the Registrar of Imports and Exports was, in compliance with instructions from the Secretary of State, entrusted with the duty of corresponding with the newly-created Commercial Intelligence Branch of the Board of Trade on the subject of commercial matters affecting the Colony, and was empowered to reply directly or through that department to enquiries made from home by merchants and manufacturers.

Several of his reports on trade matters have appeared from time to time in the columns of the Board of Trade Journal, and it will no doubt be found to be to the advantage of British trade that such an appointment should exist in so important a trade centre as this.

MINES, MANUFACTURES, AND FISHERIES.

There are no mines of importance in the Colony, though deposits of tin exist in the Dindings and Malacca. The output of alluvial tin from Malacca in 1901 was valued at $1,396. Prospectors from Selangor and Perak have visited parts of this Settlement and possibly the industry may be revived.

The Straits Trading Company, who own the enormous smelting works at Pulau Brani at the entrance to Singapore Harbour, have also erected large tin smelting works at Butterworth in Province Wellesley. The erection of buildings was carried on there throughout the year, and this industry promises to be one of great extent and importance.

Large establishments for the tinning of pineapples exist in Singapore, and the area planted for this purpose has increased.

A large Chinese biscuit factory exists and appears to be prospering.

The fisheries of the Colony are very rich and give occupation to a large number of people. Most of the fish caught near Singapore and Penang is consumed fresh. That caught near the Dindings is salted for consumption in Penang and Perak. In Penang and Malacca large quantities of a species of shrimp are manufactured into "belachan" a favourite native condiment for eating with curry.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

Coco-nuts are very widely grown throughout the Colony, the largest plantations existing in Penang and Province Wellesley. During the past year they attained the highest price known for many years, viz., $37 per 1,000 nuts.

Singapore is not an agricultural Settlement, but coco-nuts are grown round the coast, and pineapples, which are used to supply the tinning manufactories, cover most of the hills within easy reach of the town. Indigo is grown for local use in dyeing the cloth used by the Chinese, and there are also some small plantations of pepper and the betel-vine (Sireh).

In Penang and Province Wellesley after coco-nuts and padi, the chief product is sugar from European and Chinese estates, the former being the largest and most important and being furnished with the most modern machinery. Tapioca is grown on one large European-owned estate, and spices (nutmegs and cloves) are cultivated by Chinese on the hills. Most of the sugar

estates suffered severely from the excessive drought during the first three months of the year, while the nutmeg plantations were visited by disease.

Large fruit plantations also exist, which supply the towns in the Settlement and Perak.

Rubber cultivation is steadily increasing and has been organized to a considerable extent by some of the larger landholders.

In pursuance of the recently instituted policy of encouraging agriculture among the native population of the Colony by the holding, with the assistance of Government, of an Agricultural Show in some one of the Settlements annually, a Show, similar to that held in Province Wellesley in 1899, was opened at Penang in August. It was well attended and was in every way successful. The proposed Show at Jasin in Malacca was postponed, owing to bad harvests and sickness among the cattle.

In Malacca there are large and profitable tapioca estates owned exclusively by Chinese. The method of cultivation is wasteful, Forest land is cleared and planted with three or four crops (the plant takes from 18 to 24 months to mature) and then abandoned. Much land, however, is fit for cultivation again after lying fallow from 15 to 20 years, and it has as yet been found impossible to cultivate tapioca profitably in this Settlement in any other manner.

Coco-nuts are largely grown along the littoral, and the Malay population plant padi sufficient for their own consumption. A certain quantity of rice has always to be imported for the Chinese in the town and on the large estates.

Malacca is famed for its fruit and is one of the chief sources of the fruit supply of Singapore.

The tea estate at Durian Tunggal continues to produce tea of good quality.

Rubber is attracting the attention of Chinese estate owners, and is being largely planted on the Bukit Asahan estate, owned by a Chinese syndicate, and at Durian Tunggal. Both para rubber (*Hevea Braziliensis*) and India rubber (*Ficus elastica*) thrive in the Settlement. Experimental tappings of *Ficus elastica* have already taken place with good results

The plantations of gutta percha-producing trees started in the Colony last year were supplied with no less than from thirty to forty thousand seedlings and saplings which were divided between the three Settlements. It is noticeable that the gutta percha tree was seen in fruit during the year 1901 for the first time on record.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 16,289,704, as compared with 14,469,405 in 1900. The light dues amounted to $178,872.62.

Four hundred and seventy-seven new vessels, aggregating 10,519 tons, were built in Singapore during the year.

LEGISLATION.

The year 1901 was not characterized by many important additions to the Statute Book. Twenty-one Ordinances were passed, of which eleven contained amendments of previous enactments.

Three of the Ordinances deal with land, namely one (No. 1) validating and legalizing Leases of Foreshores and Submerged Lands, another for the Improvement of Agricultural Lands (No. II.), and a third to provide for a better system of transferring rights in Customary Land in Malacca (No. VII.).

Ordinance No. V. of 1901 consolidates and amends the previously existing law as to granting pensions to the widows or children of deceased public officers.

Another Ordinance of some importance regulates the transit of cattle and other live stock by sea. The immediate cause of the introduction of this measure was the cruel treatment of cattle in the trade between Singapore and Bangkok, due to the animals being stowed on deck and between decks, without proper pens to keep them from being maimed and disabled in rough weather.

EDUCATION.

The schools of the Colony are divided into two classes—Vernacular schools, nearly all for Malays and directly managed and financed by the Government, and English schools, mostly managed by private bodies and receiving grants-in-aid from the Government There are, however, a few Government English schools and a few grant-in-aid schools where Tamil or Chinese are taught.

There are 29 schools in which English only is taught, 7 in which English and Tamil are taught; 2 in which Tamil only, 2 in which Chinese only, and 161 in which Malay only is taught.

The expenditure on Government English schools was $29,935, on aided schools (English, Anglo-Tamil, Tamil, and Chinese) $79,350, and on the Government Malay schools, $73,393.

Two Queen's Scholarships of a value not exceeding £250 a year, tenable up to five years, are awarded annually on the results of the Cambridge Senior Local Examination. Local Government Scholarships, and Industrial Scholarships, for the encouragement of boys taking up engineering or surveying, are also given.

A Training College for Malay teachers for the Colony and Federated Malay States is making satisfactory progress in Malacca. The cost for the year was $6,805. Twenty-eight students passed out in December, 1901.

A Training College for teachers in English schools is shortly to be opened.

A Bill was introduced during the year to make attendance at school compulsory on boys living within a certain radius of a school where a free education is provided in their own language.

This will apply chiefly to Malays. It had not yet been brought into force at the close of the year.

GOVERNMENT INSTITUTIONS.

Hospitals.

Except the Chinese hospital at Singapore, all the general hospitals in the Colony are under Government management. The hospitals on the sugar estates in Province Wellesley, maintained by the planters, are frequently visited by Government officers. In 1901, the principal causes of admission were malaria, beri-beri, and venereal diseases, the first two less and the last being more prevalent than in 1900.

The hospitals, exclusive of the lunatic asylum, received throughout the year 25,154 patients. The Government maintains a lunatic asylum at Singapore and a leper asylum on Pulau Jerejak near Penang.

Cases of beri-beri occurred in the Singapore Asylum throughout the year, which led to a seaside establishment for female patients being organized at Pasir Panjang, about five miles from the town, with satisfactory results.

Reformatory.

A Reformatory was opened early in the year, seven miles from the town of Singapore. At first an insufficient boundary fence allowed a number of the boys to escape. A wall has now been built enclosing the buildings. At the end of the year there were 28 boys in the reformatory, learning carpentry or shoe-making, as well as reading and writing in Romanised Malay. The expenditure on this institution amounted to $7,977.

Savings Bank.

There was a large increase in Savings Bank transactions, as compared with the preceding year, and the amount standing to the credit of depositors at the close of the year was $487,098, an increase of $52,518 as compared with 1900. The deposits amounted to $361,694, and withdrawals to $321,708.

The total investments at the end of the year amounted to $476,486, the particulars of which are as follows:—

Indian 3½ per cent. rupee paper, $273,391.

Singapore Municipal Debenture Stock, $48,000, bearing interest at 5 per cent., and $71,500 at 4 per cent. = $119,500.

Fixed Deposits at the Chartered Bank, bearing interest at 4 per cent., $28,500.

Cape Stock, bearing interest at 3 per cent., $8,516.

Queensland Stock, bearing interest at 3 per cent., $10,000.

South Australian Stock, bearing interest at 3 per cent., $21,044.

Zanzibar Government 3 per cent. guaranteed loan, $15,535.

POLICE.

Two superintendents of police and one chief detective inspector retired on pension in the course of the year 1901.

One inspector resigned.

One chief inspector reverted to first class inspector.

One chief inspector was promoted to chief detective inspector.

Two first class inspectors were promoted to chief inspectors.

One first class inspector was promoted to acting chief inspector.

One inspector was reduced to sergeant for six months.

One chief inspector and two inspectors went on leave.

One sergeant was promoted to inspector.

Three sergeants were acting as inspectors.

Three sergeants were reduced to constables.

One sergeant and five European police constables were dismissed.

The following increases in the Sikh contingent were provided for to supply a small Police Force at Christmas Island:—

One corporal.

Seven constables.

The whole Sikh contingent has been fairly kept up to strength. The detachment of Sikhs formerly stationed at the Dindings was relieved by Malays in consequence of the prevalence of fever there.

Recruiting for the Malay contingent was on the whole slightly better than in the previous year.

Thirty Malays were transferred from Malacca to Singapore for duty.

The Detective Force worked fairly well.

There were twenty-five cases of murder and twenty-four cases of gang-robbery reported.

VITAL STATISTICS.

The population of the Colony which was 512,342 according to the Census of 1891 was returned by the Census of 1901 as 572,249. During the year 1901 there were registered 14,568 births, of which 7,573 were of male and 6,995 of female children.

The number of deaths registered was 22,876 as compared with 22,385 in 1900.

The public health of the Colony was not very good, the death-rate 39·85 being high, though only slightly higher than that for 1900, which stood at 39·46.

Zymotic disease was not very prevalent in the Colony as compared with last year. In Singapore 149 cases of cholera, of which 145 proved fatal, were reported. No cases were reported in the other Settlements. The cases of small-pox were considerably less than in the previous year, viz.:—

Settlement.	1900.		1901.	
	Cases.	Deaths.	Cases.	Deaths
Signapore	220	91	62	14
Penang and Province Wellesley ...	297	77	41	15
Malacca	89	16	4	1

In Singapore and Penang the general arrangements for sanitation and conservancy are carried out by the Municipalities. Both places have a good water supply; but there is a certain amount of overcrowding in the towns. The town of Malacca and the villages of Balik Pulau, Bukit Mertajam, Butterworth, Prai (and the adjacent sugar estate) and Nibong Tebal, enjoy water

supplies from Government reservoirs. Those in Province Wellesley however require certain improvements, which are to be carried out during the next two years.

CLIMATE.

The mean rainfall was, in inches, 83·56 in Singapore; 126·04 in Penang; 89·58 in the Dindings; 105·63 in Province Wellesley; and 87·13 in Malacca. The greatest fall in 24 hours was 7·50 inches at Malacca on the 6th February.

POSTAL, TELEGRAPH, AND TELEPHONE SERVICE.

An unusually heavy increase is recorded in the weight of the mails which passed through the hands of the Postal Department during the year 1901, as compared with 1900. Insurance and Parcel Post branches, as also the Chinese Sub-Post Office, continue to show steady progress. The Postal Revenue amounted to $245,516 as compared with $233,478 in 1900. The expenditure charged to 1901 was $223,479, an increase of $13,784 over the expenditure of the previous year. The Money Order business continues to increase. The transactions in sterling amounted to £17,049, in Indian currency to Rs. 1,824,573, and in local currency to $355,239; the total business done thus aggregating $1,789,794, and showing a distinct advance upon the total of $1,729,791 for the year 1900.

The telegraphs in Penang and Province Wellesley, and also the inland telegraphs in Malacca, all of which are connected with the Government system in the Federated Malay States, are the property of Government.

Singapore possesses a well-organized telephone system worked by the Oriental Electric and Telephone Company, which also works and maintains the Government telephone lines connecting the Government offices, police stations, &c.

In Penang, Province Wellesley and Malacca, Government maintains its own lines. In Penang there are 136½ miles of service telephone lines, of which 49½ miles are connected with the Public Exchange and 87 miles not so connected. The mileage of subscribers' lines connected with the exchange is 105½ miles. The Telephone Exchange which is worked by Government was opened in Penang on the 1st March with 50 subscribers. On the 31st December there were 105 subscribers' lines and 22 service lines connected.

MILITARY.

The garrison of Singapore consists of His Majesty's Regular forces and Asiatic artillery. No militia force exists.

A valuable Volunteer Artillery force, 111 strong, exists in Singapore. Only Europeans are enlisted in it. Its principal armament consists of a complete battery of six 2·5 inch R.M.L. screw guns, utilised with 7 pr. limbers as a field battery with pony draught. It also possesses four Maxim guns (·45) in the use of which it is proficient. A Volunteer Rifle corps, 173 strong, also exists, composed of Europeans. A company of Eurasians and a company of Straits-born Chinese, each 100 strong, was also organized during the year. These three corps are armed with Lee-Enfield rifles and sword bayonets. A Volunteer Engineer corps, composed of Europeans, and a cadet corps, are in process of formation. A Volunteer infantry corps, 150 strong, also exists in Penang, and one is in process of formation in Malacca. The armanent consists of Martini-Enfield rifles with sword bayonets.

The constabulary force numbers nearly 2,000 men, of whom more than 300 are Sikhs. They are well drilled and armed.

PUBLIC WORKS.

During the year, in addition to the carrying on of works previously commenced, a considerable number of new projects were undertaken. Owing to the large demand for skilled labour on all sides, prices have advanced and progress on Public Works was not so expeditious as could be desired.

In the Budget were entered three large items which it was found advisable to postpone. These were the construction of the light house at Pulau Aor, canal to Keppel Harbour, and erection of a new museum and library.

Towards the end of the year the Colony secured the services of Mr. Matthews, C.M.G., of the firm of Coode, Son, and Matthews, to visit the Colony and report upon harbour improvements for the three Settlements.

In addition to the usual works of maintenance of roads and buildings the following projects were completed during the year:—

SINGAPORE.

Quarters for coolies, Tanah Merah magazine.

Magazine pier, Tanah Merah.

Quarters for mandore in charge of planting of gutta percha, Bukit Timah.

Completion of the new civil prison.

New quarters for boarding officers, Marine Department.

Erection of a furnace battery and the addition of a double roof to the Government analyst's office.

Temporary beri-beri ward for female patients, Pasir Panjang.

Erection of a building at the foot of Mount Palmer to contain the Singapore disinfector.

Temporary ward at the Leper Asylum, Seranggong, to accommodate leper patients.

Construction of an examination depôt for immigrants at Telok Ayer.

Quarters for boatmen and gardeners, Christmas Island.

Progress was also made on the following works and buildings:—

Quarters for the Superintendent of Works and Surveys, Singapore.

New light house on Fort Canning.

Reclamation on sea face between the mole near the drill hall and Johnston's pier.

Alterations to Supreme Court.

Quarters at Christmas Island for the district officer, interpreter, and police.

Improvements to the rifle range, Balestier Plain.

Dredging Singapore River and removing rocks near the entrance.

Alterations to the General Post Office.

Completion of Telok Ayer sea wall and reclamation to Fort Palmer Point.

Under "roads, streets, bridges and canals," the following works were completed:—

Portable light railway and trucks for construction work.

Construction of a road from the municipal limit on Alexandra Road to near the tenth mile on Reformatory Road.

Additional culvert on the Kranji Road at 10½ mile.

New road from Tanjong Katong to Bedoh.

PENANG.

The following works and buildings were completed during the year:—

Duplicating syphon across Prai River.

New quarters for Lascars near the Marine Police quarters.

Erection of quarters for Veterinary Inspector.

Constructing separate lavatory for officers' quarters, General Hospital.

Quarters for Chinese interpreters, Prison Department.

Erection of servants' quarters, Leper Asylum, Pulau Jerejak.

Teacher's quarters, Kuala Prai Vernacular School.

Quarters for chief clerk and interpreter, Butterworth.

Erection of clerks' quarters, Nibong Tebal.

Erection of a brick building for district office, Nibong Tebal.

Erection of two cells, General Hospital.

Erecting four houses for public officers.

Additions to jetty sheds.

Erection of building to contain a disinfector.

Construction of quarters for Sikhs.

Screw pile beacon.

Progress was also made on the following works and buildings:—

Weld Quay reclamation.

Sungei Pinang reclamation.

Extension of Government offices.

Erection of new Supreme Court.

Exchange and club building.

Erection of goods shed on New Reclamation.

New reservoir, quarantine station.

Reconstruction of Marine Police and Harbour Master's Department buildings.

Drill hall for Penang Volunteers.

Reclamation north of new iron pier.

MALACCA.

Quarters for six married constables were built at the Central Station.

A detailed survey of the proposed Malacca-Tampin railway was made.

Progress was made in widening the entrance to the Malacca River, on the construction of quarters for forester at Ayer Koroh, and on the erection of frontier pillars on the Malacca-Johol frontier.

The principal work carried out on roads has been the extension of the frontier road to Relau, a short length of road to connect Sungei Bharu with the Sungei Bharu—Kuala Linggi road near the 27th mile, and a bridge at Sungei Rambei. The Johore Government paid half of the cost of the last item. A deviation was also completed between the 17th and 18th miles on the Tampin road, and three new coolie lines were erected.

The usual maintenance services were carried out on buildings, roads, and bridges.

IMMIGRATION.

During the year immigration from Hong Kong was prohibited from the end of May to the beginning of August. Amoy and Swatow were both declared infected but immigration was not prohibited. These restrictions are becoming an annual feature on account of the regular visitation of plague in the southern ports of China.

The immigration figures for the last three years were:—

Year.	Male.	Female.	Total.
1899	141,980*	7,717	149,697
1900	188,965†	11,982	200,947
1901	166,956‡	11,822	178,778

* Of these 6,650 were children. † Of these 8,488 were children. ‡ Of these 8,147 were children.

The disproportion between the sexes still continues.

The number of immigrants from Southern India largely decreased, as will be seen from these figures:—

Immigrants.	1900.	1901.
1. Statute Immigrants	7,615	2,785
2. Free Coolies (with aided tickets)	7,052	3,476
3. Other Immigrants	23,862	21,998*

* Of these 2,902 were children.

During the year 15,434 adults and 770 minors left for Southern India.

The appointment of a Superintendent of Emigration at Negapatam has resulted in an improvement in the class of coolies arriving in the Colony, but, owing to the stricter examination, the numbers have decreased.

There has been a weekly service of steamers between Penang and Southern India throughout the year.

In the earlier part of the year there was a very high death-rate among the coolies on the Singapore-Johore railway, but this gradually fell off after proper medical attendance was arranged for.

GENERAL OBSERVATIONS.

The news of the death of Her late Majesty Queen Victoria in January was received in this Colony with manifestations of deep sorrow on the part of all classes of the community. A memorial service was held in the cathedral on the 2nd February. His Majesty the King was proclaimed in each of the three Settlements on the 28th January in the presence of a large concourse of people.

Sir Alexander Swettenham, K.C.M.G., continued to administer the Government until the 18th February, when he went on leave. Sir Frank Swettenham, K.C.M.G., Resident-General of the Federated Malay States, replaced him as Administrator, and in September was appointed to be Governor of the Colony, High Commissioner for the Federated Malay States, and Consul-General for Borneo and Sarawak.

In the month of May the Colony was honoured by a visit from the Duke and Duchess of York, who remained three days in Singapore on their way to Australia. Their Royal Highnesses received many tokens of loyalty and devotion from the people of the Colony, and were pleased to express themselves much gratified with their reception.

The construction of the Singapore-Kranji Railway continued during the year, and it is hoped that it may be opened for traffic towards the end of 1902. It has been decided to eventually extend the line to the docks, *viâ* Kampong Saigon and Sepoy lines, and thence past Tanjong Pagar and the P. & O. Wharf to Keppel Harbour. The land required for this purpose will be acquired without delay. Negotiations are also on foot for leasing the railway to the Singapore Tramway Company who would probably use electricity as the motive power and would connect the Kranji line with their system of street tram lines.

In November, Mr. Matthews of the engineering firm of Coode, Son and Matthews, came to the Colony to enquire into and report upon the question of the improvement of harbour accommodation of each of the three Settlements. His recommendations include a protected harbour for local and coastwise shipping at Singapore and an extension of the iron pier now in course of construction in Penang. The carrying out of the last-named work has been already decided upon and arrangements have been made for borrowing a sum of $600,000 for this work from the Government of the Federated Malay States. Final consideration of the Singapore scheme is deferred until the results of a preliminary survey recommended by Mr. Matthews are known. It is not proposed at present to take any steps to carry out Mr. Matthews's suggestions for improving the harbour of Malacca, as the trade of the place is not sufficient to justify the large expenditure that would be necessary.

The Prai-Taiping Railway progressed satisfactorily, the bridge over the Krian River having been almost completed by the end of the year, and the Perak section of the line all but finished.

A company of engineers, a corps of infantry, consisting of Straits-born Chinese and Eurasians, a cadet corps and a company at Malacca were added to the Volunteer Force of the Colony.

A successful agricultural show was held in Penang in July.

GENERAL CONDITION OF THE COLONY.

The prosperity of the Colony continues. The Census taken in 1901 shows a total population of 572,249, as against 512,342 in 1891, thus showing an increase of 59,907 during the past decade. This increase is accounted for entirely by immigration, nor indeed does it represent the true augmentation due to the influx of population, inasmuch as the birth-rate of the Colony itself is, owing to the paucity of women, much lower than the death-rate. The principal increase of population has been in the Settlement of Singapore, and China has supplied the greatest number of immigrants.

The cost of living continues to advance and the price of land and house-property has risen enormously, especially in Singapore. The price of labour and building materials has also increased, while the exchange value of the dollar has steadily declined.

The lighting of the town of Singapore has been much improved by the adoption of Welsbach incandescent burners in some of the principal thoroughfares.

The Singapore Tramway Company was formed during the year for the installation of electric tramways and the supply of electric energy in the town; the Company has obtained from the municipality a thirty-five years' concession for this purpose, and it is proposed to use electric power supplied by them to supplement the existing system of lighting by gas the streets of Singapore. An Ordinance has been passed to facilitate and legalize the operations of the Company, which will probably commence before the close of 1902.

The Penang Tramways were taken over by the Government early in the year, and have since been carried on by a lease on a short agreement. This arrangement is not satisfactory, and negotiations have been opened for letting the lines to the Singapore Tramway Company with a view to their being worked by electricity. The power supplied by the Company could also be utilized for the lighting of the town.

The increased output of tin in the Federated Malay States has led to further development of the tin smelting business in the Colony.

W. T. TAYLOR,

Colonial Secretary,

Straits Settlements.

STRAITS SETTLEMENTS.

(For Report for 1901 *see* No. 360.)

ACTING GOVERNOR TAYLOR to MR. CHAMBERLAIN.

Government House,
Singapore,
13th October, 1903.

SIR,

I HAVE the honour to forward copies of the Report on the Straits Settlements for the year 1902.

I have, &c.,

W. T. TAYLOR.

---

875 Wt 21109 11/1903 D & S 5 16034

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1902.

FINANCIAL.

The Revenue for 1902 amounted to $7,754,736, the three Settlements contributing as follows:—

	$
Singapore	4,907,459
Penang	2,337,510
Malacca	509,767

There was an increase of $713,050 as compared with the Revenue for 1901 and of $2,368,179 as compared with that for 1900.

The principal increases were under Land Sales $163,556, Stamps $133,341, Reimbursements $123,270, Fees of Office $95,288, Post Office and Telegraphs $83,139, Licences $64,118, Miscellaneous Receipts $15,435, Port and Harbour Dues $13,497 and Land Revenue $10,497.

The principal decrease was under Fines and Forfeitures ($22,355) which in 1901 included all the Court Fees now placed under the head of Fees of Office.

The Expenditure for the year was $7,601,354, as compared with $7,315,001 in 1901 and $6,030,740 in 1900.

As compared with 1901 the Expenditure shews an increase of $286,353.

The principal increases were:—

	$
Personal Emoluments	259,865
Other Charges	247,500
Military Expenditure	100,721
Roads, Streets, &c., Special Services ...	82,482
Pensions, &c.	43,801
Interest	38,179
Expenditure under the Volunteer Ordinance	30,365
Special Expenses	20,515

The large increase under the head Personal Emoluments is in a great measure due to the increase to Exchange Compensation in consequence of the fall in the value of the dollar,

The increase under the head Other Charges is due to a large sum expended for the new Colonial steamer and the increase in price of stores and labour. Military Expenditure increases with the Revenue receipts on which 20 per cent. is payable. There was a greater number of votes taken out in 1902 for re-forming the roads already in existence. The increase under Pensions is mainly due to a larger amount charged to Difference in Exchange on Pensions paid in England owing to the fall in exchange. There was also a larger amount charged to Difference in Exchange on remittances to Crown Agents for Salaries and for Pensions to the Widows and Orphans payable in England owing to the fall in exchange. Both of these are charged under the head of Interest. The increase under the head Expenses under Volunteer Ordinance is due to more Volunteers being enrolled. A sum of $50,000 was paid as part of the Government's contribution towards the new Theatre and Victoria Memorial Hall, while the expenses in connection with passages, &c., of the Straits Settlements Volunteer Contingent which went to England for the Coronation of their Majesties the King and Queen amounted to $58,108·56. Both these were charged to the head "Special Expenses" in 1902. On the other hand in 1901 the following were charged to the same head—Expenditure in connection with the visit of their Royal Highnesses the Duke and Duchess of Cornwall and York $45,000, and the purchase of the Penang Tramways $40,000.

The principal decreases were under Works and Buildings, $275,937·75, owing to diminished expenditure on construction of the Singapore-Johore Railway and under Land and Houses purchased, $271,130·88.

The balance to the credit of the Colony on 31st December, 1902, was $1,973,176 as compared with $1,814,294 on the same date in 1901.

Arrangements were made for borrowing a sum of $600,000 from the Federated Malay States for the completion of the Penang Pier.

Exchange.

Exchange was very unsteady during the year. The average value of the dollar was 1*s.* 8½*d.* on demand and 1*s.* 8$\frac{15}{16}$*d.* at four months' sight, as compared with 1*s.* 11⅜*d.* and 1*s.* 11$\frac{11}{16}$*d.* in 1901. The highest rate for demand Drafts was 1*s.* 10$\frac{7}{16}$*d.* in January and the lowest 1*s.* 6$\frac{7}{16}$*d.* in December.

Currency.

The currency of the Colony consists of Mexican and British dollars circulating at equal value and of Government Currency Notes.

British dollars to the value of $32,547,677 were imported by the local Banks alone, as compared with $17,281,263 in 1901. Other dollars to the value of $5,318,404 were imported by the Banks.

The annual importation of British dollars by the Banks since their first coinage in 1895 has been:—

Year.	Amount.
	$
1895	2,201,890
1896	3,623,000
1897	25,704,908
1898	19,492,168
1899	29,349,725
1900	21,571,488
1901	17,281,263
1902	32,547,677

The average bank note circulation of the Colony for the year was $4,960,518, as compared with $5,473,733 in 1901. The falling off is due principally to the reduction by the Hongkong and Shanghai Banking Corporation of the amount of its local issue.

The amount of Government Currency Notes in circulation on the tenth of each month (when statistics are published) was:—

Month.	Amount.
	$
January	9,595,650
February	9,769,492
March	10,351,738
April	11,056,900
May	11,543,029
June	12,152,100
July	12,395,900
August...	12,395,900
September	12,395,900
October	13,150,495
November	13,393,537
December	13,476,020

Municipal Revenue and Expenditure.

The Revenue of the three Municipalities amounted to $2,074,407, and their expenditure, including sums expended on Loan Works, to $2,403,660.

TRADE.

The total volume of trade, inclusive of the Inter-Settlement trade, as indicated by the Returns of Imports and Exports, of the Colony compares favourably with that of the preceding year. Expressed in dollars and including specie, the figures are:—

—	1901.	1902.
	$	$
Imports ...	320,520,209	362,934,818
Exports ...	278,753,805	314,034,936
Total ...	599,274,014	676,969,754

a difference in favour of 1902 of $77,695,740.

Excluding specie the figures are:—

—	1901.	1902.
	$	$
Imports ...	292,810,167	322,396,485
Exports ...	256 773,550	285,953,815
Total ...	549,583,717	608,350,300

an increase as compared with the year 1901 of $58,766,583, equal to 10·7 per cent. in nominal value.

The Trade of 1902 was divided among the Settlements as follows:—

—	Imports.	Exports.
	$	$
Singapore ...	280,516,661	234,224,585
Penang ...	79,358,895	76,449,068
Malacca ...	3,059,262	3,361,283
Total ...	362,934,818	314,034,936

In all the classes of Imports and Exports but one the sterling values show a decrease, the difference being most marked in the case of the Imports and Exports of manufactured articles. The one exception is in the class of Exports of raw materials, the sterling value of which exceeded the sterling value of 1901

by £282,000, though even in this class the value was less than the sterling value of 1900 by a sum of £237,000.

As usual the value of the Imports largely exceeds the value of the Exports. The difference in this instance amounts to some $48,900,000 the excess in the matter of treasure alone being nearly $12,500,000. No doubt a considerable portion of the excess of specie imported may be attributed to the large imports of dollars towards the close of the year, due to speculation in view of the possible change in the currency. There still remains, however, a very large difference to be accounted for, some at least of which may be set down to the large quantity of bunker coal and liquid fuel shipped, of which no account is taken, and some probably to the raw materials used up in connection with the ship-building industry which is considerable. The recorded value of coal imports in the year under review is $6,547,375, while the value of the Exports as shown in the Trade Returns is only $98,440. Liquid fuel of the value of $406,725 was imported while the value of the Exports is given as $34,507. The difference is mainly due, as already mentioned, to shipments of bunker coal and liquid fuel on ships calling here to coal.

As regards the relative trade with gold and silver-using countries the recorded figures go to show that Imports from gold countries increased in value by some 2½ per cent., while the Imports from silver-using countries increased by upwards of 18 per cent.; the value of Exports to gold-using countries increased by nearly 14 per cent. while to silver-using countries the increase was only some 6 per cent. It would thus appear that the tendency of trade is to draw our supplies, as far as possible, from countries having a silver currency and to send goods to places where the standard is on a gold basis.

Measured in dollars the Import Trade with the United Kingdom may be regarded as stationary for the whole period dealt with, but measured in sterling it shows a distinct falling off; the increase as regards Imports is with foreign countries and British Possessions. The chief increases are with the States of the Malay Peninsula, British India and China. As compared with the trade of 1901 the year 1902 shows a general falling off in the value of Imports from all the countries of Europe.

The Export trade to the United Kingdom was in a more satisfactory state; if it shows no great increase it shows no falling off. In the case of British Possessions there was a marked falling off in the trade; with the other countries of Europe there was a substantial increase, and a marked increase in the Exports to the United States of America.

Looking to the classification of trade it will be seen that, while there has been a large increase in the food class and in

raw materials imported, manufactures stand still or, if anything, show a tendency to decline. In Exports the same disposition is apparent in the several classes.

Import and Export Quantities.

Excluding bullion and specie the value of the Imports of the Colony for 1902 exceeded 311 millions of dollars, an increase as compared with the values recorded for 1901 of nearly 28 million dollars, but converted into sterling at the average rate of exchange a decrease of value of upwards of a million pounds.

The Imports of live animals and articles of food and drink reached an aggregate value of $127,915,000. Rice, pepper, wheat flour, live stock, provisions, coffee, tobacco, fish, lard, vegetables, beans and peas, tapioca and sago all show large increases in value; the only articles of importance giving decreased values are opium and sugar.

Rice was imported to the amount of upwards of half a million tons of a declared value of $37,559,000, of which, however, nearly 94 per cent. was re-shipped to the neighbouring countries. The increase in the quantity imported is in respect of imports from Burma.

Imports of wheat flour show an increase of nearly 6,000 tons with a higher average value, the increase in value amounting to almost a million dollars. Some 95 per cent. of the wheat flour imported is of American origin brought to this Colony from Hongkong.

The value of provisions, under which designation are included biscuits, butter, milk, cheese and oilman's stores, exceeded 5¼ million dollars, by far the greater part being in respect of foodstuffs of Eastern origin.

The value of tobacco and cigars imported from the United Kingdom came to $553,000, an increase of some $80,000; and the United States sent tobacco and cigars to the value of $65,000, an increase of some $34,000.

Fish imported amounted to 45,250 tons valued at 7½ millions of dollars—a decrease in quantity of 3,270 tons but an increase in value of $600,000.

Increased quantities of malt liquors and decreased quantities of spirits were imported.

Fifteen thousand nine hundred and seventy-six (15,976) chests of opium were imported, a decrease as compared with the imports of the preceding year of 543 chests with a decrease in value of upwards of $700,000.

Fifty-four thousand five hundred (54,500) tons of sugar were received, a decrease of 1,000 tons in quantity but showing a

decrease in value of over $500,000. The import of Austrian beet sugar fell off by 1,000 tons and of Java cane by 2,500 tons.

The Imports of raw materials aggregated $127,775,295, an increase as compared with 1901 of upwards of $15,200,000.

Tin and tin ore account for $68,600,000, an increase of $11,600,000. Some 22,000 tons of refined tin were imported and 41,000 tons of tin ore.

Copra and gambier show increases of $4,500,000 and $3,200,000 respectively, smaller increases being shown by gum copal, hides, Kachang oil, wax and timber. Decreases are apparent in the imports of gutta percha, petroleum, rattans and Borneo rubber.

The imports of petroleum fell from 2½ million cases in 1901 to 1⅓ million cases in 1902, with a corresponding decrease in value. This may be attributed as, in some degree at least, due to the understanding, or combination as it is usually termed, now existing between the Shell Transport and Trading Company and the Royal Dutch Company. The imports of liquid fuel did not show such expansion as was anticipated, only 26,500 tons having been brought in during the year.

The quantity of coal imported was less by 12½ per cent. for the period under review than for 1901. Cargoes from Japan were less by 88,000 tons and from the United Kingdom by 12,000 tons; from Bengal, however, the receipts were nearly 95,000 tons, an increase as compared with 1901 of 18,000 tons.

Coming next to the class of "Manufactures" under the heading of textiles the Imports of 1902 do not show a satisfactory condition of trade. The nominal increase in value is upwards of one million dollars as compared with the totals of 1901. Converted into sterling at rates of Exchange current during the year, the difference is the other way, there being an apparent falling off in value of £380,000. Taking separately the principal sub-heads we find that while gunnies imported show an increase of value to the extent of $1,743,000, silk goods $530,000 and woollens nearly $200,000, the other principal articles show large decreases. Cotton goods show a falling off of $5,500,000 and apparel, hosiery, &c., $585,000. Cotton piece goods imported were fewer in number by half a million pieces. Sarongs and slendangs fell off some 24 per cent. in quantity, the supply from the United Kingdom being 53 per cent. less than in 1901 and from Continental ports upwards of 22 per cent. less—the trade with Java alone showing an increase. The total value of sarongs and slendangs imported amounted to $4,639,000, representing 240,000 corges of 20 pieces each. Yarns and threads generally show unimportant increases, but in the case of dyed yarn the trade was brisk, the imports amounting to 16,400 bales with a value of $1,520,000. The

value of umbrellas imported shows a decrease; from France the imports of these goods fell off from $265,000 in 1901 to $95,000, while the United Kingdom sent us to the value of $100,000, an increase of $35,000.

Metal manufactures decreased by nearly a million dollars in value, the falling off extending to all the articles in the class with the exception of corrugated iron, zinc and tools. Most of the difference is due, however, to the smaller imports of telegraph materials which were less by $850,000 than in 1901.

"Other" manufactures show an increase in value of nearly half a million dollars, due to increased imports of matches, lamps, joss sticks and joss paper, fancy goods, paints, soap, &c. Decreases are apparent in fireworks, earthenware, glass, oil cake, and mats.

EXPORTS.

Excluding specie and excluding the Inter-Settlement trade, the total value of Exports of the year 1902 amounted to $273,620,000, an increase as compared with the figures of 1901 of $28,550,000. If, however, the values are converted into sterling at average rates of exchange the result is not so satisfactory—giving, as it does, a decrease of some £400,000. It must be borne in mind that a comparison in sterling is not strictly applicable to goods and produce having their origin in countries with a silver currency. Inclusive of the Inter-Settlement trade the Exports reached a total of $285,953,815.

Class A.—Animals, food and drink and narcotics—give a total of $119,200,000, an increase as compared with 1901 of some 12 million dollars. Foodstuffs such as rice, pepper, fish, coffee, wheat flour, sago and tapioca, that show increases under the head of Imports, show practically corresponding increases in the matter of Exports. Opium, sugar and preserved fruits show a falling off.

Exports of coffee increased by 30 per cent., consignments from Bali having risen from 715 tons in 1901 to 1,900 tons in 1903; the average price as declared also shows an increase of 6 per cent.

Tapioca shows a decrease in price in the several classes but an increase in quantity of 21 per cent., chiefly in pearl and flour.

Exports of black pepper increased by 2 per cent., exports of white pepper by 25 per cent.; the average price for black was $31½ the pikul and for white $52·90—both averages being the highest on record.

Four hundred and twenty-six thousand (426,000) cases of pineapples were sent to Europe and America during the year, an increase of 25,000 cases.

The value of "raw materials" exported reached the very large total of $131,830,000, an increase of $18,635,000 over the Exports of 1901. Cotton and silk account for $1,320,000, tin and tin ore $73,800,000, and Straits produce some $56,600,000.

The shipments of tin rose to nearly 54,500 tons, the largest export on record. In Straits produce there appears an increase in quantity in all important articles except rattans and gutta percha; prices also had an upward tendency.

Increased values are marked in the case of copra, gambier, coconut oil, gum copal, gutta percha and hides. Gambier exports, though 2 per cent. in excess of the Exports of 1901, are still considerably lower than the average of previous years; prices, however, advanced 35 per cent.

The quantity of copra exported was the highest since 1899—854,000 pikuls of the value of $8,873,000 as compared with 556,000 pikuls valued at $4,573,000 in 1901. Average prices show an increase of 23 per cent.

Gutta percha, while showing a falling off in quantity, shows an increase of the average price by nearly 20 per cent., the declared value averaging $234½ a pikul. Jelutong rubber and low grades of gutta increased in quantity but the average price fell somewhat. In gum copal there was an export of nearly 6,370 tons, an increase, as compared with the previous year, of over 1,000 tons; the average price also rose by 5 per cent.

Rattans show a falling off in both quantity and value.

Exports of raw hides decreased in quantity by some 4,000 pikuls but the average price rose 30 per cent.

The value of coconut oil exported increased from $1,690,000, in 1901 to $2,032,000 in 1902.

Trade with Other Countries.

The following Table shows how the Trade of the Colony was distributed:—

—	Imports.	Exports.	Total.
	$	$	$
United Kingdom	29,481,982	61,536,208	91,018,190
British Possessions ...	81,352,829	32,608,111	113,960,940
Foreign Countries... ...	200,275,704	179,477,736	379,753,440
Inter-Settlement	11,285,970	12,331,760	23,617,730
	322,396,485	285,953,815	608,350,300

These values are exclusive of bullion and specie, the Imports and Exports of which for the year are under review were:—

	$
Imports	40,538,333
Exports	28,081,121
	$68,619,454

The specie transactions were particularly numerous and heavy towards the close of the year, influenced no doubt by speculations as to the recommendations of the Committee then engaged in considering the question of the currency and the means whereby fixity of exchange might be obtained.

The value of Imports from the United Kingdom reached nearly 29½ million dollars, a decrease as compared with the Trade of 1901 of 3½ per cent. The articles chiefly responsible for this falling off are telegraph materials, sarongs, coal, cotton piece goods, grey yarn, machinery and cotton blankets. There was, on the other hand, an increase in the value of Imports of oilman's stores, soap, brandy, dyed yarn, earthenware, malt liquors, corrugated iron, woollen cloth, and blankets.

The value of Exports to the United Kingdom exceeded 61½ million dollars, an increase of some 15¾ per cent. as compared with 1901. The increase in tin alone would account for the whole difference, but increased values are also visible in the case of pepper, sago flour, tapioca, isinglass and copra. The Exports of gutta and rubbers, gambier, and preserved fruits also show a falling off.

The value of the Imports from the other countries of Europe amounted to $15,396,000, a decrease of upwards of 12½ per cent.

Of the total trade Germany accounted for six million dollars, a decrease of a quarter of a million, due to smaller imports of apparel, hardware, glassware, and earthenware. Beer is the only article of importance showing an increase.

A notable decrease is apparent in the Imports of petroleum from Russia.

From Belgium also came decreased Imports, more especially in the case of earthenware and glassware.

There was a marked falling off in the Imports of umbrellas from France, and an increase in the quantity of brandy imported from that country.

Italy sent fewer textile articles, but more condensed milk—there being a large market here for this article.

The Imports from Spain decreased, more particularly in respect of apparel.

From Austria came increased supplies of dyed yarn, paper and stationery, but in sugar there was a serious falling off, the total decrease from this country amounting to some quarter of a million dollars.

Holland is the only Continental country the total Imports from which show an increase, due to enhanced values of dyed yarn and cotton piece goods brought in.

The value of goods exported to Continental countries exceeded $34,800,000, an increase as compared with the trade of 1901 of upwards of 38½ per cent. The difference is accounted for by increased values of tin, copra, pepper, and coffee shipped to France—the total shipments to that country amounting to close on 10 millions, gutta percha, copra, white pepper and gambier to Germany; tin, gambier, pepper and copra to Italy; copra, black pepper, tin and gambier to Russia; black and white pepper, tin and copra to Austria; copra to Belgium; white pepper to Holland; tapioca pearl to Denmark; and copra to Spain. The Exports of gutta percha to France, of rattans, tin and inferior rubbers to Germany and of tin to Holland show a decrease.

The Trade with the United States showed a notable increase in the year 1902, more especially as regards Exports. The value of goods imported from that country amounted to $1,558,000, an increase of about 14½ per cent., while Exports reached a total of $38,527,000, an increase of more than 17 per cent. The value of the import trade is understated, goods from the United States of America received *viâ* the United Kingdom and Hongkong being in some cases credited to the countries of transit. Increased values are recorded in respect of oilman's stores, hardware, ironware, tools, lubricating oil, miscellaneous manufactures and hard goods. In the matter of Exports there are increases under the head of tin, white pepper, gambier, gum copal, prepared opium and preserved fruits, and decreases in rattans, coffee and gutta percha.

Imports from the Dutch Indies amounted to $48,637,000, an increase of 3⅓ per cent., and Exports to $45,227,000, a decrease of 3½ per cent.

Of the Imports, Java contributed to the extent of $8,524,000 and Sumatra $12,263,000. Java sent larger quantities of coffee and Kachang oil but less sugar, black pepper, rattans and ground-nuts; while from Sumatra came less gutta, raw cotton and tobacco but more black pepper and copra.

Imports from Dutch Borneo reached $10,018,000, a total increase of $370,000. Copra alone shows an increase of $1,100,000, while gutta percha and gutta jelutong from Pontianak, Borneo rubber and coconut oil show a falling off.

Imports from the Dutch Islands and from the Celebes aggregate $9,416,000, an increase of $1,360,000. Increased values are shown in gum copal, tin ore, copra and Bêche-de-mer, while there are decreases in rattans, dammar, petroleum and nutmegs.

The supply of black pepper from Achinese ports was much the same as in 1901, and the quantity of areca-nuts increased.

Copra and coffee from Bali, and gambier and pepper from Rhio were imported in increased quantities. Copra was imported from the Natunas and Anambas groups to the value of $1,400,000, an increase of some half million dollars.

Exports to Java amounted to $14,479,000, a decrease as compared with the trade of 1901, of $1,417,000, the falling off being wholly accounted for by the decrease in Exports of rice.

The value of goods exported to Sumatra also shows a marked decrease, the total being $12,234,000 against $12,979,000 in 1901. More rice, opium and cattle were exported, but less textiles.

To Dutch Borneo were sent goods to the value of $4,720,000, a decrease of $105,000. Exports of rice increased by $537,000, while cotton piece goods decreased by $433,000 and coconut oil by $70,000.

Celebes and the Dutch Islands took from us goods to the value of $6,672,000, an increase of close on one and a half million dollars, due to increased exports of rice, gambier and gunnies.

The value of cotton piece goods and opium to Achinese ports decreased, while increases are apparent in the same articles and in gambier exported to Bali. Exports of rice to Rhio and the Natunas and Anambas groups also show an increase.

Goods were imported from British India to the value of $48,722,000, an increase as compared with 1901 of $5,511,000. The Imports from Calcutta amounted to $22,721,000 and from Burma to $20,123,000.

From Calcutta came increased values of jute gunnies, coal and precious stones, and from Burma rice of an increased value of more than four million dollars. Reduced values of cotton piece goods, manure, oil cake, sarongs and sheep account for a falling off of $384,000 from Madras, while an increase of $424,000 in the case of Bombay is made up from grey yarn, onions, rice and cotton goods.

The Exports to British India reached a total of $13,173,000, an increase of $324,000. The Export trade to Burma shows a falling off in value of $1,442,000, while the trade to Calcutta gives an increase of $947,000. There was increase of $330,000

to Bombay, and a decrease of $265,000 in the value of Exports to Madras. The decrease in the case of Burma is in fish, hides, sugar, raw silk, tin, rice and areca-nuts, and in the case of Madras the decrease is in cotton goods. The increase to Calcutta is made up mainly of tin, areca-nuts and gambier, and to Bombay of sugar, tin, gum benjamin and coffee.

The value of Imports from French Indo-China amounts to $4,979,000, an increase of $124,000. Imports of fish show an increase and raw silk and rice a decrease. The total exports reached a value of $3,369,000, an increase of $743,000, the highest figure attained for many years. There was a marked increase in the values of jute gunnies and petroleum exported, but a falling off in grey yarn and areca-nuts.

Imports from Hongkong were valued at $33,907,000, an increase as compared with 1901 of $5,384,000. There are increases in wheat flour (of American origin), tobacco, silk piece goods, lard, fish, joss sticks, Kachang oil, cottons, raw hides and numerous other articles. The only goods in respect of which any decrease of importance is apparent are fireworks.

The Exports amount to $19,204,000, a decrease of $1,334,000. Tin, sugar, opium, petroleum, black pepper and precious stones are the articles in respect of which there was a falling off, while in values of rice, bêche-de-mer and medicines an increase is shown.

The Import trade with the Malay Peninsula, excluding the Siamese States and including Kedah, Kelantan, Patani, Singora, Tringganu, Johore and the Federated Malay States, reached a total for the year of $85,515,000, an increase as compared with the Imports of 1901 of $15,877,000. Amongst the articles the Imports of which show increased values are tin and tin ore, gambier, pepper, copra, coffee, live animals, and rice. Decreases are apparent in fish, gutta percha and areca-nuts but are of minor importance.

The value of Exports to the same States amounts to $29,883,000, an increase of $3,553,000, the increase being due to higher values of rice, opium and chandu, sugar, wheat flour. Kachang oil, swine, bran, tobacco, fireworks, poultry, apparel, fish, &c., exported. There are decreases in cotton goods and provisions.

Siam and the Siamese States sent us goods to the value of $25,524,000 and took from us goods to the value of $12,904,000, an increase of Imports of $1,366,000 and a decrease of Exports to the value of $448,000. In Imports tin is the article which gives the largest amount of increase; of less amount are increases in hides, cattle, bran, fish, &c. The Imports of rice decreased in value by some $400,000. The decrease in Exports is due to lower values of Benares opium, areca-nuts, gunnies, apparel, corrugated iron and coco-nuts.

The Imports from Australia, valued at $1,567,000 show a small increase, mainly in tin ore and sandalwood. Imports of wheat flour, butter and coal show a falling off. The value of Exports is $1,513,000, a decrease of $152,000, due to reduced Exports of preserved fruits, rice, tapioca pearl and rattans; oil cake, gambier and pepper show a small increase.

Imports from Japan fell in value from $7,797,000 in 1901 to $7,353,000 in 1902. The difference is more than accounted for by the smaller quantity of coal imported; Imports of Matches, cabinetware and umbrellas show an increased value. The value of Exports more than doubled, the increase being from $1,537,000 in 1901 to $3,393,000 in 1902, due chiefly to increased quantities of rice, petroleum and coco-nut oil exported.

GENERAL OBSERVATIONS ON TRADE.

Trade generally may be said to have recovered from the absence of expansion visible in connection with the trade of 1901. Produce from surrounding countries, the shipments of which from the Ports of the Colony had shown a tendency to decrease and about which some apprehension was felt, again came to the Colony in increased quantities for exportation to Europe and elsewhere.

The tonnage of merchant shipping entered and cleared at the various ports shows an increase of 809,508 tons, the increased tonnage in the case of British shipping amounting to 670,969 tons. Shipping of French nationality comes next with an increase of 236,499 tons, followed by Swedish and Norwegian to the extent of 142,264 tons. The tonnage of Russian shipping decreased by 194,633 tons, a decrease nearly equal to the increase in tonnage of this nationality in 1901. Judged by the returns the shipping trade would be said to be in a very prosperous condition.

In connection with the Import trade a feature of the year was the increased, though still comparatively small, quantity of American cotton drills received through the United Kingdom, and a general tendency on the part of the United States of America to meet the requirements of our local markets in an increased degree.

Exchange continued to fall during the year, the minimum being reached in December with a rate of 1*s.* 6⅝*d.* for four months' sight. This naturally led to some dislocation of trade, and during the latter half of the year a policy of extreme caution in trading was visible.

The number of failures among traders in the Bazaar is said to have been abnormally high, the failures being with two exceptions confined to dealers in rough goods and miscellaneous manufactures. This business had proved a very remunerative one during the two preceding years with the result that a glut of stock ensued and a bad year's trading resulted.

Tin ore from Perak, which formerly came to Singapore to be dealt with, is now sent to the smelting works in Province Wellesley of the Straits Trading Company, and the smelted tin is shipped from Penang, in place of from Singapore.

MINES, MANUFACTURES, AND FISHERIES.

Tin continued to be worked during the year at Kesang in Malacca. Steam power was installed and a larger number of men were employed in the mine and good results are hoped for. The total output of alluvial tin from Malacca in 1902 was valued at $702. There are no mines in the other Settlements. The deposits of phosphate on Christmas Island continued to be worked with good results, the amount exported during 1902 being 61,178 tons as compared with 42,125 tons in 1901.

In Singapore the pine-apple industry has continued to prosper, the area planted with pines being still further extended. Notwithstanding this the price of the fruit has risen.

A large Chinese biscuit factory exists and appears to be prospering.

The fisheries of the Colony are very rich and give occupation to a large number of people. Most of the fish caught near Singapore and Penang is consumed fresh. That caught near the Dindings is salted for consumption in Penang and Perak In Penang and Malacca large quantities of a species of shrimp are manufactured into "belachan" a favourite native condiment for eating with curry.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

In Singapore there has been little increase in the matter of cultivation as owing to the enhanced price of land for building purposes comparatively little has been done in opening up new land for cultivation. Coco-nuts are grown in suitable localities along the coast and the prices keep up well. Pine-apples cover most of the accessible hills, and supply the large

tinning trade. Indigo for local consumption is still widely cultivated, but pepper and gambier plantations have practically died out. Although the increase in price of the former has recently been considerable, the cultivation does not show any signs of reviving. Fruit and vegetable cultivation is, if anything, on the increase.

In Malacca, an Agricultural Show was held in the summer, and was very successful, especially in the matter of fruit, the season being a particularly good one. Stock, however, owing to the prevalence of disease among the cattle, and rice, on account of the unusually dry season, were but poorly represented. Rinderpest carried off 560 buffaloes and a sum of $25,000 was advanced by the Government as a loan to the padi planters to enable them to buy fresh animals. Seed padi to the value of $1,500 was purchased in Penang and sold to the planters. Tapioca plantations of large extent still exist in Malacca and are very remunerative. Twenty-seven steam tapioca factories now exist in that Settlement. Coco-nuts are largely grown along the coast and in most parts were tolerably free from the attacks of beetles, except near the town. Steps have been taken to prevent the spread of this pest by appointing an inspector authorized to destroy infected trees, under the system which has proved so successful in Singapore, where the red beetle has been nearly exterminated. The tea estate at Durian Tunggal continues to produce a very good and popular class of tea. The rubber plantations of Para (*Hevea braziliensis*) and *Ficus elastica* are increasing in extent, and excellent samples of both rubbers cultivated and prepared by Chinese were exhibited at the Malacca Agricultural Show. The cultivation of Para rubber promises remarkably well. The soil of Malacca is on the whole very suitable for rubber, and the area planted is steadily increasing. In all the adjacent native states including Johore the cultivation of rubber is spreading very rapidly, and samples from many estates have received high commendation from European rubber firms.

The gutta percha plantations in the Colony were maintained during the year under review and the plants generally thrive well. These plantations were handed over to the Forest Department at the end of the year.

It is proposed to inaugurate a system by which agricultural shows will be held annually at suitable centres in the Colony and Federated Malay States. It is hoped that by this method more interest will be taken in cultivation and a higher class of exhibits shown.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 17,098,762 as compared with 16,289,704 in 1901. Light dues amounted to $189,076·62.

Five hundred and sixty-four new vessels aggregating 16,492 tons were built in Singapore during the year.

LEGISLATION.

No fewer than 37 Ordinances were passed by the Legislative Council during the year 1902. Of these twenty contained amendments of previous enactments.

Ordinance I introduces an important departure in regard to schools, especially vernacular schools, by making attendance compulsory and throwing the responsibility for such attendance on the parents. The Ordinance, which has a suspensory clause allowing of its introduction at different times in different parts of the Colony, has been experimentally enforced in Malacca.

Ordinance IV contains some useful amendments of "The Acquisition of Land for Public Purposes Ordinance, 1890," designed to facilitate purchase and to frustrate attempts to attach a fictitious value to land about to be acquired by Government.

Ordinance VII confers additional powers of search for stolen goods on Police Officers.

Ordinance VIII increases the jurisdiction of the Court of Requests and supplements the machinery for enforcing its decisions.

Ordinance X authorizes and regulates the construction of tramways within the Settlement of Singapore.

Ordinance XI is designed to improve the position of married women by enabling them to hold property independently of their husbands.

Ordinance XII contains a number of amendments to the Penal Code, some of which have been already adopted in India, while others are intended to meet local conditions. Most of these amendments arise from difficulties which have actually arisen in the Courts of the Colony.

An Ordinance (No. XVIII) was passed to enable the Government to lease the Singapore and Kranji Railway to a Company, but in the end it was found desirable that Government should retain the working of the railway in its own hands so this Ordinance becomes practically inoperative.

Another Ordinance of considerable importance is that which amends the Law for the protection of Chinese Immigrants (XIX). This enactment legalizes what had already become to some extent the practice of the Chinese Protectorate in dealing with Immigrants, and provides for the proper protection of the coolie both in transit and on arrival in the Colony.

Provision is made by Ordinances XXXI and XXXVII respectively for facilitating military manœuvres in the Colony and for the licensing of Surveyors.

The remaining Ordinances are of minor importance.

EDUCATION.

The majority of the schools in the Colony are Vernacular Schools for the Malays and are controlled and financed by the Government. Of the others most are managed by private bodies and receive grants-in-aid from Government.

In 29 schools English only is taught, in five English and Tamil, in three Tamil only, in two Chinese only and in 172 Malay only.

The expenditure on Government English Schools was $34,790, on Aided Schools (English, Anglo-Tamil, Tamil and Chinese) $78,086 and on the Government Malay Schools $67,089·28.

The Malacca Training College for Malay teachers continues to make satisfactory progress. The cost for the year under review was $7,062. The Compulsory Attendance Ordinance passed early in the year was enforced in Malacca and has proved a great success, the enrolment in the schools being increased from 2,857 in 1901 to 4,017 in 1902. It has been decided to introduce it into Province Wellesley.

A Commission was appointed early in the year to enquire into the system of education in the Colony. After a careful and exhaustive enquiry, during the course of which all available evidence was collected, the Committee sent in their Report, most of the recommendations contained in which have been adopted by the Government.

The most important step taken on the advice of this Commission was the taking over by the Government of the Raffles Institution at Singapore. A like recommendation with regard to the Penang Free School was not adopted but Government has promised further assistance and support to that Institution. A training school is to be opened in connection with the Raffles Girls' School. It was also decided to reduce the value of the Queen's Scholarships and to award them on the results of a separate examination and not as heretofore on the Senior Cambridge Local Examination. In special cases the value of the Scholarship may be increased. The extension of technical and commercial education was recommended by the Commission, and steps are being taken to carry out their views in this respect.

GOVERNMENT INSTITUTIONS.

Hospitals.

Practically all the General Hospitals in the Colony are under Government management, while the Estate Hospitals maintained by the planters are under Government supervision. The principal causes of admission during the year were malaria, beri-beri and venereal disease, all of which, especially the last-named, were even more prevalent than in 1901.

The total number of admissions to the hospitals, exclusive of the Lunatic Asylum, amounted to 25,624. The number of patients in the Leper Asylum at Pulau Jerejak, near Penang, was greater than in the previous year. A separate ward which has been erected in this Asylum for lepers from Perak has been recently extended to accommodate the increasing numbers sent over from that State.

Beri-beri again appeared during the course of the year in the Singapore Lunatic Asylum. The seaside establishment for female patients organized at Pasir Panjang, continues to give satisfactory results.

Reformatory.

At the end of the year the Reformatory contained 66 boys. Should the numbers continue to increase it will be found necessary to extend the accommodation. The boys were employed in learning carpentry, tailoring and shoe-making, and were

also instructed in Romanised Malay. Three boys were apprenticed as carpenters at Christmas Island and are doing well. The total expenditure on this Institution amounted to $8,089.

Savings Bank.

There was again a large increase in Savings Bank transactions, and the amount standing to the credit of depositors at the close of the year was $538,111, an increase of $51,012 as compared with 1901. The deposits amounted to $416,336, and withdrawals to $379,723.

The total investments at the end of the year amounted to $549,211, the particulars of which are as follows:—

Indian 3½ per cent. rupee paper, $294,316.

Singapore Municipal Debenture Stock, $48,000 bearing interest at 5 per cent., and $99,300 at 4 per cent.= $147,300.

Fixed Deposits at the Chartered Bank, bearing interest at 4 per cent., $28,500.

Cape Stock, bearing interest at 3 per cent., $8,516.

Queensland Stock, bearing interest at 3 per cent., $16,212.

South Australian Stock, bearing interest at 3 per cent., $21,044.

Zanzibar Government 3 per cent. guaranteed loan, $15,535.

Cardiff Corporation 3 per cent. Stock $17,788.

POLICE.

One Superintendent of Police retired early in the year and was replaced by an officer of the Burma Police who had been employed in special work in Siam. A new Assistant Superintendent was appointed by the Secretary of State.

Three Inspectors retired on pension; three Sergeants were promoted to be Inspectors, and one to be Inspector of Arms and Explosives.

Thirty-four European constables joined the force, five being locally enlisted.

Two constables were invalided and one resigned: four were dismissed and one was not re-engaged on the expiry of his agreement.

The strength of the Sikh contingent was well maintained. Recruiting for the Malay contingent was good, the Singapore

contingent being brought almost up to the proper strength by the end of the year.

The detective force worked well, especially in Singapore.

Eight cases of murder and thirty-two of gang-robbery were reported during the year.

A Committee was appointed to report on the defective force of the Colony, and, on their recommendation, certain additions to the force were approved for 1903.

Of the murder cases the most remarkable was that of Mr. Rutherford, the newly appointed manager of the Tangong Pagar Dock Company, fatally stabbed in his own house by Chinese burglars who had entered his house at night. Several of the criminals concerned in this daring outrage were brought to justice, and two suffered the extreme penalty of the law.

VITAL STATISTICS.

The population of the Colony, which was 572,249 according to the Census of 1901, was estimated at 581,219 in 1902. During the year there were registered 14,521 births, of which 7,512 were of male and 7,009 of female children. The number of deaths registered was 24,970 as against 22,876 in 1901.

The death-rate was high, being 42·96 as compared with 39·98 in 1901. This was in a large measure due to zymotic disease which was very prevalent during the year. In Singapore there were 842 cases of cholera, of which 759 proved fatal, while in Penang and Province Wellesley there were 92 cases with 67 deaths. No cases were reported in Malacca.

In Singapore four cases of plague were reported, all of which proved fatal.

There was a large increase throughout the Colony in the number of cases of small-pox, viz.:—

Settlement.	1901.		1902.	
	Cases.	Deaths.	Cases.	Deaths.
Singapore	62	14	159	67
Penang and Province Wellesley ...	41	15	399	111
Malacca	4	1	57	24

The great increase in Penang and Province Wellesley was due to the disease having found its way over the border from Kedah where it was very prevalent.

In Singapore and Penang the general arrangements for sanitation and conservancy are carried out by the Municipalities.

Sanitary Boards with powers under the Municipal Ordinance have been established in the several districts of Province Wellesley.

CLIMATE.

The mean rainfall was, in Singapore 82·28 inches; in Penang 94·56 inches; in the Dindings 89·91 inches; in Province Wellesley 91·27 inches; in Malacca 79·20 inches. The greatest fall in 24 hours was 6·90 inches at Singapore on January 6th.

POSTAL, TELEGRAPH, AND TELEPHONE SERVICE.

During the year under review nearly 11,000,000 articles passed through the Post Office: of these over 450,000 were registered. A fortnightly mail service from Singapore to Europe *viâ* India was established, under a subsidy of $30,000 from Government, and has proved a success.

The Postal Revenue amounted to $308,280 as against $245,516 in 1901. The expenditure was $312,790, an increase of $89,311 over that of the preceding year. The Money Order business experienced the first break in its progress owing to the fall in exchange with sterling and rupee-using countries.

The transactions in sterling amounted to £16,802, in Indian currency to Rs. 1,460,477 and in local currency to $375,893, the total amount thus aggregating $1,707,261 as against $1,789,794 in 1901.

The telegraphs in Penang and Province Wellesley, and also the inland telegraphs in Malacca, all of which are connected with the Government system in the Federated Malay States, are the property of Government.

The telegraph line from Penang to Parit Buntar was duplicated during the year.

Singapore possesses a telephone system worked by the Oriental Electric and Telephone Company which also maintains the

Government telephone lines connecting the Government Offices, Police Stations, &c.

In Penang the length of service telephone lines amounted to 165 miles. The Telephone Exchange which is owned and worked by Government on the metallic circuit system had at the end of the year 153 subscribers' lines and 26 service lines connected.

Malacca possesses 140 miles of service telephones.

MILITARY.

The garrison in Singapore consisted of two battalions of Madras Infantry, two garrison companies of Royal Artillery and other small contingents of His Majesty's regular forces. No militia force exists.

A detachment of the Malay States Guides was quartered in Penang. The military contribution of the Colony in respect of the year 1902 amounted to $1,443,224.

A volunteer Artillery force 118 strong (including reserves) exists in Singapore. Only Europeans are enlisted in it.

A Volunteer Rifle Corps 137 strong (including reserves) also exists, composed of Europeans.

There is one company of Volunteer Engineers composed of Europeans 30 strong. It is proposed to form a second company composed of Eurasians.

There are two companies of Eurasians 56 and 54 strong respectively and two companies of Straits-born Chinese each 62 in strength.

A force consisting of Eurasians and Chinese 60 strong exists in Malacca.

There is in addition in Singapore a bearer and ambulance section composed of nine Europeans and five Chinese (Straits-born) and a Cadet Corps 40 strong. In Malacca there is a Cadet Corps 52 strong.

The Constabulary Force now numbers over 2,000 men, of whom more than 300 are Sikhs.

PUBLIC WORKS.

Certain works commenced in previous years were proceeded with and a considerable number of new projects undertaken. The cost of labour and materials has again advanced.

SINGAPORE.

The following works, though entered in the Budget, were deferred:—

Cavenagh Bridge.

Elgin Bridge.

Cross Street School.

The improvements of the One Fathom Bank Light in the Straits of Malacca.

The purchase of a mud shifter.

Quarters for Colonial Surgeon.

New residences for Government Officers.

Telegraphic communication with Horsburgh Light.

Separate room for sick girls at Poh Leung Kuk.

In addition to the usual works of maintenance of roads and buildings, the following projects were completed during the year:—

Repairs to Horsburgh Lighthouse Pier.

Rebuilding permanent wards, Leper Asylum.

Buildings at Tanjong Rhu reconstructed and adaptd for a police station.

Additional accommodation for constables at Telok Blangah Station.

Office for the Port Health Officer.

Workyards improved and gallows reconstructed at the criminal prison.

New barracks for Marine Department lascars erected on Pulau Brani.

Purvis Creek filled up.

New Ranger's quarters built in the Eastern Division.

Rocks at the entrance to Singapore River blown up.

Buildings on Christmas Island completed.

The Engineering Survey for Harbour Improvements completed.

Quarantine accommodation on St. John's Island extended.

Progress was also made on the following works:—

Alterations to Magistrates' Courts.

Reclamation and Mole near Post Office.

Beech Road reclamation.

Telok Ayer reclamation.

Converting old Lunatic Asylum at Kandang Kerbau into quarters for dressers, &c.

Under roads, streets, bridges and canals, progress was made on the Ayer Rajah and the East and West Coast roads, and new roads were constructed on the Goodwood and Nassim Hill Estates.

PENANG.

The following works and buildings were completed during the year:—

Drill hall for Penang Volunteers.

Exchange and club building.

Extension of native ward, General Hospital.

Re-erection of kennels for Veterinary Surgeon's Department.

Houses for public officers.

Reconstruction of Marine Police and Harbour Master's buildings.

Improvement of water supply to Muka Head Lighthouse.

Quarters for two dressers, Pulau Jerejak.

Quarters for servants, Pulau Jerejak.

Weld Quay reclamation.

Railing Residency grounds along York and Ross roads.

New quarters for gardeners at Residency.

Repairs and extension of sea wall, Leith street end.

Sungei Nibong Vernacular Boys' School.

Enlargement of Chowrasta Boys' School.

PROVINCE WELLESLEY.

Quarters for Assistant Superintendent of Works (one at Bukit Mertajam and the other at Sungei Bakap).

Office for Assistant Superintendents of Works (one at Bukit Mertajam and the other at Sungei Bakap.)

Quarters for Public Works Department clerks (one at Bukit Mertajam and the other at Sungei Bakap.)

Quarters for Veterinary Inspector.

Rest House at Penaga.

Re-erection of Sungei Acheh School.

DINDINGS.

Jetty for boats.
Renewal of Prison and Treasury.
Quarters for additional Forest Staff.
Quarters for three postmen and lighthouse keepers.

Progress was also made on the following works:—

PENANG.

Extension of Government Offices.
New reservoir, quarantine station, Pulau Jerejak.
Goods sheds on new reclamation.
Reclamation north of iron pier.
Reclamation, Sungei Pinang.
New Supreme Court.

PROVINCE WELLESLEY.

Improving water supply northern division.

MALACCA.

Quarters for a Forester and Forest Guards at Ayer Kroh and Selandar and for married police at Tranquerah were erected. Two new Vernacular Schools and two new rest houses were built. Improvements to the Malacca hospital were carried out at a cost of $4,000.

$5,000 were spent in deepening the channel at the mouth of the Malacca river by dredging. The work of widening was completed.

The masonry dam at Gadek on the Malacca river was completed.

There were no new road extensions.

The scheme for clearing the Kesang river was abandoned.

The proposed new Residency ($26,000) was not commenced and it is now proposed to reconstruct the existing one at a cost of $15,000.

Quarters for an Assistant Superintendent of Works at Jasin were commenced.

Heavy rains and heavy traffic did much damage to the country roads in the early part of the year, necessitating a slight extension of the maintenance vote for roads.

47 Indian coolies were imported for road work by the Public Works Department.

Good progress was made with the work of clearing off the surveys in arrear.

IMMIGRATION.

During the year 1902, the largest number of immigrants on record arrived from China. This was largely due to a bad harvest in that country.

The immigration figures for the three last years were:—

Year	Male.	Female.	Total.
1900	188,965*	11,982	200,947
1901	166,956†	11,822	178,778
1902	194,005‡	13,151	207,156

* Of these 8,488 were children. † Of these 8,147 were children.
‡ Of these 9,807 were children.

The disproportion between the sexes continues.

There was still a further decrease in the number of immigrants from Southern India as may be seen from the figures below:—

Immigrants.	1901.	1902.
1. Statute Immigrants	2,785	2,430
2. Free Coolies (with aided tickets)	3,476	1,595
3. Other Immigrants	21,998	16,217*

* Of these 1,567 were children.

17,219 adults and 964 children left the Colony for Southern India.

The agreement with the British India Steam Navigation Company for a fortnightly mail and coolie service between Penang and Southern India was renewed for a further period of three years on modified terms, the Government undertaking to purchase 8,000 tickets annually instead of 10,000 as before. In addition to the fortnightly steamers nine voyages were made by intermediate boats.

The general question of immigration from India received the careful consideration of Government and officers were, in November, sent to India from the Colony and the Federated States to enquire into and report on the matter. Conferences of employers of labour were also held in the Colony and active steps taken to improve the method of recruiting coolies in Southern India and to establish a recognized central agency at Negapatam. A Bill was introduced into Council to amend the existing law for the Protection of Indian Immigrants.

The difficulty in obtaining the requisite amount of labour is largely attributable to the fall in exchange and the increased prosperity and higher wages now ruling in Southern India. The necessity for paying the Indian coolie at a rate equal to that which labourers can obtain in Burma and Ceylon and of taking the rupee and not the dollar as the basis of remuneration has been at length fully recognized by employers of labour, and the proposed legislation embodies these reforms and further provides for the betterment of the condition of the labourer by enforcing the supply of rations where necessary. It is hoped that these reforms will result in a better and more continuous supply of labour and will do away with the abuses which have existed in times past in connection with the importation of Indian labour into the Straits Settlements.

GENERAL OBSERVATIONS.

Sir Frank Swettenham, K.C.M.G., continued to govern the Colony throughout the year.

Mr. W. T. Taylor, C.M.G., arrived in April and assumed the duties of Colonial Secretary.

The Coronation of His Majesty the King, which, delayed by an unfortunate illness, took place in London on August 9th, was celebrated in the Colony with great enthusiasm. A contingent of Volunteers and Malay States Guides from the Colony and the Federated Malay States was sent to England under the charge of Lieutenant-Colonel A. Murray to be present at the ceremony.

The railway from Singapore to Johore was proceeded with, but the difficulty of obtaining suitable labour was greatly felt. The section to Bukit Timah was ready for traffic at the end of the year and was opened on January 1st, 1903. The whole line is now in working order and is proving a great success. Preliminary action was taken to acquire the land necessary for the extension of the railway to the docks, and negotiations were entered into with the Tanjong Pagar Dock Company for

an exchange of land required for this extension for certain foreshore rights.

The proposed arrangements for leasing the railway to a company fell through and Government decided itself to undertake the control and management of the line. The Singapore Tramway Company, although duly formed, had not yet commenced operations at the close of the year. A survey and estimate of cost of the proposed Malacca and Tampin Railway was completed. Negotiations were carried on with the Government of Johore for the continuation of the main line from the Malacca frontier to the town of Johore Bharu. This line, if constructed, will form the last link in the trunk line through the Peninsula, uniting Singapore with Penang.

In Province Wellesley the Prai-Thaiping Railway carried an increasing number of passengers.

It has been decided to extend in a northerly direction the iron pier in course of construction in Penang. The work progressed satisfactorily during the year.

The preliminary survey recommended in connection with the proposed harbour improvements at Singapore was almost finished at the end of the year and plans have now been sent home to Messrs. Coode, Son and Matthews for completion.

The prolonged drought in Singapore in August and September resulted in a great scarcity of water. The Municipal supply had to be carefully husbanded and for a time was cut off daily except at stated hours. Steps are being taken to improve the present reservoir and to develop the resources of the Kallang basin.

A scheme for the payment of Government servants at sterling rates of pay was approved by the Secretary of State, officers already in the service being allowed the option of joining the scheme from the 1st January, 1903. Owing to the great depreciation in the value of the dollar, the question of introducing a fixed standard of currency into the Colony was again discussed. The Secretary of State for the Colonies was addressed on the subject and a Committee with Sir David Barbour as Chairman, was specially appointed by him to enquire into and report on the subject.

The consensus of opinion in the Colony was strongly in favour of fixity of exchange, but nothing had been decided at the close of the year.

The re-survey of the Town and Island of Singapore was commenced but little progress was made owing to the difficulty experienced in engaging competent surveyors.

GENERAL CONDITION OF THE COLONY.

The general prosperity of the Colony continued to increase and appeared to be in no way checked by the fall in the value of silver. This fall, however, had the effect of still further enhancing the already high cost of living. The prices of land and house property, as well as the cost of labour, continued to be very high.

The population of the Colony, augmented by a great number of Chinese immigrants, has steadily increased.

Owing to the high prices of tin, Chinese capitalists have had a very prosperous year while local trade generally was very flourishing.

Agriculture has also prospered and the fruit season has been an unusually good one.

In Penang, the Municipality have entered into an agreement with Messrs. Preece and Cardew for the installation of electric energy in the town for lighting and other purposes.

The lighting of Singapore by Welsbach incandescent burners has been extended and greatly adds to the appearance of the town at night.

STRAITS SETTLEMENTS.

(For Report for 1902 *see* No. 406.)

GOVERNOR SIR JOHN ANDERSON to MR. LYTTELTON.

Government House,
Singapore,
16th September, 1904.

SIR,

I HAVE the honour to forward copies of the Report on the Straits Settlements for the year 1903.

I have, &c.,
JOHN ANDERSON.

---

875 Wt 22378 11/04 D & S 5 19534

FINANCIAL.

The Revenue for 1903 amounted to $7,958,496, the three Settlements contributing as follows:—

Singapore	$4,983,719
Penang	2,451,645
Malacca	523,132

There was an increase of $203,763, as compared with 1902, and $916,813, as compared with 1901. The principal increases were under Railway Receipts, $134,926; Post Office, $124,113 (including Telegraphs); Land Revenue, $51,114; Interest, $36,287; Port and Harbour Dues, $28,947; Fees of Office, $27,762; and District Collections, $12,614.

The principal decreases were under Stamps, $109,611 (but the increase under Stamps sold at the Post Offices was $121,795, due to the introduction of unified stamps, and the use of the latter for revenue as well as for postage purposes); Reimbursements, $42,421; Land Sales, $40,224; and Licences, $17,508.

The Expenditure for the year was $8,185,952, as compared with $7,600,734 in 1902, and $7,315,001 in 1901. The principal increases were:—

Lands and Houses purchased... ...	$532,505
Other Charges	202,582
Personal Emoluments	167,033
Military Expenditure	118,786
Miscellaneous Services	67,220
Works and Buildings, Recurrent ...	14,136

The increase under Lands and Houses purchased is principally due to the acquisition of land for the railway extension. The increased expenditure under Other Charges is due to the cost of coining the new Straits dollars, considerable quantities of which were minted in Bombay, during the year, from old Mexican and British trade dollars. The increase of the staff of the police and the transfer of Raffles Institution to Government control, account for the greater portion of the increase shown under Personal Emoluments. Military Expenditure increases automatically with the revenue of the Colony, while under Miscellaneous Services the payment on account of the Queen Victoria Memorial was the reason for the excess shown. A larger sum than usual was spent under the heading of Works and Buildings, Annually Recurrent, on the improvement and maintenance of the Singapore River.

The principal decreases are found under Works and Buildings, $341,886, owing to diminished expenditure on construction of the Singapore-Johore Railway; Special Expenses, $102,467, mainly due to the expense, incurred in 1902, of sending the contingent of auxiliary forces to represent the Colony at the Coronation of His Majesty the King. Roads, Streets, and Bridges, $50,604; Interest, $45,470, due to the fact that many officers on leave in England were on sterling salaries, and thus did not draw compensation for loss on exchange; expenses under the Volunteer Ordinance, $27,587; and Roads, Streets, and Bridges, Annually Recurrent, $17,540.

Exchange.

The exchange demand value of the dollar during the year exhibited a fairly uniform appreciation. The lowest value, 1*s.* 6$\frac{15}{16}$*d.*, was in January, but it gradually recovered and reached 1*s.* 11$\frac{13}{16}$*d.* in August. During the remainder of the year, however, a slight depreciation was experienced, and the average exchange for the year was 1*s.* 9$\frac{1}{8}$*d.*, an advance of almost 1*d.* on the corresponding figure for 1902.

Currency.

The currency of the Colony consists of Straits, Mexican, and British dollars, circulating at par, and of Government currency notes. British dollars, to the value of $12,990,010 were imported by the banks, as compared with $32,547,677 imported in 1902. Other dollars, to the value of $9,609,096, were also imported by the banks. The annual importation of British dollars, since this piece was first coined in 1895, has been:—

Year.	Amount.
	$
1895	2,201,890
1896	3,623,000
1897	25,704,908
1898	19,492,168
1899	29,349,725
1900	21,571,488
1901	17,281,263
1902	32,547,677
1903	12,990,010

The average banknote circulation of the Colony for the year was $4,176,913, as against $4,966,518 in 1902, the Hong Kong and Shanghai Banking Corporation having continued the reduction of their note issue in pursuance of their agreement with Government.

The average amount of Government currency notes in circulation during each month was:—

Month.	Amount.
	$
February	14,453,117
March	14,732,036
April	15,134,290
May	15,292,490
June	15,291,857
July	15,290,509
August...	15,290,490
September	15,290,490
October	15,313,135
November	15,464,323
December	15,750,200

Municipal Revenue and Expenditure.

The revenue of the three municipalities amounted to $2,580,560 and their expenditure, including sums spent on Loan Works, to $2,823,671.

TRADE.

The import and export trade of the Colony can only be regarded as moderately satisfactory. Expressed in dollars, there was an increase in the value of imports of 8½ per cent., expressed in sterling, of 12½ per cent.; while in the case of exports, there was a decrease, expressed in dollars, of ½ per cent., but expressed in sterling, an increase of 2 per cent.

Expressed in dollars and excluding bullion and specie, the actual figures are:—

—	1902.	1903.
	$	$
Imports ...	311,110,515	337,796,435
Exports ...	273,622,055	272,209,513
Total ...	584,732,570	610,005,948

Bullion and specie were:—

—	1902.	1903.
	$	$
Imports ...	40,372,999	52,364,110
Exports ...	27,851,772	52,637,628
Total ...	68,224,771	105,001,738

The largeness of the transactions in specie is due to fluctuations in exchange and to the coinage of the new Straits Settlement dollars, a large number of British and Mexican dollars having been sent to Bombay to be re-minted and returned in the form of Straits Settlements dollars.

Upwards of 74 per cent. of the Colony's trade was with Singapore, a decrease of 1½ per cent., as compared with the trade of 1902.

The trade was divided among the three Settlements as follows:—

—	Singapore.	Penang.	Malacca.
	$	$	$
Imports	292,096,941	97,752,847	310,757
Exports	249,833,269	74,002,778	1,011,094
Total	541,930,210	171,755,625	1,321,851

These figures are inclusive of specie.

The value of the trade with the United Kingdom amounted to $107,251,422, as compared with $96,254,845 in 1902; the value of the trade with the British Possessions was $175,098,692, as compared with $148,802,625 in 1902; and the value of the trade with foreign countries was $432,657,672, against $407,899,881 in 1902.

The inter-Settlement trade reached a total of $24,728,572 (as compared with $24,012,413 in 1902) distributed as under:—

—	Imports.	Exports.	Total.
	$	$	$
Singapore	7,168,653	7,875,224	15,043,877
Penang	2,645,960	1,621,348	4,267,308
Malacca	3,062,395	2,354,992	5,417,387
Total	12,877,008	11,851,564	24,728,572

The value of imports from countries having a gold currency shows an increase of upwards of 8½ per cent.; and the percentage of increase from countries having a silver currency is but slightly less. But in the matter of export, there is a decrease in value of 2¼ per cent. to gold countries, as compared with an increase of nearly 4½ per cent. to countries having a silver currency.

Imports from the United Kingdom reached a total value of $34,405,431, an increase as compared with 1902 of nearly 17 per

cent.; the value of imports from the Continent of Europe was $18,721,000, an increase of 21 per cent.; while the imports from the United States of America amounted to $2,169,000, an increase of nearly 40 per cent.

From Hong Kong came wheat flour of the value of $3,385,000 an increase of $608,000, for the most part, if not altogether, of American origin.

Exports to the United Kingdom were valued at $55,305,000, a decrease in value as compared with 1902 of $6,230,000, rather more than 10 per cent.; the value of exports to the Continent of Europe was $36,484,000, an increase of $1,654,000, nearly 5 per cent.; and the United States of America are shown as having taken exports to the value of $42,308,000, an increase of $3,781,000, equal to close on 10 per cent., thus maintaining the condition to which allusion was made in the Report for 1902.

Low freights to America, as compared with the Shipping Conference rates to the United Kingdom, are alleged to be responsible for this transfer of trade from the United Kingdom to the United States of America.

From the point of view of the classification of goods, all classes of imports show an increase, whether measured in dollars or in sterling, while exports show a tendency to decline.

Import Quantities and Values.

The imports into the port of Singapore from places outside the Colony, excluding bullion and specie, increased in value by $8,664,000, while imports into Penang increased by $18,000,000 in 1903, as compared with 1902. The large increase in the case of Penang is due to larger imports of tin and tin ore from the States of the Malay Peninsula and Siam, to the extent of some $14,600,000. In 1902 the increase in the value of Penang's imports, as compared with 1901, amounted to $15,000,000, due to the same cause.

Including the inter-Settlement trade, the value of "live animals, food, drink, and narcotics" imported, aggregated $134,472,000 (£11,830,000), as compared with $127,915,000 (£11,000,000) in 1902. Opium, sugar, padi and bran, live animals, tobacco and cigars, spirits, coffee, provisions, wheat flour and sago, all show an increase, while decreased values are shown by fish, rice, tapioca, cocoa, bêche-de-mer, and onions.

The imports of fish amounted to 36,325 tons, a decrease in quantity of nearly 9,000 tons, but an increase in value of nearly 10 per cent.; 28,822 tons of wheat flour were imported, an increase of 1,700 tons. The quantity of rice brought in was

404,540 tons, of which upwards of 90 per cent. was re-exported as in previous years. The imports of opium were 16,699 chests —against which is recorded an export of 13,044 chests and 52,540 lbs. of prepared opium.

Fifty-two thousand five hundred and nine tons of sugar were imported, chiefly from Java and the Malay Peninsula. The imports of beet sugar from the Continent of Europe, which in 1902 showed a decrease of 1,000 tons, showed a further decrease in 1903 of 2,750 tons, the whole quantity of this sugar imported having been only 3,452 tons.

Spirits imported reached a total of 926,000 gallons, an increase of 81,000 gallons; wines also show an increase, principally in ports and clarets; while malt liquors remained more or less stationary at about 830,000 gallons, of which nearly 121,000 gallons were of porter and stout from the United Kingdom; the imports of German beer decreased somewhat, while those of Scotch ale, in bulk, increased.

Tobacco, in its various forms, is responsible for an increase in value of over half a million dollars. Large quantities of cigarettes were brought in from America for consumption by coolies, and for export to Burma, for the most part, the value of these cigarettes and of tobacco in other forms imported from America amounting to nearly $300,000, against $65,000 in 1902. Imports from the United Kingdom were valued at $550,000, much the same as in 1902.

The imports of "raw materials" amounted in value to $140,918,000 (£12,433,000) as compared with $127,776,000 (£10,873,000) in 1902.

Five hundred and seventy-five thousand seven hundred and ninety-six tons of coal were imported, a net decrease as compared with 1902 of some 8,000 tons. The receipts from Calcutta were only 76,000 tons, a decrease of 18,000 tons. Japan supplied 389,000 tons, much the same quantity as in 1902, the United Kingdom, 53,000 tons, an increase of 3,000 tons, Australia, 44,000 tons, an increase of 2,000 tons, and Tonquin, 11,000 tons, an increase of 7,000 tons; of Borneo coal, only 2,000 tons were received.

The imports of petroleum nearly doubled in quantity, the equivalent of 2,435,505 cases, of 65 lbs. each, having been received in 1903, as compared with 1,359,424 cases in 1902. Russian oil, the import of which in 1902 had fallen to 9,000 cases, rose to 722,000. The supply from Sumatra decreased, but from Dutch Borneo, from which no oil had been received in 1902, there came 339,000 cases. American oil imported, increased by 71,000 cases, and Burma oil by 90,000 cases.

Forty-two thousand tons of liquid fuel were imported from Dutch Borneo, an increase of 15,500 tons.

Fifty-three thousand one hundred and thirty-five tons of tin ore were brought to the Colony to be smelted, as against 41,009 tons in 1902. Perak sent 12,000 tons and Negri Sembilan 240 tons more than in 1902, while Selangor sent 900 tons less.

"Manufactured articles" imported were valued at $74,739,000 (£6,619,000), as compared with $66,706,000 (£5,729,000) in 1902. An increase is apparent under all three sub-heads—textiles, metals, and other manufactures.

Cotton piece goods imported reached the large total of 5,265,704 pieces, against 4,552,622 in 1902. 76 per cent. of the total quantity, representing 79 per cent. of the total value, came from the United Kingdom. From the Continent of Europe were received 638,000 pieces of the estimated value of $1,732,000, an increase of 313,000 pieces in number and of $732,000 in value, due principally to increased importations from Italy, Holland, and Germany.

Sarongs, slendangs, and kains show an increase of 34,540 corges, the total importation being 274,596 corges of 20 pieces each.

Imports from the United Kingdom show an increase of 59 per cent., and from the Continent of Europe, a decrease of 12½ per cent., the quantities imported having been 80,000 and 64,000 corges, respectively.

Dyed yarns show a decrease of nearly 5,200 bales, of which 1,890 bales in respect of imports from the United Kingdom, and 3,324 from other European Countries.

Imports of grey yarn were 14,070 bales, an increase of 1,863 —only 1,323 came from the United Kingdom, the rest being of Indian manufacture.

Sewing threads imported were valued at $634,000, of which $574,000 was for goods from the United Kingdom, and $50,500 was the value of imports from the Continental countries of Europe.

Silk piece goods were imported to the value of $5,088,000, an increase of $788,000 as compared with 1902.

Apparel, hosiery, &c., imported reached the very large total of $4,100,000, about one-half of which sum represents the value of imports from Continental Europe, chiefly goods of German manufacture.

Umbrellas were imported to the value of $680,000, towards which Hong Kong and Japan contributed $414,000, France, $108,000, and the United Kingdom, $113,000.

Thirty-two thousand eight hundred pieces of woollen cloths were imported of the value of $752,000, an increase of 7,000 pieces and of $170,000 in value.

Jute gunny bags and cloth from Calcutta were valued at $3,500,000, a decrease of some $2,100,000; the imports of these goods in 1902 showed an increase of $1,743,000.

Manufactures of metal represent a value of $11,033,000 (£977,000), as compared with $8,210,000 (£705,000) in 1902. The increase is distributed among all articles coming under this head with the exception of yellow metal sheathing and copperware. Imports from the United Kingdom show an increase of nearly two million dollars, of which some three-quarters of a million was in respect of telegraph materials, the balance being in respect of increased imports of ironware and hardware machinery, corrugated iron, and brassware.

In respect of goods from Continental Europe, enhanced values appear for ironware and hardware, steel and tramway materials, almost all the rails used for the Singapore tramway being of German manufacture, and shipped from Antwerp. The telephone materials, imported by the company doing business here, have been for some years now brought from Belgium. Bar iron from Belgium is used locally in an increasing degree in consequence of its cheapness.

"Other" manufactures show an increase in value of upwards of two million dollars, the figures being $19,970,000 (£1,767,000) against $17,691,000 (£1,521,000) in 1902. Increases are shown in cement, paints, paper and stationery, carriages, clocks and watches, musical instruments, boots and shoes, and fancy goods generally; while decreases appear in the imports of earthenware and crockery.

In this class, cement was imported to the extent of nearly 132,600 casks, of which 71,175 came from the United Kingdom, 30,000 from Continental Europe, and 32,000 from Hong Kong.

Imports under this head from Japan are of such a character as to offer little opportunity for competition with European countries, but a noticeable feature of the trade is that more attention than hitherto is being given to quality.

Export Quantities and Values.

The value of exports from Singapore to places outside the Colony increased by two million dollars, about one per cent., as compared with 1902, while exports from Penang decreased in value some three and a half millions, upwards of 5 per cent., as compared with 1902.

Class A—"Animals, food, drink, and narcotics"—gives a total of $117,168,000 (£10,313,000), as compared with $119,216,000 (£10,254,000) in 1902. Coffee, tapioca, sago, flour, and black pepper show an increase, while pearl sago, white pepper, and nutmegs show a decrease.

Exports of coffee amounted to 7,011 tons, an increase of 825 tons, as compared with 1902, but the average price shows a decrease of 8½ per cent.

Exports of tapioca increased by 4,252 tons to a total of 60,014 tons, the increase being in flour tapioca.

Exports of sago were 47,372 tons, an increase of 2,044 tons as compared with 1902. Exports of sago flour increased by 66,000 pikuls, while exports of pearl sago decreased by 32,000 pikuls.

Black pepper exported shows an increase of 8,000 pikuls, but white pepper decreased by 23,000 pikuls.

The quantity of nutmegs exported was only 11,600 pikuls, a decrease of nearly 50 per cent. as compared with 1902.

Class B—"Raw materials"—shows a small increase, the value being $132,631,000 (£11,666,000), as compared with $131,831,000 (£11,344,000) in 1902.

Exports of block tin amounted to 53,995 tons, only 503 tons less than the quantity exported in 1902, the largest exportation recorded. Though prices fell during the year till November, when there was a slight reaction, the average export price as declared is somewhat higher than the average of 1902. The total declared value of tin exported was $78,068,497.

Export of copra increased by 2,008 tons—the value, however, shows a reduction, as compared with 1902, of $981,000.

Rattans show an increase in the quantity exported of nearly 5,000 tons; in respect of this article also, prices were lower.

Hides, gum copal and India and Borneo rubbers were exported in increased quantities.

The gutta-percha trade was seriously affected by the low prices prevailing, only 36,000 pikuls having been exported, against 64,000 in 1902. Large stocks are said to be held by Singapore merchants in the Colony and elsewhere.

The exports of gambier fell from 41,289 tons in 1902 to 38,570 tons, a decrease of 2,719 tons; and gums from 25,157 tons in 1902 to 23,688 tons, a decrease of 1,469.

In *Class C*—"Manufactured articles"—the value of the exports in 1903 was $33,819,000 (£2,980,000), as compared with $34,907,000 (£3,003,000) in 1902.

Under the heading of "Textiles" there is a decrease of $1,309,000; "Metals" remained almost stationary; and "Other" manufactures show a small increase of $220,000.

Trade with other Countries.

The direction of trade is shewn in the following table, the value of bullion and specie being included:—

—	Imports.		Exports.	
	Value.	Percentage.	Value.	Percentage.
	$		$	
United Kingdom	40,148,761	10·3	67,102,661	20·6
British Possessions	124,434,805	31·9	50,663,787	15·6
Foreign countries	225,576,979	57·8	207,080,693	63·8
Total ...	390,160,545	100·	324,847,141	100·

Included under the head of "Foreign countries" are the imports from, and exports to, the Protected States of the Malay Peninsula. The figures for 1903 for these States are, imports, $96,892,706; exports, $40,072,331.

Imports of bullion and specie from the United Kingdom were of the value of $5,743,330. The exports of bullion to the United Kingdom were of the value of $11,798,233.

Of articles imported from the United Kingdom, other than bullion and specie, increases are shown under almost all heads except dyed yarn, apparel, earthenware, woollen blankets, and tobacco. The increases were of considerable amount in respect of cotton piece goods ($1,700,000), telegraph materials ($770,000), hardware and ironware ($356,000), machinery ($306,000), and sarongs ($190,000).

The value of articles, other than bullion and specie, exported to the United Kingdom shows the somewhat marked decrease of $6,231,870. The falling off in the value of gutta-percha alone exceeded $7,000,000, and in respect of gambier, there was a decrease of $305,000. On the other hand, india-rubber accounted for an increase of $576,000, gum copal, $384,000, preserved pineapples, $286,000, hides, $274,000, and sugar, $250,000.

Imports of merchandise from Continental Europe reached a value of nearly $18,750,000, an increase, as compared with 1902, of 21½ per cent.

Of the total imports from Continental countries, some 36 per cent. came from Germany, 13 per cent. from Italy, and 12 per cent. from Belgium. The most marked increase in the matter of imports was in respect of Russia, from which country oil to the value of $1,546,000 was received, as compared with

$17,000 in 1902. The imports from Germany show an increase of $754,000, from Italy, $421,000, from Belgium, $382,000, from France, $129,000, and Denmark, $5,000. Imports from Austria show a falling-off of $64,000, from Spain, $48,000, and Sweden, $2,000.

Exports to Continental Europe were valued at some $36,500,000, an increase of 4¾ per cent., as compared with 1902. France took goods to the value of over $10,000,000, Germany took close on $8,000,000, Italy, $6,000,000, and Russia nearly $5,400,000.

Germany took increased quantities of rattans, inferior gutta and sticlac, but less of gutta-percha, copra, and pepper; France took increased quantities of gambier, Borneo rubber, tapioca, coffee, and sago flour, but much less tin and copra, and less white pepper, gutta-percha, and rattans; Italy took tin to the value of $4,574,000; and Russia took increased quantities of coal (consigned to Vladivostock), copra, tin, and gambier.

The United States of America sent to the Colony goods to the value of $2,160,000, an increase, as compared with 1902, of $611,000, and received from the Colony goods representing a value of $42,308,000, an increase of nearly $4,000,000 as compared with 1902, most of the increase being due to increased shipments of tin.

Of the imports, petroleum accounted for $215,000 of the increase, and cigars, $228,000. Tin exported to the United States of America was valued at $27,968,816. Shipments of black pepper, rattans, Borneo rubber, tapioca flour, and sago flour also show an increase.

The shipments of American flour received from Hong Kong were, as has already been mentioned, of the value of $3,385,000.

The value of goods imported from the Netherlands India amounts to nearly $51,000,000. Exports were valued at $40,253,000. In addition, the Colony received from the countries in question, specie of the value of $615,000, and sent them specie of the value of close on $5,800,000.

The import trade shows an increase in the case of Java, Sumatra, Dutch Borneo, the Dutch Islands, Celebes, and Rhio, and a decrease in the case of the Achinese ports, Bali, the Natunas, and the Anambas group.

Java sugar to the value of nearly $5,000,000 was imported; the imports of rice from Java show an increase of nearly $490,000; petroleum and liquid fuel from Dutch Borneo increased by $1,044,000; petroleum from Sumatra, $500,000, and from the Dutch Islands and Celebes by $194,000; gutta-percha from Java decreased in value by nearly $1,200,000, and from Sumatra by upwards of $1,250,000; copra from Java shows a decrease of $728,000, and from Bali of nearly $500,000.

Exports to almost all places in the Netherlands India show a decrease except to Rhio, the Natunas, and the Anambas group. To Java the exports were less than in 1902 by $2,500,000, to Sumatra less by $1,200,000, to the Dutch Islands and Celebes less by $738,000, to Achinese ports by $423,000, and to Bali by $129,000.

Imports from British India were valued at close on $50,000,000, of which Calcutta contributed $21,700,000, and Burma nearly $21,500,000. As compared with 1902, imports show an increase in value of $1,200,000; export values reached a total of $12,583,000, a decrease of nearly $600,000.

The exports to Calcutta, Bombay, and Madras all show decreases, but in the case of Burma, there was an increase of $400,000. A feature of the export trade of the year was the shipment to Calcutta of petroleum of the value of $316,000.

Silver coin to the amount of $12,850,790 was sent from the Colony to Bombay, and was received from Bombay to the amount of $14,436,894.

The value of imports received from French Indo-China was $4,644,000, a decrease of $350,000, due to decreased imports of fish and beans and peas. Exports were valued at $2,142,000, a decrease of $1,227,000, which is more than accounted for by the reduced value of gunny bags sent to Saigon.

The trade with Hong Kong and China reached a total value of $37,629,000 for imports of merchandise, and of $20,801,000 for exports. In imports, increases are shown in silk piece goods, opium, wheat flour, tobacco, dry and salted fish, lard, provisions, samsu, tea, and other articles. In exports there were increases in the value of jute gunny bags by $867,000, petroleum, $625,000, black pepper, $482,000, tin, $330,000, birds' nests, $208,000, and precious stones, $206,000; rice, sugar, sugar candy, bêche-de-mer, sandal wood, and tobacco show a decrease.

The Colony imported from Hong Kong in 1902 gold and silver bullion and specie to the value of $23,805,000, and exported to Hong Kong gold and silver bullion and specie to the value of $2,858,000.

The imports of merchandise from the Malay Peninsula, in which designation are included the Federated Malay States, Johore, Kedah, Tringganu, Kelantan, Patani, and Singora, aggregated $99,000,000, and the exports thereto reached a total of $32,000,000. Under imports, the principal articles showing increased values are, tin and tin ore, black pepper, and tapioca; sugar decreased in value by $348,000, and firewood by $122,000. Under exports there were increases in cotton goods, rice, opium, and wheat flour, and decreases in ironware and cement.

From Siam and the Siamese States the Colony imported goods to the value of nearly $24,000,000, a decrease of $1,500,000, as compared with 1902. Rice imported shows a decrease of $2,750,000, and fish, $640,000, while tin and tin ore account for an increase of $1,300,000. Exports show a total value of nearly $14,400,000, an increase of close on $1,500,000, due mainly to increased exports of opium, cottons, sugar, and curry stuffs.

The value of imports from Sarawak reached the sum of $2,507,000, and exports thereto a sum of $1,743,000. In addition to the imports recorded, there is a very large transhipment trade at Singapore of Sarawak produce for the United Kingdom.

The imports from British North Borneo were valued at $465,000, an increase of $13,000; and the exports at $1,095,000, an increase of $205,000.

Imports from Australia were of the value of $1,425,000, a decrease of $142,000; while the exports thereto were of the value of $1,958,000, an increase of $445,000, due for the most part to increased exports of petroleum, rice, and white pepper.

The value of the import trade with Japan was $8,329,000, an increase of close on $1,000,000, as compared with 1902, the increase being in Japanware, matches, apparel, jinrikishas, and coal; the exports to Japan were of a total value of $5,197,000, an increase of $1,800,000. The exports of rice alone accounted for an increase of $1,000,000, petroleum accounted for $711,000, and tin, $129,000.

General Observations on Trade.

The import trade generally showed fair expansion, but the export trade was not satisfactory.

The position of the Colony as a distributor of produce appears to be weakening somewhat, as a consequence of high freights, absence of competition in shipping, the natural tendency towards trade direct with the various countries, and it may be the growing enterprise of Dutch merchants.

Nevertheless, the tonnage of merchant vessels entered and cleared at Singapore and Penang during the year, shows an increase of 1,249,000 tons. Of this increase, British shipping accounted for 1,040,731 tons, German shipping, 27,522 tons, and American, 9,771 tons.

The important features in the trade of the year were the persistent fall in the market prices of produce, more especially of gutta-percha, the fluctuations of exchange, which increased from a minimum of 1*s.* $7\frac{1}{8}$*d.* for four months' sight in January, to a maximum of 2*s.* $0\frac{1}{16}$*d.* in September, followed by a decline

to 1*s.* 9¼*d.* in December, and the declared intention of Government to attain fixity of exchange with a specially coined local and restricted currency.

The turnover in European goods may not have been so large as in other years. It is, however, claimed that the constant advance in Europe of the prices of textiles was favourable to the holders of low-priced stock, who had a wider margin to work upon, with satisfactory results to themselves.

The demand for rough goods was well maintained on the whole, and merchants are said to have had no reason to be dissatisfied, the market throughout the year being in a sound condition.

The market for Bangkok was poor during a great part of the year owing to the drought and shortness of the Siamese rice crop. Later a speculative demand arose for all classes of goods, following on heavy rains having fallen, which released large stocks of wood in the upper part of the river and allowed them to be floated to the coast, while the extensive areas of submerged padi land gave promise of a large rice crop.

The east coast trade was only moderately satisfactory during the year.

Business to Java ports was confined within narrower limits than usual; and the trade with Dutch Borneo shows evidence of passing more and more into the hands of Java merchants.

The low prices ruling for produce tended to restrict business relations with the natives of the Dutch Archipelago.

The action of the United States Government in placing a high duty on refined coconut oil, is reported to have resulted in a cessation of what appeared to be a promising local industry, the local company being obliged to sell its plant to a firm on the American seaboard.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

In Singapore, the demand for building land and its consequent high price has, to a certain extent, prevented an increase in the cultivation area, but owing to the development of the island by rail and road, some of the more outlying districts are being opened up for rubber, coconuts, &c. The coconut plantations are still remunerative; and the damage caused by beetles is now insignificant. The pineapple preserving industry shows no signs of decrease. The fruit crops of the last two seasons have been very poor, owing, doubtless, to the excessive heat and absence of rain at the usual rainy season. The indigo cultivation still continues to increase a little, and there have

been signs of an increase in pepper cultivation. Vegetables for local consumption show on the whole an increase in cultivation.

No Agricultural Shows were held last year, but in the present year, 1904, a large one, to combine the Federated Malay States with the Colony, is arranged for at Kuala Lumpur. The cultivation of rubber (Para and *Ficus elastica*) increases very fast, chiefly in the Native States, but also in Province Wellesley and the Dindings, and small plantations are springing up about Singapore. It has not increased to any great extent in Malacca, though there is plenty of suitable soil. Not only European planters but Malays are now beginning to take up the cultivation. The growth of the Para trees especially leaves nothing to be desired; no disease has yet appeared. The return of rubber from the trees is quite satisfactory, and the highest prices have been given for parcels of the product sent from the Archipelago; nor is the *Ficus elastica* behind in these respects. *Castilloa*, on the other hand, as well as *Funtumia elastica* are both too liable to injury from insect pests, and quite unsuited for this country.

The demand for the cultivation of cotton in the Empire has induced further attempts to grow this plant remuneratively, and a good quantity of seed has been obtained and is being planted in Province Wellesley and elsewhere. Soil, and especially climate, here are against this plant, but it is hoped to utilise it as a catch-crop while Para rubber and other slower growing cultivations are coming to maturity. It is improbable that it will be remunerative if tried on a large scale.

The gutta-percha plantations in Singapore, Penang, and Malacca are thriving, the plants growing, in most places, well and steadily, but the heavy adulterations of the product on its importation to Singapore, have interfered very considerably with the trade. Patchouli rose very much in price lately, but there was but little cultivation of this plant at the time in the Colony.

The rice crops have been good this year, but there have been complaints of serious damage by the rice-sapper bug in some places. Sugar in Province Wellesley has been doing well, and the cultivation has extended into Perak with good success, though a plague of rats destroyed a great quantity of the canes in one estate.

Attention has been called to the small amount of native cultivation throughout the Peninsula, and it is hoped to be able to take steps to encourage and foster agriculture among the Malays.

SHIPPING.

The total tonnage of merchant vessels, arriving and departing, was 18,404,383, as compared with 17,098,762 in 1902. The amount realised by light dues was $209,649.35.

Six hundred and fifty-four vessels, aggregating 18,252 tons, were built in Singapore in 1903, the figures for the previous year being 564 and 16,492, respectively.

LEGISLATION.

Twenty-nine Ordinances passed the Legislative Council during the year, fourteen of which were to amend previous enactments.

Of the more important Ordinances, No. XV. regulates the importation and sale of morphine; No. XVII. provides machinery for the issue and redemption of Inscribed Stock, should it be at any time expedient to raise loans by debentures or otherwise; No. XIX. amends the "Opium Ordinance" of 1894; No. XXII. enables the Governor to appoint Commissions of Inquiry where necessary; No. XXIV. regulates the import and export of coin; and No. XXIX. provides for the construction of a railway between Malacca and Pulau Sebang, on the Negri Sembilan frontier.

EDUCATION.

Nearly all the schools of the Colony are vernacular schools for Malays, under the direct control of Government. All the expenses of these schools are defrayed by Government, and they provide free tuition in Malay to some 10,000 pupils. The remaining schools are, with the exception of two or three which are controlled and financed by Government, aided schools, managed by private bodies, and receive grants-in-aid from Government.

In 29 schools English only is taught; in five, English and Tamil; in three, Tamil only; in one, Chinese only; and in 171, Malay only.

The net expenditure on Government schools was $51,868, on aided schools (English, Anglo-Tamil, Tamil, and Chinese), $53,087, and on Government vernacular schools, $75,128.

The cost of the Malacca Training College for Malay teachers, during the year under review, was $12,376. The value of

this institution is considerable, and it produces very good teaching material for the vernacular schools. The demand, however, for trained teachers, more especially in Penang and Province Wellesley, is much in excess of the supply, and it will be some years before these schools are staffed exclusively by trained men.

The Compulsory Attendance Ordinance was to be introduced into Province Wellesley on the 1st January, 1904, and it is hoped that it will have the effect of improving the attendance at the schools as it has in Malacca.

It was found impossible to open the Training School for English teachers, which it was intended to establish in Singapore during the year. The idea is not, however, to be abandoned, and it is hoped that the aided schools will see their way to supporting this establishment, by sending junior teachers to attend its classes, as systematic instruction in the science of teaching is one of the deficiencies most noticeable in local teachers.

Several of the principal English schools now have a class for commercial subjects.

GOVERNMENT INSTITUTIONS.

Hospitals.

Practically all the hospitals of the Colony are under Government management, while the estate hospitals, maintained by the planters, are under Government supervision. The total number of admissions to the hospitals, exclusive of the lunatic asylum, was 23,371, as against 25,624 in 1902. Beri-beri again appeared in the prison at Singapore, and for a time the transfer of long-sentence prisoners from Penang prison was suspended. Some of the Singapore prisoners attacked by this disease were sent to Malacca prison, with good effects. In the lunatic asylum at Singapore, 221 patients were admitted. The seaside establishment for beri-beri patients from the lunatic asylum continues to give good results.

Reformatory.

The number of boys in the reformatory at the end of the year was 72. This institution was crowded for some time, and is to be rebuilt on a larger scale in 1904 and 1905. The usual trades were taught, and instruction in Romanised Malay was continued. The expenditure amounted to $8,718, as against $8,089 in 1902.

Savings Bank.

The transactions in this branch amounted to $432,040 (deposits), and $402,061 (withdrawals), as compared with $416,336 and $379,723 in 1902. The amount standing to the credit of depositors at the end of the year was $583,843 (in 1902, $538,111).

The investments at the close of the year stood at $584,178, as compared with $549,211 at the corresponding period of the previous year; the details are as follows:—

India 3½ per cent. Rupee Paper	$333,183
Singapore Municipal Debenture Stock, bearing interest at 5 per cent.	58,000
Singapore Municipal Debenture Stock, bearing interest at 4 per cent.	97,900
Fixed deposits at the Chartered Bank, at 4 per cent.	16,000
Cape Stock, at 3 per cent.	8,516
Queensland Stock, at 3 per cent.	16,212
South Australian Stock, at 3 per cent. ...	21,044
Zanzibar Government 3 per cent. Guaranteed Loan	15,535
Cardiff Corporation Stock, at 3 per cent. ...	17,788

POLICE.

One new assistant superintendent was appointed by the Secretary of State; 11 European constables were enlisted.

Thirteen cases of murder and 42 of gang-robbery were reported during the year. Of the latter, 17 were proved in the preliminary investigation to be false.

VITAL STATISTICS.

The estimated population of the Colony was 588,544, that given by the Census of 1901 being 572,249. 15,509 births were registered, as against 24,970 in 1902.

The death-rate was 39·49 per mille of the population, and would be lower if deaths which occurred at the quarantine station at Singapore and Penang were eliminated. The rate in 1902 was 42·96.

The following table shows the cases of zymotic diseases and deaths therefrom for 1903 and 1902, not, of course, including the imported cases:—

—	Plague.				Cholera.				Small-pox.			
	1902.		1903.		1902.		1903.		1902.		1903.	
	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.
Singapore	4	4	3	3	842	759	226	190	159	67	109	29
Penang...	—	—	--	—	9	7	—	—	304	91	227	57
Province Wellesley	—	—	—	—	41	33	—	—	85	19	258	49
Malacca	—	—	—	—	1	1	—	—	57	22	226	40

In Singapore, Penang, and Malacca, the general arrangements for sanitation and conservancy are carried out by the Municipality, and in the several districts of Province Wellesley by Sanitary Boards, with power under the Municipal Ordinance.

Climate.

The mean rainfall in Singapore was 103·95 inches; in Penang, 103·91 inches; in Province Wellesley, 73·51 inches; in the Dindings, 91·18 inches; and in Malacca, 69·04 inches.

The greatest fall in 24 hours was 8·20 inches at Penang on September 8th.

POSTAL, TELEGRAPH, AND TELEPHONE SERVICE.

Over 13,000,000 articles passed through the Post Office, of which nearly 500,000 were registered.

The postal revenue amounted to $427,259,* as against $308,280 in 1902. The expenditure was $326,929, an increase of $14,139 over that of the preceding year. The money order business recovered, owing to the more favourable rate of exchange with sterling, and showed a gross increase of $359,380. The transactions in sterling amounted to £17,736, and those in Indian currency to Rs.1,873,810, while in local currency business was done to the extent of $428,913, the aggregate being thus $2,066,641, as against $1,707,261 in 1902, and $1,789,794 in 1901.

The telegraphs in Penang and Province Wellesley and the inland lines in Malacca, all of which are connected with the

* Increase largely due to sale of unified stamps for revenue purposes.

Government system of the Federated Malay States, are the property of Government.

The telephone system of Singapore is the property of the Oriental Electric and Telephone Company. This Company also maintains for Government the lines connecting the Government offices and police stations, &c. There is a branch exchange at Johore Bharu, which is connected with Singapore.

The service telephone lines in Penang, 167 miles in length, are owned and worked by Government. The system in use is the "metallic" one. The number of subscribers at the end of the year was 204, and there were in addition 37 service lines.

The Malacca telephone system is also worked by Government, and consists of 186 miles of service lines.

MILITARY.

The garrison in Singapore consisted of two companies of Royal Garrison Artillery, half a company of Royal Engineers, one battalion of British Infantry, and one battalion of Native Infantry, besides Asiatic Artillery (Sikhs), and Malay Submarine Miners, with details of other corps. No Militia Force exists.

A detachment of the Malay States Guides was quartered in Penang. The military contribution of the Colony in respect of the year 1903 amounted to $1,494,611.34.

A Volunteer Artillery Force, 151 strong (including reserves), exists in Singapore. Only Europeans are enlisted in it. Its principal armament consists of a complete battery of 10-pr. B.L. screw guns, utilised with 7-pr. limbers as a field battery with pony draught. It also possesses four Maxim guns (·303), in the use of which it is proficient. This corps is armed with Martini-Metford carbines, and sword-bayonets.

A European Volunteer Rifle Corps also existed, numbering 104 (including reserves), but very little interest was shown in it, and it has been discontinued since the beginning of this year. This corps had in addition to Lee-Enfield rifles and sword-bayonets, two ·303 Maxim machine guns, mounted on infantry field carriages. A Maxim section has been formed to work these guns.

There is one company of Volunteer Engineers, composed of Europeans, 40 strong.

There is one company of Eurasians, 112 strong, and one company of Straits-born Chinese, 116 strong.

A Volunteer Infantry Force, some 150 strong, is also in existence in Penang, and is reported to be efficient.

A Force consisting of Eurasians, Chinese, and Malays, 61 strong, exists in Malacca. This corps is armed with Lee-Enfield rifles and sword-bayonets.

There is in addition in Singapore, a bearer and ambulance section, composed of 9 Europeans and 7 Chinese (Straits-born), and a Cadet Corps, 31 strong, armed with Martini-Metford carbines. In Malacca there is a Cadet Corps, 48 strong.

The Constabulary Force now numbers over 2,000 men, of whom more than 300 are Sikhs.

PUBLIC WORKS.

During the year a considerable number of new projects were undertaken, in addition to carrying on works previously commenced.

SINGAPORE.

There were several large items in the Budget which it was found advisable to postpone or abandon, viz.:—

Cavanagh bridge—abandoned—new bridge to be erected by Municipality with the assistance of Government.

New Marine police station—abandoned—present station to be enlarged.

Raising of Elgin bridge—postponed.

In addition to the usual works of maintenance of roads and buildings, the following projects were completed during the year:—

Whitewashing and repairing Alexandra Road police station.

Painting and whitewashing Government Analyst's office.

Repairing and painting teachers' quarters, Arab Street school.

Raising and maintenance of Beach Road reclamation.

New building for garden office, library, and herbarium building, Botanic Gardens.

General repairs, painting and whitewashing Bukit Timah bungalow.

Improving ventilation of lock-ups, Central police station.

Repairs to roof, Chinese protectorate.

Additional bath-room, Colonial Secretary's bungalow.

Providing ant-proof cupboards for storing records, Colonial Secretary's Office.

Quarters at Bukit Timah for forest rangers.

Internal and external whitewashing main building, Government House.

General repairs to guardian's and orderly's quarters, Government House.

Renewing decayed timbers in flat roofs of main building, Government House.

Special services, Government House.

Draining and levelling ground at back of European block, General hospital.

Erection of unclimbable wire fence between the servants' quarters and the Hindoo Temple General hospital.

Alterations to bedrooms of the nurses' quarters, General hospital.

Providing fire extinguishing apparatus at the General hospital.

Special repairs to wards and limewashing Tan Tock Seng's hospital.

Converting the old lunatic asylum, Kandang Kerbau, into quarters for dressers.

Renewing bathing "pagar," Labrador Villa.

Special services, Pulau Pisang lighthouse.

Special services, Raffles lighthouse.

Erecting a new ward for male patients at lunatic asylum buildings, Pasir Panjang.

Alteration to workshed latrine, at the lunatic asylum.

Painting and whitewashing, &c., all buildings, lunatic asylum.

Erection of quarters at Pulau Brani for the engineer of the Marine Department.

Additional accommodation, signal sergeant's quarters at Fort Canning.

General repairs, painting and whitewashing, Nassim Hill bungalow.

Accommodation for forms and records, Official Assignee's office.

Construction of covered way between cook-house and ward No. 1, Po Leung Kuk buildings.

Erection of shelves to hold official records, General Post Office.

Special services, criminal prison.

Erection of five additional wards for sub-warders, criminal prison.

General repairs to quarters of the Inspector of Prisons, criminal prison.

Special repairs to cell locks and purchase of new master keys, criminal prison.

Overhauling and repairing European warders' quarters, criminal prison.

Replacing open brickwork at the ends of the halls with iron gratings, criminal prison.

Adding verandahs to warders' quarters, new civil prison.

Converting partitions to brickwork, prison cells.

Sanitary improvements to public buildings.

Renewing the floor of the married quarters, Rochore police station.

External painting, St. Andrew's Cathedral.

Replacing punkah ropes with wire in St. Andrew's Cathedral.

Renewing bathing "pagar," Seletar bungalow.

Quarters for the sergeant-major, Singapore Volunteer Corps.

Renewing the fencing on northern boundary, Public Works Department store.

Additional accommodation, Public Works Department store.

Construction of Pierre Perdu wall and fence on Crown land at Tanjong Rhu.

New lighthouse at Fort Canning.

Alterations to Magistrates' Courts.

Completion of Telok Ayer reclamation.

Quarters at Christmas Island for the District Officer, interpreter, and police.

Magazine for detonators at Tanah Merah.

Erection of quarters for the crew of the new Fort Canning light.

Trestle beds for the quarantine station, St. John's Island.

Replacing a concrete or cement floor for the observation ward, St. John's Island.

Progress was made on the following works and buildings:—

New administration block, Central police station and Court of Requests.

Residences for Government Officers.

Reclamation and mole near the General Post Office.

Filling up Tampenis Creek.

Construction of teachers' training school, &c., at New Bridge Road.

Improvement of quarantine station, St. John's Island.

Under Roads, Streets, and Bridges, the following works were completed:—

Metalling Ayr Rajah Road.

Re-metalling approach roads to Fort Canning.

Special repairs to Government House roads, and roads through Government House domain.

Re-metalling Holland Road, one mile.

Extension of Pasir Panjang road (west coast).

Re-metalling roads in Raffles school compound.

Re-metalling Reformatory Road, 1½ miles.

Re-metalling Sepoy Lines roads.

Re-metalling Tampenis Road, 3¼ miles.

Tanjong Katong to Bedoh road (east coast).

Part re-metalling Yeo Chu Kang Road, 3½ miles.

PENANG.

The following new works and buildings were completed during the year:—

Quarters for three subordinate officers at Balik Pulau.

Construction of Chowrasta vernacular girls' school.

Removal of female leper ward from General hospital compound to quarantine camp.

Perak Road (including purchase of site).

Extension of Government Offices.

Receiving room for casualties, General hospital.

Erection of six new servants' quarters, General hospital.

Incinerator, pauper hospital.

Quarters for two dressers, pauper hospital.

New reservoir, quarantine station, Pulau Jerejak.

Grading and turfing the ground round the leper asylum wards, Pulau Jerejak.

New servants' quarters, surface drains and latrines at the leper asylum, Pulau Jerejak.

Erection of goods sheds on the new reclamation.

New Supreme Court.

Mortuary for *post mortem* examination of cattle.

PROVINCE WELLESLEY, NORTH.

Two married quarters, Aur Gading police station.
Quarters for P.W.D. fitters.
Reclaiming Crown land, Butterworth.
New female ward, Butterworth hospital.
New latrines for Bukit Mertajam hospital.
Improving water supply, Bukit Mertajam.
Post and telegraph office, Jalan Bahru.
Renewing coolie lines, Muda Bund.
Re-construction of coolie lines, Sungei Kreh.
Improvement of land at Sungei Ma'Mandin.

PROVINCE WELLESLEY, SOUTH.

Quarters for forest guard, Bukit Panchor.

DINDINGS.

Forest ranger's quarters.

And the following works were in progress:—

PENANG.

Reclamation north of Iron Pier.
Sungei Penang reclamation.

PROVINCE WELLESLEY, SOUTH.

Raising dam and improving water supply, Bukit Panchor reservoir.

IMMIGRATION.

(a.) CHINESE.

The number of immigrants from China ports during 1903 exceeded that of 1902 by 13,165, having reached the unprecedented total of 220,321. An increase is also noticeable in the case of female immigrants, although the disproportion between the sexes, so often mentioned in previous reports, is still very great. The figures for the last four years are:—

Year.	Male.	Female.	Total.
1900	(a) 188,965	11,982	200,947
1901	(b) 166,956	11,822	178,778
1902	(c) 194,005	13,151	207,156
1903	(d) 205,782	14,539	220,321

(a) 8,488 children. (b) 8,147 children. (c) 9,807 children. (d) 8,775 children.

(*b.*) Indian.

The figures for the last three years speak for themselves:—

—	1901.	1902.	1903.
1. Statute immigrants	2,785	2,430	572 (*e*)
2. Free coolies (with aided tickets)	3,476	1,595	1,982
3. Other immigrants	21,998	16,217 (*f*)	19,479 (*g*)

(*e*) 91 came with ordinary tickets and signed contracts on arrival. (*f*) 1,567 children. (*g*) 1,474 children.

Sixteen thousand eight hundred and sixty-eight adults and 964 children left the Colony for Southern India.

GENERAL OBSERVATIONS.

Sir Frank Swettenham continued to govern the Colony until October, when he went on leave to England. Mr. W. T. Taylor, C.M.G., administered the Government for the remainder of the year.

The railway from Singapore to Kranji was opened for traffic at the beginning of the year, and has been managed by Government, proving even a greater success than was anticipated. The extension to the docks could not be undertaken during the year, but matters have now been arranged for the completion of the acquisition of the land, and it is hoped that progress will be made in 1905, if not in 1904.

The Singapore Tramways, Limited, have laid a considerable length of line, and erected standards for the wires in some of the streets of the town. Land for a power station was acquired at Mackenzie Road, and work on the building has been begun.

Preliminary work was done on the Malacca-Tampin Railway.

The Report of the Commission which considered the question of the means by which a fixity of exchange might be brought about was presented to Government, and was printed for the information of the public. The new Straits dollar was first coined, and the importation of the Mexican and British trade dollars was prohibited. The Straits dollar has risen considerably in value, maintaining itself fairly consistently at a premium of about 5 per cent. over the value of the dollar in Hong Kong.

The Municipality of Penang made progress with the scheme for lighting George Town by electricity, but it was found impossible to complete the system by the end of the year, although hopes had been entertained that this would be done.

The new Supreme Court buildings at Penang were completed and declared open, on the 17th December, by the Chief Justice.

A piece of land next to the Free school was purchased by Government, for $30,000, to provide a playground for the school.

The Iron Pier extension continued to make satisfactory progress, and is expected to be completed by August, 1904.

The Prai-Taiping Railway was extended to Seremban in Negri Sembilan, and carried an increasing number of passengers.

The re-survey of the Island of Singapore was continued, and further additions to the staff employed on the work were made in the beginning of the current year. The territory of the Dindings was partly surveyed by the survey staff of the Federated Malay States, and this most desirable work is likely to be completed in 1904.

General condition of the Colony.

The general prosperity of the Colony was good. The prices of land and house property continued high, but there are indications that the prices ruling in 1903 are not likely to be exceeded for some time, if, indeed, they can remain at their then figure.

The population of the Colony, chiefly owing to the largeness of immigration from China, is still increasing.

The prolonged drought in Province Wellesley, followed by an extremely rainy wet season, prevented the padi crop from being a good one, but agriculture generally was very successful. There are now some very promising rubber and gutta-percha plantations in the Colony and the Federated Malay States, and it is expected that this industry will still further make for the prosperity of the Colony.

W. T. Taylor,

Colonial Secretary

Straits Settlements.

20th August, 1904.

COLONIAL REPORTS.

The following recent reports relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

STRAITS SETTLEMENTS.

(For Report for 1903, *see* No. 435.)

THE GOVERNOR to MR. LYTTELTON.

Government House,
Singapore,
July 19, 1905.

SIR,

I HAVE the honour to forward copies of the Report on the Straits Settlements for the year 1904.

I have, &c.,

E. L. BROCKMAN,
Governor's Deputy.

1000 Wt 23792 9/05 D & S 5 22594

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1904.

FINANCIAL.

The revenue for 1904 amounted $10,629,329,* the three Settlements contributing as follows:—

	$
Singapore	6,748,751
Penang	3,210,748
Malacca	669,830

There was thus an increase over the revenue collected in 1903 of $2,670,833, while that of 1902 was exceeded by $2,874,596. The principal increases were under the following headings:—

		$
Licences	by	2,964,030
Railway receipts	"	59,231
Post Office receipts (including telegraphs)	"	52,714
Miscellaneous receipts	"	16,196
Port and harbour dues	"	14,673
District collections	"	13,179
Land revenue	"	11,254

The large increase under "Licences" was due to the re-letting of the excise farm at greatly enhanced rents. It would have been still more marked had it not been found necessary during the year to remit a considerable portion of the monthly sum payable by the farmers.

The chief decreases appear under the headings:—

		$
Land sales	by	285,952
Interest	"	64,451
Reimbursements	"	59,432
Stamps	"	56,318

The first of these decreases is due to the fact that during the year no special sales of Crown land took place, while the last is to a great extent accounted for by the sale of unified stamps at the Post Offices for revenue purposes as well as for postage.

The expenditure for the year was $11,134,865, as compared with $8,185,952 in 1903 and $7,600,734 in 1902. The following table exhibits the items in respect of which increased expenditure was incurred:—

* The figures of Revenue and Expenditure are in some cases subject to audit.

		$
(1.) Works and buildings, special services	by	1,606,375
(2.) Military contribution ...	„	864,738
(3.) Other charges	„	538,310
(4.) Roads, streets, &c., annually recurrent	„	198,698
(5.) Personal emoluments ...	„	88,739
(6.) Miscellaneous services ...	„	78,660

The increase under (1) was chiefly due to the construction of the Malacca-Pulau Sebang Railway and the Singapore railway extension; that under (2) is automatic; to (3) was charged the cost of remitting old dollars for the new coinage of the Colony; while to (4) was transferred in a lump sum the amount for upkeep of Government roads which had hitherto been annually provided under "Roads, Streets, &c., Special Services." It was principally owing to the staff of the Singapore-Kranji Railway having been brought on the establishment in 1904 that item (5) shows the increase noted. A further contribution to the memorial to Her late Majesty Queen Victoria and increased expenditure on the re-survey of Singapore account for the increase in item (6).

The principal decreases are to be found under the headings "Land and Houses Purchased" (by $387,822, less land having been acquired for public purposes), "Roads, Streets, Bridges, and Canals, Special Services" (by $32,616), and "Interest" (by $12,300).

Exchange.

The exchange value of the dollar during the year showed a considerable appreciation, which, however, was not uniform. It went quite suddenly from its lowest value for the year, 1/9$\frac{5}{8}$ in January, to its highest, 1/11$\frac{5}{8}$ in February, and then gradualy diminished in value till it reached 1/10 in April. After the first four months of the year the appreciation was fairly uniform. The average exchange for the year was 1/10$\frac{15}{16}$, an advance of over 1$\frac{3}{4}$*d.* on the corresponding value for 1903.

Currency.

During the year under review the work of re-minting British and Mexican dollars into Straits dollars was continued, until in August it was considered that the time had come for the demonetization of the old coins. This was accordingly effected throughout the Colony and the Federated Malay States on the 31st of that month, since which date the Straits dollar, of which 35,400,576 had been minted, has been the only legal tender.

In all, 35,372,541 British and Mexican dollars had been sent to the mint to be converted, some 3$\frac{1}{2}$ millions of which were sent by the Federated Malay States Government. The

result of the conversion, therefore, is a profit of 28,035 coins, which must be deducted from the total expenses of reminting, viz., $788,180. Government undertook the reminting, delivering to the banks an equivalent number of Straits dollars for other dollars provided by them.

From the beginning of the operations undertaken for the reform of the currency, the import of British and Mexican dollars and the export of the Straits dollar had been prohibited.

On the 5th September the restrictions as to the export of the latter were removed, but the prohibition had to be again brought into force in January of the current year (the whole of the Malay Peninsula, the Netherlands Indies, and Borneo being, however, excepted) owing to the anticipated export of large quantities to China and Hongkong.

In October the Chamber of Commerce represented that the prohibition to import the old trade dollars was having a prejudicial effect on the trade between the Colony and Borneo. It was decided, therefore, to afford temporary relief by suspending the prohibition for three months from the 4th November in respect of the Colony of Labuan, the Territories of the British North Borneo Company, and those of the Raja of Sarawak.

It may be claimed that the change from the old dollars to the new has been effected with a minimum of inconvenience to the public and its commercial interests. Some inconvenience was inevitable, but the ease with which the change of currency has been effected is a matter for congratulation.

The average bank note circulation of the Colony for the year was $2,918,136 as against $4,176,913 in 1904, the Hongkong and Shanghai Banking Corporation having continued the reduction of their note issue in pursuance of their agreement with Government.

The average amount of Government currency notes in circulation during each month was:—

Month.	Amount.
	$
January	16,503,167
February	16,826,076
March	17,002,490
April	17,002,490
May	17,002,490
June	17,052,490
July	17,163,671
August...	17,297,430
September	17,299,365
October	17,229,204
November	17,262,198
December	17,195,365

Municipal Revenue and Expenditure.

The revenue of the three municipalities amounted to $2,863,273 and their expenditure, including sums spent on loan works, to $2,703,915. The usual comparative statements will be found in Appendix B.

The debts of these Boards and the provision made for repayment are shown in Appendix C.

TRADE.

The trade of the year has been far from satisfactory.

Imports of merchandise, measured in dollars, decreased by over 3½ per cent. and exports by over 6 per cent., but when the total amounts are converted into sterling, there are increases of about 4¾ per cent. and 2¼ per cent., respectively, the average exchange having advanced by more than 8½ per cent.

The value of the trade, excluding movements between the Settlements, as expressed in dollars is as follows:—

—	1903.	1904.
	$	$
Merchandise—		
Imports	337,796,435	325,868,032
Exports	272,209,513	255,438,661
Total ...	610,005,948	581,306,693
Bullion and Specie—		
Imports	52,364,110	42,960,031
Exports	52,637,628	57,070,257
Total ...	105,001,738	100,030,288
Grand Total ...	715,007,686	681,236,981

The gross trade, including bullion and specie and the Inter-Settlement or coasting portion, according to Settlements is:—

—	Import.	Export.	Total.
	$	$	$
Singapore	274,674,803	243,556,190	518,230,993
Penang	105,180,266	79,280,187	184,460,453
Malacca	4,087,019	3,357,474	7,444,493
Total	383,942,088	326,193,351	710,135,939

Singapore thus held nearly 73 per cent. of the total trade compared with 75¼ in the previous year.

The value of the trade in merchandise with the United Kingdom amounted to $86,782,309, a decrease of over $2,927,000; with British Colonies and Protectorates, &c., including Sarawak and the Federated Malay States, to $211,042,009, a decrease of over $15,703,000; and with foreign countries $283,482,375, a decrease of $10,068,000.

The Inter-Settlement movements of goods were more than $20,915,000, a decrease of $2,826,000.

The value of imports from countries having a gold currency was nearly 167½ million dollars, and from silver currency countries about 158½ million dollars, there being decreases of one per cent. and 6 per cent., respectively.

Exports to gold countries amounted to over 184⅓ million dollars and to silver countries over 71 million dollars, or decreases of 7 per cent. and 3 per cent., respectively.

The value of imports of goods from the United Kingdom was over 32½ million dollars, a decrease of over 5¼ per cent.; from the continent of Europe over 20 million dollars, an increase of 6¾ per cent.; and from the United States of America about 2⅓ million dollars, an increase of more than 7 per cent.

In these figures are such raw materials as coal and patent fuel from the United Kingdom to the value of close on a million dollars—much the same as in 1903; from Russia, petroleum valued at nearly 2¾ million dollars, an increase of 1⅕ million, while from the United States the value of this article was less than $430,000, or slightly under the previous year's imports.

Of United States productions included under the Hongkong statement, wheat flour was received to the value of close on 2¾ million dollars, a decrease of $657,000.

Exports of merchandise to the United Kingdom were valued at under 54¼ million dollars, a decrease of less than 2 per cent.; to the continent of Europe close on 34 million dollars, a decrease of 7 per cent.; and to the United States of America nearly 35 million dollars, a decrease of over 17¼ per cent.

Import Quantities and Values.

Imports into Singapore from all places, including bullion and specie, amounted to nearly 274 $\frac{7}{10}$ million dollars (£26,212,000), a decrease of 24⅗ million dollars, but in sterling of £185,000 only.

Of the decline, bullion and specie accounted for 14 $\frac{3}{10}$ million dollars, and foodstuffs, animals, drinks, and narcotics, and Straits produce, &c., for the balance.

Unmanufactured metals, including tin and tin ore, showed a small increase, as well as raw textiles; and all manufactured articles fell off by $232,000 only.

Penang imports from all other ports were valued at about 105½ million dollars (£10,081,000), an increase of nearly 4⅘ million dollars, and in sterling an increase of £1,193,000.

Bullion and specie accounted for an increase of 8¼ millions, however, merchandise declining by under 3½ millions, due chiefly to lower values of unmanufactured metals, including tin and tin ore, and of manufactured articles imported, especially textiles.

A rise in import value to Malacca of $715,000 (£94,000) is accounted for by materials brought in for the Malacca-Pulau Sebang Railway.

Under animals, foods, drinks, and narcotics, including the Inter-Settlement trade, the value imported amounted to nearly 128¾ million dollars (£12,336,000), a decrease of nearly 5¾ millions, but in sterling an increase of £506,000.

Decreases are observable in the values imported of rice, opium, coffee, wheat flour, tapioca, medicines, spirits, padi, and lard.

Increases are seen in the values of spices, sugar, fish, and bran imported.

Of imports into the Colony apart from the Inter-Settlement movements, rice rose by 73,500 tons, or over 18 per cent., but the value decreased—the average price having fallen by over 20 per cent.

Opium imports declined by 3,725 chests and exports by 2,006 chests, the total received being 12,974 chests, while 11,038 were sent out, as well as 27,333 lbs. of prepared opium.

The average price of the Benares description of opium rose by 11 per cent.

Imported sugar reached over 60,300 tons, an increase of nearly 7,800 tons, Java sending about 44,760 tons (an increase of 6,400 tons), and Perak, in the Federated Malay States, about 12,260 tons (an increase of over 2,675 tons), while European beet fell to 2,500 tons, a decrease of 893 tons.

Sugar candy manufactured in Singapore sent to Hongkong amounted to nearly 8,400 tons, an increase of 2,740 tons.

Dry and salted fish imported into the Colony rose to nearly 41,000 tons, an increase of 4,500 tons, and showed a value of nearly 7$\frac{3}{10}$ million dollars, an increase of over half a million, the average price slightly increasing.

Wheat flour imports reached about 25,100 tons, a decrease of 3,700, and the average price slightly fell. Nearly the whole is of American production and from Hongkong.

Dry and salted provisions, including biscuits, butter, cheese, oilmen's stores, and other provisions, amounted to over 5⅔ million dollars, a decrease of $145,000.

From Australia, butter to the value of $104,000 was imported, a decrease of about $40,000; and from the continent of Europe to the value of $225,000, an increase of $13,000.

Biscuits were valued at $338,000, a decrease of $62,000; of which value the United Kingdom sent $310,000, a trifling decrease, while from Germany alone $17,000 value was received compared with $76,000 in 1903 and $170,000 in 1902, large over-trading having taken place.

Wines imported fell off by nearly 15,000 gallons, or 15 per cent.

The imports of tobacco reached 7,747 tons, an increase of 1,340 tons. Supplies are principally from China and the Dutch Indies.

There has been a fair demand from the United Kingdom for this article at good prices.

Spirits received were much the same as in 1903, about 926,000 gallons, but the dollar value fell owing to the higher average exchange.

The United Kingdom sent nearly 45 per cent. of the malt liquors imported amounting to 851,000 gallons, an increase of 20,000, and Germany 50 per cent., but included in the former percentage are porter and stout, almost entirely of British production.

Nearly 19,600 tons of raw sago to be manufactured were brought in, an increase in quantity of 356 tons.

Live stock imported fell off by 18,500 head of cattle, and the numbers of imported sheep, goats, horses, and pigs also declined.

Other imported foodstuffs showing increases are beans and peas, onions and garlic, vegetables and salt; while the value of curry stuffs and fruits slightly fell off as well as that of lard and medicines.

The imports of raw materials into the three Settlements were nearly 135$\frac{7}{10}$ million dollars (£13,005,000), a decrease of over 5¼ million dollars, but an increase in sterling of £572,000.

Tin and tin ore accounted for a decrease of nearly 2½ million dollars, and other raw materials and Straits produce for

close on 3 millions, chiefly seen in smaller values of gambier, gutta percha, copra, rattans, coconut oil, illipi nuts, timber, and sandalwood, but there was a very large increase in petroleum and, to a smaller extent, in rubbers (including jelutong), ground-nuts, patent fuel, gum, sticklac, and hides. As the prices of all these articles fell off heavily, the reduction in value is easily explained.

Tin ore imported into the Colony, apart from the Inter-Settlement movements, reached 58,125 tons, an increase of about 9½ per cent. Increased supplies were received from the Federated Malay States and Australia, but fell off from the Dutch Islands.

Coal received amounted to nearly 620,000 tons, an increase of 44,000, Indian descriptions increasing by 50,000, and Japanese by 12,000. From the United Kingdom, 43,000 tons show a decrease of 10,000, covered, however, by a new import of patent fuel. Australian supplies fell by 6,000 tons.

The quantity of petroleum received, much of which is, however, on order for further instructions, reached an equivalent of 3,880,000 cases, an increase of 1,445,000, of which total 2,816,000 were re-exported.

There were increases from all sources, especially Russia and Sumatra, the United States of America showing little fluctuation in the quantity sent.

Liquid fuel was brought in to the extent of 36,416 tons.

Manufactured articles imported into the Settlements were valued at about 72 $\frac{7}{10}$ million dollars (£6,964,000), a decrease of over two million dollars, but in sterling, an increase of £346,000.

Textiles fell off by over 1¾ million dollars, but increased in sterling by £148,000. Manufactured metals gave practically the same dollar value, but an increase of £82,000, and miscellaneous manufactures a decrease of $330,000 and an increase of £115,000.

Under textiles, cotton and silk piece goods had immense declines, and yarn and apparel also fell in value, but sarongs and jute gunnies had large increases.

Cotton piece goods brought into the Colony reached over 4¼ million pieces, a decrease of nearly one million, and in value of nearly 1¾ million dollars.

From the United Kingdom nearly 3⅔ million pieces, valued at 12¼ million dollars, were received, a decrease of 636,000 pieces and over 1⅓ million dollars, representing 80 per cent. of the total value imported, an increase of 1 per cent.

From the continent of Europe 444,000 pieces, valued at over 1½ million dollars, were received, being decreases of 194,000

pieces and over $206,000. Consignments from India and the Far East also fell off.

Yarn imports fell off, grey twist being more and more an Indian production, and dyed yarn met with a dull market.

Of the total value of $661,000 of sewing thread received, the United Kingdom sent, to the value of $573,000, exactly the same as in 1903, while the Continental imports increased by $30,000.

Cotton blankets from the United Kingdom increased by 70,000 pieces, and from the Continent by 83,000.

Handkerchiefs fell off from both sources.

Apparel, hosiery, and millinery from Germany, valued over $1\frac{3}{10}$ million dollars, a decrease of $317,000, but other Continental countries sent increased supplies. The United Kingdom trade decreased by $24,000.

Sarongs, slendangs, and kains imported reached nearly 347,000 corges (bales, usually of 20 pieces), an increase of 72,000 in quantity, and of nearly $1\frac{1}{3}$ million dollars in value, the quantity from the United Kingdom rising by over $45\frac{1}{2}$ per cent., and from the Continent by over 42 per cent.

Jute gunnies from Calcutta, valued over $4\frac{1}{2}$ million dollars, an increase of over one million.

Hats and caps and umbrellas decreased in value, but the former showed increased values from Italy, and the latter from the United Kingdom, which has now entered vigorously into this business.

About 30,000 pieces of woollen cloth, valued at $694,000, were imported, a slight decrease compared with 1903.

Manufactured metals imported into the Settlements show little fluctuation, with the exception of tramway and railway materials, which rose by nearly a million dollars, but telegraph and telephone materials fell by three-quarters of a million dollars.

Of European metals, the United Kingdom sent to the value of over $6\frac{3}{4}$ million dollars, a decrease of $132,000, the Continent of Europe over $2\frac{7}{10}$ millions, an increase of $48,000; and the United States of America a value of $255,000, a decrease of $40,000.

Imports fell in machinery, nails, corrugated iron, copper, and brass, bar and nail rod, steel tools, and zinc sheeting; but enhanced values are observable in gas and electric lighting materials, tin plates, tinware, yellow metal sheeting, and zinc-ware.

There was a fair increase in sales of Belgium bar iron as well as nail rod.

The fall in corrugated iron is accounted for by less demand from Bangkok, that market having been largely overstocked in the previous year, and the sales of wire nails suffered from a like cause, resulting in a scarcity towards the close, when fair prices were obtainable.

Improved packing in this article is observable on the part of American manufacturers.

Increased quantities of tin plates were brought in to meet Japan and Hong Kong demands.

Taking the twenty principal miscellaneous manufactures, exclusive of textiles and metals, it is seen that the United Kingdom sent to the value of over 3⅕ million dollars, and the Continent over 3¾ million dollars, a decrease from the mother country of $62,000, or 2 per cent., and an increase from the Continent of $577,000, or 18 per cent.

Imports from the United Kingdom fell in the following articles:—Cabinetware, clocks and watches, earthenware, fancy goods, glass, leatherware and saddlery, paper and stationery, musical instruments, perfumery and soap and soda, and increased in gunpowder and dynamite, cement, lamps, boots and shoes, paints, detonators and fuzes, and carriages and carriage materials.

Continental supplies increased largely in cement, clocks and watches, earthenware and lamps, and to a smaller extent in nearly all other articles except cabinetware, paper and stationery, and perfumery.

Other manufactured articles of the same description obtained from European countries are chiefly beads, books, bricks and tiles, candles, photographic materials, playing cards, jewellery, the imports of which from the United Kingdom valued $233,000 and from the Continent $330,000.

Noteworthy points are the business now done in French tiles for roofing and flooring purposes, the increase of candles from Burma, and of cement of Belgian and Austrian origin, the qualities of which have considerably improved.

Export Quantities and Values.

Exports from Singapore to all places, including bullion and specie, valued over 243½ million dollars (£23,331,000), a decrease of nearly 14⅕ million dollars, but an increase in sterling of £572,000.

Of the decline, bullion and specie accounted for nearly 2⅗ million dollars, foodstuffs, &c., for 5⅘ million dollars, and

Straits produce and other raw materials for over 6½ million dollars.

Manufactured articles, tin, and tin ore had increased values.

Penang exports to all other places valued 79 $\frac{3}{10}$ million dollars (£7,599,000), an increase of nearly 3 $\frac{7}{10}$ million dollars and in sterling of £928,000, bullion and specie having accounted for an increase of nearly 10½ million dollars, while merchandise fell off by 6 $\frac{4}{5}$ millions.

Foodstuffs decreased by over 4 $\frac{3}{4}$ millions and tin and tin ore by nearly two millions.

Malacca exports declined in tapioca by $240,000, but there was a large increase in the value of pigs sent off.

In foods, drinks, and narcotics the value of the trade, including the Inter-Settlement portion, was over 106½ million dollars (£10,211,000), a decrease of 10 $\frac{3}{5}$ millions and in sterling £103,000.

The decreased values were principally rice by over 7½ million dollars and opium by over one million, and largely in tapioca, spices, sago, and coffee as well as to a less extent in live animals, medicines, spirits, malt liquors, and curry stuffs.

Increases are observable in tobacco and fish, and to a much smaller extent in tea.

The trade in coffee fell off by 23 per cent. or 1,600 tons although prices were distinctly better.

Spices sent out amounted to over 52,500 tons, a decrease of 2,200 tons.

Black pepper showed an export of 13,700 tons, a decrease of 375 tons, but white pepper exports rose by nearly 1,850 tons.

Arecanuts and cloves fell off but nutmegs, cubebs, and mace showed increase volume.

Exports of sago reached 47,800 tons, an increase of less than 500 tons, and tapioca of all kinds nearly 55,000 tons, a decrease of over 5,000 tons.

Of preserved pineapples 448,000 cases were sent off valued at close on 2½ million dollars, more being sent to all European markets.

Raw materials were exported (including Inter-Settlement shipments) to the value of 124 $\frac{1}{5}$ million dollars (£11,909,000), a decrease of over 8 million dollars but an increase in sterling of £243,000.

Of this decline in dollar value the class including Straits produce fell off by nearly 6 $\frac{7}{10}$ million dollars, chiefly apparent

in lower values of the following sent off:—Gutta percha, gambier, rattans, copra, raw hides, precious stones, planks, and gum copal.

Increased values are apparent in petroleum, and in Borneo, India, and low-class rubbers and ground-nuts exported.

Tin and other unmanufactured metals accounted for a fall of $1\frac{9}{10}$ million dollars.

Tin exports rose to nearly 56,600 tons, an increase of 2,500, the United Kingdom receiving 52 per cent. of the total compared with 46½ per cent. in the previous year, and the United States of America 30 per cent. compared with 34¾ per cent.

The average price locally declined by nearly 7½ per cent.

Copra exports with a total of 40,500 tons fell by 23½ per cent., Macassar having in recent years become a collecting centre for the article and having facilities for direct shipments, excessive freights having to a great extent driven this trade away from Singapore.

Gambier exports fell to 37,900 tons, a decrease of 660 tons, a lower export than has ever been recorded.

In the principal gums exported altogether there was an increase of nearly 2,000 tons, Jelutong rubber, low-class gutta, with Borneo and India rubber alone showing increased volume.

Gutta percha, gum damar, sticklac, vegetable tallow, and gum copal all show declining quantities.

The demand from Germany for gutta percha of fair quality for cable purposes has been the only factor evidencing some life in the trade.

The average price of gutta exported fell by 40½ per cent.

For the first time Para rubber finds a place in the trade returns and, judging from the high prices obtained, rubber planting, which has now attracted the attention of many planters in the Colony and in the Federated Malay States, shows promise of being, for some years at least, a profitable undertaking.

Imports of raw hides rose but exports fell off.

Rattans with an export of 25,400 tons showed a decline of 9½ per cent.

Exports and manufactured articles, including Inter-Settlement trade, valued $34\frac{2}{10}$ million dollars (£3,300,000), an increase of $580,000 and in sterling of £321,000.

The three sub-divisions, textiles, metals, and miscellaneous goods, all show small increases in dollar values.

Trade with other Countries.

The trend of trade is seen in the following statement, the value of bullion and specie and Inter-Settlement trade being excluded ('000 omitted).

Country.	Imports.		Exports.	
	Value.	Percentage.	Value.	Percentage.
	$		$	
United Kingdom ...	32,580	10·	54,202	21·2
British Possessions and Protectorates.	156,439	48·	54,603	21·4
Foreign Countries	136,949	42·	146,633	57·4
Total ...	325,868	100·	255,438	100·

Sarawak and the Federated Malay States are included under British Possessions and Protectorates.

Imports from the United Kingdom as previously stated showed a decrease of over 5¼ per cent. compared with an increase of 16¾ per cent. in 1903 over 1902.

The principal decreases are apparent in cotton piece goods by over 1⅕ million dollars, telegraph materials by close on three-quarters of a million, dyed yarn by over one-third of a million, coal by nearly one-quarter of a million, machinery by over $200,000, hardware and ironware by over $150,000, provisions of all kinds by nearly $130,000, and brandy by over $105,000, followed by whisky, perfumery, drugs and chemicals, corrugated iron with smaller declines.

Increased values were received of tramway and railway materials by nearly $880,000, of sarongs by $370,000, patent fuel by $205,000, tobacco and cigars with gas and electric lighting materials by $145,000 each, and tin plates by $111,000.

Exports to the United Kingdom showed a decrease of less than two per cent.

The heaviest falls were gutta percha by nearly 3 3/10 million dollars, sago flour by $580,000, gambier by over half-a-million, gum copal by over $370,000, tapioca by $310,000 and hides by $275,000, followed by rattans and sugar.

Increases were seen in the value of the following articles:—Tin by nearly 3⅔ million dollars, India rubber by nearly three-quarters of a million, Borneo rubber by $132,000, and nutmegs by $116,000, followed by benzine and pepper with smaller increases.

Imports of merchandise from Continental Europe as previously stated exhibited an increase of more than 6¾ per cent.

Of the total imports Germany held 31¾ per cent., a decrease of 4¼ per cent., Italy 13¾ per cent., an increase of ½ per cent., Belgium 11½ per cent., a slight decrease compared with their proportions in the previous year.

The largest increase was from Russia, seen in petroleum brought in and accounting for an increase of nearly 1½ million dollars, which about covers the entire Continental increase.

German and Austrian values declined but Italian and French values rose as well as those from the other European countries.

The decreases in German goods were chiefly in apparel, hosiery, &c., by $317,000, tramway materials by $132,000, and nails by $120,000, followed by provisions and biscuits.

Cement, however, increased by nearly $180,000 in value, crockery by $112,000, and lamps, clocks, and watches, and sugar by smaller sums.

Italian imports rank next in importance, the increases of which are shown in sarongs by nearly $200,000 as well as apparel and clocks and watches by smaller rises.

There were no important decreases.

French imports improved in value in various small items such as brandy, and bricks and tiles, but silk piece goods fell off by $80,000.

Imports from Holland rose in sarongs and cotton blankets but there was a large decrease in cotton piece goods imported and also declines in cigars and gin.

Increased imports from Belgium were, in milk by over $100,000 and in tramway materials by $72,000, but perfumery fell of by $77,000. From Spain and Denmark the only noticeable features are increases in apparel from the former country and cement from the latter.

Exports from the continent of Europe exhibited a decrease of 7 per cent.

The most marked declines were to Russia, Italy, Spain, Austria, Belgium, and Germany. Export declines in value to Russia were copra by $1,450,000, tin by $449,000, coal to Vladivostock by $322,000, followed by gambier, black pepper, and rice with decreases of over $100,000 each. To Italy, tin fell by nearly 1⅓ million dollars and copra by $110,000 while black pepper rose by $87,000. Exports to Spain fell in copra by over $720,000 and in gambier by $55,000. To Austria exports fell in tin by $145,000 and in pepper and copra to a smaller extent. Copra and gambier to Belgium showed decreased values of $277,000 and $106,000 respectively.

Exports to Germany fell in rattans by $677,000, in gutta percha by $572,000, in gambier by $139,000 and in copra by $127,000, but increases were seen in tin by $405,000 and in white pepper by $326,000 followed by oil cakes and Borneo rubber with smaller advances. To France, Holland, Denmark, and Sweden were sent increased values. Copra to France advanced by $1,166,000, tin by $1,068,000, Borneo rubber by $291,000, and gutta percha and white pepper by $184,000 each, but declines were seen in coffee by $396,000, illipi nuts by $182,000, and gambier by $173,000. Holland took increased quantities of tobacco and cigars, from Penang the increases in these articles being valued at $838,000 in the case of the former and $193,000 in cigars. Raw hides, however, fell off by $176,000 and rattans by $88,000. To Denmark, black pepper rose by $147,000 and copra by $108,000.

The United States of America sent to the Colony as already noted an increase of more than 7 per cent. chiefly in increased values of tallow and lard, lubricating oil, and preserved fruits. Exports to the United States of America show a decrease of over 17¼ per cent. observable in the values of the following articles:—Tin by nearly five million dollars, gambier by over a million and-a-half, pepper by nearly $800,000, rattans by $460,000, and tapioca by $163,000, followed by nutmegs, sago flour, prepared opium, pineapples, and coconut oil. The following articles, however, increased in values sent:—Borneo rubber by $428,000, Jelutong and other low-class rubbers by $226,000, gutta percha by $113,000, and gum copal by nearly $100,000.

British Indian and Burmese imports were valued at over 48 million dollars, a decrease of less than 3¾ per cent., declines being seen from Burma with a trade of over 19¼ millions by nearly 2½ millions, and from Madras with a trade of about 3 7/10 millions, a decrease of $620,000. Imports from Culcutta valued nearly 22⅔ million dollars, an increase of $660,000 and from Bombay nearly 2¾ millions, an increase of $277,000. Rice from Burma ports fell off by over 2⅓ million dollars, precious stones by $368,000, followed by birds' nests, fishmaws, and curry stuffs, with decreases between $60,000 and $80,000 each. Advances, however, were seen in bran by $257,000, petroleum by $191,000, and beans and peas by $178,000. From Madras declines are apparent in rice by $445,000 and cattle by $230,000 followed by cotton piece goods, oil cakes, and goats' skins with decreases of about $60,000 to $70,000 each, but sarongs, slendangs, and kains increased by $374,000.

The advance in imports from Calcutta is accounted for chiefly by gunnies with an increase of nearly $1,010,000, Benares opium with $570,000 increase and coal with $416,000 increase, but against these was a decline in Patna opium of more than 1⅓ million dollars followed by precious stones with over

$100,000 and grey yarn with $89,000. From Bombay, Persian opium rose by $117,000, grey yarn by $112,000, preserved fruit by $78,000, and onions and garlic by $56,000, while jewellery and curry stuffs showed small declines.

Exports to British India and Burma valued $11,450,000, a decrease of less than 9 per cent., Burma, Madras, and Bombay showing declines and Calcutta alone a trifling increase.

To Burma ports decreases are fairly numerous, the largest being sugar by $270,000, cigars and earthenware by $143,000 each, and provisions by $110,000, followed by matches, curry stuffs, and raw silk with much smaller declines. There was an increase of $347,000, however, in dry and salted fish sent out. Madras fluctuations are unimportant. To Bombay, exports fell in tin by $196,000, followed by coffee with $73,000. The increase to Calcutta of $668,000 value in petroleum leaves numerous decreases in most other articles, the largest being nearly $400,000 in the value of areca-nuts sent, followed by tin with a decline of $95,000, gambier with a decline of $55,000, and other smaller decreases.

Imports from Hong Kong and China approached 32 million dollars, a decrease of $5\frac{7}{10}$ millions, of which from Hong Kong, silk piece goods fell by a value of $1,570,000, Persian opium by $1,012,000, wheat flour by $657,000, fireworks by $380,000, cotton piece goods by $296,000, medicines by $285,000, tea by $251,000, lard by $240,000, paper by $237,000, beans and peas by $220,000, provisions, tobacco, and earthenware by close on $200,000 each, dried fruits and fish by nearly $160,000 each and lamps by $121,000.

The only increases from Hong Kong were cabinetware by $137,000, onions and garlic by about $110,000, and apparel, hides, and preserved vegetables by about $100,000 each. From China imports nearly all show increases, most marked in tea by an advance of $187,000, joss sticks and joss paper by $170,000, provisions by $118,000, preserved vegetables by $115,000, and twine by $92,000.

Exports to Hong Kong valued nearly $18\frac{1}{5}$ million dollars, a decrease of nearly $2,630,000, seen in decreased exports to Hong Kong of rice by $1,170,000, Benares and Patna opium by $714,000, bêche-de-mer by $444,000, black pepper by $302,000, precious stones by $293,000, medicines by $240,000, areca-nuts by $162,000, tin by $120,000, and rattans by $100,000. Increases were, however marked in sugar candy by $450,000, petroleum by $436,000, ground-nuts by $289,000, raw cotton by $207,000, and birds' nests and gunnies by about $100,000 each.

To China, petroleum alone showed an increased value of over $1\frac{2}{10}$ million dollars, but the only other increase of importance

was birds' nests by $140,000 declines being seen in gunnies by $1,110,000, rice by $317,000, tin by $260,000, Benares opium by $247,000, and Patna opium and planks by $137,000 each.

Imports from the Federated Malay States reached the value of 74$\frac{1}{3}$ million dollars, being a decrease of over four millions, imports from the Negri Sembilan and Pahang alone showing increases. Perak with a trade of 40$\frac{1}{2}$ million dollars fell off by over 2$\frac{4}{5}$ millions, which may be partly accounted for by railway consignments from Penang not included in the Colonial figures, and Selangor with a trade of 25$\frac{1}{4}$ million dollars showed a falling off of nearly two millions. Decreases are seen in the value of tin and tin ore received by over 3$\frac{4}{5}$ million dollars, coffee by $182,000, and rattans and gambier by over $100,000 each. The only increases worthy of remark were in sugar by $136,000, and padi by $125,000.

Exports to the Federated Malay States valued over 24 million dollars, a decrease of $1,640,000, the decreases being to Perak and Selangor, especially the latter. The fall in rice was over 1$\frac{1}{2}$ million dollars, no doubt for the reason that shipments have been made direct from Rangoon to Port Swettenham, the other decreases were all under $100,000 except Kachang oil, which fell by $102,000. Increased exports, however, were seen in Benares opium by $194,000 and in cotton piece goods by $121,000, the other movements being considerably less than $100,000 value each.

Imports from the Dutch Indies valued 51$\frac{1}{2}$ million dollars, an increase of more than one per cent. The increases were from Sumatra, Java, and Acheen and the decreases from Rhio, Bali, Dutch Borneo, the Netherlands Archipelago, the Celebes, and the Natunas Islands. Imports from Sumatra valued nearly 14$\frac{9}{10}$ million dollars, an increase of $1,825,000 seen by advances in the following articles:—Tobacco by $725,000, petroleum by $575,000, Borneo rubber by $535,000, India rubber by $393,000, areca-nuts by $233,000, black pepper by $157,000, fish by $143,000, and rattans by $109,000, followed by swine, curry stuffs, liquid fuel, and horses. Declines were, however, seen in gutta percha by $870,000, sago flour by $200,000, and white pepper by about the same amount, followed by timber and benjamin with much smaller decreases.

Java with an import value of nearly 11$\frac{3}{10}$ million dollars had an increase of over $750,000. The principal advances were sugar by $565,000, ground-nuts by $452,000, and tapioca flour by $106,000, followed by areca-nuts, Kachang oil, birds' nests, and raw cotton with increases ranging from $70,000 to $90,000 each.

Decreases were observable in rice by $470,000 and tobacco by $112,000, followed by sarongs, mats, and rattans with declines ranging from $75,000 to $95,000 each.

Achinese ports with a value of over 1½ million dollars give an increase of $450,000 seen chiefly in black pepper with an increase of $242,000 and areca-nuts with an increase of $166,000.

Dutch Borneo with a trade of nearly 10⅕ million dollars gave a decrease of $370,000, gutta percha alone accounting for a decrease of $1,184,000, rattans for $243,000, coconut oil for $209,000, illipi nuts for $175,000, and liquid fuel with crude oil and beeswax about $90,000 each. Increases were, however, seen in inferior and low-class rubbers by $531,000, Borneo rubber by $485,000, and copra and fish by about $270,000 each.

The Dutch Islands and the Celebes had an import trade of somewhat over 9⅓ million dollars, a decrease of more than $400,000 The larger declines were tin ore by $792,000 from the Dutch Indies, copra by $355,000, rattans by $257,000, and bêche-de-mer by $120,000 from the Celebes. Increases are seen from the Archipelago of $372,000 in petroleum, of $179,000 in provisions, largely live fish, and $115,000 in nutmegs and from the Celebes in nutmegs by $216,000, followed by raw hides and gum damar with increases of under $100,000.

Bali had a trade of over two million dollars, a decrease of nearly half-a-million and Rhio of 1 3/10 million dollars, a decrease of $940,000, while the Natunas Islands with a trade of $950,000 decreased by $283,000. Imports from Bali decreased in coffee by $503,000 and in copra by $246,000, from Rhio by $610,000 in gambier and $268,000 in white pepper, and from the Natunas Islands in copra by $284,000. The only increase was in live stock from Bali,—cattle by $140,000 and swine by $95,000.

Exports to Netherlands India reached nearly 41 million dollars, an increase of $720,000. Java with an export value of 14⅕ million dollars rose by over a million and three-quarters, seen in rice by over half-a-million dollars, sarongs by $257,000, fish by $215,000, grey yarn by $189,000, tea by $138,000, cotton piece goods by $112,000, clocks by $105,000, and gunnies by close on $100,000.

The declines were in gambier by $208,000, japanware by $115,000, and fireworks and wheat flour by $85,000 each.

The value of exports to Sumatra was 10⅗ million dollars, a decrease of $425,000, apparent in rice by $340,000, cotton piece goods by $150,000, coconut oil by $145,000, and cattle by $112,000. The increases are seen in opium by $162,000 and crude oil by $130,000.

The Netherlands-Indian Archipelago and the Celebes received to the value of close on 6¾ million dollars, an increase of

$800,000, the increases to these places being chiefly in chandu, petroleum, and rice. Exports to Dutch Borneo valued nearly five million dollars, an increase of $320,000, found chiefly in the enchanced values of cotton piece goods, ironware, and sarongs sent out; but rice showed a decline of $111,000.

Achinese ports with a trade of nearly $1\frac{3}{4}$ million dollars had a decrease of $1,075,000, seen in decreases to Penang in nearly every article of export, especially rice, Benares opium, and cattle.

To the Natunas Islands a value of $540,000 was sent, a slight increase compared with the previous year, to Bali a value of $1,380,000, a decrease of $380,000 seen in low values of Benares opium and cotton piece goods sent, and to Rhio a value of $780,000, a decrease of $290,000, of which rice accounted for $190,000.

Imports from French Indo-China, valued over 4 million dollars, a decrease of $600,000, to which the decline in the value of salt fish contributed $449,000, salt $127,000, and coal $45,000, but raw silk imported increased by $131,000, and sticklac by over $50,000. Exports valued close on 2 million dollars, an increase of $247,000, but jute gunny bags sent increased by $292,000, and coal by $53,000, the principal decrease being seen in petroleum exported by over $150,000.

From the Malay Peninsula, other than the Federated Malay States and Kedah, the imports valued $14\frac{1}{2}$ million dollars, compared with over $19\frac{2}{5}$ millions in 1903. The great decline is chiefly attributable to Johore, which, with a trade of $10\frac{3}{4}$ millions, has a decrease of $4\frac{3}{4}$ millions, the large decrease in the price of gambier and pepper, as well as in the volume, accounting for this; in the former the decrease is nearly $3\frac{1}{5}$ million dollars, and in the latter, $1\frac{3}{10}$ million; but besides these, areca-nuts fell off by $136,000, and tapioca pearl by $102,000, followed by tin ore and copra with smaller declines.

Tringganu with an import trade of nearly $1\frac{3}{5}$ million dollars, shows a decrease of about $110,000, padi and rice giving less values, but tin ore, black pepper and dried fish increased. Kelantan, with a trade of over one million dollars, increased by $150,000, seen chiefly in the larger values of cattle and areca-nuts received, but Padi had a large decline. The remaining States, Patani and Singgora, both showed fallings off, smaller values of padi from Patani and rice and swine from Singgora being, however, to some extent met by increases of tin from Patani, and raw hides from Singgora.

Exports to the Malay Peninsula, valued $5\frac{6}{10}$ million dollars, a decrease of nearly $400,000, but Johore alone decreased by $452,000, Patani, Tringganu and Singgora showing small

declines, and Kelantan alone an increase. The important fluctuation to Johore was a decline in rice by $410,000, to Tringganu of raw silk to the value of $47,000, followed by piece goods and petroleum, to Patani by decreases in petroleum and cotton piece goods, to Singgora by a decrease in dyed yarn, and to Kelantan by an increase in cotton piece goods, dyed yarn, sarongs, and tobacco.

From Siam and the Siamese West Coast and Kedah, the value of over 28 million dollars was received, an increase of over $2\frac{4}{5}$ millions.

Tin from the Siamese West Coast increased by nearly $1\frac{1}{5}$ million dollars, and tin ore by $375,000, while from Siam proper, rice increased by over 2 million dollars, and fish by $360,000, followed by sticklac, padi, and white pepper by enhanced amounts approaching $100,000 each.

There were decreases, however, in cattle from the Siamese West Coast by $850,000, and from Siam by $165,000, followed by rice and swine from the Siamese West Coast with declines of $152,000 and $135,000, respectively, and (from Bangkok) hides by $130,000.

Exports to these places valued nearly $16\frac{3}{5}$ million dollars, an increase of $1\frac{7}{10}$ million dollars. These are found chiefly in advances in the value of the following articles sent to Bangkok:—Benares opium by $745,000, gunnies by $254,000, sarongs by $135,000, cotton piece goods by $113,000, and sugar by $100,000, there being a decrease of $85,000 in dyed yarn.

To the Siamese West Coast, Benares opium and chandu fell off by $160,000, but cotton piece goods, sugar, and coconut oil increased.

Sarawak and British North Borneo, with an import trade of $5,117,000, of which Sarawak contributed $4,615,000, displays an increase of $2,145,000, chiefly to Sarawak. This increase is accounted for by more white pepper having been sent to the local market instead of being transhipped, the value in this article rising by $1\frac{3}{10}$ milion dollars, but other increases were sago flour by $255,000, low-class rubbers by $190,000, Borneo rubber by $101,000, and black pepper by $81,000, followed by fish and India rubber with increases of $73,000 each.

Exports to these countries increased by over half-a-million dollars, which is almost entirely contributed by Sarawak, the increases being marked in rice, fish, and tobacco, and declines of much smaller extent in Persian opium and cotton piece goods.

From Australia, imports valued nearly $1\frac{3}{4}$ million dollars, an increase of $318,000, tin ore received advancing by $457,000, and railway sleepers to Malacca by $109,000, followed by wheat flour and timber with small advances.

Decreases are found in coal, sandalwood, and horses received by amounts ranging from $106,000 to $140,000.

Exports to Australia, valued $1\frac{1}{3}$ million dollars, a decrease of $625,000, rice, petroleum, chandu, and pearl tapioca giving declines ranging from $100,000 to $150,000 each.

From Japan the value of imports was $7\frac{9}{10}$ million dollars, a decrease of $425,000 observable in such articles as japanware, jinrikishas, apparel, coal, and tea, matches alone having a small increase.

Exports to Japan, valued about $3\frac{9}{10}$ million dollars, a decrease of over $1\frac{3}{10}$ million dollars.

This large decrease is more than covered by a fall in the exports of rice, valued at over $2\frac{2}{5}$ million dollars, but petroleum also fell by $560,000, and indigo by $65,000.

Increases were marked in tin by $895,000, Borneo rubber by $236,000, and tanned hides by $192,000.

GENERAL OBSERVATIONS ON TRADE.

General depression marked both imports and exports, and the state of trade was far from satisfactory. There can be little doubt but that our range of markets is being gradually curtailed, that Java on the one side and Macassar on the other are extending their influence in Dutch Borneo, Sumatra, and the Moluccas.

Exports have experienced a distinct check. Taking the twelve principal articles, viz.:—Tin, gambier, pepper, copra, coffee, hides, sago, rattans, tapioca, gutta percha, Borneo and India rubber, and gum copal, the volume exported decreased by about 21,250 tons, or $6\frac{1}{2}$ per cent.

The marked feature of the year in imports has been the peculiar position of the piece goods trade on account of the enormous fluctuation in the value of raw cotton combined with the firmness of prices owing to the demands on the Manchester manufactures upsetting calculations and considerably restricting sales. During the first six months it may be said that piece goods' merchants have done well on the whole, as they were indenting on stocks much of which had been put in at lower rates.

Japan gave large orders locally for woollens, chiefly blankets, and also coloured cottons, especially khaki, and there was also a fair demand for grey and white cottons at remunerative rates.

The overturn has been distinctly less than in 1903, and imports are lower in quantity than they have been for many years, while Chinese dealers have had a very unsatisfactory time.

In hard goods, business was far from good, sales being reduced on account of the inability of natives to buy from dealers, as prices of produce remained low, and in some cases were worse than in the previous year; this resulted in greater economy and more dependence on native makes, the high duties in Saigon and the Philippines not improving matters.

It may, however, be said that for the first three months of the year business was fairly satisfactory, but for the next three months was stagnant. Credits were then contracted as much as possible, and it was not till the middle of October that any marked improvement came in.

Competition has been keen, but Chinese importers have not been doing so much of a direct business as they did in the last half of 1903 and the first half of 1904.

The profits on staples have been so small that more attention is being given to special small lines, and some firms have refrained as much as possible from importing on their own account, preferring the security of the commission which indent business offers.

Dulness of trade has led to more Singapore firms establishing branches of their business in Penang.

Dutch mercantile houses have extended their ramifications in different directions, and Singapore has seen an increase in the number of foreign firms.

The depression in the local markets was to some extent evidenced by the considerable number of native firms who found themselves unable to meet their liabilities.

A new combination was formed by ship agents and owners trading to the United States of America, with the effect of raising rates of general cargo to 25*s*. per ton, which is, however, a moderate tariff compared with that ruling for cargo to the United Kingdom and Continental ports.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

In Singapore, the area under cultivation of pineapples continues to increase, and a good deal of old land, abandoned since the days of gambier cultivation, has now been put under pineapples.

A few Para rubber estates were started recently in the island, but it is hardly likely that these will increase to any great extent, as there is not much land suited for this cultivation. In Province Wellesley and Malacca, however, there is a marked increase in rubber cultivation, and still more so in the Federated Malay States. The area under cultivation now in the Peninsula is very large, and the prepared rubber is in great demand by the home manufacturers, the best samples having taken the highest price ever paid in 1904, viz., 6*s*. 1½*d*. per lb. An extensive series of experiments was carried out last year in the Botanic Gardens to discover improved methods of tapping and preparing rubber.

The indigo cultivation in Singapore has dwindled away considerably. In fact, only a few fields are left. Very few of the dyeing houses now remain.

Coconut plantations continue to flourish in Penang and Province Wellesley, where some additional hundreds of acres were put under cultivation during 1904. In Singapore also a small increase was observable, but several of the older small plantations have been abandoned, chiefly because of the demand for building land.

The cultivation of pepper in Singapore has remained practically stationary. Citronella grass has increased a little. The cultivation of nutmegs and cloves in Penang was normal, but prices were adversely affected by large West Indian supplies. There has been a large increase in vegetable cultivation. The rice and fruit crops in Malacca were both good. Further attempts were made to grow cotton in the Colony, but it does not seem to have been really successful anywhere, and is never likely to be an important product of this country. Reports as to the failure of the beet crops had a stimulating effect on the sugar industry of Province Wellesley and Perak, very remunerative prices being received towards the end of the year.

The Agricultural Show, held at Kuala Lumpur, last year proved a most successful one. The produce shown was mostly very good, and many prizes were taken by exhibitors in the Colony—coconuts, rubber, rice, and arrowroot were exceptionally well represented.

A collection of tropical fruits was sent from Penang to the exhibition held in London this year and obtained a silver medal.

LAND GRANTS.

Appendix E shows the number of land grants issued, the area alienated, and the amount of praemia paid in the three Settlements during the past three years. The decline of the tapioca industry accounts for the falling off of receipts under these heads in the Settlement of Malacca.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 18,267,499, as compared with 18,404,383 in 1903. The amount realised by light dues was $209,640.

Particulars of the shipping are given in Appendices F and G. One thousand and seventy-seven vessels, aggregating 19,205 tons, were built in Singapore in 1904, the figures for the previous year being 654 and 18,252, respectively.

LEGISLATION.

Twenty-one Ordinances were added to the Statute Book during the year. Of these, 13 contain amendments of previous enactments.

Of the more important Ordinances, No. IV. amends "The Currency Note Ordinance, 1899," and makes provision for the recovery of the cost of re-minting dollars for the new currency from the general revenue of the Colony, and for the issue of notes in exchange for gold; No. V. amends and consolidates the Postal Law of the Colony; No. VI. amends the law for the protection of Indian immigrants; No. VII. makes some amendments in "The Conveyancing and Law of Property Ordinance, 1886"; No. XIII. makes provision for the better administration of the Estate of the late Sultan Hussein Mohamed Shah in the interests of his descendants, who represent the original ruling family of Singapore; No. XIV. makes amendments to the law regulating the importation, sale, and use of morphine; No. XVIII. lays down what proportion of the revenue derived from productive undertakings constructed out of revenue is liable to the Military Contribution; and No. XIX. provides for the transfer to Government of the assets and liabilities of the Widows' and Orphans' Pension Fund.

EDUCATION.

Nearly all the schools in the Colony are Vernacular Schools for Malays, under the direct control of Government. All the expenses of these schools, which are 173 in number, are defrayed by Government and they provide free tuition in Malay to some 10,000 pupils. The remaining schools, are, with the exception of three which are controlled and financed by Government, Aided-Schools managed by private bodies, and receive grants-in-aid from Government.

In 29 schools, English only is taught, in four, English and Tamil, in three Tamil only, and in one Chinese only; the numbers of pupils enrolled in these four classes of schools are 8,095, 263, 112, and 32, respectively. There are, in addition to the Government and Aided-Schools, a few private schools, which are not inspected by Government. These are chiefly Chinese Vernacular Schools.

The net expenditure on Government Schools was $85,653, on Aided-Schools (English, Anglo-Tamil, Tamil, and Chinese), $54,807, and on Government Vernacular Schools, $90,269.

The cost of the Malacca Training College for Malay Teachers during the year under review was $11,190. The value of this institution is considerable, and it produces very good teaching material for the Vernacular Schools. The demand, however, for trained teachers, more especially in Penang and Province Wellesley, is much in excess of the supply, and it will be some years before these schools are staffed exclusively by trained men.

The Compulsory Attendance Ordinance was introduced into Province Wellesley on the 1st January, 1904, with the result that the average attendance in the Malay Schools of that Settlement has been nearly doubled (2,153, as against 1,193).

A scheme for the establishment in Singapore of a training class for English teachers will shortly be introduced.

The Commercial and Science Classes at the Raffles Institution have made satisfactory progress during the year.

GOVERNMENT INSTITUTIONS.

Hospitals.

Practically all the hospitals of the Colony are under Government management, while the Estate hospitals, maintained by the planters, are under Government supervision. The total number of admissions to the hospitals, exclusive of the lunatic asylum, was 23,462, as against 23,374 in 1903. In Singapore, 254 patients were admitted into the lunatic asylum. The seaside establishment for beri-beri patients from the lunatic asylum continues to give good results.

Reformatory.

The number of boys in the reformatory at the end of the year was 75; the highest number during the year was 83, and the lowest, 51. The new permanent buildings, to accommodate 120, will be finished by July, 1905. The diet was found unsatisfactory, and a more liberal diet has been allowed; the health of inmates was much better than last year. Instruction was given at the school in English and Romanised Malay, and at the workshops, in tailoring, carpentering, and shoemaking. The expenditure amounted to $9,111, as against $8,718 in 1903.

Savings Bank.

The transactions in this branch amounted to $376,482 (deposits), and $411,796 (withdrawals), as compared with $432,040 and $402,061 in 1903. The amount standing to the credit of depositors at the end of the year was $564,119 (in 1903, $583,843).

The investments at the close of the year stood at $576,782, as compared with $584,182 at the corresponding period of the previous year; the details are as follows:—

	$
India 3½ per cent. Rupee Paper	333,187
Singapore Municipal Debenture Stock, bearing interest at 5 per cent....	58,000
Singapore Municipal Debenture Stock, bearing interest at 4 per cent.	96,500
Fixed Deposits at the Chartered Bank, at 4 per cent.	10,000
Cape Stock, at 3 per cent.	8,516
Queensland Stock, at 3 per cent.	16,212
South Australian Stock, at 3 per cent.... ...	21,044
Zanzibar Government 3 per cent. Guaranteed Loan	15,535
Cardiff Corporation Stock, at 3 per cent. ...	17,788

POLICE.

Three police probationers were appointed and joined the force.

Twenty-five European constables were enlisted.

Twenty-four murders and 58 gang-robberies were reported during the year; of the latter, 24 were proved in the preliminary investigation to be false.

The police force now numbers over 2,000 men, of whom more than 300 are Sikhs.

VITAL STATISTICS.

The estimated population of the Colony was 595,782, the figures given by the Census of 1901 being 572,249. Fifteen thousand two hundred and forty-four births were registered, as against 15,509 in 1903.

The death-rate was 39 per mille of the population. The rate in 1903 was 39·49.

The following table shows the cases of zymotic diseases and deaths therefrom for 1904 and 1903, not, of course, including the imported cases:—

—	Plague.				Cholera.				Small-pox.			
	1903.		1904.		1903.		1904.		1903.		1904.	
	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.
Singapore	3	3	20	20	226	190	3	3	109	29	33	11
Penang	—	—	—	—	—	—	—	—	227	57	3	2
Province Wellesley	—	—	—	—	—	—	—	—	258	49	6	2
Malacca	—	—	—	—	—	—	—	—	266	40	100	7

In Singapore, Penang, and Malacca, the general arrangements for sanitation and conservancy are carried out by the Municipality, and in the several districts of Province Wellesley by Sanitary Boards with powers under the Municipal Ordinance.

Climate.

The mean temperature of the Colony is shown in Appendix P.

The mean rainfall in Singapore was 101·54 inches; in Penang, 119·47 inches; in Province Wellesley, 98·90 inches; in the Dindings, 92·83 inches; and in Malacca, 72·23 inches.

The greatest fall in 24 hours was 8·50 inches at the Dindings on 13th December. (Appendix Q.)

POSTAL, TELEGRAPH, AND TELEPHONE SERVICE.

Over 14,700,000 articles passed through the Post Office, of which nearly 586,000 were registered.

The postal revenue amounted to $466,403, as against $427,259 in 1903. The expenditure was $335,760, an increase of $8,831 over that of the preceding year. The money order business showed a gross increase of $398,128. The transactions in sterling amounted to £21,417 and those in Indian currency to Rs. 2,468,875, while in local currency business was done to the extent of $496,740, the aggregate being thus $2,464,545, as against $2,066,641 in 1903, and $1,707,261 in 1902.

The telegraphs in Penang and Province Wellesley and the inland lines in Malacca, all of which are connected with the Government System of the Federated Malay States, are the property of Government.

The telephone system of Singapore is the property of the Oriental Electric and Telephone Company. This Company also maintains for Government the lines connecting the Government Offices and Police Stations, &c. There is a branch exchange at Johore Bharu, which is connected with Singapore.

The telephone lines in Penang, 328 miles in length, are owned and worked by Government. The system in use is the metallic circuit. The number of subscribers at the end of the year was 241, and there were in addition 41 service lines. It was decided during the year to extend the telephone system in 1905 to Province Wellesley.

The Malacca telephone system is also worked by Government, and consists of 145 miles of service lines.

MILITARY.

The garrison in Singapore consisted of two companies of Royal Garrison Artillery, half a company of Royal Engineers, one battalion of British Infantry, and one battalion of Native Infantry, besides Asiatic Artillery (Sikhs), and Malay Submarine Miners, with details of other corps. No Militia Force exists. The strength of the garrison was 2,585, all ranks.

A detachment of the Malay States Guides was quartered in Penang. The military contribution of the Colony in respect of the year 1904 amounted to $2,299,854.

A Volunteer Artillery Force, 123 strong (including reserves), exists in Singapore. Only Europeans are enlisted in it. Its

principal armament consists of a complete battery of 10-pr. B. L. screw guns, utilised with 7-pr. limbers as a field battery with pony draught. It also possesses four Maxim guns (·303), in the use of which it is proficient. This corps is armed with Martini-Metford carbines and sword-bayonets.

A Maxim company, 43 strong, has been formed to work the four guns belonging to the Singapore Volunteer Artillery, which latter unit is not at present sufficiently strong in numbers to man both the 10-pr. B. L. battery and the four Maxims.

There is one company of Volunteer Engineers composed of Europeans, 39 strong (including reserves).

There is one company of Eurasians and one company of Straits-born Chinese, each 91 strong, including reserves.

A Volunteer Infantry Force, 107 strong, is also in existence in Penang, and is reported to be efficient.

A force, consisting of Europeans, Eurasians, Chinese, and Malays, 50 strong, exists in Malacca. This corps is armed with Lee-Enfield rifles and sword-bayonets.

There is in addition in Singapore a bearer and ambulance section, composed of 9 Europeans, 7 Eurasians, and 9 Chinese (Straits-born); and a Cadet Corps, 51 strong, armed with Martini-Metford carbines. In Malacca there is a Cadet Corps, 53 strong, also armed with Martini-Metford carbines.

PUBLIC WORKS.

During the year a considerable number of new projects were undertaken, in addition to carrying on works previously commenced.

IMMIGRATION.

(*a.*) Chinese.

The number of immigrants from China ports shows a reduction of 7 per cent. upon the number for last year, which was exceptionally large. It is satisfactory that the immigration of women has fallen 1 per cent. only. The number of "unpaid passengers," *i.e.*, of coolies who obtain free passages from China in consideration of entering into contracts for service on arrival in the Colony, has fallen to 16,930. In the last ten years, only two years—1897 and 1898—have shown a lower figure.

The returns for the last five years are as follows:—

Year.	Men.	Women.	Children.	Total.
1900	180,477	11,982	8,488	200,947
1901	158,809	11,822	8,147	178,778
1902	184,198	13,151	9,807	207,156
1903	193,339	14,539	12,443	220,321
1904	179,650	14,395	10,751	204,796

(*b*.) INDIAN.

The figures for the last three years speak for themselves:—

—	1902.	1903.	1904.
1. Statute immigrants	2,430	572 (*a*)	2,721
2. Free coolies (with aided tickets)	1,595	1,980	3,556
3. Other immigrants	16,217 (*b*)	19,478 (*c*)	24,475 (*d*)

(*a*) 91 came with ordinary tickets and signed contracts on arrival.
(*b*) 1,567 children. (*c*) 1,474 children. (*d*) 1,810 children.

Eighteen thousand six hundred and forty-nine adults and 901 children left the Colony for Southern India.

GENERAL OBSERVATIONS.

Mr. W. T. Taylor, C.M.G., continued to administer the Government until the arrival on April 16th of Sir John Anderson, K.C.M.G.

On the 13th September Mr. Taylor left the Colony to take up the acting appointment of Resident-General, Federated Malay States, in which post he was confirmed as from the 1st January, 1905, Mr. F. G. Penney, Resident-Councillor, Malacca, being appointed Colonial Secretary from the same date.

Some progress was made with the extension of the railway to the Singapore Docks, and possession was taken of all the land required. The Singapore Tramways, Limited, laid nearly the whole of the tram lines and erected most of the overhead gear. The power station at MacKenzie Road was nearly finished during the year and the cars are expected to begin running shortly.

The present site of the Tan Tock Seng Hospital having been found unsuitable, the Government acquired a new site on rising

ground near Balestier Road for $84,410. A sum of $100,000 (on an estimate of $250,000) for the new buildings was voted among the budget services for the year 1905.

Progress was made in the erection of the Memorial Hall to Her late Majesty Queen Victoria, and the Government made during the year a further contribution of $80,000 towards the extension of the scheme by the conversion of the Old Town Hall into a theatre.

In December the Government gave notice of its intention to expropriate the business of the Tanjong Pagar Dock Company, Limited, and a Bill was shortly afterwards introduced into Legislative Council to give effect to the scheme.

The final report of the Consulting Engineers on the construction of moles for the protection of the harbour was received, and tenders for the works are being invited.

In Penang the new iron pier in its extended form was completed, and regular use is now made of it. It is lighted at night by electricity supplied from the Municipal Power Station. In July the Municipal Electrical Department began to supply power for the lighting of the principal streets. Many private houses are also supplied, and it was decided to electrify the tramway system, which was transferred by Government to the Municipal Commissioners.

In Malacca rapid progress was made in the construction of the railway which is to connect Malacca Town with the Federated Malay States system, and the line is expected to be in working order during the current year.

The news of the death of Mr. C. W. S. Kynnersley, C.M.G., who had on several occasions acted as Colonial Secretary, Straits Settlements, and once as Officer Administering the Government, and whose service of 32 years had all been spent in this Colony, was received with universal regret. He had survived the date of his retirement by only seven days.

The Honourable J. M. B. Vermont, C.M.G., for many years a member of the Legislative Council, died in Penang on the eve of his departure for England.

The depression in trade had a bad effect on the revenue of the Colony.

The Singapore Opium and Spirit Farms had been relet for a term of three years from the 1st January, 1904, at a rental of $465,000 a month, as compared with $236,000 a month for the previous term, the Penang Farms being let for the same period for $217,000 a month, as compared with $125,000 a month for the preceding period of three years.

The farmers at once found themselves in difficulties. The sales of chandu suddenly fell at the commencement of the new farms, the reduction being due partly to the general depression in trade and partly to the enhanced price at which the drug was sold under the new contracts, the effect of which had been miscalculated.

The Government after full investigation decided that the rents must be reduced and allowed the Singapore farmers a remission of rent to the amount of $135,000 for the month of August, $150,000 a month for the last four months of 1904, and $100,000 a month for the remainder of the term of the contract, the Penang farmers also being granted a remission of $50,000 a month for the latter half of 1904, and $27,000 a month for the years 1905 and 1906. This unfortunate reduction in the estimated revenue of the Colony has necessitated postponement of many public works which were in contemplation. At the close of the year the commercial outlook was still very unsatisfactory.

During the year a new contract for a fortnightly mail service between Singapore (and Penang) and Europe *viâ* India was entered into with the British India Steam Navigation Company, Limited, the service to begin at the expiration of the old contract in February, 1905.

The Colony now enjoys a regular mail service every week, and it is anticipated that the contract will be a considerable convenience to the public.

The clerical service was re-organised, and a new and liberal scale of salaries sanctioned by the Secretary of State for the Colonies.

E. L. Brockman,

Acting Colonial Secretary,

Straits Settlements.

No. 502.

STRAITS SETTLEMENTS.

(For Report for 1904, *see* No. 458.)

THE GOVERNOR to THE SECRETARY OF STATE.

Government House,
Singapore,
August 25, 1906.

MY LORD,

I HAVE the honour to transmit copies of the Report on the Straits Settlements for the year 1905.

I have, &c.,

JOHN ANDERSON.

The Right Honourable
The Earl of Elgin and Kincardine, K.G., G.C.S.I., G.C.I.E.,
&c., &c., &c.

1125 Wt 23907 10/06 D & S 5 26047

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1905.

FINANCIAL.

The revenue for 1905 amounted to $11,656,153,* the three Settlements contributing as follows:—

	$
Singapore	6,629,723
Penang	2,947,482
Malacca	2,078,948

There was thus an increase over the revenue collected in 1904 of $909,635, while that of 1903 was exceeded by $3,697,657. This increase is entirely due to the sale of the Malacca-Pulau Sebang Railway to the Federated Malay States, the proceeds of which amounting to $1,414,218 were brought to credit of the Malacca Revenue. The revenue proper shews a decrease of $504,583, as compared with the revenue collected in 1904 and an increase of $2,283,438 as compared with 1903. The principal increases were under the following headings:—

	$
Land Sales	1,430,129
Reimbursements	510,668
Post Office Receipts (including Telegraphs)	46,024
Fees of Office	19,166
District Collections	12,509

The large increase in land sales is due to the sale of the Malacca-Pulau Sebang Railway. Reimbursements comprise a sum of $470,140.56 transferred from the Widows' and Orphans' Pension Fund to the general revenue of the Colony.

The chief decreases appear under the headings:—

	$
Licences	954,795
Stamps	146,481
Interest	19,374

The decrease under licences is due to further reductions being made in the opium farmer's rents and to their being allowed to defer payment of a portion of their rents till 1st January, 1907.

* The figures of Revenue and Expenditure are in some cases subject to audit.

That under stamps is largely due to a falling off in the duty on probate.

The expenditure for the year was $11,005,137, as compared with $10,848,989 in 1904 and $8,185,952 in 1903. The following table exhibits the items in respect of which increased expenditure was incurred:—

	$
(1) Special Expenses	745,625
(2) Lands and Houses purchased ...	144,248
(3) Roads, Streets, &c., Special Services	55,664
(4) Personal Emoluments	45,480
(5) Interest	38,892

The advances made out of revenue, amounting to $747,580.83, to make good the difference between the market value and cost price of the securities belonging to the investment portion of the Note Guarantee Fund were written off as irrecoverable and debited to the special expenses. The increase under (2) is due to the Government taking over the Excise Farm Buildings and under (3) to construction of new roads. The increase under interest is caused by the loss on sale of the bullion purchased by the Crown Agents for subsidiary coin.

Exchange.

The exchange value of the Straits dollar was maintained at a fairly uniform rate during the first half of the year, the lowest decreased rate being 1*s.* 11½*d.* in January and April and the highest 1*s.* 11⅞*d.* in May. In July the dollar rose to 2*s.* 0¼*d.* and in August to 2*s.* 1½*d.*, and continued to appreciate till in December it reached 2*s.* 2$\frac{11}{16}$*d.* The average exchange for the year was 2*s.* 0$\frac{9}{16}$*d.*, an advance of 1⅝*d.* on the average for 1905 and nearly 3½*d.* on that of 1904.

A speculative market and the difficulty of getting cover for banking operations owing to the closing of the mints to the free coinage of dollars were amongst causes which accelerated the rise in the value of the Straits dollar, but the main cause was the rise in the price of tin.

Currency.

No dollars were minted during the year under review. At the beginning of the year the dollars and notes in circulation, including the stocks held by the Banks and in the Native States Treasuries, amounted to $43,550,099, of which $17,195,365 were in Government notes, $2,277,361 in bank notes, and the rest in

dollars. At the end of the year the notes and dollars in circulation amounted to $43,387,487, of which $17,353,710 were in Government notes, $1,454,456 in bank notes, and the rest in dollars. From the returns of imports and exports furnished to the Treasury, it appears that the excess of exports over imports of dollars amounted to $3,055,101 for Singapore and $502,801 for Penang, making a total excess of $3,557,902. These returns do not take into account the Straits dollars taken away or brought into the Colony by passengers. Most of the Straits dollars exported were absorbed by Sumatra. In Singapore $553,491 worth of subsidiary coin was withdrawn from circulation during the year, and in Penang $179,000.

Quarter-cent pieces to the value of $5,019 were received from Bombay, and of these coin to the value of $2,500 was issued to the Tanjong Pagar Dock Board.

The exportation of Straits dollars to any place outside the Malay Peninsula, the Netherlands East Indies, and Borneo was prohibited from the 16th of January.

The average bank note circulation of the Colony for the year was $1,866,215, as against $2,918,136 in 1904, the Hong Kong and Shanghai Banking Corporation having continued the reduction of their note issue.

The average amount of Government currency notes in circulation during each month was:—

Month.	Amount.
	$
January	17,307,333
February	17,525,365
March	17,524,397
April	17,522,461
May	17,511,040
June	17,372,438
July	17,208,460
August...	17,205,105
September	17,204,505
October	17,050,460
November	16,981,105
December	17,154,903

Municipal Revenue and Expenditure.

The revenue of the three municipalities amounted to $3,009,199, and their expenditure, including sums spent on loan works, to $3,391,467. The usual comparative statements will be found in Appendix C.

The debts of these Boards and the provision made for repayment are shewn in Appendix D.

TRADE.

The trade of the year, though profitable to merchants, was not altogether satisfactory.

The speculative element of exchange so dominated transactions that while remunerative to some it was injurious to others, and the volume turned over in manufactured goods was, with the exception of the textile class, not quite so large.

Dollar imports of merchandise decreased by 2 per cent., but owing to the rise of 6½ per cent. in exchange increased by £1,400,000, or 4½ per cent.

The export value of merchandise measured in dollars increased in value by over 3¾ per cent. and in sterling by 10½ per cent.

The trade of Singapore itself to places outside the Colony, excluding treasure, fell in both imports and exports, shewing decreases of nearly 3 per cent. and about 1¾ per cent. respectively in dollar values.

The value of the Colony's trade with other countries is as follows:—

—	1904.	1905.
	$	$
Merchandise—		
Imports	325,868,032	319,776,549
Exports	255,438,661	265,184,613
Total ...	581,306,693	584,961,162
Treasure—		
Imports	42,960,031	12,457,367
Exports	57,070,257	17,776,172
Total ...	100,030,288	30,233,539
Grand Total ...	681,336,981	615,194,701

The United Kingdom in imports of merchandise received 10·5 per cent. of the Colony's foreign trade, an increase of 5 per cent.; British Possessions and Protectorates, including the Federated Malay States, 47·4 per cent., a fall of 6 per cent., and foreign countries 42·1 per cent., an advance of 1 per cent.

In export values of the same class the proportion belonging to the United Kingdom was 21·4 per cent., an increase of 2 per cent., to British Possessions and Protectorates 24·6 per cent., a rise of 3·2 per cent., and to foreign countries 54 per cent., a decline of 3·4 per cent.

A view of the trade values thus distributed will be seen in Appendix E. 1.

From countries having a gold currency, among which Siam is now reckoned, goods brought into the Colony reached a total value of nearly 191 million dollars, an increase of about 14 per cent., and from silver currency countries nearly 129 million dollars, a decrease of over 18½ per cent.

To gold countries there were exports to the value of 204½ million dollars, an increase of nearly 11 per cent., and to silver countries about 60¾ million dollars, a decrease of over 14½ per cent.

In the twelve principal articles of produce, viz., tin, gambier, pepper, copra, coffee, hides, sago, rattans, tapioca, gutta, Borneo and India rubber, and gum copal, the value exported increased by 13,570 tons, copra alone, however, rising by 18,150 tons.

Import Quantities and Values.

Imports into Singapore from all places including the trade from other Settlements as well as bullion and specie amounted to nearly 249 million dollars (£25,425,000), a decrease of nearly $25\frac{7}{10}$ million dollars and in sterling of £787,000.

Of this decline, bullion and specie accounted for nearly 19 million dollars, and merchandise for the balance, the falling off in the former being due to the fact that no Straits dollars were coined for importation.

The movements of specie in the interests of a change of currency account for the great difference of treasure values in the two years.

Foodstuffs, including opium and spirits, fell by $643,000, raw textiles by $780,000, tin and other unmanufactured metals by $1,243,000, Straits produce and other raw materials by $3,955,000, and manufactured articles by $111,000.

The only increase under the last-named class was in textiles, which advanced by $1,804,000 but metals and miscellaneous manufactures declined.

Penang imports from all places amounted to $91\frac{8}{10}$ million dollars (£9,365,000), a decrease of nearly $13\frac{4}{10}$ million dollars and in sterling of £716,000.

Bullion and specie, however, accounted for a fall of $14\frac{7}{10}$ million dollars, leaving an increase in merchandise of $1,320,000.

Foods, drinks, and narcotics declined by $839,000, tin and other raw materials advanced by over 2¼ million dollars, and

Straits produce and other raw materials by $610,000, but manufactured articles fell by $718,000, there being a decrease under every class in this latter head.

Malacca imports were valued at over 4¼ million dollars, an increase of $167,000, treasure alone increasing by $198,000.

The value of all foods, drinks and narcotics imported, including the inter-Settlement trade, amounted to over 127½ million dollars £13,011,000), a decrease of less than 1¼ million dollars but an increase in sterling of £675,000.

The principal decreases are in opium and rice, and to a much less degree in live animals, sago, tapioca, coffee, tobacco and cigars, birds' nests, and wheat flour.

Increases are seen in dry and salted fish and sugar, followed by spices, milk, oilman's stores, spirits, drugs and chemicals, salt, coriander seeds, and onions and garlic with much smaller advances.

Imports into the Colony apart from the inter-Settlement movements shew rice with a total trade of 451,000 tons, a decrease of 5½ per cent., the average price slightly advancing.

Over 80·7 per cent. of this article was re-exported.

Opium imports amounted to 12,960½ chests, a decrease of 13½, but the average price of Benares opium declined by over 12 per cent.

Of this import 10,711 chests were re-exported, a decrease of 327, with about 25,300 lbs. of the manufactured article, a decrease of 2,000 lbs.

Dry and salted fish imported into the Colony reached 55,000 tons, an increase of nearly 25½ per cent., with a value of over 9 million dollars, an increase of $1\frac{7}{10}$ million.

Imports of sugar amounted to close on 63,000 tons, an increase of about 4 per cent. and in value of $875,000.

From Java 48,214 tons were brought in, or nearly 3,400 more, from Perak about 12,390 tons, a slight increase, and of European beet 1,070 tons, a further decrease of 1,430 tons.

Sugar candy manufactured in Singapore was sent to Hong Kong to the amount of nearly 9,050 tons, valued at $1\frac{7}{10}$ million dollars, an increase of 650 tons and $294,000.

Sales of American wheat flour were less, only 6,700 tons being imported from Hong Kong, a decrease of 72 per cent., while Australian imports rose to 4,800 tons, an increase of over 700 per cent., and Calcutta imports to 2,390 tons, an increase of over 200 per cent.

There was a fall in the total trade of 24,000 tons, or over 5 per cent.

Dry and salted provisions, including butter, biscuits, cheese, tinned goods, and other provisions amounted to 5$\frac{4}{5}$ million dollars, an increase of $217,000.

A new import included in the above figures was frozen meat from Australia to the value of $241,000.

Spirits to the amount of over 1,133,000 gallons were imported, valued at over 2$\frac{3}{5}$ million dollars, an increase of 209,000 gallons at $148,000.

Malt liquors imported reached 885,000 gallons valued at less than 1$\frac{1}{3}$ million dollars, an increase of 34,000 gallons and $39,000.

Of this amount 735,000 gallons represented beer and ale, and the remainder porter and stout.

Imports of tobacco amounted to 107,745 pikuls, valued at over 4$\frac{1}{2}$ million dollars, a decrease of about 22,000 pikuls and $749,000.

Cigars and cigarettes imported valued nearly 1$\frac{3}{5}$ million dollars, an increase of $384,000.

The foodstuffs of importance shewing increased values received were lard, onions and garlic, tea, salt and curry stuffs, and decreases are found in raw sago, beans and peas, and vegetables.

The value of raw materials imported into the three Settlements from all places valued over 132$\frac{1}{2}$ million dollars (£13,519,000), a decrease of over 3$\frac{1}{10}$ million, but an increase in sterling of £514,000.

Tin and tin ore accounted for an increase of over one million dollars, raw textiles for a decrease of over $\frac{3}{4}$ of a million, and produce and raw materials other than foodstuffs for a decrease of over 3$\frac{1}{3}$ million dollars.

The great decline was in petroleum of 6$\frac{1}{4}$ million dollars, and is explained by the fact that in previous years large quantities were treated as import and export which merely used the port for storage purposes, while in 1905 only the oil actually sold from Singapore was recorded.

Other declines were gambier, timber and planks, raw hides, liquid fuel, India rubber and coal, but there were large increases in copra and Borneo rubber, Para rubber and gutta percha, particulars of which are given under export quantities and values.

Coal imports amounted to 641,000 tons, an increase of 21,000 tons.

Tin ore brought into the Colony amounted to 56,329 tons, a decrease of 3 per cent. The Federated Malay States, except

Pahang, all sent less, the total from all these States shewing over 51,300 tons, a decrease of 2,440 tons.

Australia and the Dutch Islands sent less, but from the Siamese Dependencies over 2,202 tons were received, or more than double the quantity sent in 1904.

Manufactured articles imported into the three Settlements amounted to nearly 71$\frac{3}{5}$ million dollars (£7,316,000) in value, a decrease of over one million dollars, but an advance in sterling of £352,000.

In the textile division, however, there was an advance of nearly 1½ million dollars, increases being seen in cotton piece goods, yarn, sarongs and apparel, though declines are noted in jute, gunnies, silk piece goods, umbrellas, and woollen cloth.

Over 4$\frac{3}{4}$ million pieces of cotton goods were imported into the Colony, being an increase of more than half a million pieces and of more than 1$\frac{3}{5}$ million dollars in value, compared with the imports of 1904.

From the United Kingdom over 4 million pieces were received, valued at nearly 14$\frac{1}{5}$ million dollars, an increase of 18½ per cent. in quantity and 15½ per cent. in value. The Continent of Europe sent 441,000 pieces, valued at over 1$\frac{3}{5}$ million dollars, a decrease of 3,000 pieces but an increase in value.

Over 83 per cent. of the total quantity, an increase of 4 per cent., and 83½ per cent. of the value, an increase of 3½ per cent., represented imports of this class from the United Kingdom. A fall of 25 per cent. in the heavy class of such goods, the production of Indian mills, follows a previous decline.

Yarn was a good market, an enormous increase being noted in the dyed, much of which, however, was short reeled from Glasgow and the Continent.

Grey yarn, with a total import of 14,376 bales, increased by 1,017 bales, and dyed yarn, with an import quantity of 11,498 bales, increased by 3,955, but the imports of grey yarn the previous year were the poorest since 1900, and the figures were only slightly over those of 1903.

Imports of sarongs, slendangs, and kains amounted to 347,654 corges of 20 pieces each, valued at over 7 million dollars, a trifling increase in quantity but in value nearly three-quarters of a million dollars.

In quantity the United Kingdom sent an increase of 2½ per cent., and the Continent a decrease of 4 per cent.

Indian and Java imports shew little variation.

Jute gunnies from Calcutta valued over 4 million dollars, a decrease of $472,000, China, French-Indo China, and Siam having reduced demands.

Manufactured metals imported into the Settlements valued nearly $9\frac{7}{10}$ million dollars (£990,000), a decrease of over $1\frac{1}{5}$ million dollars and in sterling of £69,000.

The United Kingdom sent to the value of $5\frac{4}{5}$ million dollars, a decrease of 14 per cent.; the Continent of Europe to the value of $2\frac{3}{10}$ million dollars, a decrease of about the same percentage, and the United States to the value of $360,000, an increase of 41 per cent.

Out of 25 metals enumerated, increased quantities from the United Kingdom are seen in eight only, from the Continent in ten, and from the United States of America in eight.

Decreases were seen in the values of brassware, copperware, tinware, yellow metal sheathing and zincware imported, and increased values in tools and zinc sheathing.

Miscellaneous manufactures not included under textiles and metals show an import into the Settlements of close on $18\frac{1}{2}$ million dollars, a decrease of nearly $1\frac{1}{5}$ million dollars.

The largest declines were seen in fireworks, cement, clocks and watches, carriages and carriage materials, lamps and lampware, crockery, dynamite, cabinetware, perfumery, candles, musical instruments, bricks and tiles, and japanware.

Increased import values were observable in jewellery, tanned hides, soap and soda, and woodenware.

A heavy fall is recorded in the quantity of British cement imported, about 41,200 casks, valued at $196,000, giving less than half the quantity and about 56 per cent. less value than in 1904.

Continental brands rose from 89,000 casks in that year to more than 118,000, and Hong Kong cement, with a total of 34,370 casks, gives an increase of about 1,500.

Prices of English cement have been slightly lowered, and it is believed the prospects for 1906 are most favourable.

Of paints and dyes, the United Kingdom sent to the value of $542,000, a decrease of 7 per cent., the Continent to the value of $279,000, an increase of $10\frac{1}{2}$ per cent., and the United States to the value of $40,000, an increase of 21 per cent.

Export Quantities and Values.

The total value of exports from Singapore to all places, including bullion and specie, was nearly $211\frac{7}{10}$ million dollars

(£21,590,000), a decrease of nearly $31\frac{9}{10}$ million dollars (£1,741,000).

Bullion and specie, however, accounted for a decrease of $29\frac{1}{2}$ million dollars.

Foodstuffs and manufactured articles shew increased values, the decline being noted under raw materials in petroleum. which if eliminated in both years would shew an increase in the total exports of $2\frac{1}{4}$ million dollars from outside places.

Penang exports to all other ports amounted to close on 81 million dollars (£8,277,000), an increase of over $1\frac{3}{5}$ million dollars or £678,000.

Bullion and specie shew a decrease of nearly $12\frac{8}{10}$ million dollars, leaving an increase in merchandise of $14\frac{2}{5}$ million dollars.

Foodstuffs advanced by nearly $3\frac{3}{4}$ million dollars, tin by $7\frac{3}{4}$ million dollars, produce by nearly $600,000, and manufactured goods by $2\frac{2}{5}$ million dollars.

Malacca exports amounted to over $3\frac{3}{5}$ million dollars (£372,000), an increase of $274,000 and in sterling of £50,000, but after excluding bullion and specie the increase was $56,000 and £5,000.

An increase in all classes is recorded and especially in copra, tramway materials, swine, tin ore, and gunnies.

The value of foods, drinks, and narcotics exported from the three Settlements was over 112 million dollars (£11,426,000), an increase of over $5\frac{1}{2}$ million dollars and in sterling of £1,216,000.

These are more or less reflected in the imports which have been already treated of except spices, sago, tapioca, and a few other local products.

The value of raw materials exported to all places in the Straits Settlements was nearly $127\frac{1}{2}$ million dollars (£13,017,000), an increase of over $3\frac{1}{4}$ million dollars.

Raw textiles decreased by $646,000, produce and other raw materials by nearly one million dollars, but tin and other unmanufactured metals advanced by nearly $4\frac{9}{10}$ million dollars.

Advanced output marked the trade in Areca-nuts, preserved pineapples, sago pearl and black pepper, and decreases in pearl tapioca, coffee, white pepper, sago flour and nutmegs.

All spices exported shew 70,423 tons, an increase of about 17,900 tons.

Over 48,000 tons of tapioca were exported, a decrease of over $12\frac{1}{2}$ per cent., prices making a sharp advance towards the end

of the year in pearl and flake, so that rates on 31st December were 43 per cent. higher than on 1st July.

From Singapore over 548,000 cases of preserved pineapples were sent out, valued at over 2¾ million dollars, an increase of 100,000 cases and $318,000.

In the class produce and raw materials other than textiles or metal, Singapore exports fell by 1¾ million dollars, which, however, is more than covered by the decline in the value of petroleum exported.

Small consignments of produce were on several occasions shipped back to the country of origin, failing to find a sufficiently remunerated market in Singapore.

The phenomenal rise in copra production has been noted and an extension of the industry for extracting oil and vegetable tallow absorbs more of the product—the imports considerably exceeding the exports.

The output of all gums was nearly 29,500 tons, an increase of 3,840 tons.

Jelutong and inferior rubbers and guttas were exported to the amount of nearly 12,300 tons, an increase of 1,340 tons.

Some of this low quality other than jelutong is re-boiled, mixed, and then sent out at a higher value as gutta percha.

Gutta percha was exported to the amount of nearly 42,100 cwts., an increase of 8,825 cwts., but the bulk sent was of poor quality averaging less than $67½ per cwt. compared with $92½ in 1904, while the market quotations for the best quality (fine red) was $300 to $500 per pikul of 133⅓ lbs., $150 to $300 for first quality mixed, and $90 to $150 for medium; the lowest class ranging from $12 to $80.

Borneo and India rubber exports reached 54,051 cwts., an increase of 16,666 cwts., the price of Borneo rubber averaging over $101½ per pikul, a decrease of more than 5 per cent.

Para rubber exported records 1,973 cwts., but most of this was transhipped from the Federated Malay States.

Rattans exported totalled 25,367 tons, much the same as in 1904, and the average price of the principal kinds slightly advanced.

Gambier exports shew a continuous fall from year to year, the total recorded being 36,803 tons, a decline of nearly 3 per cent.

Exports of refined tin amounted to 58,878 tons, an increase of 2,320 tons.

The highest price locally was $88¾ per pikul, with exchange at 2*s.* 2½*d.*, and the lowest $76½ with exchange at 2*s.*; the average market price, however, worked out at $80.57 per pikul, an increase of nearly 3 per cent.

Exports to the United Kingdom, India and the Continent, generally, increased, but fell to the United States and Japan.

Trade with other Countries in Merchandise.

Imports from the United Kingdom amounted to 33¾ million dollars, an increase of over 3½ per cent., and exports thereto over 56¾ million dollars, an increase of over 4¾ per cent.

Imports increased largely in cotton piece goods, yarn, blankets, paper and stationery, followed by smaller increases in soap and soda, biscuits, cigars and cigarettes, and sewing thread.

The following articles shew declines:—Ironware and hardware, brandy, cement, machinery, tramway and railway materials, woollen cloth, lamps, steel, and canvas.

Exports increased in tin, gutta percha, Para rubber, sugar, and Borneo rubber, followed by smaller advances in gum, copal, rattans, copra, and wax.

Decreases were seen in the values sent out of Gambier, black pepper, tapioca, pineapples and India rubber, and to a less extent in nutmegs, benzine, fishmaws, and hides.

Imports from the Continent of Europe amounted to 16¾ million dollars, a decrease of 16¼ per cent., and exports over 33 million dollars, a decrease of 2¾ per cent.

German imports fell by 11½ per cent., Belgian and French by about one-half per cent. each, Austrian by 15 per cent., Spanish by 21 per cent., and Russian by 2 $\frac{7}{10}$ million dollars, shewing a trade of $16,000 only.

Increased percentages are seen from Italy by 10, Holland 9¼, Denmark 29½, and Sweden 6 per cent.

As previously mentioned, if Russia, which sends oil only, were excluded, the imports from the Continent would shew a decrease of 3¼ per cent.

Declines are seen in the values of hardware and ironware, cotton piece goods, watches and clocks, lamps, tramway materials, and perfumery from Germany, increases being noted in apparel, hosiery, &c., cement and telephone materials.

From Italy imports increased in milk, cotton piece goods and apparel, but fell off in sarongs.

Dutch imports rose in sarongs, cotton piece goods, gin and yarn, and Belgian goods brought in shew an increase in milk, but a decline in metals.

From France greater values of brandy and machinery are recorded, but silk piece goods and perfumery declined.

Austrian goods declined in sugar and hardware, but rose in apparel and cement.

Denmark sent increased values of cement, butter, and cheese.

Swedish supplies are principally bar iron and matches.

Exports to France declined by 12 per cent., to Germany by 8 per cent., to Italy by 8½ per cent., to Holland by 19 per cent., to Denmark by 6½ per cent., and to Sweden by $93,000, having a total trade of $16,000 only.

Exports to other countries shew the following increased percentages:—Russia, nearly 38½ per cent.; Austria, 19 per cent.; Belgium, over 57 per cent.; and Spain, 3½ per cent.

To France the declines were in copra, gutta percha, sago flour and to a less extent gambier, coffee, jelutong and tapioca, but tin and Borneo rubber shew advanced values.

To Germany gutta percha, white pepper, jelutong, gum copal and gambier values declined, but copra, Borneo rubber, tin, preserved pines and oil cakes shew increases.

Tin to Italy decreased, followed by pepper and gambier, but copra gave a small advance.

Copra rose to Russia as well as tin, but sticklac values fell.

To Austria tin and copra increased, but pepper shewed a heavy fall.

To Holland cigars and tobacco fell off in values, followed by hides and gutta percha, but tin values increased.

Copra sent to Belgium, Spain, and Denmark increased in value, as well as tin, and gambier to the first-named country.

To Denmark, gambier increased, but black pepper declined, sago flour to Spain also declining and pearl tapioca to Sweden.

Imports from the United States of America valued $3,280,000, an increase of 41 per cent., and exports thereto over 36¼ million dollars, an increase of 3¾ per cent.

Imports of wheat flour not included in these totals being purchased from Hong Kong valued $1,928,000, a decrease of no less than $801,000.

Import values increased in petroleum, cigars and cigarettes, tallow and lard, and lubricating oil.

Export values increased in black pepper, Borneo rubber, coconut oil, inferior guttas, and gum copal, followed by gutta percha and raw hides.

Declines, however, were exhibited in the values of coffee, gambier, and tin, and to a less extent in nutmegs, white pepper and rattans.

Imports from British India, including Burma, shew slightly under 44 million dollars, a decrease of over 8⅓ per cent., and export values thereto nearly 13 million dollars, an increase of over 13 per cent.

Opium and gunny bags from Calcutta, rice, bran, petroleum, and beans and peas from Burma, and opium, cotton piece goods, and yarn from Bombay, all declined; while coal, wheat flour, and ghee from Calcutta, hides, cigars, fishmaws, fish, dry and salted, and gunny bags from Burma, sarongs, goat skins, salt, onions and garlic, and cattle from Madras all exhibit advances.

Exports increased in values of areca-nuts, sticklac and tin to Calcutta, coconuts, dry and salted fish, tin, areca-nuts and curry stuffs to Burma ports, areca-nuts and tin to Bombay, and sugar and goat skins to Madras.

Declines were seen in the values sent of petroleum to Calcutta, of raw silk and by much less amounts of matches and apparel to Burma, gum benjamin to Bombay, and areca-nuts and cotton piece goods to Madras.

From Netherlands India imports valued over 49½ million dollars, a decrease of 4 per cent., and exports thereto close on 41 million dollars, a decrease of $31,000 only.

Imports from Java increased by 5½ per cent., sugar, sarongs lubricating oil, copra and coffee all advancing, while tapioca flour, black pepper, indigo, poultry and birds' nests fell off by smaller values.

From Sumatra imports decreased by 16 per cent., petroleum and liquid fuel, tobacco, raw cotton, black pepper, india rubber and raw sago all declining, but Borneo rubber, beeswax, copra and gutta percha increased.

Imports from Dutch Borneo decreased by nearly 4 per cent., petroleum and liquid fuel, dried fish, gum copal and damar shewing less values; while increases are noted in Borneo rubber, coal, gutta percha, copra, white pepper and coconut oil.

From the Celebes nutmegs, rattans, raw hides and mace all fell off, as well as petroleum from the storage tanks at Pulau Sambu, opposite Singapore, and gambier, timber, nutmegs and tin ore from the Dutch Islands, but tin, copra, dried fish and gum copal gave increased values received.

Copra from Bali rose enormously in value, and coffee also advanced, but values of cattle and swine fell off.

White pepper values decreased from Achinese ports, but areca-nuts shew an advance.

Copra from the Natunas Islands increased in value and white pepper from Rhio also gave an advance, gambier, however, declining.

A decrease of nearly 9 per cent. in values marked the export trade to Java—rice, coconut oil, coffee, sarongs, grey yarn, and tea all declining.

Dried and salted fish increased, however, and by much smaller advances curry stuffs, earthenware, and paints.

Exports to Sumatra increased by over 22¼ per cent., for which enhanced values of rice, cotton piece goods, cattle, dried and salted fish are chiefly responsible; opium, crude oil, and earthenware fell off.

Exports to Dutch Borneo decreased by 13¼ per cent., seen chiefly in less values of rice, ironware, machinery, coconut oil, and petroleum sent.

To the Celebes, grey yarn, rice and gunnies increased, but to the Dutch Islands there was a fall in the value of petroleum sent.

Values of rice and Benares opium to Bali increased in value; to Achinese ports the declines were numerous, sugar alone slightly rising in values sent, and both rice and opium values declined to Rhio.

Imports from the Federated Malay States amounted to close on 76 million dollars, an increase of over 2 per cent., and exports thereto to 31 million dollars, an increase of nearly 29 per cent.

It is probable, however, that more accurate returns are now given by native traders in consequence of a new law in operation regulating imports and exports in these States.

The trade by land is not included in these figures, nor the large transhipments at Straits ports from Europe and elsewhere.

Values of tin and tin ore, Para rubber, gutta percha, and sugar all advanced, coffee alone shewing a fall.

There were no decreases of note in the exports, numerous advances marking the trade in most articles especially seen in higher values of rice, cotton piece goods, sugar, dried and salted fish, bran, paper and paperware, beans and peas, tobacco, Kachang oil, tea, medicines, milk, ground-nuts, and cigars and cigarettes.

Imports from Hong Kong and China amounted to over 28¼ million dollars, a decrease of 11½ per cent, and exports under 16 million dollars, a decrease of over 12 per cent.

Silk piece goods and wheat flour fell heavily in values, followed by cotton piece goods, lard, fireworks, paper and paperware, apparel, fish, dried and salted, raw silk, provisions, medicines, opium and tobacco.

There were no increases of note.

Petroleum sent had an enormous decline, followed by rice, raw cotton and black pepper.

Increases were numerous, though not of much moment, principally in sugar and candy, preserved pines, fish, dried and salted, goat skins and ground nuts.

Imports from French and Indo-China amounted to 4$\frac{3}{10}$ million dollars, an increase of nearly 6½ per cent., and exports over 2 million dollars, a decrease of more than 16 per cent.

Increased values of imports are shewn in dried and salted fish and swine, but declines are found in the values of rice, raw silk, sticklac and salt received.

The value of gunnies exported fell, areca-nuts and lubricating oil, however, shewing advances.

From the Malay Peninsula, excluding the Federated Malay States, viz., from Johore, Kelantan, Patani, Singora, and Tringganu, imports amounted to nearly 14⅕ million dollars, an increase of over 2½ per cent., and exports thereto to over 5⅘ million dollars, an increase of more than 4 per cent.

Import values from Johore fell in gambier, tin ore and fresh fruits, but increased in areca-nuts, copra, black pepper and gutta percha.

Tin ore and rice from Tringganu fell in value, but copra from Kelantan gave an increase.

Values of swine and rice from Singora declined, and tin and cattle from Patani advanced.

Exports to Johore fell in the values of rice and provisions sent.

Cotton piece goods increased to Kelantan and Patani, and petroleum and yarn to Singora.

Imports from Australia were valued at 2⅔ million dollars, an increase of over 37 per cent., and exports at over 1¾ million dollars, an increase of 32½ per cent.

Wheat flour, coal and fresh meat values account for the larger increases, tin ore, however, falling off.

Exports of tin, copra, and tapioca advanced, but white pepper showed a smaller value sent.

Imports from Japan were valued at nearly $6\frac{2}{3}$ million dollars, a decrease of $19\frac{1}{4}$ per cent., and exports at over $2\frac{2}{3}$ million dollars, a decrease of over 37 per cent.

The fall in the value of coal alone accounted for more than the decrease, other items shewing no great change.

The value of tin sent fell, as well as that of petroleum and rice, but small advances are seen in tinware, manure, preserved fruits and coconut oil.

The value of imports from Siam and Siam West Coast was $30\frac{4}{5}$ million dollars, an increase of $9\frac{3}{4}$ per cent., and exports thereto over $16\frac{1}{4}$ million dollars, a decrease of $1\frac{3}{4}$ per cent.

Rice imports shewed a large advance, followed by bran, black pepper, and sticklac.

Declines were observable in fish, dried and salted, and raw hides, followed by swine, silk piece goods, and padi.

Export values fell in opium, gunnies and to a much smaller extent in areca-nuts.

The principal increases were in sugar, dyed yarn, cotton piece goods, and apparel sent.

Imports from Sarawak amounted to over 5 million dollars, an increase of over 9 per cent., and from British North Borneo a value of $852,000, an increase of nearly 70 per cent.

Rubber, rattans and gutta percha from Sarawak gave increased values, but sago flour and salted fish fell.

Rattans from British North Borneo increased in value, followed by gum copal, beeswax and sago flour.

Exports to Sarawak reached over $3\frac{1}{2}$ million dollars, an increase of over 56 per cent.; to British North Borneo nearly $1\frac{2}{5}$ million dollars, an increase of nearly 26 per cent.

Enhanced values were sent to Sarawak of rice, fish, tobacco, and cotton piece goods, and to British North Borneo of rice and cotton piece goods.

Observations on Trade.

From the middle of May to early in July, trade in piece goods was brisk, but August and September were poor months, nor did October and November show much better, and it was not till December that a marked improvement took place.

The buying season for Bangkok began earlier than usual, and at the close of June dealers bought largely, but when exchange rose buyers in Siam were slow to purchase, holding off in the natural expectation that prices would fall, with the result that local dealers were only able to take deliveries very slowly and were compelled to write off a very heavy percentage on the value of their stocks.

There was no advance in American or Japanese cottons, the former being too expensive a class for this market, while the qualities of the Japanese article are so much poorer than the Manchester goods, that the margin in price in no way compensates.

Stocks in importers' hands were very heavy at the close of the year, especially in white shirtings and prints.

Although it is probable that a more direct business is done with Bangkok in certain goods, such as prints and some lines of whites, the standard demands are still met from Singapore.

On the East Coast of the Malay Peninsula there was a good demand for dyed yarn, though at times the shortness of rains prevented quick deliveries.

Rough goods were a moderate market with keen competition throughout the year, and with the constant rising exchange anxiety to sell was manifested sometimes at prices little above cost.

Several heavy failures of import dealers occurred during the year, much the larger portion of the losses falling on foreign firms, which it is understood are more ready to grant long credits than their British competitors.

It was necessary to considerably curtail credits towards the end of 1905.

Taking the twelve principal articles of produce, viz., tin, gambier, pepper, copra, coffee, hides, sago, rattans, tapioca, gutta percha, Borneo and India rubbers, and gum copal, the volume exported increased by 13,570 tons.

Copra alone rose so enormously that the increase was 18,150 tons, and therefore if it were eliminated there would be a decrease in the other eleven articles of 4,580 tons.

On a few occasions small shipments of produce sent to this market were returned to the country of origin, having failed to meet with sales at the prices wanted.

The New York Freights Conference raised rates in August, with one or two exceptions, to the level of London.

Both imports and exports of all classes increased with the United Kingdom, decreased in both with the Continent, and increased in both with the United States, particular details being found under "Trade with Other Countries" in this report.

The average daily demand rate of sterling exchange was 2*s.* 0 $\frac{9}{16}$*d.*, compared with 1*s.* 11*d.* in 1904, or an increase of over 6½ per cent.

By taking the highest and lowest quotations for each month, the results 4 months' sight obtainable for the two years are in 1904 1*s.* 11 $\frac{3}{16}$*d.* and 2*s.* 0¾*d.* in 1905

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 18,890,600, as compared with 18,267,499 in 1904. The amount realised by light dues was $223,540.

Particulars of the shipping are given in Appendices G., H., and I. One thousand and two vessels, aggregating 9,025 tons, were built in Singapore in 1905, the figures for the previous year being one thousand and seventy-nine and 19,205 respectively.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

Pine-apple cultivation in Singapore has increased even more than it did last year.

There has been also a further extension of Para rubber in Singapore and in Malacca. The cultivation everywhere is increasing, and the demand for seed from the Gardens is larger than can be supplied. The experiments in the Botanic Gardens were continued, and a report on them was published. The rubber made during the experiments was sold at 6*s.* 9¼*d.* per lb., the highest price then procurable.

Indigo cultivation still remains as it was last year in Singapore, there seems to have been no increase, nor any appreciable decrease.

Coconut plantations have increased in Singapore, considerable extension having taken place in the direction of Tampenis.

Pepper has shown no sign of increase, nor has citronella grass.

Considerable attention has been lately directed to fibre cultivation, chiefly in the matter of sanseviera. It is probable that the next few years may see a development of this industry.

The fruit crop in Singapore was poor last year, but good in Penang.

The agricultural exhibition held in Penang last year was undoubtedly the best ever held in the East. The produce shown was not only very extensive, but some of the exhibits, especially of rubber, were of a high order of excellence; a large number of prizes for the most important produce were taken by Colonial exhibitors.

No new rubber estates have been opened in the province, but the existing estates which grow rubber are largely extending this cultivation. A feature of one large estate is the granting of land to Chinese squatters who cultivate tapioca and other surface crops on condition that they plant and tend Para rubber, which will eventually become the chief crop. Other cultivations remain about stationary.

The failure of the Sea Island cotton, which was extensively experimented with at Golden Grove Estate, proves definitely that even that variety is equally with the Egyptian variety unsuitable for this country.

Land Grants.

Appendix F. shows the number of land grants issued, the area alienated, and the amount of praemia paid in the three Settlements during the past three years.

LEGISLATION.

Twenty-four Ordinances were added to the Statute Book during the year. Of these, thirteen contain amendments of previous enactments, the most important being an Ordinance to amend and consolidate the law relating to railways, and to bring it into line with the law in force in the Federated Malay States.

The principal Ordinances containing new legislation were the following:—

The Tanjong Pagar Dock Ordinance, whereby provision was made for the expropriation of the undertaking of the Tanjong Pagar Dock Company, Limited, and its management by the Government of the Colony; the Medical Registration Ordinance established a Medical Council for the Colony on the lines

of the General Medical Council, to control and register qualified medical practitioners; the Poisons Ordinance, to regulate the possession and sale of poisons; the Straits and Federated Malay States Government Medical School Ordinance, by which a school of medicine was established in Singapore in order to provide facilities for the study of medicine, surgery, and midwifery; and an important Ordinance dealing with Mohammedan and Hindu Religious and Charitable Endowments, many of which in the past have been greatly mismanaged. Power is given to the Governor to appoint a Board in each Settlement to administer, manage, and superintend such trusts as may be determined by the Governor in Council if it should appear to him that they are being mismanaged, or that there are no trustees for their management, or that it would otherwise be advantageous for them to be placed under the Board's control.

An Ordinance was also passed to enable the Governor in Council to make rules for the control of fisheries within the waters of the Colony, with the object of preserving and fostering the the industry as far as possible.

In view of the impending necessity of raising a loan for works in connection with the harbour, and for other public works, a short Ordinance was passed towards the end of the year to enable the Government to raise, in 1906, temporary loans on Treasury bills or loan notes.

EDUCATION.

Nearly all the schools of the Colony are vernacular schools for Malays, under the direct control of Government. All the expenses of these schools, which are 172 in number, are defrayed by Government, and they provide free tuition in Malay to some eleven thousand pupils. The remaining schools are, with the exception of five which are controlled and financed by Government, aided-schools managed by private bodies, and receive grants-in-aid from Government.

In 30 schools English only is taught, in four English and Tamil, and three Tamil only, and in one Chinese only; the numbers of pupils enrolled in these four classes of schools are 9,120, 310, 90, and 31 respectively. The average daily attendance at vernacular schools was 8,622, and that at schools where English only is taught was 8,442. There are, in addition to the Government and aided-schools, a few private schools, which are not inspected by Government. These are chiefly Chinese vernacular schools.

The net expenditure on Government schools was $79,274, on aided-schools (English, Anglo-Tamil, Tamil, and Chinese) $67,412, and on Government vernacular schools $91,225.

The cost of the Melacca training college for Malay teachers during the year under review was $10,737. The value of this institution is considerable, and it produces very good teaching material for the vernacular schools. The demand, however, for trained teachers, more especially in Penang and Province Wellesley, is much in excess of the supply, and it will be some years before the schools in these Settlements are staffed exclusively by trained men.

The commercial and science classes at the Raffles Institution have made satisfactory progress during the year.

GOVERNMENT INSTITUTIONS.

Hospitals.

Practically all the hospitals of the Colony are under Government management, while the estate hospitals maintained by the planters are under Government supervision. The total number of admissions to the hospitals, exclusive of the lunatic asylum, was 23,762, as against 23,462 in 1904. In Singapore 228 patients were admitted into the lunatic asylum.

The usual returns will be found in Appendices J. 1, J. 2, and J. 3.

Reformatory.

The number of boys in the Reformatory at the end of the year was 43; the highest number during the year was 75 and the lowest 42. The new permanent buildings, to accommodate 120, will be finished early in 1906. The health of the inmates has been good throughout the year. Instruction is given at the school in English and Romanized Malay, and at the workshops in tailoring, carpentering, and shoemaking. The expenditure amounted to $8,984, as against $9,111 in 1904.

Savings Bank.

The transactions in this branch amounted to $369,970 (deposits) and $391,066 (withdrawals), as compared with $376,480 and $411,796 in 1904. The amount standing to the credit of depositors at the end of the year was $558,451 (in 1904 $564,119).

The investments at the close of the year stood at $579,238, as compared with $576,782 at the corresponding period of the previous year. The details are as follows:—

	$
India 3½ per cent. Rupee Paper	333,187
Singapore Municipal Debenture Stock, bearing interest at 5 per cent.	58,000
Singapore Municipal Debenture Stock, bearing interest at 4 per cent.	95,000
Fixed Deposits at the Chartered Bank, at 4 per cent.	35,000
Cape Stock, at 3 per cent.	8,516
Queensland Stock, at 3 per cent.	16,212
Zanzibar Government 3 per cent. Guaranteed Loan	15,535
Cardiff Corporation Stock, at 3 per cent. ...	17,788

POLICE.

One Assistant Superintendent was appointed and one died.

One Assistant Superintendent was seconded for three years for service as Superintendent of the Tanjong Pagar Dock Police.

Eleven European constables were enlisted locally.

Twenty-seven murders and eighty-five gang-robberies were reported during the year; of the latter 25 were proved in the preliminary investigation to be false.

The police force numbers over 2,000 men, of whom more than 300 are Sikhs.

VITAL STATISTICS.

The estimated population of the Colony was 603,460, the figures given by the Census of 1901 being 572,249. Seventeen thousand two hundred and fifty-four births were registered, as against 15,244 in 1904. The usual statistics are given in Appendices T. 1, T. 2, and T. 3.

The death-rate was 40·53 per mille of the population. The rate in 1904 was 39.

The following table shews the cases of zymotic diseases and deaths therefrom for 1905 and 1904, not of course including the imported cases:—

—	Plague.				Cholera.				Small-pox.			
	1904.		1905.		1904.		1905.		1904.		1905.	
	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.
Singapore	20	20	18	17	3	3	22	19	33	11	23	11
Penang	—	—	2	2	—	—	*1	1	3	2	5	5

Malacca	—	—	—	—	—	—	—	—	100	7	18	—

* Choleraic Diarrhœa.

In Singapore, Penang, and Malacca the general arrangements for sanitation and conservancy are carried out by the Municipality, and in the several districts of Province Wellesley by Sanitary Boards with powers under the Municipal Ordinance.

Climate.

The mean temperature of the Colony is shown in Appendix U.

The mean rainfall in Singapore was 83·4 inches; in Penang, 80·52 inches; in Province Wellesley, 72·27 inches; in the Dindings, 86·65 inches; and in Malacca, 71·99 inches.

The greatest fall in 24 hours was 6·3 inches in Malacca on the 19th of July (Appendix V.).

POSTAL, TELEGRAPH, AND TELEPHONE SERVICE.

Over 16,100,000 articles passed through the Post Office, of which nearly 586,000 were registered.

The postal revenue amounted to $509,094, as against $466,403 in 1904. The expenditure was $425,819, an increase of $90,059 over that of the preceding year. The money order business showed a decrease of $258,240, due to the fact that the Colonial Post Office is no longer the intermediary for the exchange of money orders between the Federated Malay States and India and Ceylon. Excluding such "through" orders, there was an increase of $88,571. The transactions in sterling amounted to £23,654, and those in Indian currency to Rs.2,226,051, while in local currency business was done to the

extent of $481,908, the aggregate being thus $2,206,205, as against $2,464,545 in 1904 and $2,066,641 in 1903.

The telegraphs in Penang and Province Wellesley and the inland lines in Malacca, all of which are connected with the Government system of the Federated Malay States, are the property of Government.

The telephone system of Singapore is the property of the Oriental Electric and Telephone Company. This company also maintains for Government the lines connecting the Government Offices and Police Stations, &c. There is a branch exchange at Johore Bharu, which is connected with Singapore.

The telephone lines in Penang and Province Wellesley, 590 miles in length, are owned and worked by Government. The system in use is the metallic circuit in Penang, but in Province Wellesley earth returns are used. The number of subscribers at the end of the year was 280, and there were in addition 75 service lines.

The Malacca telephone system is also worked by Government, and consists of 151 miles of service lines.

MILITARY.

The garrison in Singapore consisted of two companies of Royal Garrison Artillery, half a company of Royal Engineers, one battalion of British Infantry, and one battalion of Native Infantry, besides Asiatic Artillery (Sikhs) and Malay Submarine Miners, with details of other corps. No Militia force exists. The strength of the garrison was 2,336, all ranks.

A detachment of the Malay States Guides was quartered in Penang.

The military contribution of the Colony in respect of the year 1905 amounted to $1,911,585.

A Volunteer Artillery Force 125 strong (including reserves) exists in Singapore. Only Europeans are enlisted in it. Its principal armament consists of a complete battery of 10 pr. B. L. screw guns, utilised with 7 pr. limbers as a field battery with pony draught. It also possesses four Maxim guns (·303) in the use of which it is proficient. This corps is armed with Martini-Metford carbines and sword bayonets.

A Maxim company, 47 strong including reserves, has been formed to work the four guns belonging to the Singapore Volunteer Artillery, which latter unit is not at present sufficiently strong in numbers to man both the 10 pr. B. L. battery and the four Maxims.

There is one company of Volunteer Engineers, composed of Europeans, 32 strong (including reserves).

There is one company of Eurasians and one company of Straits-born Chinese, 77 and 92 strong, respectively, including reserves.

A Volunteer Infantry force 100 strong is also in existence in Penang and is reported to be efficient.

The Malacca Corps was disbanded during the year.

There is in addition in Singapore a bearer and ambulance section composed of eight Europeans, 16 Eurasians, and seven Chinese (Straits-born), and a Cadet Corps, 61 strong, armed with Martini-Metford carbines. In Malacca there is a Cadet Corps 57 strong, also armed with Martini-Metford carbines.

PUBLIC WORKS.

SINGAPORE.

New works and the completion of works begun in the previous year amounted to $1,318,298, in addition to the usual charges for maintenance and current repairs of roads and buildings. The principal items were the new building for the Central Police Station, in which the Court of Requests is also accommodated, an additional strong room for the Currency Commissioners, to receive that part of the silver reserve for which there is no room in the main vault, the reconstruction of the Reformatory, and the completion of the new English School at Outram Road. Progress was also made with the new building for the Government Printing Office, the Beri-beri Hospital at Pasir Panjang, the extension of the Raffles Library and Museum buildings, and the new school at Victoria Bridge.

The extension of the West Coast Road and the bridge over the Pandan River were completed, as were the construction of a *pierre perdue* shield at Tanah Merah, and the reconstruction of the police bridge at Changi.

PENANG.

The cost of the new public works, &c., was $438,121. New quarters were built for the Assistant Surgeon at the Pauper Hospital, the roof and ceiling of the Civil Prison were repaired, the additional wing to the Supreme Court was built, thus completing the design, the Weld Quay Reclamation and that north of Swettenham Wharf were continued, a new store at Sungai Pinang was built for the Public Works Department, and a

new light was obtained for the Pulau Rimau Lighthouse. In Province Wellesley the Colonial Surgeon's quarters at Butterworth were reconstructed, Bukit Mertajam Market was finished, several Vernacular Schools were roofed with tiles, additions and alterations were made to the quarters of the District Officer, Nibong Tebal, and a new landing place and a sluice gate and wall were provided at Nibong Tebal.

The roads on Penang Hill were improved, and the extension of the Batu Feringgi Road proceeded with. Six bridges in the Province were renewed in iron and masonry, the Butterworth Jetties were repaired, the Muda Bund was strengthened, the retaining wall at Sungai Rambai was extended, and two new iron pontoons were replaced in the bridge at Nibong Tebal. Progress was made with the renewal of ten other bridges in iron and masonry, while work was done on the new road from Ginting to Jalan Baharu, and in the Dindings the completion of the Sungai Rotan Road was further advanced.

MALACCA.

The new Residency, new Municipal Office, new Harbour Office, and a new ward at the Hospital were completed. New condemned cells and an execution chamber were built at the prison, the telephone system was extended by five miles to Sungai Rambai on the Muar border, and the High School was extended. Several important works were carried out in connection with the river—dredging at the mouth was continued, and a reclamation of over 26,000 square feet completed; three small rubble groynes, each 100 feet long, were constructed on the Banda Hilir foreshore to assist natural reclamation, and the North and South Groynes at the mouth of the river were extended to a total length of 1,720 and 1,325 feet respectively. The total amount spent on public works in Malacca was $135,926, exclusive of railway expenditure amounting to $499,690, subsequently reimbursed by the Government of the Federated Malay States.

IMMIGRATION.

(*a.*) CHINESE.

The number of immigrants from Chinese ports shows a reduction of 15·5 per cent. upon the number for 1904 and of 21·4 per cent. upon that for the record year 1903. The figures for female immigrants show corresponding reductions of 4·7 per cent. and 5·6 per cent. The proportion of women to men among Chinese immigrants rises steadily though slowly. The number of "unpaid passengers," *i.e.*, of coolies who obtain free

passages from China in consideration of entering into contracts for service on arrival in the Colony has fallen to 14,866. In the last ten years only one year—1897—has shewn a lower figure. The main cause of the reduction in the number of immigrants is probably good harvests in China.

The returns for the last five years are as follows:—

Year.	Men.	Women.	Children.	Total.
1901	158,809	11,822	8,147	178,778
1902	184,198	13,151	9,807	207,156
1903	193,339	14,539	12,443	220,321
1904	178,650	14,395	10,751	204,796
1905	148,869	13,714	10,548 (*a*)	173,131

(*b*.) Indian.

The figures for the last three years speak for themselves:—

—	1903.	1904.	1905.
1. Statute immigrants	572 (*b*)	2,721	4,823
2. Free coolies (with aided tickets)	1,980	3,556	7,687
3. Other immigrants	19,478 (*c*)	24,475 (*d*)	27,030 (*e*)

(*a*) Boys, 7,377; Girls, 3,171. (*b*) 91 came with ordinary tickets and signed contracts on arrival. (*c*) 1,474 children. (*d*) 1,810 children. (*e*) 2,488 children.

Eighteen thousand seven hundred and ninety-nine adults and 955 children left the Colony for Southern India.

GENERAL OBSERVATIONS.

Sir John Anderson continued to administer the Government during the year. Sir William Taylor having been transferred to the Federated Malay States as Resident-General, Mr. F. G. Penny was appointed Colonial Secretary on the 1st January, but proceeded to Europe on leave of absence in April and has since retired.

The Queen Victoria Memorial Hall, which was erected by public subscription and generous contributions from the municipality and the Government, was formally opened by the Governor in October. The Arbitration Court appointed to determine the amount to be paid as compensation for the expropriation of the Tanjong Pagar Dock Company assembled in

Singapore in October, and after sitting for ten days and hearing the evidence and speeches of counsel for both sides the Court was adjourned.

Tenders were invited for the construction of the harbour improvement works recommended in the report of Messrs. Coode, Son, & Matthews of the 14th of February, 1904, and the tender of Sir John Jackson, Limited, for the construction of the works excluding the two outer moles involving a total cost of about a million and a quarter sterling including all charges, has been accepted, with the option of constructing the outer moles should the Colonial Government so determine.

The Malacca-Pulau Sebang Railway, which connects Malacca with the railway system of the Federated Malay States, was completed and opened for traffic during the year. In view of the expense of maintaining such a small section with an independent staff, an arrangement was made with the Government of the Federated Malay States and the Malacca Railway was transferred to the Government of the Federated Malay States on payment of the total cost of construction. It is understood that the returns from traffic on the railway have been satisfactory.

Towards the end of the year 1905 the rate of exchange began to rise rapidly; the rise being partly due to speculation, but mainly to stringency of the currency. Shortly after the close of the year the rate of exchange was fixed at 2*s.* 4*d.* the dollar, the Currency Commissioners being empowered to issue notes against sovereigns at the rate of sixty dollars for seven sovereigns.

The Straits and Federated Malay States Medical School was established during the year and made a very successful start. The school is endowed by a fund raised almost entirely by subscriptions from the Chinese of the Colony and the Federated Malay States, who responded liberally to the appeal made to them.

On the 13th April, 1905, an agreement was signed in London by certain firms regarding the trade between Japan, China, Manila, Straits, and Malabar Coast to the United States of America viâ Suez.

The purpose of the agreement is to prevent competition for the same cargo among the representatives in the Far East of the signatories thereto, and also to prevent their steamers from clashing while loading. A pooling agreement was entered into on the same date between the owners (including chartered owners) of the steamers then being run or to be run in the trade between the Atlantic ports of the United States of America and the Far East. Severe penalties for breach of the agreement are provided.

One of the clauses of the agreement provides that in fixing rates the agents at Hong Kong and Singapore should endeavour to do so on a basis reasonably profitable to the shipowner without being so high as to attract competition or impede trade in any commodity. No steamer can carry more than 6,000 tons from Japan, China, and Hong Kong, except by the consent of all parties in Hong Kong, and the agreement further sets out that in order to preserve the trade as far as possible for those recently and now supplying it with tonnage it is considered necessary that shippers should be bound to them by a system of deferred rebates made payable to the shippers in the Far East, and steps were accordingly made to carry out this plan.

The effect of the combination has been of course to raise rates very considerably; for instance, the rates on tapiocas and peppers were raised from 25*s.* to 42*s.* 6*d.* and 40*s.*, and gums from 25*s.* to 50*s.*

As in the Eastern Conference provision is made also in the Westward Agreement by which a small ring of merchants (including certain foreign firms) receive, in addition to the general rebate, a further rebate on the total freight of all goods exported to America.

This combination is viewed with considerable alarm, and there appears to be some justification for the complaint that a few favoured mercantile firms should be able to obtain an advantage over other competitors in the way of a secret bonus paid to them for their support to the combination without which support it could not exist.

It is hardly reasonable to suppose that Singapore should be able to retain for ever the whole of the transhipment trade which it has had in the past, with such ports as Macassar for instance, and in the natural course of events direct routes would be selected in preference, but it is also reasonable to believe that the effect of combinations such as those referred to above must be to hasten the change of route and therefore drive and keep away from the port of Singapore a certain amount of trade which formerly was attracted there by the cheapness of freights and the absolute freedom of the port.

E. L. Brockman,

Acting Colonial Secretary.

Singapore,

1st June, 1906.

No. 540.

STRAITS SETTLEMENTS.

(For Report for 1905, *see* No. 502).

THE GOVERNOR to the SECRETARY OF STATE.

Government House,
Singapore,
September 5, 1907.

MY LORD,

I HAVE the honour to transmit copies of the Report on the Straits Settlements for the year 1906.

I have, &c.,
JOHN ANDERSON.

The Right Honourable
The Earl of Elgin and Kincardine,
K.G., G.C.S.I., G.C.I.E.,
&c., &c., &c.

1125 Wt 24282 10/07 D & S 5 30039 A 2

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1906.

FINANCIAL.

The revenue for 1906 amounted to $9,618,314,* that of each Settlement being shown in the following table:—

	$
Singapore	6,043,618
Penang	2,866,816
Malacca	707,880

These figures show that there was a decrease of $2,039,110 as compared with the revenue collected in 1905, and one of $1,128,203 as compared with the corresponding sum in 1904. The revenue proper was less than that of 1905 and 1904 by $692,684 and $1,211,898, respectively.

Increased receipts appear under:—

	$
Stamps	69,330
Post Office and Telegraphs	38,723
Rents	13,766

while decreases are shown under:—

	$
Land Sales	1,346,426
Reimbursements	474,167
Licences	214,839
Interest	97,274
District Collections	35,312

The large decreases in respect of the first two items are explained by the facts that in 1905 the proceeds of the sale of the Malacca-Pulau Sebang Railway (for $1,414,218) were credited to Land Sales, and the accumulated balance of the Widows and Orphans' Pension Fund, transferred to Government (amounting to $470,141), was included under the heading "Reimbursements." The lower revenue from licences is due to the concession made to the opium and spirit farmers in allowing them to defer the payment of a portion of their rents.

The total expenditure in 1906 was $9,333,901, as compared with $10,976,525 and $10,848,989 in 1905 and 1904, respectively. The following table shows the amounts by which the

* Subject to audit.

expenditure on the chief items of the estimates fell below the corresponding figures for 1905:—

		$
Public Works, special services	...	1,172,471
Special expenses	...	642,354
Lands and houses purchased ...	...	294,975
Defence contribution	...	160,506

The expenditure on public works was less than in 1905 owing to the postponement of several large items, while the expenditure in 1905, in respect of special expenses and lands and houses purchased, was abnormal, being due to the payment from general revenue of a sum of $747,581 to the Currency Commissioners, to cover in part the depreciation of securities held by them on account of the Currency Note issue, and to the purchase of the Excise Farm Buildings in Singapore, respectively.

Exchange.

The appreciation of the dollar, due to the restriction of the circulation between 1904 and 1906, gave rise to considerable speculation on exchange. It was certain that the exchange value of the dollar would continue to rise until the point was reached at which it could be fixed with safety, and all classes of people began to speculate for this rise. The rate naturally rose still more rapidly towards the end of 1905, and in January, 1906, it was decided that the dollar should be fixed at the rate of $60 for £7 sterling, or 2*s.* 4*d.* to the dollar.

This was effected on the 29th February, on which day Ordinance I. of 1906, authorising the Currency Commissioners to give notes in exchange for gold against telegraphic transfer in favour of the Crown Agents, was passed at one sitting, and an Order in Council published fixing, as above, the rate at which the Commissioners might receive gold for notes. From the date of the issue of this Order the demand rate continued fairly uniform, the maximum and minimum rates for the remainder of the year being 2*s.* $4\frac{3}{16}$*d.* and 2*s.* 4*d.*, respectively.

Gold was first tendered to the Commissioners in March, and by the end of August the amount in their hands had reached £954,730. On the 14th September, Ordinance XXIII. of 1906 was passed, enabling the Commissioners to issue gold in exchange for notes and sell telegraphic transfers payable in London by the Crown Agents against notes received in Singapore. The sovereign was made legal tender in the Colony by proclamation of the 20th November under an Order of His Majesty the King in Council dated 22nd October, 1906, the dollar, however, remaining the standard coin.

Currency.

Bar silver continued to appreciate during the first-half of the year, until the margin between the intrinsic and nominal

values of the Straits dollar became so small that it was necessary to obtain His Majesty's Government's sanction to a reduction in the size of the dollar, in order that if the margin disappeared the Straits dollar should not leave the Colony. The reduction decided upon was one of 25 per cent., the fineness of the coin being retained at 900, and its weight reduced to 312 grains.

Several consignments of Straits dollars were despatched to England for the purpose of being re-minted in accordance with this decision, but none of the new dollars had been delivered by the end of the year. These dollars were, to a great extent, taken from the balance in the hands of the Currency Commissioners, so that as little inconvenience as possible might be caused to the trade of the Colony. In addition to using these balances, however, notes of the value of $1 each were also printed and brought into circulation. There was therefore but little inconvenience, more especially as the law relating to currency notes was amended to make the one-dollar notes legal tender for any amount. This small note has proved a popular one.

The sovereign was also made legal tender in the Colony, mainly with the object of enabling the Currency Commissioners to prevent any drain on the silver reserve, of which the greater part was being remitted to England for re-coinage.

At the beginning of the year the dollars and notes in circulation, including the stocks held by the banks, and the treasuries in the Federated Malay States, amounted to $54,136,722, of which $17,353,710 were Government currency notes, $1,408,731 bank notes, and the rest Straits dollars. At the end of the year the corresponding figures were $58,721,096, $22,222,560, and $1,124,255, respectively.

The excess of exports of dollars over the quantity of that coin imported was $844,672 for Singapore and $611,880 for Penang, in all an excess of $1,456,552, as against an excess of $3,557,902 in 1905. No account is taken in these figures of small quantities of dollars taken away from or brought into the Colony by passengers. The greater part of the exports was to Sumatra.

In Singapore subsidiary silver coin to the value of $796,301 was withdrawn from circulation. The rise in the value of the Straits dollar over the parity of the British and Mexican dollars had caused the return of large quantities of Straits subsidiary coin, which had circulated in China and elsewhere at an equal value with the local subsidiary currency. As soon as the rise in the exchange value of the Straits dollar became such that it paid to return this subsidiary coin, so much of it flowed into the Colony that the supply became too great for the needs of the place, and it was to relieve this congestion that the Government withdrew the amount in question from circulation. No copper coin was imported during the year.

The average bank note circulation was $1,329,053, as compared with $1,866,215 in 1905. The Hong Kong and Shanghai Banking Corporation continued the reduction of their note issue.

Municipal Revenue and Expenditure.

The revenue of the three Municipalities amounted to $3,214,971, and their expenditure, including sums spent on Loan Works, to $3,245,299.

TRADE.

The trade of 1906 was not generally satisfactory, though exports in dollar values largely increased, and both exports and imports increased in sterling.

A continuous rise in home prices tended to restrict sales, as goods had to be parted with below the value of replacement, in order to prevent congestion of stocks, which are larger generally than they have been for many years.

Dollar imports of merchandise decreased by over one-half per cent., but export values rose by over 6 per cent.

The rise in sterling exchange of over 14 per cent. resulted in a large increase in the sterling value of over 13½ per cent. in imports and 21 per cent. in exports.

Singapore imported 72·3 per cent. of the whole dollar value, a decline of ·7 per cent.; Penang, 27·3 per cent., a rise of ·4 per cent.; and Malacca the balance.

In exports, Singapore contributed 69·3 per cent., a decline of 2·3 per cent.; Penang, 30·1 per cent., an advance of 2·2 per cent.; and Malacca the remainder.

Statistics of the land traffic between Negri Sembilan and Malacca have been inserted for the first time, but the rail traffic between Penang and Perak is not included.

The value of the Colony's trade with outside places is as follows, the Inter-Settlement trade being excluded:—

—	1905.	1906.
Merchandise:—	$	$
Imports	319,776,549	317,850,836
Exports	265,184,613	281,273,455
Total	584,961,162	599,124,291
Treasure:—		
Imports	12,457,367	21,457,455
Exports	17,776,172	29,732,354
Total	30,233,539	51,189,809
Gross Total ...	$615,194,701	$650,314,100

The imports of merchandise from the United Kingdom were 11·1 per cent. of the whole, an increase of ·6 per cent., and the exports 23·6 of the total, an advance of 2·2 per cent.

British Possessions and Protectorates sent 46·7 of the value received, and took 24·9 of the export value, a decrease of ·7 per cent. in imports, and a rise of ·3 per cent. in exports.

Foreign countries account for 42·2 per cent. in value of goods consigned here, and 51·5 per cent. of goods taken; an advance of ·1 per cent. in imports, and a decrease in exports of 2·5 per cent.

The Colony, with the Federated Malay States, British North Borneo, and Sarawak, is now possessed of a gold standard, and Siam having previously taken this step, only China and Hong Kong are left with silver currencies; therefore, a statement showing the trade according to gold and silver currency countries (as in past years) is no longer of interest.

Taking the twelve principal articles of produce as exported, viz.:—Tin, gambir, pepper, copra, coffee, hides, sago, rattans, tapioca, gutta, Borneo rubber and India rubber, and gum copal, it is seen that 306,500 tons were sent off, a decrease of 11,000 tons, but if copra, which is remarkable for the fluctuation in its movements, is excluded, an increase, of 6,850 tons results.

Values of produce, when viewed on the basis of the last five years, have generally fallen except in tin and tapioca, declines being especially marked in the prices of pepper, gambir, and gutta percha.

Import Values and Quantities.

The gross imports into the three Settlements were valued at over 352½ million dollars (£41,129,000), an advance of nearly 7½ million dollars; but treasure alone rose by 8¾ millions, so that merchandise showed a fall of over one million and a quarter dollars.

The Class "Foods, Drinks, and Narcotics," decreased by two million dollars, the principal decreases being in the values of opium, sugar, fish (dry and salted), lard, salt, beans and teas, and drugs and chemicals.

Advances were recorded in the values of tapioca, live animals, spices, padi, tobacco and cigars, milk, onions and garlic, bran, wines, tea, and spirits.

Imports of rice into the Colony show about the same quantity as in 1905, 451,000 tons, with a value of over 30½ million dollars (also much the same), 89·4 per cent. of the quantity being re-exported, an increased proportion of 8¾ per cent.

Burmese supplies decreased, but Siam and French Indo-China sent more than the deficiency.

Opium received reached 12,658 chests, a decrease of 302½ chests, of which 82¾ per cent. were re-exported, in addition to over 25,000 lbs. of the manufactured article.

It is to be noted the quantity sent to Johore is not included in these export figures, and that 921 chests, transhipped here chiefly to Java and Siam, are not inserted in the statistics.

Nearly 72,000 tons of sugar were received; an increase of 9,000 tons, but the value declined by nearly a million dollars owing to lower prices. Of this amount over 83 per cent. was sent out again, besides 14,000 tons of locally-manufactured sugar-candy.

The quantity of dry and salted fish received reached over 55,000 tons, a trifle more than the 1905 import, but the total value fell by $822,000.

Imported wheat flour reached 27,438 tons; an increase of 3,733 tons. This market has been captured by Australia, the transfer of the greater portion of the trade from the Pacific coast having originated with the Chinese boycott of American goods; but the market has been much over-stocked and prices were sometimes less than those quoted in Australia.

Provisions, tinned goods, fresh meat, butter, cheese, milk, hams, and biscuits were valued at nearly six million dollars; an increase of $125,000. Over a million of this was oilman's stores; a decrease of $64,000, and 2¼ millions, mostly of Eastern foods under dry and salted provisions, give an increase of $84,000.

Biscuits imported came to $443,000; an increase of $38,000, of which total, 87 per cent. was British, an increase of $12,000.

Hams and bacons were imported to the extent of $171,000; a decrease of $21,000, the United Kingdom supplying 62½ per cent. of the imports, or nearly all the consignments from Europe.

Butter and cheese were brought in to a value of $347,000, a decrease of $4,000. Australia supplied 37¾ per cent.; a decrease of $6,000, and, except a small import from Bombay, the Continent sent the remainder.

Condensed and other tinned milks imported reached 186,500 cases, valued at close on 1½ million dollars; an increase of 39,000 cases and $126,000. More than three-fourths of the total is Swiss condensed milk, and prices are cut very fine.

Of spirits, excluding liqueurs, 1,130,000 gallons were brought in, valued at nearly 2$\frac{7}{10}$ million dollars, or a slight reduction in quantity but $66,000 more in value. Native liquor accounted for 353,500 gallons, a decrease of 29,000. Whisky showed 150,000 gallons, an increase of 15,300; brandy, 270,000, an increase of 41,000; gin, 316,000, a decrease of 37,000; and rum, 32,000, an increase of 6,000. Sales of gin were fairly good, and much on a par with 1905, though

returned goods from the Celebes somewhat weakened the market; brandy on the whole met with a good demand.

Imports of malt liquor reached 890,000 gallons, valued at over 1¼ million dollars, an increase of 3,200 gallons in quantity but a fall in value of $63,000. Ale and beer in bottle and bulk accounted for 717,000 gallons of the total, a decrease of 18,000 gallons, and porter and stout for the remainder. Although beer and ale in bulk fell off, there were increased sales of British bottled beer.

The Class "Raw Materials" increased by 1⅓ million dollars, metals (including tin) advancing by nearly 1⅗ million dollars, the Produce Class decreasing by $145,000, and raw textiles by $108,000. The articles in detail are more conveniently treated under exports.

The Class "Manufactured Articles" shows a fall in the total of $627,000.

Textiles contributed a decline of 1⅓ million dollars; metals an advance of $800,000; and miscellaneous manufactures a fall of $88,000.

Cotton piece-goods were imported to the extent of 5,400,000 pieces, an increase of nearly 600,000, the value reaching considerably over 17½ million dollars, an increase of 666,000. The United Kingdom supplied over 4½ million pieces, valued at about 15 million dollars, an increase of over half-a-million pieces, and three-quarters of a million dollars, or 13½ per cent. in quantity, and 5½ per cent. in dollar value. Continental imports reached 466,000 pieces, valued at over 1½ million dollars, an increase of 23,000 pieces. Supplies from Indian mills increased by 10,000 pieces, and Eastern imports by 32,000 pieces. Grey yarn imported shows 14,295 bales, a small decline in quantity; but only half the 1905 quantity from the United Kingdom was sent in 1906, Indian spinners rapidly ousting the United Kingdom from this trade. Of dyed yarn 13,304 bales were received, an increase of 1,806 bales, of which total 10,103 bales were from the United Kingdom (an increase of 2,060), while the Continent sent 2,844 bales, a decline of 32. Although Swiss dyes find a market, they are not in favour on their merits, but business is attracted owing to misleading tickets regarding lengths. There was a heavy fall in cotton blankets brought in, only 301,000 pieces, comparing with 556,000 in the previous year, and an average of 538,000 for the previous five years. While the buying powers of the natives are not sufficient to go in largely for woollen blankets, makes, chiefly Continental, but superior to the ordinary wick blanket, find favour. Of the important class included under apparel, hosiery, millinery, &c., the value received was about 3 $\frac{7}{10}$ million dollars, a decrease of nearly $320,000. The United Kingdom showed a rise of over $204,000, with a total of nearly 1⅕ million dollars, while Germany, with about the same total, fell by $236,000, and other Continental supplies also fell off. Japan improved its

position in this class by $60,000, but other consignments declined. Sarongs, Slendangs, and Kains showed 303,000 corges, of 20 pieces each, imported, a decrease of 44,000, valued at $5\frac{1}{3}$ million dollars, a fall of $1\frac{7}{10}$ million dollars. About 81,000 corges were received from the United Kingdom, a decrease of over 40,000, and 80,000 corges from the Continent, a decrease of 9,000; but Indian imports increased, while Java supplies remained stationary. The demand for this class was fairly large, but poor prices were realised. Woollen blankets have not been a good market, for reasons above stated. Hats and caps valued at $427,000 were imported, an increase of $29,000, increasing British values meeting Italian declines. About 230,000 pieces of silk cloth were brought in, valued at close on $2\frac{1}{2}$ million dollars, an increase of 13,000 pieces and $94,000; European manufactures of this class continuing to fall off and Eastern to increase.

The import of umbrellas was valued at over half-a-million dollars, a decrease of $46,000. Supplies from the United Kingdom increased by $64,000, and French imports by $10,000; but Eastern productions showed less value by $113,000.

Over 20,000 pieces of woollen cloth of different kinds entered the market, valued at considerably over half-a-million dollars, a decrease of 2,000 pieces and $27,000, the United Kingdom sending 1,500 pieces less and Germany 500 pieces more. Jute gunny bags from Calcutta were valued at over $4\frac{1}{2}$ million dollars, an increase of $600,000. The value of sewing thread showed a decrease of $104,000, orders from home not being met owing to great pressure in the mills.

Manufactured metals of European origin amounted to roughly over 9 million dollars in value, an increase of $6\frac{3}{4}$ per cent. Of this total, the United Kingdom sent about $6,140,000, or 68 per cent., the Continent of Europe over $2\frac{1}{2}$ million, or 28 per cent., and the United States of America $354,000, or 4 per cent. These figures show an increase of $342,000 from the Mother Country, $240,000 from the Continent, and a decline of $6,000 from the United States of America. In 1905, however, there was imported (principally for railway construction in Johore territory, and, strictly speaking, a transhipment trade) a very large value, and, if this be taken off to show the goods marketed, the increase in the United Kingdom portion of the imports would be nearly a million dollars, compared with increases from the Continent and the United States of America of $274,000 and $22,000, respectively.

The chief advances from the United Kingdom are seen in hardware and ironware, machinery, cycles, and motor cars, and telegraph and telephone materials.

Hardware and ironware, machinery and iron bars, and nail rod give the principal advances from the Continent, and machinery from the United States of America. Tramway and railway materials and corrugated iron were the principal

decreases from the United Kingdom, telegraph and telephone materials, those from the Continent, and most other metals, except machinery, cycles, and motor cars, declined from the United States.

The profits on standard metals such as bar and corrugated iron, tin plates, and sheathings, have been cut so fine that some firms content themselves with doing a commission indent business instead of taking the risks of stocks, and the growth of this system is apparent. The large imports of corrugated iron in 1905 resulted in large stocks which had to be drawn on at cut prices, and it was not till the close of the year that an improvement took place. Notwithstanding the increased import of tin plates, owing to the expansion of the pineapple and oil industries, stocks were short at the close, and prices which had not been satisfactory hitherto advanced rapidly. It was a fair year for other metals so far as regards overturn.

British makes of motor cars are steadily advancing on French productions, which have hitherto taken the lead.

Miscellaneous hard goods give evidence of declines generally, except in earthenware and crockery, matches, carriages, and carriage materials, perfumery, lamps and lampware, and musical instruments.

Reduced values are seen in cement, tanned hides, paints, joss sticks, and paperware, followed by Japanware and candles.

From the United Kingdom over 100,000 more casks of cement were received, while the Continent sent 70,000 less. The trade showed a profit all through the year owing to home advances, but if these continue to rise, a promising field is opened for the Hong Kong cement.

Dynamite rose in quantity from Germany, but decreased from the United Kingdom. Owing to accepted tenders from the Federated Malay States and other causes, it is expected the Anglo-Swedish brand will show much better next year.

Values of clocks and watches from the Continent fell off, as well as from the United Kingdom, but Japanese and American makes were more to the front.

Imports of earthenware, including crockery, rose from the United Kingdom by $71,000, but the Continent increased by over that amount, Holland and Belgium showing important advances.

Fancy goods, toys, and sporting materials exhibited a slight fall from the United Kingdom, German and Austrian consignments rising a little in value.

Glassware imports fell off from the United Kingdom by $10,000, but rose from the Continent by $35,000.

The market in paints was not quite up to former years, more caution being evinced in giving credits to dealers in this class of goods, but the trade actually done was fairly remunerative. All sources of supply showed declines in the value shipped here.

Burma has displaced Belgium and Holland in supplying this market with candles; out of the total trade $165,000, no less than $115,000 being received from Rangoon. The Burma candle is stiffer and altogether a better article than that of Continental make.

Perfumery imports increased from the United Kingdom and the Continent, but fell off from the United States.

While carriages and carriage materials from the Continent fell off by one-half or $6,000, values from the United Kingdom rose to $161,000, an increase of $35,000, and the United States accounted for a trade of $42,000, an increase of $6,000.

European paper and stationery rose in the case of the United Kingdom to $546,000, an advance of $5,000, but, although Continental manufactures fell off by $7,000, the total exceeded that of the Mother Country by $88,000. The United States sent a value of $31,000, a decrease of $74,000.

Musical instruments increased in value from the United Kingdom by $37,000, and from the Continent by $18,000.

Boots and shoes from the United Kingdom were valued at $242,000, an increase of $69,000, and from the Continent at $39,000, a decrease of $8,000. American consignments reached a value of only $5,000, or less than half the 1905 value.

Saddlery and leatherware shewed expansion in British makes, a value of $127,000, representing an increase of $35,000; but Continental supplies also rose by $30,000, American and Indian shipments falling off.

Lamps and lampware, with a total trade of over half-a-million dollars, give an increase of over $78,000, the United Kingdom being responsible for an advance of $50,000, the Continent for $71,000 more, Eastern and American imports declining in value.

Of the 3,077 tons of soap and soda received, the Mother Country sent 2,460 tons, a decrease of 70; Australia sending 38 tons more. Toilet soap from the Continent increased in value by $5,000.

Matches shew 82,000 cases received, an increase of 10,000, nearly all of Japanese make.

Photographic materials imported came to $74,000, an increase of $5,000, of which the United Kingdom sent to the value of $56,000, and the Continent to the value of $14,000, being increases of $5,000 in both cases; but the United States sent over $4,000 less in value.

The raw materials which may be treated as imports are coal, petroleum, tin ore, and raw sago.

Imports of coal were 753,918 tons, and in addition there were 5,000 tons of patent fuel brought in, an increase of 117,000 tons. The United Kingdom sent 85,000 tons of coal and 5,000 tons of patent fuel, a total increase of 23,500; Australia 219,000 tons, an increase of 152,000; Bengal over

323,000 tons, an increase 118,000; Borneo and Sarawak 13,000 tons, an increase of 7,500; and Tongkin 10,400 tons, an advance of 5,500. From Japan only 85,000 tons were received, a fall of 176,000; and from Dutch Borneo 17,500 tons, a decrease of over 5,000.

Imports of petroleum in bulk and cases represented over $9\frac{1}{10}$ million gallons, an increase of 712,000 gallons. Sumatran oil is principally responsible for the advance, American increasing by 144,000 gallons only, while no imports came from Burma, which sent 816,000 gallons in the previous year. Besides these imports 44,000 tons of bulk oil were declared for transhipment, an increase of 8,500 tons. Liquid fuel from Dutch Borneo reached over 39,000 tons, an increase of 13,000, and from Sumatra 744 tons, a decrease of 3,321. Of benzine 33,000 gallons were imported, an increase of 11,000, and from the United States of America 5,000 gallons, an increase of 2,000; in addition 12,000 tons were declared for transhipment, an advance of 4,500 tons.

Imports of tin ore reached over 52,000 tons, a decrease of 4,300; while imports from the Federated Malay States fell off, Australia and the Dutch Islands sent increased supplies.

About 14,600 tons of raw sago were imported for milling purposes, a decline of about 1,250 tons.

Export Values and Quantities.

The gross exports from the three Settlements reached nearly $324\frac{1}{2}$ million dollars (£37,853,000), an advance of $28\frac{1}{5}$ million dollars; but treasure exported increased by nearly 12 millions, so that the increase in merchandise was about $16\frac{1}{4}$ millions.

The class "Foodstuffs, Drinks, and Narcotics" increased by over $4\frac{1}{2}$ million dollars, seen chiefly in rice, areca-nuts, and tapioca, the largest decline being in opium.

Raw materials rose in value by $7\frac{3}{4}$ million dollars, but the metal (tin) class alone advanced by close on 8 millions. Tin exports amounted to 59,091 tons, an increase of 213 tons. Declines in quantities of the refined article were visible from the Federated Malay States, shewing a fall of 1,600 tons and in ore as above stated. Singapore imports of tin and ore, taken at 70 per cent., shew imports and exports within 140 tons of each other, but Penang exports are larger than the imports on the same basis by 715 tons. The Singapore average price for the year was $89.90 per $133\frac{1}{3}$ lbs., an increase of $11\frac{1}{2}$ per cent. About $57\frac{1}{2}$ per cent. of the whole was sent to the United Kingdom and nearly $25\frac{1}{2}$ per cent. to the United States. Increased shipments were despatched to the United Kingdom and Austria only; exports to nearly all other places decreased.

Exports of produce, though generally somewhat larger in volume, have been in a stagnant position for some years past.

Taking the previous five years as a basis for averages, the quantities of tin, pepper, sago, hides, gum copal, and Borneo rubber exported rose, but tapioca, coffee, gutta percha, and rattans declined. The total of spices reached 79,221 tons, an increase of 8,798, and of gums 31,321, an increase of 1,889, as compared with 1905.

Para rubber, coconut oil, gutta percha, planks, illipi and ground-nuts, precious stones, seeds of sorts, and gum copal furnished the principal advances in value of produce, excluding articles used as foods, copra, gambir, india rubber, Jelutong or East India gums, sticklac, goats' skins, and petroleum giving the principal declines. Advances are seen in the quantities of preserved pineapples, areca-nuts, black and white pepper, sago, gum benjamin, gum damar, gum copal, rattans, gutta percha, Borneo and Para rubber, and hides sent out in 1906, compared with 1905, decreases being observable in copra, tapioca, jelutong, sticklac, and india rubber. Nearly 707,500 cases of Singapore-grown pineapples were exported in tins, valued at nearly 3¼ million dollars, an increase of about 160,000 cases and $457,000.

Of copra imported, after allowing for a large consumption by local oil mills, 40,772 tons, valued at over 5 $\frac{7}{10}$ million dollars, were sent off, a decrease of 17,859 tons and over two million dollars. Into Singapore alone the imports reached 37,800 tons, of which 25,400 tons were re-exported. Prices averaged an increase of 8 per cent. over the 1905 rates. Little variation is noticed in the quantity of coffee exported, planters having for some time neglected this product in favour of rubber and other more profitable crops. Gambir exports recorded 38,976 tons, valued at under 5½ million dollars, an increase of 2,173 tons, but a fall in value of $656,000; a little in a desiccated form has been sent out for some time, complaints of adulteration being frequent in the case of the ordinary gambir. The average price fell by about 16 per cent.

Exports of black pepper reached over 17,700 tons, an increase of 2,600. To nearly all countries except the United States increased shipments were made. The average price in Singapore was $21.55 per pikul of 133½ lbs., a decrease of $4.90 per pikul as compared with the previous year. White pepper exports reached about 6,940 tons, an increase of about 2,000 tons, seen chiefly in larger shipments to Germany and the United States. The local average price fell from $37 to $28½ per pikul as compared with 1905.

Tapioca exports recorded 42,225 tons, valued at over 5 million dollars, a decrease of 5,730 tons but an increase in value of 1$\frac{2}{5}$ million dollars, a rise in price of over 62 per cent. having taken place. Sago exports amounted to over 50,000 tons, valued at nearly 2 $\frac{9}{10}$ million dollars, an increase of 2,214 tons and $146,000. To Holland only was there any marked decline in the quantity sent.

Shipments of gutta percha shew 2,673 tons, an increase of 570 tons. The value was nearly $3\frac{1}{10}$ million dollars, an increase of $395,000. Most was sent to the United Kingdom, Germany, and the United States, but prices were poorer generally than in 1905, and this once great trade shews little signs of revival. Borneo and India rubber shew 2,694 tons sent off, a small decrease in quantity. Borneo rubber increased in quantity, but India rubber fell off, the value of Borneo increasing by $45,500, but that of the other declining by $388,000. Inferior rubbers and guttas, including jelutong, reached over 11,100 tons, valued at nearly $1\frac{1}{4}$ million dollars, a decrease of close on 1,200 tons and $382,000. The United States and Germany received the largest consignments. Para rubber, much of which merely passed on through bills of lading but had been inserted as exports, reached over 8,400 cwts., valued at nearly $2\frac{1}{10}$ million dollars, being increases of 6,430 cwts. and nearly $1\frac{1}{2}$ million dollars. Nearly all came from the Federated Malay States, Malacca, and Johore, but Sumatra consigned 119 cwts.; the United Kingdom took the bulk of the exports.

Hides, raw and tanned, shew 5,711 tons, valued at considerably over 3 million dollars, an increase of 263 tons and about $140,000.

The exports of rattans reached 26,460 tons, an increase of 1,093; the value was over $4\frac{1}{2}$ million dollars, a decrease of $43,000. Sumatra, Dutch Borneo, and Achinese ports sent greater quantities, but supplies from Sarawak and the Celebes declined.

Gum copal exports record 9,135 tons, valued at over 2 million dollars, an increase of 1,498 tons and $72,000. Larger consignments were made to the United Kingdom, Germany, Holland, and the United States of America.

The trade in areca-nuts is a very large one of over 52,000 tons, valued at $6\frac{1}{5}$ million dollars, being an increase of over 3,760 tons and nearly $1\frac{9}{10}$ million dollars. Indian ports, Siam, and French Indo-China are the largst purchasers, little or no trade being done with Europe.

Of spices not particularly mentioned, cardamums, cloves, ginger, long pepper, and cinnamon shew advanced value sent off, while nutmegs, cassia, cubebs, and mace declined.

Shells were a large trade, especially in mother o' pearl.

Exports of manufactured articles advanced by over $3\frac{9}{10}$ million dollars, textiles rising by nearly 3 millions, metals by $670,000, and miscellaneous manufactures by $295,000.

Trade by Countries.

Imports from the United Kingdom rose to $35\frac{1}{5}$ million dollars, an increase of close on $1\frac{1}{2}$ million dollars or over $4\frac{1}{4}$ per

cent., and exports to 66½ millions, an advance of over 9⅗ millions or nearly 17 per cent. The articles received shewing the largest gains were cotton piece-goods, cement, ironware and hardware, apparel, hoisery and millinery, coal, dyed yarn, bicycles and motor cars, and telegraph and telephone materials. Declines are seen in tramway and railway materials, sarongs, slendangs and kains, cotton blankets, grey yarn, corrugated iron, sewing thread, and malt liquors.

Exports rose in tin (with an advance of over 9 million dollars), Para rubber, hides, gutta percha, gum copal, and preserved pineapples. The following articles exported fell off in value:—India rubber, sugar, white pepper, sago and tapioca flour, and jelutong.

The Continent of Europe sent goods to the value of 16 1/10 million dollars, a decrease of $631,000 or over 3¾ per cent., and the exports were valued at nearly 32½ million dollars, a decrease of $544,000, or over 1½ per cent.

France, Belgium, Holland, Sweden (with Norway) and Russia sent increased values, but Italy and Austria values especially fell off, and Germany, Denmark, and Spain also shewed declining values. Italian decreases are marked in cotton piece-goods, apparel and hosiery, condensed milk, and sarongs, and, in the case of Austria, in cement and hardware. German cement, apparel, and sugar declined, but ironware and hardware with cotton piece-goods advanced. Dutch supplies rose in cotton piece-goods and earthenware, but fell in dyed yarn, sarongs, gin, and candles. Milk and iron bar increased in value from Belgium, but cottons fell off. Brandy from France increased in value, and apparel from Spain declined. Matches from Sweden and milk from Norway increased in values, but Danish cement gave a fall.

Exports declined to France, chiefly in copra and Borneo rubber, but flake tapioca, tin, and illipi nuts gave enhanced values. There was a slight decrease to Germany over all, tin, rattans, and copra yielding the principal declines, and rubbers, pepper, oil cakes, and gutta percha shewing advances. Copra and gambir fell off in value to Italian ports, and to Russia the former article alone declined in over 1¼ million dollars. Tin and black pepper to Austria increased, but decreased to Holland, along with sago flour.

Raw hides, gum copal, and copra to Holland advanced, as also copra to Belgium.

Copra to Spanish ports and to Denmark increased; Denmark also received greater values of black pepper and pearl sago.

The United States of America sent goods to the value of nearly 2 7/10 million dollars, a decrease of $582,000, seen chiefly in decreases in the values of lard, petroleum, oilman's stores, wire nails, paper, and stationery. Wheat flour brought from

Hong Kong (but chiefly from [illegible]ican mills) fell off very largely in value to only $800,[illegible] a fall of no less than $1,129,000, and even of this reduced supply about one-third is said to have been of Australian origin. Exports to the United States were valued at over 34$\frac{3}{5}$ million dollars, a fall of nearly 1$\frac{7}{10}$ million or 4$\frac{1}{2}$ per cent. Smaller values of the following articles sent off are mainly responsible for this:—Black pepper, tin, jelutong, coconut oil, Borneo rubber, gutta percha, gambir, gum copal, and tapioca flour. Tapioca (pearl), preserved pineapples, white pepper, and rattans shewed increased export values.

Imports from British India and Burma, excluding goods shipped *viâ* ports in French India, declined to 40$\frac{2}{5}$ million dollars, a decrease of nearly 3$\frac{7}{10}$ millions; of which Calcutta was responsible for nearly 1$\frac{2}{5}$ million, Burma ports 1$\frac{3}{5}$ million, Madras well over half a million, and Bombay about $174,000. Benares opium from Calcutta fell by nearly three million dollars, but gunny bags rose by three-fifths of a million, and coal by nearly one million dollars.

Rice from Burma ports fell by nearly 1$\frac{7}{10}$ million dollars, and petroleum also declined. Imports of ground-nuts and tobacco, however, increased in value. Sarongs from Madras ports fell by over seven-tenths of a million dollars, followed by goats' skins. Cattle received advanced in value. Smaller values of cloves and grey yarn from Bombay are noticeable. Exports to British India and Burma rose to nearly 13$\frac{3}{5}$ million dollars, an increase of $618,000. Calcutta values advanced by nearly a million dollars, Burma receiving half-a-million less in value, Bombay an increase of about $200,000, and Madras one of $77,000. Areca-nuts to Calcutta increased in value by over a million dollars, and to Burma by $207,000, and also shewed a small advance to Madras. Sticklac to Calcutta, and fish, tin, and coconuts to Burma gave less values, while tin exported to Bombay increased.

The trade with the Dutch Indies recorded 50$\frac{1}{5}$ million dollars as imports, an increase of 1$\frac{1}{4}$ million. Java sent less value by $329,000, but the fluctuations were enormous, sugar shewing a decline of $682,000, followed by birds' nests, kachang oil, and ground-nuts with declines of over $100,000 each, while black pepper advanced by $283,000, areca-nuts by $182,000, and curry stuffs by $121,000. Sumatran supplies increased by 1$\frac{3}{5}$ million dollars, areca-nuts, black pepper, and petroleum accounting together for nearly 1$\frac{1}{2}$ million dollars of the advance, gutta percha for $237,000, followed by inferior rubber, rattans, and illipi nuts, with smaller increases. The increase in petroleum is partly attributable to the oil now being declared under its country of origin. Borneo rubber and sago flour shewed less values by $340,000 and $120,000 respectively.

Imports from Dutch Borneo fell off by nearly $400,000, copra, jelutong, and coal being the principal declines, while Borneo rubber, petroleum residue, and areca-nuts increased. From the Dutch Islands and the Celebes an increase of nine-tenths of a million is noted. From the Dutch Islands tin ore alone accounted for a rise of $1\frac{3}{4}$ millions, but petroleum (subject to the above explanation), fish, copra, tin, and nutmegs fell off. Supplies from the Celebes increased in gum copal; values of nutmegs and bêche de mer falling off. A decrease of $306,000 value is noted from Bali; copra alone decreased by $625,000, but coffee rose by $123,000. An advance of $440,000 is seen from Achinese ports, chiefly apparent in areca-nuts and copra, black pepper consignments falling off. The decrease of $372,000 from the Natunas Islands is almost entirely due to copra. Gambir and pepper from Rhio declined in values.

Exports to the Dutch Indies were higher at $41\frac{4}{5}$ million dollars, an increase of $836,000. Java had a decrease of half-a-million, rice, grey yarn, coffee, sarongs, and curry stuffs shewing the principal declines. Coconut oil and gunnies rose in value to Java ports. An increase of $1\frac{9}{10}$ million dollars is registered for Sumatran ports, rice, sarongs, cotton piece-goods, tobacco, tin, and tea shewing the chief improvements. A decrease of over one million dollars to the Dutch Islands and the Celebes is seen, rice and opium being responsible for this. An increase of $129,000 to Dutch Borneo is accounted for by greater values of rice and cottons. To Bali the value of goods sent decreased by $234,000, and that to the Natunas Islands by $56,000.

Achinese ports took nearly $600,000 more value and Rhio $68,000. To Bali, Benares opium and cottons are the principal decreases, and to Rhio a greater value of Benares opium was sent. Achinese ports received greater values of cotton piece-goods, rice, fish, and sugar.

Imports from the Federated Malay States were valued at over $75\frac{3}{5}$ million dollars, a decrease of $316,000. Perak consigned less value by nearly two million dollars, Selangor an increase of $876,000, Negri Sembilan an increase of over $1\frac{1}{10}$ million, and Pahang a decline of $327,000 value.

Tin and tin ore accounted for a decrease of nearly two million dollars, gutta percha for one of $160,000, followed by curry stuffs, coffee, and black pepper. Para rubber increased by $1\frac{1}{4}$ million dollars value, followed by tapioca (pearl), swine, and seeds.

Exports to the Federated Malay States rose to 34 million dollars, an increase of over three millions. Perak received nearly three million dollars more value, Selangor six-tenths of a million less. Negri Sembilan $850,000 more and Pahang $141,000 less. Benares opium, swine, and sugar all fell off

in value, but rice, tobacco, and cigars, cotton piece-goods, bran, tea, fish, paperware, and apparel all largely increased.

Imports from Hong Kong and China shewed a value of $26\frac{3}{5}$ million dollars, a decrease of over $1\frac{3}{5}$ million.

From Hong Kong, hides, jewellery, tea, tin, and dried fruits all increased, but wheat flour fell by over $1\frac{1}{10}$ million dollars, followed by beans and peas, Persian opium, cement, lard, and raw silk with smaller reductions. Lard, earthenware, and beans and peas from China advanced, but joss sticks and joss paper, jewellery, and tobacco decreased..

Exports to Hong Kong and China rose to nearly $17\frac{7}{10}$ million dollars, an increase of close on $1\frac{7}{10}$ million. The following articles increased largely:—Sugar-candy, black pepper, preserved pineapples, ground-nuts, birds' nests, planks, and tanned hides. Decreased values were seen in Benares opium, raw cotton, tapioca flour, and goats' skins.

French Indo-China sent goods to the value of nearly $4\frac{9}{10}$ million dollars, a rise of nearly three-fifths of a million, for which rice was more than responsible.

Exports thither rose by $361,000 to nearly $2\frac{2}{5}$ million dollars, gunny bags and areca-nuts shewing the greater advances, but the value of lubricating oil fell off.

From the Malay Peninsula other than the Federated Malay States imports totalled nearly $12\frac{1}{2}$ million dollars, of which Johore contributed $8\frac{4}{5}$ millions. This is a total decrease of $1\frac{7}{10}$ million, for which Johore is almost entirely responsible. Tringganu increased by $180,000, Kelantan decreased by about the same amount, and imports from Singgora and Patani slightly advanced. Gambir and black pepper from Johore, fish from Tringganu, and copra and fish from Kelantan all decreased, but areca-nuts, tin ore, flake tapioca, and Para rubber rose in the case of Johore, tin ore, padi, and black pepper in that of Tringganu, and padi in that of Singgora.

Exports to these States decreased by $97,000 to about $5\frac{3}{4}$ million dollars, of which total Johore contributed nearly $3\frac{9}{10}$ millions, a slight decrease. Provisions and preserved vegetables decreased in value to Johore, but rice and railway materials advanced. To Kelantan a decrease of $110,000 is noted, to Tringganu an increase of $49,000, to Singgora an increase of $44,000, and to Patani a decrease of $51,000.

Sarongs and rice to Tringganu, cotton piece-goods to Singgora, and tobacco and gambir to Kelantan advanced, but dyed yarn to Patani declined.

Australia sent to the value of $5\frac{1}{4}$ million dollars, an increase of nearly $2\frac{9}{10}$ millions or over 119 per cent. Coal advanced in value by $1\frac{3}{5}$ million, wheat flour by nearly a million, and tin ore by $377,000.

Exports at something over 1½ million decreased by $208,000. Values of tin and copra declined, but tapioca (pearl) shewed an enhanced value.

Imports from Japan decreased by $1,336,000 to rather more than five million dollars, coal alone falling by 1¾ million, and umbrellas and Japan-ware also giving decreased values. Matches, silk piece-goods, and jinrikshas advanced.

Exports at nearly 2⅔ million dollars shewed a decrease of $44,000. Tanned hides and manure decreased, and raw cotton was the only advance of any importance.

Siam and Siam West Coast sent merchandise to the value of 33½ million dollars, an increase of over 2⅔ millions. Rice supplies rose by over half-a-million, padi by $364,000, cattle by $284,000, hides by $250,000, bran by $211,000, swine by $207,000, and tin by $197,000. Sticklac decreased by $147,000.

Exports, valued at nearly 18¼ million dollars, increased by nearly two millions. The only important decline was in Benares opium by $690,000. Increases were prominent in areca-nuts, gunnies, sarongs, cottons, rice, grey yarn, medicine, provisions, &c.

Imports from Sarawak were nearly 5 million dollars, a decrease of $106,000, and from British North Borneo $845,000, a fall of $7,000. Gutta and copra from Sarawak decreased, but sago flour and coal advanced in values. Rattans and Borneo rubber fell off from British North Borneo, gum copal and gum dammar giving enhanced values.

Exports to Sarawak, valued at over 3⅓ million dollars, decreased by $162,000, seen in declines in the values of tobacco and cigars, fish, sarongs, Persian opium, sugar, cottons, &c., but the export value of rice rose considerably. Exports to British North Borneo came to nearly 1⅗ million dollars, a decrease of $27,000. Rice, tobacco and cigars, beer and ale, sugar, &c., fell in value, cotton piece-goods yielding an increase.

Observations on Trade.

The first six months of 1906 were most disappointing to merchants.

The smaller firms had to turn over stocks, and the larger, in order to keep in their marks, were forced to follow suit. From July to December, however, the fixity of exchange becoming recognized and a great advance taking place in home prices, merchants were able to obtain better profits than had obtained earlier in the year. The large number of native firms forced into liquidation during the earlier half of 1906 has had a beneficial effect in weeding out the weaker class of dealers, and prospects for 1907 are, at the time of writing, fairly promising. The stocks in hand at the close of the year were heavier than has been the case for a considerable time past.

While the principal staple cotton goods are still supplied to Siam, principally through the Singapore agents of rice merchants there, prints and dyed fancy cloths are being more and more imported direct; but it is satisfactory to note that more than three-fourths of the textiles imported into Bangkok are from the United Kingdom and Singapore.

Observations on the different classes of goods will be found in greater detail in the preceding portion of this report.

It has been stated by compilers of statistics that the imports from the United Kingdom have fallen off when compared with the total imports of the Colony if the proportional percentage test is taken. This is no doubt the case, for during the decade 1880 to 1889 the imports from the United Kingdom amounted to 20·4 per cent. of the whole, whilst for the decade 1896-1905 the percentage was only 10·5.

The statements on which the above percentages are based include, however, raw material from Asia, such as tin, opium, rice, &c., and the Registrar of Imports and Exports has prepared a return, which I annex, giving the value of European goods imported into the Colony: this return shows that although the proportional percentage of the imports from the United Kingdom is 63·5 for the decade 1897-1906 as compared with 71·3 during the decade 1887-1896, the excess of British over foreign goods is $129,500,000 during the decade 1897-1906 whilst for the decade 1887-1896 it was $110,900,000.

Return Shewing the Imports of European Goods into the Straits Settlements, 1887 *to* 1906.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

In Singapore, the increase of pineapple cultivation has been very large. Extensive areas, for many years waste ground covered with secondary jungle, have been cleared and planted up with pineapples for tinning. The whole of this business appears to be in the hands of Chinese.

Considerable interest has been shown in the cultivation of the oil-grasses, lemon-grass, and citronella in several parts of the Island, and the development of this industry has been active. The cultivation of indigo and vegetables has increased, as has that of pepper in a minor degree. Ground-nuts are coming into favour again, and some acres are now under this plant. The fruit-crops continued to be poor, and the planting of fruit trees appears to be on the increase. It is possible that the poorness of this crop, and the general scarcity of fruit grown in Singapore of recent years, may be due to the age of the trees and a failure to plant young ones. Coconut cultivation increases rapidly.

Experiments, undertaken with a view to determining the best method of tapping Para rubber trees, were continued at the Singapore Botanic Gardens throughout the year, and very interesting and useful information has been obtained.

An Agri-horticultural Show, which was a decided success as regards the quality and quantity of exhibits, was held in Singapore in August. The exhibits were representative of the industrial as well as agricultural work of the Colony and the Federated Malay States, and the Show was very well patronised by the public.

As to Penang and Province Wellesley, the rubber trees at the gardens in Penang were tapped, and a fair quantity of seed was sold to planters. In spite of the rise in the exchange value of the dollar, agricultural prices were on the whole better than in 1905, while tapioca reached the highest point recorded for many years. The padi harvest was a fairly good one, but the fruit crop was, as in Singapore, poor, Para rubber and coconuts are gradually superseding sugar on nearly all the estates in Province Wellesley, except those of the Penang sugar estates. Two sugar estates, Prai and Batu Kawan, which have been flourishing undertakings in the past, were offered for sale towards the close of the year, but found no purchasers. The nutmeg plantations on Bukit Mertajam are gradually dying out. In Malacca the opening of the railway has had considerable influence on the cultivation of tapioca, inasmuch as the demand for pigs (which are largely fed on tapicoa refuse) has risen owing to the increased facilities for sending them to the Federated Malay States.

Planters of tapioca are now compelled by the conditions of their titles to plant through the crop fruit trees, coconuts, or

rubber, in order to ensure permanency of cultivation. Land planted with tapioca alone soon gets exhausted and when abandoned becomes a waste covered by lalang grass. Immense tracts of such land have been abandoned in the past, but are now being taken up rapidly for rubber. The clause compelling permanent cultivation has been very successful, and it is hoped that there will be few additions to the amount of land abandoned to lalang. Small cultivators are enabled to plant rubber by utilising tapioca or gambier as a catch crop to tide over the years which must elapse before the rubber makes any return, and the consequence is that small rubber plantations are springing up all over the Settlement.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 19,711,498, as compared with 18,890,600 in 1905. The amount realised by light dues was $223,387.94.

Nine hundred and sixty-seven vessels aggregating 8,258 tons were built in Singapore in 1906, the figures for the previous year being 1,002 and 9,025, respectively.

LEGISLATION.

Thirty Ordinances were passed in 1906, of which 15 amended existing Ordinances, 14 were new legislation, and one repealed "The Public Servants Liability Ordinance, 1889."

Of the new legislation the more important Ordinances were:—"The Currency Note Amendment Ordinance," already referred to, (No. I.), "The Corporations Duty" (No. II.), an Ordinance to impose a duty on the property of bodies corporate and unincorporate, which have hitherto been free from taxation; "The Vagrancy Ordinance" (No. VI.), which establishes houses of detention for vagrants and provides machinery for repatriating persons not born in the Colony who are convicted of vagrancy; "The Banishment Ordinance" (No. VII.), which extends the powers of expulsion of the Governor in Council to certain criminal aliens; "The Exclusion Ordinance" (No. IX.), to prevent the landing of decrepits and beggars in the Colony; "The Administration of Estates Ordinance" (No. XI.), which gives improved provision for the protection and administration of the estates of deceased persons; "The Pilgrim Brokers Ordinance" (No. XVII.), a much needed measure for preventing fraud by a most unscrupulous class of the community; and two Ordinances relating to liquors and opium (Nos. XIX. and XX.), which consolidate and bring up to date the law governing the collection of excise duties on liquors and the control of the opium traffic. An Ordinance was also passed to enable the Government to raise loans for public purposes ("The General Loan and Inscribed Stock Ordinance," No. XXV.).

In consequence of the changes in the currency, "The Currency Note Ordinance, 1899," was again amended four times. "The Municipal Ordinance, 1896," was again amended in several important particulars by Ordinance No. XII., and Ordinances were also passed amending the Banishment, Malacca Lands, Pilgrim Ships, Volunteer, and Widows and Orphans' Pensions Ordinances. The work of consolidation and improvement in the form of the laws has been kept in view, and the Minor Offences Ordinance (No. XIII.) forms a consolidation of the law of street and other offences and matters, the subject of summary jurisdiction. It effected a repeal of nine old Indian Acts and Ordinances dealing with their substance on more modern lines, and it should be a considerable help to magistrates in the stress of their daily work.

Having the same object in view, a Committee, consisting of the Chief Justice, the Attorney-General, the Honourable W. J. Napier, and Mr. C. E. Velge, Registrar of the Supreme Court, were, during the year, appointed to undertake the arduous task of drafting new Courts and Civil Procedure Ordinances. The work of the Committee had not been completed by the end of the year, but it is hoped that the Bills will be brought before Council during 1907. Other legislation in contemplation is a complete revision of the Stamp Ordinances, and the introduction of the long delayed Merchant Shipping Ordinance, into which will be incorporated last year's Imperial legislation on the subject.

Much legislation, which is of a technical nature, cannot be properly dealt with in a Committee of the whole Council, and the tendency is for such legislation to be delegated to Sub-Committees. The Government has to acknowledge the services of the Members of Council who, acting on Sub-Committees, considered and redrafted the Bills introduced into Council which subsequently resulted in "The Administration of Estates," "The Pilgrim Brokers," and "Minor Offences" Ordinances. A Sub-Committee also dealt with the difficult question of Registration of Partnerships, a Bill on which subject was read a second time in the early part of the year under review.

This Sub-Committee held a large number of meetings and presented a revised Bill which was approved of by a majority of the Sub-Committee, seven in number, but was dissented from by a minority of three. Owing to the opposition which the Bill has evoked among the mercantile community, it has been decided not to proceed further in the matter at the present time.

EDUCATION.

Nearly all the schools of the Colony are vernacular schools for Malays, under the direct control of Government. All the expenses of these schools, which are 171 in number, are defrayed by Government, and they provide free tuition in Malay to some 11,300 pupils. The remaining schools are, with the exception of four which are controlled and financed by Government, aided-schools managed by private bodies, and receive grants-in-aid from Government.

In 29 schools English only is taught, in six, English and Tamil, in two, Tamil only, and in one, Chinese only; the number of pupils enrolled in these four classes of schools are 10,803, 458, 66, and 36, respectively. The average daily attendance at vernacular schools was 8,949, and that at schools where English only is taught was 8,533. There are, in addition to the Government and aided-schools, a few private schools which are not inspected by Government. These are chiefly Chinese vernacular schools.

The net expenditure on Government schools was $85,490, on aided-schools (English, Anglo-Tamil, Tamil, and Chinese), $92,317, and on Government vernacular schools, $87,286.83.

The cost of the Malacca Training College for Malay teachers during the year under review was $4,136.65. The value of this institution is considerable, and it produces very good teaching material for the vernacular schools. The demand, however, for trained teachers, more especially in Penang and Province Wellesley, is much in excess of the supply, and it will be some years before the schools in these Settlements are staffed exclusively by trained men.

The Commercial and Science Classes at the Raffles Institution have made satisfactory progress during the year.

GOVERNMENT INSTITUTIONS.

Hospitals.

Practically all the hospitals of the Colony are under Government management, while the estate hospitals, maintained by the planters, are under Government supervision. The total number of admissions to the hospitals, exclusive of the lunatic asylum, was 24,696, as against 23,762 in 1905. In Singapore, 231 patients were admitted into the lunatic asylum, the number during the previous year being 228.

Reformatory.

The number of boys in the reformatory at the end of the year was 63; the highest number during the year was 62 and the lowest 36. The new permanent buildings, to accommodate

120, were finished early in 1906. The health of inmates has been good throughout the year. Instruction is given at the school in English and Romanised Malay, and at the workshops in tailoring, carpentering, and shoemaking. The expenditure amounted to $8,391, as against $8,984 in 1905.

Savings Bank.

The transactions in this branch amounted to $393,889 (deposits), and $385,013 (withdrawals), as compared with $369,970 and $391,066 in 1905. The amount standing to the credit of depositors at the end of the year was $582,236 (in 1905, $558,485).

The investments at the close of the year stood at $587,438, as compared with $579,238 at the corresponding period of the previous year.

POLICE.

The Inspector-General, Lieutenant-Colonel Pennefather, retired on pension in December.

One assistant superintendent was seconded for one year for service in the Federated Malay States Police.

One inspector died and one was pensioned during the year.

Seventeen European constables were enlisted, 10 were engaged from England, and seven locally.

Eleven European constables were dismissed during the year.

Twenty-three murders and 51 gang robberies were reported during the year; of the latter, 24 were proved in the preliminary investigation to be false.

The police force numbers over 2,000 men, of whom more than 300 are Sikhs.

A training department for the instruction of recruits was established during the year at Malacca.

The judicial returns indicate a slight decrease in cases of serious crime, though the number of persons brought before the magistrates exceeded that for 1905.

VITAL STATISTICS.

The estimated population of the Colony was 611,790, the figures given by the Census of 1901 being 572,249. Fifteen thousand four hundred and thirty-four were registered as against 17,254 in 1905.

The death-rate was 37·82 per mille of the population. The rate in 1905 was 40·51.

In Singapore, Penang, and Malacca, the general arrangements for sanitation and conservancy are carried out by the Municipality and in the several districts of Province Wellesley by sanitary boards with powers under the Municipal Ordinance.

CLIMATE.

The mean rainfall in Singapore was 118·38 inches; in Penang, 102·21 inches; in Province Wellesley, 88·79 inches; in the Dindings, 90·34 inches; and in Malacca, 80·57 inches.

The greatest fall in 24 hours was 5·7 inches in Penang on 19th April.

POSTAL, TELEGRAPH, AND TELEPHONE SERVICE.

Over 17,000,000 articles passed through the Post Office, of which nearly 585,000 were registered.

The postal revenue amounted to $587,952, as against $555,285 in 1905. The expenditure was $429,881, a decrease of $41,223 as compared with that of the preceding year. The money order business showed a decrease $429,706, due to the fact that the Colonial Post Office has, since 1905, ceased to be the intermediary for the exchange of money orders between the Federated Malay States and India and Ceylon. Excluding such "through" orders, there was an increase of $120,511. The transactions in sterling amounted to £24,434, and those in Indian currency to Rs. 1,911,702, while in local currency business was done to the extent of $477,713, the aggregate being thus $1,776,600, as against $2,206,305 in 1905 and $2,464,770 in 1904.

The telegraphs in Penang and Province Wellesley and the inland lines in Malacca, all of which are connected with the Government system of the Federated Malay States, are the property of Government.

The telephone system of Singapore is the property of the Oriental Electric and Telephone Company. This Company also maintains for Government the lines connecting the Government offices and police stations, &c. There is a branch exchange at Johore Bharu, which is connected with Singapore.

The telephone lines in Penang and Province Wellesley, 704 miles in length, are owned and worked by Government. The system in use is the metallic circuit in Penang, but in Province Wellesley earth returns are used. The number of subscribers at the end of the year was (331) and there were in addition 48 service lines.

The Malacca telephone system is also worked by Government, and consists of 154 miles of service lines.

MILITARY.

The garrison in Singapore consisted of two companies of Royal Garrison Artillery, half a company of Royal Engineers, one battalion of British Infantry and one battalion of Native Infantry besides Asiatic Artillery (Sikhs) and details of other corps. No militia force exists. The strength of the garrison was 2,380, all ranks.

A detachment of the Malay States Guides was quartered in Penang. The military contribution of the Colony in respect of the year 1906 amounted to $1,751,785.

A Volunteer Artillery Force, 134 strong (including reserves), exists in Singapore. Only Europeans are enlisted in it. Its armament is under alteration. It also possesses four Maxim guns (·303), in the use of which it is proficient. This corps is armed with Martini-Metford carbines and sword-bayonets.

A Maxim company, 47 strong, works the four guns belonging to the Singapore Volunteer Artillery.

There is one company of Volunteer Engineers, composed of Europeans, 56 strong (including reserves).

There is one company of Eurasians and one company of Straits-born Chinese, 120 and 89 strong, respectively, including reserves.

A Volunteer Infantry Force, 84 strong, is also in existence in Penang, and is reported to be efficient.

There is in addition in Singapore a bearer and ambulance section composed of 7 Europeans, 14 Eurasians, and 4 Chinese (Straits-born), and a Cadet Corps, 152 strong, armed with Martini-Metford carbines. In Malacca there is a Cadet Corps, 81 strong, also armed with Martini-Metford carbines.

IMMIGRATION.

I.—Chinese.

The number of immigrants from Chinese ports shows an increase of 1·9 per cent. upon the number for 1905, but a reduction of 19·3 per cent. upon that for the record year, 1903. The figures for female immigration show a regrettable reduction from all ports, which it is difficult to explain satisfactorily. The number of *unpaid passengers, i.e.*, of coolies who obtain free passages from China, in consideration of entering into contracts for service on arrival in the Colony, has risen to 18,675, an increase of 3,811 over the figures for last year. These *unpaid passengers* now number over 12 per cent. of the total adult male immigrants, the highest percentage since the year 1900.

The harvests in South China appear to have been normal.

The returns for the last five years are as follows:—

Year.	Men.	Women.	Children.	Total.
1902	184,198	13,151	9,807	207,156
1903	193,339	14,539	12,443	220,321
1904	179,650	14,395	10,751	204,796
1905	148,869	13,714	10,548	173,131
1906	153,624	12,478	10,485*	176,587

*Boys, 7,631 ; Girls, 2,854.

II.—Indian.

The figures for the last three years are appended:—

—	1904.	1905.	1906.
1. Statute Immigrants	2,721	4,823	3,674
2. Free Coolies (with aided tickets)	3,556	7,687	20,215
3. Other immigrants	24,475*	27,030†	28,152‡

* 1,810 children. † 2,488 children. ‡ 3,450 children.

Twenty-one thousand one hundred and forty-four adults and 735 children left the Colony for Southern India.

CHRISTMAS ISLAND.

The revenue received in Christmas Island during the year 1906 was $1,670.46; the royalty on the phosphate exported, which is paid in London, was £7,153 8*s.* 10*d.*, as against £6,096 15*s.* in 1905, and £4,638 8*s.* 8*d.* in 1904.

The expenditure was $13,709.55 (in Christmas Island), and $1,004.70 (in Singapore, for passages, &c.); total $14,714.25.

There was a slight increase in crime, 183 cases being tried as against 166 in 1905 and 178 in 1904. Two hundred and seventy-three persons were accused and 227 convicted. The offences were, however, chiefly of a petty character.

Thirty-five vessels were cleared in 1906, with a total registered tonnage of 45,053, as against 50,744 tons in 1905. Excluding cargoes of phosphate taken by the company's steamer to Singapore, ten vessels took phosphate to Japanese ports and five to European ports.

The district officer reports that the present somewhat limited facilities for loading, to a large extent due to the indifferent

weather so frequent on the island, render it doubtful whether shipments of phosphate can be much increased beyond those of the last two years; but it is anticipated that the shipments for 1907 will not be less than those for 1906, and may, if favourable circumstances prevail, reach 100,000 tons.

On the 1st January, 1906, the population of the island was 1,061, and on the 31st December it had risen to 1,152; of the latter number 1,112 were males and 40 females. Included in these figures were 26 Europeans and Eurasians (18 males, 8 females). The death-rate was 28·5 per mille per annum, the figures in 1905 and 1904 being 19·98 and 116·43 respectively. Beri-beri was responsible for 54·8 per cent. of the deaths, the number succumbing to this disease being 17, as against 12 in 1905.

The increased mortality from beri-beri is hard to explain. There were 174 less admissions to hospital for this disease, and the number of cases treated dropped from 601 to 410. The percentages of deaths to cases in 1905 and 1906 were 2 per cent. and 4·1 per cent. respectively. The conditions of life were no different; the coolies enjoy good food, pure air and water, and there is no fault to find with the sanitary conditions under which they live. The mortality from beri-beri is, of course, much less than in formr years, but it is clear that the problem of eradicating the disease is by no means near solution.

In the hospital "parboiled," or Indian rice, is used exclusively, but the coolies are said to decline to eat it when not in hospital. It is hoped that the company will endeavour to persuade the coolies to take to the parboiled rice, as the balance of medical opinion still tends to the belief that the ordinary rice cannot be neglected as a possible cause of the disease. If looked at only from the business point of view, it would appear that the interests of the company would be best served by eradicating the disease, as the number of patients admitted for beri-beri in 1906 was 370, with an average stay in hospital of 25 days each. This represents a loss of 9,250 days' labour, in addition to the cost of drugs &c., and the food of the coolies.

The year was a very wet one, rain falling on 189 days, and the output of phosphate was in consequence not so large as was anticipated. During the year an experimental vegetable garden was started by the company, but the earth is so porus that it retains hardly any moisture. The garden is, moreover, not large enough for the needs of the community.

GENERAL OBSERVATIONS.

Early in February His Royal Highness Prince Arthur of Connaught passed through Penang and Singapore on his way to Japan to invest His Imperial Majesty the Mikado with the Order of the Garter. He was accorded a loyal and hearty reception by the inhabitants of both Settlements.

The Governor (Sir John Anderson, K.C.M.G.), proceeded on leave in March, and returned to the Colony in June. The office of Colonial Secretary being vacant, Sir William Taylor, K.C.M.G., Resident-General, Federated Malay States, administered the Government during that period.

Tenders for the construction of the harbour works in Singapore having been invited from several prominent firms of engineering contractors in England, that of Sir John Jackson, Ltd., was in March accepted by the Legislative Council. Preliminary work was begun before the end of the year.

Extensive schemes for the improvement of Penang Harbour, the construction of a lagoon dock at Tanjong Pagar, and the general improvement of facilities for working cargo at both ports were under consideration at the end of the year.

There was a slight outbreak of cholera in the Nibong Tebal District of Province Wellesley, but the precautions taken effectually prevented the disease from spreading, and it was soon stamped out.

The award of the Umpire in the Tanjong Pagar Dock Company Arbitration was delivered on July 4th. The sum awarded was $28,447,177.

Good progress was made in Singapore with the improvement of Kampong Glam, which has been rendered possible by Ordinance XIII. of 1904, and the work will undoubtedly result in a great amelioration of the sanitary conditions of that quarter of the town. In Penang a Board for the management and control of Hindu and Mohammedan endowments was constituted under Ordinance XVII. of 1905 at the beginning of the year, and has taken over the administration of several important properties, notably the Captain Kling Mosque lands, in the heart of the town, and it is hoped that the efforts of the Board will do much for the improvement of the town.

New instructions for the administration of the Colony in substitution for those dated 17th June, 1885, and 7th December, 1887, were passed under the Royal Sign Manual and Signet on the 31st October.

The Agri-horticultural Show held in August has already been referred to. It should do much to further the development of all the agricultural industries of the Colony and the Federated Malay States.

In November His Majesty's Order in Council annexing the Colony of Labuan to the Straits Settlements was issued; from the 1st January, 1907, it becomes part of the Settlement of Singapore. It has been arranged that only the balance of the island's revenue over its expenditure (if any) shall be assessable to military contribution.

The opium and spirit farms for the Colony for the term 1907-9 were let in August. The tenders received were considerably below the rents paid by the late farmers, so that the revenue (for 1907) from licences shows a large reduction on the figures which appear in the Estimates for 1906.

A British Vice-Consul was appointed for the Siamese Western States, with headquarters at Alor Star, as the growing interests of British subjects in these countries urgently called for the appointment of such a resident official.

Mr. W. R. Collyer, I.S.O., retired from the post of Attorney-General early in the year, while other retirements were those of Captain Boldero, R.N. (retired), Master Attendant, Lieut.-Colonel Pennefather, Inspector-General of Police, and Mr. R. W. Hullett, Principal of Raffles Institution and for some time Acting Director of Public Instruction, Straits Settlements. Mr. J. K. Birch took leave in November prior to retirement in the early part of 1907.

Among the appointments made during the course of the year was that of Sir William Hyndman-Jones as Chief Justice in succession to Sir Lionel Cox, retired. Towards the latter portion of the year the Education Department was reorganised and Mr. J. B. Elcum was made Director of Education for the Straits Settlements and Federated Malay States, the appointment of Director of Public Instruction being abolished. Captain Boldero was succeeded as Master Attendant by Commander C. A. Radcliffe, R.N., and Lieut.-Colonel Pennefather as Inspector-General of Police by Mr. W. A. Cuscaden. I was appointed Colonial Secretary in June, and assumed my duties on the 27th of that month.

Mr. G. T. Hare, C.M.G., I.S.O., late Secretary for Chinese Affairs, Straits Settlements and Federated Malay States, died during the year, after a long illness. His work in the Chinese Protectorate is too well known to require reference in this report. He was a most valued public servant, and one who, after his retirement, was always willing to place at the disposal of the Government his great and varied experience of Chinese affairs.

The death of Mr. H. H. Hudson, Solicitor-General, Penang, must also be recorded. Mr. Hudson joined the Service in 1888 as Deputy Registrar of the Supreme Court, Singapore, and was appointed Solicitor-General in 1902. In him the public service has prematurely lost an officer of much talant.

In England the deaths occurred of Mr. Cosmo Paterson and Mr. W. G. Gulland. These two gentlemen were for many years prominently connected with this Colony.

Professor W. J. Simpson, who was engaged to enquire into and report upon various matters connected with the health of the Colony, stayed some months at Singapore, and it is probable that his visit will, in the future, be regarded as one of the most important events in the history of this Colony.

It will be necessary for the Government, the municipalities, and the people to work together with the resources at their disposal so that the various measures he may recommend for promoting the health of the towns by better housing and drainage and by improved water supplies may be adopted. In time, it is hoped that owing to these improvements the towns of the Colony may not occupy the unenviable position they at present hold in respect to death rates.

The Acting Colonial Secretary in his report for the year 1905 referred to the Shipping Conference, and I desire here to bring prominently to notice that the Registrar of Imports and Exports in his report for 1906 states that freights from Europe and America are now generally under the rates charged a few years ago, but owing to the export trade to Europe, America, Australia, and Indian ports, so far as freights are concerned, being in the hands of shipping rings, rates are excessive, and are slowly but surely restricting our operations as collectors of produce.

ARTHUR YOUNG,

Colonial Secretary.

19th August, 1907.

COLONIAL REPORTS.

The following recent reports relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

STRAITS SETTLEMENTS.

(For Report for 1906, *see* No. 540.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Government House, Singapore,
9 September, 1908.

MY LORD,

I HAVE the honour to transmit the Annual Report on the Straits Settlements for the year 1907.

I have, &c.,

JOHN ANDERSON.

The Right Honourable
The Earl of Crewe, K.G.,
&c., &c., &c.

1125 Wt 25928 11/08 D & S 5 33907 A 2

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1907.

FINANCIAL.

Revenue.

The estimated revenue of the year was $9,436,932 and the actual revenue $10,023,016, or $586,084 in excess of the estimate and $404,704 in excess of the actual revenue of 1906.

The following is a comparative statement showing the actual revenue collected in 1906 and 1907:—

—	Revenue of 1906.	Revenue of 1907.	Net increase.	Net decrease.
	$ c.	$ c.	$ c.	$ c.
1. Land revenue	377,972 46	412,710 13	34,737 67	—
2. Rents exclusive of land	39,727 21	56,470 37	16,743 16	—
3. Licences	6,650,558 49	6,749,404 60	98,846 11	—
4. Stamps	367,464 95	393,924 55	26,459 60	—
5. Port and harbour dues	276,019 38	274,569 86	—	1,449 52
6. Post and telegraphs	592,962 58	620,442 61	27,480 03	—
7. Government railway	196,682 98	199,972 96	3,289 98	—
8. Fines and forfeitures	96,585 62	90,739 76	—	5,845 86
9. Fees of office	298,717 86	319,383 78	20,665 92	—
10. Reimbursements	320,457 10	313,256 14	—	7,200 96
11. Sale of Government property ..	2,323 35	57,807 85	55,484 50	—
12. Interest	84,183 47	113,040 35	28,856 88	—
13. Miscellaneous receipts	67,162 64	180,859 57	113,696 93	—
14. District collections	141,314 39	142,172 43	858 04	—
15. Land sales	106,180 49	98,261 53	—	7,918 96
Total	9,618,312 97	10,023,016 49	427,118 82	22,415 30
Deduct decrease			22,415 30	
Net increase			404,703 52	

Exclusive of land sales, the total revenue of 1907 was $9,924,755 as against $9,512,132 in 1906.

The increase under Miscellaneous Receipts is principally due to Labuan Revenue having been included under this head.

EXPENDITURE.

The following is a comparative statement of expenditure for 1906 and 1907:—

Heads of Service.	1906.	1907.	Increase.	Decrease.
	$ c.	$ c.	$ c.	$ c.
1. Charges on account of public debt	24,000 00	193,966 79	169,966 79	—

Total	8,747,819 42	9,499,632 80	1,344,076 02	592,202 64
Deduct decrease			592,202 64	
Net increase			751,873 38	

The total expenditure of 1907 chargeable to current revenue was $751,873·38 more than in 1906.

The large increase under land and houses purchased is principally due to the purchase of property at Mount Wallich, $380,000, in connection with the Singapore Harbour Works, and of the land belonging to the Tanjong Pagar Dock Company, Limited, $351,355, for railway extension.

The actual expenditure was $391,059 in excess of the estimate, the chief heads under which the actual expenditure exceeded the estimate being:—

	$
Land and houses purchased	846,999
Charges on account of Public Debt ...	119,967

While there were savings under:—

Military expenditure	230,508
Public Works, special services ...	163,377
Personal emoluments	146,419

The total Revenue and Expenditure for the last five years were as follows:—

	Revenue.		Expenditure.	
	$	c.	$	c.
1903	7,958,496	07	8,185,952	14

Important Changes in Taxation.

The Liquors Ordinance XIX. of 1906 not only introduced a higher scale of taxation on intoxicating liquors but rendered all beverages containing more than 2 per cent. of pure alcohol liable to duty.

The following table shows the most salient increases in taxation under the new Ordinance:—

	Old Scale.		New Scale.	
	$ c.		$ c.	
Warehouse licence ...	120 00	per annum.	1,000 00	per annum.

Bhang within Municipal limits			24 00	„
Bhang without Municipal limits			12 00	„

A fee of 50 cents is charged for the board supplied.

Assets and Liabilities.

According to the accounts of the Colony the assets on 31st December, 1907, were $5,559,163 and the liabilities $1,822,596, or the assets exceeded the liabilities by $3,736,567. The assets were as follows:—

	$	$
Cash in the Treasury and banks...	1,937,076	
Investments	2,449,089	
Advances, &c.	281,718	
Other Governments	75,745	
Federated Malay States	18,198	
Suspense Account.		
British North Borneo copper coin	163,284	
Charges in connection with coin shipped for reminting	460,596

		5,559,163

and the liabilities were:—

Deposits	837,876	
Drafts	996	
Advances from Loan Account ...	336,176	
Temporary Loan from Federated Malay States	500,000	
Suspense Account, Interest, Currency Commissioners	147,548	
		1,822,596
Credit Balance		$3,736,567

The assets of the Currency Commissioners on 31st December, 1907, were as follows:—

	$	$
Cash in reserve	11,285,129	
Amount shipped for reminting...	3,487,500	
Amount to be recovered from Gold Standard Reserve Fund	196,045	
Investments	11,673,681	
		26,642,355

and the liabilities were:—

Deposits	23,685,212	
Advances from Straits Settlements Loan Account	2,957,143	
		26,642,355

Public Debt, showing Provision for Repayment.

A loan of £5,000,000 was raised in 1907 under the Loan Ordinance IV. of 1907 which authorises the Colonial Govern-

ment to borrow a sum of £7,861,457 for the following services:—

	£
1. Payment of Award and Costs under "The Tanjong Pagar Dock Ordinance, 1905"	3,390,000
2. Redemption of Outstanding Debentures of the Tanjong Pagar Dock Board ...	151,670
3. Tanjong Pagar Construction Works:—	
(1) Main Wharf, Lagoon Dock and Graving Dock	2,092,600
(2) Prai River Dock—Improvements to, and reconstruction of, wharves ...	70,000
4. Singapore Harbour Works	1,264,000
5. Singapore Municipal Water Works ...	523,187
6. Penang Pier Extension and General Harbour Improvements and repayment of $600,000 (£70,000) borrowed from the Federated Malay States on account of Penang Pier	200,000
7. Penang Municipal Loan—Improvement of Water Supply and other works ...	170,000
	£7,861,457

Provision is made for the repayment of this loan by means of a Sinking Fund which will come into operation in 1917, ten years from the date of the first issue of the debentures under the Ordinance. The payment of the award and costs was made on the 1st July, 1907.

The charge on account of interest on the Public Debt amounted to $677,343 in 1907.

The total amount in local currency of the debt of the Colony on 31st December, 1907, was $42,428,571 or $4\frac{1}{6}$th the revenue of the Colony for the year but only $2\frac{1}{5}$th of the aggregate of the Government, Tanjong Pagar, and Municipal revenues.

Exchange.

Exchange remained firm through the first eight months of the year, telegraphic transfers being as high as 2*s.* $4\frac{3}{16}$*d.* in January and never falling below 2*s.* 4*d.*, but in September there was a fall which continued until in October Government was obliged to intervene. This was done by offering telegraphic transfers on London at 2*s.* $3\frac{3}{4}$*d.* subsequently reduced to 2*s.* $3\frac{11}{16}$*d.*, and later by issuing gold here in exchange for

currency. By the end of the year the banks had taken £487,000 in telegraphic transfers and £335,000 in gold, and the year closed with a slight tendency to a rise in exchange.

CURRENCY.

The price of bar silver remained high for the first eight months of the year and advantage was taken of it to sell $3,000,000 of the old dollars. Later the price of bar silver fell very fast and no more dollars were sold. New dollars were received during the year to the face value of $10,767,500. They were by no means popular at first, and at the end of the year $5,150,000 were remaining in the hands of the Currency Commissioners. The $1 note continued to be popular; but there was some difficulty in distinguishing them from $5 notes when dirty and at dusk, and to obviate this a second issue of these notes was overprinted with the figure 1 on each side of the word "One." This rendered the note easily distinguishable. As notes of the earlier issue were received at the Currency Commissioners' office they were retained and not again issued.

These notes will in future be printed on red paper, but up to the end of the year none of this issue had been received.

At the beginning of the year the dollars and notes in circulation, including the stocks held by the banks, and the Treasuries in the Colony and the Federated Malay States, amounted to $46,991,332, of which $22,222,560 were Government Currency Notes, $1,325,795 Bank Notes, and the rest Straits Dollars. At the end of the year the corresponding figures were $42,774,636, $22,444,970 and $1,716,125, respectively.

The excess of imports of dollars over the quantity of that coin exported was $304,260 for Singapore and an excess of exports over imports of $1,173,242 for Penang, in all an excess of exports of $868,982 as against an excess of $1,456,552 in 1906. No account is taken in these figures of small quantities of dollars taken away from or brought into the Colony by passengers. The greater part of the exports went to Sumatra.

During the year subsidiary silver coin to the value of $414,357 was withdrawn from circulation, and the amount now in circulation is probably not much more than is required.

Seventy-five thousand and fifty dollars of copper coin was received during the year from the Calcutta Mint.

Early in the year it was decided to remove British North Borneo copper, which was circulating freely in the bazaars, from circulation; and by the end of July cents of this issue to the face value of $160,651 were received at the Treasuries of the Colony in exchange for Straits Settlements cents.

The average bank note circulation was $1,825,089, as compared with $1,329,053 in 1906.

The average amount of Government currency notes in circulation for each month of the year was:—

	$
January	22,551,000
February	22,700,657
March	23,232,146
April	23,858,418
May	24,140,566
June	24,893,484
July	27,333,265
August	27,333,910
September	27,009,488
October	26,522,454
November	24,378,637
December	22,635,449

Municipal Revenue and Expenditure.

The revenue of the three municipalities amounted to $3,301,304, and their expenditure, including sums spent on loan works, to $3,218,022. The usual comparative statements of revenue and expenditure and the debts of the Boards and a statement of the provision made for the repayment thereof are detailed below.

Tanjong Pagar Dock Board.

The Board on behalf of the Government undertook charge of the Tanjong Pagar Dock Company's business and property after expropriation proceedings on July 1st, 1905.

The revenue and expenditure for the last five years were as follows:—

	Revenue.			Expenditure.	
	$	c.		$	c.
1903	5,227,994	40	...	3,997,700	92
1904	5,409,486	56	...	3,870,669	72
1905	5,420,354	26	...	4,072,004	79
1906	5,617,784	92	...	4,097,428	62
1907	6,145,579	25	...	4,484,476	20

The Board is liable for the repayment of $1,300,000 in debenture stock. The repayment of $250,000 falls due on April 10th, 1908, and $1,050,000 will be repaid on 30th June, 1909.

The capital cost of the undertaking as represented by the award and including Government costs is the sum of $29,003,149·45 on which the Board pays interest at 4 per cent. per annum out of revenue.

In addition, under the provisions of the Tanjong Pagar Dock Ordinance the Board is responsible to Government for the interest, sinking fund, management, and redemption of

such loans as will be required to carry out the new construction works, towards which £2,092,600 has been allocated in the Loan Ordinance of 1907 for the Main Wharf, Lagoon Dock, and Graving Dock, and £70,000 for the improvements to, and reconstruction of, the wharves at Prai River Dock.

The following figures taken from the Wharf Tonnage Returns indicate a steadily increasing business in the number of vessels which use the wharves and in the amount of cargo and coal handled:—

——	1903.	1904.	1905.	1906.	1907.
Number of vessels	2,211	2,356	2,315	2,470	2,556
Tonnage	4,290,463	4,445,558	4,491,351	4,701,004	4,747,210
Coal inwards and outwards ...	1,021,033	1,098,052	1,139,042	1,205,580	1,111,682
Cargo inwards and outwards...	1,110,518	1,170,021	1,115,654	1,150,527	1,270,285

TRADE.

The sterling value of imports of merchandise into the Colony in 1907 (excluding Labuan and the Christmas and Cocos Islands) was £37,668,000, an advance of £585,000, or over 1½ per cent. compared with 1906.

Exports of the same class valued £32,921,000, an increase of £106,000, or ·3 per cent.

The dollar figures show as follows in millions:—

——	Average for five years ended 1905.	1906.	1907.
Merchandise—	$	$	$
Imports	315·5	317·8	322·9
Exports	262·4	281·3	282·2
Total	577·9	599·1	605·1
Treasure—			
Imports	35·1	21·5	27·7
Exports	35·3	29·7	23·1
Total	70·4	51·2	50·8
Gross Aggregate Trade ...	648·3	650·3	655·9

The imports of merchandise from all places into Labuan valued $1,223,032 in 1907, a decrease of $247,356 below 1906,

and exports of the same valued $1,254,542, a decline of $156,761.

The imports from Singapore into Christmas Island valued $157,555, an advance of $6,132 compared with 1906, and exports to all places, including phosphates of lime, say at £2 per ton, about $1,894,000, an advance of $333,000.

Singapore imported from places other than the sister Settlements (Penang and Malacca) 72·6 per cent. of the import value of merchandise in 1906, an advance of ·3 per cent., Penang on the same basis 27·0 per cent., a fall of ·3 per cent., and Malacca the same as in 1906, ·4 per cent.

Of the exports of merchandise, Singapore sent 69·1 per cent., a fall of nearly ·2 per cent., compared with the previous year, Penang 30·5 per cent., a rise of nearly ·4 per cent., and Malacca ·4 per cent., a fall of ·2 per cent.

The only land traffic included in the figures is that between Malacca and the neighbouring State of Negri Sembilan.

From the United Kingdom, 11 per cent. of the total import value of merchandise was received, a fall of ·1 per cent.; from British Possessions and Protectorates 46·6 per cent., a fall also of ·1 per cent.; and from Foreign Countries 42·4 per cent., a rise of ·2 per cent.

The value of exports of merchandise to the United Kingdom was 24·0 per cent., an increase of ·4 per cent.; to British Possessions and Protectorates 26·3 per cent., an advance of 1·4 per cent.; and to Foreign Countries 49·7 per cent., a fall of 1·8 per cent.

Taking the last 20 years and dividing it into two decennial periods, the imports of all classes, principally manufactures and foods from the United Kingdom, the Continent of Europe and America, were valued as follows:—

—	United Kingdom.	Foreign, European Countries, and America.	Total.
	$	$	$
1888–1897	191·4	80·1	271·5
1898–1907	316·5	186·0	502·5
Increase	125·1	105·9	231·

Therefore the excess of British over foreign goods amounted in value in the first period to $111,300,000 and in the last to $130,500,000, showing on the percentage basis an advance of 65·4 per cent. for the United Kingdom and 132·2 per cent. for the Continent and the United States.

According to the classes into which our trade is divided, live animals, foods, drinks, and narcotics (Inter-Settlement trade included) averaged a value of $128·8 million for the five years ended 1906, manufactured textiles $42·4 million and other manufactured articles $28·9 million compared with which 1907 fell in the first-named class by 1·4 per cent., and in the second by 6·4 per cent., but increased in the last-named by over 13 per cent.

Export values on the same basis show an average of $79·8 million for tin, &c., and for all other raw materials $50·5 million, being advances in 1907 of 4·6 per cent, and ·4 per cent., respectively.

An attempt to calculate the tonnage consigned to other places, but landed at Singapore for transhipment by other vessels, no figures of which are printed, shows that approximately 329,000 tons of cargo and 140,000 cases, casks, &c., of liquors were so treated in 1907, of which 74,856 tons and 129,838 cases, &c., of liquors were from Europe and America, the United Kingdom sending in this way 51,358 tons and 62,745 cases, the Continent of Europe and America 23,498 tons and 67,093 cases.

Large transhipments from the Dutch Indies comprised petroleum and benzine, tobacco and sugar.

Imports.

The gross total imports into the three Settlements from all places and from each other valued 364½ million dollars, of which 335½ million represented merchandise.

A comparative statement of the quantities of the principal imports shows:—

—	1906.	1907.	Increase.	Decrease.
	Pieces.	Pieces.		
Cotton piece goods	5,406,218	4,178,098	—	1,228,120
Silk piece goods	230,360	239,827	9,467	—
	Chests.	Chests.		
Opium	12,658	13,714	1,056	—
	Gallons	Gallons.		
Spirits	1,129,797	1,087,286	—	42,511
	Cases.	Cases.		
Petroleum	1,243,146	1,243,153	7	—
	Corges.	Corges.		
Sarongs	303,598	315,648	12,050	—
	Tons.	Tons.		
Coal	753,918	667,695	—	86,223
Rice	450,615	447,685	—	2,930
Fish, Dry and salted ...	55,205	49,731	—	5,474
Tobacco	7,311	6,317	—	994
Tin ore	52,026	57,198	5,172	—
Wheat flour	27,438	31,732	4,294	—
Sugar	71,929	54,950	—	16,979

There is an advance under merchandise of over 5 million dollars compared with 1906, animals, foods, drinks, and narcotics accounting for less than $1\frac{1}{2}$ million of the advance, Straits produce and raw materials generally for over $4\frac{3}{5}$ million dollars increase, manufactured metals for nearly 3 million dollars more, and miscellaneous manufactures for about $\frac{9}{10}$th of a million more.

The manufactured textile class, however, fell off in value by $2\frac{2}{5}$ million dollars, and unmanufactured metals, chiefly tin and tin ore, by about the same amount.

The increase in foods, &c., is made up of larger values of rice, opium, padi, tapioca, sago, lard, live animals, provisions, and vegetables, important declines marking the trade in pepper and sugar, and to a less extent in arecanuts and coffee.

Copra alone accounted for more than three-fourths of the enhanced value under produce and raw materials, Para rubber giving the next important advance, followed by oils, gum copal, and gutta jelutong.

Borneo rubber, coal, gutta percha, sticklac, and gambodge fell off in value under the class.

Manufactured metals imported rose in the value of hardware and ironware, machinery, cycles, motor cars and parts, steel, tin plates, corrugated and bar iron, tools and implements, copperware, and brassware, &c., telegraph and telephone materials and zincware alone declining in value received.

Of manufactured goods not comprised in the textile or metal classes, increases are seen in musical instruments, leatherware, ships' stores, cabinetware, cement, earthenware and crockery, woodenware, photographic materials, and paints.

Matches, japanware, and paperware are the only declines of consequence, but japanese goods are now more properly declared under other items.

The decline in the value of tin and tin ore is attributable to smaller imports and lower prices.

Manufactured textiles show the enormous decline in the value of plain cottons imported of nearly $3\frac{1}{4}$ million dollars, prints also giving less value as well as gunnies, yarns, sarongs, silk piece goods and twine.

Dyed cottons, woollen cloth, apparel, umbrellas, cotton and woollen blankets and unenumerated textiles as well as Manila rope furnished advances in value.

Rice from Siam fell off in quantity but French Indo-China and Burma were larger suppliers than in 1906, and of the total import over 95 per cent. was re-exported.

The average import price of Benares opium slightly rose, an increase in import quantities meeting a decrease in exports.

Sugar from Java ports fell off and export movements corresponded, but from Penang to the United Kingdom a considerable increase in locally-produced cane is noted.

A decline is seen in the quantity and value of dried fish imported, Bangkok and French Indo-China supplying less.

It is estimated that over 75 per cent. of the wheat flour brought here is of Australian origin, 12 per cent. American, 8 per cent. Indian and the balance the product of a mill recently established at Hong Kong.

European tobacco is said to have had a record year in sales, imports of this class increasing from the United Kingdom, and an enormous increase from the United States of low-priced cigarettes was observed.

Although imports of European spirits fell off, there was a good market for gin, and the tendency was most marked in favour of better-class brandies since the introduction of the higher duties.

Malt liquors fell off in the total quantity imported, but Scotch brews found an increasing market at the expense of German makes.

Frozen meat brought from Australia considerably increased, the military now being supplied with this class.

Cement from the United Kingdom fell off largely owing, it is alleged, to the difficulty of procuring tonnage, notwithstanding increased rates of freight.

Candles of Burmese make have entirely taken the place of Continental.

A tendency in buyers towards better-class perfumery, especially French, is noticeable.

A large increase in the value of musical instruments, gramophone and records especially, is seen, as well as in cinematograph accessories and stereoscopic views, all included under photographic materials.

Earthenware and crockery sold freely, French tiles finding a good market.

An increasing quantity of Japan pressed glass found its way here.

The motor car industry has been exceedingly active as regards sales, but the Colonial market is limited and many of the places traded with do not afford facilities for their use.

There was for some time a considerable demand for mining machinery and agricultural implements, but the depressed state of the tin market checked expansion.

Coal imports decreased, especially from Australia and Bengal, but Japan sent 167,000 tons more, which is still, however, under the average of former years.

Much the same quantity of petroleum was received for sale locally, Sumatra and Borneo brands increasing, but American declining.

The quantity received for transhipment also varied little, except in benzine, which largely increased.

The distribution of all kinds of oil is now under the control of a combine, and competition being eliminated prices have risen by about 30 per cent. since the beginning of the year.

The value of imports for the last five years from the different countries was:—

('000 omitted.)

Merchandise.	1903.	1904.	1905.	1906.	1907.

Exports.

The gross total exports from the three Settlements to all places and to each other valued over 319½ million dollars, of which over 295 million dollars represented merchandise.

A comparative statement of the quantities of the principal exports shows:—

—	1906.	1907.	Increase.	Decrease.
	Tons.	Tons.		
Sago	50,002	59,244	9,242	—

	lbs.	lbs.		
Para rubber (included in gums).	941,665	2,090,000	1,148,335	—

There is an increase of $1\frac{1}{5}$ million dollars in the value of goods sent out compared with the previous year, animals, foods, drinks, and narcotics accounting for nearly $2\frac{1}{2}$ million dollars increase, while produce and raw materials fell by over one million dollars, and manufactured goods by $220,000.

Under raw materials, metals, including tin and tin ore, fell off by $5\frac{7}{10}$th million dollars, produce rising by nearly $4\frac{9}{10}$th million, and raw textiles declining by $213,000.

Foodstuffs and manufactured goods generally responded in sympathy when there were heavy fluctuations on the import side.

The volume of produce sent off represented by tin, gambier, copra, coffee, hides, sago, rattans, tapioca, gums and spices amounted to 400,516 tons, an increase of 22,933, of which copra alone accounted for 16,000 tons.

Taking the average output for the five years ended 1906 increases are seen in 1907 in the exports of all the principal articles except tapioca, gambier, coffee, and tin.

The prices for the different classes of Straits produce show at the close of the year a fall compared with those at the beginning in tin, cube gambier, copra, pepper, rattans, hides, tapioca, and Borneo and Para rubbers.

The reduced demand for tin, exports falling by $4\frac{1}{2}$ per cent. in volume, combined with the financial crisis in the United States, caused prices to fall, in spite of Chinese holders retaining stocks and the loss at the close of the year was about £70 per ton over prices at the beginning.

Copra has shown enormous expansion all over the East, but the reduction in homeward freights as well as an alleged

stricter adherence to the Conference rates at Macassar and Java ports has probably attracted the article to Singapore.

The drop in the price of Santos coffee made it profitable to import here and sell in competition with that from the Dutch Indies.

Imports of tin ore from Australia rose largely, but smaller supplies were received from the Dutch mines.

The preserving and tinning of pineapples is a large and important local industry and greatly increased quantities were exported, but prices have been very poor and the markets are said to be largely overstocked.

Sago gave increased exports but tapioca fell off, Malacca territory producing less.

Black pepper exports increased though prices for both kinds have fallen considerably.

The output of gambier is slowly decreasing in face of substitutes now used, and a natural disinclination to grant land for this purpose owing to its injurious effects on the soil. At the same time the decline in output has been accompanied by a fall in price.

The great increase in Para rubber, about 2,090,000 lbs. being sent out valued at nearly 4½ million dollars, is owing to increased production in the Federated Malay States.

The United Kingdom received 78 per cent. of the whole, Ceylon, Belgium, Australia, Denmark, the United States, and Japan taking the balance between them.

Borneo rubber decreased in volume sent out and gutta percha advanced, but mostly in the lower grades, while the output of gutta jelutong rose considerably.

An increase in the trade of gum copal is apparent, but benjamin exports declined.

The value of exports for the last five years to the different countries was:—

('000 omitted.)

Trade by Countries.

The imports from the United Kingdom valued over 35⅔ million dollars, an advance of $426,000.

The larger advances took place in manufactured metals seen in such articles as machinery, ironware and hardware, tin plates, steel, cycles, and motor cars, and corrugated iron.

Woollen cloth, sarongs, and sewing-thread advanced in the textile class, but cotton piece goods declined by 2¼ million dollars, and dyed yarn by $326,000.

Exports to the United Kingdom valued 67 7/10th million dollars, an advance of 1⅕th million.

Para rubber values rose by 1⅗th million dollars followed by tapioca, sugar, copra, sago flour, hides, and coconut oil.

Tin, gutta percha, and Borneo rubber were responsible for the principal declines.

The value of imports from the Continent of Europe rose to nearly 18 million dollars, an increase of about 1 9/10th million.

The order of importance in the advance was Germany, Italy, Austria, Holland, Spain, and Russia.

France, Denmark, Norway, and Sweden, with Belgium, sent less value of goods.

German supplies increased in apparel and hosiery, hardware and ironware, woollen cloth, and milk.

Milk and cottons from Italy also advanced, as well as Sarongs, hardware and earthenware from Holland, hardware and ironware and cement from Austria, salt and tinned goods from Spain, cement from Russia, and tram and rail materials, paints and cottons from Belgium.

The declines are seen in wire nails and cement from Germany, apparel and sarongs from Italy, cottons from Holland, milk, perfumery, and telephone materials from Belgium, sugar from Austria, brandy and Swiss milk from France, cement from Denmark, and matches and milk from Sweden and Norway.

Exports to the Continent of Europe valued over 34½ million dollars, an increase of over 2 million.

To Russia, Italy, Belgium, Spain, and Germany increased values in that order were sent, while Austria, Denmark, France, Holland, and Sweden and Norway took reduced values.

The value of produce sent to France rose in copra, but fell in tin, flake tapioca, gambier, rattans, coffee, illipi nuts, and white pepper.

Increased exports of gutta percha, copra, gum copal, pearl tapioca, tin, black pepper, and rattans were sent to Germany, but a large decline is noted in Borneo and India rubbers and white pepper.

Enhanced values of tin, copra, and black pepper were sent to Italy, copra and tin to Russia, copra and Para rubber to Belgium, and copra to Spain.

Declines in the export of copra, pepper, and tin to Austria, white pepper to Belgium, and of copra, black pepper, and gambier to Denmark are apparent.

Imports from the United States of America valued nearly 3⅗th million dollars, an advance of $894,000, the following articles giving advanced values: cigarettes, tallow and lard, metals excluding machinery, wheat flour, oilman's stores, and perfumery.

Machinery and petroleum received fell off in value.

Exports to the United States valued 25⅔th million dollars, a fall of over 9¼ million.

Tin alone fell by 7⅗th million dollars, followed by gambier, pepper, Borneo rubber, tapioca flour, rattans, coffee, &c.

The increases were in preserved pineapples, gum copal, tapioca pearl and flake, and gutta jèlutong.

Imports from British India and Burma valued nearly 42 million dollars, an advance of 1⅗th million.

The value of coal and gunny bags from Calcutta fell off, but opium increased.

Rice from Burma ports, cattle, goats' skins, and oilcakes from Madras and dyed yarn, fruits, wax, and curry-stuffs from Bombay all rose in value, but sarongs and cottons fell in value from Madras ports.

Exports to British India and Burma valued 13 7/10th million dollars, an increase of $96,000 only.

Declines are seen in arecanuts and sticklac to Calcutta, arecanuts and raw silk to Burma, coffee and gum benjamin to Bombay, and goats' skins, cottons, and arecanuts to Madras ports.

Increased values were sent to Calcutta of tin and pearl sago, provisions, fish, matches, curry-stuffs, and sarongs to Burma ports, and tin and arecanuts to Bombay.

From the Federated Malay States the value received was $73\frac{1}{10}$th million dollars, a fall of over $2\frac{1}{2}$ million, but these figures exclude the rail traffic between Perak and Penang.

Tin in slabs declined by over $6\frac{1}{10}$th million dollars received, followed by coffee and sugar, but were met by heavy advances in tin ore, Para rubber, pearl tapioca, and copra.

Exports to the Federated Malay States valued $38\frac{4}{5}$th million dollars, an advance of $4\frac{1}{10}$th million.

Rice, cottons, swine, cigars, and cigarettes, kachang oil, beans and peas, and ironware all rose in value sent and to a less extent sugar provisions, milk, bran, fish, coconut oil, paperware, and medicines.

Malt liquors, apparel and hosiery, and cattle values sent fell off.

The value of imports from the Dutch Indies was over 49 million dollars, a fall of $1\frac{4}{5}$th million.

From Sumatra black pepper and arecanuts, Borneo and india rubbers, gutta percha, illipi nuts, gum benjamin, wax, and tobacco all declined.

Copra, gutta percha, and india rubber advanced in value from Dutch Borneo, but Borneo rubber, jelutong, and rattans fell off.

Sugar from Java declined by nearly $1\frac{1}{2}$ million dollars, but curry-stuffs, sarongs, arecanuts, tobacco, black pepper, and birds' nests also show reduced values, tapioca flour being the only increase of importance.

Copra increased from the Celebes, including Moluccas ports and the Dutch Islands, as well as gum copal, hides, and rattans, and greater values of dried fish and copra were received from the smaller Dutch Islands.

Tin ore, however, fell off from the islands, as well as slab tin, pepper, and fresh fish.

Greater values of copra and swine are seen from Bali and Lambok, but less of coffee, cattle, and raw cotton.

Black pepper from Acheen increased in value, arecanuts falling off, while from the Natunas and Anambas Islands copra advanced, but cube gambier and white pepper from Rhio continued to decline.

The value of exports to the Dutch Indies valued nearly $40\frac{3}{5}$th million, a decline of about $1\frac{1}{5}$th million dollars.

Rice, fish, coconut oil, and gunnies declined to Java ports, lubricating oil alone showing an increase, while increases, though small, were numerous to Sumatra, seen especially in cottons, rice, opium, coconut oil, and sarongs, tin alone showing a reduced value sent.

Opium, gambier, and matches to the Celebes and Moluccas fell off, but cottons rose as well as rice to the smaller islands.

While more rice was sent to Dutch Borneo cottons and sarongs show decreased values, there being, however, several small advances in other goods.

Values of cottons, opium, and fireworks to Achinese ports fell off, and to Rhio opium also declined, but rice to the Natunas and Anambas groups gave advanced values.

The variations in goods sent to Bali and Lombok were not of much moment.

From the Malay Peninsula, excluding the Federated Malay States, viz., Johore, Kelantan, and Trengganu, as well as the States more or less in the Siamese sphere of influence, viz., Patani and Singora, imports valued nearly 13 million dollars, an increase of $446,000.

Black pepper, tin ore, gutta percha, and fresh fruits from Johore all fell in value, but copra, arecanuts, and gambier increased.

From Kelantan fish, copra, arecanuts, and padi gave enhanced values, cattle alone decreasing; from Trengganu padi and tin ore increased but black pepper declined; and while cattle and padi from Patani, and swine and padi from Singora advanced, tin from Patani fell off.

Exports to these places valued over 6½ million dollars, an advance of $670,000.

Rice values rose to Johore, but railway materials fell off; yarn and sarongs rose to Kelantan and yarn to Patani, but the value of rice to Trengganu declined.

Imports from Siam and Siam West Coast valued nearly 30 million dollars, a fall of about 3½ million.

Rice from Bangkok fell off by $2\frac{7}{10}$th million, followed by declines in the values of fish and sticklac and tin and firewood from the places on the coast, but tin ore, swine, and rice rose from the last named.

Exports to Siam and Siam West Coast valued $17\frac{1}{5}$th million dollars, a fall of $444,000.

Gunnies, sarongs, cotton piece goods, yarn, sugar, and arecanuts to Bangkok declined, but opium and coconut oil values advanced.

Cottons and rice rose in value to Siam West Coast.

The imports from Hong Kong and China valued $28\frac{1}{3}$rd million dollars, a rise of $1\frac{7}{10}$th million.

From Hong Kong tobacco, kachang oil, lard, tin, preserved vegetables, and provisions rose in value, but jewellery, silk piece goods, matches, and paperware fell off.

Kachang oil, preserved vegetables, lard, and joss sticks, and paper increased in value from China, twine imports declining.

Exports to Hong Kong and China valued $16\frac{3}{5}$th million dollars, a fall of over a million.

Tin, rice, and rattan values rose to Hong Kong, but declined in sugar and sugar-candy, pepper, preserved pines, Benares opium, raw cottons, gunnies, bêche-de-mer, and tobacco.

Tin and rice values increased to China, while opium, sugar, preserved fruits, and birds' nests fell off.

From French Indo-China imports rose principally in rice, the value of swine declining and exports also advanced seen in greater values of gunnies, lubricating oil, and arecanuts, but exports of grey yarn, gambier, and wax fell off.

Imports declined from British North Borneo and Sarawak while exports rose.

Gutta jelutong, sago flour, gutta percha, and rattans from Sarawak increased in value, but white pepper, Borneo rubber, and coal declined, while rice and cotton piece goods sent rose in value.

Rattans fell off from British North Borneo, but goods sent give an increase in the total.

Imports from Japan increased by two million dollars seen in greater values of coal, fish, umbrellas, apparel and hosiery, and carriage materials, chiefly jinrikishas received, but japan-ware declined as well as silk piece goods.

An advance in exports of $204,000 is recorded, Borneo rubber and rice accounting for the increase.

Observations on Trade.

The condition of trade in 1907 affords small grounds for satisfaction.

Although exports generally show greater volume than in 1906, prices were lower except in a few articles, and the sales of cotton piece goods were below normal both as to turnover and prices.

The low prices of produce, the slump in the tin market, Chinese speculation in eastern exchange, and the calling in of capital by the Indian chetties or money-lenders, all contributed to depress the local market.

Up to the close of September, metals and hard goods generally were benefited by the rising home prices, but a check was then given, and some expensive stocks were on hand in a financially weak bazaar, evidenced by several large dealers being forced to suspend payment.

Imports of piece goods were lower in quantity than in any year since 1896, giving a fall of 17 per cent. in quantity compared with the annual average for the decade ended 1897 and 16·4 per cent. compared with that for the decade ended 1907.

Stocks of textiles especially are still unduly high in certain classes, and a disquieting increase is observable in the direct

shipments from the United Kingdom to Bangkok, our best market in grey and white goods as well as prints.

It is, however, stated by the Registrar of Imports and exports in his Annual Report that this abnormal advance did not appear to be in answer to any great demand, but was due to the attempts of new firms to push a business by giving extended credits and selling at cutting rates, and the stocks of the class are said to be still heavy, being only slowly absorbed.

The proximity of Singapore to Bangkok, its ability to satisfy demands at short notice and in small quantities of the most favoured class of goods, in conjunction with the strong position of the large Chinese rice merchants here, are advantages of which Singapore cannot well be deprived.

The Federated Malay States, Sarawak, and Borneo, and the East Coast of the Malay Peninsula are promising markets for our imports.

The import of European metals averaged $8,178,000 for the decade ended 1906 compared with which 1907 showed 41 per cent. more value, but the figures have been to some extent affected by the imports of materials for the construction of important Government and Municipal works now in progress.

The United Kingdom sent metals to the value of $7\frac{8}{10}$th million dollars, a rise of about $1\frac{7}{10}$th million, or 27 per cent. over 1906 imports, the Continent of Europe over $3\frac{1}{5}$th million, an advance of $688,000, or about the same percentage of increase, and the United States of America half-a-million dollars, an advance of $154,000, or over 43 per cent.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

During the year a considerable increase in the cultivation of Para rubber was noticeable throughout the Colony, every suitable bit of land being planted up with it. Indigo is still largely cultivated in the district round Thomson Road and Serangoon Road, and shows no signs of decrease.

A large increase in the cultivation of native vegetables is noticeable and the fruit crop was unusually heavy. Cocoanut plantations were extended to the Tampinis River.

Trials of the cultivation of ground-nuts and soy-beans were made in the Serangoon district in Singapore. Soy is manufactured largely in Singapore from beans imported from China. If a strain could be procured which would fruit well in this climate, it would form a valuable industry.

Pineapple cultivation remained steady, no great progress in it was seen. Sago still continues in demand in Singapore. Ramie and sanseviera are being cultivated to some considerable extent in Province Wellesley and Johore.

Lemon-grass has been widely cultivated as a catch crop between coconuts, as well as in many places through rubber.

The rubber experiments in the Botanic Gardens, Singapore, were continued.

The planting of rubber by European companies in Province Wellesley has continued to extend notwithstanding a decline in the price of rubber.

The area planted in Penang Island still continues insignificant. One application for 500 acres of hill land on the west side of the island to be planted with rubber was received from a Chinese syndicate.

The export of Para rubber from Penang in 1907 amounted to 324,464 lbs. against 79,968 lbs. in 1906. Very little of this was from the Settlement of Penang. The Gardens Department are experimenting with Manicoba rubber at Tasek Glugor, in Province Wellesley.

The prices of tapioca have been gradually falling from the high level reached in 1906 and the area under cultivation is diminishing. This product comes chiefly from the Malakoff and Alma Estates, in Province Wellesley, and from Chinese-owned estates in South Kedah, adjoining the Province Wellesley border. It is largely planted as a catch crop with rubber.

1907 was a good year for coconuts and copra. Sugar cultivation is decreasing, the outturn for 1907 from Province Wellesley is stated to have been 7,000 tons against 11,000 of the previous year.

The clove and nutmeg plantations are gradually disappearing, but there are still many fine clove gardens on the hills—all owned by Chinese.

The fruit season was a very good one.

The rice crops in several Mukims both in Penang and Province Wellesley were reported to have failed entirely. Nowhere was the yield better than 500 gantangs per acre—the average was probably below 300. (8 gantangs = 1 bushel.)

Penang was well represented at the Agricultural Show at Kuala Kangsar in August, 1907, and many of the exhibits took prizes.

Land Grants.

The area of Crown Land alienated, and the number of Statutory Grants issued and the premia paid for the same during the last five years are as follows:—

Singapore.

—	1903.	1904.	1905.	1906.	1907.
Area granted	a. r. p. 844 1 22 sq. ft. 502 717	a. r. p. 469 0 37 sq. ft. 284 768	a. r. p. 169 2 34 sq. ft. 46,451	a. r. p. 5,895 0 23 sq. ft. 805,636	a. r. p. 119 3 28 sq. ft. 327,687

* 249 Statutory Grants. 21 Mining Leases.

The total land revenue collected in Singapore was $168,895 compared with $147,411 in 1906.

The settlement of about 56 acres of land in Kampong Glam held under defective titles was proceeded with, and by the end of the year was approaching completion.

The demarcation of the island in connection with the re-survey was completed in August, none of the re-survey sheets had been published by the end of the year, but the whole town and a large part of the country has been completed, and the sheets will be issued block by block in 1908.

Two valuable properties were acquired for the Harbour Improvement Scheme, 199,355 square feet at Mount Wallich at a cost of $380,000, and 2 roods and 17 poles off Tanjong Pagar Road at a cost of $50,000.

In Penang the land market remained extremely dull throughout the year.

Government purchased the property known as "Huntley Lodge," in Macalister Road, for $22,500, and a large portion of the Ayer Rajah Estate for $18,000.

A large portion of the Sungai Pinang Reclamation was available for sale, but only one application was received. It was decided, owing to the dull state of the market, to defer the question of putting up some of the land to auction.

In Malacca, there has of recent years been a distinct appreciation in the value of land, especially in the neighbourhood of the town. And this is true not only of house property but also of agricultural holdings. High prices were the rule in 1907.

The registration of "customary" lands in Malacca has made but slow progress, and cannot be completed for some years yet. It was rendered necessary by the recent re-survey of a number of districts.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 20,055,874, as compared with 19,711,498 in 1906. Fuller particulars will be found in the appended comparative table.

Nationality.	1906.				1907.

Total ..	13,334,338	5,736,918	640,242	19,711,498	13,579,730	5,908,366	567,778	20,055,874

The increase over 1906 is therefore 344,376 tons.

The principal increases are:—Japanese, 526,931 tons; Dutch, 138,541 tons; French, 106,065 tons; and Austrian, 44,193 tons.

The decreases are:—British, 118,676 tons; Danish, 118,443 tons; Norwegian, 112,257 tons; German, 100,141 tons; Italian 17,015 tons; and Swedish, 11,548 tons.

The great increase in Japanese tonnage is due to extra steamers put on the Japan to Bombay run and to her recovery from the effects of the war. The increase in 1907 as compared with 1903 (the year before the war) is 324,587 tons only.

The French and Dutch increases are accounted for by new large steamers having been added to the lines trading between Europe and the far East.

Comparative Statement of Merchant Vessels Inwards and Outwards for last Five Years.

—	1903.	1904.	1905.	1906.	1907.
Total tonnage entered and cleared.	18,404,383	18,267,499	18,890,600	19,711,498	20,055,874

It will thus be seen that the tonnage as compared with 1903 has increased by 1,651,491 tons.

Native Craft and Steamers under 50 tons.

—	1906.		1907.	
	No.	Tons.	No.	Tons.
Arrivals	15,649	737,921	15,210	709,898
Departures	15,783	746,880	15,379	721,738
Total	31,432	1,484,801	30,589	1,431,636

The decrease as compared with 1906 is 53,165 tons.

Comparative Statement of Tonnage of Native Craft and Steamers under 50 tons, Entered and Cleared, for last Five Years.

—	1903.	1904.	1905.	1906.	1907.
Total tonnage entered and cleared.	1,620,365	1,566,976	1,544,284	1,484,801	1,431,636

As compared with 1903 this native craft tonnage has decreased by 188,729 tons. This decrease is probably due to the fact that steamers of medium tonnage now call at ports which were not visited formerly.

The amount realized by light dues was $221,482.85.

The total collections under this head for the last five years are as follows:—

	$	c.
1903	209,649	35
1904	213,203	90
1905	222,997	61
1906	223,387	94
1907	221,482	85

During the year seven new steamers with a tonnage of 620 tons and sailing vessels of 2,114 tons were registered under the Imperial and Colonial Shipping Acts. Six new sailing vessels of 634 tons were registered under Ordinance V. of 1883; also 859 of 6,720 tons under Ordinance VIII. of 1872.

LEGISLATION.

Of the thirty-seven Ordinances passed during the year, seventeen were amendments to existing Ordinances. Three dealt with supply, three with loans, one (the Repeals Ordinance) was merely passed to repeal a number of obsolete laws, and the remainder were either new laws or re-enactments in a consolidated or improved form of existing laws.

The most important of the new Ordinances are the Courts Ordinance and the Civil Procedure Code, which were framed by a Committee appointed by the Governor for that purpose. The functions and jurisdiction of the Supreme Court have been entirely re-modelled and assimilated with that of England, and an attempt has been made to consolidate the whole of the law relating to the legal profession. The most important change, however, in the legal system, is the inauguration of District Courts, with civil jurisdiction up to $500 and a limited jurisdiction in cases between landlord and tenant, administration actions, grants of probate, and proceedings relating to distress for rent.

A Bill will be introduced into the Legislative Council to give the Supreme Court jurisdiction in divorce cases.

The Civil Procedure Code, 1907, adopted the English law so far as it is applicable; but where the law is not covered by the Rules and Orders relating to the general practice and procedure of the Supreme Court in England, the existing law has been preserved.

"The Criminal Procedure Code Amendment Ordinance, 1907," was necessitated by the passing of "The Courts Ordinance, 1907," the primary object being the adaptation of "The Criminal Procedure Code, 1900," to the new system of District Courts inaugurated by the Courts Ordinance, 1907. A com-

prehensive chapter dealing with the procedure in cases of *Habeas Corpus,* was inserted in order to carry out the provisions of the Imperial Extradition Acts.

Another important Ordinance was "The Stamp Ordinance, 1907," which was introduced with a view to raising revenue, more especially from the death duties on large estates. The Ordinance was the subject of careful scrutiny on the part of the local Chambers of Commerce and of the Unofficial Members of the Legislative Council, and the rates of duty were in several cases reduced to meet their views. The Ordinance did not come into force until February 1st, 1908.

Labuan became part of the Settlement of Singapore on January 1st, 1907, and three Ordinances were passed to place its legal status on a satisfactory footing.

It was necessary to raise a loan of £7,861,457 for the purpose of paying the Tanjong Pagar Award, redeeming the outstanding debentures of the Board, constructing the works at Tanjong Pagar and Singapore Harbour, and other purposes. Part of this sum has been lent to the Municipalities of Singapore and Penang to enable them to undertake works of public utility and to enlarge the existing Water Works. Two Ordinances extending the borrowing powers of the Municipal Commissioners of Singapore and Penang were accordingly passed to carry into effect the purposes of the loan.

It was found necessary to deal by law with the use of cocaine and similar drugs amongst the coolie classes, and "The Morphine Ordinance, 1904," of which the scope was confined to that particular drug, was accordingly repealed, and a new Ordinance was passed under the title of "The Deleterious Drugs Ordinance, 1907," to prevent the illicit use of all drugs which the Governor in Council might consider physically and morally injurious. I regret to say that despite the vigilance of the police, the large number of convictions and the deterrent sentences imposed by the magistrates, the profits of the pernicious trade are so large that the number of professional injectors is on the increase. A Bill on somewhat more stringent lines than the present Ordinance will be introduced into the Legislative Council to cope with this evil.

The Government of the Federated Malay States having expressed its desire to restrict the practice of medicine to qualified persons, the Medical Registration Ordinance, 1905, was repealed. A new Ordinance under a similar title consolidated the law in this respect, and provision was made for the establishment of a Medical Council common to the Colony and Federated Malay States.

In order to procure a cheap and abundant labour force to cope with the increased demand for labour caused by the rapid development of the rubber industry in the Malay Peninsula, a representative Committee was appointed by the Governments of the Colony and Federated Malay States to enquire

into and report upon the best system of recruiting labour from the Madras Presidency. In accordance with the recommendation of this Committee, the Tamil Immigration Fund Ordinance has instituted a fund, subscribed by the estates which employ Tamil labour, to provide for direct recruiting in India by the officers of this Government and for cheap and regular passages by the British India line of steamers. The Government has also been in correspondence with the Government of Netherlands India with a view to obtaining the importation of Javanese labour for employment on rubber and agricultural estates.

Owing to the growth of the savings bank system and the economic development of the Malay Peninsula, "The Government Savings Bank Ordinance, 1879," had become obsolete. It was necessary to repeal the old law and to legislate afresh for modern requirements.

The only other Ordinance to which it is necessary to refer is "The Municipal Ordinance Amendment Ordinance, 1907." It is based on the report of Professor W. J. Simpson, who was engaged to enquire into and advise upon the various measures necessary for promoting the health of the towns.

A Bill codifying the law relating to Trustees and incorporating the latest English legislation on the subject has been drafted by the Attorney-General, and an Ordinance bringing the law regarding companies up to date is also in course of preparation.

The Merchant Shipping Bill, which was sent to the Board of Trade at the end of 1905 before the passing of the Imperial Merchant Shipping Act, 1906, was received from that department at the beginning of this year. The work of incorporating the suggestions of the Board of Trade and such of the provisions of the Imperial Act as are applicable to the Colony is being steadily proceeded with, and it is hoped that before long this measure will be introduced into the Legislative Council.

EDUCATION.

Nearly all the schools of the Colony are vernacular schools for Malays, under the direct control of Government. All the expenses of these schools, which are 173 in number, are defrayed by Government and they provide free tuition in Malay to some eleven thousand one hundred and forty-two pupils. The remaining schools are, with the exception of three which are controlled and financed by Government, aided-schools managed by private bodies, and receive grants-in-aid from Governments.

The net expenditure on Government Schools was $51,195.27, on aided-schools (English, Anglo-Tamil, Tamil and Chinese),

$106,010.20, and on Government Vernacular Schools, $83,430.69.

The cost of the Malacca Training College for Malay teachers during the year under review was $8,065.83. The value of this institution is considerable, and it produces very good teaching material for the vernacular schools. The demand, however, for trained teachers, more especially in Penang and Province Wellesley, is much in excess of the supply, and it will be some years before the schools in these Settlements are staffed exclusively by trained men.

The commercial and science classes at the Raffles Institution have made satisfactory progress during the year.

GOVERNMENT INSTITUTIONS.

Hospitals.

Practically all the hospitals of the Colony are under Government management, while the estate hospitals maintained by the planters are under Government supervision. The total number of admissions to the hospitals, exclusive of the lunatic asylum, was 26,196, as against 24,696 in 1906. In Singapore 197 patients were admitted into the lunatic asylum, the number during the previous year being 231.

The number of patients treated in the hospitals was 28,708, of whom 1,193 were Europeans: the corresponding figures for 1906 were 27,340 and 1,103, respectively. Of these the deaths numbered 3,688 (74 being Europeans); the rate of mortality shows a percentage of 12·85 of the total number of cases treated as compared with 14·01 recorded for 1906. These figures include 483 cases, with 57 deaths, at the lunatic asylum.

The inmates of the various Leper Hospitals, the majority of whom are quartered at Pulau Jerejak, numbered 389 at the close of the year as compared with 391 in 1906. One hundred and thirty-five deaths occurred as against 154 in 1906.

Reformatory.

The number of boys in the Reformatory at the end of the year was 68: the highest number during the year was 68 and the lowest 53. The new permanent buildings, to accommodate 120, were finished early in 1906. The health of the inmates has been very good throughout the year. Instruction is given at the school in English and Romanized Malay, and at the workshops in tailoring, carpentering, and shoemaking. Bread-making and vegetable planting were introduced during the year, and the boys make their own bread and grow their own vegetables. The expenditure amounted to $9,105 as against $8,391 in 1906.

Savings Bank.

The transactions in this branch amounted to $415,926 (Deposits), and $416,442 (Withdrawals), as compared with $393,889 and $385,013 in 1906. The amount standing to the credit of depositors at the end of the year was $598,882 (in 1906, $582,236).

The investments at the close of the year stood at $618,620 as compared with $587,438 at the corresponding period of the previous year: the details are as follows:—

	$
India 3½ per cent. Rupee Paper ...	368,120
Singapore Municipal Debenture Stock, bearing interest at 5 per cent. ...	58,149
Singapore Municipal Debenture Stock, bearing interest at 4 per cent. ...	74,300
Fixed Deposits at the Chartered Bank, at 4 per cent.	60,000
Cape Stock, at 3 per cent.	8,516
Queensland Stock, at 3 per cent. ...	16,212
Zanzibar Government 3 per cent. Guaranteed Loan	15,535
Cardiff Corporation Stock, at 3 per cent.	17,788
Total	618,620

POLICE.

The police force numbers over 2,000 men, of whom more than 300 are Sikhs.

Sixty-six boys have passed through the training depôt at Malacca for the instruction of recruits since it was opened in October, 1906.

Prisons.

The daily average number of prisoners in the various prisons during 1906 and 1907 were as follows:—

		1906.	1907.
Singapore ...	Criminal ...	920·00 ...	852·00
	Civil ...	53·90 ...	53·35
Penang ...	Criminal ...	300·91 ...	208·81
	Civil ...	25·91 ...	18·58
Malacca ...	Criminal ...	24·07 ...	24·98
	Civil ...	9·53 ...	11·65

The consistent practice of banishing habitual criminals (358 in 1907) has had the salutary effect of reducing the number of inmates and of checking the re-admissions of old offenders.

The health of the prisoners was uniformly good, the number of deaths being at Singapore 20, at Penang 18, and at Malacca nil.

Criminal Statistics.

Twenty murders and seventy-two gang robberies were reported during the year; of the latter 35 were proved in the preliminary investigation to be false.

There was on the whole less serious crime than in 1906, and this is attributed in a great measure to the banishment of habitual criminals.

One hundred and sixty-four persons as against 201 in 1906 were tried before the Supreme Court, 97 being convicted and 67 acquitted. Gang robbery and offences against property were the principal crimes. The lower Courts also had to deal with a smaller number of cases as compared with the previous year. The Bench Courts convicted 400 and acquitted 313 persons (total 713, in 1906, 864) whilst out of a total number of 48,736 who appeared before the Police and Marine Magistrates' Courts 36,641 were convicted and 11,008 were acquitted, the remainder being either committed for trial before the higher Courts or else not yet tried at the end of the year.

In 1906, 54,823 persons were brought before the Police and Marine Magistrates' Courts.

VITAL STATISTICS.

The estimated population of the Colony was 619,796 the figures given by the Census of 1901 being 572,249. Sixteen thousand one hundred and eighty-one births and 24,220 deaths were registered as against 15,434 and 23,140, respectively, in 1906.

The death-rate was 39·07 per mille of the population. The rate in 1906 was 37·82.

The birth-rate was 26·11 per mille, as compared with 25·23 in 1906.

The deaths due to the more important specific or infectious diseases in 1907 were as follows:—

Small-pox 10 (one imported), as compared with 21 (8 imported) in 1906.

Cholera 228 (46 imported), as compared with 510 (244 imported) in 1906.

Beri-beri 1,626, as compared with 1,507 in 1906.

Plague 15, as compared with 10 (one imported) in 1906.

The stringent quarantine regulations and the vigilance of the medical and municipal authorities have hitherto prevented these scourges from finding a permanent home in the Colony.

In Singapore, Penang, and Malacca, the general arrangements for sanitation and conservancy are carried out by the municipality and in the several districts of Province Wellesley by Sanitary Boards with powers under the Municipal Ordinance.

Climate.

The mean temperature of the air at Singapore was 80·6° F. (maximum 88·2° and minimum 73·9°); Penang 80·3° (maximum 89·2°, minimum 73·5°); Malacca 79·9° (maximum 88·4°, minimum 72·9°).

The mean rainfall in Singapore was 81·25 inches; in Penang, 87·53 inches; in Province Wellesley, 76·78 inches; in the Dindings, 53·21 inches; and in Malacca, 71·35 inches.

The greatest fall in 24 hours was 6·72 inches in Province Wellesley on 14th November.

In spite of the high death-rate the climate in the towns and country which has long been opened up cannot be considered unhealthy for Europeans, who, if they take ordinary precautions and with their higher and more sanitary mode of life can to a great extent avoid the malarial and other tropical fevers and dysentery which attack the Oriental inhabitants of the peninsula.

POSTAL, TELEGRAPH, AND TELEPHONE SERVICE.

Over 18,300,000 articles passed through the post office, of which over 640,000 were registered.

The postal revenue amounted to $624,845, as against $593,705 in 1906. The expenditure was $448,275, an increase of $18,394, as compared with that of the preceding year. The money order business showed an increase of $187,539. The transactions in sterling amounted to £20,564 and those in Indian currency to Rs. 2,255,391, while in local currency business was done to the extent of $463,682, the aggregate being $1,964,139, as against $1,776,600 in 1906 and $2,206,305 in 1905.

The telegraphs in Penang and Province Wellesley and the inland lines in Malacca, all of which are connected with the Government system of the Federated Malay States are the property of Government.

The telephone system of Singapore is the property of the Oriental Telephone and Electric Company. This Company also maintains for Government the lines connecting the Government offices and police stations, &c. There is a branch exchange at Johore Bharu, which is connected with Singapore.

The telephone lines in Penang and Province Wellesley, 810 miles in length, are owned and worked by Government. The system in use is the metallic circuit in Penang, but in Province Wellesley earth returns are used. The number of subscribers at the end of the year was 374 and there were in addition 57 service lines.

The Malacca telephone system is also worked by Government, and consists of 213 miles of service lines.

PUBLIC WORKS.

SINGAPORE.

Among the more important public works completed during the year were three bungalows for Government officials and certain improvements and extensions were made to the hospitals and medical institutions. An opium factory was constructed at Telok Blangah which is rented by the farmers.

Considerable progress was also made in the construction of the new Tan Tock Seng Hospital, the foundations of 11 wards including baths and latrines being completed, and a commencement was made in the latter half of the year with the new Maternity Hospital. The erection of quarters for certain subordinate officers entitled to them was also put in hand.

Numerous improvements and repairs of a minor nature were effected to certain Government schools, police stations, and the prison.

The new ferro-concrete lighthouse at One Fathom Bank was practically completed, the new light being exhibited on 12th January, 1908. The lighthouse is octagonal in plan carried by 17 piles 24 inches and 18 inches in diameter, and includes service room quarters for lightkeeper and crew, visitors' room, office and armoury, store room for oil, water, and dry goods, and bath and lavatory accommodation. The light which was supplied by Messrs. Chance Brothers, Birmingham, is a second order occulting white light giving four flashes in quick succession every 15 seconds. The duration of each flash is one-third second followed by an eclipse of two seconds, the long interval between the groups of flashes being 7⅔rd seconds. The intensity of the light is 64,000 candles. It has a range of 15½ nautical miles, the focal plane being 92½ feet above high water. The total cost of the work will be $247,000.

The total amount expended by Government on public works special services, in Singapore, was $528,860·82.

Singapore Harbour Works.

In January, 1907, the staff of the contractors, Messrs. Sir John Jackson, Limited, came on the ground, and took possession of a piece of land for their workyard between Robinson Road and the sea front, extending from the Telok Ayer Market to Fort Palmer.

In April the engineering staff of Messrs. Coode, Son, and Matthews, the consulting engineers, arrived.

During the year the contractors built their import jetty, which extends for a length of nearly 600 feet out into the sea, near the Telok Ayer Market end of the yard.

Early in April, the contractors commenced clearing away the jungle at Pulau Ubin, and laying their temporary roads for opening up the quarry from whence they are obtaining their granite for the works.

A commencement was made with driving the staging for the southern end of the reclamation wall, in September, 1907, and the staging at the northern end, near Johnston's Pier, was commenced in October.

At the end of the year the state of the works was as follows: The contractors' office, bungalows for the European foremen, fitting shop, blacksmiths' shop, cement shed, locomotive house, and carpenters' shop had been erected: a stone crusher for breaking the granite from Pulau Ubin for concreting purposes, a concrete mixer, and the floor for building the concrete cylinder rings were completed, and the necessary railway lines laid throughout the yard.

One hundred and forty feet of staging had also been erected at each end for the commencement of the quay wall.

Pulau Ubin quarry at the end of the year had been opened up, and a jetty started for loading barges with broken stone for the works.

The numbers of men employed were:—On the quay wall and reclamation works, 365: at the quarry, 157: these figures including 61 Europeans. Amongst other plant on the works, the contractors had the following:—two locomotives, two 35-ton goliaths, four 10-ton steam cranes, six 5-ton steam cranes, one 15-ton hand crane, and 391 tons of cement in the cement shed.

Roads.

Under roads, streets, bridges, and canals, special services, the forming, draining, and metalling of Bedoh Road was completed, the earthwork in connection with the new road from Kranji to Woodlands was finished and a length of 1·13 miles metalled. Four brick and concrete culverts and two bridges of 10 feet and 15 feet span respectively were built.

The old earth formation West Coast Road for a length of 1·26 miles between Pandan and Jurong Rivers was raised an average height of 3·26 feet and two culverts built.

A new bridge of 20 feet span was constructed at the junction of Labrador Villa Road and Pasir Panjang Road.

A length of 6½ miles of road was re-metalled, chargeable to special service votes, and a further length of 13½ miles re-metalled from the vote for maintenance.

The total expenditure under roads, streets, bridges, and canals, special services, was $139,920.60.

The length of road under maintenance was 89·7 miles, of which 85 miles are metalled with granite and laterite, 2·7 gravelled, and 2 natural.

The dredger "Mudlark" removed 121,026 tons of silt from the Singapore River, 92,526 tons of which were removed in Chinese twakows and deposited in the Mount Zion Reclamation and the remainder removed to sea. A sum of $31,999·51 was spent in depositing dredging in the reclamation.

Penang.

The total expenditure, exclusive of establishment and other charges, &c., by the Public Works Department during 1907 in Penang, Province Wellesley, and the Dindings was $871,218·26.

In Penang the principal works taken in hand and completed were certain quarters for Government officers and improvements to the wards and low-lying grounds of the hospitals; the opium and spirit farm offices and factory were completed; a new tiled roof and hardwood timber trusses were put to St. George's Church, the reclamation at Sungai Pinang was completed, the new dredger from England was received and a new launch built locally for towing mud barges. A commencement was made with the extension of the Government offices to provide room for the Chinese Protectorate and Indian Immigration offices. The old Convalescent Bungalow was pulled down and a new bungalow commenced near the same site.

The Batu Feringgi Road was further extended and several decayed timber bridges were renewed in iron and masonry.

In Province Wellesley a new ward and a new dresser's quarters were built at Bukit Mertajam Hospital, a new isolation camp for animals was commenced near Butterworth, and also a new police station at Sungai Lembu. The extension of the water supply to Sungai Setar and Sungai Acheh, including a syphon under the Krian River, was completed.

Several decayed timber bridges and culverts were renewed in iron and masonry. Masonry drains were extended in several villages, and a new steam road-roller purchased from England.

The total cost of public works was $508,279.58, including establishment charges.

The total cost of roads, streets, bridges, and canals was $362,938.68.

Malacca.

All the works undertaken at Malacca were of a minor character and consisted chiefly of improvements, extensions, and alterations to certain Government buildings and the construction of additional quarters for the police and of two new vernacular schools.

The channel at entrance to Malacca River was deepened by means of a grab dredger. The quantity dredged was 20,134·80 tons at an average cost of 19¾ cents.

Where settlement had taken place the North and South Groynes were raised in order to prevent the sea washing over them and causing damage. The sum expended on this work was $5,000.

IMMIGRATION.

I.—Chinese.

The number of immigrants from China, viz., 227,342, was the largest which has ever been recorded. It exceeds that for 1903, the previous record year, by 3·1 per cent. The female immigrants formed 8·2 per cent. of the total. The total number of infants under three years of age was large; deducting those reported as leaving for other ports 525 male and 645 female infants were added to the population of the Colony. The number of "unpaid passengers," *i.e.*, of coolies who obtain free passages from China in consideration of entering into contracts for service on arrival in the Colony has risen to 24,089. These "unpaid passengers" formed 10·5 per cent. of the total arrivals.

The totals for the last five years are as follows:—

Year.	Men.	Women.	Children.	Total.
1903	193,339	14,539	12,443	220,321
1904	179,650	14,395	10,751	204,796
1905	148,869	13,714	10,548	173,131
1906	153,624	12,478	10,485	176,587
1907	197,284	16,265	13,793*	227,342

* Boys, 10,377; Girls, 3,416

II.—Indian.

The figures for the last five years are appended:—

Year.	1903.	1904.	1905.	1906.	1907.
1. Statute immigrants ...	572	2,721	4,823	3,674	5,499
2. Free coolies (with aided tickets).	1,980	3,556	7,687	20,215	24,709
3. Other immigrants ...	19,478	24,475	27,020	28,152	31,922

The figures for 1907 include 3,548 children.

Twenty-nine thousand six hundred and thirty-one adults and 891 children left the Colony for southern India.

The number of immigrants from south India shows an increase of 20 per cent. on the figures for 1906. This is in a great measure due to the development of the rubber-planting industry in the Colony and Federated Malay States, which has increased the demand for Tamils of the agricultural classes. Coolies are now shipped from Madras as well as from Negapatam, and recruiting depôts are established at both these ports. Of the 30,208 agricultural labourers who came over, about 14 per cent. were females.

CHRISTMAS ISLAND.

The revenue collected locally during the year 1907 amounted to $1,207.81 as against $1,670.46 in 1906. The royalty on the phosphate exported, which is paid in London, was £8,411 16*s.* 2*d.* as against £7,153 8*s.* 10*d.* in 1906 and £6,096 15*s.* 0*d.* in 1905.

The expenditure totalled $16,720.97, $11,810.20 being disbursed on the island and $4,910.77 in Singapore for passages of officers, &c.

The number of cases of crime shows a tendency to rise, being 190 in 1907 as compared with 183 in 1906 and 166 in 1905: the offences were all, however, of a trivial nature, with the exception of two persons who were banished for complicity in unlawful and secret societies.

Thirty-eight vessels were cleared in 1907, an increase of three over 1906, the total registered tonnage amounting to 49,753 as against 45,053 in the previous year. Of this 4,201 tons sailed under the Swedish flag and 2,330 under the Danish flag, the remainder being British. Apart from the cargoes of phosphate shipped to Singapore in the company's steamer ten vessels sailed for Japanese and eight for European ports with phosphate.

There is no import trade, but the exports, which consist entirely of phosphates of lime, show a substantial increase of 19,814 tons; 110,375 tons being shipped as compared with 90,561 in 1906.

On the 31st December, 1907, the total population of the island was 1,180, of which 1,110 were males; the Europeans and Eurasians numbered 17 males and seven females. The death-rate per mille per annum was, for all residents of the island 12·27 as compared with 28·5 in 1906 and 19·98 in 1905: the deaths of two members of ships' crews are not included in these calculations. Of the 14 deaths five were due to beri-beri and nine to other causes.

The marked decrease in the mortality from beri-beri reflects great credit on the doctor and hospital staff. The number of cases treated was 269 as against 370 in 1906, and for the first time on record the number of re-admissions has exceeded the number of new cases: this factor, coupled with the diminished death-rate from beri-beri and the consistent use of parboiled rice in the hospital and amongst the Tamil community, who are almost immune from the disease, tends to give rise to hopes that this fatal scourge will eventually be eliminated, and that a difficult problem will find a satisfactory solution. The health of the island shows a satisfactory improvement, and there has been a marked diminution in the number of cases of conjunctivitis and dysentery, which can partially be attributed to the excellent sanitary arrangements and good water supply.

The weather throughout the year was distinctly favourable to loading in comparison with 1906, rain falling on 142 days as against 189 in 1906. The mean monthly temperature was 80·85 (highest 93·7 and lowest 68·4). These favourable climatic conditions facilitated larger shipments of phosphate. The rubber plantations and vegetable garden were extended, and the condition of the coolies is now eminently satisfactory, as they are well housed and enjoy good food, water, and air.

LABUAN.

The Island of Labuan was incorporated with the Settlement of Singapore on January 1st, 1907. The revenue and expenditure are kept distinct from the general revenues of the Colony, and the military defence contribution is levied on the net surplus, if any, of the revenue over the expenditure. The total revenue for the year amounted to $104,659.63 and the total expenditure to $96,835.16, the estimates in both cases being largely exceeded. The excess of actual revenue over expenditure for the year was $7,824.47, but the sum on which the military contribution is assessable is only $3,991.75 as the Imperial contribution of £600 towards the expenses of the Brunei Consulate is not liable to this surtax.

The trade of the island shows a diminution of $596,101 in the value of imports and of $370,193 of exports, amounting in the aggregate to 19 per cent. of the total trade. This decrease is attributed to the present system of direct shipment of goods between North Borneo ports and Singapore and the regular service of steamers by the Norddeutscher Lloyd Company, which has driven away a considerable portion of the coastal trade, formerly carried on between Labuan and North Borneo by sailing vessels.

The comparative values of trade for the years 1906 and 1907 are as follows:—

	1906.	1907.
Merchandise.		
	$	$
Imports	1,470,388 ...	1,223,031
Exports	1,411,303 ...	1,254,542
Total ...	2,881,691 ...	2,477,573
Treasure.		
Imports	319,949 ...	135,035
Exports	140,425 ...	65,791
Total ...	460,374 ...	200,826
Grand Total ...	3,342,065 ...	2,678,399

The value of the trade with ports other than those of the Straits Settlements was:—

	$
Imports	429,975
Exports	524,573

The chief decreases were under the heads of rice and grain, cutch and sago flour.

The export of coal from the Labuan collieries showed an increase of 27 per cent. over 1906. For the first time for some years cargoes were exported, 7,600 tons being despatched to Penang, Hong Kong, Saigon, and Manila.

One hundred and forty-seven merchant vessels entered and cleared with a total tonnage of 159,367, an increase of 11,820 over the figures for the previous year. Minor improvements to buoys, beacons, and lighthouses were made and a new landing pier was erected.

The system of land tenure in the island is in a state of confusion owing to the inaccuracy of the Land Office records, the absence of reliable maps, and the faulty plans endorsed on the old grants. A complete re-survey of the island is necessary and will shortly be undertaken as a prelude to placing the

registration of deeds and the transfers of landed property on a satisfactory basis.

A European district officer supervises the administration of the various sub-districts, twelve in number, through the agency of native headmen.

The island was practically free from crime of a serious description, 191 cases only being tried in the Police Court and none in the Supreme Court, while the total claims in civil litigation amounted to only $5,700.

The health of the population, which was estimated to be 8,286 on the 31st December, was good; there was a marked diminution in the number of beri-beri cases and an absence of any serious epidemic diseases, but the stagnant pools in compounds and the swampy ground near Victoria Town give rise to malarial fever, which was somewhat prominent during the year. Much remains to be done to improve the sanitary condition of the villages and of Coal Point.

The highest recorded temperature was 92° F. and the lowest 71° F., and the total rainfall was 143·03 inches.

The revenue of the Post Office, which amounted to $29,372.59 as compared with an expenditure of $1,152.35, was largely swelled by the demand for stamps on the part of philatelists.

No important public works were undertaken, and the operations of the Public Works Department were principally confined to repairs of buildings and the maintenance of existing roads.

There is a S.P.G. School with an enrolment of about 40 pupils, principally Chinese, and a vernacular school with 51 children was opened in August and housed in a rented building.

GENERAL OBSERVATIONS.

Amongst the most memorable events of the year was the visit of their Royal Highnesses the Duke and Duchess of Connaught, with Princess Victoria Patricia, in February, all of whom were accorded a loyal and hearty reception at both Singapore and Penang, on the occasion of the Duke's tour of inspection of the local garrisons as Inspector-General of the Forces.

Other distinguished visitors to Singapore were the King of Siam, His Imperial Highness Prince Fushimi, and the Governor-General of the Netherland Indies.

Mr. J. K. Birch, who had served with marked ability as Resident Councillor, Penang, for nearly ten years, retired on pension in February.

Mr. C. E. Velge, Registrar of the Supreme Court, after long and meritorious service extending over a period of nearly 33 years, retired on pension at the end of the year. Owing to his wide knowledge of legal matters and experience of local procedure his retirement will be felt as a loss by both Bench and Bar.

Mr. E. C. Hill, Auditor-General of the Straits Settlements since 1897, also retired on pension at the end of the year owing to failing health.

Mr. W. A. Pickering, C.M.G., the first Protector of Chinese, who retired in 1889, but whose eminent services to the Colony are still remembered, died in January.

A Commission was appointed in July to investigate the extent to which opium is used in the Colony and the Federated Malay States, and to evolve, if possible, means for its restriction and ultimate elimination. The field of enquiry and the number of issues have proved so intricate and vast that the results of the labours of the Commission will not be available until the latter half of this year.

A Board, similar to that in Penang, to supervise the management of Mohammedan and Hindu endowments was constituted during the year in Singapore, and arrangements were completed for the improved laying out of that portion of the town of Singapore known as the Sultan Ali Lands.

The discussion of the provisions to be added to the Municipal Ordinance for dealing with insanitary areas in towns occupied a considerable part of the time of the Legislative Council, and the amending Ordinance already referred to did not reach its final shape until the end of the year. The Singapore Municipality, in the meantime, was engaged on a complete and thorough revision of the Building By-Laws which have since been confirmed by the Governor in Council and should do much to improve the sanitary conditions under which the native population live.

Among other works in progress affecting the health of the community a reference may be made to the reclamation of a large area of swamp land along the upper reaches of the Singapore River and the construction by the Municipality of an additional large reservoir to supplement the water supply of Singapore Town.

A scheme for the improvement of the municipal water supply at Penang was also sanctioned.

The re-survey of Singapore Island which has been in progress since 1902 is now nearing completion, and when the maps have been published and the boundaries of holdings finally ascertained, under the Boundaries Ordinance it will be possible to introduce in Singapore the additional provisions of the Registration of Deeds Ordinance which have been for

some years in operation in Penang, with the result of greatly facilitating the transfer of land.

It was thought that matters were sufficiently advanced by the latter part of 1907 to take this step, but after a few months actual working of the new provisions it was found that the Survey Office was not able, in spite of an increase of staff, in the absence of the completed maps, to deal with the applications for tracings of lots with sufficient expedition to obviate delay in completing transactions by the public, and the general adoption of these provisions had therefore to be postponed, but they will be applied by degrees as each section of the map is completed.

During the year an important decision was arrived at as to the reduction of Straits Light Dues, and the new rates came into effect at the commencement of 1908.

The Legislative Council also appointed a Committee to consider and report upon the question of the restrictions at present imposed upon Sunday labour in the ports of the Colony.

The vexed question of shipping rings or conferences is awaiting the report of the Royal Commission appointed in England in 1907 to investigate the subject.

A report by a Sub-Committee of the Singapore Chamber of Commerce, dated the 10th of July, 1907, answering questions on this subject submitted at the instance of the Royal Commission was forwarded to the Secretary of State, together with a report from Mr. Stuart, the Registrar of Imports and Exports.

This officer at my request has prepared a statement showing the approximate volume of cargo shipped in scale tons during 1907 to the United Kingdom, the rest of Europe, excluding Russia, to which country the influence of the Conference does not extend, and to America, the approximate amount of freights paid thereon, and the average approximate amount that would have been paid yearly on the same cargo at the rates current during the five years previous to the Conferences.

I annex the Registrar's return, which shows approximately the tax on cargo levied by the Straits Homeward and New York Shipping Conferences in 1907, or in other words the amount estimated to have been actually paid in excess of that which the currently-quoted average rates of freight during the respective five years prior to the establishment of these Conferences in 1897 and 1905, respectively, would have entailed.

Statement showing the approximate volume of cargo shipped in scale tons during 1907 *to the United Kingdom, the Continent of Europe (excluding Russia), and to America, the approximate amount of freights paid thereon, and the average approximate amount that would have been paid on the same during the five years previous to Conferences.*

United Kingdom and Continent excluding Russia.

Principal Articles and Measurement.	Average Rates of Freight to London in 1892–1896 (5 years).	Average Rates of Freight to London and Continent in 1907, less 10 per cent. Rebate. 			24·2	33·1*	44·4
Total			98·5	112·6	151·0
			Increase .. .. £38·4		

* The Average Amount inserted chargeable as Freight in 1892 to 1896 to the United Kingdom and Continent and in the 5 years ended August 1905 to America for other Principal Articles is based on the differences between the amounts of the Principal Articles in the two periods compared.

Approximate volume of cargo in scale tons exported to the United Kingdom, the Continent of Europe (excluding Russia), and America in 1907 = 386,200.

Approximate amount of freights paid on the above in 1907 over the amount that would have been charged prior to Conferences = £164,100 or $1,406,600.

The results for 1907 are approximately as follows:—

Total volume in scale tons of cargo shipped to the United Kingdom, the rest of Europe, excluding America, and to America tons 386,200.

	£
Total freight charged thereon	567,500
Total freights that would have been charged on the same prior to the Conferences	403,400
Difference	£164,100
Secret rebate of 5 per cent. on all freights pooled, paid to certain specially favoured firms	£28,375

The Registrar of Imports and Exports is of opinion that the difference of £164,100 which he shows is for the following reasons an under-estimate:—

(i) The quotations prior to the establishment of Conferences were the asking prices and less was frequently obtained.

(ii) Articles which are shipped as bag goods and measurement have all been reckoned by him at the lower or bag rate.

(iii) Other principal articles on much of which expensive freight is usually charged have been reckoned by him on the basis of the low freights quoted for principal goods which show 43 per cent. of an increase compared with about 80 per cent. for measurement cargo.

(iv) Other articles such as tapioca flour, pearl sago, canes, certain gums, spices, &c., are not included.

(v) Of rattans one-third of the quantity exported to the United Kingdom and the whole of what went to the Continent have been assumed to have been shipped as "Dunnage" which pays a much reduced rate of freight: the same article to America has been taken at scale ton rate.

In this and other ways favourable consideration has been given so that there may be no ground for any allegation of exaggeration.

The Sub-Committee of the Chamber of Commerce of Singapore in their report, dated 10th July, 1907, gave figures showing that there was an increase in the volume of shipments of the principal articles of produce (excluding tin) to the United Kingdom, the Continent, and the United States of

Maps on this order too large to be entirely included in one exposure are filmed clockwise beginning in the upper left hand corner, left to right and top to bottom as many frames as required. The following diagrams illustrate the method.

America in the second five years over the first half of the decade prior to the establishment of Conferences.

The same statement shows that in volume of cargo carried there was an actual loss in the second five years of the decade over the first five years after the formation of the Conference.

The net loss in ten years is placed by the Sub-Committee at 238,512 tons, or a yearly average of 23,851 tons.

Deductions from these figures would appear to indicate that there has been a diversion of trade due to the action of the Conference, and taking into consideration that there has been an enormous expansion of trade throughout the Eastern Archipelago since 1896, of which the Colony in its position hitherto as a main collecting and distributing centre should have derived its full share, the diversion of trade is much greater than is shown by the figures given in the report referred to.

Whether this diversion of trade is due directly to the effects of these Conferences, or whether it has been contributed to by a variety of causes, the fact remains that there has been a diversion of trade so considerable as to make the subject a most serious one for the Colony.

Undoubtedly one effect of these Shipping Conferences has been to eliminate all chance of any sailing vessel obtaining cargo in the Colony for the United Kingdom or Continent of Europe, and the same prohibition has, in effect, been placed upon the economically-run "tramp" steamers, British mainly, which used to participate largely in the important over-seas carrying trade of this Colony.

It seems appropriate to remark specially here that the report of a Sub-Committee of the Chamber of Commerce of Singapore, referred to above, emphasizes the fact that a practice exists under which the steamship companies comprising these Conferences pay a preferential or so-called "secret" return of 5 per cent. on the total of all freights earned from the Straits by Conference steamers to a limited number of privileged firms or persons—the apportionment among these firms being kept secret. The Sub-Committee (some of the members of which belong to firms who are participants in this special privilege) have placed on record that the privileged firms or persons—among whom are foreigners—who participate in this so-called secret 5 per cent. return are thus placed at an advantage over other merchant shippers of this Colony.

This practice of giving a special preference to a selected few is, I believe, peculiar to this Colony.

ARTHUR YOUNG,

Colonial Secretary.

24th August, 1908.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1908.

FINANCIAL.

1. The estimated revenue of the Colony for the year was $9,685,332, and the actual revenue collected was $8,969,015, or $716,317 below the estimate. The following table shows the actual figures for 1907 and 1908:—

—	Revenue 1907.	Revenue 1908.	Increase.	Decrease.
	$ c.	$ c.	$ c.	$ c.
1. Land revenue	412,710 13	409,987 82	—	2,722 31
2. Rents exclusive of land	56,470 37	65,713 75	9,243 38	—
3. Licences	6,749,404 60	6,081,751 89	—	667,652 71
4. Stamps	393,924 55	379,676 53	—	14,248 02
5. Port and harbour dues	274,569 86	217,422 95	—	57,146 91
6. Post and telegraphs	620,442 61	525,564 13	—	94,878 48
7. Railway	199,972 96	189,110 66	—	10,862 30
8. Fines and forfeitures	90,739 76	97,650 54	6,910 78	—
9. Fees of office	319,383 78	336,026 85	13,643 07	—
10. Reimbursements	313,256 14	326,449 03	13,192 89	—
11. Sale of Government property	57,807 85	2,466 16	—	55,341 69
12. Interest	113,040 35	119,774 81	6,734 46	—
13. Miscellaneous receipts	180,859 57	161,384 96	—	19,474 61
14. District collections	142,172 43	10,366 03	—	131,806 40
	9,924,754 96	8,920,346 11	49,724 58	1,054,133 43
15. Land sales	98,261 53	48,669 07	—	49,592 46
Total	10,023,016 49	8,969,015 18	49,724 58	1,103,725 89
Net decrease				1,054,001 31

2. The following is a comparative table of the expenditure for the years 1907 and 1908:—

Heads of Service.	1907.	1908.	Increase.	Decrease.
	$ c.	$ c.	$ c.	$ c.
1. Charges on account of public debt ..	193,966 79	308,006 51	114,039 72	—
2. Pensions	365,296 42	387,065 70	21,769 28	—
3. Personal emoluments	2,770,484 19	2,893,790 40	123,306 21	—
4. Other charges	1,639,314 27	1,869,743 71	230,429 44	—
5. Charitable allowances	11,312 55	12,275 15	962 60	—
6. Transport	12,115 08	14,582 06	2,466 98	—
7. Exchange	17,333 23	16,028 43	—	1,306 80
8. Interest	4,523 00	2,635 14	—	1,887 86
9. Miscellaneous services	189,193 77	205,938 48	16,744 71	—
10. Military expenditure	1,554,512 20	1,879,182 08	324,669 88	—
11. Expenditure under the Volunteer Ordinance, 1888.	51,805 62	50,090 16	—	1,715 46
12. Land and houses purchased	846,999 43	40,464 35	—	806,535 08
13. Special expenses	5,614 44	27,857 34	22,242 90	—
14. Public works, annually recurrent ..	224,032 19	220,445 47	—	3,586 72
15. Roads, streets, &c., annually recurrent	379,842 83	299,833 87	—	80,008 96
16. Public works, special services	934,974 76	1,348,289 28	413,314 52	—
17. Roads, streets, &c., special services ..	298,372 03	261,397 69	—	36,974 34
Total	9,499,692 80	9,837,623 82	1,269,946 24	932,015 22
Deduct decrease			932,015 22	
Net increase			337,931 02	

The total expenditure of 1908 chargeable to current revenue was $337,931 more than in 1907.

The actual expenditure was $483,089 below the estimate, considerable savings appearing under the heads of Charges on account of the Public Debt, Personal Emoluments, and Other Departmental Charges, Special Services on Works and Buildings, and on Roads, Streets, &c., while Pension Charges, Transport, Miscellaneous Services, Military Expenditure, and Lands and Houses Purchased showed varying increases, generally small in amount.

The total revenue and expenditure have been for the last five years:—

	Revenue	Expenditure.
	$	$
1904	10,746,517	10,848,988
1905	11,657,424	10,976,525
1906	9,618,313	8,747,819
1907	10,023,016	9,499,693
1908	8,969,015	9,837,624

The assets on the 31st December, 1908, were $5,105,749, and the liabilities $2,222,791, there being thus an excess of assets over liabilities of $2,882,958. The following table shows the details of the assets and liabilities at that date:—

Assets.

	$
Cash	1,850,085
Investments	2,477,215
Advances	251,922
Indian Agency Account	394,229
Cash in Transit	323
Suspense Account	131,975
Total	$5,105,749

Liabilities.

	$
Deposits	898,381
Drafts and Remittances	10,307
Loan Account	1,314,103
Credit Balance	2,882,958
Total	$5,105,749

The assets and liabilities of the Currency Commissioners on the same date were:—

Assets.

	$
Cash in Reserve	20,903,866
Investments	9,473,428
Suspense Account	373
Total	$30,377,667

Liabilities.

	$
Deposits	27,073,165
Advances from Loan Account ...	3,304,501
Total	$30,377,667

3. A Loan of £5,000,000 was raised in 1907 under the provisions of the Loan Ordinance (No. IV. of 1907), which authorizes the Colonial Government to borrow a sum not exceeding £7,861,457 for the following services:—

	£
1. Payment of Award and Costs under "The Tanjong Pagar Dock Ordinance 1905" ...	3,390,000
2. Redemption of Outstanding Debentures of the Tanjong Pagar Dock Board	151,670
3. Tanjong Pagar Construction Works:—	
(1) Main Wharf, Lagoon Dock, and Graving Dock	2,092,600
(2) Prai River Dock—Improvements to and reconstruction of Wharves	70,000
4. Singapore Harbour Works	1,264,000
5. Singapore Municipal Water Works ...	523,187
6. Penang Pier Extension and General Harbour Improvements and repayment of $600,000 (£70,000) borrowed from the Federated Malay States on account of Penang Pier	200,000
7. Penang Municipal Loan—Improvement of Water Supply and other works	170,000
	£7,861,457

Provision is made for the repayment of this loan by means of a Sinking Fund which will come into operation in 1917, ten years from the date of the first issue of the debentures under the Ordinance. The payment of the award and costs was made on the 1st July, 1907.

The charge on account of Interest on the Public Debt amounted to $677,343 in 1907, and $1,616,298 in 1908.

The total amount in local currency of the debt of the Government of the Colony on 31st December, 1907, was $42,857,143 or 4·78 times the revenue of the Colony for the year but only about 2·83 times the aggregate of the Government and Tanjong Pagar revenues.

4. There were considerable fluctuations in the rate of exchange during the early part of the year, the minimum demand rate being 2*s*. 3⅝*d*. in February, and the maximum 2*s*. 3 13/16*d*. in May. It reached 2*s*. 3 15/16*d*. in June and 2*s*. 4*d*. in June and July, and continued firm till the end of the year, the minimum demand rate being 2*s*. 3⅞*d*.

5. The total number of new dollars received at the end of the year was $17,697,000, showing a surplus of $3,442,026 over the amount sent for re-minting. The total number of old Straits dollars withdrawn from circulation at the end of the year and held by the Government Treasuries and Banks amounted to a little over twelve millions.

At the beginning of the year gold amounting to £180,507 was in the vault of the Commissioners, and during the year the receipts of gold were £90,322 and issues £266,169, leaving a balance of £4,740 at the close of the year. Telegraphic transfers payable by the Crown Agents were sold to the value of £383,793 during the early part of the year, bringing the total to £967,345.

The new issue of $1 notes was received and put into circulation during the year. This note will in future be printed on red paper to render it more easily distinguishable from the small $5 note.

At the beginning of the year the dollars and notes in circulation, including the stocks held by the Banks and the Treasuries in the Colony and the Federated Malay States, amounted to $42,774,626, of which a sum of $22,444,970 was in Government Currency Notes, $1,599,692 in Bank notes, and the rest in Straits dollars. At the end of the year the corresponding figures were $43,540,907, $25,670,505, and $999,255 respectively.

The excess of imports of dollars over the quantity of that coin exported was $3,817,885 for Singapore; as regards Penang an excess of $205,515 in exports over imports was recorded, the net excess of imports over exports being thus $3,612,370, as against an excess of exports over imports of $868,982 in the previous year. No account can, of course, be taken of the numbers of dollars carried out of or into the Colony by passengers.

The Straits dollar and subsidiary coinage ceased to be legal tender in Sumatra at the end of April, and $1,938,398 (in dollars and half-dollars) and $323,648 (in subsidiary silver coins) were returned to the Colony in the year for this reason.

The circulation of subsidiary silver coin was still further reduced during the year by the withdrawal of such coin to the value of $640,761, and the amount in circulation now is not in excess of public requirements.

Sixty-five thousand dollars worth of copper coin was received from the Calcutta Mint. This was part of the British Borneo

copper coin re-minted, the remainder of such coin being sold at its value as copper.

The average bank-note circulation was in 1908 $1,277,340, as compared with $1,825,089 in 1907. The average amount of Government Currency Notes in circulation for each month of the year was:—

	$
January	22,581,873
February	22,236,487
March	21,203,973
April	21,133,345
May	21,121,402
June	21,564,722
July	21,884,215
August	22,379,434
September	22,322,772
October	22,703,247
November	23,228,072
December	24,992,182

7. The revenue of the three Municipalities amounted to $3,524,494, and their expenditure, excluding sums spent on Loan Works, to $3,311,960. The usual comparative statements of revenue and expenditure, and of the debts of the Boards, showing the provision made for repayment, appear below:—

Revenue.

—	1904.	1905.	1906.	1907.	1908.

TANJONG PAGAR DOCK BOARD.

8. The Board, on behalf of the Government, undertook charge of the Tanjong Pagar Dock Company's business and property after expropriation on July 1st, 1905.

The revenue and expenditure for the last five years were as follows:—

	Revenue.		Expenditure.	
	$	c.	$	c.
1904	5,409,486	56	3,870,669	72
1905	5,420,354	26	4,072,004	79
1906	5,617,784	92	4,097,428	62
1907	6,145,579	25	4,484,476	20
1908	5,822,811	69	4,271,715	37

The Board is liable for the repayment of $1,300,000 in debenture stock. The balance outstanding, viz., $1,050,000 was due for repayment on the 30th June, 1909.

The capital cost of the undertaking as represented by the award, and including Government costs is the sum of

$29,003,149·45 on which the Board pays interest at 4 per cent. per annum out of revenue.

In addition, under the provisions of the Tanjong Pagar Dock Ordinance, the Board is responsible to Government for the interest, sinking fund, management, and redemption of such loans as will be required to carry out the new construction works, towards which £2,092,600 has been allocated in the Loan Ordinance of 1907 for the Main Wharf, Lagoon Dock, and Graving Dock, and £70,000 for the improvements to and reconstruction of the wharves at Prai River Dock.

The following figures are taken from the Wharf Tonnage Returns:—

—	1904.	1905.	1906.	1907.	1908.
Number of vessels	2,356	2,315	2,470	2,556	2,364
Tonnage	4,445,558	4,491,351	4,701,004	4,747,210	4,590,474
Coal inwards and outwards.	1,098,052	1,139,042	1,205,580	1,111,682	1,145,435
Cargo inwards and outwards	1,170,021	1,115,654	1,150,527	1,270,285	1,088,527

The falling off in vessels and their tonnage and in cargo handled was due to the commercial depression, and was more marked in the second half-year than it was in the first.

TRADE.

9. The sterling value of merchandise imported into the Colony was £34,604,820, a decrease of £3,812,000, or nearly 10 per cent. Similarly exports from the Colony diminished from £32,921,000 to £30,620,228, or nearly 8 per cent.

The figures for the last eight years were, in millions of dollars:—

—	Average for 1901–1905.	1906.	1907.	1908.
Merchandise—	$	$	$	$
Imports	315·5	317·8	322·9	296·6
Exports	262·4	281·3	282·2	262·5
Total	577·9	599·1	605·1	559·1
Treasure—				
Imports	35·1	21·5	27·7	19·8
Exports	35·3	29·7	23·1	11·4
Total	70·4	51·2	50·8	31·2
Aggregate Total	648·3	650·3	655·9	590·3

Of the imports from foreign countries, Singapore and Labuan accounted between them for $225,653,488, Penang for $89,665,410, and Malacca for $1,077,041. The exports from these Settlements to foreign countries were, respectively, $184,526,823, $87,545,100, and $1,746,201. In imports a decrease was shown in each case, and in the case of exports Malacca alone exhibited an increase.

Imports of merchandise from the United Kingdom fell from $35,635,514 to $30,635,801, from other British possessions from $164,793,596 to $141,281,920, but from foreign countries the decline was less marked, the totals for 1908 and 1907 being $124,695,023 and $128,454,559 respectively.

Exports of merchandise to the United Kingdom were $62,546,937 as against $67,711,950, to other British Possessions, $80,596,838 as against $92,213,385, and to foreign countries $119,043,830 as against $135,847,663.

The trade for the past seven years with the United Kingdom (including all British possessions) and with foreign countries is shown in the following table:—

—	Imports.			Exports.		
	Average 1902-1906.	1907.	1908.	Average 1902-1906.	1907.	1908.
	$	$	$	$	$	$
United Kingdom ..	230,664,724	226,911,864	187,855,386	150,149,625	166,366,980	151,004,850
Foreign Countries ..	125,265,395	129,664,621	128,540,553	155,241,917	142,342,929	122,541,779

For the two decennial periods, 1889-1898, and 1899-1908, the following tables give the values of imports in millions of dollars:—

	United Kingdom.	Foreign Countries.	Total.
1889 to 1898	198·3	85·4	283·7
1899 to 1908	319·7	190·9	510·7
Increase ...	121·4	105·5	226·9

From the above it will be seen that while the total imports of the second period were $226,900,000 in excess of the decade 1889 to 1898, almost one-half of the additional trade has come from foreign countries. In fact, the imports derived from foreign sources have risen by 123 per cent., while those from the United Kingdom and British possessions have risen by less than 62 per cent.; in other words, foreign countries have in their competition with British countries in this market succeeded in increasing their business at twice the rate at which British trade has advanced. In the past year this feature was again noticeable, the proportion of British imports being 62½ per cent. of the total, while it had been in 1907 nearly 70 per cent.

The Registrar of Imports and Exports continued to correspond direct with the Board of Trade and with British manufacturers and merchants. Enquiries were received and answered regarding local markets for the following commodities, viz., tapioca and sago, tools, steel, electrical goods, rattans, spirits, bolts, ore, oils, wheat flour, hats, salts, fruits, fish, japanware, fertilizers, coal, motor and cycle accessories, silks, shells, plaitings, sandalwood, monuments, tin, lace, sewing machines, paints, varnishes, and colours, coconut fibre, oil-cakes, machinery, malt liquors, ship's lamps, blocks, spices, tar, turpentine, disinfectants, isinglass, mother-o'-pearl shells, copra, water paints, and powder.

The trade of the Straits Settlements suffered throughout the year 1908 a severe and constant depression, for, although the volume of exports was greater than in 1907, prices were extremely poor and unremunerative. As a result the consumption of imported goods also declined, and the important business done in the Colony in piece goods was smaller and less profitable even than in 1907, a year which also showed a falling off from previous years. If anything the second half of the year was less favourable than the first, the speculative element being entirely absent, and credit to outport customers being greatly curtailed, with the result that the indents of the latter were confined to the supply of their immediate requirements. Stocks of piece goods were freely drawn upon, and though these still stood at the close of the year at a figure above that shown at the end of 1905, they were much below the average of the last two years. Bangkok, the Federated Malay States, Sumatra, and Borneo all weakened in their demand for piece goods, dyed cottons showing the greatest falling off.

Expensive stocks were disposed of on a falling market, as will readily be seen from the following table of prices:—

	January, 1908.	July, 1908.	December, 1908.
	s. d.	*s. d.*	*s. d.*
Grey shirtings, 8¼ lbs. ...	8 8¼	7 11	7 4
Cloths, 6 lbs.	5 10½	5 6	5 3
Yarns, 40's	12	10¾	8¼
Cotton (Orleans)	6·18	6·43	4·99
Silver, per oz.	24⅞	24 11/16	23⅛

Some of the principal British firms combined to insist on credits being limited to 60 days, and on deliveries being made within the same period, and hope to be able to give effect to this in 1909.

Thirty-one dealers suspended payment in Singapore, with liabilities amounting to $1,080,000. The gross amount of failures in 1907 was $1,600,000.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

10. The planting of Para rubber in the Colony continued to increase, but there are still considerable areas of waste land in Singapore where this tree might well be planted. Rubber from the Colony was sent to the International Exhibition in London, and was considered to be of high quality. Samples of rubber trees, showing the tapping of live plants, &c., were also sent from the Botanic Gardens to the Exhibition.

The cultivation of indigo in Singapore showed an increase, as also did that of vegetables for local consumption, and the output of ground-nuts improved. The few acres of soy-beans did not give the good returns which were anticipated. The crop of pineapples was very large, and the importation of quantities of this fruit from the Dutch Islands so lowered prices that little, if any, profit was gained. It is probable that the selling prices of pineapples has never been so low as it was in 1908.

Lemongrass was less cultivated, the acreage remaining being now small, but citronella increased. Coconuts were strong, and the demand for copra was good. The high prices which ruled, however, had the effect of inducing the importation into Singapore of great quantities of inferior copra made in Muar and Malacca. Betelnuts were scarcer, and commanded high prices; the cultivation of this nut appears to have fallen in recent years, and comparatively few trees seem to be planted now.

No new rubber estates were opened in Penang or Province Wellesley during the year, but the acreage under rubber has increased on existing estates, a result due, no doubt, to the sharp recovery in price from 3*s*. 2*d*. per pound in February to 6*s*. in November. The manicoba plants at Tasek Glugor have so far made only moderate progress; a fresh batch of seeds has been received, and these will be planted in various soils for test purposes.

The price of tapioca has dropped at least 40 per cent. in the last 18 months, but exports remain at about the same figures as before. The trade in coconuts and copra has been fairly brisk, especially in the latter, prices being higher, and the amounts exported rising from 298,819 pikuls in 1907 to 332,162 in 1908.

Basket sugar, the main product of the province, again fell away from previous figures, the production being 87,363 pikuls as against 188,269 in 1907. The area lost to sugar cultivation, however, is now under rubber. Pepper of the Trang and Acheen varieties was produced in about the same quantities as in the previous year, but prices fell considerably; of other spices, cloves were produced to the extent of 1,519 pikuls as against only 713 pikuls in 1907, but the output of nutmegs decreased from 2,864 pikuls in 1907 to 2,330 in 1908, while the price fell, being influenced by a considerable increase in West Indian production.

Rice crops were good in province Wellesley, and averaged about 47 bushels to the acre.

11. The area of Crown Land alienated, and the number of statutory grants issued, and the premia paid for the same during the last five years are as follows:—

Singapore.

—	1904.	1905.	1906.	1907.	1908.
Area granted	a. r. p. 469 0 37 sq. ft. 284,768	a. r. p. 169 2 34 sq. ft. 46,451	a. r. p. 5,895 0 23 sq. ft. 805,636	a. r. p. 119 3 28 sq. ft. 327,687	a. r. p. 419 3 12 sq. ft. 183,543

† 334 Statutory Grants 5 mining leases and 2 leases for 99 and 999 years respectively.

SHIPPING.

12. The total tonnage of merchant vessels arriving and departing was 21,750,245 as compared with 20,328,760 in 1907. Fuller particulars will be found in the appended comparative table:—

Statement showing Arrivals and Departures of Merchant Vessels during the Years 1907 *and* 1908.

Nationality.	1907.					1908.

Spanish ...	133,366	—	—	—	133,366	134,630	—	—	—	134,630
Swedish ...	6,338	4,360	—	—	10,698	27,882	10,838	—	—	38,720
Total ...	13,579,730	5,908,366	567,778	272,886	20,328,760	13,933,205	6,862,848	661,882	292,310	21,750,245

From the above comparative table it will be seen that the following countries show an increased tonnage, entered and cleared, in 1908 as compared with 1907: Britain, 1,225,427; Denmark, 97,536; Norway, 77,875; Germany, 76,637; Italy, 45,690; Sweden, 28,022; Japan, 19,018; Russia, 18,678; Siam, 9,036; Belgium, 5,806; Spain, 1,264.

The following countries show a decrease:—

France, 98,755; Austria, 40,645; Holland, 38,554; China, 2,856; America, 2,158; Sarawak, 536.

Comparative Statement of Merchant Vessels Inwards and Outwards for last Five Years.

—	1904.*	1905.*	1906.*	1907.	1908.
Total tonnage entered and cleared.	18,267,499	18,890,600	19,711,198	20,328,760	21,750,245

* Labuan not included.

It will thus be seen that the tonnage, as compared with 1904, has increased by 3,482,746.

Native Craft and Steamers under 50 tons.

—	1907.		1908.	
	No.	Tons.	No.	Tons.
Arrivals	16,808	726,104	17,747	723,536
Departures	16,977	737,944	17,882	731,900
Total	33,785	1,464,048	35,629	1,455,436

The decrease, as compared with 1907, is 8,612 tons.

Comparative Statement of Tonnage of Native Craft and Steamers under 50 tons, Entered and Cleared, for the last Five Years.

—	1904.*	1905.*	1906.*	1907.	1908.
Total tonnage entered and cleared.	1,566,976	1,544,284	1,484,801	1,464,048	1,455,436

* Labuan not included.

As compared with 1904 this native craft tonnage has decreased by 111,540 tons. This decrease is probably due to the fact that

steamers of medium tonnage now call at ports which were not visited formerly.

The amount realised by Light Dues was $142,874·77.

The total collections under this head for the last five years are as follows:—

	$	c.
1904	213,203	90
1905	222,997	61
1906	223,387	94
1907	221,482	85
1908	142,874	77

The reduction in 1908 is due to the operation of an Order by the Governor in Council, dated the 23rd October, 1907, by which the Light Dues were reduced by about one-half.

In Singapore, during the year, six new steamers, with a tonnage of 1,906 tons gross, and 19 sailing vessels of 1,899 tons were registered under the Imperial Shipping Acts. Eight new sailing vessels of 819 tons were registered under Ordinance V. of 1883; also 754 of 6,625 tons under Ordinance VIII. of 1872.

LEGISLATION.

15. Twenty-seven Ordinances passed the Legislative Council in 1908, of which 18 amended and, in some important cases, consolidated Ordinances already on the Statute Book.

The principal Ordinances passed were the following:—Netherlands India Labourers Protection, Petroleum, Forests, Muhammadan Marriage, and Currency Note Ordinance Amendment. Of these the first was considered necessary in view of the increasing numbers of natives of Netherlands India employed in the Colony and the Federated Malay States, and provides for their protection to the satisfaction of the Netherlands Indian Government. The Petroleum Ordinance embodies a large number of amendments found necessary to the Ordinances of 1896 and 1903, which it repeals. It also settles the respective limits of the responsibility of the Government and municipalities with regard to the landing, transport, and storage of petroleum.

The Forests Ordinance follows the lines of the legislation in force in Burma with regard to Crown Forests and Reserves; this had hitherto only been dealt with by rules under the Crown Lands Ordinance. The Muhammadan Marriage Ordinance repealed the Mahomedan Marriage Ordinance, 1880, except for Section 27 (the effect of marriage on property). The Currency Note Ordinance Amendment Ordinance embodied in the law a considerable number of amendments which experience had shown to be desirable, and provided for keeping a gold reserve in London. Of these only the Muhammadan Marriage Ordinance has so far come into operation.

The Tamil Immigration Fund Ordinance was re-enacted with some amendments, and provision was made for loans to small agriculturists (by the Agricultural Loans Ordinance), and for the control by the military authorities of firing areas to seaward (Ordinance XII. of 1908). An Ordinance to provide for the temporary detention of foreign offenders was also passed. The Sunday Labour Ordinance of 1892 was re-enacted with amendments. The prohibited hours of labour were reduced, and a fee was imposed for the issue of permits, the money so collected to be paid into a fund for the relief of destitute seamen. The remaining Ordinances for the most part effected small amendments in existing Ordinances, and call for no remark.

EDUCATION.

16. Nearly all the schools of the Colony are vernacular schools for Malays, under the direct control of Government. All the expenses of these schools, which are 175 in number, are defrayed by Government, and they provide free tuition in Malay to some 11,824 pupils. The remaining schools are, with the exception of six which are controlled and financed by Government, aided-schools managed by private bodies, and receive grants-in-aid from Government.

The net expenditure on Government English Schools was $63,708.14, on Aided-Schools (English, Anglo-Tamil, Tamil, and Chinese) $95,447, and on Government Vernacular Schools, $86,872.10.

In addition to this, special grants, amounting in all to $31,794.02, were made to certain Aided-Schools in Penang for building purposes.

The cost of the Malacca Training College for Malay teachers during the year under review was $7,780.83. The value of this institution is considerable, and it produces very good teaching material for the Vernacular Schools. The demand, however, for trained teachers, more especially in Penang and Province Wellesley, is much in excess of the supply, and it will be some years before the schools in these Settlements are staffed exclusively by trained men.

The Commercial and Science Classes at the Raffles Institution have made satisfactory progress during the year.

GOVERNMENT INSTITUTIONS.

17. Practically all the hospitals of the Colony are under Government management, and those maintained on estates are under Government supervision. The total number of admissions to hospitals, exclusive of the Lunatic Asylum, was 31,291, as against 26,196 in 1907. In Singapore 212 patients were admitted into the Lunatic Asylum, as against 197 in 1907. This asylum is now very crowded.

The numbers of patients treated in the hospitals was 32,805, of whom 974 were Europeans. In 1907 the corresponding numbers were 28,708 and 1,193 respectively. Deaths numbered 3,869 (62 being Europeans), as against 3,688 and 74 in 1907. The rate of mortality was thus 11·8 per cent. of the total treated, as against 12·85 per cent. in the previous year.

Four hundred and seventeen persons remained in the Colonial Leper Asylums at the end of the year, as compared with 389 on the 31st December, 1907. One hundred and eighteen deaths occurred, as against 135.

Sixty-five boys remained in the Reformatory on the 31st December, and the average daily muster was 65·26. The health of the inmates was good. They are taught English and Romanized Malay, and in workshops carpentering, tailoring, and shoemaking. The boys now make their own bread and grow their own vegetables. The Reformatory cost $9,418, as against $9,105, exclusive of the salaries of the superintendent and warders.

The transactions of the Savings Bank were: Deposits, $447,892, and withdrawals, $417,217, the 1907 figures being $415,926 and $416,442 respectively. Depositors had a sum of $646,470 standing to their credit at the close of the year (in 1907 the balance was $598,882). The value of the investments stood at $636,783 on the 31st December, the corresponding balance in 1907 being $618,620. They were made up as follows:—

	$
India 3½ per cent. Rupee Paper	368,833
Singapore Municipal Bonds at 5 per cent. ...	59,450
Do. do. at 4 per cent. ...	76,117
Fixed Deposits in Banks	80,000
Various 3 per cent. Colonial Guaranteed and Corporation Stocks	52,383
Total	**$636,783**

POLICE.

18. The Police Force numbers over 2,400 men, of whom rather more than 300 are Sikhs.

Seventy-four boys have passed through the training depôt at Malacca for the instruction of recruits during 1908.

PRISONS.

19. The daily average number of prisoners in the various prisons during 1907 and 1908 were as follows:—

			1907.	1908.
Singapore ...	Criminal	...	852·00	877·00
	Civil	...	53·35	76·96
Penang ...	Criminal	...	208·81	229·43
	Civil	...	18·58	23·83
Malacca ...	Criminal	...	24·98	23·39
	Civil	...	11·65	11·81

The practice of banishing habitual criminals (456 in 1908) has been continued.

The health of the prisoners was uniformly good, the number of deaths being: at Singapore 34, at Penang 10, and at Malacca 1.

CRIMINAL STATISTICS.

20. Twenty-five murders and seventy-two gang robberies were reported during the year; of the latter 29 were proved in the preliminary investigation to be false.

There was on the whole less serious crime than in 1907, and this is attributed in a great measure to the continued banishment of habitual criminals.

One hundred and fifty-four persons, as against 164 in 1907, were tried before the Supreme Court. Gang robbery and murder, and counterfeiting coin, forgery and using as genuine forged documents, were the principal crimes. Seventeen persons were convicted of returning from banishment. The lower Courts had, however, to deal with a larger number of cases as compared with the previous year, chiefly for minor offences. The total number so disposed of was 23,202, an increase of 4,301 over the figures for 1907. The increase was entirely in Singapore, the other Settlements being normal. There were 1,882 more cases under the Minor Offences Ordinance, 632 more under the Prevention of Cruelty to Animals Ordinance, and 507 more of petty thefts.

VITAL STATISTICS.

21. The estimated population of the Colony was 628,016, the figures given by the census of 1901 being 572,249. 18,074 births and 27,041 deaths were registered as against 16,118 and 24,220, respectively, in 1906.

The death-rate was 43·06 per mille of the population. The rate in 1907 was 39·07.

The birth-rate was 28·75 per mille as compared with 26·11 in 1907.

The deaths due to the more important infectious diseases in 1908, excluding imported cases, were as follows:—

Small-pox: 12 as compared with 10 in 1907.
Cholera: 178 as compared with 182 in 1907.
Plague: 12 as compared with 15 in 1907.

The stringent quarantine regulations and the vigilance of the medical and municipal authorities have hitherto prevented these scourges from finding a permanent home in the Colony.

Of other important specific diseases beri-beri accounted for 1,900 deaths and phthisis for 2,988, as against 1,626 and 2,820, respectively, in 1907.

In Singapore, Penang, and Malacca, the general arrangements for sanitation and conservancy are carried out by the municipality and in the several districts of Penang, Province Wellesley, and Malacca by Rural Boards with power under the Municipal Ordinance.

The mean temperature of the air at Singapore was 80·7° F. (maximum 89·3° and minimum 72·6°); Labuan, 84·1° (maximum 89·5°, minimum 74·8°); Penang, 81·7° (maximum 97°, minimum 70·4°); Malacca, 80·3° (maximum 90°, minimum 71°).

The mean rainfall in Singapore was 85·44 inches; in Labuan, 65·07 inches; in Penang, 111·26 inches; in Province Wellesley, 172·88 inches; and in Malacca, 72·2 inches.

In spite of the high death-rate the climate in the towns and in the country which has long been opened up cannot be considered unhealthy for Europeans, who, if they take ordinary precautions, can, with their higher and more sanitary mode of life, to a great extent avoid the malarial and other tropical fevers and dysentery which attack the Oriental inhabitants of the peninsula.

POSTAL, TELEGRAPH, AND TELEPHONE SERVICE.

22. Over 19,000,000 articles passed through the Post Office, of which over 703,000 were registered.

The postal revenue amounted to $609,597 as against $624,845 in 1907. The expenditure was $479,042, an increase of $30,767 as compared with that of the preceding year. The money order transactions showed an increase of about $200,000, the aggregate being $2,173,145 as against $1,964,139 in 1907 and $1,776,600 in 1906.

The decrease in postal revenue is due to the fact that a considerable number of stamps purchased at the Post Office is used for

revenue purposes and a sum of $79,185.02 received for stamps has therefore been credited as stamp revenue and not under postal revenue.

The telegraphs in Penang and Province Wellesley and the inland lines in Malacca, all of which are connected with the Government system of the Federated Malay States, are the property of Government.

The telephone system of Singapore is the property of the Oriental Telephone and Electric Company. This company also maintains for Government the lines connecting the Government offices and police stations, &c. There is a branch exchange at Johore Bharu, which is connected with Singapore.

The telephone lines in Penang and Province Wellesley, 895 miles in length, are owned and worked by Government. The system in use is the metallic circuit in Penang, but in Province Wellesley earth returns are used. The number of subscribers at the end of the year was 371, and there were in addition 94 service lines.

The Malacca telephone system is also worked by Government, and consists of 223 miles of service lines.

MILITARY.

The defence contribution paid by the Colony was $1,879,182.02.

IMMIGRATION.

(I.)—Chinese.

24. The number of immigrants from China, viz., 153,452, is the lowest on record since the year 1900, and represents a decrease of 32·5 per cent. upon the number for 1907. The number of female immigrants shows a decrease of 20·7 per cent. upon the number for the previous year, but the proportion of female to male immigrants has risen to 9·9 per cent. The total number of infants of one year of age and under continues to be large: deducting those reported as leaving for other ports, 441 males and 403 female infants were added to the population of the Colony. The number of "unpaid passengers," *i.e.*, of coolies who obtain free passages from China in consideration of entering into contracts for service on arrival in the Colony, shows a considerable decrease, viz., 43·5 per cent. on the number for the previous year, and is the lowest number on record for many years. These "unpaid passengers" formed 8·8 per cent. of the total arrivals.

The heavy decrease in the number of immigrants is due in some measure to quarantine restrictions imposed during the year.

Small-pox in an epidemic form having broken out in Hong Kong, Swatow, and Amony, 14 days' quarantine was imposed upon all immigrants arriving from these ports during the months of April, May, and June. Hong Kong being still infected with plague 10 days' quarantine against arrivals from this port continued till the middle of September.

The totals for the last five years are as follows:—

Year.	Men.	Women.	Children.	Total.
1904	179,650	14,395	10,751	204,796
1905	148,869	13,714	10,548	173,131
1906	153,624	12,478	10,485	176,587
1907	197,284	16,265	13,793*	227,342
1908	129,913	12,909	10,630†	153,452

* Boys, 10,377; Girls, 3,416. † Boys, 7,767; Girls, 2,863.

(II.)—INDIAN.

The figures for the last five years are appended:—

—	1904.	1905.	1906.	1907.	1908.
1. Statute Immigrants ...	2,721	4,823	3,674	5,499	5,456
2. Free Coolies (with aided tickets).	3,556	7,687	20,215	24,709	20,049
3. Other Immigrants... ...	24,475	27,030	28,152	31,922	29,017

The figures for 1908 include 3,030 children.

29,774 adults and 1,146 children left the Colony for Southern India.

The number of immigrants from South India shows a decrease of 10 per cent. on the figures for 1907; this decrease was due to the temporary drop in the price of rubber, which caused a check in the development of planting, with the result that fewer coolies were required than it was anticipated would be taken. Of the 25,505 agricultural labourers who came over about 15 per cent. were females.

PUBLIC WORKS.

25. In Singapore the most important works undertaken and completed during the year were the new Tan Tock Seng Hospital, the Pathological Laboratory, rebuilding the Lunatic Asylum at Pasir Panjang, the new Maternity Hospital, converting Pearl's Hill Barracks into quarters for 30 European police, &c., recon-

structing one ward at the Poh Leung Kuk Buildings, building a public morgue, also quarters for two dressers at St. John's Island, and a dhobi shed and two quarters for Government officials at Sepoy Lines.

The new road, 3·2 miles in length, connecting Kranji Road with the ferry at Woodlands, was completed at a total cost of $73,149.03, of which $13,844.86 was spent in 1908.

The country roads were maintained in good order throughout the year.

In Penang the principal works taken in hand and completed were the new convalescent bungalow, eating-stalls for natives, the Eye Hospital, two goods sheds with three electric cranes, barracks at magazine police station, quarters for cadets and unmarried officers, and a contagious ward for Europeans at Jelutong Quarantine Camp.

The Batu Feringgi Road was further extended and several decayed timber bridges were renewed in iron and masonry.

In Province Wellesley, five additional quarters for clerks and a new office and dispensary for Bukit Mertajam Hospital were built at Bukit Mertajam. Cooly lines were erected at Sungai Acheh, Bukit Tambun, Telok Ipil, Kubang Semang, and Tasek Glugor. A new vernacular school was erected at Cherok To Kun.

In Malacca the road deviation at Rim was commenced in July last and $17,000 expended to end of the year. The sum of $23,000, of which $3,000 is a re-vote, appears in the estimates for 1909 to complete the work.

Another road deviation was constructed during the year between 16¼ and 16¾ milestone Bemban-Jasin at a cost of $4,508.

The total expenditure on the vote "Gradients of Country Roads, Improvements to" was $5,999.13 out of a vote of $6,000.

A sum of $67,030 was expended on the maintenance of 198 miles of roads, giving an average of $338.53 per mile.

The new masonry and steel bridge over the Malacca River was completed about the end of the year at a cost of $22,496 out of a vote of $22,500.

Two bridges of 15 feet span of masonry and steel were constructed at Pengkalan Balak and Paya Lebar at a cost of $2,783, also 19 small bridges and 10 culverts in masonry at a cost of $7,760 out of two separate votes of $10,000 and $3,000, respectively.

The channel at the entrance to the Malacca River was deepened by means of a grab dredger. The quantity dredged during the year was 17,744·40 tons, at an average cost of 34·94 cents. The dredgings were deposited on the Western Reclamation.

Total length dredged, 960 feet by 20 feet wide. The expenditure for the year was $9,359.36 out of a vote of $12,000. $2,000 from this vote was transferred to reclamation work.

A sum of $6,499.28 was expended for constructing rough-packed coral shield walls to protect reclaimed areas. The sum

voted for this work was $9,000, but $2,500 was transferred for a retaining wall on the reclamation near the Malacca River.

The sum of $9,998.48 out of a vote of $10,000 was expended for raising the north and south groynes to three feet above H.W.O.S.T.

SINGAPORE HARBOUR WORKS.

26. Good progress was made during the year of 1908 with the harbour works.

The contractor's yard was completed: concrete-making machinery was erected and in working order for the making of the rings of concrete for forming the cylinder foundations: a stock of 1,643 rings was in the yard at the end of the year.

A commencement was made with sinking the cylinders in June, and at the end of the year there was a length of 290 feet of cylinder foundations at the northern end by Johnston's Pier, either completed or in course of sinking. At the southern end, opposite Malay Point, a length of 590 feet of foundations was completed or in course of sinking.

In December, 1908, a commencement was made with the granite ashlar work on top of the cylinders at the southern end.

Pulau Ubin quarry was opened out, and up to the end of the year a total of 36,912 tons of granite rubble had been deposited in the Inner South and West Moles from this quarry.

A total of £45,934 (the equivalent of $393,654.38) was paid to the contractors during the year, on certificates for work done during 1908.

The average number of men employed at the end of 1908 were:—at the Pulau Ubin quarry—551, and on the Quay Wall and Reclamation—837, making a total of 1,388. These figures include 130 Europeans.

Progress was made during the year with the new Lagoon Dock and the reconstruction of the wharves at Tanjong Pagar. Tenders for this work were received in 1907, and Messrs. John Aird & Co.'s tender of £998,700 was accepted. The wet dock is to have an area of 24½ acres, providing 3,837 feet of additional quay wall with a minimum depth alongside of 30 feet. The main wharf reconstruction scheme provides for the renewal in concrete blockwork of 3,144 feet and in wrought-iron cylinder construction of 1,431½ feet, giving a minimum depth at all states of the tide of 33 feet alongside.

The cofferdam was successfully closed and the tidal area was pumped out early in September; the excavation necessary was forthwith put in hand, and the formation of the embankments for the diversion of Keppel Road, together with the subsidiary works, were practically completed by the end of the year.

The reconstruction of the main wharf, Sections A and B, was begun, and dredging operations, which involved subaqueous drilling and blasting, were pushed forward. 10,700 cubic yards of blockwork were cast by the 31st December.

The plant and appliances provided by the contractors are most complete and leave nothing to be desired, and it is expected that the rate of completion of the permanent works will increase rapidly.

CHRISTMAS ISLAND.

27. The revenue collected locally was $735.91 as against $861.53 in 1907. These figures are exclusive of postage stamps, of which the District Officer buys a stock from the Postmaster-General for re-sale. Payments made locally amounted to $8,883.30.

Royalty on phosphate, paid in London in 1909 in respect of phosphate exported in 1908, amounted to £10,482 12*s*. against £8,411 16*s*. 2*d*. for 1907 and £7,153 8*s*. 10*d*. for 1906. The total expenditure of the District Office was $15,799 as against $16,721 in the previous year.

Crime decreased, 121 cases occurring as compared with 190 in the previous year.

The tonnage of shipping cleared from Christmas Island in 1908 was 50,738 (49,753 in 1907); the British tonnage was 39,435, Norwegian 4,789, Swedish 4,129, and German 2,385. Nine cargoes were cleared for Japanese ports and eight to Europe.

Imports were valued at $52,509, and consisted almost exclusively of machinery for the phosphate works. Exports consisted of phosphate of lime only to the amount of 109,097 tons (110,375 tons in 1907). The decrease is attributed to a weakened demand in the European markets.

The population on the 31st December was 1,101, and comprised 28 Europeans and Eurasians, 990 Chinese, 10 Japanese, 35 Sikhs, and 38 Malays and other nationalities. The death-rate was 14·93 per mille per annum as compared with 12·27 in 1907 and 28·5 in 1906. The public health was good and beri-beri continues to decrease, there having been only 101 new cases and 7 deaths. Comparison of these figures with those for 1901, when no less than 229 deaths occurred from beri-beri alone, shows what good progress has been made in a few years by means of scientific attention to matters of housing, sanitation, food, and water supply. The only other disease which shows a tendency to appear in epidemic form is conjunctivitis, of which there were in 1908 61 cases (132 in 1907). There are no anopheles mosquitos on the Island and malaria is unknown.

The facilities for getting and loading phosphate have been extended considerably by the erection of two steel loading piers, the construction of new tramways, and other works.

The mean temperature was 97·99° F., and the rainfall was 105·54 inches, or 32·02 more than in 1907.

LABUAN.

28. The Island of Labuan, until 1907 a separate Colony, was on the 1st January in that year incorporated with the Settlement of Singapore. The revenue and expenditure of the Island are kept distinct from that of the rest of the Colony, and defence contribution is payable only on the net revenue derived from Labuan, which in 1908 was *nil*, the revenue assessable to defence contribution being $65,891.91, and the expenditure $122,979.44.

The trade of the Island was, in sympathy with the general depression, again smaller than in the previous year, the gross value of imports and exports being $2,275,605 as against $2,678,399 in 1907 and $3,342,065 in 1906.

The comparative values of the trade of the Island in the past three years were as follows:—

	1906.	1907.	1908.
	$	$	$
Imports	1,790,337	1,358,066	1,129,278
Exports	1,551,728	1,320,333	1,146,327
Total ...	3,342,065	2,678,399	2,275,605

The imports and exports from and to ports other than those of the Straits Settlements were:—

	1908.	1907
	$	$
Imports	438,156	429,975
Exports	729,263	524,573

Coal exported as cargo declined by 800 tons, the gross tonnage sold being over 38,000, of which all but 7,000 tons was for bunkering purposes.

GENERAL OBSERVATIONS.

29. The anticipation, made in last year's Report, that the work of the Opium Commission would not be finished till the latter half of the year, was fully justified. The Commissioners, who were all gentlemen not only independent and representative but also qualified for the task by long residence in the East and personal knowledge and experience of local conditions, were the Honourable John Anderson, M.L.C. (Chairman), the Honourable Tan Jiak Kim, M.L.C., the Honourable D. J. Galloway, M.L.C., the Rev. W. F. Oldham, D.D., Bishop of the Methodist Episcopal Church, Dr. W. R. C. Middleton, Municipal Health Officer, Singapore, and Mr. E. F. H. Edlin, Advocate and Solicitor of the Supreme Court of the Straits Settlements, and they were asked to enquire into and report upon the extent to which excessive indulgence in the smoking of opium prevailed,

whether in the Colony the smoking of opium (*a*) in moderation (*b*) in excess had increased in the Colony and the steps to be taken by Government to minimize and eventually to eradicate the evils arising from the practice.

The meetings of the Commission numbered 54 and a great amount of evidence was given before it. The issues involved, on account of their number and importance, caused the report to be awaited with eagerness, the standing of the members of the Commission being a guarantee that its work would be thoroughly done.

When the report was at length received towards the end of the year it was found to be a very valuable document; and the mass of information which it contains cannot but prove to be of great assistance in whatever direction attempts are made to deal with the opium traffic.

The thanks of the Government have been given to the President and Members of the Commission for the able and exhaustive manner in which they fulfilled the task before them at great inconvenience to themselves.

The Commissioners found that there had been no increase in the prevalence of the habit and made certain specific recommendations, the chief of which were that the Government should itself administer the opium monopoly, that the arrangements of the existing opium smoking shops should be improved, the use of opium in brothels suppressed, and the sale of chandu to women or to persons under the age of 18 be made penal. The first of these will be carried into effect in Singapore and Malacca in 1910, and, it is hoped, in Penang in 1911. Efforts have been made to enforce the law as regards sale of opium in brothels and the question of improved regulation of opium shops is receiving attention. Opportunity will be taken in the new Ordinance which will be required in view of the abolition of the Farm system to insert the provision as to sale to women and children suggested by the Commissioners.

The Commissioners also visited the Federated Malay States and in their report recommended that the price of chandu there should be raised gradually to that obtaining in the Colony. In December in view of this recommendation the import duty on raw opium in the Federated Malay States was raised.

The Right Revd. Bishop G. F. Hose, D.D., Anglican Bishop of Singapore and Sarawak, resigned on the 17th November. He had been over 40 years connected with the diocese, having been appointed Colonial Chaplain Malacca in 1867, Archdeacon of Singapore in 1874 and Bishop in 1882 and enjoyed the cordial respect and esteem of all sections of the community.

In view of his approaching retirement a movement was set on foot to divide the diocese, which included the Malay Peninsula and Borneo, into two, and to constitute Singapore, Penang, Malacca and the Native States of the Peninsula a distinct diocese to be called the diocese of Singapore. Arrangements have since been completed and a new Bishop of Singapore has been appointed.

The small stipend paid from Colonial revenues to Bishop Hose ceased on his retirement and the new Bishop will not draw any stipend from Government, but the sum will for the present continue to be paid as an annual contribution to the Bishopric fund.

The extensive works being carried out for the improvement of Singapore Harbour and the construction of a Lagoon Dock and the reconstruction of the main Wharf at Tanjong Pagar were proceeded with and the contract for a Graving Dock and other connected works at Keppel Harbour was signed on the 1st January, 1909.

The contract price is £342,793 and the work is to be finished by November, 1912. The dimensions of the dock are to be 852 feet in length by 128 feet broad between copings, with an entrance of 100 feet and a depth on the sill of 24 feet, thus allowing 34 feet of water at H.W.O.S.T. Provision is also made for dividing the dock into two compartments by means of an intermediate caisson. These compartments will be 486 feet and 325 feet long respectively.

Three of the most prominent contracting firms in the world are now at work in Singapore under contract with Government, viz., Sir John Jackson, Limited, John Aird and Company, and Messrs. Topham, Jones, and Railton; and the Westminster Construction Company is also carrying out contracts with the Singapore Municipality for the construction of a new reservoir at Kalang, Filter Beds and a Clear Water Tank at Woodleigh, and have completed their contract for the abutments of the new bridge at the mouth of the Singapore River.

In Penang the management of the Goods Sheds and Swettenham Pier was handed over on the 1st July to the control of a Committee of the Tanjong Pagar Dock Board under the Presidency of the Chairman of the Board with the Resident Councillor of Penang as the official member and Deputy Chairman. The undertaking is now known as "The Government Wharves, Penang," The results have been found satisfactory to the trading and shipping interests of the port.

The country districts of Singapore, Penang, Province Wellesley and Malacca outside Municipal limits were placed under the administration of Rural Boards, one for Singapore Island, one for Penang Island, one for Province Wellesley, and one for Malacca. The Boards consist of both official and unofficial members nominated by the Governor. They collect rate and taxes within their respective districts and have the supervision of conservancy, sanitation, and the maintenance of roads and communications. For the present they receive from Colonial Funds substantial grants-in-aid. The creation of these Boards has stimulated an increased interest on the part of the unofficial community in questions of rural administration and may be expected to result in considerable improvement in the condition of outlying districts.

The year under review was an exceptionally bad one for the trade of the Colony; not only was the depression throughout the world felt here, but as pointed out by both the Chairmen of the

Chambers of Commerce of Singapore and Penang the depression was accentuated by the fact that many of the Chinese firms who had speculated in tin and exchange by the means of "long credit" were unable to weather the depression; the results were disastrous, the loss in Singapore alone being estimated at four to five million dollars.

The trading community has received an object lesson in giving credit beyond what is required for legitimate business and the disastrous year of 1908 makes it apparent that the Colony has large resources and men who are not deterred by consecutive years of depression, but have grasped the lessons to be learnt by those years, and by whose efforts the Colony may rely on every advantage being taken to maintain the position of the ports of the Colony as entrepôts for the trade of the surrounding countries.

I referred in my report for the year 1907 to the Shipping Conference in force here, and the effect of the control by that Conference of the freight rates in practically precluding any sailing vessel from obtaining cargo in the Colony, and placing a like embargo upon the economically run "tramp" steamers, British mainly, which used to participate largely in the important over-seas carrying trade.

I also referred to the report of a Sub-Committee of the Chamber of Commerce, Singapore, which emphasized the fact that a practice exists under which these Conferences pay a preferential or so-called "secret" return of 5 per cent. on the total of all freights earned from the Straits by Conference steamers to a limited number of privileged firms or persons, and mentioned that this Sub-Committee had placed on record that these privileged firms, among whom are foreign firms, were placed at an advantage over other merchant shippers in the Colony.

The Royal Commission on Shipping Rings has since made its report and the majority have advised that it is inexpedient that the system of deferred rebates be prohibited by law, but adopt as their main recommendation that if the Conference system is abused the shippers and merchants in a given trade should form themselves into an association so that they might be able to present a united front to the Conference when any controversy arose.

The merchants and shippers of this Colony act in a large number of cases also as agents for ship-owners and it remains to be seen how far this recommendation can be adopted here.

ARTHUR YOUNG,

Colonial Secretary.

17th August, 1909.

Maps on this order too large to be entirely included in one exposure are filmed clockwise beginning in the upper left hand corner, left to right and top to bottom as many frames as required. The following diagrams illustrate the method.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1909.

FINANCIAL.

REVENUE.

1. The estimated revenue of the Colony was, for the year 1909, $9,212,384, but the sums actually collected amounted to $8,795,001 only, or $417,383 below the estimate. The actual figures for 1908 and 1909 are shown in the following statement :—

	Revenue 1908.	*Revenue 1909.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Land Revenue ...	409,988	420,697	10,709	...
2. Rents exclusive of Land	65,714	57,170		8,544
3. Licences	6,081,752	5,662,239	...	419,513
4. Stamps	379,676	539,417	159,741	...
5. Port and Harbour Dues	217,423	202,669	...	14,754
6. Posts and Telegraphs ...	525,564	516,643	...	8,921
7. Railway	189,111	243,041	53,930	...
8. Fines and Forfeitures ...	97,650	81,746	...	15,904
9. Fees of Office ...	333,027	327,004	...	6,023
10. Reimbursements ...	326,449	319,141	...	7,308
11. Sale of Govt. Property ...	2,466	5,634	3,168	...
12. Interest	119,775	140,431	20,656	...
13. Miscellaneous ...	161,385	193,111	31,726	...
14. District Collections ...	10,366	...	...	10,366
	$8,920,346	8,708,943	279,930	491,333
15. Land Sales	48,669	86,058	37,389	...
TOTAL ...	$8,969,015	8,795,001	317,319	491,333
		Net decrease ...	$174,014	

The expenditure for the year, as compared with that of 1908, is given below:—

	1908.	*1909.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Charge on account of the Public Debt ...	308,007	215,833	...	92,174
2. Pensions, etc. ...	387,066	406,137	19,071	...
3. Charitable Allowances ...	12,275	11,642	...	633
4. The Governor ...	75,820	74,665	...	1,155
5. Colonial Secretary, etc.	124,909	136,937	12,028	...
6. Government Printing Office	89,050	66,859	...	22,191
7. Land and District Offices	222,618	221,799	...	819
8. Forests	28,877	29,466	589	...
9 Chinese and Indian Immigration ...	94,594	95,023	429	...
10. Treasury	82,071	80,972	...	1,099
11. Audit	40,683	44,204	3,521	...
12. Marine	343,927	291,223	...	52,704
13. Legal	336,802	349,128	12,326	...
14. Police	731,843	753,174	21,331	...
15. Prisons	194,957	200,592	5,635	...
16. Medical ... 17. Hospitals and Dispensaries ...	593,270	608,537	15,267	...
18. Education	406,097	399,662	...	6,435
19. Ecclesiastical ...	19,279	18,306	...	973
20. Transport	14,582	16,190	1,608	...
21. Military Expenditure ...	1,929,272	1,636,505	...	292,767
22. Miscellaneous Services ...	437,331	319,874	...	117,457
23. Post Office	441,982	421,392	...	20,590
24. Railway	451,554	558,124	106,570	...
25. Government Monopolies	...	...	...	...
26. Botanical Gardens and Museum	40,736	43,133	2,397	...
27. Public Works Department	300,056	287,946	...	12,110
28. Public Works, Annually Recurrent ...	520,279	461,499	...	58,780
29. Public Works, Extraordinary	1,609,687	793,909	...	815,778
TOTAL ...	$9,837,624	8,542,731	200,772	1,495 665
Net decrease ...			$1,294,893	

The sums expended on Personal Emoluments and Other Charges in the two years were:—

	1908.	*1909.*	*Increase.*	*Decrease.*
	$	$	$	$
Personal Emoluments ...	2,893,790	3,005,509	111,719	...
Other Charges	1,869,744	1,809,466	...	60,278

The actual expenditure in 1909 was $845,366 below the estimate, which was $9,388,097. The savings appear mainly in Public Works, Special Services, $380,092, Personal Emoluments, $180,176, Other Charges, $177,782, and Military Expenditure, $123,311. Charges on account of Public Debt exceeded the estimate by $115,833.

The following is a statement of the Revenue and Expenditure of the Colony for the last five years:—

		Revenue.	*Expenditure.*
		$	$
1905	...	11,657,424	10,976,525
1906	...	9,618,313	8,747,819
1907	...	10,023,016	9,499,693
1908	...	8,969,015	9,837,624
1909	...	8,795,001	8,542,731

The following statement shows the Assets and Liabilities of the Colony at the 31st December, 1909:—

Liabilities.		$	*Assets.*		$
Loan Account...	...	1,584,708	Indian Agency Account	...	272,178

PUBLIC DEBT.

A Loan of £5,000,000 was raised in 1907 under the provisions of Ordinance IV of 1907. The position of the loan on the 31st December, 1909, was as follows:—

	£
3½ per cent S. S. Inscribed Stock ...	4,027,763
4 per cent Debentures	1,161,800

Advances were made from Loan Funds as follows:—

	$
Tanjong Pagar Dock Board ...	33,503,392
Municipal Commissioners, Singapore	2,000,000
Municipal Commissioners, Penang ...	800,000
Government Harbour Works ...	2,832,224
	39,135,616
Expenses of Issue ...	943,688
Total ...	$40,079,304

Of the loan of £5,000,000 raised in 1907 the sum of £4,675,918 has now been expended and it will probably be necessary to raise a further sum of £2,750,000 in 1910. The Ordinance under which the raising of the loan was authorized provided for the raising of £7,861,457, but it is anticipated that a total of £7,750,000 will suffice.

Provision is made for the repayment of this loan by a Sinking Fund which will come into operation in 1917, ten years from the date of the first issue of debentures.

The charge on account of interest on the public debt was $1,614,307 in 1909, as against $1,616,298 in 1908. The great portion of this charge is, however, borne by the Tanjong Pagar Dock Board and other bodies to whom portions of the loan have been allotted. The actual sums paid by the Colonial Government in 1908 and 1909, respectively, were $308,007 and $215,833.

In local currency the total amount of the debt stood at $44,481,969 on the 31st December, 1909, which was more than five times the revenue of the Colony but only about three times the revenue of the Colony and the Tanjong Pagar Dock Board together.

EXCHANGE.

The minimum demand rate during the first six months of the year was 2/3$\frac{7}{8}$, the maximum being 2/3$\frac{31}{32}$. The rate improved in July and August, and in September the minimum demand rate was 2/4$\frac{1}{8}$, the maximum being 2/4$\frac{3}{16}$. This rate continued firm until the end of the year.

CURRENCY.

During the year sums amounting to £277,220.19.3 paid by JOHN AIRD & Co. and others to the Crown Agents were paid to their agents in Singapore by the Currency Commissioners at 2/4, the money received in London being applied in redemption of the debt of the Currency Commissioners to the Loan Account, and any profit and loss due to exchange being transferred to the Gold Standard Reserve.

The gold held by the Commissioners in Singapore at the beginning of the year amounted to £4,740. During the year gold to the value of £112,180 was received and issues of £115,990 were made, leaving a balance of £930 in the vault on the 31st December. In addition sums aggregating £140,000 were remitted to the Crown Agents to be held in gold in London.

The large $5 note and the first issue $1 note are being gradually withdrawn from circulation, all such notes being cancelled on their return to the Commissioners.

The currency of the Colony, in circulation exclusive of subsidiary coins, consisted of $29,878,505 in Government currency notes, $555,515 in bank notes issued by the Hong Kong and Shanghai Banking Corporation and the Chartered Bank of India, Australasia and China, and $6,713,248.50 in dollars and half-dollars. The above amounts include stocks held by the Banks and the Treasuries of the Colony and the Federated Malay States, but do not include unissued currency notes still in the hands of the Currency Commissioners.

Subsidiary silver coin of the face value of $1,740,639.80 (including $1,000 old Straits dollars and $639.80 assorted dollars) was sent to Bombay during the year to be reminted. The new coins are of a fineness of 600. The profits from reminting this coin will be credited to the Gold Standard Reserve. In the month of December $400,000 worth of the new coins were received from Bombay.

The average bank-note circulation in 1909 was $750,232, as compared with $1,277,340 in 1908. The average amount of Government currency notes in circulation in 1909 was for each month:—

	$		$
January ...	25,860,892	July ...	26,891,537
February ...	26,160,612	August ...	26,940,187

June ...	27,386,538	December ...	29,841,344

MUNICIPAL REVENUE AND EXPENDITURE.

The revenue of the three Municipalities amounted to $3,519,298, and their expenditure, excluding sums spent on Loan Works, to $3,279,513. The usual comparative statements of revenue and expenditure, and of the debts of the Boards, showing the provision made for repayment, appear below.

1909	...	5,849,063	00	4,267,797	27

The Board have during the year paid off debentures to a total of $1,050,000 and loans at call amounting to $30,400. The funds for this redemption were provided from the loan issue in pursuance of "The Loan Ordinance 1907." The whole of the debenture issues taken over from the late Tanjong Pagar Dock Company have now been redeemed by the Board, as to $1,300,000 by loan funds, and as to $315,500 from the surplus revenue fund.

The capital debt due to Government including an estimated amount of $29,003,149.45 for initial cost now stands at $33,607,514.62 on which the Board pay interest at 4 per cent. It is intended to fix the capital debt by Ordinance at an early date.

In addition to the above-mentioned capital the Board have also expended on new works and other expenditure of a permanent nature a sum of $2,474,819.27 from surplus revenue or reserve fund under Section 31 (2) of "The Tanjong Pagar Dock Ordinance 1905."

Work has progressed throughout the year on reconstruction of the wharves and construction of the new wet dock at Tanjong Pagar and the new dry dock at Keppel Harbour, the expenditure to the end of the year being on the former $2,551,295.88 and on the latter $325,443.68.

* Excess of Expenditure over Revenue made good in each case by contributions from Government.

The following figures are taken from the Wharf Tonnage returns:—

	1905.	1906.	1907.	1908.	1909.
Number of vessels ...	2,315	2,470	2,556	2,364	2,366
Tonnage ...	4,491,351	4,701,004	4,747,210	4,590,474	4,433,105
Coal inwards and outwards ...	1,139,042	1,205,580	1,111,682	1,145,435	1,160,711
Cargo inwards and outwards ...	1,115,654	1,150,527	1,270,285	1,088,527	974,016

GOVERNMENT WHARVES, PENANG.

During the year the Northern end of Swettenham Pier Extension (345 feet) has been almost completed and the Southern Arm Extension (255 feet) is being pushed forward rapidly. This, when completed, will provide a total length of 1,200 feet—sufficient to accommodate two of the largest mail steamers.

The removal of Victoria Pier has been deferred, as the matter does not appear to be of such urgent necessity as to warrant a large expenditure.

The present fleet of Lighters numbers 91 but about 25 per cent of these are likely to be condemned during the coming year.

The profit on revenue account at Prai Dock for the year 1909 was $5,392.

The profit on revenue account of Government Wharves, Penang, for the year was $65,258.

TRADE.

The trade shows improvement.

The value of merchandise imported into the Colony was $301,313,799 as against $296,612,744, an increase of $4,701,055 or 1·6 per cent. Exports from the Colony amounted to $267,497,556 as against $262,459,100, an increase of $5,038,456 or 1·9 per cent.

The figures for the last nine years were, in millions of dollars:—

	Average for 1901-1905.	1906.	1907.	1908.	1909.
	$	$	$	$	$
Merchandise:—					
Imports	315·5	317·8	322·9	296·6	301·3
Exports	262·4	281·3	282·2	262·5	267·5
TOTAL ...	577·9	599·1	605·1	559·1	568·8

Treasure :—					
Imports	35·1	21·5	27·7	19·8	12·0
Exports	35·3	29·7	23·1	11·4	13·7
TOTAL ...	70·4	51·2	50·8	31·2	25·7
Aggregate Total ...	648·3	650·3	655·9	590·3	594·5

Merchandise imported from the United Kingdom increased from $30,635,801 to $32,021,011 or 4·5 per cent, but from the British Possessions and Protectorates there was a decrease from $141,281,920 to $140,440,769 or ·6 per cent. Foreign countries, however, showed an increase from $124,695,023 to $128,852,019 or 3·3 per cent. Exports of merchandise to the United Kingdom decreased from $62,546,937 to $59,546,377 or 4·8 per cent; to British Possessions and Protectorates there was also a falling off from $80,596,838 to $78,883,589 or 2·1 per cent. To foreign countries the exports increased from $119,315,325 (including countries not distinguished) to $129,067,590 or 8·2 per cent.

The trade for the past eight years with the United Kingdom (including all British Possessions) and with foreign countries is shown in the following table :—

IMPORTS.

	Average 1902-1906.	*1907.*	*1908.*	*1909.*
	$	$	$	$
United Kingdom ...	230,664,724	226,911,864	187,855,386	183,126,371
Foreign Countries ...	125,265,395	129,664,621	128,540,553	130,232,056

EXPORTS.

	Average 1902-1906.	*1907.*	*1908.*	*1909.*
	$	$	$	$
United Kingdom ...	150,149,625	166,366,980	151,004,850	149,578,582
Foreign Countries ...	155,241,917	142,342,929	122,541,779	131,604,439

A comparison of Settlements Trade shows the following proportion of merchandise imported into the Colony, viz. :—

Singapore 71·2 per cent, an increase of 1·2 per cent in value.

Penang 28·3 per cent, a decline of 1·2 per cent.

Malacca ·3 per cent.

Labuan ·2 per cent.

the last two places being the same as they were in 1908.

In exports the figures are as follows, viz.:—

Singapore 67 per cent, an increase of ·8 per cent.
Penang 32·1 per cent, a fall of ·7 per cent.
Malacca ·6 per cent, a decline of ·1 per cent and
Labuan ·3 per cent, as it was in 1908.

The combined action of certain British firms in insisting on credits being limited to 60 days and on deliveries being effected within the same time has tended to place the trade on a sounder basis which is borne out by the fact that in 1909 the number of failures was only nine with a total liability of $184,000 as against thirty-one in 1908 with a total liability of $1,080,000.

The absence of speculative trade and the greater caution exercised by native dealers have resulted in the improvement of their financial status thereby contributing towards the sound state of the market.

The produce trade shows considerable advancement in prices.

Piece goods also shew improvement. The high price of raw cotton, which stood at 8·5*d*. per lb. on the last day of the year, an unusually high quotation compared with previous years, would tend to a reduction in stocks when enhanced prices may be expected.

The latter part of the year shows an expansion in the trade in rough goods, there being a good demand especially for rubber estates' requirements owing to the development of the rubber industry.

AGRICULTURAL INDUSTRIES.

SINGAPORE.

The increase of para rubber planting in the Colony during the past year has been phenomenal. Considerable areas of waste land have been put under rubber, which is also planted through the old pineapple fields. In Singapore most of this cultivation is under Chinese control but there are three European-owned estates. It is very gratifying to see so much waste land which has been unused for many years, since the abandonment of the gambier and pepper cultivation, at last under cultivation again. An extensive nursery of young para rubber seedlings along the Orchard Road, and the shipping of tongkang loads of seed from the Federated Malay States for planting here, shows the great strides that this industry is making in the Colony. When it is considered that only one-third of the island is cultivated and

that the rest, excluding the town, consists almost exclusively of abandoned secondary scrub, it is satisfactory to record the increase of a permanent cultivation on this waste land. There has been a slight increase in coconut planting, but there is some tendency, among the Chinese especially, to substitute rubber for coconuts, which is not an advisable policy.

Pepper and gambier show signs of a return. Both these plants had almost completely disappeared from cultivation in the island. Several new plantations have been formed in the year. There has also been a small increase in indigo, citronella grass, ginger and ground-nuts. Vegetable cultivation in the other hand has decreased considerably, and there is a marked decrease in pineapple cultivation, as was to be expected. There seems also to be an increase in flower cultivation, and in one place the Chinese have several acres under Jasmine, the flowers of which are sold in town. The Soy-bean cultivation failed entirely and has been abandoned.

Penang and Province Wellesley.

Rubber.—The conversion of Batu Kawan Estate (5,000 acres), of which 1,500 were formerly under sugar and coconuts, into a rubber estate and the gradual conversion of Prai Estate (also sugar and coconuts) into rubber add very largely to the total acreage under this product. Doubtless the increasing prices paid for plantation rubber during the year were primarily the cause of this. The planting and cultivation of para rubber was also extended on the "Caledonia" group of estates, the Bertam Estate, the Malakoff Estate, the Val d'Or Estate, the Bakap Estates, the Juru Estate and the Alma Estate, all in Province Wellesley.

In January, 1909, the price per pound was 5/4 and by a gradual rise reached what was at that time the highest figure ever paid, viz., 9/8½ in November; December, however, saw a drop to 8/0¾.

Tapioca.—Notwithstanding that prices showed a further decline, the total exports slightly exceeded those of 1908.

Copra and Coconuts.—The exports of the former fell from 331,000 pikuls in 1908 to 281,000 pikuls in 1909. Prices in consequence improved considerably. The cultivation of coconuts is extending, and a bigger trade was done in 1909 than in the previous year, probably owing to the decreased output of copra.

Native or Basket Sugar.—The cultivation of this product is almost extinct, chiefly on account of native cultivations having been sold to Europeans as rubber plantations. The exports fell from 87,000 pikuls in 1908 to 23,000 in 1909.

Spices.—Nutmegs showed an increase from 2,330 pikuls in 1908 to 3,030 in 1909. Prices were, however, almost unremunerative. Cloves dropped from 1,519 pikuls in 1908 to 750 pikuls in 1909, prices showing no material difference.

Rice.—The padi crops in Province Wellesley were much better in 1909 than in the previous year, averaging between 50 and 60 bushels per acre.

The Agricultural Show of the Colony and Federated Malay States was held in Penang in August and proved very successful. The quality of the exhibits, especially in the staple articles of rubber, coconuts, copra, tapioca, etc., reached a high standard.

MALACCA.

The planting of para rubber received a great impulse during the latter part of the year and applications for large areas were made which could not all be finally dealt with. The high price of rubber has caused owners to start tapping whenever possible and the export figures have gone up rapidly. Few signs of disease have been seen and the trees, though they do not show such rapid growth as elsewhere, owing to catch crops of tapioca and gambier being planted, are generally speaking very healthy. Owing to the fact that most of the estates are on land which was cleared for tapioca twenty or thirty years ago, the quantity of dead and decaying timber on them is but small.

There are still considerable areas under tapioca, but as it is no longer allowed to be planted except as a catch crop in young rubber, this form of cultivation will gradually pass away. Gambier has shown itself a very successful catch crop on small areas of rubber and has paid well. There are signs of attention being paid to coconut planting but so long as rubber holds its present position it is not likely that much will be done.

LAND GRANTS.

The area of Crown Land alienated, and the number of Statutory Grants issued and the premia paid for the same during the last five years are as follows:—

From the above comparative table it will be seen that the following countries show an increased tonnage, entered and cleared, in 1909 as compared with 1908. Britain 25,751; Japan 298,704; Holland 250,861; Germany 90,934; Siam 59,440, and Sweden 52,734.

The following countries show a decrease:—

Norway 96,131; Russia 88,759; France 78,854; Denmark 33,189; Italy 17,010; Austria 9,602; Spain 7,420, and Belgium 5,806.

Comparative Statement of Merchant Vessels Inwards and Outwards for last Five Years.

	*1905.**	*1906.**	*1907.*	*1908.*	*1909.*
Total tonnage Entered and Cleared ...	18,890,600	19,711,498	20,328,760	21,750,245	22,192,354

It will thus be seen that the tonnage as compared with 1905 has increased by 3,301,754.

Native Craft and Steamers under 50 Tons.

	1908.		*1909.*	
	No.	*Tons.*	*No.*	*Tons.*
Arrivals ...	17,747	723,536	17,505	675,762
Departures ...	17,882	731,900	17,512	671,439
Total ...	35,629	1,455,436	35,017	1,347,201

The decrease as compared with 1908 is 108,235 tons.

Comparative Statement of Tonnage of Native Craft and Steamers under 50 Tons Entered and Cleared, for last Five Years.

	*1905.**	*1906.**	*1907.*	*1908.*	*1909.*
Total tonnage Entered and Cleared ...	1,544,284	1,484,801	1,464,048	1,455,436	1,347,201

As compared with 1905 this native craft tonnage has decreased by 197,083 tons. This decrease is probably due to the fact that steamers of medium tonnage now call at ports which were not visited formerly.

* Labuan not included.

In Singapore during the year one new steamer with a tonnage of 175 tons gross and 13 sailing vessels of 1,391 tons were registered under the Imperial Shipping Acts. Twelve new sailing vessels of 898 tons were registered under Ordinance V of 1883; also 802 of 5,928 tons under Ordinance VIII of 1872.

LEGISLATION.

Twenty-four Ordinances, of which twelve were principal and twelve amending Ordinances, passed the Legislative Council.

The principal Ordinances are of considerable importance. They include the Chandu and Liquors Ordinances which were rendered necessary by the abolition of the Opium and Spirit farms, and advantage was taken of the opportunity offered by their introduction to render more stringent the regulations relating to the importation and consumption of opium in the Colony. The abandonment of the Excise Farm system and the decrease in revenue consequent thereon made other taxation necessary and an Ordinance imposing a duty on petroleum was introduced and passed in November.

The Societies Ordinance repealed the Societies Ordinances of 1889 and 1893 and re-enacted them with some additions which experience of the old Ordinances had proved to be desirable.

The Civil Law Ordinance repealed the Indian Acts in force in the Colony dealing with the subject and also the Civil Law Ordinance of 1878, and re-enacted their provisions with some additions in a consolidated Ordinance.

The Labuan Assizes Ordinance made provision for the holding of Assizes in Labuan for the trial of offences committed in Labuan and Brunei. As the number of residents who are able readily to understand English is small the system of assessors was adopted.

The Fisheries Ordinance consolidated the laws relating to fisheries; the Native States Prisoners Ordinance enables sentences of imprisonment in certain Native States of the Malay Peninsula and in the State of Brunei to be carried into effect in the Colony; the Board of Education Ordinance established a board to advise the Government in matters relating to education and gave power to assess and collect an Education Rate.

The amending Ordinances deal mainly with details and no principles of interest or importance are involved.

EDUCATION.

There are in the Colony 179 vernacular schools where the teaching is in Malay. Free tuition up to the Fourth Standard is provided by the Government at these schools to about twelve

thousand two hundred boys and girls. The Government also finances and controls eight schools where the teaching is in English and goes up to the Seventh Standard.

There are also thirty-two aided-schools managed by private bodies and in receipt of grants-in-aid from Government.

The net expenditure on Government English schools was $124,769.43, on aided-schools (English, Anglo-Tamil, Tamil and Chinese) $106,958.24, and on Government vernacular schools, $97,431.33.

The Malacca Training College for Malay Teachers continues to do good work. Its cost, during the year under review, was $8,152. The supply of trained teachers from the institution is still, however, below the demand and is likely to remain so for some years to come.

The progress of the Commercial and Science Classes at the Raffles Institution is reported to have been very satisfactory.

GOVERNMENT INSTITUTIONS.

HOSPITALS.

All the public hospitals of the Colony are under Government management. A certain number are maintained on estates under the provisions of the Labour Ordinances in force for various classes of immigrant labour, and these are under Government supervision. The total number of admissions to hospitals, exclusive of the Lunatic Asylum, was 27,543, as against 27,361 in 1908. Two hundred and twenty patients were admitted into the Lunatic Asylum, Singapore, as against 212 in 1908.

The number of patients treated in the hospitals was 30,266, of whom 1,398 were Europeans. In 1908 the corresponding numbers were 30,370 and 1,287 respectively. Deaths numbered 3,635 (70 being Europeans), as against 4,031 and 83 in 1908. The rate of mortality shows a reduction, the figures being, for 1908, 13·24 and, for 1909, 12·01 per cent of the total cases treated.

The number of inmates in the Leper Asylums of the Colony increased from 417 on the 31st December, 1908, to 483 at the end of the year under review. The number of deaths was also greater, the total for 1909 being 149.

REFORMATORY.

The expenditure of this institution, exclusive of the salaries of the Superintendent and Warders, was $8,587 in 1909, a reduction of $831 from the figures for the preceding year. The

average daily muster was a little higher, the actual figures being, 1908, 65·26 and, in 1909, 66·49. There remained 71 boys on the 31st December. The health of the inmates was good. They are taught English and romanized Malay. The boys make bread and grow vegetables, for their own consumption, and are taught other trades, such as carpentering, tailoring and shoemaking, which may be useful to them on release.

SAVINGS BANK.

There are no private Savings Banks in the Colony. The amount at the credit of the depositors in the Government Savings Bank on the 31st December, 1909, was $671,028, the highest sum reached. The average amount at the credit of each depositor was $157.26.

The deposits were $469,854, as compared with $447,892 in 1908.

The excess of deposits over withdrawals was $6,056.

There was a profit on the year's working of $2,583, but that amount was not sufficient to cover the depreciation of securities, so that the position at the end of 1909 was less satisfactory than at the end of the previous year. The present value of the investments is as follows:—

	$
India 3½ per cent Rupee Paper ...	411,696
Singapore Municipal Bonds at 5 per cent	60,030
Do. do. at 4 „	69,375
Fixed Deposits in Banks	45,000
Various 3 per cent Colonial Guaranteed and Corporation Stocks	66,707
Total ...	$652,808

POLICE.

The Police Force numbers over 2,500 men, of whom 378 are Sikhs.

Ninety-nine boys have passed through the training depôt at Malacca for the instruction of recruits during 1909.

PRISONS.

The daily average number of prisoners in the various prisons during 1908 and 1909 were as follows:—

		1908.	*1909.*
Singapore ...	Criminal ...	877·00	952
	Civil ...	76·96	114
Penang ...	Criminal ...	229·43	221·64
	Civil ...	23·83	30·54
Malacca ...	Criminal ...	23·39	22·88
	Civil ...	11·81	4·95

The practice of banishing habitual criminals (634 in 1909) has been continued.

The health of the prisoners was uniformly good, the number of deaths being: at Singapore 32, at Penang 12 and at Malacca nil.

CRIMINAL STATISTICS.

Sixteen murders and sixty-three gang robberies were reported during the year; of the latter 31 were proved in the preliminary investigation to be false.

The returns do not disclose any abnormal features.

One hundred and eighteen persons as against 154 in 1908 were tried before the Supreme Court. Gang robbery and murder, and counterfeiting coin, were the principal crimes. Eleven persons were convicted of returning from banishment. The lower Courts had to deal with a smaller number of cases than in the previous year. The total number disposed of was 18,796, a decrease of 4,406 over the figures for 1908. The decrease was almost entirely in Singapore, the other Settlements being normal.

VITAL STATISTICS.

The estimated population of the Colony was 636,691, the figures given by the Census of 1901 being 572,249. Sixteen thousand nine hundred and ninety-four births and 23,925 deaths were registered as against 18,074 and 27,041, respectively, in 1908.

The death-rate was 37·58 per mille of the population. The rate in 1908 was 43·06

The birth-rate was 26·69 per mille as compared with 28·75 in 1908.

The deaths due to the more important infectious diseases in 1909, excluding imported cases landed on, or occurring amongst contacts on, the Quarantine Island, were as follows:—

Small-pox: 11 as compared with 12 in 1908.

Cholera: 76 as compared with 178 in 1908.

Plague: 5 as compared with 12 in 1908.

Beri-beri accounted for 1,506 deaths, 394 fewer than occurred in the previous year. The use of cured rice in all Hospitals has largely lessened the death-rate from this disease.

There were 2,659 deaths from phthisis against 2,988 in 1908.

The totals of deaths from dysentery (1,241) and malaria (2,589) show a decrease. The figures for 1908 were 1,394 and 3,062 respectively.

Considerable work is in progress with the view of lessening the incidence of these four diseases, our scourges, but the difficulties of natural and other forces against us are great.

CLIMATE.

The mean temperature of the air, 81·7 *F.* is highest in Penang where the maximum temperature was 93°, the minimum 71°. It is lowest in Malacca 80·9, with a maximum of 88·4, minimum 73·5. The mean at Singapore was 81·0, maximum 92·5, minimum 69·0.

Rainfall:—	Penang ...	...	128·65 inches.
	Province Wellesley	...	118·00 ,,
	Labuan ...	...	114·00 ,,
	Singapore ...	...	112·69 ,,
	Malacca ...	...	68·51 ,,

The prevailing direction of the wind changes with the N. E. and S. W. Monsoons. The former blowing from November to April and the latter from May to October.

Notwithstanding the high death-rate (37·58 per mille for 1909) of the general populace, the climate must be considered fairly healthy for Europeans, the death-rate among whom was 11·63 per mille. It must be remembered, however, that amongst the Europeans, most of whom are picked lives, there are few very old and but a small percentage of children. Moreover, when ill, Europeans, as a rule, leave the Colony as soon as possible.

POSTAL, TELEGRAPH AND TELEPHONE SERVICE.

The chief event of the year was the reduction of postage to Kelantan, Trengganu, Kedah and Perlis consequent on the transfer of these States to British protection. The reduction, which took effect on the 1st of August, applies to all classes of postal matter, the new rates being the same as those in force in the inland service of the Colony. The cash-on-delivery system was applied to letters and parcels exchanged with the United Kingdom, from the 1st of January and with Hongkong from the 2nd of August, but little advantage was taken of these services. The number of postal articles (excluding parcels) posted in the Colony was 5,892,463, an average of 10·3 per inhabitant. The number received for delivery was 5,438,603.

The decrease in postal revenue is due to the depression in trade which existed until late in the year. The stamp sales were less each month than in 1908, until July, and did not show any marked improvement until December.

New Government telegraph lines from Singapore to Penang and the Federated Malay States were opened for public traffic, that to Kuala Lumpur on the 17th of May, that to Penang on the 17th of June. Kedah joined the Malayan telegraph system on the 1st of October and the rates were reduced from eight to three cents per word.

IMMIGRATION.

(1) CHINESE.

The number of immigrants from China, viz., 151,752, is again the lowest on record since the year 1900, and shows a further decrease of 1·1 per cent upon the number for the year 1908. The number of adult female immigrants also shows a further decrease, viz., 6 per cent upon the number for the previous year: the proportion of female to male immigrants has fallen 0·4 per cent, but remains higher than that of any other former year. One thousand one hundred and fifty-six infants of one year of age and under arrived in the Colony against 2,002 in the year 1908: of these 258 male and 254 female children are believed to have been added to the population of the Colony, the balance having been reported as leaving for other ports. The number of "unpaid passengers" *i.e.*, coolies who obtain free passages from China in consideration of entering into contracts for service on arrival in the Colony, was 13,379, a decrease of 225 from the number for the previous year, and is again the lowest on record for many years. These unpaid passengers formed 8·8 per cent of the total arrivals.

Harvests were good in China and trade was depressed on this side; it is difficult to assign other reasons for the continued decrease in immigration.

The totals for the last five years are as follows:—

Year.		*Men.*	*Women.*	*Children.*	*Total.*
1905	...	148,869	13,714	10,548	173,131
1906	...	153,624	12,478	10,485	176,587
1907	...	197,284	16,265	(*a*) 13,793	227,342
1908	...	129,913	12,909	(*b*) 10,630	153,452
1909	...	128,878	12,126	(*c*) 10,748	151,752

(II).—INDIAN.

The figures for the last five years are appended:—

	1905.	*1906.*	*1907.*	*1908.*	*1909.*
1. Statute Immigrants ...	4,823	3,674	5,499	5,456	4,119
2. Free Coolies (with aided tickets) ...	7,687	20,215	24,709	20,049	20,289
3. Other Immigrants ...	27,030	28,152	31,922	29,017	25,409

The figures for 1909 include 2,653 children.

Thirty thousand two hundred and eighty-four adults and 1,090 children left the Colony for Southern India.

The decrease in the number of Immigrants from South India as compared with 1908 amounts in the case of agricultural labourers to about 4 per cent and in the case of other classes to about 12 per cent. It is probably due to increased prosperity in India and increased competition of other Colonies for Indian labour. Of the agricultural labourers who came over about 14·5 per cent were females.

PUBLIC WORKS.

SINGAPORE.

Among the public works completed during the year were the new light to Cape Rachado lighthouse; new Lascars' Quarters at Teluk Ayer for the Marine Department; additions and alterations to Supreme Court; Quarters for Junior Boarding Officer at Teluk Ayer; improvements to the Malarial Ward, General Hospital; erection of five additional Quarters at Pulau Brani, for the Master Attendant's Lascars; ten new Quarters for the Police at People's Park; erection of Quarters for the Second Superintendent of Police at Pearl's Hill; raising and filling of swampy

(*a*) Boys, 10,377; Girls, 3,416. (*b*) Boys, 7,767; Girls, 2,863. (*c*) Boys, 7,946; Girls, 2,802.

land at the toe of Pearl's Hill in connection with the new European Police Quarters; Beach Road Reclamation, repairing and maintaining sea wall and grounds, Middle Road Ghaut; filling up swampy ground near Kandang Kerbau Hospital; new Coroner's Court and Morgue, Tan Tock Seng Hospital; and rebuilding Tanjong Rhu Bungalow. No new roads or bridges were constructed during the year. The country roads, bridges and culverts, were maintained in good order throughout the year.

PENANG.

In Penang the principal works taken in hand and completed were, rebuilding Nurses' Quarters, General Hospital; special services to the Residency; Eating Shed, Sungai Pinang; Indian Immigration Shed; tile roofing three vernacular schools; glass shutters in lieu of louvres at Belle Vue Bungalow; replacing barbed wire fencing Cattle Quarantine Station, Brick Kiln Road, with steel paling and raising low-lying ground at the Cattle Quarantine Station. The Chinese Protectorate and Indian Immigration Offices commenced in 1907 were completed during the year.

The work in connection with improving the water supply to Government Hill Bungalows was not quite finished at the close of the year.

The Batu Feringgi Road for a length of one mile was metalled with granite and spawls. Several decayed timber bridges and culverts were renewed in iron and masonry.

PROVINCE WELLESLEY.

A Lock-up Ward was built for Prisoners and Cells for Lunatics in connection with the Hospital; and a Public Works Department Store was built at Bukit Mertajam.

Teacher's Quarters were erected at Kubang Semang and the vernacular school at Aur Gading was extended. A new Fish Market was also provided at Bagan Tuan Kechil.

During the year three new bridges were constructed and 16 culverts under 6′0″ span. Two new steel pontoons and seven wooden pontoons were provided for the bridges at Nibong Tebal and Bagan Serai respectively, as also three ferry pontoons for the ferries at Prai, Aur Gading and Bukit Tambun.

MALACCA.

The road deviation at Rim which was estimated to cost $40,000 was nearly completed during the year.

A sum of $124,297.81, of which $85,000 was Government contribution, was expended on the maintenance of 280 miles of roads, giving an average of $443.92 per mile.

The platforms of 14 bridges were renewed in reinforced concrete at a cost of $6,310.

To renew a 26-foot span bridge at Tampoi, a contract was entered into for $2,310. The contract, which expired on 15th December, has been extended for two months owing to heavy floods.

Ten decayed wooden culverts were renewed in masonry and concrete at a cost of $2,940.

The channel at the entrance to the Malacca River was deepened by means of the "Grab" dredger. The quantity dredged and conveyed for filling in the eastern and western reclamations was 36,005.52 tons at a cost of $26.56 cents per ton. The total expenditure for the year was $11,999.97, of which a sum of $2,436.96 was spent for a new Cochrane boiler donkey pump and repairs to pontoon. The dredger worked from 14th April to 27th December (inclusive). During the first quarter no dredging was done as the old boiler was condemned, and the new one was being fixed.

The sum expended for raising the east and west groynes was $4,996.55. The total length raised two feet above H.W.O.S.T. was 950 feet.

NEW WORKS AT TANJONG PAGAR.

Progress has been made during the year with the Lagoon Wet Dock and the reconstruction of the wharves at Tanjong Pagar.

The south wall of the dock has been completed for a length of 1,250 feet and a further length of 1,000 feet is under construction; this has involved the depositing of 49,460 cubic yards of concrete during the year.

A total of 477,600 cubic yards of excavation has been removed from the body of the dock during the year, leaving 869,800 cubic yards to be dealt with. The material excavated has been utilized for reclaiming the swamp areas to the northward of the dock.

The diversion of Keppel Road between Borneo Wharf and Anson Road is in progress, the surface of the roadway having been formed and the tramway laid for almost the entire length.

The preliminary works in connection with the construction of the entrance to the dock are being proceeded with and a commencement will shortly be made with the blockwork wall on the eastern side.

The reconstruction of the western end of the main wharf to the extent of 500 feet was almost completed during the year, and it is anticipated that this length will be available for traffic in 1910.

The quarries at Bukit Timah have been further developed during the year and a total quantity of 87,000 cubic yards of granite has been delivered on the works.

A total amount of £176,100 was paid to the contractors on account of work done during 1909.

The average number of men employed on the works and at the quarry during the year was 3,676.

Good progress was made during the year with the construction of the new graving dock at Keppel Harbour.

The construction of the cofferdam and watertight embankment was completed in September, and the tidal waters were finally excluded from the site of the dock in November.

The diversion of the Singapore Government Railway clear of the site of the works was completed in May and a commencement was subsequently made with the construction of the walls at the head of the dock.

The general excavation for the body of the dock and also for the engine house foundations have made satisfactory progress.

The piled foundation for the boiler house was completed during the year.

The plant and arrangements for temporary works provided by the contractors are most complete and it is anticipated that the rate of progress of the permanent work will rapidly increase.

A quarry at Pulau Ubin has been opened out and a considerable quantity of stone therefrom has been delivered on to the works.

SINGAPORE HARBOUR WORKS.

The general progress of the harbour works throughout 1909 was well maintained.

At the end of the year there was a total length of 1,500 feet of wall completed and foundation work is in for a further length of 1,000 feet, out of a total length of 5,028 feet that has to be done to complete the Quay Wall.

The filling up of the reclaimed area with the dredgings and covering the same with material excavated from Mount Wallich has been carried on during the year.

There has been deposited on the Inner South Mole during the year 1909, 114,609 tons of rubble.

A total of £224,933 was paid to the contractors up to the end of 1909 on certificates for work done during the year.

The average number of men employed at the end of 1909 was at the Pulau Ubin Quarry 787 and on the quay and reclamation 1,109, making a total of 1,895. The figures include 119 Europeans.

LABUAN.

The revenue and expenditure of the Island are kept distinct from that of the rest of the Colony, and Defence Contribution is payable only on the net revenue derived from Labuan, which in 1909 was *nil*. The revenue was $78,979.23 and the expenditure $96,583.11.

The trade of the Island was larger than in the previous year, the gross value of Imports and Exports being $2,447,841, as against $2,275,605 in 1908 and $2,678,399 in 1907.

The comparative values of the trade of the Island in the past three years were as follows:—

		1907.	*1908.*	*1909.*
		$	$	$
Imports	...	1,358,066	1,129,278	1,308,077
Exports	...	1,320,333	1,146,327	1,139,764
Total	...	2,678,399	2,275,605	2,447,841

The Imports and Exports from and to ports other than those of the Straits Settlements were:—

		1907.	*1908.*	*1909.*
		$	$	$
Imports	...	429,975	438,156	615,051
Exports	...	524,573	729,263	724,631

Coal exported as cargo increased by 20,578 tons, the gross tonnage sold being over 57,268, of which about half was for bunkering purposes.

The tonnage of shipping entering the port was 165,137 (British 70,153 tons and Foreign 94,984 tons), as compared with 145,704, (British 58,601 tons and Foreign 87,103 tons), in 1908.

There is a steady demand for Labuan coal and fifteen cargoes were exported in 1909. The output from the mines was 61,855 tons against 33,458 tons in the previous year. The Labuan Coalfields Company Limited, with a view to the quicker despatch in loading and bunkering, are at present erecting a transporter at Port Victoria by means of which they will probably be able to coal vessels at the rate of 140 tons per hour.

The lantern and apparatus for the new lighthouse on Papan Island arrived early in the year, and it is hoped to complete the construction of the building in 1910.

In the Police Magistrate's Court 228 persons were summarily convicted and 13 persons were committed for trial in the higher Courts. The figures for 1908 were not made up in the usual manner and are not available for comparison. As compared with those of 1907 the 1909 return shows an increase of over fifty per cent in the number of cases tried by the Police Courts, a similar increase in the number of defendants and an increase of almost one hundred per cent in the number convicted. The Magistrate inclines to the view that these figures indicate a more efficient Police force and not a greater state of lawlessness.

The total rainfall registered at the Hospital was 114 inches or 51·07 inches less than in 1908.

The mean shade temperature was 83·36.

CHRISTMAS ISLAND.

The revenue was $91,863.57 as compared with $74,222.37 in 1908. The expenditure was $16,394.60, an increase of $89.66 over that of the previous year.

The total tonnage cleared from the Port was 57,915 as against 50,738 tons in 1908.

Imports were valued at $85,680 and consisted almost entirely of plant and machinery for the phosphate company's works.

The only export was phosphate of lime. The total shows a decrease of 3,616 tons, being 105,481 tons as compared with 109,097 in 1908. Japan took only 5,200 tons as against 51,862 tons in 1908, on the other hand there was a large increase in the amount exported to Europe and Australia, and a considerable advance in the near future is anticipated.

The facilities for loading phosphate have been still further extended, and the steel piers and a third tramway line which were begun in 1908 have now been completed.

The population on the 31st December, 1909, was 1,170 and included twenty-two Europeans. The health of the inhabitants was good throughout the year. There were only eleven deaths,

and of these five were caused by drowning; so that although the actual death-rate was 9·69 per thousand the death-rate due to disease was very much less.

The conditions with regard to beri-beri continued to improve. There were two deaths from this disease and 58 new cases as compared with seven deaths and 101 new cases in 1908. When it is remembered that in 1901 there were 229 deaths from beri-beri, the present figures may be regarded as satisfactory and give grounds for hope that the disease may shortly be entirely stamped out.

The following figures giving the death-rates for the last six years are interesting :—

Year.	*1904.*	*1905.*	*1906.*	*1907.*	*1908.*	*1909.*
Death-rate per mille ...	116·43	19·98	28·5	12·27	14·93	9·69

There was no serious crime during the year. In all 145 cases came before the Court, but the majority of these were of a trivial nature.

The year 1909 was the wettest on record, the rainfall being 112·43 inches. The mean temperature was 80·308 ° *F.*

GENERAL.

Towards the end of the year a Commission was appointed by His Excellency the Governor to enquire into the administration of Municipal affairs in the Colony and to report on the advisability of making alterations in the constitution, powers and methods of administration and organization of the several Municipalities.

The Commissioners were Hon'ble J. O. ANTHONISZ, Treasurer (*ex* President, Municipal Commissioners), President of the Commission, Hon'ble W. EVANS, Resident Councillor, Malacca, (*ex* President, Municipal Commissioners), Hon'ble T. S. BAKER, M.L.C., Manager, Hongkong and Shanghai Banking Corporation, Hon'ble H. FORT, M.L.C., Advocate and Solicitor of the Supreme Court of the Straits Settlements, Mr. J. R. NICHOLSON, Chairman, Tanjong Pagar Dock Board, Mr. E. D. HEWAN, Manager, Messrs. Boustead & Co., and Mr. SEAH LEANG SEAH (former M.L.C.).

The report of the Commission is due in September, 1910.

A new treaty with Siam was signed in March, by which all her rights over the States of Kelantan, Trengganu, Kedah and Perlis were transferred from Siam to Great Britain. Advisers,

selected from the Civil Service of the Federated Malay States, were appointed to each State, and it is hoped that the development of these States, a matter of great interest to the trade of the Colony, will progress steadily and on sound lines.

Johore has also accepted assistance and Mr. D. G. CAMPBELL, late Resident of Negri Sembilan, has been at the request of the Sultan appointed British Adviser.

The Report of the Royal Commission on Shipping Rings appeared in May and was read with great interest in this Colony. The effects of these Rings, represented locally by the "Homeward Conference" and the "New York Conference," on the trade of the Colony is a matter which is occupying the serious attention of the Government, and legislative action will be taken in the year 1910 to relieve shippers from the demands of the "Ring" and to ensure the freedom from control and the fair rates which can alone be guaranteed by open and untrammelled competition.

The "boom" in Rubber has been one of the features of the year and has undoubtedly brought much prosperity to many of those interested.

In February, 1908, the price of para rubber had fallen to 2/9 per lb., but rising again in November and December, the year 1909 opened with 5/- per lb. This rose steadily to 9/8½ in November, and as a result new Companies were floated in large numbers and existing Companies extended their cultivation rapidly.

The export of Rubber from the Colony rose from 3,661,839 lbs. in 1908 to 4,507,675 lbs. in 1909, an increase of 377 tons.

In April, the patients in Tan Tock Seng's Hospital were removed to the fine new buildings in Moulmein Road which were erected at a cost of $481,134, a rate of $742 (£86-11-4) per bed.

Eighteen Wards with latrines and bathrooms, offices, operating theatre, morgue, Coroner's court, incinerator, septic tanks, water service with engine house, quarters for Medical Officer in charge, Assistant Surgeons, Dressers, etc., form an extremely fine Hospital completely equipped for the reception of 648 patients.

The site, covering nearly 30 acres, is on dry hilly ground and it is hoped will be better in every way than the old low-lying swampy land to which the institution, founded in 1845 by the munificence of a Chinese merchant, whose name it bears, and originally placed on a healthy site at Pearl's Hill, was transferred in 1857.

The year 1909 saw the end of the Excise Farms. Since the early years of the Colony the right to collect duty on liquors

and to prepare and sell opium for smoking has been put up for public tender and under various conditions farmed out to the most satisfactory tenderers.

The Government has always reserved to itself the right to regulate and supervise the conditions under which the business was carried on and the Commission appointed in 1907 to enquire into the whole question of opium smoking in the Colony was satisfied that the Farmers had in general conducted the business honestly and had not in any way endeavoured to push the sale of chandu or encourage the smoking of the drug. The Commission, however, was of opinion that it would be more satisfactory that Government should have complete control of the consumption of this drug and recommended the abolition of the Farm System and entire management by Government.

Towards the end of the year the Government Monopolies Department was formed and arrangements made for taking over not only the preparation and sale of opium but also the collection of duty on liquors, and at midnight on 31st December, the Farmers handed over premises, stock and utensils to the Superintendent of the Government Monopolies Department.

The Railway through Johore giving through communication between Singapore and Penang by way of Johore, Negri Sembilan, Malacca, Singapore, Penang and Province Wellesley was opened for public traffic in July. Being a new line over difficult country it was not surprising that traffic was temporarily interrupted more than once. The line, however, has already proved of great use and now that a steam Ferry Boat is used for the transport of loaded waggons across the Straits to Johore, the value of the line is greatly increased.

His Excellency the Governor (Sir JOHN ANDERSON, G.C.M.G.) went to England for the months of March, April and May, and the Colonial Secretary (Sir ARTHUR YOUNG, K.C.M.G.) acted as Officer Administering the Government. Mr. W. EVANS, Resident Councillor, Malacca, acted as Colonial Secretary.

W. EVANS,

Acting Colonial Secretary.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1910.

FINANCIAL.

The revenue for the year 1910 amounted to $9,336,328 being an increase of $541,327 over the revenue for the preceding year. The expenditure was $7,532,242, a decrease of $1,010,488.

The actual figures for 1909 and 1910 are shown in the following statements:—

A.—Revenue.

	1909.	*1910.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Port, Harbour, Wharf and Light Dues ...	158,944	259,331	100,387	...
2. Licences, Excise and Internal Revenue not otherwise classified ...	6,359,372	6,316,433	...	42,939
3. Fees of Court or Office, Payments for Specific Services, and Reimbursements in Aid ...	649,773	637,094	...	12,679
4. Post and Telegraphs ...	516,643	609,529	92,886	...
5. Government Railway ...	243,041	309,795	66,754	...
6. Rents of Govt. Property	441,992	451,474	9,482	...
7. Interest	140,431	115,480	...	24,951
8. Miscellaneous Receipts...	198,747	264,020	65,273	...
	$8,708,943	8,963,156	334,782	80,569
9. Land Sales	86,058	373,172	287,114	...
Total ...	$8,795,001	9,336,328	621,896	80,569
		Net increase ...	$541,327	

B.—EXPENDITURE.

	1909.	*1910.*	*Increase.*	*Decrease.*
	—	—	—	—
	$	$	$	$
1. Charge on account of the Public Debt ...	215,833	103,667	...	112,166

25. Government Monopolies	...	382,630	382,630	...
26. Botanical Gardens and Museum	43,133	37,770	...	5,363
27. Public Works Department	287,944	284,191	...	3,753
28. Public Works, Recurrent	461,499	448,653	...	12,846
29. Public Works, Extraordinary	793,909	508,249	...	285,660
TOTAL ...	$8,542,730	7,532,242	456,737	1,467,225
	Net decrease ...		$1,010,488	

2. The sums expended on Personal Emoluments and Other Charges in the two years were:—

		1909.	*1910.*	*Increase.*	*Decrease.*
		$	$	$	$
Personal Emoluments	...	3,005,509	3,012,741	7,232	...
Other Charges ...	...	1,809,466	1,783,622	...	25,844

3. The following is a statement of the Revenue and Expenditure of the Colony for the five years 1906 to 1910:—

		Revenue.	*Expenditure.*
		$	$
1906	...	9,618,313	8,747,819
1907	...	10,023,016	9,499,693
1908	...	8,969,015	9,837,624
1909	...	8,795,001	8,542,731
1910	...	9,336,328	7,532,242

4. The Assets and Liabilities of the Colony at the 31st December, 1910, were as follows:—

Liabilities.		$	*Assets.*		$
Deposits	... ...	1,551,845	Indian Agency Account	...	608,495
Suspense	... ...	1,039,350	Investments ...	...	1,627,464
Excess of Assets over Liabilities	...	4,939,314	Advances ...	...	363,898
			Imprests ...	...	7,618
			Loan Account ...	...	661,037
			Drafts and Remittances	...	26,722
			Cash in Transit	...	6,187
			Cash ...	...	4,229,088
TOTAL	...	$7,530,509	TOTAL	...	$7,530,509

showing an increase to the credit balance of the Colony during the year of no less than $1,804,086 in place of an estimated decrease of $703,176. The excess of revenue over the Estimates amounted to $1,392,652 and the savings on the estimates of expenditure to $1,114,610.

The excess of revenue over the Estimates was evenly distributed indicating a general return of prosperity; but it includes two items which were not estimated, viz., Petroleum Duty $204,220, and Profits on Investments $46,232. The first of these is a new source of revenue collected under an Ordinance which was not in force when the Estimates were drawn up and the latter resulted from the sale of certain gold investments in a favourable market.

The principal other excesses were Stamp Duties $255,595 and Premia on Land Sales $347,172 both of which may be attributed to the Rubber Boom and in addition there were excesses of $70,128 on the sale of Postage Stamps, $67,795 on the receipts of the Singapore Government Railway, $70,542 on the revenue from Opium and $146,514 on the revenue from Liquors—the last due to the duties being charged under a new scale according to the strength of the liquor. The principal saving on the estimates of expenditure was $317,333 interest on the 1907–08 Loan.

PUBLIC DEBT.

A Loan of £5,000,000 was raised in 1907 and a further loan of £2,750,000 was raised in 1910 under the provisions of Ordinance IV of 1907. The position of the loan on the 31st December, 1910, was as follows:—

		£
3½ per cent S. S. Inscribed Stock	...	6,911,231
4 per cent Debentures ...	...	1,032,200

Advances were made from Loan Funds as follows:—

		$
Tanjong Pagar Dock Board	...	35,243,774
Municipal Commissioners, Singapore		3,000,000
Municipal Commissioners, Penang ...		900,000
Government Harbour Works	...	5,691,484
		44,835,258
Expenses of Issue	...	4,052,100
Total	...	$48,887,358

Provision is made for the repayment of this loan by a Sinking Fund which will come into operation in 1917, ten years from the date of the first issue of debentures.

The charge on account of interest on the public debt was $1,608,865 in 1910, as against $1,614,307 in 1901. The great portion of this charge is, however, borne by the Tanjong Pagar Dock Board and other bodies to whom portions of the loan have been allotted. The actual sums paid by the Colonial Government in 1909 and 1910, respectively, were $215,833 and $103,667.

In local currency the total amount of the debt stood at $68,086,551 on the 31st December, 1910, which was more than

seven times the revenue of the Colony but only about three times the revenue of the Colony and the Tanjong Pagar Dock Board together.

EXCHANGE.

The demand rate remained firm during the year between 2/4$\frac{3}{16}$ and 2/4$\frac{1}{8}$.

CURRENCY.

The gold held by the Commissioners in Singapore at the beginning of the year amounted to £930. During the year gold to the value of £327,808 was received and issues of £43,300 were made, leaving a balance of £285,438 in the vault on the 31st December. In addition sums aggregating £868,917-9-0 were held by the Crown Agents in gold in London.

During the year sums amounting to £17,500 paid by JOHN AIRD & Co. and others to the Crown Agents were paid to their agents in Singapore by the Currency Commissioners at 2/4, the money received in London being applied in redemption of the debt of the Currency Commissioners to the Loan Account, and any profit and loss due to exchange being transferred to the Gold Standard Reserve.

The large $5 note and the first issue $1 note are being gradually withdrawn from circulation, all such notes being cancelled on their return to the Commissioners.

The currency of the Colony, in circulation exclusive of subsidiary coins, consisted of $34,583,460 in Government currency notes, $396,488 in bank notes issued by the Hong Kong and Shanghai Banking Corporation and the Chartered Bank of India, Australasia and China, and $7,573,326.50 in dollars and half-dollars. The above amounts include stocks held by the Banks and the Treasuries of the Colony and the Federated Malay States, but do not include unissued currency notes still in the hands of the Currency Commissioners.

Old subsidiary silver coin of the face value of $50,353.50 was sent to Bombay during the year to be reminted. The new coins are of a fineness of 600. The profits from reminting this coin will be credited to the Gold Standard Reserve. During the year $2,441,936.65 worth of the new coins were received from Bombay.

The average bank-note circulation in 1910 was $459,615, as compared with $750,232 in 1909. The average amount of

Government currency notes in circulation in 1910 was for each month :—

	$		$
January ...	30,032,182	July ...	32,507,199
February ...	29,958,902	August ...	32,909,376
March ...	30,279,758	September ...	33,935,660
April ...	30,654,087	October ...	34,448,747
May ...	30,871,050	November ...	34,638,326
June ...	31,991,490	December ...	34,735,779

The Assets and Liabilities of the Currency Commisssioners on the 31st December, 1910, were as follows :—

Liabilites.	$	*Assets.*	$
Deposits	36,343,474	Cash in Reserve ...	21,328,021
		Investments	15,015,453

Dindings	12,342	15,190
Malacca	89,637	151,333

TANJONG PAGAR DOCK BOARD.

The revenue and expenditure for the five years 1906–1910 were as follows :—

	Revenue.		*Expenditure.*	
	$	c.	$	c.
1906 ...	5,617,784	92	4,097,428	62
1907 ...	6,145,579	25	4,484,476	20
1908 ...	5,822,811	69	4,271,715	37
1909 ...	5,849,063	00	4,267,797	27
1910 ...	5,896,156	52	4,328,184	47

The capital debt due to Government including an estimated amount of $29,003,149.45 for initial cost stood at the end of 1910 at $35,399,150.25 on which the Board pays interest at 4 per cent. It is intended to fix the capital debt by Ordinance at an early date.

In addition to the above-mentioned capital the Board has expended on new works and other expenditure of a permanent nature a sum of $2,687,206.93 from surplus revenue or reserve fund under Section 31 (2) of "The Tanjong Pagar Dock Ordinance 1905."

The following figures are taken from the Wharf Tonnage returns :—

	1906.	*1907.*	*1908.*	*1909.*	*1910.*

Cargo inwards and outwards ...	1,150,527	1,270,285	1,088,527	974,016	1,305,014

NEW WORKS AT TANJONG PAGAR.

The progress of the Works on the Lagoon Wet Dock and Re-construction of the Wharves at Tanjong Pagar was much delayed during the year by the questions which arose between the Contractors and the Dock Board in connection with the construction of the Walls at the Eastern and Western Ends of the Lagoon Wet Dock. Towards the end of the year work on the Lagoon Dock was almost entirely suspended, and the number of men at work on the Main Wharf Re-construction was very much reduced.

The South Wall of the Dock and the Eastern Entrance Wall within the Cofferdam were completed for a length of 2,210 feet; this involved the depositing of 16,790 Cubic Yards of concrete during the year, making a total of 66,250 Cubic Yards to date.

A total of 322,950 Cubic Yards of excavation was removed from the body of the Dock during the year, leaving 575,250 Cubic Yards to be dealt with. The material excavated was utilized for reclaiming the Swamp areas to the Northward of the Dock, and the area behind the completed portions of the South Wall and the Re-construction of the Main Wharf.

The diversion of the Keppel Road between Borneo Wharf and Anson Road was completed with the exception of the junction at the Western End which was made early in 1911 and the New Road opened to traffic.

A quantity of old piles forming the Old Wharf were cleared away across the Entrance to the Lagoon Dock, and the Blockwork Wall on the Eastern side brought up to above L. W. O. S. T. for a length of 90 feet.

The Re-construction of the Western End of the Main Wharf to the extent of 500 feet of concrete Blockwork Wall was completed and handed over to the Dock Board in April, a further length of 740 feet extending from the completed portion to the Entrance of the Lagoon Dock, and consisting of Wrought Iron Cylinder Construction, was in an advanced state, at the end of the year. 2,800 tons of Iron and Steelwork have been placed in this work up to date, and there is a stock of 3,159 tons on the ground. A total quantity of 10,703 Cubic Yards of concrete filling to the Cylinders was deposited during the year, and in the Dwarf Wall at the back of the Cylinders 930 Cubic Yards of concrete blocks have been set and 18,500 Cubic Yards of Granite rubble deposited.

A total quantity of 88,300 Cubic Yards of granite was delivered on the Works from the two Quarries at Bukit Timah, but these Quarries were closed down by the Contractors in August and October, pending the settlement of the questions between the Contractors and the Board.

A total amount of £367,300 had been paid to the Contractors on account of work done up to the end of 1910, out of which the sum of £112,000 was for work executed during 1910.

The average number of men employed on the Works and at the Quarry was reduced from 3 100 in May to 630 in December.

Progress with the construction of the New Graving Dock at Keppel Harbour was well maintained, during the year 109,330 Cubic Yards of excavation have been removed from the Body of the Dock, and the excavated material utilized partly for reclaiming the area on the East side of the Dock and partly for filling in the Swamps in the neighbourhood of Bukit Chermin.

The concrete Side-Walls at the North End of the Dock were brought up to the underside of the granite coping for a length of 88 feet on each side. At the South End the lower portions of the Side-Walls were completed for the lengths of 350 feet and 247 feet from the Outer Entrance on the East and West Walls respectively, and the concrete Floor between them was well in hand. The total quantity of concrete deposited in the above portions of the work during the year was 19,370 Cubic Yards.

The excavation for the foundations of the Pumping Station was completed and 3,520 Cubic Yards of concrete deposited in this work during the year.

The temporary Staging for the construction of a portion of the Western Entrance Wall outside the Cofferdam was in course of erection at the end of the year and the excavation of the foundations in progress.

A block-making Yard was laid down at Bukit Chermin and 2,820 Cubic Yards of concrete blocks and 12,600 Cubic Feet of moulded concrete Ashlar were made and stacked ready for use.

During the year two shipments of Cornish Granite Ashlar for the Outer and Inner Entrances, Caisson Stops, Copings, etc., were delivered and stacked on the works ready for use, the total quantity on the ground being 54,850 Cubic Feet.

A total quantity of 27,450 Cubic Yards of Granite Rubble was delivered on the works from Quarry at Pulau Ubin, during the year. The average number of men employed on the works and at Quarry was 935.

A total amount of £102,300 had been paid to the Contractors for work done up to the end of 1910, out of which the sum of £63,800 was for work executed during 1910.

GOVERNMENT WHARVES, PENANG.

During the year, the piling, including the bracing, of the Southern Extension (255 feet) of Swettenham Pier was practically completed and the decking, etc., has since been finished.

The piling of an over-water godown, which will have a capacity for storage of 20,250 square feet was commenced on the site between the Northern Arm of the Pier and the godowns on the Quay Side. This work is making good progress.

The fleet of lighters numbered 91. During the year 42 lighters were repaired at a cost of $22,308.

The profit on Revenue Account at Prai Dock for the year 1910 was $26,292.91.

The profit on Revenue Account of Government Wharves, Penang, for the year 1910 was $108,024.32.

TRADE.

The trade of the Colony in 1910 was fairly satisfactory.

Compared with 1909 foreign imports of merchandise rose by 5·2 million pounds sterling or 14¾ per cent, and exports by 4·6 million or less than 15 per cent.

Prices were higher than in the previous year but quantities also generally advanced.

The foreign trade of the Colony shows in thousands of pounds sterling :—

		1909.	*1910.*	*Increase.*
		—	—	—
Merchandise—		£	£	£
Imports	...	35,153	40,343	5,190
Exports	...	31,208	35,852	4,644
Coin and Bullion—				
Imports	...	1,405	2,179	774
Exports	...	1,597	1,970	373

The value of the coasting trade including treasure was in thousands of pounds sterling :—

		1909.	*1910.*	*Increase.*
		—	—	—
		£	£	£
Imports	...	1,749	2,439	690
Exports	...	1,548	2,273	725

The aggregate gross trade was therefore £85 million pounds an increase of £12·4 million compared with 1909 or 17·1 per cent.

Distributed according to classes the foreign trade shows in thousands of pounds sterling :—

	Imports.		*Exports.*	
	1909.	*1910.*	*1909.*	*1910.*
	£	£	£	£
1. Live Animals, Foods, Drinks and Narcotics	13,912	15,762	12,629	13,368
2. Raw Materials ...	14,523	16,423	14,827	18,614
3. Manufactured and Partly Manufactured Articles ...	6,718	8,157	3,752	5,869
4. Coin and Bullion ...	1,405	2,179	1,597	1,971
Total ...	36,558	42,521	32,805	37,822

Opium nearly doubled in price and with cotton piece goods, spices, sago, tapioca, tobacco, live animals, metals, hardware and ironware, liquors, silk piece goods, cycles and motor cars, hosiery, etc., and salted fish accounted for the principal increased import values.

Enhanced values were seen in exports of copra, Para rubber, tin, rubbers, opium, phosphates of lime from Christmas Island, and shells, but rice, preserved pineapples, tanned hides, coffee, fish, and swine all gave decreases.

QUANTITIES.

Increased import quantities are seen in rice, spirits, malt liquors, fish, cattle, swine, milk, onions and garlic, coal, lubricating oil, cotton and silk piece goods, sarongs, woollens, corrugated iron, steel, cement, and soap, and declines in padi and bran, wheat flour, sugar, tin ore, petroleum, cotton blankets, and bar iron.

Export quantities rose in copra, jelutong rubber, arecanuts, gutta percha, Para and Borneo rubbers, shells, white pepper, and gum copal, and declines are observed in sago, tapioca, preserved pines, tin, oil cakes, gambir, black pepper, and coffee.

Trade with British and Foreign Countries.

The trade with the United Kingdom, British Possessions and Protectorates, and Foreign Countries including coin and bullion records in millions of dollars :—

	Exports.					
	1909.	*1910.*	Percentage of Difference.	*1909.*	*1910.*	Percentage of Difference.
	$	$	$	$	$	$
United Kingdom ...	33·4	39·2	+ ·2	64·2	87·3	+ 4·1
British Possessions and Protectorates	149·8	188·6	+ 3·9	85·4	91·6	— 2·1
Foreign Countries...	130·2	136·7	— 4·1	131·6	145·3	— 2

Imports of merchandise from the United Kingdom rose by over three-quarters of a million sterling, and exports £2·1 million.

The following statement shows the possession as a market for British and European Foreign goods since 1896 in thousands of pounds sterling :—

	1896 to 1900.	*1901 to 1905.*	*1906 to 1910.*	*1910.*
From United Kingdom ...	£2,981	3,752	4,012	4,491
„ Continent of Europe and United States ...	£1,541	2,314	2,208	2,360
British Excess ...	£1,440	1,438	1,804	2,131
Percentage of Total.				
United Kingdom ...	65·7	61·9	64·5	65·6
Continent of Europe and United States ...	34·3	38·1	35·5	34·4

The articles which gave the largest increased values from the United Kingdom were cotton piece goods and hosiery, motor cars and cycles, hardware and ironware, tobacco, cigars and cigarettes, yarns and sarongs, provisions, malt liquors and biscuits, declines being apparent in coal and machinery.

Advances from the Continent were seen in paper and stationery, cabinetware, and hardware from Austria; hardware, glassware, and yarns from Belgium; brandy from France; milk, cotton piecegoods, sarongs, and hosiery from Italy; hardware and ironware, hosiery, woollen cloth, crockery, beer, lampware, and machinery from Germany; cotton piecegoods, sarongs, and hardware from the Netherlands; and matches from Sweden.

The declines were generally not important: cement and yarns from Austria; milk, paints, and wire nails from Germany; and gin and crockery from the Netherlands being the principal reductions.

From the United States, cigars and cigarettes, lubricating oil, hardware and ironware, machinery, tools, and tinned provisions gave increases, imports of tallow and lard showing declines.

Exports to the United Kingdom accounted for the total increase in such articles as tin, Para rubber, gutta percha, sago, copra, Borneo rubber and jelutong, the decline being in gambir, preserved pines, tapioca, and illipi nut.

Copra to the Continent exhibited a large increase, tin, pepper, jelutong, and gambir following, while sago and Para rubber gave less values.

To the United States a total decrease is recorded, tin falling off enormously, jelutong and Para rubber alone showing fair advances.

Increased trade is recorded with Australia, India and Burma, Japan, Netherlands India, Hongkong and China, British North Borneo, Sarawak, and the Malay Peninsula.

Decreased import values are noted from French Indo-China and a fall in exports to Siam and Siamese States.

AGRICULTURAL INDUSTRIES.

The cultivation of Para Rubber trees in Singapore showed no sign of decrease, but on the contrary more and more land was cleared and planted, so that the area under cultivation was at the end of the year about 14,000 acres.

The planting of this tree in every corner even in quite unsuitable localities and in small patches caused a remarkable diminution in the supply of vegetables, fruit, poultry and even pigs, many Chinese abandoning other occupations to plant rubber. The fruit crops during the last few years have been very poor probably from the dying out of the old trees and the failure to plant fresh ones; and there are no signs of any improvement. This is

regrettable as most of the fruit trees take from seven to 12 years to produce a crop. There has been a little improvement in vegetable cultivation but supplies are still short.

Gambir has increased a little. Indigo and pine-apples have also increased a little. Ground-nuts are again coming to the front and there has been a distinct increase in this formerly neglected cultivation. There is a small increase in flower cultivation, roses, jasmines, and tuberoses being the favourites. The water hyacinth *eichornia* originally introduced as ornamental plant has been found by the Chinese to be quite suitable for pig feeding and is now much used for that purpose.

There is no increase in pepper, nor in coconuts. In the latter case this is perhaps due to the ground suitable being already planted up. The red beetle formerly so injurious to this industry seems now to be nearly extinct; but occasionally a few trees are killed by the black beetle.

A very successful Agricultural Exhibition was held during the year.

In Penang the fruit and padi crops were good and in Province Wellesley coconuts were very successful and large areas of rubber are coming into tapping.

In Malacca the planting of rubber proceeded apace and several blocks of lalang land were taken up for this cultivation. The fruit and padi crops were fair. The decrease in tapioca cultivation continues.

LAND GRANTS.

The area of Crown Land alienated, and the number of Statutory Grants issued and the premia paid for the same during the last five years are as follows:—

From the above table it will be seen that the following countries show an increased tonnage, entered and cleared, in 1910 as compared with 1909:—Great Britain 1,030,234; Germany 140,754; Russia 84,618; Italy 47,830; Denmark 31,949; Austria 23,408; Siam 51,745; and Norway 24,211.

The following countries show a decrease:—

Japan 149,537; Holland 18,924; Sweden 28,642; Spain 3,178; and France 355.

Comparative Statement of Merchant Vessels Inwards and Outwards for last Five Years.

	*1906.**	*1907.*	*1908.*	*1909.*	*1910.*
Total tonnage Entered and Cleared ...	19,711,498	20,328,760	21,750,245	22,192,354	23,429,495

It will thus be seen that the tonnage as compared with 1906 has increased by 3,717,997.

Native Craft and Steamers under 50 Tons.

	1909.		*1910.*	
	No.	*Tons.*	*No.*	*Tons.*
Arrivals ...	17,505	675,762	19,486	765,881
Departures ...	17,512	671,439	19,522	763,716
Total ...	35,017	1,347,201	39,008	1,529,597

The increase as compared with 1909 is 182,396 tons.

Comparative Statement of Tonnage of Native Craft and Steamers under 50 Tons Entered and Cleared, for last Five Years.

	*1906.**	*1907.*	*1908.*	*1909.*	*1910.*
Total tonnage Entered and Cleared ...	1,484,801	1,464,048	1,455,436	1,347,201	1,529,597

As compared with 1906 this native craft tonnage has increased by 44,796 tons.

In Singapore during the year five new steamers with a tonnage of 156 tons gross and 16 sailing vessels of 1,779 tons were registered under the Imperial Shipping Acts. Twelve new sailing vessels of 723 tons were registered under Ordinance V of 1883; also 956 of 8,215 tons under Ordinance VIII of 1872.

* Labuan not included.

LEGISLATION.

Thirty-two Ordinances were passed during the year, of which seventeen were principal Ordinances and fifteen amending Ordinances.

Of the principal Ordinances the most important were:—

The Merchant Shipping Ordinance;

The Criminal Procedure Code;

The Hospitals Board Ordinance;

The Emigration Ordinance;

The Deleterious Drugs Ordinance;

The Divorce Ordinance; and

The Freight and Steamship Ordinance.

The Merchant Shipping Ordinance amends and consolidates the whole of the law relating to shipping and repeals over thirty Ordinances of the Colonial Legislature and several Indian Acts which had continued in force in this Colony and embodies with modifications necessitated by local conditions the provisions of the Imperial Merchant Shipping Acts.

The Criminal Procedure Code re-enacts with the additions and amendments which have from time to time been found necessary the Code of 1900.

The Hospitals Board Ordinance constitutes a new body corporate consisting of four official members and five unofficial of whom three are to be nominated by the Governor and two elected by the Unofficial Members of the Legislative Council. The duties of the Board are to determine subject to the approval of the Governor in Council the fees to be collected in Government Hospitals and Asylums and receive such fees and subject to the like approval disburse all monies available for hospital purposes whether collected in the form of fees, subscribed by the public or voted by the Council from public revenue and the Board is to submit annual estimates of revenue and expenditure and generally advise the Government on any matters connected with hospitals and asylums which may be referred to it.

The Emigration Ordinance repeals the Crimping Ordinance 1896 and provides safeguards against the emigration from the Colony of Asiatic labourers (whether settled in the Colony or who have come to the Colony from elsewhere) to places outside the Colony and the Federated Malay States except under conditions intended to secure that they understand where they are going and the terms of their employment. Power is given to the Governor in Council to prohibit or impose special conditions on emigration to unhealthy places or places where proper measures are not taken for the protection of the health of the labourers,

for securing their proper treatment and for enforcing the observance by the employer of the terms on which the labourers are engaged.

The Deleterious Drugs Ordinance constitutes a further step in the direction of the suppression of the use of morphine, cocaine and the like drugs except when duly prescribed by a medical practitioner and vests the exclusive right of importing and exporting these drugs in the Principal Civil Medical Officer.

The Divorce Ordinance gives the Supreme Court jurisdiction in divorce and matrimonial causes in cases where the petitioner professes the Christian religion and to grant dissolution of marriage and judicial separation where the parties are domiciled at the time of the petition in the Colony and decrees of nullity where the marriage was celebrated in the Colony.

The relief is to be given in all cases on principles as nearly as may be conformable to the principles on which the High Court of Justice in England gives relief in such cases.

The Freight and Steamship Ordinance was passed to place the Government in position to extend assistance to shippers to enable them to free themselves from the dictation of the Conferences of Steamship Owners which controlled the rates of freight from the ports of the Colony, by placing a prohibitive duty on all bills of lading with power to the Governor in Council to exempt from such duty on proof that the steamship owner was not a party to any agreement or understanding designed for or having the effect of maintaining rates of freight at an unduly high level or regulating or controlling rates of freight in a manner injurious to the trade of the Colony.

Other Ordinances which deserve particular mention are The Counterfeit Coin Ordinance which following the English Coinage Offences Act of 1861 authorizes the defacement of coins suspected to be diminished or counterfeit, The Prisons Ordinance Amendment Ordinance which provides for the establishment of a Central Registry for the Colony and the Federated Malay States for the registration and classification of finger prints of criminals, The Lepers Ordinance Amendment Ordinance which carries out certain recommendations of the International Scientific Conference on Leprosy at Bergen in 1909, The Chinese Immigrants Ordinance Amendment Ordinance which provides that every written contract to labour entered into by such immigrant shall be to labour for a certain number of days not exceeding 300, and the Ordinance for the incorporation of the new Kwong-Wai-Shiu Hospital—a hospital established by Chinese liberality for the treatment and maintenance of sick and indigent Chinese from certain prefectures at which it is intended to employ concurrently both Chinese and European methods of treatment.

EDUCATION.

There are in the Colony 180 vernacular schools where the teaching is in Malay. Free tuition up to the Fifth Standard is provided by the Government at these schools to some eleven thousand eight hundred boys and girls. The Government also finances and controls eight schools where the teaching is in English and goes up to the Seventh Standard.

There are also thirty-two aided-schools managed by private bodies and in receipt of grants-in-aid from Government.

The net expenditure on Government English schools was $83,679.36 on aided-schools (English, Anglo-Tamil, Tamil and Chinese) $101,439.50, and on Government vernacular schools, $99,293.27.

The Malacca Training College for Malay Teachers continued to do good work. Its cost, during the year under review, was $9,089.29. The supply of trained teachers from the institution is still, however, below the demand and is likely to remain so for some years to come.

The Director of Education reports a falling off in the numbers in the higher classes at the English schools which he attributes to the ease with which boys with a slight knowledge of English can obtain employment; and for the same cause few of those who enter the Commercial Classes remain for the full course.

The Normal Classes are reported to be doing excellent work.

The expenditure on Education is now supervised by an Education Board and the funds available for the purpose have been supplemented by the imposition of an Education Rate which is collected by the Municipalities and Rural Boards.

The extension of female education which is almost confined to Europeans and Eurasians is one of the greatest needs of the Colony.

GOVERNMENT INSTITUTIONS.

HOSPITALS.

All the public hospitals of the Colony are under Government management. A certain number of hospitals are maintained on estates under the provisions of the Labour Ordinances in force for various classes of immigrant labour, and these are under Government supervision. Towards the end of the year a Hospital Board was constituted the duties of which have already been mentioned under the heading Legislation. The total number of admissions to hospitals, exclusive of the Lunatic Asylum, was 32,979, as

against 27,543 in 1909. Two hundred and twenty-eight patients were admitted into the Lunatic Asylum, Singapore, as against 220 in 1909.

The number of patients treated in the hospitals was 35,684 of whom 1,463 were Europeans. In 1909 the corresponding numbers were 30,266 and 1,398 respectively. Deaths numbered 4,529 (64 being Europeans), as against 3,635 and 70 in 1909. The rate of mortality shows a rise, the figures being, for 1909, 12·01 and, for 1910, 12·69 per cent of the total cases treated.

The number of inmates in the Leper Asylums of the Colony decreased from 483 on the 31st December, 1909, to 440 at the end of the year under review. The number of deaths for 1910 being 209.

Reformatory.

The expenditure of this institution, exclusive of the salaries of the Superintendent and Warders, was $9,172.61 in 1910, as against $8,587 for the preceding year. The average daily muster was a little higher, the actual figures being, 1909, 66·49, in 1910, 68·37. There remained 69 boys on the 31st December. The health of the inmates was good. They are taught English and romanized Malay. The boys make bread and grow vegetables, for their own consumption, and are taught other trades, such as carpentering, tailoring and shoemaking, which may be useful to them on release.

Savings Bank.

There are no private Savings Banks in the Colony. The amount at the credit of the depositors in the Government Savings Bank on the 31st December, 1910, was $674,003, the highest sum reached. The average amount at the credit of each depositor was $156.31.

The deposits were $509,361, as compared with $469,854 in 1909.

The withdrawals exceeded the deposits by $15,655.

There was a profit on the year's working of $3,424.49. The present value of the investments is as follows:—

	$
India 3½ per cent Rupee Paper ...	418,009
Singapore Municipal Bonds at 5 per cent	64,670
Do. do. at 4½ ,,	15,975
Do. do. at 4 ,,	63,693
Fixed Deposits in Banks	35,000
Various 3 per cent Colonial Guaranteed and Corporation Stocks	65,525
Total ...	$662,872

There was also a balance of $13,225 at the credit of the Savings Bank on the 31st December, 1910, in current account with the Chartered Bank of India, Australia and China.

POLICE.

The Police Force numbers over 2,500 men, of whom 378 are Sikhs.

Fifty-four boys joined the Training Depôt at Malacca in 1910, of whom 45 were drafted into the Force.

Three hundred and seventy-two recruits joined the Force during the year, of these 17 were Europeans and 36 Sikhs.

PRISONS.

The daily average number of prisoners in the various prisons during 1909 and 1910 was as follows:—

		1909.	*1910.*
Singapore ...	Criminal ...	952	877
	Civil ...	114	73
Penang ...	Criminal ...	221·64	255·79
	Civil ...	30·54	29·46
Malacca ...	Criminal ...	22·88	33·32
	Civil ...	4·95	8·57

The practice of banishing habitual criminals (643 in 1910) has been continued.

The health of the prisoners was good, the number of deaths being: at Singapore 32, at Penang 14 and at Malacca nil.

CRIMINAL STATISTICS.

Thirty-eight murders and thirty-five gang robberies were reported during the year, of the latter 13 were proved in the preliminary investigation to be false.

The returns do not disclose any abnormal features.

One hundred and sixteen persons as against 118 in 1909 were tried before the Supreme Court. Murder, gang robbery and counterfeiting coins, were the principal crimes. Eighteen persons were convicted of returning from banishment. The lower Courts had to deal with a smaller number of cases than in the previous year. The total number disposed of was 18,683, a decrease of 113 cases over the figures for 1909.

VITAL STATISTICS.

The estimated population of the Colony was 653,853 as compared with 636,691 for 1909, the figures given by the Census of 1901 being 572,249. Eighteen thousand and twelve births and 27,484 deaths were registered as against 16,994 and 24,122, respectively.

The death-rate was 41·88 per mille of the population. The rate in 1909 was 37·40 and in 1908, 43·06.

The birth-rate was 27·55 per mille, compared with 26·63 in 1909.

The deaths from the more important infectious disease in 1910, excluding imported cases landed on, or occurring amongst contacts on, the Quarantine Islands, were as follows:—

Small-pox: 522 as compared with 11 in 1909.

Cholera: 247 as compared with 76 in 1909.

Plague: 5 as compared with 5 in 1909.

Beri-beri accounted for 1,737 deaths, 231 more than in the previous year. The use of cured rice in the Hospitals and Gaols, has been continued and has very considerably lessened the death-rate from this disease in these institutions.

Phthisis shows a decrease, there being 2,571 deaths from this disease, against 2,659 in 1909.

The deaths from dysentery (1,329) and malaria (3,300) show an increase. The figures for 1909 were 1,211 and 2,589 respectively.

It will be seen that with the exception of phthisis all the more important diseases specially affecting the population of the Colony claimed a larger number of victims than in the previous year, the increase in the case of small-pox, cholera and malaria being very great. The increases are no doubt in the main due to the great impulse that was given to immigration by the demand for labour on newly opened estates both in the Colony and the adjoining States and the consequent circulation and movement of labourers from place to place but cannot, nevertheless, be regarded as otherwise than unsatisfactory.

The legislation which has been introduced for enabling a stricter control to be kept on the sanitary conditions on estates, and the measures which are being taken for the sanitary improvement of the principal towns combined with a return to more normal conditions will it is hoped result in more satisfactory records in future years.

CLIMATE.

The mean temperature of the air in Singapore was 80·7° with a maximum of 92° on December 5th and a minimum of 71·5° on March 7th: that of Penang being 80·7° the highest temperature recorded being 95° May 14th, the lowest 63° on October 18th.

In Province Wellesley the mean temperature was 81·2°: the maximum being 96·5° on May 31st, the minimum 69° on January 31st. In Malacca the mean temperature was 80° with the maximum of 92° on January 16th and June 10th, the lowest 67° on June 17th. In Labuan the highest temperature recorded was 93° and the lowest 72°.

Rainfall:—Singapore	...	...	128·93 inches.
Labuan	...	...	151·25 „
Penang	...	...	108·46 „
Province Wellesley		...	103·38 „
Malacca	...	...	76·54 „

The prevailing direction of the wind changes with the N. E. and S. W. Monsoons. The former blowing from November to April and the latter from May to October.

Notwithstanding the high death-rate (41·88 per mille for 1910) of the general populace, the climate must be considered fairly healthy for Europeans, the death-rate among whom was 12·18 per mille. It must be remembered, however, that amongst the Europeans, most of whom are picked lives, there are few very old and but a small percentage of children. Moreover, when ill, Europeans, as a rule, leave the Colony as soon as possible.

POSTAL, TELEGRAPH AND TELEPHONE SERVICE.

The chief events of the year were the reduction of the commission on inland money orders and money orders drawn on the Federated Malay States, Kedah, Kelantan and Brunei from 1 to ½ per cent., the introduction of a telegraph money order system for inland money orders and money orders exchanged with the Federated Malay States and the extension of the Cash-on-Delivery system to the Federated Malay States. The Cash-on-Delivery system to the Federated Malay States has been of great service to the public and is being largely taken advantage of. The number of postal articles (excluding parcels) posted in the Colony was 7,098,885, an average of 12·2 per inhabitant. The number received for delivery was 6,151,352. The postal

revenue increased by 14 per cent. The number of messages transmitted over the Government telegraph lines increased from 133,261 to 218,102, and the number of subscribers to the Government telephone exchanges from 358 to 389.

IMMIGRATION.

(1) CHINESE.

Immigrants from China during the year 1910 numbered 216,321, against 151,752 for the year 1909, an increase of 42·5 per cent. In only two previous years has the number of immigrants been greater, viz., in 1903 when 220,321 arrived and in 1907 when the record number of 227,342 arrived.

2. Adult females to the number of 16,395, arrived in Singapore during the year 1910, an increase of 35·2 per cent over the figure for 1909: the proportion of females to males is 8·8 per cent as against 9·9 per cent in the year 1908 and 9·5 per cent in the year 1909.

3. One thousand seven hundred and nineteen infants of one year of age and under arrived in the Colony, against 1,156 in the year 1909: of these 393 male and 360 female children are believed to have been added to the population of Singapore, the balance having been reported as leaving for other ports.

4. The number of "unpaid passengers," *i.e.*, labourers who obtain free passages from China in consideration of entering into contracts for service on arrival in the Colony was 23,935, an increase of 10,556 or 44·1 per cent over the number for the previous year: this figure has only once been exceeded in recent years. These "unpaid passengers" formed 11 per cent of the total arrivals, or 12·9 per cent of the total adult male immigrants.

5. *Harvests* were exceptionally poor throughout South China, and the demand for labour in the Colony and its neighbourhood was very great.

6. The totals for the last five years are as follows:—

Year.		*Men.*	*Women.*	*Children.*	*Total.*
1906	...	153,624	12,478	10,485	176,587
1907	...	197,284	16,265	(*a*) 13,793	227,342
1908	...	129,913	12,909	(*b*) 10,630	153,452
1909	...	128,878	12,126	(*c*) 10,748	151,752
1910	...	184,856	16,395	(*d*) 15,070	216,321

(*a*) Boys, 10,377; Girls, 3,416. (*b*) Boys, 7,767; Girls, 2,863. (*c*) Boys, 7,946; Girls, 2,802. (*d*) Boys, 11,522; Girls, 3,548.

(II).—INDIAN.

The figures for the last five years are appended :—

	1906.	*1907.*	*1908.*	*1909.*	*1910.*
1. Statute Immigrants ...	3,674	5,499	5,456	4,119	2,523
2. Free Coolies (with aided tickets) ...	20,215	24,709	20,049	20,289	56,002
3. Other Immigrants ...	28,152	31,922	29,017	25,409	25,198

The figures for 1910 include 5,366 children.

Thirty-seven thousand eight hundred and twenty-nine adults and 1,251 children left the Colony for Southern India.

The large increase in the number of immigrants from Southern India of the free coolie class is due to the requirements of the rubber planting industry. Of the agricultural labourers who came over about 16·7 per cent were women.

MONOPOLIES.

The Opium Monopoly took over the Farms in Singapore, Penang and Malacca as from January 1st, 1910, preparations to that end having been started at the end of September, 1909, the necessary staffs all being engaged. The Factories at Singapore and Penang were both Government buildings and cooking operations were started in November, 1909. In addition to supplying the Colony, the Department also arranged to supply the districts included in the Perak, Selangor and Negri Sembilan coast Farms, and also the State of Johore.

During the year 1910, 3,175 chests of opium, Persian and Benares, were delivered at the Department, yielding 3,300,000 tahils of chandu. The prices of raw opium showed great fluctuations. In October, 1909, when the Department first bought opium the price was $920 per chest. Between April 8th and 11th, 1910, the price was $2,325, and on December 31st was $1,800.

Owing to the rise in the price of raw material during the early part of the year, the price at which the Government sold to the licensees was raised. Before the alteration Government sold at a price varying from $3 to $3.30 per tahil and after the alteration at a price between $4.30 and $4.36 per tahil (1 tahil= 1⅓ oz.).

Independent of chandu sent to places outside the Colony the total tahils sold in the three Settlements amounted to 1,651,657 of which 62½ per cent was sold in Singapore and total cash received in the Colony for above sales amounted to $6,612,918.54.

The Department also undertakes the collection of duty on intoxicating liquors, the amounts collected in the three Settlements being as follows:—Singapore $757,340.46, Penang $513,130.59 and Malacca $133,624.90. The duty is charged according to the strength, the rates varying according as the strength lies between certain limits.

During the year 1910, 634 prosecutions for offences against the Chandu and Liquors Revenue Ordinances were instituted, as well as 66 cases under "The Deleterious Drugs Ordinance." Seizures were made of contraband amounting altogether to 5,021 tahils of opium, 16,969 tahils of chandu, 2,062 oz. of cocaine, 366½ oz. of morphia.

PUBLIC WORKS.

SINGAPORE.

Among the public works completed during the year were the new Dispensary, North Canal Road; additions and alterations to old Import and Export Office for General Post Office; installation of Electric Fans to Government Offices and electric motors to Public Works Department Lithographic Office; New Police Barracks, St. John's Island; Special Services to New Currency Note Vault, Day Vault and Expense Vault at the Treasury; general repairs to steam dredger "Mudlark"; quarters for Assistant Curator, Botanic Gardens; new Armoury at Beach Road for the S. V. I. Chinese Contingent; dredging and reclamation of swamps, Singapore River; re-roofing Lower Tanglin Vernacular School and Alteration to Kalang Vernacular School; Cottage for European patients at the Lunatic Asylum, Pasir Panjang; new play-shed at Outram Road School; filling and raising ground between Albert, Bencoolen, Rochore and Waterloo Streets; filling in and reclaiming swamp opposite General Hospital; filling and raising ground at Peoples' Park, between New Bridge Road and the Railway.

No new roads or bridges were constructed during the year. The Country roads, bridges and culverts were maintained in good order throughout the year.

PENANG.

The principal works taken in hand and completed were: removal of coolie lines and quarters on Penang Hill from the catchment area; improving and thoroughly overhauling the Police Courts; the rebuilding of the Chinese Protectorate; and improving the Chamber of Commerce buildings.

The alteration and extension to the Indian Immigration Depôt was also taken up but not quite finished at the end of the year. The works in connection with the new Quarantine Camp, Pulau Jerejak, were nearing completion.

The only bridge worthy of notice taken in hand was that at Sungai Korok in Balik Pulau and which owing to the unfavourable nature of the subsoil showed poor progress.

PROVINCE WELLESLEY.

Bridges.—One new bridge constructed departmentally (viz.: a new reinforced concrete of 30 feet span over Sungai Kechil) at a cost of $3,491.72. The wooden decking of one bridge at Permatang Ara was renewed in ferro-concrete. The abutments of four small culverts on Bukit Serayah Road were extended and the roadway widened.

All iron bridges were painted with Siderosthen paint and wooden bridges with tar during the year.

The reconstruction of the pontoon bridge at Bagan Serai could not be started in 1910 owing to the non-arrival of materials ordered through the Crown Agents.

Canals.—The principal canals cleared during the year were Sungai Jarak between Tasek Glugor and Sungai Kulim, Machang Bukok river, Sungai Lokan and Tebing Tinggi canal.

Drains.—A length of 830 lineal feet of new concrete drain was constructed at Butterworth and a length of 360 feet of concrete drain along High Street, Nibong Tebal, was regraded.

Jetty.—The construction of a reinforced concrete Pier Head and the renewal of the jetty at Bagan Tuan Kechil were satisfactorily completed.

Buildings.—Works under this heading were confined to additions and alterations to existing buildings.

MALACCA.

The road deviation at Rim was completed at a cost of $42,499.42.

A sum of $144,435.96 of which $87,500 was Government contribution, was expended on the maintenance of 299·25 miles of roads, giving an average of $482.66 per mile.

Three bridges were renewed in reinforced concrete, one timber platform renewed in same material and one bridge widened. The Tampoi bridge was completed during the year on a re-vote. Ten wooden culverts were renewed in masonry and concrete.

The Grab Dredger succeeded during the year in removing 33,485·18 tons of mud from the entrance channel of the Malacca River at a cost of 29 cents per ton. The dredgings were used

in the reclamation work close at hand. The above quantity includes dredging done by hand with trucks. A new steel pontoon was supplied and the Grab Dredger fixed on same at a cost of $9,999.73.

The work of raising the East and West groynes to two feet above H. W. O. S. T. has been carried out at a cost of $4,999.79. This work is now completed and further expenditure under this head may not be required for some years.

SINGAPORE HARBOUR WORKS.

The general progress of the works during the year 1910 was good.

A total length of 3,255 feet of wall was completed at the end of the year and cylinder foundations were in progress for a further length of 730 feet, out of a proposed length of Quay Wall of 5,028 feet.

Filling up the reclaimed area with dredgings and covering with material from Mount Wallich was continued and a total of 16 acres of the proposed 88 acres completed.

In the Inner South Mole during the year there has been deposited 210,421 tons of granite rubble obtained from the Quarry at Pulau Ubin.

The average number of men employed at the end of the year was 636 at Pulau Ubin Quarry including 46 Europeans, and 1,667 men on the Teluk Ayer Quay Wall and Reclamation including 87 Europeans.

A total amount of £313,500 was paid to the Contractors on account of work done during 1910.

LABUAN.

The revenue, not including a sum of $6,428.56 being the Contribution from Imperial Funds towards expenses of Consulate, was $82,926.44 as compared with $78,977.78 in the previous year. The expenditure amounted to $104,855.98 being $8,272.87 more than in 1909.

The trade of the Island was larger than in the previous year, the gross value Imports and Exports being $2,654,522 as against $2,447,841 in 1909 and $2,275,605 in 1908.

The comparative values of the trade of the Island in the past three years were as follows:—

		1908.	*1909.*	*1910.*
		$	$	$
Merchandise—				
Imports	...	1,129,278	1,308,077	1,437,390
Exports	...	1,146,327	1,139,764	1,217,132
Total	...	2,275,605	2,447,841	2,654,522

The Imports and Exports from and to ports other than Straits Settlements ports were:—

		1908.	*1909.*	*1910.*
		$	$	$
Imports	...	438,156	615,051	834,647
Exports	...	729,263	724,631	489,408
Total	...	1,167,419	1,339,682	1,324,055

The tonnage of shipping which entered Port Victoria and also cleared was 282,742, (British 152,668 tons and Foreign 130,074 tons), as compared with 165,137. (British 70,153 tons and Foreign 94,984 tons), in 1909, and 145,704, (British 58,601 tons and Foreign 87,103 tons), in 1908.

There was an increased demand for Labuan coal and 30 cargoes amounting to 47,734 tons were shipped. The total quantity exported as cargo and sold for bunkers was 92,223 tons, or nearly 35,000 tons more than in 1909. The output from the mines, which are the property of the Labuan Coalfields Company, Limited, was 86,689 tons, against 61,855 tons in 1909 and 33,458 tons in 1908. The conveyor erected by the Company at Port Victoria was worked successfully for the first time in May and it has greatly facilitated the loading and bunkering of ships.

The new lighthouse on Papan Island, a steel structure 39 feet high, was completed in December. It is proposed to exhibit the light, which is a fourth order occulting one by Chance Brothers, on the 1st March. 1911.

Besides the lighthouse, which with Quarters and Oil Store cost approximately $13,000, there were no public works of any importance. The total expenditure of the Public Works Department was $41,953.

The re-survey of Labuan, the total cost of which was estimated at $22,000, was commenced and fair progress was made.

The population of the Island at the end of the year was approximately 7,600 (males 4,432 and females 3,168), and included 46 Europeans. The total number of births registered was 235 and deaths 267. No epidemic of infectious or contagious disease occurred. The total number of patients treated in the Hospital was 338, of whom 6 were Europeans, as against 307 in 1909 and 167 in 1908. The total rainfall was 151·25 inches as compared with 114 in 1909 and 165·07 in 1908. The mean temperature of the air was 83·51°F. (maximum 85·55°, minimum 76·38°), as compared with 83·36°F. (maximum 86·49°, minimum 76·77°), in 1909. The highest temperature recorded was 93°F. and the lowest 72° as against 91° and 40° in 1909.

The Police force consisted of one European Inspector, 40 Sikhs and 45 Malays. Of the above numbers 17 Sikhs and 13 Malays did duty in Brunei. There was no serious crime during the year. In all 118 Police cases came before the Courts. There were six prisoners in the Labuan Criminal Prison on the 1st January and 64 (62 males and 2 females), were received in 1911. Of these 55 were discharged leaving 15 in Prison on the 31st December. The daily average number of prisoners in the Criminal Prison was 19·60. There were no prisoners in the Civil Prison during the year.

CHRISTMAS ISLAND.

The revenue was $85,023.34 as compared with $91,863.57 in 1909. The expenditure was $14,107.25.

The total tonnage cleared from the Port was 68,011 as against 57,915 in 1909.

Imports were valued at $130,452.

The export of phosphate of lime amounted to 137,700 tons as compared with 105,481 tons in 1909. The largest amount exported in any previous year was 110,375 tons.

The only other export was nine pikuls of cotton.

The population on the 31st December, 1910, was 1,329 and included 22 Europeans, 12 Eurasians, 35 Sikhs, 46 Malays, 8 Japanese and 1,206 Chinese. There were 21 deaths during the year and no births.

The health of those on the Island was fairly satisfactory though not so good as in 1909. Of the 21 deaths 8 were due to beri-beri.

There was no serious crime during the year.

The rainfall for 1910 was the heaviest on record and amounted to 136·93 inches, rain falling on 231 days. The heaviest rainfall for a single day was 7·72 inches on June 9th. The highest temperature recorded was 91·7, the lowest 70·2 and the mean temperature 80·2.

Extensive works are already in hand for the purpose of increasing the output of phosphate. A third tramway to the present quarry is now in use and it seems probable the phosphate beds in this locality will become exhausted before many years have passed. The phosphate beds to the south-east of the island are still untouched, and the company has now decided to build a light railway from the settlement to the south point of the island. The survey of the railway was completed during 1910 and the construction is now being commenced. The length will be about 15 miles. Preparations are also being made for building a new steel pier considerably larger than either of the existing piers so as to facilitate the landing of the railway material.

GENERAL.

The Colony in common with the whole Empire mourned the death of His Majesty King EDWARD and solemn funeral services were held in all the Settlements.

His Majesty King GEORGE was duly proclaimed in Singapore on the 9th May.

The most salient feature of the year was without doubt the great rise in the price of rubber and the consequent boom in rubber shares which reached its height in April. The boom undoubtedly did much to advertise the Colony and the adjoining States in Europe and brought large profits to individuals but its most abiding result was the impetus given to the cultivation of rubber which bids fair to oust less profitable cultivations and has been the means of bringing large areas into use which were previously undeveloped.

Owing to the policy which has been adopted of granting large rebates of quit-rent during the first six years the increase in the rent rolls is not so great as it will be in a few years' time and the immediate benefit to revenue is not as yet fully apparent.

A very gratifying feature of the year from the point of view of Government revenue as well as on other grounds was the success of the policy advocated by the Opium Commission and great credit is due to Mr. BADDELEY and the other officers who assisted him in the working of the new Monopolies Department.

Most important, however, of all the promising features of the year was the distinct revival of trade after a somewhat lengthy period of depression and there appears now to be abundant ground for confidence in the future of the Colony and its ability to hold its own against all rivals.

When the extensive works now in progress for improving the trade and shipping facilities of the ports of Singapore and Penang are completed the Colony should, there is every reason to anticipate, enter upon a period of prosperity which will cast all its previous records into the shade.

A. H. LEMON,
Acting Colonial Secretary.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1911.

FINANCIAL.

The revenue for the year 1911 amounted to $11,409,221, being an increase of $2,072,893 over the revenue for the preceding year. The expenditure was $9,085,389, an increase of $1,553,147.

The actual figures for 1910 and 1911 are shown in the following statements:—

A.—REVENUE.

	1910.	*1911.*	*Increase.*	*Decrease.*

			Loan Account ...	...	277,636
			Cash in Transit	...	5,842
			Cash ...	...	3,956,692
TOTAL	...	$9,908,722	TOTAL	...	$9,908,722

showing an increase to the credit balance of the Colony during the year of no less than $2,323,831 in place of an estimated increase of $255,227. The excess of revenue over the Estimates amounted to $2,308,786 and the excess on the estimates of expenditure to $240,181.

The principal excesses of revenue over the Estimates were Opium Revenue $1,641,457 and Premia on grants $123,246. The revenue from Straits Light Dues was $149,336. In view of Ordinance XXVIII of 1910, which was subsequently repealed, this was not estimated. The principal excesses on the estimates of expenditure were Charge on account of the Public Debt $433,851 owing to the flotation by the Crown Agents of the further loan of £2,750,000 and Military Expenditure $242,559. The principal saving was $215,780, Public Works, Extraordinary.

PUBLIC DEBT.

A Loan of £5,000,000 was raised in 1907 and a further loan of £2,750,000 was raised in 1910 under the provisions of Ordinance IV of 1907. The position of the loan on the 31st December, 1911, was as follows:—

		£
3½ per cent S. S. Inscribed Stock	...	6,913,352
4 per cent Debentures ...	...	1,030,100

Advances were made from Loan Funds as follows:—

		$
Tanjong Pagar Dock Board	...	37,281,161
Municipal Commissioners, Singapore		3,250,000
Municipal Commissioners, Penang ...		900,000
Government Harbour Works	...	8,137,963
		49,569,124
Expenses of Issue	...	3,518,386
Total	...	$53,087,510

Provision is made for the repayment of this loan by a Sinking Fund which will come into operation in 1917, ten years from the date of the first issue of debentures.

The charge on account of interest on the public debt was $2,449,243 in 1911, as against $1,608,865 in 1910. The great portion of this charge is, however, borne by the Tanjong Pagar Dock Board and other bodies to whom portions of the loan have

been allotted. The actual sums paid by the Colonial Government in 1910 and 1911, respectively, were $103,667 and $806,961.

In local currency the total amount of the debt stood at $68,086,731 on the 31st December, 1911, which was about six times the revenue of the Colony.

EXCHANGE.

The demand rate remained firm during the year between 2/4$\frac{3}{16}$ and 2/4$\frac{1}{16}$.

CURRENCY.

The gold held by the Commissioners in Singapore at the beginning of the year amounted to £285,438. During the year gold to the value of £556,312 was received and issues of £703,998 were made, leaving a balance of £137,752 in the vault on the 31st December. In addition sums aggregating £1,120,376-13-3 were held by the Crown Agents in gold in London.

The large $5 note and the first issue $1 note are being gradually withdrawn from circulation, all such notes being cancelled on their return to the Commissioners.

The currency of the Colony, in circulation exclusive of subsidiary coins, consisted of $36,859,310 in Government currency notes, $317,140 in bank notes issued by the Hong Kong and Shanghai Banking Corporation and the Chartered Bank of India, Australia and China, and $7,272,699 in dollars and half-dollars. The above amounts include stocks held by the Banks and the Treasuries of the Colony and the Federated Malay States, but do not include unissued currency notes still in the hands of the Currency Commissioners.

Old subsidiary silver coin of the face value of $240,000 was sent to London during the year for sale as bullion. The new subsidiary silver coins are of a fineness of 600. The profits from reminting this coin will be credited to the Gold Standard Reserve. During the year $40,007.35 worth of the new coins were received from Bombay. This was part of the new coin which was shroffed and found without the proper ring and sent back to Bombay Mint for reminting. During the year under review $42,000 worth of defective coin was returned back to the Mint Master, Bombay, to be re-minted.

The average bank-note circulation in 1911 was $353,417, as compared with $459,615 in 1910. The average amount of

Government currency notes in circulation in 1911 was for each month:—

	$		$
January ...	34,564,299	July ...	35,600,395
February ...	34,529,921	August ...	35,386,470
March ...	35,028,644	September ...	37,816,430
April ...	35,805,727	October ...	38,411,429
May ...	35,835,057	November ...	37,687,110
June ...	36,005,953	December ...	37,342,362

The Assets and Liabilities of the Currency Commissioners on the 31st December, 1911, were as follows:—

Liabilites.	$ c.	*Assets.*	$ c.
Deposits	38,837,513 98	Cash in Reserve ...	22,518,132 96
		Investments	16,319,381 02
TOTAL ...	$38,837,513 98	TOTAL ...	$38,837,513 98

MUNICIPAL REVENUE AND EXPENDITURE.

The revenue of the three Municipalities amounted to $3,853,550, and their expenditure, excluding sums spent on Loan Works, to $3,769,167. The usual comparative statements of revenue and expenditure, and of the debts of the Boards, showing the provision made for repayment, appear below.

The following return shows the revenue and expenditure of the Rural Boards, established to carry out in areas outside Municipal limits such of the provisions of the Municipal Ordinance as are applicable to country districts :—

	Revenue.	*Expenditure.*
	$	$
Singapore Island ...	30,054	72,382
Penang Island ...	41,304	82,482
Province Wellesley ...	169,547	192,066
Dindings	9,631	10,555
Malacca	156,252	181,043

TANJONG PAGAR DOCK BOARD.

The revenue and expenditure for the five years 1907–1911 were as follows :—

	Revenue.		*Expenditure.*	
	$	c.	$	c.
1907 ...	6,145,579	25	4,484,476	20
1908 ...	5,822,811	69	4,271,715	37
1909 ...	5,849,063	00	4,267,797	27
1910 ...	5,896,156	52	4,328,184	47
1911 ...	5,740,965	09	4,074,669	33

The capital debt due to Government including an estimated amount of $29,003,149.45 for initial cost stood at the end of 1911 at $37,402,754.08 on which the Board pays interest at 4 per cent.

In addition to the above-mentioned capital the Board has expended on new works and other expenditure of a permanent nature a sum of $2,768,313.38 from surplus revenue or reserve fund under Section 31 (2) of "The Tanjong Pagar Dock Ordinance 1905."

The following figures are taken from the Wharf Tonnage returns :—

	1907.	*1908.*	*1909.*	*1910.*	*1911.*

NEW WORKS AT TANJONG PAGAR.

Lagoon Wet Dock and Main Wharf Re-construction.

The questions at issue between the Dock Board and Messrs. John Aird & Company, the original contractors for these Works, reached a climax in the early part of the year and now form the subject of litigation between the two parties; as a result of this (and as Messrs. John Aird & Company refused to proceed) the Dock Board, on the 8th March, entered into possession of the works and of the entire Contractors' Plant, Materials and Stock. Arrangements were thereupon made to proceed with and complete a portion of the New West Wharf by Departmental administration, and at the same time negotiations were opened up with another firm of Contractors to carry on and complete the whole of the works. As a result of these negotiations a Supplemental Contract was entered into with Messrs. Topham, Jones & Railton, Limited, and the works were duly handed over to them on the 18th July.

In the interval between the 8th March and 18th July a length of 500 feet of the New West Wharf (W. I. Cylinder Construction) was finished off and opened for traffic together with the area for the Godowns and Roadways behind this portion.

Since taking over the works on the 18th July the new Contractors have pushed on vigorously with the Lagoon Dock, the first portion of the Trench for the East Wall of the Dock, which had been left untouched for over a year, was successfully bottomed up in November and the construction of this wall is now proceeding rapidly. The work of clearing away the Old Keppel Road where it crossed the North West corner of the Dock was also in hand and the necessary preparations made for starting the trench for the West Wall.

During the progress of the work on the Main Wharf Re-construction, carried out Departmentally, 20,520 Tons of Granite Rubble were obtained from the 8th Mile Quarry at Bukit Timah, 1,737 Cubic Yards of Concrete were deposited, 590 Cubic Yards of Concrete Blocks set, and 545 Tons of Ironwork erected.

Since 18th July, 1911, a total amount of £24,000 was paid to the New Contractors, the principal items of work executed by them since that date being 102,000 Cubic Yards of excavation from the Body of the Dock which has been used for the Reclamation of the Western Swamp, 7,000 Cubic Yards of Trench excavation, and 2,500 Cubic Yards of Concrete in the Dock Walls; the whole of the temporary Railways were

remodelled, and New Workshops erected by Messrs. Topham, Jones & Railton, Limited.

The average number of men employed by the Contractors on the Works and at the Quarries in December was 2,473.

New Graving Dock at Keppel Harbour.

Good progress was made on Messrs. Topham, Jones & Railton's Contract for the construction of this Dock.

The Concrete Side-Walls and Floor of the Dock were well advanced and at the end of the year there remained some 185 feet of the West Wall, and 210 feet of the East Wall, for heights of 33′ 6″ and 17′ 6″ below Coping level, respectively, to be completed; below that level the Walls were built for their entire length throughout the Dock, but there remained some 140 feet of the Concrete Floor still to be done.

The portion of the West Entrance Wall inside the Cofferdam was completed as far as was possible before the removal of the latter, and a similar portion of the East Entrance Wall, in which the Caisson Berth is formed, was in hand and was expected to be completed ready for the removal of the Dam early in 1912. The total quantity of Concrete deposited in the Dock and Entrance Walls inside the Cofferdam during the year was 53,313 Cubic Yards, leaving 8,090 Cubic Yards still to be done, and the total quantity of excavation removed from the Body of the Dock during the year was 78,662 Cubic Yards, leaving 2,080 Cubic Yards to be dealt with.

The Concrete and Masonry for the Pumping Station, Non-return Valve Chamber and Boiler House were completed, entailing the deposit of some 7,524 Cubic Yards of Concrete, the building of 600 Square Yards of Glazed Brick facing, and the laying of 1,580 Square Yards of Asphalte during the year, as well as the building of the Superstructures of the Engine and Boiler Houses which was carried out by the Board. The erection of the Pumping Machinery which is being supplied under a Contract with Messrs. Gwynnes, Limited, is in hand, the whole of the Machinery having been delivered in the Colony and stored near the site on the Board's premises.

Outside the Cofferdam the West Entrance Wall was completed as far as was possible before the removal of the former. The temporary Staging for the Eastern portion of the East

Entrance Wall was erected and the excavation almost completed for a length of 80 feet. During the year under review some 55,000 Cubic Feet of Cornish Granite Ashlar for the Outer and Inner Entrances, Caisson Stops, Copings, etc., were delivered and stacked on the ground and 83,073 Cubic Feet set in the work; a total quantity of 43,850 Cubic Yards of Granite Rubble was delivered on to the Works from the Quarry at Pulau Ubin; at the Block-yard some 3,280 Cubic Yards of Concrete Blocks and 31,200 Cubic Feet of Concrete Ashlar were made, of which some 3,000 Cubic Yards of Blocks and 10,800 Cubic Feet of Ashlar were in stock at the end of December; the average number of men employed by the Contractors, Messrs. Topham, Jones & Railton, Limited, on the Works and at the Quarry was 1,166.

A total amount of £235,300 had been paid to the Contractors for work done up to the end of 1911, out of which the sum of £133,000 was for work done during 1911.

The two Caissons for this Dock are being supplied and erected under a Contract with the Thames Ironworks Company; the erection of No. 1 Caisson, on the Floor of the Dock near the Outer Entrance, which started in July is still proceeding and the erection of No. 2 Caisson was started in December. The average number of men employed on the erection of these Caissons varied from 65 in August to 121 in December.

GOVERNMENT WHARVES, PENANG.

Swettenham Pier Extension was completed on the 30th of June. It is now 1,200 feet long and has a depth of 30 feet L. W. O. S. T. the whole length.

The piling for the over-water godown is nearly completed, part of the decking is laid and the materials for the erection of the godown were expected in January, 1912. This godown is urgently required, particularly during the tobacco season.

The fleet of lighters numberd 91. During the year six new lighters have been built at Prai Dock at a cost of $25,000, repairs to old lighters have been effected at a cost of $43,504.58 and six lighters have been condemned and sold.

The profit on Revenue Account at Prai Dock for the year 1911 was $65,442.

The profit on Revenue Account of the Government Wharves Penang, for the year 1911 was $100,116.

TRADE.

The trade of the Colony in 1911 was satisfactory.

Compared with 1910 foreign imports of merchandise rose by 4 million pounds sterling or 10 per cent, and exports by 2·4 million or 6·8 per cent.

Import prices were higher than in the previous year and quantities of manufactured goods generally increased.

Straits produce with stationary prices exhibit on the whole a decline in volume.

The following figures show the value of the foreign trade of the Colony in thousands of pounds sterling :—

		1910.	*1911.*	*Increase.*	*Decrease.*
		£	£	£	£
Merchandise—					
Imports	...	40,343	44,373	4,030	...
Exports	...	35,852	38,293	2,441	...
Coin and Bullion—					
Imports	...	2,179	2,064	...	115
Exports	...	1,970	1,594	...	376

The value of the inter-port trade including treasure was in thousands of pounds sterling :—

		1910.	*1911.*	*Increase.*
		£	£	£
Imports	...	2,439	3,252	813
Exports	...	2,273	2,986	713

The aggregate gross trade was therefore £92·6 million pounds, an increase of £7·5 million, compared with 1910 or 8·8 per cent.

Distributed according to classes the foreign trade records in thousands of pounds sterling are as follows :—

	Imports.		*Exports.*	
	1910.	*1911.*	*1910.*	*1911.*
	£	£	£	£
1. Live Animals, Foods, Drinks and Narcotics	15,762	17,174	13,368	14,059
2. Raw Materials ...	16,423	18,576	18,615	20,132
3. Manufactured and Partly Manufactured Articles ...	8,157	8,623	3,869	4,103
4. Coin and Bullion ...	2,179	2,064	1,971	1,594
Total ...	42,521	46,437	37,823	39,888

The figures though exceeding those of the previous year do not denote a corresponding expansion of trade as prices of tin, rice and other articles were considerably higher and consignments of Para Rubber transhipped here and not marketed contributed to enhance values.

Increased values of imports were chiefly seen in tin and ore, rice, provisions of all kinds, vegetables, fruits and onions, cotton piece goods, apparel and hosiery, fish, tobacco, coal, kachang and coconut oils, sugar, tea, drugs and medicines, raw hides, silk piece goods, hardware and ironware, wood, and cement.

Decreased import values are apparent in opium, iron and steel, petroleum, jute gunnies, and matches.

Exports gave increased values in tin, preserved pineapples, tapioca, rattans, tanned hides, and coffee, but the value of copra, gambier, spices, and phosphate of lime from Christmas Island declined though the quantity of the last named increased.

QUANTITIES.

Import quantities rose chiefly in cotton and silk piece goods, woollens, coal, cement, wheat flour, rice and bran, fish, malt liquors, sugar and tea, milk, tin plates, soap and soda, and tar.

Decreases were apparent principally in lubricating oil, petroleum, spirits and wines, beans and peas, padi, sarongs and yarns, cotton blankets, and iron and steel.

Export quantities of the following articles declined:—gutta jelutong, other guttas and rubbers except Para, copra, arecanuts, tapioca, sago, peppers, and gambier, increases occurring in Para rubber, preserved pineapples, rattans, tin, tanned hides, gum benjamin and coffee.

Trade with British and Foreign Countries.

The trade with the United Kingdom, British Possessions and Protectorates, and Foreign Countries including coin and bullion, is given below in millions of dollars:—

	Imports.		*Exports.*	
	1910.	*1911.*	*1910.*	*1911.*
	$	$	$	$
United Kingdom ...	39·2	40·8	87·3	85·9
British Possessions and Protectorates ...	188·6	212·6	91·6	101·8
Foreign Countries ...	136·7	144·6	145·3	154·2

The following statement shows the position of the Colony as a market for British and European Foreign goods since 1896 in thousands of pounds sterling:—

	1896 to 1900.	*1901 to 1905.*	*1906 to 1910.*	*1910.*	*1911.*
From United Kingdom ...	£2,981	3,752	4,012	4,491	4,694
„ Continent of Europe and United States ...	£1,553	2,314	2,208	2,359	2,415
British Excess ...	£1,428	1,438	1,804	2,132	2,279

Percentage of Total.	*1896 to 1900.*	*1901 to 1905.*	*1906 to 1910.*	*1910.*	*1911.*
	£	£	£	£	£
United Kingdom ...	65·7	61·9	64·5	65·6	66
Continent of Europe and United States ...	34·3	38·1	35·5	34·4	34

The articles which gave the largest increased values from the United Kingdom were cotton piece goods and apparel, cigars and cigarettes, coal, woollen cloth, tin plates, malt liquors, hardware and ironware, boots and shoes, India-rubber goods, soap and soda, and paints, decreases being noticeable in the case of sarongs, cement, biscuits, cycles and motor cars, tramway and railway materials, steel, paper and stationery.

Advances from the Continent were seen in import values from the following countries:—Germany, Austria, Denmark, Belgium, Italy, and Norway; and reduced values from Holland and Spain, France showing little variation.

The increases were chiefly as follows:—Austria in cotton piece goods, and apparel with hardware and ironware; Germany in apparel and hosiery, cotton goods and woollen cloth, hardware and ironware, crockery, tinned provisions, beer and ale, and nails; Denmark, cement; Belgium, crockery and porcelain; Italy, cotton piece goods; Norway, milk; and Holland, cotton piece goods.

The principal decreases were in glass and yarn from Belgium, sarongs from Italy, and sarongs and gin from Holland.

From the United States import values decreased by over half a million dollars principally in petroleum, lubricating oil, hardware and ironware, and wheat flour; cigars and cigarettes, tobacco and lard shew advances.

The total increase of exports to the United Kingdom is accounted for by advances in such articles as tin, Para rubber and preserved pineapples, but large decreases took place in gutta percha, India and Borneo rubbers, copra, pepper, gambier, sago and tapioca.

Of exports to the Continent tin and Para rubber alone advanced to any large extent, declines being apparent in jelutong, gambier, copra, guttas and rubbers except Para, and illipi nuts.

Exports to the United States advanced in tin, tapioca, rattans and Para rubber, declining in jelutong, gambier, pepper, Borneo rubber and copal.

Import values from Australia, India, Burma, Siam, Japan, the Federated Malay States, the Dutch Indies, Hongkong and China, and French Indo-China advanced, but there were decreases in the total values from Borneo and Sarawak and the Malay Peninsula excluding the Federated Malay States.

There was a rise in the total value of exports to the Federated Malay States, and the other parts of the Malay Peninsula, Hongkong and China, the Dutch Indies and Japan, but exports to Australia, Siam, French Indo-China, and Borneo and Sarawak fell off.

AGRICULTURAL INDUSTRIES.

The cultivation of Para Rubber continued to increase in all parts of the Colony, and the total area planted with this product is now reported to be about 135,000 acres, of which 29,500 acres are in Singapore, 80,424 acres in Malacca and 14,725 in Province Wellesley. The price remained very remunerative though the cost of labour has not been much reduced. Considerable interest attaches to the eradication of lallang areas in Malacca by the use of the steam plough.

There was no large increase in other forms of cultivation. Tapioca, in spite of a high price, continued to be removed from rubber estates where it had been interplanted and the same is to be said of gambier. Latterly, however, there has been renewed attention to tapioca.

Following on an exceptionally short rainfall which in some parts of the Colony amounted to a drought, the fruit crop was prolific, though the actual number of trees was less than in previous years. Pineapples commanded a good price and were largely planted as a catch crop with Para rubber.

The price for coconuts was also generally higher than in the last few years and considerable attention, though not as much as is deserved, was given to its cultivation.

The padi crop was generally poor and suffered from a variety of causes; the Bruas District alone secured a good crop. The cultivation of padi generally is reported to show a decrease, but this is probably not more than a temporary phenomenon. Malacca lost many buffaloes in a severe outbreak of rinderpest and many of the cultivators were kept from work by an epidemic of small-pox; the diminution is perhaps also due in part to the good wages which can be obtained on rubber estates for work far easier than the toil of the padi fields.

LAND GRANTS.

The area of Crown Land alienated, and the number of Statutory Grants issued and the premia paid for the same during the last five years are as follows:—

Total tonnage Entered and Cleared ...	1,464,048	1,455,436	1,347,201	1,529,597	1,637,673

As compared with 1907 this native craft tonnage has increased by 173,625 tons.

In Singapore during the year nine new steamers with a tonnage of 2,570 tons gross and 29 sailing vessels of 2,687 tons were registered under the Imperial Shipping Acts. Ten new sailing vessels of 1,088 tons were registered under Ordinance V of 1883; also 941 of 7,837 tons in all under Ordinance VIII of 1872.

LEGISLATION.

The legislation of the year was not of great bulk. Twenty-three Ordinances were passed, of which thirteen were principal Ordinances, and ten amending Ordinances.

Of the principal Ordinances, the most important are :—

(1) The Public Officers' Guarantee Fund Ordinance which established a fund consisting of the contributions of public officers required to give security for the due and faithful discharge of their duties. The fund is administered by a Board of three Directors, being public officers nominated by the Governor, any two of whom form a quorum. The Ordinance differs from that of 1900 which it repeals in requiring no entrance fee, in reducing the annual contribution from one to one-half per cent, in abolishing the disability of officers to sue in respect of the fund, and in abolishing also the provision as to quinquennial adjustments:

(2) The Tamil Immigration Fund Ordinance incorporates, on the lines of a similar enactment (No. 2 of 1911) of the Federated Malay States, the resolutions of the Malaya Planters' Association, fixing the maximum assessment leviable on employers (other than the Government, which is exempted) of Tamil labour, empowering the Immigration Committee to borrow monies when necessary, and prescribing that the fund formed by the payments of the employers may be disbursed towards free passages for labourers and their families from India, payment of interest on sums borrowed by the Committee, expenses in connection with quarantine, and the maintenance of a home for decrepit estate-labourers:

(3) Two other Ordinances, No. VII and No. XXI, deal with the interests of labourers on estates. No. VII is devoted more particularly to providing adequate protection for their health by means of proper house-accommodation, water supply, sanitary and hospital arrangements, while No. XXI provides for the prohibition of the employment of any class of labourers on agricultural estates or other places of work where the supervision is found to be inadequate or ineffective against ill-usage or ill-treatment:

(4) The Deceased Wife's Sister's Marriage Ordinance gives the same validity to a marriage between a man and the sister of his deceased wife, when contracted in the Colony, as the Imperial Act of 1907 (7 Edw. VII, c. 47) gives to such a marriage when contracted in the United Kingdom:

(5) The Traction Engines and Motor Cars Ordinance provides, in view of the invention of the motor car and its increasing use in the Colony, a more adequate means than was afforded by the prior Locomotive Ordinance (No. VIII of 1871)

of regulating, in the interests of public safety and convenience, the use of locomotives and other carriages propelled by other than animal power.

Other Ordinances deserving special mention are:—

(1) The Labuan Ordinance constituting Labuan with its dependencies a separate Settlement instead of being, as it was since its incorporation with this Colony in 1907, part of the Settlement of Singapore, and making special provisions, in view of the Merchant Shipping Ordinance (No. X of 1910), for the survey of steamers engaged in the Labuan local trade, and for the grant of certificates of competency to mariners:

(2) The Bankruptcy Ordinance Amendment Ordinance establishing the like reciprocity between the Bankruptcy Courts of the Colony and of the Federated Malay States to that which exists, under section 118 of the Imperial Bankruptcy Act (46 and 47 Vict. c. 52), between the various Bankruptcy Courts of the British Empire, *i.e.*, by the mutual action of one Court in aid of the other:

(3) The Volunteer Ordinance Amendment Ordinance providing for the discipline of individual members of a force raised in the United Kingdom, India, or another Colony or the Federated Malay States, when attached to or doing duty with any portion of the Volunteer forces of the Straits Settlements, by subjecting them to the same laws and regulations as the corps to which they are attached is itself subject:

(4) The Conveyancing and Law of Property Ordinance Amendment Ordinance obviating the inconvenience hitherto involved in a prospective purchaser of a deceased person's land being bound to enquire into the necessity or propriety of the sale or mortgage, by prescribing that the sale or mortgage made by the legal personal representatives after six years from the deceased's death be valid if either (*a*) sanctioned by the Court, or (*b*) made under an express or implied power to that effect contained in the deceased's will:

(5) The Prisons Ordinance Amendment Ordinance prescribing the registration and complete record of vagrants in addition to that of persons convicted in the Colony, and of persons ordered to be banished:

(6) The Societies Ordinance Amendment Ordinance establishing, under certain circumstances, the presumption of membership of a Triad Society, and empowering the Governor in Council to dissolve a society not only when it is being used for manifestly unlawful purposes or to the danger of peace and good order in the Colony, but also when its objects appear incompatible with its purposes and rules as entered in the Register of Societies.

EDUCATION.

There are in the Colony 184 vernacular schools where the teaching is in Malay. Free tuition up to the Fifth Standard is provided by the Government at these schools to some twelve thousand one hundred boys and girls. The Government also finances and controls eight schools where the teaching is in English and goes up to the Seventh Standard.

There are also thirty-two aided-schools managed by private bodies and in receipt of grants-in-aid from Government.

The net expenditure on Government English schools was $79,961, on aided-schools (English, Anglo-Tamil, Tamil and Chinese) $119,187.50, and on Government vernacular schools, $98,602.76.

The Malacca Training College for Malay Teachers continued to do good work. Its cost, during the year under review, was $8,399.64. The supply of trained teachers from the institution is still, however, below the demand and is likely to remain so for some years to come.

The number of pupils leaving school at an early age continues high. This is due to the demand for clerks and assistants of all kinds with some knowledge of English, and it is difficult to see how it can be prevented.

The Normal Classes continued their work during the year with good results, but the tendency to pass into more lucrative occupations is apparent even among trained teachers.

The Training Class for girls in Singapore dealt with four students in their second year and two in their first. The four all passed well in November and obtained their certificates and are all now employed as teachers. The other two are continuing the course and there are four new students. The class is under the control of the Headmistress of the Raffles Girls' School. A similar class in Penang was poorly attended and fresh arrangements are being made.

In Penang there is an increase of nearly 100 in the enrolment of girls at the English schools, chiefly among the Chinese, who are now taking more interest in female education. In Singapore there is an increase of over 100.

GOVERNMENT INSTITUTIONS.

HOSPITALS.

The accommodation in all hospitals was taxed to its utmost throughout most of the year, and during the months of May, June and July, when a serious epidemic of Malaria was raging in all Settlements, special arrangements had to be made to provide for the numbers of patients asking admittance. The total number of

admissions to hospitals exclusive of the Lunatic Asylum was 44,026 as compared with 32,979 in 1910 and 27,543 in 1909, an increase in 2 years of 16,483.

Two hundred and twenty patients were admitted into the Lunatic Asylum, Singapore, as against 228 in 1910.

The number of patients treated in the hospitals was 46,962 of whom 1,702 were Europeans. In 1910 the corresponding numbers were 35,684 and 1,463 respectively. Deaths numbered 6,124 (82 being Europeans), as against 4,529 and 64 in 1910. The rate of mortality shows a rise, the figures being, for 1910, 12·69 and, for 1911, 13·04 per cent of the total cases treated.

The number of inmates in the Leper Asylums of the Colony increased from 440 on the 31st December, 1910, to 471 at the end of the year under review. The number of deaths for 1911 being 173.

REFORMATORY.

The expenditure of this institution, exclusive of the salaries of the Superintendent and Warders, was $9,820.69 in 1911, as against $9,172.61 for the preceding year. The average daily muster was a little higher, the actual figures being, in 1910, 68·37, in 1911, 71·19. There remained 74 boys on the 31st December. The health of the inmates was good. They are taught English and Romanized Malay. The boys make bread and grow vegetables, for their own consumption, and are taught other trades, such as carpentering, tailoring and shoemaking, which may be useful to them on release.

SAVINGS BANK.

The amount at the credit of the depositors in the Government Savings Bank on the 31st December, 1911, was $756,538, the highest sum reached. The average amount at the credit of each depositor was $157.21.

The deposits were $536,502, as compared with $509,362 in 1910.

The deposits exceeded the withdrawals by $62,761.

There was a profit on the year's working of $3,151. The present value of the investments is as follows:—

	$
India 3½ per cent Rupee Paper ...	462,550
Singapore Municipal Bonds at 5 per cent	64,670
Do. do. at 4½ „	16,125
Do. do. at 4 „	45,770
Fixed Deposits in Banks	104,000
Various 3 per cent Colonial Guaranteed and Corporation Stocks	65,481
Total ...	$758,596

POLICE.

The Police Force numbers over 2,500 men, of whom 378 are Sikhs.

Sixty-four boys joined the Training Depôt at Malacca in 1911, and fifty-two were drafted from the Depôt into the Force.

Three hundred and ninety-nine recruits joined the Force during the year, of these 11 were Europeans and 57 Sikhs.

PRISONS.

The daily average number of prisoners in the various prisons during 1910 and 1911 was as follows:—

		1910.	*1911.*
Singapore ...	Criminal ...	877	777
	Civil ...	73	67
Penang ...	Criminal ...	255·79	277·53
	Civil ...	29·46	29·37
Malacca ...	Criminal ...	33·32	33·99
	Civil ...	8·57	20·61

The practice of banishing habitual criminals (297 in 1911) has been continued.

The health of the prisoners was good, the number of deaths being: at Singapore 36, at Penang 19 and at Malacca one.

CRIMINAL STATISTICS.

Twenty-eight murders and 52 gang robberies were reported during the year; of the latter 11 were not substantiated in the preliminary investigation.

The returns do not disclose any abnormal features.

One hundred and twenty-six persons as against 116 in 1910 were tried before the Supreme Court. Murder, gang robbery, counterfeiting coins, and returning from banishment were the principal crimes. Eighteen persons were convicted of returning from banishment. The lower Courts had to deal with a smaller number of cases than in the previous year. The total number disposed of was 17,051, a decrease of 1,632 cases over the figures for 1910.

VITAL STATISTICS.

The Census population of the Colony was 711,951 as compared with the estimated population of 653,853 for 1910, the figures given by the Census of 1901 being 572,249. Eighteen thousand and sixty-nine births and 33,072 deaths were registered as against 18,012 and 27,484, respectively, in 1910.

The death-rate was 46·45 per mille of the population. The rate in 1910 was 41·88 and in 1909, 37·40.

The birth-rate was 25·38 per mille, compared with 27·55 in 1910.

The deaths from the more important infectious diseases in 1911, excluding imported cases landed on, or occurring amongst contacts on, the Quarantine Islands, were as follows:—

Small-pox: 393 as compared with 522 in 1910.

Cholera: 343 as compared with 247 in 1910.

Plague: 32 as compared with 5 in 1910.

The deaths from Beri-beri were 2,056 as compared with 1,737 for the previous year, an increase of 319. The use of cured rice in the different institutions of the Colonies has lessened the death-rate from this disease. Although the actual cause of the disease still awaits elucidation, there can be little doubt that the consumption of over-milled rice is a big factor in its incidence.

Phthisis has increased in a markedly unhealthy year, there being 2,907 deaths returned from this disease, compared with 2,571 for 1910, 2,659 in 1909 and 2,988 in 1908. It must be remembered that with the greater facilities for travelling in the Straits more decrepits find their way into the big towns to increase the death-rate and our population has been shown to have increased 139,702 in the past ten years. Improvement in the death-rate from this disease is hoped to be shown in a few years when time is given for the sanitary conditions of the bigger towns to improve by the gradual construction of back-lanes, improved drainage, more cubic space and less overcrowding, more air and sunlight, etc., matters now being taken in hand by the Municipalities. Any comprehensive scheme for dealing with this disease would necessitate a sanatorium with attached hospital to the former of which the earlier cases amongst the poor could be sent and to the latter the advanced cases, thus doing away with the chief source of infection as far as possible.

Dysentery was the cause of 2,035 deaths. The figures for 1910 being 1,329 and for 1909, 1,211. A large addition to the water supply of Singapore has but lately been completed, improvement to the water supply of other districts is under consideration, and it is trusted that progress on these lines may tend to lessen the incidence of the disease.

Malaria.—There was widespread increase of Malaria throughout all Settlements, an increase which has been steady and progressive for several years as shown by the hospital admissions. The death-rate from this disease also shows corresponding increase, a conspicuous feature being the number of cases of a malignant type. The deaths from Malaria in all Settlements excluding Labuan were 5,769 for the year, compared with 3,245 in 1910 and 2,589 in 1909. A crusade against this disease is being undertaken, but some years must elapse before any very tangible results are likely to be seen.

During the year the Estate Labourers Protection of Health Ordinance has been passed. This should lead, when in full work, to some reduction in our death-rate, more especially from Malaria and Dysentery, for it is undoubted that many broken-down coolies from Estates proceed to the nearest town where they not only increase the death-rate but are also a source of danger to those around them.

CLIMATE.

The mean temperature of the air in Singapore was 81·3° with a maximum of 94·8° on April 14th and a minimum of 69·2° on February 25th: that of Penang being 81·7°, the highest temperature recorded being 94° March 6th, the lowest 70° on March 16th.

In Province Wellesley the mean temperature was 81·4°: the maximum being 96° on April 4th, the minimum 66·5° on February 23rd. In Malacca the mean temperature was 80·2° with the maximum of 93·5° on March 11th, the lowest 68° on March 26th. In Labuan the mean temperature was 81·6°, the maximum recorded 93° on March 17th, the minimum 71° on July 1st.

Rainfall:—Singapore	...	...	92·72 inches.
Labuan	...	...	99·82 ,,
Penang	...	...	85·70 ,,
Province Wellesley		...	68·65 ,,
Malacca	...	...	67·44 ,,
Dindings	...	...	82·2 ,,

The prevailing direction of the wind changes with the N. E. and S. W. Monsoons. The former blowing from November to April and the latter from May to October.

POSTAL, TELEGRAPH AND TELEPHONE SERVICE.

Money Order Agreements were concluded with the Post Office of Netherlands East India and Indo-China, and the Commission on Money Orders drawn on the United Kingdom, British Colonies and foreign countries was reduced from 1½% to 1%. The parcel post was extended to Trengganu and the insurance system for parcels and letters to Siam.

The number of postal articles (excluding parcels) posted in the Colony was 8,089,698, an average of 11·2 per inhabitant. The number received for delivery was 6,896,788. The number of messages transmitted over the Government telegraph lines increased from 218,102 to 228,499, and the number of subscribers to the Government telephone exchanges from 389 to 440.

IMMIGRATION.

(I).—CHINESE.

Immigrants from China during the year 1911 numbered 269,854, an increase of 24·7 per cent over the figure for the year 1910, and of 18·6 per cent over that for the year 1907, the previous highest figure.

Adult females to the number of 22,738 arrived during the year 1911, an increase of 6,343 or 38·7 per cent over the number for 1910. The females for the first time amount to 10 per cent of the males.

Two thousand six hundred and eleven infants of one year of age and under arrived in the Colony, of whom 1,837 landed at Singapore. Of those who landed at Singapore 637 were reported as leaving for other ports and the balance of 1,200 were probably added to the population of the town.

The number of "unpaid passengers," *i.e.*, labourers who obtain free passages from China in consideration of a promise to enter into contracts in Singapore, was 24,345, an increase of 410 over the number for 1910, and the highest figure since 1900. Only 445 arrived in the month of December. These unpaid passengers formed 10·7 per cent of the total adult male immigrants as against 12·9 per cent in 1910.

There were again poor harvests throughout South China partly due to extensive floods. Famine resulted in many places. During the last four months of the year rice was dear in China as elsewhere. The demand for Chinese contract labour fluctuated and was on two occasions exceeded by the supply.

The total for the last five years are as follows:—

Year.	*Men.*	*Women.*	*Boys.*	*Girls.*	*Total.*
—	—	—	—	—	—
1907	197,284	16,265	10,377	3,416	227,342
1908	129,913	12,909	7,767	2,863	153,452
1909	128,878	12,126	7,946	2,802	151,752
1910	184,856	16,395	11,522	3,548	216,321
1911	226,126	22,738	16,033	4,957	269,854

(II).—INDIAN.

The figures for the last five years are appended:—

	1907.	*1908.*	*1909.*	*1910.*	*1911.*
	—	—	—	—	—
1. Statute Immigrants ...	5,499	5,456	4,119	2,523	None.
2. Free Coolies (with aided tickets) ...	24,709	20,049	20,289	56,002	78,356
3. Other Immigrants ...	31,922	29,017	25,409	25,198	30,115

The "other immigrants" include 20 dependents and 7,253 children. The importation of statute immigrants (indentured labourers) has ceased, but there has been a very large increase in the number of free immigrants with cheap tickets. The number of passengers with ordinary passage tickets is the largest recorded since 1907. This large increase is due to the requirements of the rubber-planting industry.

The number of Indians leaving the Colony for Southern India was 46,464 adults and 1,639 children, as against 37,829 adults and 1,251 children in 1910.

The excess of immigrants over emigrants amounts to 56,754 adults and 5,614 children, as against an excess of 40,529 adults and 4,114 children in the previous year.

MONOPOLIES.

During the year 1911, 3,952 chests of opium (Indian and Persian) were cooked at the Factory giving a total yield of 4,713,108 tahils of chandu, an increase of 1,689,463 tahils

over 1910. From January 1st, 1911, the whole of the Federated Malay States and the States under British protection (excluding Kelantan and Trengganu) obtained their chandu from Singapore, thus causing an enlarged output at the Factory.

As in 1910, the price of raw opium varied very greatly. The lowest was $900 per chest in July, and the highest $2,300 in September. No alteration was made in the selling price of chandu to licensees or by licensees to the public.

The total number of tahils sold in the three Settlements amounted to 1,769,506, made up as follows:—

Singapore 1,064,499, Penang 511,792, and Malacca 193,215, and total cash received for above sales amounted to $7,707,068.15.

The revenue collected in respect of liquor duty, store rent, distillery rent and toddy farms amounted to $665,258.02 in Singapore, $505,537.98 in Penang and $164,386.67 in Malacca, giving a total of $1,335,182.67.

During the year 281 prosecutions were instituted in Singapore for unlicensed selling and other offences against the Chandu and Liquors Ordinances and the Deleterious Drugs Ordinance, 211 in Penang and 97 in Malacca. Seizures were made of 6,434 tahils of opium, 7,915·57 tahils of chandu, 454 ounces of cocaine, 281 ounces of morphia, and 360 packages of bhang.

PUBLIC WORKS.

SINGAPORE.

Among the public works completed during the year were the construction of a sea wall, Johnston's Pier, to connect the old with the new Reclamation; Rebuilding the quarters of the Director of Raffles Museum; Alterations to Raffles Library and Museum; Filling in and raising low-lying ground, Penang Road; an Inspection Shed of steel and corrugated iron, St. John's Island; Dredging and reclamation of swamps, Singapore River; Police Station and Kitchens, Pasir Panjang; Renewing wooden decking, Horsburgh Lighthouse, in armoured concrete; Quarters for Government Officers, Goodwood Estate; Quarters for an Assistant Surgeon and for two Dressers and a Ward for the Blind, at Tan Tock Seng Hospital; a Sub-Post Office at Kampong Malayu; and a Landing Place for Cattle, Middle Road.

No new roads or bridges were constructed during the year, but two small culverts were built and the decking renewed to a 12ft. span bridge in armoured concrete. The Country roads, bridges and culverts were maintained in good order throughout the year.

PENANG.

In addition to the general maintenance of roads, bridges and buildings the following were the more important of the public works carried out during the year, viz.:—

Roads.—Re-metalling about four miles of main road with granite; Laying down track metalling for two miles on the Bruas-Lumut Road, Dindings; Rebuilding two bridges; Extension of masonry drains at Balik Pulau and Tanjong Tokong; and widening and improving road at Bagan Jermal.

Buildings.—Fixing an electric light installation in the General Hospital; adding a verandah to the European Warders' Quarters; and new bath rooms and latrine for the Female Pauper Ward at the General Hospital.

The New Quarantine Camp at Pulau Jerejak was completed and opened for use.

A new reservoir dam was commenced at Lumut and new pipe lines laid.

PROVINCE WELLESLEY.

Among the more important works completed during the year were the rearrangement of the District Offices and Court House at Bukit Mertajam, the reconstruction of Permatang Pauh Pontoon Bridge and the construction of the main drain at Nibong Tebal village.

Good progress was made with the work of raising the dam of the Bukit Seraya reservoir, the sum of $32,334 being spent on a total estimate of $90,000. A beginning was also made with the erection of ferro-concrete posts along the Kedah frontier.

One hundred and ninety-eight miles of road, of which 148 are metalled, were maintained at a cost of $124,024. One 30 ft. span Bridge was reconstructed in ferro-concrete, the wooden decking of Juru Bridge was renewed in tar concrete and 14 culvert and small bridges were reconstructed in permanent materials.

The Muda and Krian Bunds and drainage channels were satisfactorily maintained at a cost of $3,282.

MALACCA.

A sum of $149,999 of which $56,898 was Government contribution, was expended by the Rural Board on the maintenance of 294·50 miles of roads, giving an average of $509·34 per mile.

Five wooden bridges and ten wooden culverts were renewed in reinforced concrete.

The sum of $89,991.52 was spent during the year out of a total estimated sum of $205,000 on improvement of the main roads by metalling in granite, and deviations were completed at Chabau and on the Jasin Road.

The Grab Dredger was employed during the year in removing 69,396·57 tons of silt from the entrance channel of the Malacca River. This silt was used in the reclamation work close at hand at 19·59 cents per ton.

The construction of a Revetment wall to part of the Reclamation cost $14,998.45.

SINGAPORE HARBOUR WORKS.

Progress was delayed during the year owing to difficulties in connection with the foundations of the Quay Wall.

It is hoped that these are now overcome and that this work will now proceed with rapidity.

A total length of 4,140 feet of wall was complete at the end of the year.

Filling up the reclaimed area with dredgings and covering with material from Mount Wallich was continued and 41 acres are completed.

In the Inner South Mole during the year there were deposited 241,304 tons of granite rubble obtained from the Quarry at Pulau Ubin.

The average number of men employed at the end of the year was 626 at Pulau Ubin Quarry including 46 Europeans, and 1,229 men on the Telok Ayer Quay Wall and Reclamation including 53 Europeans.

A total amount of £228,500 was paid to the Contractors on account of work done during 1911.

LABUAN.

The revenue was $78,990.04 as compared with $89,355 in the previous year. The expenditure amounted to $104,689.93 as against $104,650.04 in 1910.

On the 9th March, the mines at Coal Point, where the Labuan Coalfields Company, Limited, employed about thirteen Europeans and eight hundred Chinese, were closed. This was a serious blow to the prosperity of Labuan and the effect is shown by the following figures which give the comparative values of the trade of the island for the past three years:—

		1909.	*1910.*	*1911.*
		$	$	$
Merchandise—				
Imports	...	1,308,077	1,437,390	1,258,884
Exports	...	1,139,764	1,217,132	1,074,737
Total	...	2,447,841	2,654,522	2,333,621

The Imports and Exports to ports other than the Straits Settlements ports were:—

		1909.	*1910.*	*1911.*
		$	$	$
Imports	...	615,051	834,647	662,812
Exports	...	724,631	489,408	647,834
Total	...	1,339,682	1,324,055	1,310,646

The importation of Brunei Coal from the Sarawak Government mines increased towards the end of the year.

A very small quantity of coal cargo was exported, the total being 740 tons. 17,748 tons were exported as cargoes and bunkers, being 74,475 tons less than in the previous year.

The tonnage of shipping which entered Port Victoria and cleared was 136,884 (British 42,288 tons and Foreign 94,596 tons) as compared with 282,742 (British 152,668 tons and Foreign 130,074 tons) in 1910, and 165,137 (British 70,153 tons and Foreign 94,984 tons) in 1909.

H. M. S. *Merlin* arrived on the Station in May and commenced the new survey of Victoria Harbour, Brunei Bay, and the coast towards Baram Point.

On the 17th April an occulting light (4th order), white and red, visible 7 seconds and eclipsed 3 seconds, distant 14 miles, was established on Papan Island.

The total expenditure of the Public Works Department was $35,378, which included $4,836 for Personal Emoluments, as against $42,199 in 1910. The T head of the Government pier was renewed, a new Malay School was built, the public slaughter-house was renewed, extensive repairs were made to Government House, and an additional block of barracks for married Police Constables was nearly completed. A sum of $27,000 for a Lighthouse and Lantern on Kuruman Island was estimated, but only a sum of $916 was spent as the site for the buildings was not fixed till late in the year.

The re-survey of Labuan was continued and the work done may be considered satisfactory.

The Census of Labuan was taken at midnight on the 10th March, 1911, and the population was 6,546 persons consisting of 3,662 males and 2,884 females. The European and allied races accounted for 34 (25 males, 9 females), Eurasians 20 (9 males, 11 females), Chinese 1,799 (1,261 males, 538 females), Malays 3,163 (1,578 males, 1,585 females), Malays of Archipelago 1,271 (623 males, 648 females), Indians 193 (140 males, 53 females), others 66 (26 males, 40 females). About 1,000 Chinese and 7 Europeans employed in and about the coal mines left the Island before the taking of the Census. The total number of births registered was 189 and deaths 183. No epidemic or contagious disease occurred. The total number of patients treated in the Hospital was 296, of whom seven were Europeans, as against 338 in 1910 and 307 in 1909. The total rainfall was 99·82 inches as compared with 151·25 in 1910 and 114 in 1909. The mean temperature of the air was 81·51° F. (mean maximum 87·47° F. and mean minimum 75·76° F.), as compared with 83·51° F. (maximum 83·55° F., minimum 76·38° F.) in 1910 and 83·36° F. (maximum 86·49° F., minimum 76·77° F.) in 1909. The highest temperature recorded was 94° F. and the lowest 71° F. as against 93° F. and 72° F. in 1910, and 91° F. and 70° F. in 1909.

The Police Force consisted of one European Inspector, 40 Sikhs and 45 Malays. Of the above 11 Sikhs and 20 Malays did duty in Brunei. There were two murder cases during the year, one of a Chinaman by a Chinaman who was sentenced to death by the Chief Justice at Singapore; and another of a Sikh Police Constable. In all 89 cases came before the Courts. There were 15 prisoners in the Labuan Criminal Prison on the 1st January

and 35 were received in 1911. Of these 29 were discharged and one died leaving 20 in prison on 31st December. The daily average number of prisoners in the Criminal Prison was 15·77. There were no prisoners in the Civil Prison during the year.

The Coronation festivities were held on the 22nd and 23rd June, the Sultan of Brunei, who had never left his State before, being present with 600 of his followers.

CHRISTMAS ISLAND.

The revenue was $86,759.57 as compared with $85,023.34 in 1909. The expenditure was $16,155.67.

The total tonnage cleared from the Port was 70,399 as against 68,011 in 1910.

Imports were valued at $130,452.

The export of phosphate of lime amounted to 152,865 tons as compared with 105,481 tons in 1910. The largest amount exported in any previous year was 137,700 tons.

The population on the 31st December, 1911, was 1,384 and included 23 Europeans, 12 Eurasians, 41 Sikhs, 53 Malays, 8 Japanese and 1,247 Chinese. There were 23 deaths during the year and no births.

The health of those on the island was good; the death-rate per mille from all causes was 16·66, showing a reduction of two as compared with the previous year. Of the 19 deaths in Hospital six were due to beri-beri. One hundred and six cases of this disease were admitted during the year, which is the smallest number of admissions for beri-beri recorded on the Island.

There was one case of serious crime during the year.

The rainfall for 1911 amounted to 70·68 inches, rain falling on 158 days. The heaviest rainfall for a single day was 4·45 inches in May. The highest temperature recorded was 93·2, the lowest 67·2 and the mean temperature 80·5.

Steady progress was made with the construction of a large shed and conveyer for granular phosphate. Work was also begun on the Railway. Preparations were also being made for building a new steel pier considerably larger than either of the existing piers so as to facilitate the landing of the railway material.

GENERAL.

On the 22nd June festivities in honour of the Coronation of His Majesty King GEORGE V were celebrated throughout the Colony by all sections of the community.

The Kwong-Wai-Shiu Hospital, endowed and supported by subscriptions from the Cantonese and Hakkas of three prefectures near Canton, was opened at the beginning of May on the site of the Old Tan Tock Seng Pauper Hospital, which the Government leased for the purpose. Over 1,900 patients belonging to these three prefectures were admitted to the end of the year; many of these would otherwise have entered the Tan Tock Seng Hospital, which owing to the outbreak of malaria, was crowded with patients.

The decennial census of the Colony was taken on the 10th March.

The anti-Manchu movement in China ending in the outbreak of the revolution has not in any serious way affected the peace of the Settlements.

New Letters Patent constituting the office of Governor and Commander-in-Chief of the Straits Settlements and their Dependencies were passed on the 17th February, 1911, and on the same date new Instructions were passed under the Royal Sign Manual and Signet to the Governor and Commander-in-Chief.

The late Governor, His Excellency Sir JOHN ANDERSON, G.C.M.G., proceeded on leave of absence to Europe in April, and in July was appointed Permanent Under Secretary of State for the Colonies. Sir ARTHUR HENDERSON YOUNG, K.C.M.G., Chief Secretary to the Government of the Federated Malay States, was appointed Governor and Commander-in-Chief in succession to Sir JOHN ANDERSON, and arrived in Singapore to assume his office on 2nd September.

Between the departure of Sir JOHN ANDERSON and the arrival of His Excellency Sir ARTHUR HENDERSON YOUNG, Mr. E. L. BROCKMAN, C.M.G., Colonial Secretary, acted as Officer Administering the Government, Mr. A. H. LEMON acting as Colonial Secretary.

On the 11th September, Mr. E. L. BROCKMAN, Colonial Secretary, was appointed Chief Secretary to the Government of the Federated Malay States, and Mr. R. J. WILKINSON, C.M.G., succeeded him as Colonial Secretary.

On 27th November, 1911, Sir ARTHUR YOUNG sailed for India to attend the Durbar at Delhi.

During his absence Mr. R. J. WILKINSON acted as Governor, and Mr. A. T. BRYANT as Colonial Secretary. Sir ARTHUR YOUNG returned on December the 31st, 1911.

With the continued progress of the rubber planting industry, and the improved facilities for landing and shipping which are being provided in the ports of the Colony, there is every reason to hope that the prosperity of the Colony will not only be sustained but will continue to increase.

A. T. BRYANT,
Acting Colonial Secretary.

30*th September*, 1912.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1912.

FINANCIAL.

The revenue for the year 1912 amounted to $12,912,577, being an increase of $1,503,356 over the revenue for the preceding year. The expenditure was $9,295,102, an increase of $209,713.

The actual figures for 1911 and 1912 are shown in the following statements:—

A.—Revenue.

	1911.	*1912.*	*Increase.*	*Decrease.*
	$	$	$	$

TOTAL ...	$9,085,389	9,295,102	966,895	757,182
	Net increase ...		$209,713	

2. The sums expended on Personal Emoluments and Other Charges in the two years were:—

		1911.	*1912.*	*Increase.*	*Decrease.*
		$	$	$	$
Personal Emoluments	...	3,241,858	3,421,622	179,764	...
Other Charges ...	...	1,850,055	1,997,706	147,651	...

3. The following is a statement of the Revenue and Expenditure of the Colony for the five years 1908 to 1912:—

		Revenue.	*Expenditure.*
		$	$
1908	...	8,969,015	9,837,624
1909	...	8,795,001	8,542,731
1910	...	9,336,328	7,532,242
1911	...	11,409,221	9,085,389
1912	...	12,912,577	9,295,102

4. The Assets and Liabilities of the Colony on the 31st December, 1912, were as follows:—

Liabilities.		$	*Assets.*		$
Deposits	... ...	2,128,850	Indian Agency Account	...	545,929
Suspense	... ...	482,343	Investments ...	...	6,548,265
			Advances ...	...	195,228
Excess of Assets over			Loans to Municipalities	...	377,800
Liabilities	...	10,880,620	Imprests ...	...	10,137
			Loan Account ...	...	1,662,595
			Drafts and Remittances	...	18,812
			Cash in Transit	...	927
			Cash ...	...	4,132,120
TOTAL	...	$13,491,813	TOTAL	...	$13,491,813

showing an increase to the credit balance of the Colony during the year of no less than $3,617,475 in place of an estimated decrease of $330,424. The excess of revenue over the Estimates amounted to $3,238,681 and the saving on the estimates of expenditure to $709,218.

The principal excesses of revenue over the Estimates were Opium Revenue $2,427,566, Interest $171,729, Premia on Grants $151,901, Stamp Duties (various revenue services) $133,067 and Land Rents $113,760. The principal excesses on the estimates of expenditure were Military Expenditure $364,116 and Miscellaneous Services $122,649. The principal savings were Railway $342,838—due to the Railway having been leased to the Federated Malay States and Public Works Extraordinary $334,055.

PUBLIC DEBT.

A Loan of £5,000,000 was raised in 1907 and a further loan of £2,750,000 was raised in 1910 under the provisions of Ordinance IV of 1907. The position of the loan on the 31st December, 1912, was as follows:—

		£
3½ per cent S. S. Inscribed Stock	...	6,913,352
4 per cent Debentures ...	...	500

Outstanding Debentures amounting to £1,029,600 were paid off during the year.

Advances were made from Loan Funds as follows:—

		$
Tanjong Pagar Dock Board	...	40,381,997
Municipal Commissioners, Singapore		4,250,000
Municipal Commissioners, Penang ...		1,050,000
Government Harbour Works	...	10,592,513
		56,274,510
Expenses of Issue	...	3,215,989
Total	...	$59,490,499

Provision is made for the repayment of these loans by a Sinking Fund which will come into operation in 1917 and 1920.

The charge on account of interest on the public debt was $2,262,551 in 1912, as against $2,449,243 in 1911. The great portion of this charge is, however, borne by the Tanjong Pagar Dock Board and other bodies to whom portions of the loan have

been allotted. The actual sums paid by the Colonial Government in 1911 and 1912, respectively, were $806,961 and $533,155.

In local currency the total amount of the debt stood at $59,261,588 on the 31st December, 1912, which was about four and a half times the revenue of the Colony.

EXCHANGE.

The demand rate remained firm during the year between 2/4$\frac{5}{32}$ and 2/4$\frac{1}{16}$.

CURRENCY.

1. The currency of the Colony in circulation, exclusive of subsidiary coins, consisted of $39,572,134 in Government Currency Notes, $273,605 in bank notes issued by the Hong Kong and Shanghai Banking Corporation and the Chartered Bank of India, Australia and China, and $6,913,815 in dollars and half-dollars. The above amounts include stocks held by the Banks and the Treasuries of the Colony and the Federated Malay States, but do not include unissued currency notes still in the hands of the Currency Commissioners.

2. The total cost of the investments (including Depreciation Fund) held by the Currency Commissioners against the Government Currency Notes in circulation on the 31st December, 1912, was $21,165,749.21 and the market value of the securities on the same date was $18,271,405.71. The Coin Reserve held by the Commissioners in Singapore amounted to £47,712 in gold and $12,093,057 in legal tender silver. In addition sums aggregating £965,376-13-3 were held by the Crown Agents in Gold in London.

At the beginning of the year gold of the value of £137,752 was in the Vault and during the year the receipts were £608,505 and the issues £698,545, leaving a balance of £47,712 on the 31st December, 1912 as stated above.

3. Three millions five hundred and sixty-four thousand three hundred and fifty-three dollars and fifty cents worth of old subsidiary coin have been withdrawn from circulation reckoning up to 31st December, 1912. Of this $2,039,353.50 were sent to Bombay to be reminted into new subsidiary coin and $1,525,000 were sent to the Crown Agents for sale as bullion. The reminting of the new subsidiary coin has been completed. The total amount received from the mint up to 31st December was $2,345,472.25 and the profit on the coinage amounting to $479,735 has been credited to the Gold Standard Reserve.

4. The average bank-note circulation in 1912 was $291,042, compared with $353,417 in 1911. The average amount of Government Currency Notes in circulation in 1912 was for each month as follows:—

	$		$
January ...	37,636,162	July ...	39,705,142
February ...	38,075,538	August ...	41,251,413
March ...	37,681,371	September ...	42,063,817
April ...	37,941,610	October ...	42,377,579
May ...	38,305,662	November ...	41,554,484
June ...	38,850,976	December ...	39,894,431

MUNICIPAL REVENUE AND EXPENDITURE.

The revenue of the three Municipalities amounted to $4,443,322, and their expenditure, excluding sums spent on Loan Works, to $4,553,530. The usual comparative statements of revenue and expenditure, and of the debts of the Boards, showing the provision made for repayment, appear below.

The following return shows the revenue and expenditure of the Rural Boards, established to carry out in areas outside Municipal limits such of the provisions of the Municipal Ordinance as are applicable to country districts :—

	Revenue.	*Expenditure.*
	$	$
Singapore Island ...	39,629	113,035
Penang Island ...	43,764	73,213
Province Wellesley ...	202,371	194,572
Dindings	9,189	11,501
Malacca	249,773	272,382

TANJONG PAGAR DOCK BOARD.

The revenue and expenditure for the five years 1908–1912 were as follows :—

	Revenue.		*Expenditure.*	
	$	c.	$	c.
1908 ...	5,822,811	69	4,271,715	37
1909 ...	5,849,063	00	4,267,797	27
1910 ...	5,896,156	52	4,328,184	47
1911 ...	5,740,965	09	4,074,669	33
1912 ...	6,015,648	11	4,216,015	02

The capital debt due to Government including an estimated amount of $29,003,149.45 for initial cost stood at the end of 1912 at $40,465,624.64 on which the Board pays interest at 4 per cent.

In addition to the above-mentioned capital the Board has expended on new works and other expenditure of a permanent nature a sum of $2,846,135.24 from surplus revenue or reserve fund under Section 31 (2) of "The Tanjong Pagar Dock Ordinance 1905."

The following figures are taken from the Wharf Tonnage returns :—

	1908.	*1909.*	*1910.*	*1911.*	*1912.*
Number of vessels ...	2,364	2,366	2,393	2,528	2,693

NEW WORKS AT TANJONG PAGAR.

Lagoon Wet Dock and Main Wharf Re-construction.

The questions at issue between the Dock Board and Messrs. John Aird & Company were still *sub judice* at the end of December. In the year under review Messrs. Topham, Jones & Railton, Limited, the new Contractors for these works, made highly satisfactory progress in connection with their contract for the construction of the Lagoon Dock.

The East Wall and 330 lineal feet of the North Wall of the dock were completed, and only another month's work remained on the West Wall.

Work in connection with the Wharf Reconstruction was confined to the West Wharf which was completed up to the commencement of the West side of the entrance to the Lagoon Dock, beyond which point no further work is intended to be done until the removal of the temporary dam across the entrance is commenced.

A total amount of £252,500 has been paid to Messrs. Topham, Jones & Railton, Limited, of which £228,500 was paid for work carried out during the year 1912.

The following are the principal items of work executed by the new Contractors:—510,000 cubic yards of excavation from the body of the dock, 81,600 cubic yards from the trenches for the wall foundations—the excavated materials in each case being used to reclaim the Eastern and Western Swamps and for filling behind the dock walls—91,900 cubic yards of Concrete in the dock walls, 1,212 super yards of Moulded Concrete Ashlar, and 183 Tons of Iron and Steelwork.

The granite for the works has been obtained from the 7th and 8th Mile Quarries at Bukit Timah, and during the year about 80,000 cubic yards of stone were quarried and delivered on the works.

During the past year the average number of men employed on the works and at the Quarries was 2,113.

New Graving Dock at Keppel Harbour.

Good progress continued to be made with the construction of the New Graving Dock by Messrs. Topham, Jones & Railton, Limited, and water was admitted for the first time on 20th April, 1912, No. 1 Caisson was floated into its position at the Outer Stop, and the water was pumped out on 30th April; the operation taking rather less than two hours and thus proving the very satisfactory capacity of the pumping plant. The removal of the Cofferdam was then immediately commenced and was completed by the end of October.

The reclamations behind the dock walls have been finished and of the roads and quays thereupon about half were metalled and rolled before the end of the year, the remainder being well advanced.

Regular progress was maintained with the construction of the Entrance Channel Walls outside and over the site of the Cofferdam. The whole of the blockwork substructure of the East Wall was completed, leaving only 932 cubic yards of mass-work superstructure to be constructed on this side. Of a total quantity of 14,360 cubic yards of blockwork laid at the end of the year 11,260 cubic yards were set during the year under review.

To complete the West Wall 4,504 cubic yards of blockwork and 916 cubic yards of mass-work remained to be deposited.

To provide a depth of 33 feet at L. W. O. S. T. in the Entrance Channel dredging commenced in March, and 17,500 cubic yards were removed leaving 9,500 cubic yards to be dealt with.

During the year some 34,000 cubic yards of granite rubble were delivered on to the Works from the quarry at Pulau Ubin; at the Blockyard some 12,000 cubic yards of Concrete Blocks were made of which some 4,000 cubic yards were in stock at the end of December; the average number of men employed by the Contractors, Messrs. Topham, Jones & Railton, Limited, on the Works and at the Quarry was 814.

A total amount of £309,000 was paid to the Contractors for work done up to the end of 1912, out of which the sum of £73,700 was for work done during 1912.

The two Caissons for the Dock are being supplied and erected under a Contract with the Thames Ironworks Company; No. 1 Caisson has been completed and No. 2 requires only the roadway decking to be laid and the greenheart meeting faces to be dressed to enable it to be tested in place. The average number of men employed on the erection of these Caissons was 151.

GOVERNMENT WHARVES, PENANG.

The over-water godown was completed in July.

The fleet of lighters numbered 95. During the year 14 wooden and two steel lighters were built at Prye River Dock at a cost of $74,535 and two wooden lighters built at Singapore at a cost of $8,274. Repairs to old lighters were effected at a cost of $25,160. Twelve old lighters were condemned and sold.

TRADE.

Trade conditions during 1912 were admittedly favourable.

The value of foreign merchandise imported rose by £5·6 millions or more than 12½ per cent over the figures for 1911.

Export values also increased by £3·3 millions or 8·7 per cent.

Transhipment rubber from the Malay Peninsula being no longer included in the trade returns these increases would, when the 1911 figures are reduced by an approximate amount, be enhanced by about £1½ millions on each account.

Prices of imported articles were higher and quantities also generally increased; articles of Straits produce gave larger average prices but the volume remained practically stationary.

The following figures show the value of the foreign trade of the Colony in thousands of pounds sterling :—

	1911.	*1912.*	*Increase.*
	£	£	£
Merchandise—			
Imports	44,373	49,982	5,609
Exports	38,293	41,620	3,327
Coin and Bullion—			
Imports	2,064	2,523	459
Exports	1,594	2,145	551

The value of the inter-port trade including treasure was :— Imports, £3,208,000, a decrease of £44,000; and Exports, £3,149,000, an increase of £163,000.

The aggregate gross trade was therefore £102·6 millions, an increase of £10·1 millions or 10·8 per cent, compared with 1911.

Distributed according to classes the foreign trade records in thousands of pounds sterling are as follows :—

	Imports.		*Exports.*	
	1911.	*1912.*	*1911.*	*1912.*
	£	£	£	£
1. Live Animals, Foods, Drinks and Narcotics	17,174	20,138	14,059	15,566
2. Raw Materials ...	18,576	20,255	20,132	21,559
3. Manufactured and Partly Manufactured Articles ...	8,623	9,589	4,103	4,496
4. Coin and Bullion ...	2,064	2,523	1,594	2,145
Total ...	46,437	52,505	39,888	43,766

As already explained the figures for 1911 for Class 2 (Raw Materials) in the case of both imports and exports include a value of approximately £1½ millions of transhipment rubber.

VALUES.

Increased values in the case of imports are seen principally in the following articles :—tin ore, rice and other grains, sugar, cotton piece goods and sarongs, provisions with vegetables, fruits and onions and garlic, biscuits, raw hides, fish, liquors, apparel, hosiery and haberdashery, petroleum, coal, tobacco, cycles, motor cars and accessories, sewing machines and metals, cement, and kachang and coconut oils.

Declines in value are most noticeable in opium, silk piece goods, and matches imported.

Exports gave increased values in tin, Para rubber, spices, sago, hides, preserved pineapples, petroleum, tapioca, coffee, phosphates of lime, and gambier, but reduced values in jelutong, gutta percha, copra, rattans, and coconut oil.

QUANTITIES.

Import quantities advanced in tin ore, rice, sugar, cotton piece goods and sarongs, coal, liquors, tobacco, cotton blankets, corrugated iron, cement, tin plates, lubricating oil, onions and garlic, tea, milk, and live animals.

Decreased import quantities are recorded in opium, silk piece goods, petroleum, woollen blankets, fish, matches, and wheat flour.

The increase in volume of exports is principally in tin, Para rubber, preserved pineapples, phosphates of lime, arecanuts, sago, tapioca, hides, copal, white pepper, and gambier.

The declines are most apparent in copra, jelutong, gutta percha, black pepper, horns, rattans, and shells.

Trade with British and Foreign Countries.

The trade with the United Kingdom, British Possessions and Protectorates, and Foreign Countries including coin and bullion, is given below in millions of dollars:—

	Imports.		*Exports.*	
	1911.	*1912.*	*1911.*	*1912.*
	$	$	$	$
United Kingdom ...	40·8	46·7	85·9	85·4
British Possessions and Protectorates ...	212·6	231·8	101·8	120·1
Foreign Countries ...	144·6	171·5	154·2	169·6

The following statement shows the position of the Colony as a market for British and European Foreign goods since 1896 in thousands of pounds sterling:—

	1896 to 1900.	*1901 to 1905.*	*1906 to 1910.*	*1911.*	*1912.*
From United Kingdom ...	£2,981	3,752	4,012	4,694	5,380
„ Continent of Europe and United States ...	£1,553	2,314	2,208	2,415	3,144
British Excess ...	£1,428	1,438	1,804	2,279	2,236

	1896 to 1900.	1901 to 1905.	1906 to 1910.	1911.	1912.
Percentages of Total.					
United Kingdom ...	65·7	61·9	64·5	66	63·1
Continent of Europe and United States ...	34·3	38·1	35·5	34	36·9

The United Kingdom sent increased values of cotton piece goods and sarongs, machinery, hosiery, haberdashery and apparel, hats and caps, biscuits, corrugated iron, boots and shoes, brandy, tin plates, paints, telegraph and telephone materials, cycles, motor cars and accessories, whisky, cement, tinned provisions, linen, and perfumery.

The articles showing declines in value from the United Kingdom were hardware and ironware with cooking utensils, cigarettes, yarns, and provisions generally.

Imports from the Continent show advances from all countries.

The principal increases were as follows:—Austria in cotton piece goods, enamelware and cooking utensils, and cabinetware; Belgium in hardware and ironware, cottons, perfumery, and glassware; Denmark in cement; France in brandy; Italy in cottons and sarongs, milk, and hats and caps; Germany in beer, hosiery and haberdashery, India rubber goods, sarongs, milk, and machinery; Holland in milk, cottons, chemicals, and tobacco; and Sweden in matches.

Decreases were most marked in hardware and ironware, woollen cloth, and lampware from Germany; and sarongs and hardware and ironware from Holland, but increases were general throughout.

Import values from the United States of America rose in lubricating oil, petroleum, cigarettes, motor cars and accessories, and provisions of all kinds.

Export values to the United Kingdom show the same total as 1911, Para rubber yielding $18 millions more notwithstanding the omission for the first time of rubber transhipped which is estimated to have amounted in 1911 to over $12 millions, nearly all of which went to the United Kingdom.

Other advances are principally in tin, illipi nuts, India rubbers, sago, hides, preserved pines, gutta percha, and pepper.

The declines are small: they occur in values of gambier, jelutong, and Borneo rubber.

Of exports to the Continent values rose in tin, illipi nuts, phosphates of lime, gambier, sago, rattans, pepper, tapioca, preserved pines, and India rubber, but fell off chiefly in copra, gutta percha, gum copal, and Borneo rubber.

Exports to the United States advanced in values of tin, Para rubber, peppers, and gum copal, but fell in values of jelutong, gutta percha, rattans, copra, and gambier.

Values rose in the case of imports from Netherlands India, India and Burma, Federated Malay States, Indo-China, Japan, Non-Federated Malay States, Siam, British North Borneo and Sarawak, Hongkong and China, and Australia and New Zealand.

Exports values also rose in the case of the Federated and Non-Federated Malay States, Netherlands India, Japan, Siam, Borneo and Sarawak, French Indo-China, India and Burma, but fell off in the case of Hongkong and China and Australia.

AGRICULTURAL INDUSTRIES.

The area under Para rubber increased very considerably in Malacca and also to some extent in the island of Singapore: in Malacca it was 80,424 acres in 1911, and it is now 115,000 acres. By the side of this increase, there has in Malacca been also an increase in land under tapioca amounting to no less than 52·3%; for the 10,926 acres of 1911 have become 16,643 acres. Formerly the cultivation of tapioca in Malacca was on the decrease, and old tapioca land in 1909 was being put under rubber; but the need of a catch crop to young rubber began in 1911 to cause a recovery of the lost area.

In spite of the fall in price rubber continued highly remunerative both to proprietors and labourers. The wages of the latter were high enough in some cases to cause Malays to desert well established Kampongs and long cultivated padi fields to take up permanent work on Estates.

In the Northern Settlement tapioca has not materially changed and rubber has increased only slightly. Nutmeg and clove cultivation has in many allotments been abandoned on account of the higher rates for labour and of the fall in the prices of these products.

The extension of pine-apple cultivation in Singapore island continues, the crop being a catch crop to rubber, and the fruits finding a ready sale at the canning factories in Singapore. These canning factories also draw pines to some extent from outside the Colony. The cultivation of pine-apples has no place in Province Wellesley.

Coconut plantations have increased slightly in Singapore island and in Province Wellesley. Interest in them and in other Oil plants, *e.g.*, *Elaeis guineensis* (the African Oil Palm) and ground-nuts, has a tendency to grow.

In Penang coconuts were a little cheaper than in 1911, probably on account of a fall in the demand for copra. In Province Wellesley on the other hand they remained at a high price, the average price being nearly $41 per 1,000.

The Manchurian Soya bean, tried in Singapore, proved useless for the country, as was to be expected.

The area under rice in Malacca and in Province Wellesley is almost the same as it was in 1911.

In Penang and Province Wellesley the padi crop was generally poor.

Gambier, combined with pepper, occupied in 1912 a slightly larger area in Malacca than in 1911, and holds its own in Singapore island. Fruit and vegetable cultivation is not extending concomitantly with the extension of European owned and managed plantations, and, labour being much in demand, seems unlikely to extend.

LAND GRANTS.

The area of Crown Land alienated, and the number of Statutory Grants issued and the premia paid for the same during the last five years are as follows:—

	1908.	*1909.*	*1910.*	*1911.*	*1912.*
Total tonnage Entered and Cleared ...	1,455,436	1,347,201	1,529,597	1,637,673	1,535,201

As compared with 1908 this native craft tonnage has increased by 79,765 tons.

In Singapore during the year seven new steamers with a tonnage of 1,570 tons gross and 34 sailing vessels of 3,561 tons were registered under the Imperial Shipping Acts. Thirteen new sailing vessels of 1,232 tons were registered under Ordinance V of 1883; also 819 of 9,468 tons in all under Ordinance VIII of 1872.

LEGISLATION.

Seventeen Ordinances were passed during the year, of which nine were principal Ordinances and eight amending Ordinances.

Of the principal Ordinances the most important are:—

(1) The Straits Settlements Ports Ordinance, which provides for the proper management and control of the Ports of Singapore and Penang. For this purpose the Ordinance vests in bodies of Commissioners called the Singapore Harbour Board and the Penang Harbour Board the trust and duty of carrying out its provisions and constitutes each Board a body corporate with power to acquire and hold and under certain restrictions to lease and sell movable and immovable property.

The title to the immovable property held by the Tanjong Pagar Dock Board, which is to be vested in the Boards by Statutory Grants or otherwise is fully set out in a schedule to the Ordinance. A first charge upon this property or any subsequently acquired property is given to the Crown to secure all moneys from time to time owing by the Boards.

The actual amount of the capital debts of each Board is also stated in a schedule and provision made for the payment of interest thereon at the rate of 4 per cent per annum and for the formation of a sinking fund with a view to their liquidation.

Powers are further given to the Governor in Council to lend money to either Board for the general purposes of the Ordinance.

(2) The Harbour Works and Foreshores Reclamation Ordinance, which empowers the Government subject to the approval of the Legislative Council to carry out public works along or out from the foreshore of the Colony or in the sea-bed, to erect buildings upon land reclaimed from the sea and to lease or otherwise dispose of any part of the reclaimed areas. The Ordinance also defines certain cases where compensation can be claimed for interference by such works with public or private rights, and prescribes the procedure for determining the right to such compensation.

These two Ordinances had not been brought into operation at the end of 1912.

(3) The Interpretation Ordinance which consolidates the law relating to the construction of Ordinances and other written laws and facilitates the abbreviation of the language of such laws.

(4) The Wireless Telegraphy Ordinance, which empowers the Governor to grant licences for the establishment of wireless telegraphy stations or the installation or working of any apparatus for wireless telegraphy in the Colony or on board British Ships registered in the Colony and provides for the issue of regulations relating thereto.

(5) "The Betting Ordinance," which is directed against the mischief caused by the keeping of common betting houses and betting in public places. Special exceptions are made in the case of grounds used for the purpose of a race course for racing with horses and buildings thereon, on the days on which races take place.

(6) "The Light Houses Ordinance," which provides for the abolition of the light dues made payable by Indian Act No. XIII of 1854 in respect of vessels departing from or entering the ports of the Colony, and for the maintenance of the Straits lights out of the revenues of the Colony and such moneys as may be contributed by the Government of the Federated Malay States.

(7) "The Public Authorities Protection Ordinance," which introduces in a general Ordinance the provisions made in a number of Ordinances for the protection of officers acting in the execution of statutory public duties, and thus renders it unnecessary to introduce such provisions in future Ordinances. The Ordinance extends the protection to persons doing acts in the execution of any public duty or authority as well as in the execution of any Ordinance.

The changes introduced by the amending Ordinances were for the most part of no very great importance, but mention may be made of "The Theatres Ordinance 1908 Amendment Ordinance 1912" designed to regulate public cinematograph displays by providing power to prevent objectionable displays.

"The Merchant Shipping Ordinance 1910" was proclaimed and brought into operation from the 1st December, 1912, together with a number of rules and regulations thereunder and "The Labuan Ordinance 1911," constituting Labuan with its dependencies a separate Settlement, was brought into operation on the same date. "The Imperial Copyright Act 1911" was proclaimed in the Colony on the 1st of July, 1912.

EDUCATION.

There are in the Colony 186 Vernacular Schools where the teaching is in Malay. Free tuition up to the Fifth Standard is provided by the Government at these schools to eleven thousand five hundred and fifty-nine boys and girls. The Government also finances and controls eight schools where the teaching is in English and goes up to the Seventh Standard.

There are also thirty-one Aided-schools managed by private bodies and in receipt of grants-in-aid from Government.

The net expenditure on Government English Schools was $100,617,58, on Aided Schools (English, Anglo-Tamil, Tamil and Chinese) $125,929.90, and on Government Vernacular Schools, $100,153.13.

The Malacca Training College for Malay Teachers continued to do good work. Its cost, during the year under review, was $9,614.23.

The numbers in Secondary Classes show a small increase over the figures for 1911.

The Normal Classes continued their work during the year. Thirty-one Normal Certificates were issued.

The Training Class for girls in Singapore dealt with two students in their second year and four in their first. The two passed well in November and obtained their certificates and are now employed as teachers. The other four are continuing the course. The class is under the control of the Headmistress of the Raffles Girls' School.

In Penang there is an increase of 149 in the enrolment of girls at the English schools, chiefly among the Chinese. In Singapore there is an increase of 163. In Malacca there has been an increase of 54 in the schools previously receiving Government support and the Methodist Girls' School, Malacca, has been added to the Grant-in-aid schools.

GOVERNMENT INSTITUTIONS.

HOSPITALS.

During 1912 there was a fall in admissions compared with 1911, this latter having been an exceptionally unhealthy year, during which there was a pandemic of malaria noticeable also in other Eastern Countries.

The total number of admissions to the Hospitals of the Colony exclusive of the Lunatic Asylum was 38,971 as against 44,026 in 1911, 32,979 in 1910 and 27,543 in 1909.

There were 238 admissions to the Lunatic Asylum at Singapore, compared with 220 in 1911 and 228 in 1910.

Including those remaining from the previous year the total number of patients treated in the Hospitals was 42,224 of whom 1,794 were Europeans. In 1911 the corresponding figures were 46,962 and 1,702 respectively. The deaths numbered 4,653 (87 being Europeans) as against 6,124 and 82 in 1911. The mortality rate shows a fall, the percentage of deaths to total cases treated being 12·69 for 1910, 13·04 for 1911 and 11·02 for 1912.

The number of inmates in the Leper Asylums of the Colony has increased from 440 in 1910 and 471 in 1911 to 488 on 31st December, 1912. The number of deaths being 173 in 1911 and 148 in 1912.

REFORMATORY.

The expenditure of this institution, exclusive of the salaries of the Superintendent and Watchmen, was $11,339.71 in 1912, as against $9,820.69 for the preceding year. The average daily muster was 76·78, against 71·19 in 1911. There remained 82 boys on the 31st December. The health of the inmates was good. They are taught either English or Romanized Malay. The usual work of bread-making, vegetable-growing, carpentering, tailoring and shoemaking was continued.

SAVINGS BANK.

The amount at the credit of the depositors in the Government Savings Bank on the 31st December, 1912, was $822,017, the highest sum reached. The average amount at the credit of each depositor was $160.96.

The deposits were $573,757, as compared with $536,502 in 1911.

The deposits exceeded the withdrawals by $43,569.

There was a profit on the year's working of $3,980. The present value of the investments is as follows:—

	$
India 3½ per cent Rupee Paper ...	472,735
Singapore Municipal Bonds at 5 per cent	65,700
Do. do. at 4½ „	16,425
Do. do. at 4 „	44,178
Fixed Deposits in Banks	134,000
Various Colonial Guaranteed and Corporation Stocks	78,795
In India for Investment	10,000
Total ...	$821,833

POLICE.

The Police Force numbers over 2,600 men of whom 413 are Sikhs. Forty-nine boys joined the Training Depôt at Malacca in 1912, and forty-eight were drafted from the Depôt into the Force. Five hundred and twelve recruits joined the Force during the year, of these two were Europeans, two Eurasians, and one hundred and twenty Sikhs.

PRISONS.

The daily average number of prisoners in the various prisons during 1911 and 1912 was as follows:—

		1911.	1912.
Singapore ...	Criminal ...	777	770
	Civil ...	67	95
Penang ...	Criminal ...	277·53	208·99
	Civil ...	29·37	29·27
Malacca ...	Criminal ...	33·99	31·11
	Civil ...	20·61	13·93

The practice of banishing habitual criminals has been continued. Four hundred and forty-six were banished in 1912.

The health of the prisoners was good, the number of deaths being at Singapore 22, at Penang 12 and at Malacca one (a vagrant).

CRIMINAL STATISTICS.

Thirty-seven reports of murder and forty-nine of gang-robbery were received during the year; of the latter 15 were not substantiated in the preliminary investigation.

The returns do not disclose any abnormal features.

One hundred and ten persons, as against 126 in 1911, were tried before the Supreme Court. Murder, gang-robbery, counterfeiting coins and returning from banishment were the principal crimes. Eleven persons were convicted of returning from banishment.

The total number of cases disposed of by the Police Magistrates was 16,538, a decrease of 513 cases over the figures for 1911.

VITAL STATISTICS.

The estimated population of the Colony was 728,635, compared with the Census population of 711,951 for 1911. The figures given for the Census of 1901 were 572,249. Twenty thousand five hundred and ninety-four births and 28,422 deaths were registered as against 18,069 and 33,072, respectively, in 1911.

The death-rate was 39·01 per mille of the population. The rate was 46·45 in 1911 and 41·88 in 1910.

The birth-rate has risen since the previous year from 25·38 to 28·26 per mille.

The deaths from the more important infectious diseases in 1912, excluding imported cases landed on or occurring amongst contacts on the Quarantine Stations, were as follows:—

Small-pox:	73	against	386	in 1911.
Cholera:	121	„	331	„ 1911.
Plague:	37	„	32	„ 1911.

There has been a reduction in the deaths returned from preventable diseases such as Beri-beri, Phthisis, Dysentery, and Malaria, more noticeable on account of the enhanced death-rate from all diseases in 1911. Special attention is being paid to these diseases and improvements now in progress in food and water supplies, drainage, housing of the poor, provision of open spaces, sewage removal, training of midwives and Estate sanitation laws, etc., must in time bear fruit. It must not be forgotten that Singapore, Penang and Malacca, from their geographical positions, are dumping grounds for large numbers of sick from the neighbouring countries and with the many races and languages prevailing it is found impossible in the majority of cases to obtain any reliable history from patients of this class. Undoubtedly our death-rate is largely influenced to our apparent detriment by these means.

During the year under report the following death returns were made:—

Malaria	... 4,303	against	5,821	in 1911.
Infantile Convulsions	3,915	„	3,635	„ „
Tuberculosis	... 2,565	„	2,907	„ „
Beri-beri	... 1,926	„	2,056	„ „
Dysentery	... 1,549	„	2,035	„ „

A large number of these were only seen after death by the registering officers and the figures must therefore be only taken as roughly correct.

CLIMATE.

The mean temperature of the air in Singapore was 82·5° with a maximum of 93° on March 3rd and a minimum of 70·5° on February 5th: that of Penang being 83·4°, the highest temperature recorded being 95° on March 31st, and the lowest 68° on January 30th.

In Province Wellesley the mean temperature was 83·3°: the maximum being 97° on July 27th, the minimum 66·5° on February 28th. In Malacca the mean temperature was 82·2°

with the maximum of 95·2° on March 30th, the lowest 67° on April 1st. In Labuan the mean temperature was 81·9°, the maximum recorded being 95·5° and the minimum 71°.

Rainfall:—Singapore	...	... 106·60	inches.
Labuan	...	... 117·54	„
Penang	...	... 100·12	„
Province Wellesley		... 87·16	„
Malacca	...	... 67·00	„
Dindings	...	... 78·98	„

The prevailing direction of the wind changes with the N. E. and S. W. Monsoons. The former blowing from November to April and the latter from May to October.

POSTAL, TELEGRAPH AND TELEPHONE SERVICE.

A value-payable post was established with India and arrangements were made for the introduction of a similar system with Ceylon and Kedah. The parcel post rates to Australia and New Zealand were reduced. Parcel post services were arranged to France by P. & O. Packets and to Indo-China by French Mail Steamers.

The number of postal articles (excluding parcels) posted in the Colony was 8,789,291, an average of 12·31 per inhabitant. The number received for delivery was 7,429,488. The number of messages transmitted over the Government telegraph lines increased from 228,499 to 244,301, and the number of subscribers to the Government telephone exchanges from 470 to 561.

IMMIGRATION.

(I).—CHINESE.

Immigrants from China during the year 1912 numbered 251,644, a decrease of 6·7 per cent below the figure for 1911 which was the highest yet recorded.

Adult females to the number of 23,327 arrived during the year 1912, an increase of 589 or 2·5 per cent over the number for 1911. The females amount to 11·3 per cent of the males and this is the highest percentage hitherto recorded for any year.

The number of infants of one year and under who arrived in the Colony was 2,696 and of these 2,083 landed in Singapore. Of this latter number 927 were reported as leaving for other ports and the balance of 1,156 were probably added to the population of the town.

The number of "unpaid passengers," *i. e.*, labourers who obtain free passages from China in consideration of a promise to enter into contracts in Singapore was 13,600, a decrease of 10,745 or 55·8 per cent below the number for 1911. This falling off in numbers was probably due to a decreased demand for this class of labour as the supply was fully equal to requirements throughout the year.

Harvests in South China are reported to have been satisfactory in 1912 but the price of rice was high there as elsewhere.

The following table shows the total number of Chinese Immigrants for the last five years:—

Year.	*Men.*	*Women.*	*Boys.*	*Girls.*	*Total.*
—	—	—	—	—	—
1908	129,913	12,909	7,767	2,863	153,452
1909	128,878	12,126	7,946	2,802	151,752
1910	184,856	16,395	11,522	3,548	216,321
1911	226,126	22,738	16,033	4,957	269,854
1912	206,018	23,327	16,794	5,505	251,644

(II).—INDIAN.

The figures for the last five years are appended:—

	1908.	*1909.*	*1910.*	*1911.*	*1912.*
	—	—	—	—	—
1. Statute Immigrants ...	5,456	4,119	2,523	None.	None.
2. Free Coolies (with aided tickets) ...	20,049	20,289	56,002	78,356	73,671
3. Other Immigrants ...	29,017	25,409	25,198	30,115	33,257

The "other immigrants" include 7,684 children. The importation of statute immigrants (indentured labourers) ceased in 1910, and there has been a slight decrease in the number of free immigrants with cheap tickets. The number of passengers with ordinary passage tickets is the largest ever recorded. This large increase is due to the requirements of the rubber-planting industry.

The number of Indians leaving the Colony for Southern India was 61,350 adults and 2,535 children, as against 46,464 adults and 1,639 children in 1911.

The excess of immigrants over emigrants amounts to 37,894 adults and 5,149 children, as against an excess of 56,754 adults and 5,614 children in the previous year.

MONOPOLIES.

During the year 1912, 4,107 chests of opium (Indian and Persian) were cooked at the Factory giving a total yield of 4,973,447 tahils of chandu, an increase of 260,339 tahils over 1911.

As in 1911, the price of raw opium varied very greatly. The lowest price paid by the Monopolies was $900 per chest in September and October, and the highest $2,200 in March and April. The selling price of chandu to licensees was raised from $4.36 to $5 a tahil on the 11th May. The retail price to the public was at the same time raised from $4.80 to $5.50 a tahil.

The total number of tahils sold in the three Settlements amounted to 1,661,717·03, made up as follows:—

Singapore 1,037,375, Penang 477,532, and Malacca 176,810, and the total cash received for the above sales amounted to $8,050,620.45.

The revenue collected in respect of liquor duty, store rent, distillery rent and toddy farms amounted to $743,158.15 in Singapore, $548,307.34 in Penang and $169,817.45 in Malacca, giving a total of $1,461,282.94.

During the year 492 prosecutions were instituted in Singapore for unlicensed selling and other offences against the Chandu and Liquors Ordinances and the Deleterious Drugs Ordinance, 203 in Penang and 63 in Malacca. Seizures were made of 157 tahils of opium, 3,655 tahils of chandu, $3\frac{3}{8}$ ounces of cocaine, $96\frac{5}{16}$ ounces of morphia, and 1,674 tahils of bhang.

PUBLIC WORKS.

SINGAPORE.

Among the public works completed during the year were three Vernacular Schools and Teachers' Quarters, at Palembang Road, Orchard Road and Pulau Tekong; an extension consisting of two Class Rooms at Raffles Girls' School; an Examination Hall at Raffles Institution; a Thresh's Disinfector and Quarters for Engineer and Firemen at the General Hospital; New sea walls to the reclamation at St John's Island, and at Telok Saga, Pulau Brani; Dredging and reclamation of Swamps, Singapore River; and Re-arrangement of the drainage in Lower Cross Street, consisting of concrete and brick surface drains and underground sewers discharging into the new intercepting sewer on the Raffles Quay.

Good progress was also made with the New Offices and Supper Room, Government House; the New School, Pearls Hill and with the Electric Light installation at the General Hospital.

No new roads were constructed during the year but several new culverts were built in place of existing ones which were in an unsatisfactory condition. The country roads, bridges and culverts were maintained in good order throughout the year. Several miles of the Changi Road have been treated with a coating of tar and as this experiment has proved successful other portion of roads, particularly hilly stretches, where storm scour causes damage, will be similarly dealt with.

PENANG.

Roads.—In addition to the general maintenance of roads and bridges, votes for the following special services were provided and work was completed during the year, viz.: Re-metalling one mile of the Paya Trubong and Telok Bahang Roads, Track metalling the Bruas-Segari Road in continuation of the previous year's work and Re-metalling one mile on the Sungei Rotan Road and Lumut Sitiawan Road. A new 6-ton steam roller was purchased for the Dindings. A commencement was made with the completion of the road round the Island for which a vote on account was given in the middle of the year.

Sanitation.—New concrete drains and three concrete outlets to the sea were constructed at Tanjong Tokong and an extension of the village drain to the river was completed at Balik Pulau.

Buildings.—The more important works completed during the year were the rebuilding of Balik Pulau Hospital Wards and outbuildings, the extension of Titi Tras and Glugor Vernacular Schools and the erection of a new Vernacular School at Batu Feringgi.

A contract was let for the new Girls' School in Penang and work commenced, to be completed in 1913. Coolie Lines for the Telephone Department and Public Works Department were erected at Datoh Kramat. A new Civil Prison was built inside the present prison wall. Several improvements to the General Hospital were completed.

At the Quarantine Station, Pulau Jerejak, the reservoir dam was raised 4 feet to increase the storage, the reservoir was fenced in and a small Jewell pressure filter fixed on the pipe line. Quarters for 14 more attendants were commenced but not quite completed. Contracts were also let late in the year for a large catchment drain, additional pump and engine and a new reception shed.

At the Dindings a new drain was laid to the Clerks' Quarters and the Reservoir dam and pipe line completed. Improvements to the Vernacular Schools at Pangkor and Sungei Pinang were completed.

MALACCA.

A sum of $224,988 of which $87,553 was contributed by Government was expended by the Rural Board on the maintenance of 294·50 miles of roads, giving an average of $765 per mile.

Seven wooden bridges and 18 culverts were renewed in reinforced concrete.

The sum of $99,989 was spent in improvement of the main roads by metalling in granite. A road deviation of a little more than half a mile between Kesang and Jasin was constructed during the year at a cost of $5,150.

The Grab Dredger removed 85,816 tons of silt from the entrance channel of the Malacca River. The silt was used for reclamation work close by. The cost was 14½ cents per ton.

The construction of a Revetment wall to the South side of the Reclamation cost $24,996.

SINGAPORE HARBOUR WORKS.

Good progress was made during the year with the Quay Wall, the whole length of the wall (4,140 ft.) being built to the underside of the coping.

Filling up the reclaimed area with material from Fort Palmer was continued and 49 acres completed.

During the year 301,824 tons of granite rubble were deposited in the Inner South Mole. The rubble was obtained from the Quarry at Pulau Ubin.

The average number of men employed at the end of the year was 470 at Pulau Ubin Quarry, including 36 Europeans, and 1,326 men on the Telok Ayer Quay Wall and Reclamation, including 51 Europeans.

A total amount of £281,500 was paid to the Contractors on account of work done during 1912.

LABUAN.

On the 1st December, 1912, with the coming into operation of the Labuan Ordinance 1911, Labuan became a separate Settlement of the Colony.

At the same time a Rural Board was constituted to control Municipal matters in the town of Victoria.

The revenue of the Island was $76,084.40 as compared with $78,990.44 in the previous year. The expenditure amounted to $99,197.32 as against $104,689.93 in 1911.

The mines at Coal Point which were closed by the Labuan Coalfields Company, Limited, on the 9th March, 1911, had not

been reopened by the end of the year. This as was pointed out in the report for 1911 seriously affected the prosperity of Labuan, as the Company formerly employed thirteen Europeans and eight hundred Chinese, and spent about $20,000 per mensem in the Island.

The following figures give the comparative values of the gross trade for the past three years:—*

		1910.	*1911.*	*1912.*
		$	$	$
Imports	...	1,437,390	1,258,885	1,286,713
Exports	...	1,217,132	1,075,236	1,147,341
Total	...	2,654,522	2,334,121	2,434,054

The Imports and Exports to ports other than the Straits Settlements ports were:—

		1910.	*1911.*	*1912.*
		$	$	$
Imports	...	602,743	662,813	664,809
Exports	...	727,724	648,333	805,602
Total	...	1,330,467	1,311,146	1,470,411

Considerable quantities of merchandise that formerly came from the neighbourhood of the Limbang, Temburong, and other rivers for shipment in Labuan now go to Singapore *viâ* Kuching by a Sarawak Steamer.

Imports of rice, sago flour, inferior "getah" and petroleum advanced.

A considerable increase is shown in exports to British North Borneo.

The tonnage of shipping which entered Port Victoria and cleared was 252,822, being 20,946 less than in 1911. German tonnage increased considerably which was due to another vessel belonging to the Norddeutscher Lloyd Company being placed in the regular trade between the Straits and the Philippines *viâ* Labuan. There is now a German weekly mail and passenger service to and from Singapore.

H. M. S. *Newcastle* was the only British warship that visited the port during the year.

* The figures given in the 1911 report have been corrected.

H. M. S. *Merlin* (surveying ship) arrived in April to continue the survey in Labuan and Brunei waters and remained till the end of the year. Papan Island Lighthouse has been painted white which facilitates the navigation of vessels approaching the port.

The foundation for a steel Lighthouse on Kuraman Island was commenced and the light should be established in 1913.

The total expenditure of the Public Works Department was $26,741 exclusive of $5,722 for Personal Emoluments, as against $35,378 in 1911 which included $4,836 for Personal Emoluments.

A sum of $2,000 was spent on anti-malarial works in and around the town of Victoria. The stone-built quarters for the Kuraman Lighthouse were completed and a new contagious ward near the Hospital was erected.

The total number of births registered was 211 and of deaths 125. No epidemic or contagious disease occurred. The total number of patients treated in the Hospital was 221 (of whom 7 were Europeans) as against 296 in 1911 and 338 in 1910.

The total rainfall was 117·54 inches as against 99·82 inches in 1911. The mean temperature of the air was 81·9°, mean maximum 87·9° and mean minimum 73·6°, as compared with 81·51° (maximum 87·47° and minimum 75·76°) in 1911.

The highest temperature recorded was 95·5° and the lowest 71° as against 94° and 71° in 1911.

The Police Force consisted of one European Chief Inspector, 41 Sikhs and 45 Malays. Of the above 14 Sikhs and 20 Malays did duty in Brunei. There was no murder case or crime of a serious nature. In all 69 cases came before the Courts. There were 20 prisoners in the Labuan Criminal Prison on the 1st January and 46 were received in 1912. Of these 43 were discharged and 2 transferred to the Singapore Criminal Prison leaving 21 in Prison on the 31st December. The daily average of prisoners in the Criminal Prison was 22·13. There were no prisoners in the Civil Prison during the year.

The re-survey of the Island, excluding the Northern portion conceded to the Coalfields Company was completed.

CHRISTMAS ISLAND.

The revenue was $93,595.94 as compared with $86,759.57 in 1911.

The total tonnage cleared from the port was 73,596 tons as against 70,399 tons in 1911. This includes 16 trips of the Phosphate Company's steamer *Islander* to Singapore.

Imports other than those from Singapore consisted almost entirely of plant, machinery, tools, etc., for the Phosphate Company and were valued at $49,108.

The total export of phosphate of lime in 1912 was 156,948 tons as compared with 152,865 in 1911, which was the highest figure previously recorded. Taking the average value at 53/- per ton the total value of the exports would be £415,912.

The population at the end of the year was 1,561, compared with 1,384 at the end of 1911. That figure included 22 Europeans, 14 Eurasians, 1,408 Chinese, 47 Sikhs, 63 Malays and 7 Japanese. There were 20 deaths during the year and three births.

The island enjoyed comparative immunity from beri-beri and serious disease. The death-rate from all causes was 13·45 per mille. There were only 25 admissions to hospital on account of beri-beri with 3 deaths from this disease.

The year 1912 was very dry though not quite so dry as 1911. The rain fall being 77·73 inches, rain falling on 156 days as against 70·68 inches in 158 days. The highest temperature recorded was 92·0 and the lowest 70·4, the mean temperature being 81·08.

On November 26th a storm occurred which appeared to be the tail end of a hurricane, and did considerable damage.

Only three charges of serious crime came before the Court and were transferred to Singapore, and of these only one resulted in a conviction. The cases dealt with in the local Court were for the most part unimportant.

Work on a new pier was begun and a large "bin" for storing phosphate and an elevator for loading purposes were constructed. The initial difficulties of a projected new Railway to South Point were to a great extent surmounted by the end of the year.

GENERAL.

Mr. A. T. BRYANT acted as Colonial Secretary from the 26th February to the 26th December.

The most notable administrative event of the year was the decision to sell the Singapore Railway to the Federated Malay States Government at a price to be agreed upon. This sale has since been approved by a resolution of the Legislative Council.

Commissions of enquiry were held on the Quarantine Station and on the Hospital and Medical Service of the Colony. The latter Commission did not issue its report before 1913 but the recommendations of the former were embodied to some extent in the Estimates and are now in process of being carried out.

Statistical comparisons extending over only two successive years are of little value as indications of general administrative tendencies. A longer survey—taking us back to 1901—shows us that the revenue has increased by $4,094,220 in eleven years; but the bulk ($3,812,800) of this increase is represented by the growth of the profit on "licences" (principally opium and spirits), while another substantial item (railway revenue) was non-existent in 1901. The general revenue of the Colony has shown surprisingly little expansion. In the matter of expenditure great spending departments such as the Police, the Hospitals and Education show disproportionate increases. Side by side with these changes there is a noticeable tendency towards decentralization or devolution. In 1901 the three Municipalities were the only great branches of the public service which were not under direct official control. We now have the Municipalities, the Rural Boards, the Hospital Boards, the Education Board, the Indian Immigration Fund Committee, and above all the Harbour Boards,—all possessing great statutory powers, and important revenues. The proposal to administer Estate Hospitals by means of a similar semi-official body is a more recent illustration of the same tendency. It is a very interesting tendency and one that must in time exercise an all important influence on the destinies of the Colony.

R. J. WILKINSON,
Colonial Secretary.

29th September, 1913.

REPORT ON THE STRAITS SETTLEMENTS

FOR THE YEAR 1913.

FINANCIAL.

The revenue for the year 1913 amounted to $12,397,747, (exceeding the estimate by $1,507,379), whilst the expenditure was $10,468,618 (which is less than the estimate by $549,496).

The actual figures for 1912 and 1913 are shown in the following statements:—

A.—Revenue.

	1912.	*1913.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Port, Harbour, Wharf and Light Dues ...	257,360	133,544	...	123,816 (*a*)
2. Licences, Excise and Internal Revenue not otherwise classified ...	9,920,134	9,487,388	...	432,746 (*b*)
3. Fees of Court or Office, Payments for Specific Services, and Reimbursements in Aid ...	611,862	631,915	20,053	...
4. Post and Telegraphs ...	657,131	748,803	91,672	...
5. Government Railway ...	150,217	...	...	150,217 (*c*)
6. Rents of Govt. Property	595,999	639,142	43,143	...
7. Interest	359,444	444,852	85,408	...
8. Miscellaneous Receipts ...	129,429	115,679	...	13,750
	$12,681,576	12,201,323	240,276	720,529
9. Land Sales	231,001	196,424	...	34,577
Total ...	$12,912,577	12,397,747	240,276	755,106
		Net decrease	...	$514,830

(*a*) Due to abolition of certain light dues.
(*b*) Decreased consumption of chandu.
(*c*) Sale of the railway to the Federated Malay States Government.

B.—EXPENDITURE.

	1912.	*1913.*	*Increase.*	*Decrease.*
	$	$	$	$

24. Railway	65,352	...	...	65,352
25. Government Monopolies	393,572	391,865	...	1,707
26. Botanical Gardens and Museum	48,769	52,461	3,692	...
27. Public Works Department	321,314	321,532	218	...
28. Public Works, Recurrent	226,358	217,615	...	8,743
29. Public Works, Extraordinary	709,699	1,030,586	320,887	...
TOTAL ...	$9,295,102	10,468,618	1,716,691	543,175
		Net increase ...	$1,173,516	

The expenditure upon personal emoluments ($3,612,435) and "other charges" ($2,382,763) shows a decided increase upon the expenditure for the preceding year when the figures were $3,421,622, and $1,997,706 respectively.

The following statement shows how both the revenue and the expenditure of the Colony have increased in the last five years:—

		Revenue.	*Expenditure.*
		$	$
1909	...	8,795,001	8,542,731
1910	...	9,336,328	7,532,242
1911	...	11,409,221	9,085,389
1912	...	12,912,577	9,295,102
1913	...	12,397,747	10,468,618

The Assets and Liabilities of the Colony on the 31st December, 1913, were as follows:—

Liabilities.		$	*Assets.*		$
Deposits	... ...	2,140,923	Indian Agency Account	...	313,399
Suspense	... ...	611,557	Investments ...	...	5,979,749
Drafts and Remittances	...	10,312	Advances ...	...	358,535
Excess of Assets over Liabilities	...	12,809,749	Loans to Municipalities	...	304,060
			Imprests ...	...	11,895
			Loan Account ...	...	4,724,653
			Cash in Transit	...	5,248
			Cash ...	...	3,875,002
TOTAL	...	$15,572,541	TOTAL	...	$15,572,541

The credit balance of the Colony increased during the year by $1,929,129.

The principal excesses of revenue over the Estimates were in respect of Opium Revenue ($1,155,895), Liquors ($246,262), Interest ($102,472), Postage Stamps ($41,344), Premia on Grants ($133,174), and Land Rents ($60,960). The principal excesses of expenditure were upon Military Expenditure ($608,449) and Miscellaneous Services ($419,311). The principal savings were in respect of Public Works Extraordinary $980,912 (which is not a matter for satisfaction) and the charge on account of the Public Debt $114,950.

PUBLIC DEBT.

The indebtedness of the Colony is in respect of the loan raised by the issue of 3½ per cent Straits Settlements Inscribed Stock under the provisions of Ordinance IV of 1907, and its amount on the 31st December, 1913, was £6,913,352, of which the equivalent in local currency is $68,491,819.

Outstanding debentures amounting to £500 were paid off during the year.

The expenditure upon the services in respect of which the loan was raised stands as follows:—

		$
Singapore Harbour Board	...	44,807,318
Penang Harbour Board	...	2,595,367
Municipal Commissioners, Singapore		4,484,460
Municipal Commissioners, Penang	...	1,250,000
Government Harbour Works	...	11,966,465
		65,103,610
Expenses of issue less interest received		3,388,209
Total	...	$68,491,819

The charge on account of interest on the public debt was $2,074,293 in 1913. The great portion of this charge is, however, borne by the Singapore Harbour Board and other bodies to whom portions of the loan have been allotted, and the actual sum paid by the Colonial Government itself was $90,550 only.

EXCHANGE.

The demand rate (Bank opening rates only) ranged during the year between 2/4 $\frac{3}{16}$ and 2/3 $\frac{31}{32}$. It was, however, only quoted below par on two days during the year (30th and 31st July) and other quotations show that par was obtainable on those days.

CURRENCY.

The currency of the Colony in circulation, exclusive of subsidiary coins, consisted of $43,222,548 in Government currency notes, $230,277 in bank notes issued by the Hong Kong and Shanghai Banking Corporation and the Chartered Bank of India, Australia and China, and $6,604,013 in dollars and half-dollars.

The total cost of the investments (including depreciation fund) held by the Currency Commissioners against the Government Currency Notes in circulation on the 31st December, 1913, was $22,162,935 and the market value of the securities on the same date was $18,441,550. The coin reserve held by the Commissioners amounted to £57,450 in gold and $12,402,859 in legal tender silver in Singapore and £1,285,376 in London.

The total withdrawals from circulation of old subsidiary coin represented at the end of the year a sum of $3,624,353. Coins to the value of $2,071,353 were sent to Bombay to be reminted into new subsidiary coin and $1,553,000 were sent to the Crown Agents for sale as bullion. The greater part of the reminting of the new subsidiary coin was completed in March, 1913, but one subsequent shipment of $32,000 worth of old subsidiary coin of 800 fineness was sent in October, 1913 to Bombay for reminting into new subsidiary coin of 600 fineness. The reminting of this last shipment had not been completed at the end of the year. The total amount received from the mint up to 31st December was $2,373,817 and the profit on the coinage amounting to $501,381 of which $450,000 has been duly credited to the Gold Standard Reserve Fund. The balance will be so credited when the last transaction is completed.

The cancellation and destruction of notes is in a very backward state, and more attention must be given to this important part of the duties of the Currency Commissioners. No less than 2,915,776 cancelled notes were in the hands of the Commissioners at the end of the year awaiting sorting, and the various processes connected therewith, prior to destruction. The number of soiled notes in circulation is another matter to which greater attention is being given.

TRADE.

Although the totals both of imports and exports show increases, the year cannot be said to have been a good one for the trade of the Colony. During the first half of the year, the demand for goods both in the import and export departments was fair, but afterwards a heavy fall took place in the price of rubber, and the prices of tin and produce generally declined, and the depression in the exports reacted unfavourably upon the import trade.

Compared with 1912, foreign imports of merchandise advanced by 3·6 million pounds sterling or 7·1 per cent and exports by 1·9 million or 4·5 per cent.

In imports there was a general increase in the quantities of manufactured goods.

In exports, the quantities were practically the same—with the exception of tin and rubber—but the values with the exception of that of copra, were lower.

The following figures show the value of the foreign trade of the Colony in thousands of pounds sterling :—

	1912.	*1913.*	*Increase.*	*Decrease.*
	£	£	£	£
Merchandise—				
Imports ...	49,982	53,559	3,577	...
Exports ...	41,620	43,510	1,890	...
Coin and Bullion—				
Imports ...	2,523	2,926	403	...
Exports ...	2,145	1,865	...	280

The value of the inter-port trade including treasure was in thousands of pounds sterling :—

	1912.	*1913.*	*Increase.*
	£	£	£
Imports	3,208	3,230	22
Exports	3,149	3,189	40

The aggregate gross trade was therefore £108·3 million pounds, an increase of £5·6 million, compared with 1912 or 5·5 per cent.

Trade with British and Foreign Countries.

The trade including coin and bullion with the United Kingdom, British Possessions and Protectorates, and Foreign Countries, respectively, is given below in millions of dollars :—

	Imports.		*Exports.*	
	1912.	*1913.*	*1912.*	*1913.*
	$	$	$	$
United Kingdom ...	46·7	52·9	85·4	92·1
British Possessions and Protectorates ...	231·8	235·2	120·1	121·0
Foreign Countries ...	171·5	196·0	169·6	175·8

The following statement shows the position of the Colony as a market for British and European foreign goods since 1896 in thousands of pounds sterling :—

	1896 to 1900.	*1901 to 1905.*	*1906 to 1910.*	*1911.*	*1912.*	*1913.*
	£	£	£	£	£	£
From United Kingdom ...	2,981	3,752	4,012	4,694	5,380	6,064
„ Continent of Europe and United States	1,553	2,314	2,208	2,415	3,144	3,679
British Excess ...	1,428	1,438	1,804	2,279	2,236	2,385

Percentages of Total.	*1896 to 1900.*	*1901 to 1905.*	*1906 to 1910.*	*1911.*	*1912.*	*1913.*
	£	£	£	£	£	£
United Kingdom	65·7	61·9	64·5	66	63·1	62·2
Continent of Europe and United States	34·3	38·1	35·5	34	36·9	37·8

The articles which gave the largest increased values from the United Kingdom were hardware and ironware including cooking utensils, sarongs, slendangs and kains, cigars and cigarettes, steel, paper and stationery, silk piece goods, telegraph and telephone materials, machinery including electrical goods, cycles, motor cars and accessories, malt liquors, tin plates and india rubber goods.

The articles showing declines in values from the United Kingdom were apparel, hosiery and millinery, hats and caps, fancy goods, toys and sporting materials, lamps and lampware, cabinetware and linen cloth.

Imports from the Continent show advances from all countries.

The increases were chiefly as follows :—

Austria, in apparel, hosiery and millinery and yarns;

Belgium, in glass and glassware, nails, paints, steel, cotton piece goods and perfumery;

Denmark, in butter and cheese, cement, and beer and ale;

France, in brandy, umbrellas and silk piece goods;

Italy, in milk, clocks and watches, cotton piece goods, hats and caps, and yarns;

Germany, in earthenware and crockery, hardware, ironware and cooking utensils, musical instruments, beer and ale, lamps and lampware, and india rubber goods;

Holland, in cotton piece goods, butter and cheese, earthenware and crockery, milk, sarongs and slendangs, hardware, ironware and cooking utensils, cigars and cigarettes, synthetic indigo and chemicals;

Norway, in milk.

The principal decreases were in apparel, hosiery and millinery and linen cloth from the United Kingdom; cotton piece goods, hardware, ironware and cooking utensils from Austria; hardware, ironware and cooking utensils from Belgium; and glass and glassware and cotton piece goods from Germany.

From the United States import values advanced by over half a million dollars, principally in cigars and cigarettes and cycles, motor cars and accessories. Petroleum and lubricating oil show decreases.

The total increase of exports to the United Kingdom is accounted for by advances in such articles as tin, black and white pepper, copra, gutta-percha, preserved pineapples and Para rubber, but large decreases took place in sago, tapioca and india rubber.

Of exports to the Continent tin, black and white pepper and copra advanced, declines being apparent in gambier, sago, Borneo rubber, Para rubber and phosphate of lime.

Exports to the United States advanced in values of rattans, gutta-percha and Para rubber, but fell in values of tin, gambier, black and white pepper, jelutong rubber and Borneo rubber.

Import values from Australia and New Zealand, Japan, Siam and Siamese States, Federated Malay States, Netherlands India, Hongkong and China, French Indo-China, Johore, Kelantan, Trengganu, and Kedah advanced, but there were decreases in the total values from British India and Burma, British North Borneo, and Sarawak.

There was a rise in the total value of exports to British India and Burma, Japan, Federated Malay States, Netherlands India, Hongkong and China, French Indo-China, and Johore, Kelantan, Trengganu and Kedah, but exports to Australia and New Zealand, Siam and Siamese States, and British North Borneo and Sarawak fell off.

BANKRUPTCY.

In the first half of the year, trade conditions continued to be as prosperous as in the preceding year. They declined rapidly towards the end of the year, and the failure of the Kwong Yik Bank, which closed its doors on the 19th November, and is now in liquidation under the supervision of the Court, brought several bankruptcies in its train. The estimated loss by bankruptcies was $1,244,209 in Singapore and $52,950 in Penang.

The number of bankruptcies was not great, nor the amount involved large, but at the close of the year the Chinese market generally was in a more than uneasy condition.

AGRICULTURE.

One of the most notable events of the year was the collapse of the price of rubber, which fell from 4*s.* 8*d.* for fine plantation para in London to 2*s.* 3*d.* With the enormous increase in the production of this commodity throughout the world it was impossible for a high price to be maintained, but the suddenness of the fall and its arrival so much earlier than had been anticipated, may be attributed to certain causes subsidiary to that of over-production. Of these the first in time was the stagnation of certain trades in Germany, Austria and neighbouring countries consequent on the Italy-Turkish War and the wars in the Balkans, but the most important was the uncertainty with regard to the American tariffs, on account of which American importers, hitherto by far the largest buyers, have been unable to purchase largely in advance. The combined effect was the oversupply of the British and Continental markets. With the reduction of the American tariffs a largely increased consumption by America may again be expected but the continual increase of production precludes the hope of any large recovery in price; in fact it is probable that the price is now practically established. A revival must in any case be preceded by an improvement in the general financial situation throughout the world. With the fall in price came the necessity for a reduction in estate expenditure. The cost of production naturally diminishes as the trees mature, but many economies have in addition been found possible. In Malacca on the motion of the Malacca Planters' Association wages were reduced without friction, thus satisfactorily proving that the supply of labour is adequate. Many estates are using disc-harrows drawn by draught animals as cheaper than manual labour, and one estate is using steam ploughs.

Though the inflated dividends of previous years are gone for ever, reasonable profits can be expected, and the only really unsatisfactory feature of the situation is that the market still considers average plantation rubber to be inferior to fine hard Para. Certain known marks, however, have been sold at the same price as Para, and if standardization can be effected it is to be hoped that producers of other marks, at present less known, will share in the enhanced price that recognized quality can command.

The planting of fresh land in rubber continues in every Settlement of the Colony, and shows that the planters still retain their confidence. The area under rubber cultivation in Malacca is 117,200 acres.

Catch crops under rubber are being abandoned generally. The result is an enormous diminution in the output of tapioca. The area under this crop has dropped from 16,643 acres in 1912 to 7,353 acres in 1913.

Along with the decrease of tapioca, there has been a correspondingly large diminution in pig raising. It was, and still is, the custom for squatters to rear pigs under the Chinese-owned coconut palms fattening them on the *ampas* or refuse of tapioca manufacture. In past years the pigs so raised met the whole demand of Malacca and were sent to the Federated Malay States in large numbers. Now, however, the export has almost ceased; and to fatten the supply for local demand an import of the refuse is required.

The rice harvest was fair in Province Wellesley, and bad in Penang and Malacca. In Malacca, not only was the season unfavourable to the growing crops, but there was a smaller area than usual under cultivation owing to the attractions offered by fairly high pay and moderately easy work upon the rubber estates.

Coconut estates in Singapore have largely failed to attain their estimates. In some cases this has been due to inflated expectations and a want of knowledge of the nature and yielding power of the trees on the estate, and in others to want of attention to the trees. This has especially been the case where there have been joint interests in rubber and coconuts.

Some large estates in the Dindings are, however, said to be doing well.

Coconut pests were troublesome in Singapore. There was an increase of the Palm weevil in the centre of the island, and a serious outbreak of the moth *Brachartona catoxantha* in the east of the island, which will affect the crop of nuts in 1914.

The cultivation of gambier is rapidly decreasing, and indigo cultivation has practically disappeared.

The plague of locusts which has been afflicting the Federated Malay States appeared in Malacca during the year. Its presence is as yet confined to the vicinity of the Negri Sembilan boundary.

ALIENATION OF LAND.

The area of Crown Land alienated, and the number of Statutory Grants issued during the last five years together with

the amount of premia paid in respect of the same, are shown in the following table:—

From the above table it will be seen that the following countries show an increased tonnage, entered and cleared, in 1913 as compared with 1912:—

Japan	398,366
Britain	306,736
Holland	219,002
Norway	137,686
France	125,796
Germany	71,994
Sarawak	37,039
Denmark	37,648
China	34,456
Austria	24,551
America	4,894
Sweden	1,464

The following countries show a decrease:—

Russia 128,640; Italy 99,120; Siam 26,239; Spain 6,370.

In the last four years the combined arrivals and departures of merchant vessels have been as follows:—

In 1910	...	...	23,561,229 tons.
1911	...	...	24,233,886 „
1912	...	...	25,985,526 „
1913	...	...	27,124,789 „

In the small craft (steamers under 50 tons and native vessels) the combined arrivals and departures were 43,796 in number and 1,714,241 in tons as compared with 40,479 and 1,535,201 respectively in 1912.

Twelve new steamers with a tonnage of 661 tons gross and 50 sailing vessels of 5,179 tons were registered during the year under the Imperial Shipping Acts. Under the "Merchant Shipping Ordinance 1910," nineteen new sailing vessels of 1,989 tons were licensed under section 425, and 888 vessels of 11,419 tons were under section 428.

LEGISLATION.

During the year 1913 eighteen Ordinances were passed, eight being amending and ten principal Ordinances.

Of the principal Ordinances the most important are :—

(1) The Municipal Ordinance, which is referred to in the part of this report dealing with Municipalities.

(2) The Arms and Explosives Ordinance, which consolidates and amends the existing law dealing with fire-arms and explosives formerly contained in nine different Ordinances.

(3) The Infectious Diseases Ordinance, a temporary measure dealing with cases of infectious diseases, pending the introduction of a comprehensive Public Health Ordinance.

(4) The Federated Malay States Export Duties Collection Ordinance, the object of which is to enable export duties payable to the Government of the Federated Malay States on goods and baggage carried into the Colony on the Federated Malay States and Johore State Railways to be collected in the Colony.

(5) The Tobacco Revenue (Labuan) Ordinance, which was passed to abolish the system previously in force of farming out the collection of duty on tobacco and to provide for the collection being done by the Government.

The only important amending Ordinance is the one which amends the Estate Labourers (Protection of Health) Ordinance 1911, and empowers the Governor in Council with the approval of the Legislature to erect central estate hospitals in suitable areas for the treatment of estate labourers.

EDUCATION.

The expenditure on the eight Government English Schools was $100,058, on 34 Aided Schools (English, Anglo-Tamil, Tamil and Chinese) $124,672, and on the 186 Government Vernacular Schools, $111,482.

The Malacca Training College for Malay Teachers continued to do good work. Its cost, during the year under review, was $13,706.

The numbers in Secondary Classes show a small increase over the figures for 1912.

The Normal Classes continued their work during the year. Twenty-one Normal Certificates were issued.

POLICE.

The total strength of the force at the end of the year was 2,646, which was distributed as follows:—

Singapore and Christmas Island ...	1,225
Penang, Province Wellesley and Dindings	1,012
Malacca	316
Labuan and Brunei	93

The authorized strength of the force is 2,736.

Recruiting showed an improvement during the year especially amongst the Malays.

The wastage from the force is very heavy, and is far from satisfactory, amounting to no less than 465 men (of whom 159 were dismissed, 66 deserted and 25 were pensioned). The number of recruits during the year was 582, nearly one-fifth of the total force; and it must be remembered that a man does not become available for police duties until he has left the recruit stage and emerged in the second class constable stage, a process, which according to his intelligence takes from six to twelve months.

Discipline is improving. The weak spot is in the native non-commissioned officers, who with few exceptions, cannot keep to the middle path between laxity and undue severity.

The health of the force was good.

CRIME.

There is a marked reduction in the number of serious offences reported to the police. The returns are murder, 22 (37) reports—(the figures in brackets denote the corresponding number in the preceding year)—gang robbery 31 (49), robbery 164 (180), housebreaking 545 (567), and theft 2,315 (2,602). It must be remembered that these are returns of reports, of which many are later proved, upon investigation by the police, to be mistaken, imaginary, or false.

The total number of arrests effected in the Colony during the year was 19,353, compared with 17,735 in 1912. The increase is in Singapore, where there have been many more arrests under the Minor Offences Ordinance. The Inspector-General of Police reports that ten years ago, when the population of the Colony was far smaller than it now is, the average number of arrests in a year was 23,000.

Sixty-four persons, as against 74 in 1912, were tried before the Supreme Court.

Three hundred and fifty-five persons were banished during the year. The great majority were habitual criminals.

PRISONS.

The daily average number of prisoners in the various prisons shows a marked reduction. It is seen in the following statement:—

		1912.	*1913.*
Singapore ...	Criminal ...	770	713
	Civil ...	95	66
Penang ...	Criminal ...	208·99	163
	Civil ...	29·27	24
Malacca ...	Criminal ...	31·11	25
	Civil ...	13·93	6

The health of the prisoners was good, the number of deaths being twenty in Singapore, six in Penang and one in Malacca.

VITAL STATISTICS.

The number of births and deaths registered during the year was 19,964 and 29.950 respectively. The figures for the preceding year were 20,594 and 28,422.

The estimated population of the Colony was 743,010. It was estimated at 728,635 in 1912, and ascertained in 1911 (the year of the Census) to be 711,951.

The birth-rate has fallen from 28·26 to 26·87 per mille.

The death-rate has also decreased, having fallen from 46·45 in 1911, and 39·01 in 1912, to 34·93 per mille in the year under review.

The principal causes of death were malaria (2,878 cases), infantile convulsions (3,822), tuberculosis (2,544), beri-beri (1,657), and dysentery (1,016). Under all these heads, and especially under the head of malaria there is reduction in the numbers recorded in the preceding year. It has been shown however that the total number of deaths in 1913 exceeded those in 1912, and the reduction in the number of deaths from these diseases is perhaps to be ascribed partly to different diagnosis. Of the dangerous infectious diseases of the Colony, there were recorded 116 deaths from small-pox, 104 from cholera and one from plague. The corresponding figures in 1912 were 73, 121, and 37.

IMMIGRATION.

(I).—CHINESE.

Immigrants arrived from China to the number of 240,979, a decrease of 4·2 per cent as compared with the figure for 1912 and of 10·7 per cent as compared with that for 1911, the highest yet recorded.

Adult males formed 82 per cent and adult females 9 per cent of the immigrants.

Immigration was affected by quarantine restrictions in Singapore during May and June.

The following table shows the total number of Chinese Immigrants during the last five years:—

Year.	*Men.*	*Women.*	*Boys.*	*Girls.*	*Total.*
1909	128,878	12,126	7,946	2,802	151,752
1910	184,856	16,395	11,522	3,548	216,321
1911	226,126	22,738	16,033	4,957	269,854
1912	206,018	23,327	16,794	5,505	251,644
1913	197,872	22,847	15,060	5,200	240,979

(II).—INDIAN.

The number of immigrants from India during the year was 118,583, the highest number ever recorded, exceeding the return for 1911, the previous record, by 10,112.

The excess of immigrants over emigrants during the year amounts to 42,892 adults and 5,601 children. The corresponding figures in 1912 were 37,894 and 5,149.

METEOROLOGICAL.

The rainfall recorded was as follows:—

Singapore ...	... 131·12	inches.
Labuan ...	... 141·30	„
Penang ...	... 120·05	„
Province Wellesley	... 106·12	„
Malacca ...	... 75·15	„
Dindings ...	... 73·21	„

The mean temperature of the air throughout the year was 82°. The maximum recorded was 97° (in Penang on March 13th) and the minimum 66° (in Province Wellesley on January 25th).

POST AND TELEGRAPH DEPARTMENT.

The Insured Letter system was extended to Johore and Kedah. A parcel post service by German Mail to England was inaugurated on the 1st November; and arrangements were made for a direct parcel service by P. & O. Mail to Italy.

The Penang–Kuala Muda trunk telephone line was extended to Alor Star, the capital of the State of Kedah, and opened to traffic in April, 1913.

Telegraph offices were opened at Tanjong Pagar and Keppel Harbour and Savings Bank branches at Labuan, Prai, and Seletar.

The number of postal articles (excluding parcels) posted in the Colony was 9,147,653, an average of 12·81 per inhabitant. The number received for delivery was 7,983,199. The number of messages transmitted over the Government telegraph lines increased from 244,301 to 263,274, and the number of subscribers to the Government telephone exchanges from 561 to 645.

The amount at the credit of the depositors in the Government Savings Bank on the 31st December, 1913, was $899,752, the highest sum on record. The average amount at the credit of each depositor was $160. There was a profit on the year's working of $5,111. The present value of the investments is $894,858.

GOVERNMENT MONOPOLIES.

As in previous years, the price of raw opium varied greatly, fluctuating between $850 and $1,765 per chest.

During the year, 3,627 chests of opium (Indian and Persian) were cooked at the Factory, and gave a total yield of 4,585,474 tahils of chandu, a decrease of 387,973 tahils compared with the preceding year. The greater part of this chandu was destined for the States of the Malay Peninsula, which obtain their supplies from the Factory. The amount sold in the Colony was 1,493,254 tahils.

The selling price of chandu was raised on the 22nd February from $5 to $6 per tahil (wholesale) and from $5.50 to $6.50 (retail).

Liquor and tobacco (the latter in Labuan only) produced a revenue of $1,630,578.

During the year 422 cases were instituted in Singapore for offences against the Chandu and Liquors Ordinances and Deleterious Drugs Ordinances, 168 in Penang and 76 in Malacca.

Seizures were made of 8½ tahils of opium, 2,333 tahils of chandu, 200,285 grains of cocaine, 46,152 grains of morphia, and 3,050 tahils of bhang.

MUNICIPALITIES AND RURAL BOARDS.

The "Municipal Ordinance 1913" effected important changes in the constitution and powers of the Municipal bodies in the Colony. It abolished the elective system, and substituted for it that of appointment by the Governor. It also gave power to the Governor, after a report to, and discussion in, the Legislative Council, to order the Commissioners to carry out any duty, in which they had failed. In addition to what may be described as the ordinary rates, it provided two special rates, one in respect of improvements in insanitary areas, and the other in respect of expenditure upon back-lane schemes. The borrowing powers of the Municipalities have also been revised. As a whole, the Ordinance has greatly improved the law relating to Municipalities.

The revenue of the three Municipalities amounted to $4,658,524, and their expenditure, excluding sums spent on Loan Works, to $4,940,248. The usual comparative statements of revenue and expenditure, and of the debts of the Boards, showing the provision made for repayment, appear below.

REVENUE.

	1909.	1910.	1911.	1912.	1913.
	$	$	$	$	$
Singapore ...	2,448,179	2,512,507	2,555,478	3,062,526	3,202,551
Penang ...	1,002,472	1,103,587	1,206,244	1,268,267	1,321,766
Malacca ...	68,647	76,853	91,828	112,529	134,207
TOTAL ...	$3,519,298	3,692,947	3,853,550	4,443,322	4,658,524

EXPENDITURE.

	1909.	1910.	1911.	1912.	1913.
	$	$	$	$	$
Singapore ...	2,191,299	2,446,041	2,527,579	3,197,526	3,498,277
Penang ...	1,026,676	1,116,307	1,150,693	1,255,757	1,306,566
Malacca ...	61,538	76,282	90,895	100,247	135,405
TOTAL ...	$3,279,513	3,638,630	3,769,167	4,553,530	4,940,248

The following return shows the revenue and expenditure of the Rural Boards, which carry out in areas outside Municipal limits such of the provisions of the Municipal Ordinance as are applicable to country districts :—

	Revenue.	*Expenditure.*
	$	$
Singapore Island ...	57,370	160,602
Penang Island ...	62,813	88,586
Province Wellesley ...	229,765	186,829
Dindings	8,269	25,194
Malacca	261,359	306,294

The deficit in the revenue of the Rural Boards is made good by contributions from the Government.

HARBOUR BOARDS.

SINGAPORE.

When the "Ports Ordinance 1913" came into force on the 1st July, 1913, the Tanjong Pagar Dock Board was superseded in respect of the property in Singapore by the Singapore Harbour Board, and in respect of the property in Penang and Province Wellesley by the Penang Harbour Board.

The revenue and expenditure of the Board at Singapore (first as the Tanjong Pagar Dock Board and latterly as the Singapore Harbour Board) for the five years 1908–1913, have been as follows:—

		Revenue.	*Expenditure.*
		$	$
1908	...	5,822,811	4,271,715
1909	...	5,849,063	4,267,797
1910	...	5,896,156	4,328,184
1911	...	5,740,965	4,074,669
1912	...	6,015,648	4,216,015
1913	...	6,091,296	4,070,912

The capital debt due to Government stood at the end of 1913 at $44,925,072 on which the Board pays interest at 4 per cent.

In addition to the above-mentioned capital the Board has expended on new works and other expenditure of a permanent nature a sum of $2,256,172 from reserve fund.

The following figures are taken from the wharf tonnage returns:—

	1909.	*1910.*	*1911.*	*1912.*	*1913.*
Number of vessels ...	2,366	2,393	2,528	2,693	2,708
Tonnage ...	4,433,105	4,605,035	4,877,317	5,397,155	5,794,536
Coal (inwards and outwards) ...	1,160,711	1,063,768	1,084,974	1,200,545	1,338,495
Cargo (inwards and outwards) ...	974,016	1,305,014	1,285,994	1,335,846	1,462,788

Lagoon Wet Dock and Main Wharf Reconstruction. (Tanjong Pagar.)

The questions at issue between the Dock Board and Messrs. John Aird & Company were settled early in the year, the total amount of money paid to the latter for permanent work executed and in settlement of all claims was £664,000; the whole of the contractors' plant and effects of every description and their stocks of materials on the ground for permanent work remaining the property of the Board.

During the year the new contractors, Messrs. Topham, Jones & Railton, Limited, continued to make very satisfactory progress with the works, and on the 21st June, the water was admitted to the Lagoon Dock. As soon as this operation, which took fourteen days, was completed, a start was made to remove the cofferdam and build the entrance walls, and by the end of the year work on these was well advanced.

During the latter half of the year the work of making the metalled roadways and quays, laying the railways and building the foundations for the godowns round the dock was put in hand and good progress was made, some of the godowns along the south wall being already erected by the end of the year.

A total amount of £407,700 has been paid to Messrs. Topham, Jones & Railton, Limited, of which £155,200 was in respect of work carried out during the year 1913.

The average number of men employed per diem on the works and at the quarries during the year was 1,775.

New Graving Dock at Keppel Harbour.

This work was successfully completed during the year, and the dock was officially opened by His Excellency the Governor Sir ARTHUR HENDERSON YOUNG, K.C.M.G., on the 26th August under the name of The King's Dock. All outstanding questions with the various contractors have been satisfactorily settled, and the working of the dock and the machinery and equipment in connection with it have proved entirely satisfactory.

PENANG.

The capital debt of the Penang Harbour Board, fixed in accordance with the Ordinance, amounted at the end of 1913 to $3,036,911.

During the year new coolie lines to accommodate 120 men were built at Prai, the new launch "Betty" was added to the fleet, four steam cranes were erected, two at Prai Wharf and two at Swettenham Pier, and a light railway was put down at Prai coal sites.

SINGAPORE HARBOUR WORKS.

During the year good progress was made in connection with the works. The north strengthening wall and 350 linear feet of the south strengthening wall were completed. The whole of the North Pier and 800 linear feet of the South Pier were practically completed and 560 linear feet of the latter were under construction. The dredging of the harbour outside the quay walls was practically completed and in the tidal basin dredging is in progress. During the year 243,273 tons of granite from Pulau Ubin were deposited on the mole.

The average number of men employed at the end of the year was 330 Asiatics and 25 Europeans at Pulau Ubin Quarry and 1,101 Asiatics and 43 Europeans at Telok Ayer Quay Wall and the Reclamation works.

During the year £324,000 was paid to the Contractors. The total cost of the Harbour Works up to 31st December, 1913, amounted to £1,396,087.

PUBLIC WORKS.

The total expenditure of the Public Works Department under all heads of service was $2,392,173, the highest on record.

It was distributed as follows:—

	$
Singapore	955,320
Labuan	73,718
Malacca	594,885
Penang and the Dindings	498,990
Province Wellesley	269,260

The works exceeding in $2,000 in cost, which were completed during the year were 32 items in Singapore, 4 in Labuan, 12 in Malacca, 15 in Penang and the Dindings and 2 in Province Wellesley. Among the more important works completed were the Pearl's Hill School (at a cost of $58,596), the Singapore River Improvements ($39,987), a revetment wall to the Malacca reclamation ($24,999), the Kuruman Island light-house ($32,161), and the Penang Girls' School ($43,564).

Progress with items of expenditure exceeding $2,000 was made in respect of eleven items in Singapore, two in Malacca, one in Penang, and four in Province Wellesley.

The principal works in hand are in Singapore, and are the new District Court, the additions to the Government Offices, the extension to the Printing Office, and the erection of concrete bank-walls alongside the Rochore Canal.

The special expenditure upon metalling or re-metalling roads amounted to $160,535. Thirty-one miles of road were thus treated, at an average cost of $5,178 per mile.

With the exception of the short extension of the Teluk Bahang road in Penang, no new road construction was undertaken.

The annually recurrent expenditure upon road-maintenance was $550,285.

The road system thus maintained comprises 552 miles of metalled road, 65 miles of gravelled road (45 miles in Malacca, and 20 miles in the Dindings) and 752 miles of natural road (of which the greater part lies in Malacca and Province Wellesley).

The cost of maintenance per mile varies from $1,161 in Singapore (where the roads are metalled, with the exception of 3½ miles of natural road) down to $153 in the Dindings where natural roads and gravelled roads form more than two-thirds of the road system.

The labour supply was ample, but the wages of skilled labour tend to rise. The price of building materials is increasing.

GENERAL.

The first half of the year was a fairly prosperous one for the Colony but the fall in the price of rubber re-acted unfavourably upon all the local trade conditions, and left them at the end of the year in a decidedly unfavourable position. The fall had been generally anticipated, though many planters were inclined to doubt it, founding their hopes upon increasing markets as compensation for increasing supplies. No one however expected that the fall would come so soon or be so rapid; and it was the upset of calculations in this respect that caused the general dislocation in the local circles. The estates are fitting themselves to the altered circumstances, which still leave ample room for reasonable profits, business is adjusting itself accordingly, and on the whole the Colony will be much the better for the shock which it received, and from which at the date of this report it is recovering.

The Colony lost the services of a valuable officer by the retirement during the year of Mr. J. C. ANTHONISZ who had been Treasurer since 1908. He received the honour of a C.M.G., at the end of the year.

W. GEORGE MAXWELL,
Acting Colonial Secretary.

1*st September*, 1914.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

REPORT ON THE STRAITS SETTLEMENTS

FOR THE YEAR 1914.

FINANCIAL.

The revenue for the year 1914 amounted to $14,016,882, (exceeding the estimate by $3,672,652), whilst the expenditure was $10,180,189 (which is less than the estimate by $972,669).

The actual figures for 1913 and 1914 are shown in the following statements:—

A.—REVENUE.

	1913.	*1914.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Port, Harbour, Wharf and Light Dues ...	133,544	37,139	...	96,405 (*a*)
2. Licences, Excise and Internal Revenue not otherwise classified ...	9,487,388	11,312,250	1,824,862 (*b*)	...
3. Fees of Court or Office, Payments for Specific Services, and Reimbursements in Aid ...	631,915	632,973	1,058	...
4. Posts and Telegraphs ...	748,803	698,068	...	50,735
5. Rents of Govt. Property	639,142	646,309	7,167	...
6. Interest	444,852	409,079	...	35,773
7. Miscellaneous Receipts ...	115,679	115,521	...	158
	$12,201,323	13,851,339	1,833,087	183,071
8. Land Sales	196,424	165,543	...	30,881
TOTAL ...	$12,397,747	14,016,882	1,833,087	213,952
		Net increase	...	$1,619,135

(*a*) Due to the Government Wharves, Penang, having been placed under the Penang Wharves Committee on 1st July, 1913.

(*b*) Net revenue from opium increased owing to less purchases of opium at less cost during 1914, chandu consumption decreased.

B.—EXPENDITURE.

	1913.	1914.	Increase.	Decrease.
	$	$	$	$
1. Charge on account of the Public Debt ...	90,550	...	...	90,550

20. Ecclesiastical ...	19,583	18,070	...	1,513
21. Transport ...	24,328	22,007	...	2,321
22. Military Expenditure ...	2,657,836	2,320,473	...	337,363
23. Miscellaneous Services ...	965,103	863,659	...	101,444
24. Post Office	596,531	672,521	75,990	...
25. Government Monopolies	391,865	357,029	...	34,836
26. Botanical Gardens and Museum	52,461	54,779	2,318	...
27. Public Works Department	321,532	327,963	6,431	...
28. Public Works, Recurrent	217,615	254,244	36,629	...
29. Public Works, Extraordinary	1,030,586	926,077	...	104,509
War Expenditure ...	...	131,000	131,000	...
TOTAL ...	$10,468,618	10,180,189	455,553	743,982
Net decrease ...			$288,429	

The expenditure upon personal emoluments ($3,733,124) and "other charges" ($2,292,696) shows an increase upon personal emoluments and a decrease under other charges for the preceding year when the figures were $3,612,435 and $2,382,763 respectively.

The following statement shows how both the revenue and the expenditure of the Colony have increased in the last five years:—

		Revenue.	*Expenditure.*
		$	$
1910	...	9,336,328	7,532,242
1911	...	11,409,221	9,085,389
1912	...	12,912,577	9,295,102
1913	...	12,397,747	10,468,618
1914	...	14,016,882	10,180,189

The Assets and Liabilities of the Colony on the 31st December, 1914, were as follows:—

Liabilities.		$	*Assets.*		$
Deposits	...	2,567,892	Indian Agency Account	...	118,742
Suspense	...	340,289	Investments	...	4,854,729
Drafts and Remittances	...	107,362	Advances	...	262,174
Cash in Transit	...	711	Loans to Municipalities	...	304,060
Excess of Assets over Liabilities	...	16,646,443	Loan to Sultan of Trengganu		50,000
			Loan to Kelantan Govt.	...	120,000
			Imprests	...	13,594
			Loan Account	...	8,575,888
			Cash	...	5,363,510
TOTAL	...	$19,662,697	TOTAL	...	$19,662,697

The excess of the assets of the Colony over its liabilities increased during the year by $3,836,694.

The principal excesses of revenue over the Estimates were in respect of Opium Revenue ($3,545,203.97), Liquors ($165,244.35), Interest ($33,804.04), Premia on Grants ($94,092.82), and Land Rents ($11,749.99). The principal excesses of expenditure were upon Military Expenditure ($310,607) and Miscellaneous Services ($174,109). The principal savings were in respect of Public Works Extraordinary $1,115,357 and Government Monopolies $114,599.

PUBLIC DEBT.

The indebtedness of the Colony is in respect of the loan raised by the issue of 3½ per cent Straits Settlements Inscribed Stock under the provisions of Ordinance IV of 1907, and its amount on the 31st December, 1914, was £6,913,352, of which the equivalent in local currency is $59,257,302.

The expenditure upon the services in respect of which the loan was raised stands as follows:—

		$
Singapore Harbour Board	...	47,397,273
Penang Harbour Board	...	2,628,098
Municipal Commissioners, Singapore		4,484,460
Municipal Commissioners, Penang ...		1,250,000
Government Harbour Works	...	13,392,804
		69,152,635
Expenses of issue less interest received		3,388,199
Total	...	$72,540,834 *

The charge on account of interest on the public debt was $2,073,980 in 1914. This charge is, however, borne by the Singapore Harbour Board and other bodies to whom portions of the loan have been allotted.

* Practically all the balance over and above the proceeds of loans already issued has been advanced by the Colony pending a further issue.

EXCHANGE.

The demand rate (Bank opening rates only) ranged during the year between 2/4$\frac{1}{8}$ and 2/3$\frac{7}{8}$. The latter quotation, however, was a purely nominal quotation in the earlier days of August. From January 1st to July 30th the rates ranged between 2/4$\frac{1}{8}$ and 2/3$\frac{29}{32}$ and exchange in its fluctuations followed the previous year throughout that period but was steadily lower than on the corresponding days of 1913. On the 31st July opening rates dropped to 2/3$\frac{29}{32}$ for demand drafts but 2/3$\frac{15}{16}$ was obtainable. August was a month of nominal quotations with 2/4$\frac{1}{8}$ as the highest rate and 2/3$\frac{7}{8}$ as the lowest. From September onwards demand rates varied between 2/4$\frac{1}{8}$ and 2/4$\frac{1}{16}$.

CURRENCY.

The currency of the Colony in circulation, exclusive of subsidiary coins, consisted of $48,487,648 in Government currency notes, $198,975 in bank notes issued by the Hong Kong and Shanghai Banking Corporation and the Chartered Bank of India, Australia and China, and $6,121,284 in dollars and half-dollars.

The total cost of the investments (including depreciation fund) held by the Currency Commissioners against the Government Currency Notes in circulation on the 31st December, 1914, was $25,901,348.93 and the market value of those securities calculated at prices obtaining at the end of July, 1914, was $22,541,812.85. The coin reserve held by the Commissioners amounted to £327,310 in gold and $12,885,588 in legal tender silver in Singapore and £1,205,376 in London, a total of $26,022,902.

The total withdrawals from circulation of old subsidiary coin to the end of 1914 amounted to $3,673,578.50. Coins to the value of $2,071,353.50 were sent to Bombay to be reminted into new subsidiary coin and $1,553,000 were sent to the Crown Agents for sale as bullion. The balance $49,225 remains in the Treasuries in Singapore and Penang pending sale at a favourable price. Reminting of new subsidiary coin has now been completed. The total amount received from the mint up to 31st December was $2,408,299.85 and the profit on the coinage amounting to $510,056.45 has been duly credited to the Gold Standard Reserve Fund.

The cancellation and destruction of notes is still in a very backward state. No less than 3,388,719 cancelled notes were in the hands of the Commissioners at the end of the year awaiting sorting, and the various processes connected therewith prior to destruction. The great majority of these notes consisted of one dollar notes and the organization of a considerable staff will be necessary before any reasonable reduction can be expected.

TRADE.

The foreign trade of the Colony in 1914 and 1913 shows in thousands of pounds sterling:—

	1913.	1914.	
	£	£	
Imports—			
Merchandise ...	53,011	43,856	
Treasure ...	2,926	1,804	
Total ...	55,937	45,660	Decrease £10,277
Exports—			
Merchandise ...	43,510	38,032	
Treasure ...	1,865	949	
Total ...	45,375	38,981	Decrease £6,394

The following statement shows the gross trade between the Colony and the United Kingdom, British Possessions and Protectorates, and Foreign Countries, respectively, in thousands of pounds sterling:—

	Imports into Colony.			*Exports from Colony.*	
	1913.	1914.		1913.	1914.
	£	£		£	£
From			*To*		
United Kingdom ...	6,175	4,873	United Kingdom ...	10,745	9,981
British Possessions	26,898	21,178	British Possessions	14,117	11,371
Foreign Countries	22,864	19,609	Foreign Countries	20,513	17,629
Total ...	55,937	45,660	Total ...	45,375	38,981

The results on the trade of the Colony of the extraordinary conditions prevailing in 1914 are not brought out fully by these figures. These are necessarily somewhat slow in responding, as trade contracts cannot suddenly be terminated, and as there are difficulties in the way of the immediate cancellation of pending transactions.

The decreased values of merchandise (in comparison with 1914 which like its predecessor may be classed as satisfactory) show over 17 per cent in imports and over 12½ per cent in exports.

The year opened in a period of financial stringency caused by the failure of a large banking institution which affected Chinese firms especially in Singapore and Bangkok. The scarcity of money and the slender reserves of dealers generally, kept the markets depressed, but later there took place a recovery as the weak firms were weeded out, checked however at the outbreak of war when absolute stagnation characterised the market. Produce could not safely be shipped at one time owing to the presence of a marauding enemy cruiser which succeeded in sinking several vessels, among them the s.s. *Troilus* laden with nearly 1,500 tons of valuable Straits cargo. Importers demanded cash for goods while the banks refused advances on produce, and this state of affairs continued for nearly two months.

Prices of produce during the first half-year fell steadily to a point in some cases near producing cost, relieved by two fluctuations of short duration, but towards the third quarter a recovery took place and prices have been maintained somewhat better since. The Singapore prices of the staples of produce indicate a fall averaging 17½ per cent. Every product except hides and copal displayed lower values; and in the cases of tin and Para rubber declines occurred of no less than approximately 26 per cent and 27 per cent respectively.

The volume of Straits produce shipped was about the same as in 1913, increases being apparent in Para rubber, copra, gambier and tin only. The shipments of tin from the Colony reached 66,233 tons, an increase of 483 tons compared with 1913. Of Para rubber 20,107 tons were exported from the Colony. This does not include transhipment cargo not marketed in Singapore, being an increase of 9,700 tons.

Raw cotton fell steadily in price throughout the year and the volume of imports of manufactured cottons was about 30 per cent less. Stocks at the close were generally considerably over the average of corresponding periods in other years, especially in grey goods.

The volume of manufactured metals imported declined by about 30 per cent. Stocks of these, excluding tin plates, and of miscellaneous goods including cement, paints, glass, etc., all show depletion as well as European foods such as milk, biscuits, etc.

The exclusion of Belgian, German and Austrian goods, valued at considerably over £100,000 monthly, had the effect of raising the prices of imported articles identified with these countries and stocks were rapidly cleared. Holland, Italy, America, Japan and the Mother country have to some extent supplied the deficiency. It is to be hoped that British manufacturers will now endeavour to capture and retain a substantial portion of the trade hitherto done by Germany and Austria.

IMPORTS.

Import values of foodstuffs, drinks, and narcotics fell off approximately by nearly 12 per cent, raw materials including tin by 17 per cent, and all manufactured articles by nearly 28 per cent. The decline of nearly £2⅜ million in foods, drinks and narcotics is accounted for principally by reduced values of opium, rice and grains, sugar, provisions of all kinds, live animals, vegetables and fruits, etc., and liquors. In the raw material class the fall of nearly £3¾ million is accounted for principally by tin and tin ore with a decline of over £3 million followed by coal, hides, raw cotton and silk and oils with smaller deficiencies. Manufactured articles with a fall of £3 million showed the greatest reduction in the import values of cotton and silk piece goods and sarongs, apparel, hosiery, and haberdashery, yarns and thread, manufactured metals generally, motor cars and cycles, paper and stationery, and jute gunnies.

In quantities imported, there was an increase under rice, padi and milk, decreased volume being apparent in opium, sugar, liquors, tobacco, wheat flour, lard, onions and live animals. Tin ore shows much the same import quantity in spite of the fall in price but coal and petroleum fell off. Manufactures declined in the quantity imported of cottons, yarns, silk piece goods, jute gunnies, blankets, bar iron, corrugated iron, nails, steel-plates, tin-plates, cement, matches, and explosives.

EXPORTS.

Export values show a decline in the class foods, drinks, and narcotics of over 11½ per cent or about £1¾ million. Raw materials exported fell off by £3 million. Tin, rattans, phosphates of lime, tanned hides, and shells all showed large reductions. On the other hand gums as a whole and copra gave enhanced values.

Export values of manufactured articles show a falling off of nearly £700,000, textiles contributing £378,000 of this, and metals £111,000.

The quantities of Para rubber, copra, gambier and tin, exported show an increase. A decrease in volume is recorded of sago, tapioca, coffee, black pepper, pineapples, gutta percha, jelutong, hides, rattans and phosphates of lime.

TRADE BY COUNTRIES.

Imports of merchandise from the United Kingdom in 1914 were valued at £4⅜ million, a decline of £1⅜ million or about 24 per cent. Cotton textiles with yarns and thread contributed over £600,000 of the fall, followed by apparel, hosiery and millinery, motor cars and cycles, etc., telegraph and telephone materials,

malt liquors and spirits, hardware and ironware, cement, paper and stationery, steel, machinery, india rubber goods including tyres, provisions, and metals generally, paints, and boots and shoes. The only articles giving important increases are tobacco, with cigars and cigarettes, coal and tramway and railway materials.

Exports of merchandise to the United Kingdom were valued at close on £10 million, a reduction of over £¾ million or more than 7 per cent. Tin, gutta percha, india rubber, Borneo rubber, sago, shells, and (by smaller amounts) preserved pineapples and gum copal all give reduced values. Increases are, however, seen in Para rubber, copra, peppers, illipi nuts, and gambier exported.

Import values of merchandise from the Continent of Europe reached about £2½ million, a fall of over 26 per cent compared with 1913. France, Norway and Russia show advances, but other countries all give declines.

A review of this trade may be interesting at the present time so I subjoin particulars of the value of each country's shipments to the Straits in thousands of pounds :—

	1913.	*1914.*	*Increase.*	*Decrease.*
	£	£	£	£
Austria-Hungary	279	128	...	151
Germany ...	878	415	...	463
Belgium ...	407	218	...	189
Denmark ...	75	47	...	28
Holland ...	363	300	...	63
Italy ...	569	488	...	81
Norway ...	18	76	58	...
Sweden ...	[illegible]	12	...	7
France ...	293	451	158	...
Spain ...	25	9	...	16
Russia ...	5	10	5	...
Total ...	2,931	2,154		

The value of the trade in manufactured goods of the two European enemy countries with the Colony has thus decreased by 53 per cent over the whole year, while France seems to have benefited, but included in her trade as well as in that of Italy are large quantities of Swiss goods, especially milk. It is more than probable, however, that Italy and Holland have benefited largely, although this is not to be inferred from the trade returns. German and Austrian goods have always been shipped from Genoa and Holland, and declared here according to the first port of shipment, and the cessation of these to a large extent has to be taken into account.

All the principal articles of import identified with Belgium, Germany and Austria give evidence of the great decline in values. Thus hosiery and undershirts, hardware and cooking utensils, beer, paper and stationery, milk and tinned provisions, crockery and glass, lamps, nails, and numerous sundries all evidence enormous reductions, and falls are also recorded of cement from Denmark, brandy from France, cottons and yarns from Italy, and sarongs, hardware, gin and tobacco from the Netherlands.

Shipments of Swiss milk have been diverted to French ports accounting for nearly £160,000 of the increase from that country, while milk from Genoa exhibits a decline. Scarcely any article shows an increase and none of any importance, except perhaps milk from the Netherlands.

Exports of merchandise to the Continent of Europe are valued over £4½ million, a decrease of nearly 23 per cent. Tin, copra, peppers, and rattans give enormous decreases, followed by tapioca, sago, pines, wolfram ore, gutta percha, gambier, oilcakes, and copal. Increases are apparent in Para rubber and illipi nuts, Germany, Belgium, and France taking more Para rubber and the latter two countries greater values of illipi nuts, while Denmark received larger shipments of copra.

The principal countries showing increased values of goods sent to the Colony are:—French Indo-China and the Non-Federated Malay States of the Malay Peninsula. The following countries give declines in value, viz.:—Australia, British India, Japan, Siam and Siamese States, Dutch Indies, Hongkong and China, British North Borneo and Sarawak, and the Federated Malay States.

BANKRUPTCY.

The failure of the Kwong Yik Bank on the 19th November, 1913, although it was followed by several large and complicated bankruptcies, did not prove as disastrous as was anticipated. Trade, however, continued to be dull and was temporarily suspended by the outbreak of war. By the end of the year trade had shown good recovery; profits were better on a smaller volume of business.

There were 51 trade bankruptcies during the year, and many insolvents made with their creditors arrangements of which eleven were registered.

The Chinese market is said to be in a sound condition.

AGRICULTURE.

During 1914 the prices of the chief Malayan agricultural exports which are shipped west, fell in the world's markets. Rubber, for instance, after repeating the seasonal rise of three out of the last four years, fell again before war broke out to the point from which it had risen; near to which it has since been maintained by the decrease of its import into London, and elsewhere. The actual imports into London during 1914 amounted to less than those of 1913, and the total world's production appears also to have been slightly less; for though the production of plantation rubber has increased enormously, the decrease in output from wild sources has been even greater. Coconut products fell gradually towards the outbreak of war, lost their market when the crisis came, and then after a month began to find it again, the prices varying closely with the freedom of the sea. After the destruction of the German cruiser *Emden* they began to rise in a promising way. Sago and tapioca, low when the year began, went lower like the coconut products, but are now obtaining somewhat better prices. Putch leaves lost their market entirely when war was declared.

On the other hand gambier, which chiefly goes east, is a little more profitable than it was.

The amount of rubber produced in the Malay Peninsula shows a great increase, in which the Settlements have taken a more or less even part. An area of moderate extent has been newly planted in Singapore island, and a small one in the territory of Malacca. In the first named the rubber growing on the new lands seems to be entirely a subsidiary product for, by the terms under which the land has been let for the growing of pineapples, a permanent crop has to be planted and rubber seems to the occupiers to be best for such a purpose. In the territory of Malacca, the surrender to Government of lands taken up speculatively or unwisely by rubber companies in the boom, has been rather more than was anticipated, and many estates are finding it necessary to use revenue for completing development; but the revenue promises generally to suffice. Great economies have been found possible; the cost of production has been reduced wonderfully; and there are companies producing and marketing at below one shilling per lb.

In the older and Chinese-planted estates of Malacca thinning is being carried out extensively. Ploughing is also being resorted to more and more. Not a few factories are acting as centrals for small neighbouring estates—a procedure which goes

some way towards reducing the variability of the quality of the product. The rubber plantations are very free from disease.

There is now extremely little tapioca associated anywhere with rubber, and the European estates in Province Wellesley which formerly made tapioca have ceased to do so. A little Chinese tapioca-manufacture continues in Malacca.

Coconuts in most places have had a productive year. New land is being planted with them to a small extent in Province Wellesley and in Singapore. The older estates in Province Wellesley, in some cases planted unsatisfactorily, have received a considerable amount of attention, and the trees are said to have responded to manure and cultivation given in 1913.

Pineapples occupy a slightly reduced area in Singapore island in consequence of their removal from under rubber on the larger rubber estates. But this has caused new lands to be planted with them. The price of pineapples in Singapore town fell at the commencement of the war to fifty cents per hundred (which was also its minimum during the excessively large crop of 1913) in consequence of the cessation of work at the canneries. However, the work was soon resumed. It seems that fifty cents per hundred is the minimum price at which picking and carting can be done, the cost of cultivation then being lost.

The success of pineapple-planting in Singapore seems to have stimulated a small increase in the crop on Chinese-owned land in Malacca and Province Wellesley, but without canneries the market is there very limited.

Gambier is being removed from under rubber in Malacca only very slowly. In Singapore island its cultivation persists in three mukims; and so long as the market maintains its present prices and labour is abundant, the crop is unlikely to disappear.

Vegetable growing is extending, especially in Singapore island, in consequence of the freeing of labour from estates. The last season has been favourable to vegetables; and prices on the Singapore markets have been much lower than they were. Chillies are among the special products of 1914. The Chinese who plant vegetables are in Singapore also planting a little indigo.

There is a slight further increase in Singapore of plantain cultivation. Small crops of tuba are by no means uncommon in the east of the island.

Throughout the Settlements the crop of mangosteens and other fruits has been very good.

The rice crop of 1913–14 was in places excellent: that of 1914–15 unfortunately started badly, for rain did not fall when required.

The locust pest in Malacca has done very little damage. The locust is destructive elsewhere under certain conditions; but is not so as yet in the Peninsula. Its favourite foods are certain pasture grasses, maize, etc., which do not play a large part in local agriculture; but it has attacked rice, sugar cane, coconuts and some other economic plants in a small degree. Measures are being taken against it in the hope of preventing it becoming really destructive. These measures are being carried out on the same lines as those undertaken in the Federated Malay States, and are taken in consultation with the Agricultural Department of the States.

LAND.

The revenue collected exclusive of revenue from miscellaneous collections amounted to $229,137, as compared with $196,919 in 1913.

The totals under the various sub-heads were as follows:—

—	1914.	1913.	1913 compared with 1914.	
			Excess.	Deficit.
	$	$	$	$
Land Revenue ...	135,090	128,395	6,695	...
Reimbursements ...	9,501	9,895	...	394
Land Sales ...	84,546	58,629	25,917	...
	229,137	196,919	Excess. 22,218	

The demand for the temporary occupation of Crown land in the town and vicinity continued and the revenue from this source is now very considerable. In the country districts only 26 applications for Crown lands were received, but at least 1,000 acres were added to the cultivated area of the Settlement. The large estates and the great majority of the smaller holdings were kept in excellent order.

Within Municipal limits the sale of a block of land in Orchard Road was completed and a site for the new gasholder at Kreta Ayer was purchased by the Municipal Commissioners. An area was acquired as a site for a wireless station at Paya Lebar and a small piece of land at Pasir Panjang was acquired for Military purposes.

The debt of Sultan Ali's Estate to the Government was $2,156.01 as against $21,381.58 at the end of 1913 and $38,534.90 at the end of 1912. The revenue collected amounted to $25,103.44. The estate is therefore in a very flourishing condition and during the year it was decided to double the allowances paid to the family of Sultan Hussain.

Other miscellaneous collections brought the total revenue from all sources to $400,167.27.

The expenditure of the office amounted to $24,470.90 as against $21,799.05 in 1913.

ALIENATION OF LAND.

The area of Crown Land alienated, and the number of Statutory Grants issued during the last five years together with the amount of premia paid in respect of the same, are shown in the following table:—

SINGAPORE.

THE REGISTRATION OF DEEDS.

The number of deeds presented for registration was 3,944 as compared with 4,125 in 1913 and the number of deeds finally registered 4,172, compared with 4,092 in 1913. The chief items were Conveyances and Assignments (1,959), Mortgages (1,080) and Reconveyances (596).

The total amount of fees collected during the year was $17,858.75, compared with $12,717.40 in 1913. This is the highest sum collected in any one year since the land boom in 1903. Many of the deeds presented were of great length and the average fee for registration was considerably higher than that of the previous year. The total also includes some heavy fines for late registrations.

One marked effect of the war on land transactions was that the number of deeds presented for registration decreased by nearly half during the later months of the year.

RAFFLES MUSEUM AND LIBRARY.

The number of works purchased during the year was 587 at a cost of $2,155.76, as against 609 at a cost of $1,844.04 in the previous year.

The number of subscribers remains approximately the same as before and was drawn from seventeen distinct nationalities.

In October the Taxidermist, Mr. DE FONTAINE, joined Mr. MOULTON of the Sarawak Museum, in an expedition of exploration into the Kalabit country, Sarawak, and especially the mountain Murud. The expedition was productive chiefly as regards birds, insects and ethnological specimens.

The collection of replicas of the Perak regalia, depleted by burglaries, has been replaced.

In September a large party from the British Association Meeting in Melbourne passed through Singapore and visited the Museum.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 24,859,917 as compared with 27,124,789 in 1913. Fuller particulars will be found in the appended comparative table.

Statement showing combined Arrivals and Departures of Merchant Vessels for the Years 1913 and 1914.

NATIONALITY.	1913.					1914.

TOTALS ...	17,254,953	8,834,101	558,998	476,737	27,124,789	16,019,150	7,633,275	801,076	406,416	24,859,917

From the above table it will be seen that the following countries show an increased tonnage, entered and cleared, in 1914 as compared with 1913 :—

	Increase.
Japan	495,774
Norway	180,357
Spain	11,390
Sweden	6,930

The following countries show a decrease :—

	Decrease.
Germany	1,156,399
Britain	1,039,767
Austria	271,749
Russia	182,358
Italy	97,192
France	66,197
Holland	59,041
Siam	41,530
Sarawak	35,890
America	4,894
Denmark	2,954
China	1,352

In the last five years the combined arrivals and departures of merchant vessels have been as follows :—

In 1910	23,561,229	tons.
1911	24,233,886	„
1912	25,985,526	„
1913	27,124,789	„
1914	24,859,917	„

In the small craft (steamers under 50 tons and native vessels) the combined arrivals and departures were 43,796 in number and 1,714,241 in tons in 1913 as compared with 45,739 and 1,951,044, respectively, in 1914.

Ten new steamers with a tonnage of 630 tons gross and 41 sailing vessels of 4,033 tons were registered during the year under the Imperial Shipping Acts. Under the "Merchant Shipping Ordinance 1910," twenty new sailing vessels of 1,893 tons were licensed under section 425, and 899 vessels of 9,749 tons were under section 426.

LEGISLATION.

During the year 1914 thirty-three Ordinances were passed, fourteen being amending and nineteen principal Ordinances.

Of these three are purely war measures. They deal with the regulation of the press, trading with the enemy, and the compulsory winding up of the business of alien enemies.

Of the remaining principal Ordinances the following are the most important:—

(*a*) The Sale of Food and Drugs Ordinance the object of which is to prevent the sale of any food or drug in an impure or adulterated state. It was passed as the result of a report made by the Municipal Analyst after prolonged examination and analysis to the effect that the adulteration of food and drink in Singapore were widely prevalent.

(*b*) The Domestic Servants Ordinance which imposes, subject to limitations, compulsory registration on domestic servants of a different nationality from their employers with a view to checking the use of false testimonials and to enable masters to obtain information as to the character of the persons they employ.

(*c*) The Copyright Ordinance which applies to the Colony the provisions of the Imperial Copyright Act 1911 with regard to importation into a British Possession of copies of works made out of that Possession.

(*d*) The General Loan and Inscribed Stock Ordinance which lays down the terms and conditions applicable to loans authorized to be raised by the Government of the Straits Settlements and to provide for the creation of inscribed stock.

(*e*) The Aerial Navigation Ordinance which makes provision for controlling the navigation of aircraft over the Colony.

(*f*) The Women and Girls' Protection Ordinance which consolidates and amends the previous legislation on this subject. The amendments proceed on the lines of recent legislation at home for the suppression of the white slave traffic.

(*g*) The Trustee Ordinance consolidates and amends the law relating to trustees and brings it into practical agreement with the Imperial laws on the subject.

(*h*) The Life Assurance Companies Ordinance which applies the provisions of the Imperial Acts of 1909 and the Indian Act of 1912 to the Life Assurance Companies established in the Colony for the purpose of preventing scandals such as occurred in India a few years ago.

The only amending Ordinances of importance are the Companies Amendment Ordinance which prohibits certain companies from making advances to their own directors or officers except upon trustee securities; and the Labour Contracts Ordinance which marks the end of Chinese contract labour in the Colony.

EDUCATION.

The expenditure on the eight Government English Schools was $153,658.87, on 34 Aided Schools (English, Anglo-Tamil, Tamil and Chinese) $152,207, and on the 187 Government Vernacular Schools, $114,283.54.

The Malacca Training College for Malay Teachers continued to do good work. Its cost, during the year under review, was $12,177.19.

The numbers in Secondary Classes show a small increase over the figures for 1913.

The Normal Classes continued their work during the year. One Normal Certificate was issued.

SUPREME COURT, SINGAPORE.

The Court of Appeal sat in Singapore from the 15th to 27th June and from the 23rd November to the 1st December.

The Court fees collected amounted to $36,896.05, as against $31,458.10 in 1913.

There were 56 cases, in which 71 persons were tried, at the Assizes during the year and in 43 of these cases convictions resulted.

Sir WILLIAM HENRY HYNDMAN-JONES, for the last 8 years the honoured and respected Chief Justice, retired, whilst on leave, in July and was succeeded by Mr. Justice BUCKNILL, formerly Attorney-General of Hongkong.

Mr. Justice EARNSHAW, appointed a Puisne Judge of the Straits Settlements in May, reported his arrival on the 4th November.

The war rendered it necessary for the Prize Court to sit during the latter part of the year, there being six Prize causes, but otherwise it had no marked effect on the work of the Court.

POLICE.

The total strength of the force at the end of the year was 2,620, which was distributed as follows:—

Singapore and Christmas Island ...	1,208
Penang, Province Wellesley and Dindings	993
Malacca	329
Labuan and Brunei	90

The authorized strength of the force is 2,736.

Recruiting showed a still further improvement during the year amongst the Malays, due no doubt to the reduction of labour staffs on rubber estates.

The wastage from the force is very heavy, and is far from satisfactory. Though not so heavy as last year it amounted to no less than 355 men (of whom 153 were dismissed, 67 deserted and 47 were pensioned). The number of recruits during the year was 389. A man does not become available for police duties until he has left the recruit stage and emerged in the second class constable stage, a process, which according to his intelligence takes from six to twelve months.

Discipline is improving. The weak spot is in the native non-commissioned officers, who with few exceptions cannot keep to the middle path between laxity and undue severity.

The health of the force was good.

CRIME.

In spite of five months of war the criminal statistics are more or less normal, though increases are shown in the more serious offences against property and the person, as indicated in the returns given below. The returns are murder, 41 (22) reports—the figures in brackets denote the corresponding number in the preceding year—gang robbery 34 (31), robbery 123 (164), housebreaking 475 (545), and theft 2,427 (2,315). It must be remembered that these are returns of reports, of which many are later proved, upon investigation by the police, to be mistaken, imaginary, or false.

The total number of arrests effected in the Colony during the year was 19,022, compared with 19,353 in 1913.

One hundred and nine persons, as against 64 in 1913, were tried before the Supreme Court.

Four hundred and sixteen persons were banished during the year. The great majority were habitual criminals.

PRISONS.

The total number of prisoners in the Criminal Prisons was:—

In Prison 1st Jan., 1914.	*Received during 1914.*	*Discharged, etc., during 1914.*	*Remaining 31st Dec., 1914.*
—	—	—	—
913	5,172	5,065	1,020

The daily average was 944 as compared with 901 in 1913. The decline in numbers which has been so noticeable in recent years would no doubt have continued in 1914, but for the general lack of employment owing to the war. Of the sentences inflicted two-thirds were for periods of less than a month; there were only twenty-one long-sentence prisoners classed as "habitual," *i.e.*, with more than two previous convictions of over two months.

The number of prisoners in the Civil Prisons was:—.

1st January, 1914.	*Received during 1914.*	*Discharged, etc., during 1914.*	*Remaining 31st Dec., 1914.*
—	—	—	—
111	5,488	5,411	188

The daily average was 115.

The Prisons in Singapore, Penang and Malacca were used as Houses of Detention for vagrants. Eight hundred and one vagrants were received during the year and 795 discharged, the great majority of whom were repatriated; a common cause of vagrancy was inability to find work.

The health of the prisoners was good. The morphia habit seems, temporarily at any rate, to have bee given up by the lower classes of the Colony. The amount realized by the sale of Prison manufactures was $695.58 and articles worth $34,031.49 were supplied to Government departments. Total expenditure was $225,878.58.

VITAL STATISTICS.

The number of births and deaths registered during the year was 22,080 and 25,880 respectively. The figures for the preceding year were 19,964 and 25,950.

The estimated population of the Colony was 759,067. It was estimated at 743,010 in 1913, and ascertained in 1911 (the year of the Census) to be 711,951.

The birth-rate has increased from 26·87 to 29·09 per mille.

The death-rate has decreased, having fallen from 46·45 in 1911, 39·01 in 1912, and 34·93 in 1913 to 34·09 per mille in the year under review.

The principal causes of death were malaria (3,548 cases), infantile convulsions (4,707), tuberculosis (2,079), beri-beri (1,482), and dysentery (1,186).

Dangerous infectious diseases notified in the Colony during the year caused 36 deaths from small-pox, 282 from cholera and 15 from plague. The corresponding figures in 1913 were 27, 85 and 1.

IMMIGRATION.

(I).—CHINESE.

Immigrants arrived from China to the number of 147,150, a decrease of 38·9 per cent as compared with the figure for 1913 and of 45·4 per cent as compared with that for 1911, the highest yet recorded.

Adult males formed 82 per cent and adult females 9 per cent of the immigrants.

Immigration was prohibited at the beginning of August. The prohibition continued to the end of the year.

The following table shows the total number of Chinese Immigrants during the last five years:—

Year.	*Men.*	*Women.*	*Boys.*	*Girls.*	*Total.*
1910	184,856	16,395	11,522	3,548	216,321
1911	226,126	22,738	16,033	4,957	269,854
1912	206,018	23,327	16,794	5,505	251,644
1913	197,872	22,847	15,060	5,200	240,979
1914	121,355	13,017	9,710	3,068	147,150

(II).—INDIAN.

The number of immigrants from India during the year was 51,217, falling short of the return for 1913 by 67,366. The large decrease in 1914 is chiefly due to the fact that after 6th August no immigrants from Madras or Negapatam arrived owing to the total suspension of the immigration of deck passengers from these ports.

During the year there was as regards adults an excess of emigrants over immigrants of 12,599 and as regards children an excess of immigrants over emigrants of 743. In 1913 the excess of immigrants over emigrants was 42,892 adults and 5,601 children.

The total number of immigrants that arrived at Penang from Southern India in 1914 was 51,217, as compared with 118,583 in 1913, a decrease of 67,306.

Immigration of deck passengers from Madras and Negapatam was discontinued from the 6th August to the end of the year, but there are indications that in any case the number of immigrants would have been very considerably less than in 1913 owing to a greatly diminished demand for labour on estates.

The figures for arrivals for the last three years are as follows:—

	1912.	*1913.*	*1914.*
Assisted immigrants (*i. e.*, with passages paid for from the Immigration Fund) ...	79,838	91,236	36,905
Other immigrants ...	27,090	27,347	14,312
Total ...	106,928	118,583	51,217

The number of Indians leaving the Colony for Southern India was 63,073, *i. e.*, 60,408 adults and 2,665 children, as against 66,695 adults and 3,395 children in 1913.

The excess of emigrants over immigrants was as regards adults 12,599, while as regards children immigrants exceeded emigrants by 743.

Out of 36 steamers that arrived during the period 1st January to 6th August 16 were actually quarantined on arrival (3 for cholera, 2 for small-pox and 11 for plague observation). Quarantine expenses average $1.38 per head.

The assisted immigrants consisted of 34,247 adults and 2,658 minors. Of the adults 27,991 were men and 6,256 women giving a proportion of approximately 18 per cent of women.

Nine hundred and thirty-seven labourers were recruited through the Government Agency in India, and two thousand one hundred and seventy were independent labourers supplied with free passages on application.

The remaining 31,140 adult assisted immigrants were of a class known as "kangany labourers."

The figures for 1914 actually represent only the first 7 months of the year, for, owing to the temporary stoppage of immigration, the last steamer carrying immigrants arrived on 6th August.

All the Tamil labour now employed throughout the Colony is free.

The health on estates in Penang, Province Wellesley and the Dindings was very satisfactory, and the death-rate in these districts was not as high as 50 per mille on any place of employment. The health conditions on estates in Malacca were, as usual, not so satisfactory as in the other Settlements.

It is satisfactory to note that no complaints were received during August and September when, owing to special financial circumstances arising from the war, many employers were compelled to make small advances in cash and provisions weekly instead of paying wages in full as they became due.

Tamil schools are maintained on Prye, Batu Kawan and Caledonia Estates. The results of the annual examination conducted by Mr. H. G. R. LEONARD, Deputy Superintendent of Immigrants, proved most satisfactory, each of the schools earning the Government Grant-in-Aid.

Between the 1st January and 6th August 671 decrepit and destitute Indians were repatriated through this department.

The revenue collected by the Immigration Committee during 1914 was $1,226,824.34 and the cash balance at the end of the year was $736,994.55. The balance of assets over liabilities amounted to $893,400. This balance includes an estimated sum of $60,000 due for assessment for the fourth quarter of the year.

(III).—NETHERLANDS INDIAN.

The number of Netherlands Indian labourers known to be on estates in the Straits Settlements is 3,885.

The number of labourers on contracts of service, usually known as indentured labourers, remaining at the end of the year was 1,580 of whom 2 were in the Dindings, 144 in Malacca and 1,434 in Province Wellesley.

METEOROLOGICAL.

The rainfall recorded was as follows:—

Singapore	... ...	85·84 inches.
Labuan	... ...	82·02 ,,
Penang	... ...	89·54 ,,
Province Wellesley	...	117·71 ,,
Malacca	... ...	83·50 ,,
Dindings	... ...	74·27 ,,

The mean temperature of the air throughout the year was 83·2°. The maximum recorded was 97·5° in Province Wellesley on February 21st (in Singapore 97° on May 13th). The minimum was 67° in Malacca on August 7th.

POST AND TELEGRAPH DEPARTMENT.

The number of postal articles (excluding parcels) posted in the Colony was 8,916,270, an average of 12·48 per inhabitant, as against 12·81 the average in the previous year. The number received for delivery was 6,953,133, as compared with 7,983,199 in 1913. The number of messages transmitted over the Government telegraph lines decreased from 263,274 to 235,776, and the number of subscribers to the Government telephone exchanges from 645 to 642.

The maximum postage on newspapers published locally and posted within seven days of publication or on publications registered as newspapers in the United Kingdom and posted locally to addresses in the Straits Settlements, Federated Malay States or Johore was fixed at two cents.

A Sub-Post Office was opened at Sea View Hotel and a Telegraph Office at Orchard Road.

Week-end telegrams were introduced on 1st July, 1914, but the service was discontinued on the outbreak of war.

The amount at the credit of depositors in the Government Savings Bank on the 31st December, 1914, was $769,115. The average amount at the credit of each depositor was $149.98. There was a profit on the year's working of $5,194.70. The estimated present value of the investments is $757,961.

The Savings Bank rule regarding the limitation of deposits was modified to admit of depositors, besides depositing $500 in any year, replacing in whole or in part any one (but not more than one) withdrawal made during the year.

GOVERNMENT MONOPOLIES.

The price of opium varied between $905 and $1,165 per chest.

During the year 2,787 chests of opium (Indian and Persian) were cooked at the Factory, and gave a total yield of 3,702,205 tahils of chandu, a decrease of 883,269 tahils compared with the preceding year 1913. The amount sold in the Colony was 1,402,057.4 tahils, the remainder of the production being for outside States.

No alteration was made in the selling price of chandu during the year.

The revenue on liquor and tobacco (the latter in Labuan only) amounted to $1,611,326.55.

During the year 674 cases were instituted in Singapore for offences against the Chandu and Liquors Ordinances and Deleterious Drugs Ordinances, 199 in Penang, and 48 in Malacca.

Seizures were made of 6,673 tahils of opium, 1,357.7 tahils of chandu, 528,000 grains of cocaine, 100 grains of morphia, 8,906 bundles + 480 tahils of bhang.

MUNICIPALITIES.

The "Municipal Ordinance 1913" effected important changes in the constitution and powers of the Municipal bodies in the Colony. It abolished the elective system, and substituted for it that of appointment by the Governor. It also gave power to the Governor, after a report to, and discussion in, the Legislative Council, to order the Commissioners to carry out any duty, in which they had failed. In addition to what may be described as the ordinary rates, it provided two special rates, one in respect of improvements in insanitary areas, and the other in respect of expenditure upon back-lane schemes. The borrowing powers of the Municipalities have also been revised. As a whole, the Ordinance has greatly improved the law relating to Municipalities.

The revenue of the three Municipalities amounted to $5,173,274, and their expenditu excluding sums spent on Loan Works, to $5,121,288. The usual comparative statements of revenue and expenditure, and of the debts of the Boards, showing the provision made for repayment, appear below.

REVENUE.

		1910.	*1911.*	*1912.*	*1913.*	*1914.*
		$	$	$	$	$
Singapore	...	2,512,507	2,555,478	3,062,526	3,202,551	3,626,243
Penang	...	1,103,587	1,206,244	1,268,267	1,321,766	1,399,639
Malacca	...	76,853	91,828	112,529	134,207	147,392
TOTAL	...	$3,692,947	3,853,550	4,443,322	4,658,524	5,173,274

EXPENDITURE.

		1910.	*1911.*	*1912.*	*1913.*	*1914.*
		$	$	$	$	$
Singapore	...	2,446,041	2,527,57[illegible]	3,197,526	3,498,277	3,679,944
Penang	...	1,116,307	1,150,6[illegible]	1,255,757	1,306,566	1,295,549
Malacca	...	76,282	90,895	100,247	135,405	145,795
TOTAL	...	$3,638,630	3,769,167	4,553,530	4,940,248	5,121,288

RURAL BOARDS.

The following return shows the revenue and expenditure of the Rural Boards, which carry out in areas outside Municipal limits such of the provisions of the Municipal Ordinance as are applicable to country districts :—

	Revenue.		Expenditure.	
	$	c.	$	c.
Singapore Island ...	59,241	00	212,811	00
Penang Island ...	61,540	43	91,239	52
Province Wellesley ...	190,364	43	236,792	59
Dindings	9,298	00	35,378	00
Malacca	225,595	00	354,640	00

The deficit in the revenue of the Rural Boards is made good by contributions from the Government.

LAGOON WET DOCK AND MAIN WHARF RECONSTRUCTION. (TANJONG PAGAR.)

During the year, the progress made by the contractors, Messrs. Topham, Jones & Railton, Limited, was very satisfactory and the construction of the entrance walls and dredging of the entrance was sufficiently advanced by the 2nd of June to enable the Dock to be opened for traffic.

Since that date the Dock has been in regular use and no difficulties have been experienced by shipping in entering or leaving the Dock.

The erection of the godowns, the formation of roads and quays and the laying of the railways round the Dock was completed by the end of the year.

Work in connection with the reconstruction of the Main Wharf was commenced in June over a length of 700 feet measured westwards from the Victoria Dock and by the end of the year a length of 200 feet of blockwork wall had been completed, and very good progress had been made with the reinforced-concrete construction.

A total amount of £620,900 has been paid to Messrs. Topham, Jones & Railton, Limited, of which sum £213,200 was paid for work carried out during the year under review.

The following are the principal items of work executed during the year:—

Dredging at entrance of dock	27,300	C. yards.
Dredging for entrance walls ...	9,500	"
Dredging at Main Wharf Reconstruction	55,000	"
Steel and ironwork in Cylinder Wharf	2,427	Tons.
Mass Concrete in Dock Walls & Main Wharf Reconstruction	11,220	C. yards.
Concrete in Blocks made ...	32,300	"
" set ...	15,800	"

The average number of men employed per diem on the works and at the quarries during the year was 1,691.

SINGAPORE HARBOUR WORKS.

During the year good progress was made with the works. They are now nearing completion. The north and south walls have been completed together with their metalled quays. The north and south piers were practically completed but for the provision of the transit sheds that are to be erected thereon. The depositing of granite rubble on the mole stopped in July. When the landing stages and temporary lights at its heads are erected the mole will be complete. The reclamation work is complete, but a small amount of filling material will yet require to be deposited in the work to make good the settlements of the ground due to consolidating of materials already deposited. During the year the dredging proceeded as usual and 183,000 cubic yards were dredged and taken to sea; the dredging is practically finished.

At the end of the year the average number of men employed on both at Singapore and at the quarries at Pulau Ubin was 28 Europeans and 760 Asiatics.

During the year the sum of £129,500 was paid to the contractors. The total cost of the Harbour Works up to the end of the year amounted to £1,545,000.

PUBLIC WORKS.

The total expenditure of the Public Works Department under all heads of service was $2,465,511.

It was distributed as follows:—

	$
Singapore	1,048,284
Labuan	17,261
Malacca	568,781
Penang and the Dindings ...	531,757
Province Wellesley	299,426

Among the more important works completed were the:—

	$
New Offices and Supper Room, Government House, at a cost of	89,500
Extension to Government Printing Office at a cost of	64,000
Revetment walls to both sides of Rochore Canal from Kandang Kerbau to Bencoolen Street	91,200
A revetment wall to the Malacca Reclamation	38,000
Additions and alterations to Durian Daun Hospital, Malacca	35,999
New Girls' School and Teachers' Quarters, Northam Road, Penang ...	62,958

The principal works in hand are: in Singapore the erection of 19 quarters for clerks, Kandang Kerbau; lining the banks of Rochore Canal with concrete between Bencoolen Street and Arab Street; and in Penang the construction of the Penang Hills Railway.

The "special" expenditure upon metalling or re-metalling roads amounted to $106,304: 18¾ miles of road were thus treated at an average cost of $5,669 per mile.

The Annually Recurrent Expenditure upon road maintenance was $560,193.

The road system thus maintained comprises 552 miles of metalled road, 65 miles of gravelled road (45 miles in Malacca, and 20 miles in the Dindings) and 752 miles of natural road (of which the greater part lies in Malacca and Province Wellesley).

CHRISTMAS ISLAND.

The total revenue collected at the District Office in 1914 was $4,283.50. The chief item was $3,523.15 from liquor duty. In 1913 the revenue was $4,222.75. Besides this revenue there is due a sum of $1,500 for rent of the island, and a royalty on phosphate exported.

The expenses paid by the District Office amounted to $14,746.37, compared with $11,408.55 in 1913. The increase is due to the presence of a more highly paid staff.

The imports consisted of machinery, tools, railway material, locomotives and lorries. The value was £15,282-2-4 against £20,127-12-4 in 1913, but the imports of that year were exceptionally valuable.

Ninety-three thousand seven hundred and eighty-nine tons of phosphate of lime were exported, against 150,003 tons in 1913. Germany, Austria and the Scandinavian countries continued to be the chief customers.

The total tonnage entered and cleared at Flying Fish Cove was 96,110 tons, compared with 150,016 tons in 1913.

In spite of the alteration of labourers' contracts in June no scarcity of labour occurred.

During the year the Christmas Island Co. laboured steadily in opening up the island. A railway stretching six miles from Flying Fish Cove has approached within a mile of the Grantswell Lines. The pier begun in 1912 has progressed slowly.

Health in 1914 was on the whole, fair.

The population on 31st December numbered 1,527: on 31st December, 1914, 1,036—made up of 986 men, 33 women and 17 children.

The average temperature was 81·4° F.

GENERAL.

The war affected the prosperity of the Colony less than might have been expected. The revenue for 1914 ($14,016,882) was the highest ever recorded, exceeding the next highest—that of 1912—by $1,104,305. Although this rise was due mainly to greater profits on opium it was accompanied by a decreased consumption of the drug. Moreover, in spite of the prohibition of Chinese and Tamil immigration after the beginning of August the total volume of local produce shipped from our ports remained about the same. Rubber, tin, copra and gambier all showed increases in export.

The year began badly. The failure of the Kwong Yik Bank had injured many small local undertakings and had shaken public confidence in Chinese banking methods; it seemed as though the interests of depositors were being sacrificed to those of borrowers and directors. Naturally depositors became nervous; and the fear of a sudden panic among investors led the Chinese Commercial Bank to discuss its affairs frankly with Government with a view to special assistance should any unexpected crisis threaten it. These discussions were destined to bear fruit later when war

broke out. In the meantime the Companies' Amendment Ordinance was passed to check the abuse of directors' powers; and arrangements were made to strengthen the department of the Official Assignee and Registrar of Public Companies so as to bring it into closer touch with local business enterprise.

In May there was made with the Sultan of Johore an agreement which in peaceful times would have been regarded as the most important event of the year. Under this agreement His Highness accepted the General Adviser as the representative of the British Government and arranged to govern in accordance with that officer's advice. His Highness's aims and wishes were embodied in a letter addressed by him to the Governor and were accepted by the latter in every detail. Throughout its history the modern Sultanate of Johore has been associated so intimately with the Settlement of Singapore that the new agreement cannot fail to be to the advantage of both the contracting parties; in fact it has been followed already by improved relations between the two Governments. When war broke out the Sultan placed himself and his forces unreservedly at the disposal of the Imperial Government and has had the opportunity at a more recent date to prove both the value and sincerity of his co-operation.

In June the Governor proceeded on six months' leave to Europe a period of furlough that was destined to be cut short by the march of events. In His Excellency's absence I administered the Government with Mr. W. C. MAXWELL as Acting Colonial Secretary.

In July the fear of war in Europe began to disturb local business conditions. At the close of the month Mr. W. W. COOK of the Straits Trading Company informed me that owing to the state of the tin market it was doubtful whether his company with its limited working capital would be in a position to finance the mining industry indefinitely should the metal cease to find a ready sale. This warning was of supreme importance because of the large numbers of coolies (some 250,000) dependent on the tin industry for their livelihood. The Federated Malay States Government, though primarily interested, was not in a position to help the industry financially; and it became necessary for the Colonial Government to face the possibility of having to take the place of the Straits Trading and Eastern Smelting Companies as the buyer of Federated Malay States tin.

Of course there were alternative proposals. One, suggested in the press and elsewhere, was the provision by the Public Works Department of relief works for the unemployed mining coolies. This proposal would have helped the coolies but not the industry; and even as a measure of relief it was wasteful and unsatisfactory in that a miner is more likely to be efficient and contented at his own work than at a task to which he is unaccustomed. It was also too costly: money spent on relief works would not renew

itself while money spent on the purchase of tin would be replaced from time to time by the sale of the metal. Another proposal—put forward at a later date by the Selangor Chamber of Commerce—suggested the grant of advances to miners. This alternative would have assisted the wealthier mine-owners, but it would not have enabled the poorer workers to sell their tin outright except to speculators who could have exploited them ruthlessly at a time when money was tight.

In any case it became clear that an industrial crisis accompanied by much unemployment was imminent; and on the 3rd August the introduction of deck passengers from Southern China and the Coromandel Coast was prohibited by an order under the Quarantine Enactment. To relieve the labour market still further free passages to their own homes were offered to all destitute and unemployed coolies who wished to be repatriated.

Early in August Mr. COOK, with Mr. NUTT, M.F.C., called at Government House and reported that the Straits Trading Company was no longer prepared to buy tin on its own account. They were authorized at once to purchase it on Government account.

I wish to take this opportunity of expressing my personal indebtedness to Mr. W. W. COOK whose advice and assistance were invaluable to me at a very critical time.

On the 5th August a conference was held with the Acting Chief Secretary, the Acting Resident of Selangor, and the unofficial members of the Federal Council at Kuala Lumpur. The arrangement as to the purchase of tin was approved, and assistance was also promised to the rubber industry. While the conference was sitting, news was received of the declaration of war against Germany.

The effect of the outbreak of hostilities was discounted by the state of uncertainty and uneasiness that had previously prevailed—a condition as harmful to trade as war itself could have been. Business remained bad but it was no worse than before. The general public concerned itself for the moment with minor issues such as the sufficiency of our food supplies and the attempts of small tradesmen to force up prices. A few days were enough to allay anxiety and make it clear that siege conditions were not going to prevail in Singapore.

The economic position was more intricate. The following figures will make it plain that there was no actual lack of currency at this time:—

	Currency Notes in Circulation.	*Coin reserve.*	
	$	$	c.
31st December, 1913 ...	43,222,548	23,912,802	71
31st July, 1914 ...	43.834,548	24,524,802	71

But this currency was not circulating freely. The "bazaar" hoarded cash, realizing whatever it could and paying out as little as possible. There was a disastrous run on the Chinese Commercial Bank; and other banks were forced to pursue a cautious policy, making few advances and keeping a strict watch on their cash reserves.

For the first day or two Government had been purchasing tin by means of cheques on its bank balances. It was, however, realized that purchases averaging $100,000 a day could not be continued indefinitely without disturbing banking conditions and making money still tighter. The Currency Commissioners then came forward and bought for $3,155,000 securities from the Federated Malay States Government, paying for them in fresh notes and thus providing the Government with a fund which made it possible to buy tin and to advance money to planters and others without depleting in any way its reserves in the banks. Certain banks also increased the currency in circulation by giving gold for notes. The following figures give the nett result of these transactions:—

	Notes in Circulation.	*Coin reserve.*	
	$	$	c.
31st July, 1914 ...	43,834,548	24,524,802	71
31st August, 1914 ...	48,176,148	25,711,402	71

This increase of the currency relieved the tension of the money market materially and with the increase in confidence brought about a return to normal business conditions at a comparatively early date. At the close of the year the notes in circulation amounted to $48,487,648 and the coin reserve to $26,022,902.71.

Besides the help given to the Federated Malay States Government for the purchase of tin and for advances on rubber the Colonial Government lent $50,000 to assist the planting industry in Malacca, $300,000 to the Chinese Commercial Bank, and $400,000 to another bank. A few small loans to planters are still outstanding; but for this exception the sums lent as above mentioned in the crisis have been repaid in full.

It may now be mentioned that the supply of unissued currency notes of small denominations in the hands of the Commissioners was too limited for war purposes when war broke out. The stock was barely sufficient to meet the more pressing demands for currency. This deficiency (which has since been made good) intensified the strain of the situation for those who had to deal with it. An ampler supply of notes would have given a proper margin of safety and would have allayed all anxiety as to the financial position.

The outbreak of hostilities raised some important issues as to the status and trade of alien enemies residing in the Colony. Trade with Germany itself was of course prohibited at once; but the practice of nations in previous wars had not been such as to justify the immediate internment of enemy subjects and the closing down of enemy firms, with the result that the Colony was for a few days in the anomalous position of a base from which Germans of military age might possibly set out to bear arms against us. On the 7th August a number of enemy reservists attempted to leave Singapore by the s. s. *Rumphius* for the express purpose of joining the garrison at Tsingtau. They were made prisoners of war and were released only on parole. All German subjects were then made to sign undertakings not to take part in certain hostile acts against Great Britain and were subjected to certain restrictions. In justice to them it must be added that their conduct gave very little cause for complaint. There were one or two minor offences against trade rules or against the censorship, but there is no evidence that any German or Austrian prisoner was guilty of serious political crime. The rumours of secret wireless installations set up in the Colony by enemy subjects were mere *canards* unsupported by any evidence.

On the 6th September the Governor returned from leave. The financial position was then somewhat easier, there being a market for tin, but on two subsequent occasions the Government was compelled to assist the mining industry for short periods by purchases of the metal.

Very early in the war the question of providing a Malaya Contingent for service at the front had been taken up by the Military Authorities but it was understood that the system of providing small irregular forces was not well adapted to the needs of a great European war. In September the proposal was modified and it was suggested that passages should be provided by public subscription for men who desired to enlist in the new forces. This new proposal was open to the objection that passages would be given to intending recruits who might be rejected on arrival in England as physically unfit for service in the Army. The Government thereupon telegraphed to England offering to provide the passages if the War Office would consent to open a recruiting office in the Colony. After some delay an arrangement was arrived at under which the risk of rejection was minimized by the holding at Singapore of a medical examination of would-be recruits by officers of the Royal Army Medical Corps. By the end of the year passages had been given to 245 recruits.

The question of inaugurating a relief fund for the sufferers by the war was also discussed in August; but it was decided that the tightness of money and the uncertainty of trade conditions made it expedient to await more settled times. In September matters had improved. On the 5th October a public meeting

was held under the presidency of the Governor for the appointment of a Committee to collect subscriptions for the Prince of Wales' Fund. By the end of the year $192,747 had been collected from the Singapore public, and £10,000 had been voted to the fund by the Government of the Colony. A portion (about 20 per cent) of the Singapore subscriptions were allocated to local relief. The collections for the Prince of Wales' Fund amounted on 31st December, 1914 to $68,483.47 at Penang and $7,985.08 at Malacca.

On the 10th September in the Bay of Bengal the German cruiser *Emden* began its long series of attacks upon British merchant shipping in Eastern waters. It succeeded in destroying a number of vessels but in no case did it sink any trader that had only just left one or other of the ports of the Colony. If, as has been suggested, the cruiser obtained its information of the movements of shipping from newspapers found on captured vessels the strict censorship exercised in the Colony over such details may account for the comparative immunity enjoyed by ships plying continuously in our local waters. The destruction of the *Troilus* after its departure from Colombo with a valuable Singapore cargo was the most serious injury done by the *Emden* to the British Mercantile Marine. On the 28th October the *Emden* made a bold dash into the harbour of Penang and sank the Russian cruiser *Jemtchug* at her moorings and the French destroyer *Mousquet* off Muka Head. This was its last success. On the 9th November a telegram reached Singapore to the effect that the German man-of-war had appeared off the Cocos Islands and was landing a party to destroy the cable-station. Very shortly afterwards a further message was received that an unknown British cruiser had arrived suddenly on the scene and had attacked the *Emden*. After an anxious period of silence and suspense the news came through that H. M. A. S. *Sydney* had driven the enemy's warship ashore on North Keeling Island.

The doings of the *Emden* drew attention to the risk involved in giving almost unlimited freedom to alien enemies living in our ports. It is only fair to the German residents to say that most of them are known to have behaved in an exemplary manner at a very trying time and that there is no evidence whatever that information of the movements of British shipping reached the *Emden* through any breach of their parole. But the business done by German firms with neutral states, which in turn traded with Germany, made it difficult to prevent money and information filtering through from the Colony into enemy countries. The one serious objection to general internment—its being contrary to the usual practice of nations in previous wars—had been removed by the action of the German Government itself which had interned its own enemy subjects and had

shown a repeated disregard for international law and treaties. On the 25th October general instructions were issued for the internment of Germans and Austrians. On the 4th December this action was followed up with a bill for the compulsory winding-up of enemy companies. On the 11th December this bill became law.

The attention of the general public during the closing months of the year has been so focussed on imperial issues that a change of great moment to the Colony has escaped almost unnoticed. For some years past it had been the endeavour of the Straits Settlements Government to arrive at some arrangement for purchasing raw opium at a fixed price direct from the Government of India. Some such system is necessary in the interests of our revenue of which no accurate forecast can be given so long as the price of opium is driven up or down by the intrigues of speculators in India and the success or failure of smuggling into China. True, the Colony had suffered little in actual practice. Estimates have always erred on the side of caution; and the profits on the drug have been guarded against temporary fluctuations of price by the maintenance of large reserve stocks. But the keeping of such reserves means the locking up of capital; and cautious revenue estimates require a similar caution on the expenditure side if the risk of financial trouble is to be avoided. Above all, the system of direct dealings in raw opium between the various Governments concerned (if it became general) would be the surest preventive of smuggling in that it would not allow the raw material to pass into private hands. In October last the desired agreement was arrived at. Opium is now sold direct by India to the Colony to the full extent of its requirements; and the capital locked up in our reserves of the raw product is being made available for other purposes at a time when it is specially needed.

R. J. WILKINSON,
Colonial Secretary.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1915.

FINANCIAL.

The revenue for the year 1915 amounted to $14,131,691, (exceeding the estimate by $2,330,166), whilst the expenditure was $10,196,560 (which is less than the estimate by $388,136).

In spite of the fact that the year 1914 included five months of war, the revenue of the Colony reached a record figure in that year and it is remarkable that in the second year of war that record was not only maintained but was even exceeded by $114,809. It is worthy of note that the revenue of the Colony has increased by more than fifty per cent since 1910.

The actual figures for 1914 and 1915 are shown in the following statements:—

A.—REVENUE.

	1914.	*1915.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Port, Harbour, Wharf and Light Dues ...	37,139	3,096	...	(a) 34,043
2. Licences, Excise and Internal Revenue not otherwise classified ...	11,312,250	11,463,164	150,914	...
3. Fees of Court or Office, Payments for Specific Services, and Reimbursements in Aid ...	632,973	602,054	...	30,919
4. Posts and Telegraphs ...	698,068	681,290	...	16,778
5. Rents of Govt. Property	646,309	768,561	122,252	...
6. Interest	409,079	361,379	...	47,700
7. Miscellaneous Receipts ...	115,521	118,771	3,250	...
	$13,851,339	13,998,315	276,416	129,440
8. Land Sales	165,543	133,376	...	32,167
TOTAL ...	$14,016,882	14,131,691	276,416	161,607
		Net increase ...	$114,809	

(a) Due to the Government Wharves, Penang, having been placed under the Penang Wharves Committee on 1st July, 1913.

The principal constituents of the head "Licences, etc.," are Opium Revenue, Liquors and Stamp Duties. Revenue from Opium in 1915 showed a decrease of about $31,000 as compared with the previous year, but revenue from liquors increased by more than $114,000, or about 7 per cent.

Stamp duties, though far below the estimated figure, produced approximately $67,000 more than in 1914. Estate duty brought in $372,780 in 1915 as compared with $313,751 in 1914.

Under Rents of Government Property, the increase is mainly accounted for by an increase in land rents of $117,000, for $87,000 of which the Settlement of Malacca is responsible. The increase in the revenue from Government buildings let for profit shows a satisfactory return on extra capital expenditure.

On the other hand war has, as might be expected, adversely affected the revenue from Posts and Telegraphs. The only item included in that revenue which shows an increase over pre-war receipts is "Telephone Exchanges" and it must be remembered that there has been considerable corresponding capital outlay in the recent past. The sale of Postage Stamps has declined by ten per cent as compared with 1913, while the receipts from telegrams show a reduction of twelve per cent in the same period.

Interest on investments produced roughly $74,000 less than in the previous year, but interest on bank accounts showed an increase of some $11,000 and, moreover, owing to the high rate of exchange obtaining in the latter months of the year, the amount credited to profits on exchange on remittances almost reached $40,000.

28. Public Works, Recurrent	254,244	233,213	...	21,031
29. Public Works, Extraordinary	926,077	676,463	...	249,614
War Expenditure ...	131,000	49,143	...	81,857
TOTAL ...	10,180,189	$10,196,560	888,121	871,750
	Net Increase	...	$16,371	

The expenditure upon personal emoluments ($3,779,115) and "other charges" ($1,887,585) shows an increase upon personal emoluments and a decrease under other charges for the preceding year when the figures were $3,733,124 and $2,292,696 respectively.

The most noticeable feature of the above table is the increase in Military Expenditure, this increase was due to the payment of arrears of Defence Contribution in respect of the excess of the record revenue of 1914 over the corresponding estimate.

Miscellaneous Services in 1914 included the Colony's contribution of £10,000 to the Prince of Wales' Fund. In 1915, owing to the fact that fewer officers were on leave, the amount spent on Salaries of Acting Officers was $40,000 less than in the previous year, while the decrease in Rural Board expenditure and increase in the corresponding revenue reduced by $152,000 Government contribution to those Boards. Moreover, the amount written off as loss on sale of Securities was $28,000 less than in the previous year.

Exclusive of Defence Contribution and of special expenditure connected with the war in the two latter years, the Colony's expenditure in 1913 was $7,878,605; in 1914, $7,746,594; and in 1915, $7,207,478; the corresponding expenditure on Public Works Extraordinary being $1,030,586, $926,077 and $676,463, respectively. This is a clear indication of the Colony's policy of economy in war time.

The principal excesses of revenue over the Estimates were in respect of Opium Revenue ($2,014,428), Liquors ($315,880), Interest ($128,293), Premia on Grants ($69,126), and Land Rents ($80,372). The principal excess of expenditure was upon Military Expenditure ($736,936). The principal savings were in respect of Public Works Extraordinary $528,772 and Government Monopolies $81,750.

The following comparative statement shows the revenue and the expenditure of the Colony for the last six years:—

		Revenue.	*Expenditure*
		$	$
1910	...	9,336,328	7,532,242
1911	...	11,409,221	9,085,389
1912	...	12,912,577	9,295,102
1913	...	12,397,747	10,468,618
1914	...	14,016,882	10,180,189
1915	...	14,131,691	10,196,560

The Assets and Liabilities of the Colony on the 31st December, 1915, were as follows:—

Liabilities.	$	*Assets.*	$
Deposits	3,428,787	Indian Agency Account ...	965,011
Suspense (Currency Commissioners) ...	1,072,615	Investments	6,499,366
Drafts and Remittances ...	16,691	Advances	204,189
Excess of Assets over Liabilities ...	20,581,574	Advances, Singapore Harbour Works ...	4,367,227
		Loans:—	
		Municipalities ...	308,840
		Sultan of Trengganu ...	40,000
		Trengganu Govt. ...	22,498
		Kelantan Govt. ...	120,000
		Singapore Harbour Board	1,749,370
		Penang Harbour Board	150,000
		Imprests	15,166
		Loan Account	5,635,076
		Cash in Transit ...	1,970
		Suspense	804,979
		Cash	4,215,975
TOTAL ...	$25,099,667	TOTAL ...	$25,099,667

The excess of the assets of the Colony over its liabilities increased during the year by $3,935,131.

A Department of External Audit was created during the year for the Colony and the Federated Malay States. In the Colony it will audit the accounts of the Municipalities, the Harbour Boards and the Monopolies Department. The Director arrived in March, and began to organize the Department. The only accounts that have so far been taken over by the department are those of the Monopolies Department. A considerable portion of the Director's time has been spent in the Federated Malay States in connection with the audit of the Federated Malay States Railways Department.

MILITARY AND WAR EXPENDITURE.

The expenditure in 1915 on the Volunteers, Reserve Force and Civil Guard amounted to $262,842. Of this, $82,586 was paid from votes on the Estimates and the balance from the War Expenditure Suspense Account.

This expenditure was divided up between the Settlements as follows:—

	Paid from votes on Estimates.	*Paid from Suspense Account.*	*Total.*
	$	$	$
Singapore ...	60,252	114,052	174,304
Penang ...	21,145	56,243	77,388
Malacca ...	1,189	9,961	11,150
Total ...	82,586	180,256	262,842

The total amount expended on services connected with the war, exclusive of the maintenance of the Volunteers, Reserve Force and Civil Guard, was $375,640, giving a total Special War Expenditure of $555,896 in 1915. Special expenditure on war services since the outbreak of war amounted at the end of 1915 to $934,448, the main items included being:—Volunteers $249,034; Examination Service $228,708; Repatriation of Chinese $130,238; Defence Works (Penang) $95,288; Censorship $53,102; and passages of 287 Recruits $42,425. Special War Expenditure to the extent of $180,143 has been debited to votes taken in Legislative Council, the balance, $754,305 at the end of 1915, still remained in the Suspense Account opened at the outbreak of war to deal with special expenditure due to the war.

The amount paid in 1915 for Defence Contribution was $2,938,846 of which $738,381 represented arrears in respect of the actual revenue in 1914. The amount to be paid in 1916 for arrears of Defence Contribution in respect of the actual revenue for 1915 is $454,993.

PUBLIC DEBT.

The indebtedness of the Colony is in respect of the loan raised by the issue of 3½ per cent Straits Settlements Inscribed Stock under the provisions of Ordinance IV of 1907, and its amount on the 31st December, 1915, was £6,913,352, of which the equivalent in local currency is $59,257,302.

The expenditure upon the services in respect of which the loan was raised stands as follows:—

		$
Singapore Harbour Board	...	47,720,526
Penang Harbour Board	...	2,093,974
Municipal Commissioners, Singapore		4,484,460
Municipal Commissioners, Penang	...	1,250,000
Government Harbour Works	...	10,834,286
		66,383,246
Loan Expenses and Cost of Conversion (1907 Loan) less interest received	... ...	3,388,205
Total	...	$69,771,451 *

The charge on account of interest on the public debt was $2,073,000 in 1915. This charge is, however, borne by the Singapore Harbour Board and other bodies to whom portions of the loan have been allotted.

EXCHANGE.

The demand rate (Bank opening rates only) ranged during the year between 2/4¼ and 2/3 31/32. The latter quotation, however, obtained only for one day in June.

Prior to the end of July the highest quotation was 2/4⅛ and the month of August opened with 2/4 3/32 as the rate. During August quotations rose to 2/4 7/32 at which figure the rate remained almost steady until the middle of November when it again rose to and for the rest of the year remained at 2/4¼.

CURRENCY.

Excluding subsidiary coins, the currency of the Colony in circulation at the end of the year consisted of $57,702,348 in currency notes, and $5,736,535 in dollars and half-dollars, while there were still in circulation bank notes issued by the Hongkong and Shanghai Banking Corporation and the Chartered Bank of India, Australia and China to the value of $182,720.

* Practically all the balance over and above the proceeds of loans already issued has been advanced by the Colony.

From the currency point of view the most remarkable feature of the year was the phenomenal increase of $9,214,700 in the currency note circulation. This increase was almost entirely due to the giving out of the notes in exchange for gold in London during the last five months of the year.

The demand for currency to meet the difference between the value of exports from and imports into the currency area sprang up in August and resulted in the purchase by the Commissioners before the end of the year of telegraphic transfers on London to the extent of £1,030,000. These sterling remittances were all purchased at the pre-war rate of 2/4$\frac{3}{16}$.

The coin reserve held by the commissioners at the end of the year against the note circulation amounted to $33,532,489.57 consisting of £327,250 in gold and $13,270,337.03 in silver in Singapore and £2,036,667-15-11 in gold in London.

The investments held by the commissioners on account of the note guarantee and depreciation funds were worth, at cash bargain or minimum prices, at the end of the year $23,080,288.18, the cost price of those investments being $28,063,019.37.

The note guarantee fund at the end of the year was worth $57,685,392.85 (Coin portion $33,532,489.57, Investment portion $23,080,288.18 and on deposit with the government pending investment $1,072,615.10), while the gold standard reserve fund at the same date was worth $1,480,589.43. The total of the funds controlled by the commissioners was, therefore, $59,165,982.28 or $1,463,634.28 in excess of the total note circulation at the end of the year.

The amount of subsidiary silver in circulation on December 31st, 1915, was $5,783,660.15, of which $1,866,295.65 was new and $3,917,364.50 old subsidiary silver. The latter, which is of 800 fineness, is being steadily withdrawn from circulation, the total amount withdrawn to the end of the year being $3,679,448.50, of which $3,624,353.50 has been dealt with and $55,095 remains in the Treasury pending reminting.

The cancellation and destruction of notes is still in a very backward state. No less than 4,091,040 worn-out notes withdrawn from circulation were in the hands of the commissioners at the end of the year awaiting sorting and registration prior to destruction. The number of cancelled notes actually destroyed during the year was 710,510 or 6·2 per cent only of the number in current circulation.

TRADE.

In the trade returns, imports represent goods for consumption and distribution, but exclude goods for transhipment only. Exports do not include Para rubber from the Federated Malay States transhipped in the Colony.

The gross trade of the Colony in 1913, 1914 and 1915 was as follows in thousands of pounds sterling :—

	Exports.			*Imports.*		
	1913.	*1914.*	*1915.*	*1913.*	*1914.*	*1915.*
	£	£	£	£	£	£
The United Kingdom	10,745	9,976	8,933	6,176	4,888	4,305
British Possessions and Protectorates, other than the Malay States* ...	6,005	4,839	5,647	13,606	9,783	9,703
The Malay States*	8,112	6,496	6,741	13,292	11,380	14,967
Germany and Austria	2,622	1,820	...	1,165	550	26
European Countries other than Germany and Austria	3,282	2,775	2,758	1,794	1,633	1,383
The United States of America ...	5,285	4,687	11,329	748	589	831
Other Countries	9,324	8,389	11,717	19,156	16,837	19,819
Total ...	45,375	38,981	47,125	55,937	45,660	51,037
Merchandise	43,510	38,032	46,495	53,011	43,856	49,787
Treasure	1,865	949	630	2,926	1,804	1,250
Total ...	45,375	38,981	47,125	55,937	45,660	51,037

The total import values exceed those of 1914 by over 11¾ per cent, but fall below those of 1913 by 8¾ per cent. Export values exceed the figures of 1914 and 1913 by nearly 21 per cent and 4 per cent respectively.

TIN AND RUBBER.

It is convenient to deal with these two articles of trade under one heading, rather than to mention them first as imports and again as exports.

The imports of tin in 1915 were *49,527* tons (value *£7,558,321*) from the Malay States*, *6,111* tons (*£938,530*) from the Netherlands Indies, and *11,303* tons (*£1,735,951*) from other countries. The corresponding figures in 1914 were *49,323* tons, *2,950* tons and *9,913* tons.

In 1913, they were *50,169* tons, *2,297* tons and *11,105* tons. Most of this was in the form of tin ore which has been converted at 70 per cent.

The exports of tin in 1915 were *22,724* tons (value *£3,543,369*) to the United Kingdom, *32,286* tons (*£5,009,048*) to the United States of America and *13,778* tons (*£2,134,395*) to

* The Federated Malay States and the Malay States not included in the Federation.

other countries. In 1914 the corresponding figures were *35,506* tons, *19,350* tons and *11,377* tons. They were *35,215* tons, *17,735* tons, and *12,800* tons in 1913.

Rubber imports in 1915 were *23,114* tons (value *£5,253,352*) from the Malay States, *2,198* tons (*£501,298*) from the Netherlands Indies, and *709* tons (*£147,602*) from other countries.

The figures in 1914 were *9,661* tons, *556* tons and *274* tons. They were *4,073* tons, *188* tons, and *189* tons in 1913.

The exports of rubber in 1915 were *12,824* tons (value *£2,824,334*) to the United Kingdom, *21,075* tons (*£5,260,166*) to the United States of America, and *4,383* tons (*£981,479*) to other countries. In 1914, they were *13,376* tons, *4,510* tons, and *2,220* tons. The corresponding figures in 1913 were *7,168* tons, *2,508* tons and *731* tons.

IMPORTS.

The following statement shows in thousands of pounds sterling the usual classification of imports for the last three years:—

	1913.	*1914.*	*1915.*
	£	£	£
A.—Foodstuffs, Live Animals, Drinks and Narcotics ...	20,146	17,763	19,161
B.—Raw Materials ...	21,973	18,243	22,366
C.—Manufactured and partly manufactured goods ...	10,892	7,851	8,260
Total ...	53,011	43,856	49,787

There was a steady demand for imports throughout the year. Deliveries were somewhat slow in the first nine months, after which they kept pace with the sales.

In class *A* (foodstuffs, etc.) there was an increase of 8 per cent in value, and of about 4 per cent in volume. Increased values were principally in sugar, pepper, opium, sago, tapioca, rice and other grains, tea, vegetables and fruits, whilst there was a fall in the provision class, including tinned and bottled goods (including milk, but excepting biscuits), butter, cheese, lard, ghee, and curry-stuffs. In volume, there was an increase in grains (except wheat flour and beans, and peas), opium, spirits, tea and tobacco, and a decrease in wines, malt liquors, sugar, and milk and fish.

In class *B* (raw materials) imports of coal, in which Japan continues to do the bulk of the business, fell off by 30 per cent. Petroleum declined by about 6½ per cent on a total import of nearly eight million gallons. Lubricating oil increased. Tin ore increased by 5 per cent in quantity and 6 per cent in value. Remarks relating to gums, oil and produce will be found under "Exports".

In class *C* (manufactured and partly manufactured goods), textiles showed an increase in value in silk piece goods, sarongs, sewing thread, plain yarn and jute gunnies, but declined in apparel, hosiery, millinery and general drapery, dyed and printed cottons, dyed and mercerised yarns, blankets, and woollen goods generally.

Metals manufactured fell off in value in machinery, motor cars and accessories, ironware and tools and instruments, but increased in zincware (mostly old match box cases returned to Japan), nails, corrugated iron, tin-plates, and telegraph and telephone material.

In the miscellaneous sub-head of class *C*, (comprising goods other than textiles or metals), an increased value of over 16 per cent is shown. Rubber goods (chiefly tyres) were imported to the value of £277,000, (an advance of over 40 per cent), and were the most important increase in this sub-head.

Matches, joss-sticks and joss-paper, paper and stationery, soap, woodenware (mostly for rubber chests), chemicals and acids, and perfumery increased, whilst there were declines in the values of cabinetware, fireworks, lamps and lampware, boots and shoes, and musical instruments.

EXPORTS.

Exports in their usual classification, are shown, in thousands of pounds sterling, and were as follows in the last three years:—

	1913.	*1914.*	*1915.*
	£	£	£
A.—Foodstuffs, Live Animals, Drinks and Narcotics ...	15,506	13,724	15,717
B.—Raw Materials ...	23,199	20,169	25,117
C.—Manufactured and partly manufactured goods ...	4,805	4,139	5,661
Total ...	43,510	38,032	46,495

The export volume of produce (excluding tin and rubber which have been mentioned already) was well maintained during the year. In prices, the level was fairly satisfactory, though below that of the two preceding years.

In class *A* (foodstuffs etc.), export values rose in nearly every article, and was especially marked in rice and grains, pepper, sugar, sago, tapioca, areca-nuts, wheat flour, pineapples, coffee, milk, onions and garlic, and fresh and salted provisions. There were declines in opium and lard. The value of the total export of all spices increased by a third of a million sterling.

In class *B* (raw materials) which includes non-edible produce, oils and metals, there was a heavy fall in copra, amounting to nearly a million sterling in value, and 38,000 tons in volume. There were decreases also in gutta-percha, phosphates of lime (from Christmas Island) and gum copal. The increases were principally in gambier, rattans, hides, coconut oil, chemicals, manure and petroleum.

In class *C* (manufactured and partly manufactured goods) there was an increase of 40 per cent in textiles and in metals, and of 26 per cent in miscellaneous goods. The sub-head of textiles shows increases both in value and in volume in sarongs and piece-goods, jute gunnies, hats and caps, yarns and silk piece-goods.

Manufactured metals advanced in zincware, machinery, nails, hardware, ironware, iron bar and corrugated and tin plates, but fell off in motor cars and accessories.

In the third sub-head (miscellaneous goods) there were increases in India rubber goods (including tyres), matches, joss-sticks and joss-paper, tanned hides, chemicals, crockery and earthenware, paper, soap and woodenware. The only decline was in cabinetware—principally bentwood, which formerly came from Austria.

Trade by Countries.

It is as well known, as indeed it is obvious, that in trade returns the general rule is that the port of shipment is taken as denoting the country of origin. The fact is always prominently stated in the prefatory note to the Annual Trade Returns. Nevertheless it is occasionally forgotten. German goods shipped for instance—in past years—from Antwerp, Amsterdam and Genoa have (as a rule) been credited to Belgium, Holland and Italy. Similarly if they came from a British port, they have been termed British imports. Logically, therefore, the returns should only purport to show our shipping trade with the ports of various countries. "Origin" and "ultimate destination", terms with which the war restrictions upon trade have made us all familiar, should be a matter for separate returns. But a compromise has

been effected, and is somewhat misleading: it is that when the country of origin is known, it is credited with the import. But to this variation from the general rule there is in its turn an exception. Switzerland has no place in the books of the Registrar of Imports and Exports, for to show in his returns the comparatively few instances where the Swiss origin of a consignment is known would be to give a wholly false idea of the extent of Swiss trade. By analogy, from the reason for excluding Swiss returns one may see how wrong an impression of the volume of German trade is gained by a perusal of German imports, even with the modification or compromise indicated above.

The figures may be taken as showing accurately the trade of this Colony with the Continent of Europe *as a whole*, but as wanting in accuracy in respect of the trade with the separate countries of the Continent.

The export and import trade of the Colony with the United Kingdom has been shown in tabular form above. Merchandise imported from the United Kingdom decreased by 7·8 per cent. The more distinctive declines are in import values of cotton piece goods and sarongs, machinery, coal, cycles, motor cars and accessories, cigars and cigarettes, tobacco, hardware and ironware, boots and shoes, cement, tramway and railway material, silk piece-goods, yarns and woollen cloth. There were increases in soap and soda, rubber goods including tyres, tar and corrugated iron, tinned and bottled provisions (especially milk), paints, telegraph and telephone materials, malt liquors and cotton handkerchiefs.

In exports, there was a fall in the value of copra of nearly *£232,000*. There were advances in sago, tapioca, gambier, pines, illipi nuts, rattans, coconut oil and wolfram.

Of this Colony's trade with other Colonies the only feature worthy of remark is the decrease in import values (principally in wheat flour, coal and tin ore) from Australia to the extent of nearly half a million sterling.

The value of the trade in merchandise with the Continent of Europe is shown in detail below in thousands of pounds sterling.

	Exports.			*Imports.*		
	1913.	*1914.*	*1915.*	*1913.*	*1914,*	*1915.*
France ...	1,498	1,150	1,738	293	451	342
Belgium ...	158	359	...	407	218	2
Denmark ...	416	397	492	75	47	78
Holland ...	98	109	15	363	300	323
Italy ...	389	319	448	569	488	479
Norway ...	1	1	3	18	76	116
Sweden ...	58	29	...	19	12	28
Spain ...	65	93	62	25	9	14
Russia ...	598	318	1,188	5	10	4
Germany ...	2,101	1,590	...	878	415	29
Austria ...	521	230	...	279	128	...
Other Countries ...	1	...	...	...	2	...

Increases are shown in imports of beer, ale and matches from Denmark; paper and stationery, perfumery and brandy from France; rubber tyres, paper and stationery from Italy; beer and ale, milk, butter and cheese and hardware from the Netherlands; matches from Sweden; and milk from Norway. The principal decreases were in milk from Switzerland; rubber tyres from France; and cottons and sarongs, hats and caps, and milk from Italy. On the whole, imports from the Continent fell off by 34 per cent in value.

Exports to the Continent decreased by 15 per cent. Copra to Denmark increased by nearly 80 per cent in value, and to France by 127 per cent. France shows increases in tin, wolfram, gambier, sago, pepper, hides and illipi nuts. Italy's increases are in tin, sago, pepper and rubber. Russia took £620,000 worth of tin, and £400,000 worth of rubber more than in last year. Spain took more tin, but less copra.

The Colony's trade with the United States of America has been shown in the table above. Our imports increased by over 45 per cent in value, and were principally under the headings of cigars and cigarettes, iron nails, paper and stationery, hardware and ironware, tools, steel, tramway and railway materials, tin plates, and tin ore (from the Pacific coast).

Exports show the unprecedented rise of 125 per cent over 1914. This was almost entirely under the headings of tin and rubber, but pepper, rattans, and gambier also show increases.

The trade with Japan shows increased imports of 23 per cent, and exports of 73 per cent. There are advances in rubber tyres, matches, wheat flour, woodenware, cement, chemicals and hosiery—coal and fish show decreases. The principal increases in the exports are in rubber, opium, tin, zincware, and shells.

ENEMY PROPERTY AND ENEMY FIRMS.

Under the provisions of the Trading with the Enemy (Amendment) Ordinance 1915, (No. IV of 1915), the Treasurer of the Colony for the time being was appointed Custodian of Enemy property by a *Gazette* notification of the 11th June, 1915. Advertisements in all the newspapers published in the Colony called the attention of the public to the provisions of the Ordinance which require persons holding or managing property on behalf of enemies to notify the Custodian of the fact. Returns of enemy shareholders were also required from, and made by, all companies incorporated in the Colony, or having transfer or share registration offices in the Colony. Dividends and interest payable, but for the state of war, to an enemy have been paid to the Custodian. The amount so paid up to the end of the year, together with the proceeds of property vested by the Court in the

stodian with power of sale, was $187,349, of which $89,400 s invested in securities approved by the Governor. In addition this sum, $113,585 was voluntarily handed over to the Cus- ian for safe custody, pending vesting orders, by persons ebted to enemies. Five applications were made to the Court the Custodian for vesting orders in respect of enemy property, l one application was made by a partner of enemies for a ting order in respect of partnership property. In all six cases orders were made by the Court.

Only one liquidator was appointed in 1914 under the pro- ons of the Alien Enemies (Winding-up) Ordinance 1914 (XXIX 1914). During 1915, ten alien enemy businesses with head ces in Singapore, and three with head offices in Penang, had iidators appointed to wind them up. In no case was the iidation completed by the end of the year.

BANKRUPTCY.

There were 59 trade bankruptcies during the year. A tain number of insolvents made arrangements with their ditors, and of these arrangements seven were registered.

A feature of the year was the failure of Madrasi dealers, ounting for six bankruptcies in the last half of the year and out of the seven registered deeds of arrangement. The inese bankruptcies were, on the whole, unimportant.

AGRICULTURE.

Rubber.—At the beginning of the year the price of plantation ber was 2/3 per pound. It reached its highest point, 3/11, at end of the year. Shipowners took advantage of these prices aise the freight to Europe from 78/- per 50 cubic feet to /6. The profit that still, however, remains to the planter has n such as to create a demand for land that is straining the ources of the land officers. It is very noticeable too how ch better the estates are maintained and clean-weeded than in past, and how the importance of thinning out of trees is oming realized.

The insistence of the war demand has helped "Plantation bber" in its rivalry with "Fine Hard Para." Manufacturers e been compelled to lay aside their aversion to trying lantation" and appear to be satisfied with the result of their l. At the beginning of 1915 "Fine Hard Para" stood, as it done persistently for the preceding eighteen months, at a siderable premium above "Plantation." Early in the year two rivals drew level, and now plantation is leading—though lead is small.

The establishment of a rubber market in Singapore and Penang has also helped plantation rubber. Large forward contracts between rubber estates and rubber manufacturers are now common, and in these days when standardization is still far distant are satisfactory to both parties as the buyer knows the seller's standard.

The direct sales of rubber to America have increased from 2,508 tons in 1913, to 4,510 tons in 1914, and 21,075 tons in 1915.

The total exports from the Colony amounted to 38,283 tons, of which 12,824 tons went to the United Kingdom, 1,998 tons to European countries, 1,230 tons to Japan, and 21,075 tons to the United States of America. Most of this, of course, is rubber imported from the Malay States and Netherlands Indies. Unfortunately there is no record of the amount of rubber actually obtained from the estates in the Colony.

Rice.—The Malay is giving up the hereditary cultivation of his race. It is sad, but with rubber and coconuts showing their present profits, it cannot be helped. From rice, a Malay might expect, if the season did not fail, to make with, the united labour of his wife and family, a bare livelihood: a small rubber plantation yields him enough to make him a comparatively rich man; and instead of the dried fish and the cloth garment that were all that he could afford as a rice-grower, he eats imported rice and dresses himself and his family in silks. Such of the rice-fields as are not cultivated are lying fallow, and cultivation can be resumed when desired.

Coconuts.—Copra at the beginning of the year stood at $8.90 (sundried): the maximum and minimum prices during the year were $12.50 and $7.00; and at the end of the year the price was $10.75. The freight to Europe rose from 39/- per 12 cwt. to 100/-. The exports for the year were 77,381 tons, mostly to France and Denmark.

The oilmills in Singapore and Penang only supply the demands of the local markets, and little, if any, of their oil goes to Europe.

General.—Nutmegs are going out steadily: cloves more slowly. The fruit crop of 1915 was good in the north, but in Singapore not uniformly good. Areca-nuts have done well. Pineapples in Singapore have been abundant, the prices delivered at the Canneries falling as low as $8 per 1,000.

Pests.—Parties of men were engaged throughout the year in Malacca upon locust-destruction, at a cost of $9,317—as compared with $4,081 in 1914.

It is believed that the measures taken have decreased their numbers considerably. The damage done by them to crops (rice and coconuts) has been very small. No other pest of cultivation has been unusually prevalent.

FORESTS.

Particulars of the areas of reserved forests in the different parts of the Colony are shown in the following table:—

Locality.	*Area of locality. (Sq. miles).*	*Area of Reserved Forests. (Sq. miles).*	*Proportion.*
Singapore ...	206	19·5	9·5
Penang Island ...	107	18·0	16·8
Province Wellesley ...	288	5·6	1·9
Dindings ...	265	36·4	13·7
Malacca ...	720	72·2	10·7
	1,586	151·7	9·5

A new area of 680 acres known as the Gunong Tunggal Reserve was finally gazetted during the year. Proposed reserves of 3,830 acres in the Dindings were notified in the *Gazette*.

The total revenue of the department was $16,718 against an estimate of $20,900, whilst its expenditure was $31,126. The Conservator of Forests considers that the department should pay its way when the Dindings and Malacca forests are developed. Preservation of timber is, of course, more important than forest revenue.

Reports from Malacca show that it was an exceptionally good seed year, especially amongst the dipterocarps.

Forty-four cases were taken into Court. Fines amounted to $439 and awards for compensation for damage to forest property to $464. Eleven cases were compounded. There was no change in the Forest Laws.

LAND.

The revenue for 1915 amounted to $903,745 and was thus distributed:—

——	Land Revenue.	Reimbursements.	Land Sales.	Total.
	$	$	$	$
Singapore	147,346	9,472	46,416	203,234
Penang	174,998	19,440	22,136	216,574
Malacca	388,049	19,987	69,964	478,000
Labuan	5,177	500	260	5,937
Total ...	717,570	49,399	138,776	903,745

SINGAPORE.

In Singapore, there was an increase of nearly $12,000 under land rents. Fifty applications were received for Crown Lands. The development of the South-west end of the island continues, and two hundred acres in the Mukim of Pengkang were sold at auction at an average price of over $30 per acre. In Pandan and Ulu Kalang Mukims, respectively, Crown Land was sold at $82, and $147, per acre. Applications for land amounting to 1,400 acres in Chua Chu Kang and Bajau were under consideration at the end of the year. The maps of Mukims VII and XV, prepared under the Boundaries Ordinance 1884, were published. The expenditure of the department was $23,444.

PENANG.

Land revenue increased by $38,479.

There were 10 applications for Crown Land in Penang, 28 in Balik Pulau, 97 in Province Wellesley and 221 in the Dindings. Sixty-seven Statutory Grants were registered in Penang, 134 in Province Wellesley and 13 in the Dindings.

MALACCA.

Receipts on account of rents on Grants and Leases and assessment under the Malacca Lands Ordinance amounted to $350,000—exceeding the figure for the previous year by nearly $70,000 and the estimate by $20,000. Expenditure totalled $20,200.

Owing to the fact that many holdings reached the tapping stage, the number of applications for licences to store rubber during the year greatly increased.

The average premium paid for land was 21 an acre. One piece of land at Bukit Lintang was bought for $110 per acre.

In the Central District 144 applications for Crown Land were received: in Alor Gajah 2,289 and in Jasin 1,308. The rise in the price of rubber caused quite a boom in land. In 1914 only 310 applications were received in Alor Gajah.

Customary holdings changed hands freely, 1,445 transfers under the Malacca Lands Transfer Ordinance being registered. During the year 19,341 acres of land under Grant tenure and 1,039 acres under Customary tenure were alienated. One thousand one hundred and eighty-one Statutory Grants and 2,300 Mukim Register Extracts were issued.

A greater number than usual of Conveyances, Mortgages and Reconveyances were registered under the Indian Act of 1839, the numbers being 271, 215 and 60 respectively.

ALIENATION OF LAND.

The area of Crown Land alienated, and the number of Statutory Grants issued during the last five years together with the amount of premia paid in respect of the same, are shown in the following table:—

SINGAPORE.

REGISTRATION OF DEEDS.

The number of deeds presented for registration in Singapore and Penang was 9,975 as compared with 10,187 in 1914, and the number of deeds finally registered, 9,793, as against 10,318 in 1914. Conveyances and Assignments accounted for 3,905, Mortgages for 2,740, and Reconveyances for 1,892. Revenue amounted to $30,709. The number of deeds presented for registration in Singapore decreased by nearly one quarter, as compared with those presented during the previous year. The Registration of Deeds Ordinance 1886 is not in force in the Settlement of Malacca.

RAFFLES MUSEUM AND LIBRARY.

Museum.—A vast collection of insects and moths was added to the Museum as the result of a visit of three weeks by the Director to Bukit Kutu (Selangor). The exhibition of a 500 candle power lamp at night was most successful in attracting them. A visit to the islands off the coast of Pahang produced a fine collection of sea-terns. The results of an expedition to Kedah were disappointing: the heights of Kedah Peak (Gunong Jerai) are poor in bird-life, and the caves of Elephant Hill (Gunong Keriang) contain little animal-life except bats.

In the Museum itself much work was done in adding to the collection of stuffed fish. The Reverend G. DEXTER ALLEN continued his work on his reference collection of beetles, and the Director's time was chiefly taken up with his monograph of the Malayan blattidæ.

Library.—The Committee purchased 550 new books at a cost of $2,604. The number of first class subscribers decreased, the second class remained stationary, whilst the third class increased.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 20,896,952 as compared with 24,859,917 in 1914. Particulars are given in the appended comparative table.

Statement showing combined Arrivals and Departures of Merchant Vessels for the Years 1914 and 1915.

										Net decrease ...		3,962,965

It is somewhat startling to find that the reduction in British tonnage exceeds that in German tonnage. Whilst, however, the British figures show a decrease of 21 per cent, the German figures of course show a fall to zero.

In the last five years the combined arrivals and departures of merchant vessels have been as follows:—

In 1911	...	...	24,233,886	tons.
1912	...	...	25,985,526	„
1913	...	...	27,124,789	„
1914	...	...	24,859,917	„
1915	...	...	20,896,952	„

In the small craft (steamers under 50 tons and native vessels) the combined arrivals and departures were 48,533 in number and 2,219,430 in tons in 1915 as compared with 45,739 and 1,951,044, respectively, in 1914.

Four new steamers with a tonnage of 1,149 tons gross and 9 sailing vessels of 825 tons were registered during the year under the Imperial Shipping Acts. Under the "Merchant Shipping Ordinance 1910," twelve new sailing vessels of 1,528 tons were licensed under section 425, and 725 vessels of 9,270 tons were registered under section 426.

LEGISLATION.

The Ordinances passed during the year 1915 are 31 in number exclusive of two Supply Ordinances.

Those which owe their origin to the war are no less than twelve, namely:—

(i) The Trading with the Enemy (Amendment) Ordinance 1915, the primary object of which is to provide for the appointment of a Custodian, to whom moneys due to enemies must be paid and in whom property belonging to enemies may be vested;

(ii) The Trading with the Enemy (Further Amendment) Ordinance 1915, which puts all subjects of any State at war with His Majesty wherever interned or wherever residing or carrying on business in the same category as persons residing or carrying on business in such State, so far as the provisions of the Trading with the Enemy (Amendment) Ordinance 1915, relating to the payment of moneys to, and the vesting of property in, the Custodian are concerned.

(iii) The Trading with the Enemy Amendment Ordinance (No. 3) 1915, extending the range of payments, which are required under the Trading with the Enemy (Amendment) Ordinance 1915 to be made to the Custodian of enemy property, and of property the holding of which must be notified to him;

(iv) & (v) The Alien Enemies Winding-up (Amendment) Ordinance 1915, and the Alien Enemies Winding-up (Further Amendment) Ordinance 1915, which make such amendments as the working of the principal Ordinance had disclosed to be expedient;

(vi) The Seditious Publications (Prohibition) Ordinance 1915, which prohibits the publication and importation of seditious newspapers, books and documents;

(vii) The Reserve Force and Civil Guard Ordinance 1915, which provides for the registration of certain British subjects resident in the Colony, and empowers the Governor to establish a Reserve Force to the Volunteer Force, to call out men to undergo military training, and to establish a Civil Guard;

(viii) The Post Office (Amendment) Ordinance 1915, the object of which is to prevent the arrangements for censoring postal correspondence being defeated by passengers to or from the Colony smuggling letters either on their persons or in their baggage;

(ix) The Invention (Amendment) Ordinance 1915, which empowers the Governor in Council to cancel or suspend any patent to which the subject of an enemy State, or any person residing or carrying on business in any such State, or any company controlled by or mainly carried on for the benefit of the subjects of such State, is entitled, or to grant a licence to any person other than the person so entitled to exercise such patent rights;

(x) & (xi) The Arms and Explosives (Amendment) Ordinance 1915, and the Arms and Explosives (Further Amendment) Ordinance 1915, which extend the provisions of the principal Ordinance to all articles of every description, and give power to prohibit the exportation of any article to any person other than the authorized consignee.

(xii) The Registrar of Imports and Exports (War Powers) Ordinance 1915, which is based on the Customs (War Powers) Acts 1915, (5 Geo. V. c. 51 and 5 and 6 Geo. V. c. 71).

There were six consolidating Ordinances, namely:—

(i) The Currency Ordinance 1915, which abolishes the Note Guarantee Fund, the Depreciation Fund and the Gold Standard Reserve, and substitutes therefor one Fund to be known as the Currency Guarantee Fund;

(ii) The Registration of Deeds Ordinance 1915, the chief amendment made by which is that all instruments must be provisionally registered and that the conditions precedent to complete and permanent registration must be performed within six months;

(iii) The Banishment Ordinance 1915, extending the provisions of the repealed and consolidated Ordinances II of 1896 and II of 1899, which applied to banishees from the State of Johore and the Protected Malay States, to banishees from all British Possessions, all States in the Malayan Peninsula and all British Protectorates;

(iv) The Imperial Light Dues Ordinance 1915, which makes no amendments of any importance;

(v) The Quarantine and Prevention of Disease Ordinance 1915, which introduces important amendments to the repealed law relating to vaccination, makes provision for preventing the introduction into the Colony of infectious disease by road or rail, and gives power to the Governor in Council to make rules prescribing the measures to be taken to prevent the transmission from the Colony of plague, cholera, small-pox and yellow fever;

(vi) The Companies Ordinance 1915, which embodies the provisions of the Imperial Companies (Consolidation) Act 1908 and Companies Act 1913 (8 Edw. VII c. 69 and 3 and 4 Geo. V. c. 25).

Four Ordinances dealt with subjects that had not previously been the subject of local legislation, namely:—

(i) The Public Trustees Ordinance 1915, based on the Imperial Act 1906 (6 Edw. VII c. 55) and the New Zealand Public Trust Office (Consolidation) Act 1908, which is designed to meet the increasing difficulty of finding suitable persons to act as trustees and to safeguard beneficiaries against fraudulent misappropriation by trustees;

(ii) The Libel Ordinance 1915, the main object of which is to extend protection to newspaper reports of the proceedings of public meetings and of various public bodies;

(iii) The Midwives Ordinance 1915, which provides for the training of midwives;

(iv) The Voluntary Conveyances Ordinance 1915, which provides that no purchase for value made after the 8th October, 1915, shall defeat a prior voluntary conveyance of the same lands, if, in fact, such voluntary conveyance had been made *bonâ fide* and without fraudulent intent;

The remaining seven are amending Ordinances. The most important is the Courts (Amendment) Ordinance 1915, which provides for the Sultan of Johore appointing with the approval of the Governor, all or any of the Judges of the Supreme Court of the Colony to perform the duties of Judges of the Court of Appeal of Johore.

EDUCATION.

The expenditure on the eight Government English Schools was $164,642, on the 37 Aided Schools (English, Anglo-Tamil, Tamil and Chinese) $159,696, and on the 187 Government Vernacular Schools $113,755.

The Malacca Training College for Malay Teachers continued to do good work. Its cost, during the year under review, was $14,521.

The numbers in Secondary Classes show a small increase over the figures for 1914. The Normal Classes continued their work during the year, and 25 Normal Certificates were issued.

THE SUPREME COURT.

The Court of Appeal commenced sittings in Singapore on July 27th and November 22nd, and in Penang on February 23rd and August 17th, and disposed of 56 Appeals.

The revenue of the Supreme Court amounted to $54,499.

One thousand three hundred and eighty-one civil suits were instituted, and 108 criminal cases were tried. These numbers are about the average.

There were 91 criminal and 46 civil appeals from Magistrates' decisions.

Mr. Justice WOODWARD acted as Chief Justice until the 30th June, when Sir J. A. S. BUCKNILL resumed the duties of his office on return from leave.

Mr. Justice R. C. EDMONDS was appointed a Puisne Judge of the Straits Settlements and presided at the third and fourth Assizes at Malacca. His Honour's appointment is shared with the Federated Malay States and Johore, and his Headquarters are at Seremban.

Mr. Justice SERCOMBE SMITH, Senior Puisne Judge, retired after 33 years' service in Hongkong and Malaya.

POLICE.

The total strength of the force at the end of the year was 2,696, which was distributed as follows:—

Singapore and Christmas Island ...	1,249
Penang, Province Wellesley and Dindings	1,031
Malacca	327
Labuan and Brunei	89

The authorized strength of the force is 2,750.

Except in the European ranks there was no difficulty in recruiting as many men [Malays, Indians, and Chinese] as were required.

The wastage from the force is very heavy, and is far from satisfactory. It amounted to no less than 392 men (of whom 139 were dismissed, 47 deserted, 120 resigned and 45 were pensioned). The number of recruits during the year was 350. It takes from six to twelve months to make a recruit available for duty.

Discipline continues to improve, and the number of offences against police discipline showed a further considerable reduction.

The health of the force was good, Malaria being the chief cause of disability.

CRIME.

The statistics of crime show a satisfactory diminution. Decreases are shown in the more serious offences against property and the person, as indicated in the returns given below. The returns are, murder, 43 (43) reports—the figures in brackets denote the corresponding number in the preceding year—gang robbery 26 (62), robbery 163 (212), house-breaking 412 (526), and theft 2,273 (2,669). It must be remembered that these are returns of reports, of which many are later proved, upon investigation by the police, to be mistaken, imaginary, or false.

The total number of arrests effected in the Colony during the year was 17,444, compared with 19,309 in 1914.

Ninety persons, as against 190 in 1914, were tried before the Supreme Court.

Three hundred and seventy-one persons were banished during the year. The great majority were habitual criminals.

PRISONS.

Criminal Prisons.—At the beginning of the year, there were 1,025 prisoners in the four Criminal Prisons of the Colony (Singapore, Penang, Malacca and Labuan); 4,540 were admitted and 4,618 discharged during the year; and 947 remained at the end of the year. In these figures are included a number of military prisoners who served a portion of sentences inflicted in connection with the Mutiny, and 41 men sent down to Singapore from Kelantan for complicity in the disturbances of May, 1915, in that State. If these two classes are excluded, the daily average for the whole of the Colony is 909. In 1914 it was 944, and in 1915 it was 1,417.

There were only 26 prisoners of the "habitual" class in prison at the end of the year. They were either British subjects who could not be banished, or men under sentence for unlawful return from banishment.

Prison offences showed an average of 2·2 per annum per convict as against 2·7 in the preceding year.

There is a marked falling off in Singapore in the number of "Middle-Grade" convicts—the men available for industrial labour—(the figures being 206 in 1915, 231 in 1914, and 263 in 1913)—with the result that the work done by the convicts for various Government departments is nearly enough to keep the men fully employed, and that, in consequence, advertisements of the prison industries are withdrawn. The "Upper-Grade" men (71 in number) are mostly employed as cooks, orderlies, clerks, etc.; the "Lower-Grade" men at stone-breaking; and the "Short Sentence" and "Revenue Grade" men at stone-breaking, husk-beating and fatigue-duties.

During the year 372 persons were banished from the Colony, and 603 banishees from the Federated Malay States passed through the Colony. It is to the purging of the Colony from this class of offender that the reduction in the number of convicts must be ascribed.

There were nine executions (three in Singapore, four in Penang, and two in Malacca) in execution of the sentences of the Supreme Court. Forty-two men were shot by order of Court-Martial for Mutiny, one was hanged for murder and one (a civilian) was hanged for treason.

Civil Prisons.—There were 187 men in the Civil Prisons of the Colony at the beginning of the year: 4,867 were admitted and 4,973 discharged during the year; and there remained 81 at its end.

Houses of Detention.—In these buildings, which are part of the Civil Prisons, there were 33 men at the beginning of the year and 21 at its end: 240 were admitted and 252 discharged. Of this last number 27 found employment and 209 were repatriated.

General.—The health of the prisoners was good. The total expenditure of the department was $226,769, and its revenue $7,145. In addition to this, articles to the value of $30,472 were supplied to Government departments.

VITAL STATISTICS.

The number of births and deaths registered during the year was 22,811 and 22,633 respectively. The figures for the preceding year were 22,080 and 25,906.

The estimated population of the Colony was 776,444. It was estimated at 759,105 in 1914, and ascertained in 1911 (the year of the Census) to be 711,951.

The birth-rate has increased from 29·09 to 29·25 per mille.

The death-rate has decreased, having fallen from 46·45 in 1911, 39·01 in 1912, 34·93 in 1913 and 34·13 in 1914 to 29·15 per mille in the year under review.

The principal causes of death were malaria (2,929 cases), infantile convulsions (4,017), tuberculosis (2,580), beri-beri (1,079), and dysentery (769).

Dangerous infectious diseases notified in the Colony during the year caused 17 deaths from small-pox, 13 from cholera and 33 from plague. The corresponding figures in 1914 were 36, 268 and 14.

IMMIGRATION.

(I).—CHINESE.

Immigrants arrived from China to the number of 95,735, a decrease of 34·09 per cent as compared with the figure for 1914 and of 64·5 per cent as compared with that for 1911. the highest yet recorded.

Adult males formed 80 per cent and adult females 11·1 per cent of the immigrants.

Immigration continued to be prohibited till the end of March when partial immigration was allowed, limited at first to one-third and afterwards to one-half the complement of a steamer. At the beginning of July all restrictions were removed.

There is no indentured Chinese labour in the Colony.

(II).—Southern Indian.

The total number of immigrants (deck passengers) arriving at Penang from Southern India during the year was 75,323, as compared with 51,217 in 1914.

The immigration of deck passengers, which had ceased on the 6th August, 1914, resumed on 29th January, 1915. The number of Indians leaving the Colony for Southern India was 50,320, as against 63,073 in 1914.

The figures for arrivals for the last three years are as follows:—

	1913.	*1914.*	*1915.*
Assisted immigrants * ...	91,236	36,905	54,881
Other immigrants ...	27,347	14,312	20,442
Total ...	118,583	51,217	75,323

The assisted immigrants consisted of 51,278 adults and 3,603 minors. Of the adults 42,174 were men and 9,104 women.

The health on estates in Penang, Province Wellesley and the Dindings was very satisfactory, the death-rate in Province Wellesley being 14·59 per mille, in the Dindings 12·46: there were no deaths among the 240 labourers employed on estates in Penang.

During 1915, 1,096 decrepit and destitute Indians were assisted with passages back to India.

The rate of assessment to the Tamil Immigration Fund was $1 per labourer per quarter. The income of the fund was $684,615, and its expenditure $708,905.

(III).—Netherlands Indian.

The number of Netherlands Indian labourers on the estates in the Colony is 3,450: of this number only 242 (of whom 219 were in Province Wellesley and 23 in Malacca) are "indentured labourers."

* "Assisted immigrants" are of two classes:—(i) the independent labourer who gets a free ticket from the Emigration Agent in India upon proof that he is a *bonâ fide* labourer, and who is free to work where he pleases; (ii) the Kangany labourer, who is recruited in India by a licensed Kangany, and who goes to a particular place of employment, though he is free, upon arrival there, to give a month's notice of his intention to leave. There is no indentured Tamil labour in the Colony.

METEOROLOGICAL.

The rainfall recorded was as follows:—

Singapore	... ...	90·93 inches.
Labuan	... ...	141·27 ,,
Penang	... ...	107·69 ,,
Province Wellesley	...	106·44 ,,
Malacca	... ...	101·29 ,,
Dindings	... ...	80·81 ,,

The mean temperature of the air throughout the year was 83·5°. The maximum recorded was 98° in Province Wellesley on March 18th (in Singapore 94·5° on May 21st). The minimum was 67° in Malacca on January 25th.

POST AND TELEGRAPH DEPARTMENT.

The number of postal articles (excluding parcels) posted in the Colony was 10,028,804, an average of 14·04 per inhabitant, as against 12·48 the average in the previous year. The number received for delivery was 7,498,634, as compared with 6,953,133 in 1914. The number of messages transmitted over the Government telegraph lines increased from 235,776 to 246,384 and the number of subscribers to the Government telephone exchanges from 642 to 648.

The amount at the credit of depositors in the Government Savings Bank on the 31st December, 1915, was $796,982.94. The average amount at the credit of each depositor was $147.43. There was a profit on the year's working of $4,394.61. The estimated present value of the investments is $707,250.64.

In addition to the General Post Office, Singapore, and the Chief Post Offices at Penang, Malacca and Labuan, there are 26 Sub-Offices in the Colony, including the Railway Post Office at Durian Tunggal (Malacca). Of these 22 are telegraph offices.

GOVERNMENT MONOPOLIES.

Opium.—During the year 3,270 chests of opium (Indian and Persian) were cooked at the Factory as against 2,787 chests in 1914. The consumption in 1914 was affected by the circumstances which arose in consequence of the outbreak of war. The

sales in the Colony (including 7,800 tahils sold for consumption in Christmas Island) amounted to 1,459,732 tahils (costing $8,722,336), as against 1,412,257 tahils (costing $8,431,024) in 1914.

Sales to the Federated Malay States Government amounted to 1,847,118 tahils, whilst 742,938 tahils were sold to the Governments of Johore, Kedah, Perlis, Kelantan and Brunei.

There was no alteration during the year in the selling price of chandu. The market price of opium varied between $914 and $1,037 per chest.

Smuggling by the Blue Funnel line of steamers still continues to a very large extent. During 1915 there were 32 seizures, and the total weight of opium found was no less than four tons. Seizures on other lines of steamers brought the total weight up to nearly five tons. The actual cost of the opium seized may be put at $100,000, and yet it is known that the profits of smuggling are such that even this loss does not seriously check the traffic. Seizures of cocaine and morphia amounted to 426 ounces and 160 ounces, respectively.

Liquors and Tobacco.—The revenue from liquors and tobacco amounted to $1,729,889 as against $1,611,326 in 1914. Labuan is the only Settlement where a tobacco duty is imposed, and the revenue obtained from it there was only $3,972.

Prosecutions.—The total number of cases instituted by the department during the year was 361 in Singapore, 280 in Penang, 38 in Malacca and 3 in Labuan.

MUNICIPALITIES.

The revenue of the three Municipalities amounted to $5,262,125, and their expenditure, excluding sums spent on Loan Works, to $5,213,250. The usual comparative statements of revenue and expenditure appear below.

REVENUE.

	1911.	*1912.*	*1913.*	*1914.*	*1915.*
	$	$	$	$	$
Singapore ...	2,555,478	3,062,526	3,202,551	3,626,243	3,696,544
Penang ...	1,206,244	1,268,267	1,321,766	1,399,639	1,404,150
Malacca ...	91,828	112,529	134,207	147,392	161,431
TOTAL ...	$3,853,550	4,443,322	4,658,524	5,173,274	5,262,125

EXPENDITURE.

		1911.	1912.	1913.	1914.	1915.
		$	$	$	$	$
Singapore	...	2,527,579	3,197,526	3,498,277	3,679,944	3,772,692
Penang	...	1,150,693	1,255,757	1,306,566	1,295,549	1,308,600
Malacca	...	90,895	100,247	135,405	145,795	131,958

RURAL BOARDS.

The following return shows the revenue and expenditure of the Rural Boards, which carry out in areas outside Municipal limits such of the provisions of the Municipal Ordinance as are applicable to country districts :—

		Revenue.	*Expenditure.*
		$	$
Singapore Island	...	64,278	173,670
Penang Island	...	73,007	88,166
Province Wellesley	...	209,283	209,067
Dindings ...	...	13,557	28,062
Malacca ...	...	271,970	305,006

The deficit in the revenue of the Rural Boards is made good by contributions from the Government.

SINGAPORE HARBOUR BOARD.

The revenue and expenditure of the Board at Singapore (first as the Tanjong Pagar Dock Board and latterly as the Singapore Harbour Board) for the seven years 1909–1915 have been as follows :—

			Revenue.	*Expenditure.*
			$	$
1909	...	...	5,849,063	4,267,797
1910	...	...	5,896,156	4,328,184
1911	...	...	5,740,965	4,074,669
1912	...	...	6,015,648	4,216,015
1913	...	...	6,091,296	4,070,912
1914	...	...	5,834,893	3,875,738
1915	...	...	5,432,425	3,421,271

The capital debt due to Government stood at the end of 1915 $49,469,896 on which the Board pays interest at 4 per cent. In addition to this capital, the Board has expended on new works and other expenditure of a permanent nature a sum of $2,283,119 from reserve fund.

The following figures are taken from the wharf tonnage returns :—

	1909	1910.	1911.	1912.	1913.	1914.	1915.
Number of Vessels ...	2,366	2,393	2,528	2,693	2,708	2,544	2,364

The King's Dock ...	890,861	944,041

TANJONG PAGAR MAIN WHARF RECONSTRUCTION.

The contractors, Messrs. TOPHAM, JONES & RAILTON, Limited, have made very satisfactory progress with the re-construction of the Main Wharf westwards from the Victoria Dock. Up to the end of the year the total length of blockwork wall completed was about 1,200 feet leaving a length of about 1,400 feet still to be completed, and the reinforced concrete wharf near the Victoria Dock was completed for nearly two-thirds of its length.

The formation of quays, roadways and godown areas on the reclaimed area behind the blockwork wall was commenced during the year and was completed over a length of 600 feet from the eastern end of the wall and the foundations of two godowns have been completed. The total amount paid to the Contractors in respect of work executed was £854,300, of which sum £233,400 was paid for work done during 1915.

The following are the principal items of work executed during the year :—

Dredging at Main Wharf Re-construction	74,600	Cubic yards.
Mass Concrete	7,430	,,
Concrete Blocks made ...	45,000	,,
,, set ...	46,750	,,
Reinforced Concrete work con-structed	4,420	,,

The average number of men employed per diem on the works and at the quarries was 53 Europeans and 1,453 Asiatics.

SINGAPORE HARBOUR WORKS.

The works executed by the Contractors, Messrs. Sir JOHN JACKSON, LIMITED, were completed in May, 1915, and were taken over by Government on 1st August. Since that date they have been in regular use. The total cost of the works on final settlement amounted to £1,676,114-8*s*-9*d*.

PENANG HARBOUR BOARD.

The total gross earnings of the Wharf and Dock for the year 1915 was $492,304 and the expenditure $468,195.

The following figures are taken from the Wharf tonnage returns:—

	1909.	*1910.*	*1911.*	*1912.*	*1913.*	*1914.*	*1915.*

Total ...	920,015.22	652,815.07	459,172.65	16,722.23	2,048,715.17

The only important public work completed by the department during the year was the Marconi Wireless Station at Singapore. Four works of some importance are in hand: the extension to Raffles Museum (Singapore), the masonry walls alongside the Rochore Canal (Singapore), an installation of a water-borne sewage system at the General Hospital, Lunatic Asylum, and adjoining buildings (Singapore), and the erection of a Wireless Station in Province Wellesley (Penang).

In Singapore, the Jurong metalled road was extended for about 600 yards, and a mile of earth road added. In Penang, a further length of 2¼ miles of the road round the island was bottomed with granite spawls and metalled. Five miles of natural road were made in Labuan.

The special expenditure upon metalling or re-metalling roads was $67,615, whilst the annually recurrent expenditure upon road maintenance was $575,641.

The metalled roads in the Colony are as follows:—

	Miles.
Singapore	92·50
Penang	63·25
Dindings	22
Malacca	241
Province Wellesley	163·75
Labuan	4·50
Total ...	587

The department also has charge of 56 miles of gravelled road (36 miles in Malacca and 20 miles in the Dindings) and 118 miles of natural road, of which the greater part lies in Penang, the Dindings and Province Wellesley.

CHRISTMAS ISLAND.

Christmas Island, 780 sea-miles distant from Singapore, is the only part of the Colony that has suffered from the war. Its sole wealth consists in its deposits of phosphate of lime; and

these have decreased owing to the war from 150,003 tons in 1913 to 93,780 tons in 1914, and 25,738 tons in 1915. The tonnage of steamers showed a similar decrease from 150,116 tons in 1913 to 96,110 tons in 1914, and 21,852 tons in 1915. In 1913, Germany, Austria and Scandinavian countries were the chief consumers: in 1915, the whole export went to Australia.

The population, owing to the reduced staff of coolies, fell from 1,044 at the beginning of the year to 713 at its end.

The Christmas Island Company made good progress with its railway. The rails are laid and ballasted for a distance of eight miles from Flying Fish Cove, and railhead is within four miles from South Point. The steel pier begun in 1912 was completed during the year.

The revenue of the island was $56,061 ($50,339 being derived from royalty on phosphate) and its expenditure was $15,739.

THE SINGAPORE MUTINY.

Monday, the 15th February, 1915, was a public holiday. The Chinese New Year, with its attendant cessation of all business, its festivities and bomb and cracker firing amongst the Chinese, had commenced on the preceding day and the usual three days holiday had been proclaimed. The Fifth Light Infantry was on the point of leaving for Hongkong, and had already sent its machine guns, with their ammunition, to the store, and was preparing to send its small arms ammunition there. Only that morning His Excellency the General Officer Commanding had made his final inspection of the regiment, and had been favourably impressed by the demeanour of the native officers and men. At about 3 P.M. a shot was fired at the regimental guardroom at Alexandra Barracks and a number of the N.C.O.'s and men immediately gathered round the ammunition, which was being packed into motor-lorries, and took possession of it. Some of the British Officers made their way from their quarters to the Indian Officers' Lines, but were persuaded of the impossibility of any attempt to stop the men, and made their way to Normanton Camp, about a quarter of a mile away, where a detachment of the Malay States Volunteer Rifles was undergoing a course of training. Colonel MARTIN, Commanding the Fifth Light Infantry, telephoned to headquarters at Fort Canning, and the naval authorities were warned. A detachment from H. M. S. *Cadmus* immediately disembarked and proceeded along the Pasir Panjang Road towards Alexandra Barracks. The Civil Police got information by telephone from Captain BALL of the Fifth Light Infantry, and immediately transmitted it to the Colonial Secretary. A telephone message reached Lieutenant LOVE MONTGOMERIE at the Prisoners of War Camp just as a

body of about a hundred mutineers arrived on the spot, and began firing upon the guard. They killed three British Officers and one Malay Officer, seven Europeans and two Malay Non-Commissioned Officers and men, and one prisoner of war, and wounded three European men and one prisoner of war. * Having dispersed the guard, the mutineers opened the gate of the enclosure, and shook hands with the prisoners of war, most of whom were in a state of terror. They left soon afterwards in the direction whence they had come. When British officers and doctors arrived on the scene, all the prisoners of war were still there. After dark, seventeen prisoners of war left the unguarded camp. Four were re-captured later, but the others made good their escape.

During the course of the afternoon a number of dastardly murders of Europeans were committed by separate bodies of mutineers. Two men of the Fifth Light Infantry appeared at Sepoy Lines. They shot two officers † of the Royal Garrison Artillery, who were making their way back to cantonments, and wounded two Chinese. After calling upon the native warder at the Central Gaol to surrender the prison keys (and receiving a defiant answer) they held up motor cars containing Europeans taking their afternoon rides, and killed four civilians ‡ and a native chauffeur, and wounded a European, who saved his life by feigning death. They then fired upon the Sikh Guard at the Central Police Station, wounding two men. They evaded the fire of the Sikh Guard by dodging behind rickshaws, and made good their escape in the crowd. A body of mutineers on the Pasir Panjang Road killed three European civilians and a lady § in their cars. Two other civilians ¶ were killed on the Alexandra Road by another body of men, and three Europeans ‖ were murdered in a house on the Pasir Panjang Road. There were isolated murders of an officer of the Malay States Guides, two officers of the Fifth Light Infantry, a private of the Malay States Volunteer Rifles, and a civilian.** The main residential area of the city lying on either side of Orchard Road was not visited by any bodies of mutineers during the afternoon.

---

* *Killed.*—Captain P. N. GERRARD, Commandant, Prisoners of War Camp; Second Lieutenant J. LOVE MONTGOMERIE, S. V. R.; Captain H. CULLIMORE, Second-in-Command, Johore Military Forces; Captain JABAR, J. M. F.; Sergeant E. H. SEXTON, A. S. C.; Corporal J. R. V. BEAGLEY, R. G. A.; Corporal J. LAWSON, S. V. R.; Corporal SALLEH, J. M. F.; Lance-Corporal J. HARPER, S. V. R.; Private A. DRYSDALE, S. V. R.; Private A. J. G. HOLT, S. V. R.; Private YAKUB, J. M. F.; Private B. C. CAMERON, S. V. R.; Prisoner of War E. F. SENFTLEBEN. *Wounded.*—Private R. L. V. WODEHOUSE, S. V. R.; Private J. ROBERTSON, S. V. R.; Gunner A. HIND, R. G. A.; Prisoner of War, H. KAMPF. † Major R. H. GALWEY and Captain F. V. IZARD. ‡ Mr. G. WALD, Mr. C. SMITH, Dr. E. D. WHITTLE, Mr. J. CLARKE. § Mr. C. V. DYSON, Mr. W. J. MARSHALL, Mr. & Mrs. G. B. WOOLCOMBE. ¶ Mr. N. F. EDWARDS and Mr. H. B. COLLINS. ‖ Mr. D. MCGILVRAY, Mr. E. O. BUTTERWORTH, Mr. J. B. DUNN. ** Captain M. F. A. MACLEAN, M. S. G.; Captain G. BOYCE, 5th L. I.; Lieutenant N. S. ELLIOTT, 5th L. I.; Private W. H. LEIGH, M. S. V. R.; Mr. A. EVANS.

The detachment of 4 officers and 81 men of the Malay States Volunteer Rifles, on being warned by the officers of the Fifth Light Infantry that the regiment had mutinied, at once fell in, and moved in skirmishing order towards the Officers' Mess at Alexandra. They reached this point without opposition. Thence they proceeded towards the house of Colonel MARTIN (Officer Commanding the Fifth Light Infantry) and came under fire. They made good their advance, however, and without any casualties succeeded in occupying the house in which Colonel MARTIN and a native servant were alone.

At about the same time the naval force from H. M. S. *Cadmus* got into touch on the Pasir Panjang Road with a body of mutineers which was advancing on Keppel Harbour, and, after brisk firing on both sides, drove them back towards Alexandra Barracks.

By sunset, the entire European community had received the alarm; and during the evening the men collected at the Volunteer Drill Hall or at the Central Police Station where they were enrolled and armed. (Singapore owes more than is perhaps realized to the fact that there was a Drill Hall, to which every one instinctively turned.) The women obtained refuge at Government House, or at the hotels or on board ships in the harbour. Martial Law was proclaimed at 6-30 P.M. All this, however, had but little effect upon the Chinese quarter of the city, where everything maintained its normal appearance. Holiday-makers filled the rickshaws, thronged the street stalls, and crowded the theatres. The street murders meant nothing to them, and they regarded the other events of the afternoon (so far as they had heard of them) with unconcern. The mail train left Tank Road for Penang at schedule time after the arrival of the mail train from Penang. The latter brought in 150 men of the Johore Military Forces who, under the command of H. H. the Sultan in person, came in response to a message by telephone.

During the night, 138 men of the Fifth Light Infantry gave themselves up at Bukit Timah Police Station. In this number were two batches of 64 and 53 men.

A small detachment of the 36th Sikhs which had been stationed at Tanglin Barracks reported itself at daybreak of the 16th February to a picket at the head of Orchard Road, and marched into Orchard Road Police Station, whence it proceeded in motor-lorries to the Drill Hall.

The mountain battery of the Malay States Guides was stationed at Alexandra Barracks at the time of the mutiny. Some of the men are supposed to have joined the mutineers, but the remainder retreated in a body to Johore whence they endeavoured to make their way to rejoin the regiment at Taiping. Some were met on the way and proceeded to headquarters by train.

During the night of the 15th February there was a little firing at Colonel MARTIN'S house, which was perhaps saved from being rushed by the mutineers by its being protected by the search light from Blakang Mati. There was also firing at Alexandra Police Station where Dr. A. F. LEGGE (Singapore Volunteer Medical Company) and Gunner J. BARRY (Royal Garrison Artillery) were killed, and sniping at Orchard Road Police Station, where two men of the Fifth Light Infantry were shot by the Europeans and police who occupied the building. In the part of the city where the Europeans had mainly collected the night passed without event, though no one will ever forget its anxiety.

It must not be thought that the whole regiment mutinied. Soon after the detachment of the Malay States Volunteer Rifles had occupied Colonel MARTIN'S house, a body of 80 men came up and offered to join in the defence. It was considered wiser not to accept their offer, and they were directed to go to surrender at the nearest police station. This they did. During the night the Central Police Station was as much occupied in accepting the surrenders of men of the Fifth Light Infantry as in enrolling European additional constables. Ninety-one men surrendered at the Central Police Station during the night of the 15th, and day and night of the 16th.

On the 16th February, at early morning, Lieutenant-Colonel C. W. BROWNLOW, R. A., advanced from Keppel Harbour with a force to relieve the party in Colonel MARTIN'S house. The force consisted of 80 men of H.M.S. *Cadmus*, 50 men of the Singapore Volunteer Corps, 21 men of the Royal Garrison Artillery, and 25 armed civilians. The detachment from the *Cadmus* soon came under fire, and the Singapore Volunteer Corps advanced in support. The force pushed forward and occupied the barracks which had not been held in strength. A heavy fire from a higher ridge held up the reserve, until the men of the *Cadmus*, and the Singapore Volunteer Corps, attacked the ridge from the left. The mutineers gave way, and the force reached Colonel MARTIN'S house without further difficulty. As it was not in sufficient strength to hold the position against the superior numbers of the mutineers, it then retired with the relieved party to Keppel Harbour. In this action two men were killed and four wounded.* Of the mutineers, so far as can be ascertained, eleven were killed.

During the morning of the same day, the Veteran Company of the Singapore Volunteer Corps occupied Tanglin Barracks unopposed and took charge of the prisoners of war. The main body of the Volunteers was divided between the Drill Hall and Keppel Harbour. They also provided guards at Government

* *Killed.*—Stoker C. F. ANSCOMBE, H. M. S. *Cadmus;* Special Constable F. GEDDES. *Wounded.*—Sapper W. FLINT, S. R. E. (V.); Private W. LETTS, M. S. V. R.; Private A. S. GARDNER, S. V. R.; Gunner F. W. SABEY, R. G. A.

House, the General Hospital, and Fort Canning. The European special constables, numbering about 200, and a force of 190 Japanese special constables raised by the Japanese Consul and armed by the Military Authorities, were detailed off to various police stations, whence they supplied armed patrols in various directions. During the day all ladies and children were, as a precautionary measure, removed from the hotels to the ships in the harbour.

On the 17th February, there arrived in the morning the French cruiser *Montcalm* and in the afternoon the Japanese cruiser *Otawa* arrived in response to wireless messages despatched on the afternoon of the 15th. A party of 190 men, with two machine guns, from the *Montcalm* proceeded by motor transport to the Seletar District, where a body of mutineers was said to be. Before their arrival, however, the mutineers crossed over into Johore territory, where 61 of them surrendered to His Highness the Sultan of Johore. The French force, finding the north of the island of Singapore free of the mutineers, moved over to the west. The east was known to be clear.

On the morning of the 18th February, Lieutenant-Colonel BROWNLOW'S force, reinforced by 76 men from the *Otawa* marched out from Keppel Harbour with instructions to retake and effectively occupy Alexandra Barracks. This was done without any opposition being met. Six men were captured in the barracks. A party of Japanese thence proceeded to Normanton Barracks, where it came under fire from snipers. It captured twelve men, all followers and hospital patients. Late in the evening the Russian cruiser *Orel* arrived, and landed 40 men.

It was now clear that there was no longer a "military situation" (though danger from snipers and desperadoes was to be expected) and an official announcement was issued from Government House declaring that the position was completely in hand. A proclamation by the Provost-Marshal declared a considerable part of the residential area to be safe for occupation, and the majority of the women and children left the steamers in the harbour.

Such of the mutineers as still remained in the island were supposed to be in the western part of the island, and arrangements were made on the 19th for "driving" and "rounding-up." The various parties that joined in the operation were however unable to find any signs of the mutineers who by this time had broken up into small scattered bands, which hid in the jungle by day, and came out in search of food by night. The Japanese cruiser *Tsushima* arrived during the day and landed 75 men.

On the 20th February, drives were made in various directions in the western part of the island. The British troops only saw one maimed mutineer, who made his escape, whilst one of the

French columns came across nine mutineers. One was killed, but the others escaped, throwing away their arms which were captured. The s. s. *Edavana* arrived in the evening from Rangoon with six companies of the 4th Shropshire Light Infantry (Territorials).

The operations on the 21st and 22nd consisted of drives similar to those of the previous days, and failed to produce any result.

On the evening of the 22nd February, one week after the outbreak, 614 men of the Fifth Light Infantry had surrendered.

The first of the series of executions of mutineers found guilty by the Summary General Court Martial took place on the 23rd February.

The "safe area" for residence by women and children was further extended on the 24th February so as to cover practically the whole of the residential area. On the 25th February, the Russian party from the *Orel* came into touch with a body of mutineers, who withdrew. In the course of the firing, two Russians were wounded.

His Excellency the Governor inspected and thanked the French detachment on the 23rd February, prior to its re-embarkation and departure. He inspected and thanked the Japanese detachment on the 25th February, the Russian detachment on the 2nd March, the British Naval force and the Malay States Volunteer Rifles on the 12th March, and the local and Johore Forces on the 10th April.

There is no reason to believe that the German prisoners in the Prisoners of War Camp were parties to the mutiny. German money and German Agents doubtless supported the seditionist movement both before and during the war. If any German prisoner of war at Tanglin could find any opportunity of talking to one of the sentries of the Fifth Light Infantry, and if he could get over the difficulty of finding a common language (for few of the Fifth Light Infantry could speak Malay, the ordinary language in Singapore of conversation with an Indian) he would doubtless have seized the opportunity of saying all that he could against the British and for the Germans. But opportunities must have been few. No money that could even be suspected of coming from alien sources was found on any one of the hundreds of men who surrendered. No letters were found amongst their effects, or in the post, that showed any enemy influence. It is established that the prisoners of war were terrified when the mutineers appeared at the Camp, and that none of them attempted to escape until some hours after the mutineers had left. An accident afterwards showed that the prisoners of war had for some time been constructing a tunnel

which on the day of the mutiny was only a yard short of the line of the barbed wire entanglements, and would have reached the surface on the following day, affording thereby an easy means of escape under cover of night. It can hardly be believed that the prisoners who constructed and so nearly completed that tunnel, had any expectation of release as the result of a mutiny. Of the many extraordinary facts in connection with the mutiny none perhaps is more extraordinary than the fact that, with such an opportunity, it achieved so little. If the mutiny had been pre-concerted it is almost impossible to believe that in the whole of Singapore there could not have been one man to help it in some overt manner. But not a finger was stirred. When once the mad looting of the ammunition lorries had been made, the regiment as a whole, had no idea what to do next. Singapore was for some hours at its mercy; and yet beyond the attack upon the guard at Tanglin, and the street murders, but little was attempted and nothing was done. When once the first fatal step had been taken, the men were without a plan or a leader. The regiment, with the exception of the more daring or desperate men, seems to have stayed within barracks and, like children, to have awaited the coming punishment. They were on the defensive on the day after the mutiny, and were fugitives thereafter.

It is no longer a military secret that the loyal section of the regiment which surrendered to the police, left Singapore some months later for the Cameroons, and that, after excellent work there, it is now on active service in another part of the Empire.

W. GEORGE MAXWELL,
Acting Colonial Secretary, S. S.

24th April, 1916.

(C420) Wt.47019/1099. 1000 & 90. 11.17 B & F., Ltd. Gp.11/2.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1916.

FINANCIAL.

The revenue for the year 1916 amounted to $17,325,695 (exceeding the estimate by $5,649,760), whilst the expenditure was $11,046,353 (exceeding the estimate by $993,474).

The revenue of the Colony in this the third year of war exceeded the record of 1915 by $3,194,004.

The actual figures for 1915 and 1916 are shown in the following statements:—

A.—REVENUE.

	1915.	*1916.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Port, Harbour, Wharf and Light Dues ...	3,096	2,588	...	508
2. Licences, Excise and Internal Revenue not otherwise classified ...	11,463,164	13,963,722	2,500,558	...
3. Fees of Court or Office, Payments for Specific Services, and Reimbursements in Aid ...	602,054	614,208	12,154	...
4. Posts and Telegraphs ...	681,290	797,438	116,148	...
5. Rents on Govt. Property	768,561	704,099	...	64,462
6. Interest	361,379	531,087	169,708	...
7. Miscellaneous Receipts ...	118,771	465,725	346,954	...
	$13,998,315	17,078,867	3,145,522	64,970
8. Land Sales	133,376	246,828	113,452	...
TOTAL ...	$14,131,691	17,325,695	3,258,974	64,970
		Net increase ...	$3,194,004	

The principal constituents of the head "Licences, etc.," are Opium Revenue, Liquors and Stamp Duties. Revenue from Opium in 1916 showed an increase of over $940,000 as compared with 1915, and revenue from liquors increased by more than $687,000.

Stamp duties were again below the estimated figure, but produced approximately $84,000 more than in 1915. Estate duty brought in $301,737, against $372,780 in 1915.

The Revenue from Posts and Telegraphs has recovered from the adverse effect of the war and shows a satisfactory increase under almost every item.

Interest on Investments produced $167,000 more than in 1915.

Interest on Bank Accounts showed a decrease of $20,000, but the amount credited to Profit on Exchange on remittances rose from $40,000 to nearly $77,000.

B.—EXPENDITURE.

22. Military Expenditure ...	3,021,433	2,700,580	...	320,853
23. Miscellaneous Services ...	497,137	251,293	...	245,844
24. Post Office	611,593	584,726	...	26,867
25. Government Monopolies	351,874	385,043	33,169	...
26. Botanical Gardens and Museum	52,509	51,831	...	678
27. Public Works Department	326,344	329,398	3,054	...
28. Public Works, Recurrent	233,213	231,970	...	1,243
29. Public Works, Extraordinary	676,463	318,788	...	357,675
War Expenditure ...	49,143	1,046,226	997,083	...
Contribution to Imperial War Funds ...	...	857,143	857,143	...
TOTAL ...	$10,196,560	11,046,353	1,938,073	1,088,280
	Net Increase	...	$849,793	

The expenditure upon personal emoluments ($3,749,326) and Other Charges ($1,575,415) both show decreases, the figures in 1915 being $3,779,115 and $1,887,585 respectively.

The Military Expenditure shows a decrease of $320,853 but the corresponding item for 1915 was unduly inflated by the payment of arrears of Defence Contribution in respect of the year 1914.

Miscellaneous Services.—The amount spent on Salaries of Acting Officers again showed a decrease of $19,342 owing to the small number of officers on leave. The decrease in Government contribution to the Rural Board Expenditure was $201,614, partly due to the increase in the revenue of the Boards and partly due to the refund to the Government by the Boards of their cash balances at the end of the year. In previous years cash balances have been carried forward.

Exclusive of Defence Contribution and of special expenditure connected with the war in the three latter years, the Colony's expenditure in 1913 was $7,878,605; in 1914, $7,746,594; in 1915, $7,207,478 and in 1916, $6,514,527, the corresponding expenditure on Public Works Extraordinary being $1,030,586, $926,077, $676,463 and $318,788. It will be seen that the policy of strict economy has been fully maintained.

The principal excesses of revenue over the Estimates were in respect of Opium Revenue, $2,955,144, Liquors, $829,788, Interest $296,182, Premia on Grants $182,403.

Tobacco duties, which were not estimated for, and were only imposed in June, yielded $698,862. The principal excess of expenditure was upon Military Expenditure. The principal savings were in respect of Public Works Extraordinary, $284,685 and Miscellaneous Services $207,658. Overpayments recovered showed a sum of $348,724 which was not estimated for, and is mainly due to the refund of Rural Board balances credited to this item.

The following comparative statement shows the revenue and the expenditure of the Colony for the past six years:—

		Revenue.	*Expenditure.*
		$	$
1911	...	11,409,221	9,085,389
1912	...	12,912,577	9,295,102
1913	...	12,397,747	10,468,618
1914	...	14,016,882	10,180,189
1915	...	14,131,691	10,196,560
1916	...	17,325,695	11,046,353

The Assets and Liabilities of the Colony on the 31st December, 1916, were as follows:—

Liabilities.		$	*Assets.*		$
Deposits	...	7,089,100	Indian Agency Account	...	849,834
Suspense (Currency Commissioners)	...	2,051,274	Investments	...	13,098,364
Excess of Assets over Liabilities	...	26,860,916	Advances	...	194,654
			Advances, Singapore Harbour Works	...	4,411,166
			Loans:—		
			Municipalities	...	305,100
			Sultan of Trengganu	...	30,000
			Kelantan Govt.	...	120,000
			Singapore Harbour Board	...	4,166,148
			Penang Harbour Board		250,104
			Imprests	...	27,461
			Loan Account	...	6,364,399
			Cash in Transit	...	133,732
			Suspense	...	383,916
			Drafts and Remittances	...	211,017
			Cash	...	5,455,395
TOTAL	...	$36,001,290	TOTAL	...	$36,001,290

The excess of the assets over the liabilities increased during the year by $6,279,342.

MILITARY AND WAR EXPENDITURE.

The expenditure in 1916 on the Volunteers, Reserve Force and Civil Guard amounted to $344,518. Of this, $72,122 was paid from votes on the Estimates and the balance from the War Expenditure Suspense Account.

This expenditure was divided up between the Settlements as follows:—

	Paid from votes on Estimates.	*Paid from Suspense Account.*	*Total.*
	$	$	$
Singapore ...	40,963	201,067	242,030
Penang ...	29,972	53,090	83,062
Malacca ...	1,187	18,239	19,426
Total ...	72,122	272,396	344,518

The total amount expended on services connected with the war exclusive of the maintenance of the above was $372,874 giving a total Special War Expenditure of $645,270 in 1916. Special expenditure on war services since the outbreak of war amounted at the end of 1916 to $1,579,619, the main items being:—Volunteers $526,943; Examination Service $408,317; Repatriation of Chinese $133,385; Defence Works, Penang, $95,109; Censorship $105,863. Special War Expenditure to the extent of $1,226,369 has been debited to votes taken in Legislative Council, the balance $353,250 still remaining in the Suspense Account.

The amount paid in 1916 for Defence Contribution was $2,628,457 of which $455,250 represented arrears of Defence Contribution in respect of the actual revenue in 1915. The amount to be paid in 1917 for arrears of Defence Contribution in respect of the actual revenue for 1916 is $851,552.

PUBLIC DEBT.

The indebtedness of the Colony in respect of the loan raised by the issue of 3½ per cent Straits Settlements Inscribed Stock under the provisions of Ordinance IV of 1907, amounted on the 31st December, 1916, to £6,913,352 of which the equivalent in local currency is $59,257,302.

Under the provisions of the War Loan Ordinance XVII of 1916 an amount of $5,546,700 in 6 per cent Bonds repayable on 15th November, 1919 had been raised by 31st December, 1916.

The expenditure upon the services in respect of which this loan was raised stands as follows:—

		$
Singapore Harbour Board	...	47,720,526
Penang Harbour Board	...	2,093,974
Municipal Commissioners, Singapore		4,484,460
Municipal Commissioners, Penang	...	1,250,000
Government Harbour Works	...	10,834,286
		66,383,246
Loan Expenses and Cost of Conversion (1907 Loan) less interest received	... ...	3,388,205
Total	...	$69,771,451 *

The charge on account of interest on this loan was $2,071,956 in 1916. This charge is, however, borne by the Singapore Harbour Board and the other bodies to whom portions of the loan have been allotted.

EXCHANGE.

The demand rate (Bank opening rates only) ranged during the year between 2/4$\frac{1}{4}$ and 2/4$\frac{3}{16}$.

CURRENCY.

Excluding subsidiary coins, the currency of the Colony in circulation in the Currency Area at the end of the year consisted of $68,394,140 in currency notes, and $6,359,029 in dollars and half-dollars, while there were still in circulation bank notes issued by the Hongkong and Shanghai Banking Corporation and the Chartered Bank of India, Australia and China to the value of $176,032.

* Practically all the balance over and above the proceeds of loans already issued has been advanced by the Colony.

The phenomenal increase of $9,214,700 recorded last year in the currency note circulation was still further augmented by $10,691,792. This was almost entirely due to the issue of notes in exchange for gold in London.

The demand for currency to meet the difference between the value of exports from and imports into the currency area resulted in the purchase by the Commissioners during the year of Telegraphic Transfers on London to the extent of £1,320,000. These sterling remittances continued to be purchased at the pre-war rate of 2/4$\frac{3}{16}$.

The coin reserve held by the Commissioners at the end of the year against the note circulation amounted to $39,910,345.36 consisting of £327,250 in gold and $12,647,843.32 in silver in Singapore and £2,853,375-4-9 in gold in London.

The investments held by the Commissioners on account of the note guarantee and depreciation funds were worth, at cash bargain or minimum prices, at the end of the year $24,188,003.97, the cost price of those investments being $32,433,045.51.

The decrease of price compared with original cost is due to the general depreciation of all securities.

The note guarantee fund at the end of the year was worth $66,149,623.16 (Coin portion $39,910,345.36, Investment portion $24,188,003.97 and on deposit with the Government pending investment $2,051,273.83), while the gold standard reserve fund at the same date was worth $2,004,181.45. The total of the funds controlled by the Commissioners was, therefore, $68,153,804.61, or $240,335.39 less than the total note circulation at the end of the year.

The amount of subsidiary silver in circulation on December 31st, 1916, was $6,282,825.45, of which $2,385,216.25 was new and $3,897,609.20 old subsidiary silver. The latter is being steadily withdrawn from circulation the total amount withdrawn to the end of the year being $3,699,203.80 of which $3,694,353.50 has been dealt with and $4,850.30 still remains in the Treasury.

The cancellation and destruction of notes department was reorganised during the year, but only started its extended operations on 1st September. 4,032,714 worn-out notes withdrawn from circulation were in the hands of the Commissioners at the end of the year awaiting sorting and registration prior to destruction. The number of cancelled notes actually destroyed during the year was 1,076,315 but of these 495,028 were destroyed in the last 4 months.

TRADE.

The trade of the Colony in 1916 was satisfactory being an improvement on the previous year, and on 1914, the year when the war broke out.

The gross trade of the Colony for the last three years 1914, 1915 and 1916 in thousands of pounds sterling was as follows:—

	Imports.	*Exports.*	*Imports Increase over the preceding year.*	*Exports Increase over the preceding year.*
	—	—	—	—
	£	£	£	£
1914 ...	45,660	38,981	...	...
1915 ...	51,053	47,125	5,393	8,144
1916 ..	63,242	57,436	12,189	10,311

The following figures show the value of the foreign trade of the Colony in thousands of pounds sterling:—

Merchandise.

	Imports.	*Exports.*	*Imports Merchandise Increase over the preceding year.*	*Exports Merchandise Increase over the preceding year.*
	—	—	—	—
	£	£	£	£
1914 ...	43,856	38,032	...	...
1915 ...	49,803	46,495	5,947	8,463
1916 ...	61,855	56,934	12,052	10,439

Coin and Bullion.

	Imports.	*Exports.*	*Imports Increase or decrease over the preceding year.*	*Exports Increase or decrease over the preceding year.*
	—	—	—	—
	£	£	£	£
1914 ...	1,804	949	...	...
1915 ...	1,250	629	− 554	− 320
1916 ...	1,387	503	+ 137	− 126

The value of the inter-port trade including treasure was as follows in thousands of pounds sterling :—

	Imports.	*Exports.*	*Imports Increase over the preceding year.*	*Exports Increase over the preceding year.*
	£	£	£	£
1914 ...	3,146	3,002	...	...
1915 ...	4,220	4,249	1,074	1,247
1916 ...	6,412	6,488	2,192	2,239

The aggregate gross trade for the year 1916 was therefore £120·7 millions against £98·2 millions in 1915 and £84·6 millions in 1914, an increase of £22·5 millions over 1915 and of £36·1 millions over 1914.

Distributed according to classes the foreign trade records in thousands of pounds sterling are as follows :—

	Imports.			*Exports.*		
	1914.	*1915.*	*1916.*	*1914.*	*1915.*	*1916.*
	£	£	£	£	£	£
1. Live Animals, Foods, Drinks and Narcotics	17,762	19,161	22,045	13,724	15,717	17,751
2. Raw Materials ...	18,243	22,365	28,778	20,169	25,117	32,490
3. Manufactured and partly Manufactured Articles	7,851	8,277	11,033	4,139	5,661	6,693
4. Coin and Bullion ...	1,804	1,250	1,387	949	629	503
TOTAL ...	45,660	51,053	63,243	38,981	47,125	57,437

The figures, excepting coin and bullion, though exceeding those of the previous year, do not really show a corresponding expansion of trade, as prices were on the whole higher than they were in 1915.

Excluding Para Rubber the volume of Straits Produce shipped was about the same as in 1915, except to the Continent.

Articles of Straits Produce gave larger average prices.

Tin.—The imports of tin and tin ore were in 1916, 101,000 and 1,386,000 pikuls, respectively, as against 121,000 and 1,433,000 pikuls, respectively, in 1915. From the Malay States 92,000 pikuls of tin and 978,000 pikuls of tin ore were imported in 1916, from the Netherlands Indies 114,000 pikuls of tin ore, from Australia 35,000 pikuls of tin ore, from Siam 9,000 pikuls of

tin and 195,000 pikuls of tin ore, and from other countries 64,000 pikuls of tin ore, while the corresponding figures of 1915 stand as follows:—

	Tin.	*Tin Ore.*
	Pikuls.	*Pikuls.*
Malay States ...	83,000	1,071,000
Netherlands Indies ...	26,000	109,000
Australia ...	...	35,000
Siam	12,000	174,000
Other Countries ...	...	44,000

The exports of tin in 1916 were as follows:—

421,000 pikuls valued at $38,008,000 to the United Kingdom.
472,000 pikuls valued at $41,768,000 to the United States of America.
203,000 pikuls valued at $17,871,000 to other Countries.

1,096,000 pikuls.

In 1915 the corresponding figures were:—

382,000 pikuls to United Kingdom.
542,000 pikuls to United States of America.
232,000 pikuls to other Countries.

1,156,000 pikuls.

Para Rubber.—The imports of Para Rubber in 1916 were:—

584,000 pikuls valued at $71,878,000 from the Malay States.
95,000 pikuls valued at $11,531,000 from the Netherlands Indies.
24,000 pikuls valued at $3,020,000 from other Countries.

The figures in 1915 were:—

388,000 pikuls from the Malay States.
36,000 pikuls from the Netherlands Indies.
13,000 pikuls from other Countries.

The exports of rubber in 1916 were:—

206,000 pikuls valued at $27,413,000 to the United Kingdom.
621,000 pikuls valued at $83,260,000 to the United States of America.
139,000 pikuls valued at $20,198,000 to other Countries.

966,000 pikuls.

In 1915 the figures were:—

215,000 pikuls to United Kingdom.
354,000 pikuls to United States of America.
74,000 pikuls to other Countries.

643,000 pikuls.

The volume of manufactured metals imported declined by about 36 per cent. Tin plates, however, showed an increase of 67 per cent.

There was a sharp rise in the price of raw cotton; the volume of imports of manufactured cottons increased by 2.4 per cent. The increased cost of commodities, wages, etc., has caused a big increase in the cost of production which resulted in orders for piece goods being checked to a great extent during the year (1916), consequently, arrivals fell off considerably during the last three or four months of the year; but supplies on hand seemed sufficient for requirements and Chinese dealers were buyers up to the close of the year, so that December 31st found them heavy stock-holders although the stocks in European Import firms were considerably reduced.

IMPORTS.

In foodstuffs, drinks and narcotics, increased values are seen under the sub-head animals, rice, bran, brandy, opium, milk, pepper and sugar.

Under the heading "Raw Materials," enhanced values appear in raw cotton, tin ore, wolfram ore, coal, copra, para rubber, raw hides, petroleum, liquid fuel, while decreased import values are apparent in tin and rattans.

In the "Manufactured Class" apparel, etc., cotton piece goods, silk piece goods, machinery, ironware, motor cars, motor cycles and accessories, tin plates, chemicals, paper and paperware and woodenware show increased values.

In quantities imported there was an increase under animals, bran, rice, brandy, milk, sago flour, sugar, raw cotton, copra, para rubber, raw hides, benzine, petroleum, liquid fuel and tin plates.

Declines in quantity are most noticeable in coffee, fish dry and salted, arecanuts, black pepper, tobacco, tin and tin ore, gum damar, rattans, woollen blankets, matches, soap and soda.

EXPORTS.

Exports of the following show increased values:—

"Foodstuffs, drinks and narcotics."

Animals, fish dry and salted, pineapples preserved, rice, cigars and cigarettes, sugar.

"Raw Materials.

Raw cotton, tin, para rubber, phosphate of lime, petroleum, liquid fuel.

"Manufactured Class."

Cotton piece goods, sarongs, ironware, chemicals, while decreases are apparent in—

"Foodstuffs, drink and narcotics."

Coffee, wheatflour.

"Raw Materials."

Rattans.

"Manufactured Class."

Rubber tyres.

The quantities of fish dry and salted, rice, sugar, raw cotton, para rubber, phosphate of lime, lubricating oil, woollen blankets, cement, show an increase.

A decrease in volume is recorded of sago flour, arecanuts, pepper, tapioca, pearl, tin, copra, gambier, rattans, gunnies, iron corrugated, matches.

Trade by Countries.

The following statement shows the position of the Colony in the years 1915 and 1916 as a market for British, European, foreign, American and Japanese goods in thousands of pounds sterling:—

(The value of the trade in merchandise with the United Kingdom, Continent of Europe, United States of America and Japan is shown in thousands of pounds sterling.)

Germany	Continent of Europe.	29	...	...	...
United States of America		830	1,317	11,329	15,687
Japan		1,740	2,659	710	1,363

The articles which gave the largest increased values from the United Kingdom were cotton piece goods, apparel, cigars and cigarettes, machinery including electrical goods, coal, tin plates, iron nails, and telegraph and telephone materials.

The articles showing declines in values from the United Kingdom were cement, corrugated iron, steel, motor cars and motor cycles, etc., malt liquors.

From the United States of America increases in imports are seen in petroleum, rubber tyres, lubricating oil, motor cars, milk, leatherware, roofing and building materials, steel, tinned provisions including fruits, machinery, and decreases in cigars and cigarettes, wire nails, cement.

From Japan the following show advances in imports:—

Coal, silk piece goods, matches, chemicals, fish dry and salted, glass and glassware, apparel, etc., crockery and porcelain, cabinet and woodenware, cycles parts and accessories, hardware, ironware and cooking utensils, while rubber tyres show a decline.

The total increase of exports to the United Kingdom is accounted for by advances in such articles as tin, gambier, sago, black and white pepper, tapioca, copra, jelutong rubber, para rubber, hides, preserved pines, india rubber, wolfram ore, but decreases took place in rattan, gutta percha, illipi nuts, coconut oil and isinglass.

Of exports

to France—tin, black and white pepper, tapioca, para rubber, wolfram ore,

to Holland—gambier and copra,

to Italy—tin and para rubber,

to Russia—copra and para rubber,

to Spain—tin

all advanced,
declines being seen in—copra to Denmark, gambier, sago, copra, rattans, hides and illipi nuts to France, sago, gambier and rattans to Italy, tin and black and white pepper to Russia, sago, black and white pepper and copra to Spain.

Exports to the United States advanced in values of gambier, tapioca, rattans, jelutong, gutta percha, para rubber, hides; but tin, sago, black and white pepper, and india rubber, fell in values.

Exports to Japan showed increases in values of Borneo rubber, shells, raw cotton, tin, para rubber, and phosphate of lime, while declines are seen in tinware, zincware and opium.

There was a rise in the total value of exports to Australia and New Zealand, Siam and Siamese States, Federated Malay States and Malay States, Netherlands Indies, Hongkong and China, French Indo-China, and British North Borneo and Sarawak, but exports to British India and Burma fell off.

There has been a shortage of tonnage during the year which became particularly marked towards the end and resulted in considerable congestion of produce in Singapore. Tin and

rubber which are good cargo did not suffer, but it was extremely difficult to ship cargo of a bulky or otherwise objectionable nature such as copra, cutch and coconut oil. Italy has been the worst sufferer and France has also been greatly affected. To the United States of America shipping difficulties have not been so marked.

Exports of tin and rubber under licences were very large and little hardship or disturbance to trade has been caused by the necessity for obtaining licences. Licences for the United States of America were late on a few occasions, but the principal difficulty has been in regard to shipments to Vladivostock, a port which was closed by the Russian Government in the fourth quarter of the year. Licences were not issued for the last two months of the year and considerable inconvenience was caused thereby.

Japan has continued to develop a demand for largely increased supplies of various kinds, presumably for Russian use. The exports to Japan were almost double those of 1915.

With regard to imports there has been difficulty in obtaining supplies of various kinds from the United Kingdom. Steel and iron work and chemicals of various kinds have been extremely difficult to obtain.

The United States of America have been called upon for the extra supplies of steel and iron, and Japan, to a certain extent, has supplied chemicals.

Local trade has not been nearly so much affected by war conditions, as might have been expected though the restrictions on export became much more stringent during the year. At one time, owing to the difficulty in exporting gunnies, the import of produce from outlying parts of the Netherlands Indies was considerably curtailed, but it was found possible, fortunately, to make the necessary arrangements and a normal state of affairs was soon restored.

ENEMY PROPERTY AND ENEMY FIRMS.

The balance to the credit of the Custodian of Enemy Property at the end of the year was $3,177,618 of which $3,053,657.97 was invested.

Only one liquidator was appointed in 1914 under the Provisions of the Alien Enemies (Winding-up) Ordinance 1914 (XXIX of 1914). During 1915 liquidators were appointed to wind up ten alien enemy businesses with head offices in Singapore, and three with head offices in Penang. During 1916, five of these businesses in Singapore and one in Penang were ordered to be wound-up. Two liquidations were completed by the end of the year.

BANKRUPTCY.

There were only 20 trade bankruptcies during the year, most of which were of little importance. No deeds of arrangement were registered.

AGRICULTURE.

The war-demand for rubber, and the value and compactness of a cargo of rubber, as well as the certainty of a crop, have brought rubber-growing into still increasing favour. Established estates have prospered greatly; and estates which in 1914 were driven to various undesirable economies, have had funds for the highest cultivation. Much new land has been planted up with rubber trees in Malacca; throughout the three Settlements the coconut palms which have hitherto been intermixed with the rubber trees have been removed on considerable areas for the sake of the better growing of the latter.

Rubber prices on the London market varied as much as 100 per cent, but were always good. That form of rubber which was offered in lesser amount obtained the greatest premium,—Para over Plantation, and Crêpe over Sheet. Accordingly, no doubt, Crêpe would have been made in greater amount, but machinery was difficult to get: on the other hand, many small holdings, too small for elaborate machinery, which must perforce make sheet, have now come into bearing.

Coconut palms produced well, especially in Malacca and Penang; and the market offered better prices for copra than in 1915: but freights have been greatly against coconut produce. Areca palms which are generally productive when coconut palms are productive, in 1916 yielded well.

The nutmeg crop of Penang was small. The clove crop fair.

The rice crop of 1915–16 was good. That of 1916–17 was sown late, but on the whole over an undiminished area; and the promise is good.

Tapioca planting is stationary. Gambier is going out, by its removal from rubber estates.

The fruit crop in 1916 was heavier than in any recent year, and fruit was correspondingly cheap. But vegetable production has diminished, and Singapore has drawn supplies from unexpected quarters.

Knowledge, of pests and plant diseases has been increased. Within the Settlements no serious outbreaks have occurred. The locusts, which are a cause of some apprehension, enjoyed a good breeding year on the Malacca–Negri Sembilan–Johore borders, and for a time gained on the staff employed in their destruction. Their destruction is being organised by the Department of Agriculture of the Federated Malay States.

Rubber-standardisation appears to have been brought materially nearer by the work of this Department.

LAND.

The revenue was thus distributed:—

——		Land Revenue.	Reimbursements.	Land Sales.	Total.
		$	$	$	$
Singapore ...	1915	147,346	9,472	46,416	203,234
	1916	154,171	8,738	68,659	231,568

Labuan	1915	5,177	500	260	5,937
	1916	3,613	1,745	447	5,805
Total ...	1915	717,570	49,399	138,776	903,745
	1916	637,491	53,026	246,908	937,425

SINGAPORE.

Quit rents showed a steady increase, to which the conversion of 99 year leases contributed and temporary occupation of Crown land was eagerly sought after. Many important applications for land in the west of the island were received, and the extension of the Jurong Road was resumed. Prices of $80 an acre were paid, and 2 acres of swamp at Ulu Kallang fetched $480. Town land at Tanjong Pagar Road realised $2.50 a foot. Expenditure amounted to $19,426 as compared with $23,445 in 1915.

PENANG.

Land Revenue increased by about $3,000.

There were 34 applications for Crown Land in the North-East District of Penang Island, 20 in Balik Pulau, 114 in Province Wellesley and 431 in the Dindings.

There was quite a boom in land in the last named district, the number of applications being nearly double the number in

the preceding year. These applications were spread through the whole district and were not confined to any particular locality.

Now that the survey of the Dindings has been completed the surrender of Agreements for Statutory Grants will be taken in hand forthwith: the number is considerable and their conversion will entail a large amount of work.

A considerable amount of land was sold in small lots in the South District of Province Wellesley to Chinese for rubber planting. Prices varied from $20 to $102 per acre, the average being between $40 and $60.

There was an abnormal number of land transactions in the Settlement, the number of deeds affecting land registered during the year being about 33 per cent higher than in any preceding year.

It appears probable that a good deal of the money made out of tin and rubber is being invested in land, but it is somewhat regrettable that almost every form of cultivation such as coconuts and padi is being sacrificed to the planting of rubber.

MALACCA.

Receipts on account of rents on Grants and Leases and assessment under the Malacca Lands Ordinance amounted to $294,224 as against $350,002 in 1915. The estimate was $368,000, but the policy of extended rebates caused the reduction.

Owing to the fact that many holdings reached the tapping stage, the number of applications for licences to store rubber during the year greatly increased; fees rose to $8,229.

The average premium paid for land was $29 an acre. One piece of land in Alor Gajah District was bought for $200 per acre.

In the Central District 300 applications for Crown Land were received: in Alor Gajah 1,963 and in Jasin 2,022. In October the books had to be closed in Alor Gajah. The continued high price of rubber maintained the boom in land.

Customary holdings changed hands freely, 2,161 transfers under the Malacca Lands Transfer Ordinance being registered. During the year 6,324 acres of land under Grant tenure and 2,102 acres under Customary tenure were alienated. Four hundred and thirty-two Statutory Grants and a large number of Mukim Register Extracts were issued.

A greater number than usual of Conveyances, Mortgages and Reconveyances were registered under the Indian Act of 1839, the numbers being 992, 491 and 342 respectively.

ALIENATION OF LAND.

The area of Crown Land alienated, and the number of Statutory Grants issued during the last five years together with the amount of premia paid in respect of the same, are shown in the following table:—

FORESTS.

The area of Reserved Forest is now about 10 per cent of the area of the Colony. The Forest Department expended $30,971, and collected $23,372 during the year under review. The amalgamation of the Department with the Forest administration of the Federated Malay States is in contemplation. During 1916 the flowering and fruiting of forest trees were general and abundant.

REGISTRATION OF DEEDS.

The number of deeds presented for registration in Singapore and Penang was 12,702 as compared with 9,975 in 1915, and the number of deeds finally registered, 12,406, as against 9,793 in 1915. Conveyances and Assignments accounted for 5,360, Mortgages for 3,093, and Reconveyances for 2,609. Revenue amounted to $26,979.80. The Registration of Deeds Ordinance 1886 is not in force in the Settlement of Malacca.

RAFFLES MUSEUM AND LIBRARY.

Museum.—The principal additions to the Zoological section were made during the Director's visit to Gunong Kledang, Perak. The most notable donations received were: a set of birds, from Kedah, presented by the Federated Malay States Museums, and a number of Reptiles and Amphibians, from Siam, presented by Dr. MALCOLM SMITH of Bangkok.

In the Ethnological section three life-size groups were modelled, viz.:—(1) a Sea-Dyak woman, working a loom, (2) a Malanau (Sarawak) woman applying a "tadal" or "apit" to her infant, for flattening the head, and (3) a Javanese Shadow Play (Wayang Kulit), with Orchestra (Gamelan) and four musical performers.

Library.—The new building, begun in August, 1914, was completed, and opened to the public on August 25th, 1916. The number of subscribers was the highest on record, namely, 448,

consisting of 97 First Class, 216 Second Class, and 135 Third Class subscribers. The number of books purchased was 586, at a cost of $2,157. A special grant of $4,000 was voted by Government for furnishing the new building.

PASSPORTS.

1,933 passports were issued during 1916, and $11,579 were collected in fees by the passport office.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 19,528,671 as compared with 20,896,952 in 1915.

Statement showing combined Arrivals and Departures of Merchant Vessels for the Years 1915 and 1916.

											Net decrease ...	1,368,281

In the last five years the combined arrivals and departures of merchant vessels have been as follows:—

In 1912	...	...	25,985,526	tons.
1913	...	...	27,124,789	„
1914	...	...	24,859,917	„
1915	...	...	20,896,952	„
1916	...	...	19,528,671	„

In the small craft (steamers under 50 tons and native vessels) the combined arrivals and departures were 52,528 in number and 2,321,862 in tons in 1916 as compared with 48,533 and 2,219,430, respectively, in 1915.

Seven new steamers with a tonnage of 154 tons gross and 21 sailing vessels of 1,941 tons were registered during the year under the Imperial Shipping Acts. Under the Merchant Shipping Ordinance 1910, seventeen new sailing vessels of 1,215 tons were licensed under section 425, and 824 vessels of 9,518 tons were registered under section 426.

LEGISLATION.

The Ordinances passed during the year 1916 are 26 in number, including two Supply Ordinances. Nineteen of these are amending Ordinances.

The most important of the Ordinances which are not amending Ordinances are:—

(i) The Trading with the Enemy (Extension of Powers) Ordinance which empowers the Governor to prohibit by proclamation persons in the Colony from trading with individuals of enemy nationality in neutral countries.

(ii) The Tobacco Duties Ordinance which introduces a new form of taxation by imposing duties on tobacco brought into the Colony, the object of such taxation being for the purpose of enabling an annual contribution to be made to the Imperial Government towards the cost of the present war.

(iii) The War Loan Ordinance which empowers the Governor to issue War Bonds repayable at par and to invest the moneys so raised in Exchequer Bonds or other securities issued by His Majesty's Government for the purpose of raising money for the conduct of the present war.

(iv) The Repeal Ordinance which repeals, *inter alia*, the Deutsche Asiatische Bank Ordinance, the Bank established under the provisions of the latter Ordinance having been wound up under the Alien Enemies (Winding-up) Ordinance 1914.

(v) The Admiralty Transports (Maintenance of Discipline) Ordinance which gives additional powers to the masters of Admiralty Transports for the maintenance of discipline on board ship when such ships are in the ports of the Colony.

The principal amending Ordinances are :—

(i) The Arms and Explosives (Amendment) Ordinance which removes any doubt that may arise as to the application of the prohibition of exportation to goods brought here in transit and not landed for transhipment.

(ii) The Registrar of Imports and Exports (War Powers) Amendment Ordinance empowering the Registrar either to refuse permission to ship goods to foreign countries, though such goods are not the subject of a prohibition or restriction of exportation, or to make the grant of such permission subject to such conditions as may in the circumstances appear to be desirable.

(iii) The Reserve Force and Civil Guard (Amendment) Ordinance the chief object of which is to enable the transfer of the Reserves and those undergoing military training in Singapore to the Singapore Volunteer Corps.

(iv) The Trading with the Enemy (Amendment) Ordinance conferring power on the Governor to vest enemy property in the Custodian of Enemy Property.

(v) The Poisons (Amendment) Ordinance which requires all importers to be licensed.

(vi) The Volunteer (Amendment) Ordinance having for its object the placing of the Cadet Corps on a statutory footing.

(vii) The Liquors Revenue (Amendment) Ordinance which increases the import duties on intoxicating liquors to the figures at which such duties stand in the Federated Malay States with the object of enabling an annual contribution to be made to the Imperial Government towards the cost of the present war.

(viii) The Trading with the Enemy (Further Amendment) Ordinance providing that no claims made by enemy subjects resident or carrying on business outside the Empire shall be paid out of the funds under the Control of the Custodian of Enemy Property.

(ix) The Alien Enemies Winding-up (Amendment) Ordinance which provides that the debts of any firm in liquidation incurred otherwise than in respect of the trade carried on in the Colony may be paid with the consent of the Governor.

12. Liquors Revenue (Amendment) Ordinance	13 of 1916.
13. Trading with the Enemy (Further Amendment) Ordinance	15 of 1916.
14. Alien Enemies Winding-up (Amendment) Ordinance	16 of 1916.
15. Traction Engines and Motor Cars (Amendment) Ordinance ...	18 of 1916.
16. Midwives (Amendment) Ordinance ...	20 of 1916.
17. Companies (Further Amendment) Ordinance	22 of 1916.
18. Sale of Food and Drugs (Further Amendment) Ordinance	24 of 1916.
19. Post Office (Amendment) Ordinance ...	25 of 1916.

EDUCATION.

The expenditure on the eight Government English Schools was $176,359.34, on the 43 Aided Schools (English, Anglo-Tamil, Tamil and Chinese) $162,280, and on the 186 Government Vernacular Schools $123,663.85

The Malacca Training College for Malay Teachers continued to do good work. Its cost, during the year under review, was $15,194.18.

The numbers in Secondary Classes show an increase over the figures for 1915. The Normal Classes continued their work during the year, and 18 Normal Certificates were issued.

The Department has been greatly handicapped by a shortage of European Masters, for whom better terms are now being offered.

THE SUPREME COURT.

The Court of Appeal commenced sitting in Singapore on the 5th June and 20th November disposing of 27 Appeals from the Supreme Court of which 18 were dismissed.

In Penang the same Court sat from the 22nd February to the 8th March and from the 15th to the 25th August dealing with 23 Appeals, including 4 from the District Judges, of which 17 were dismissed, 4 allowed and 2 sent back for re-trial.

In Malacca there was only one Civil Appeal and this was allowed.

In Singapore 48 Criminal Appeals from Magistrates' decisions were entered of which 33 were dismissed.

In Penang 35 were so entered and 19 were dismissed.

In Malacca there were 9 appeals against the decisions of the District and Police Courts. Four were confirmed and 3 quashed, and 2 are pending.

In Singapore 472 Civil Suits were instituted as against 694 in 1915 and 851 in 1914. In Penang and Malacca 423 and 59, respectively, were entered.

As far as Singapore is concerned a steady decrease in litigation is shown. This, in normal times, would point to good trade; and even under present conditions this inference may be drawn, when the bankruptcy returns are considered. Only 63 petitions were filed in Singapore as against 111 in 1915 and 119 in 1914.

In Penang 37 petitions were filed as against 28 in 1915 and the same number in 1914. Two were presented in Malacca.

These figures have naturally had a considerable effect on the fees of Court as shown below.

	1914.		*1915.*		*1916.*	
	$	c.	$	c.	$	c.
Singapore ...	36,806	05	32,289	40	25,654	70
Penang ...	20,630	25	19,108	30	15,811	40

On the 22nd July the Chief Justice proceeded to Brunei to try 3 persons charged with murder—one being against VIR SINGH for the murder of the British Resident Mr. E. B. MAUNDRELL. VIR SINGH was convicted.

The Court of Appeal sat in Johore twice during the year.

On the 11th May the Judges proceeded to Johore to be present at the presentation by His Excellency the Governor of the Order of the Grand Cross of St. Michael and St. George to His Highness the SULTAN.

POLICE.

The total strength of the force at the end of the year was 2,622, which was distributed as follows:—

Singapore and Christmas Island ...	1,202
Penang, Province Wellesley and Dindings	1,032
Malacca	302
Labuan and Brunei	86

The authorized strength of the force is 2,747.

European ranks were depleted by 40 per cent owing to the impossibility of filling vacancies during the war. It is becoming increasingly difficult to obtain sufficient Malay recruits.

The wastage from the force was exceptionally heavy, and is far from satisfactory. It amounted to no less than 499 men (of whom 146 were dismissed, 36 deserted, 245 resigned, 28 were pensioned, 20 discharged as medically unfit and 24 died). The number of recruits during the year was 390.

Discipline continues to improve, and the number of offences against police discipline showed a further considerable reduction.

The health of the force was good, Malaria being the chief cause of disability. There were fewer admissions to hospital by 725 than in 1915.

The Department has been actively engaged in the suppression of the gambling craze which has spread alarmingly. The cost of the Department was $908,162.

CRIME.

The statistics of crime continue to show a diminution in the number of offences reported to the police. Decreases are shown in the more serious offences against property and the person, as indicated in the returns given below. The returns are, murder, 32 (43) reports—the figures in brackets denote the corresponding number in the preceding year—gang robbery 18 (26), robbery 131 (163), house-breaking 386 (412), and theft 2,163 (2,273). It must be remembered that these are returns of reports, of which many are later proved, upon investigation by the police, to be mistaken, imaginary, or false.

The total number of arrests effected in the Colony during the year was 15,993, compared with 17,444 in 1915.

Eighty-five persons, as against ninety in 1915, were tried before the Supreme Court.

Two hundred and thirty-six persons were banished during the year. The great majority were habitual criminals.

PRISONS.

Criminal Prisons.—At the beginning of the year there were 946 prisoners in the four Criminal Prisons of the Colony (Singapore, Penang, Malacca and Labuan); 3,962 were admitted and 4,095 discharged during the year; and 813 remained at the end of the year.

There were only 24 prisoners of the "habitual" class in prison at the end of the year. They were either British subjects who could not be banished, or men under sentence for unlawful return from banishment.

Prison offences showed an average of 1·8 per annum per convict as against 2·2 in the preceding year.

The number of "Middle-Grade" convicts—the men available for industrial labour—continued to decline (the figures being 193 in 1916, 206 in 1915, and 231 in 1914)—with the result that the work done by the convicts for various Government departments is enough to keep them fully employed, and that a number of orders from private firms and individuals had to be refused. The "Upper-Grade" men (74 in number) are mostly employed as cooks, orderlies, clerks, etc.; the "Lower-Grade" men at stone-breaking; and the "Short Sentence" and "Revenue Grade" men at stone-breaking, husk-beating and fatigue-duties.

During the year 221 persons were banished from the Colony, and 540 banishees from the Federated Malay States passed through the Colony. It is to the purging of the Colony from this class of offender that the reduction in the number of convicts must be ascribed.

There were nine executions (three in Singapore, four in Penang, and two in Malacca) in pursuance of the sentences of the Supreme Court.

Civil Prisons.—There were 78 men in the Civil Prisons of the Colony at the beginning of the year: 4,207 were admitted and 4,172 discharged during the year; and there remained 113 at its end.

Houses of Detention.—In these buildings, which are part of the Civil Prisons, there were 21 men at the beginning of the year and 24 at the close of the year: 302 were admitted and 299 discharged. Of this last number 32 found employment and 240 were repatriated.

General.—The health of the prisoners was good. The total expenditure of the department was $217,024.20, and its revenue $9,089.18. In addition to this, articles to the value of $30,098 35 were supplied to Government departments.

VITAL STATISTICS.

The number of births and deaths registered during the year was 22,342 and 24,371 respectively. The figures for the preceding year were 22,811 and 22,633.

The estimated population of the Colony was 797,739. It was estimated at 776,444 in 1915, and ascertained in 1911 (the year of the Census) to be 711,951.

The birth-rate has decreased from 29·25 to 28·15 per mille.

The death-rate has slightly increased. It was 46·45 in 1911, 39·01 in 1912, 34·93 in 1913, 34·13 in 1914 and 29·15 in 1915 but 30·70 per mille in the year under review.

The principal causes of death were malaria (3,346 cases), infantile convulsions (3,735), tuberculosis (1,870), beri-beri (1,075), and dysentery (791).

Dangerous infectious diseases notified in the Colony during the year caused 122 deaths from small-pox, 17 from cholera and 23 from plague. The corresponding figures in 1915 were 17, 13 and 33.

IMMIGRATION.

(I).—CHINESE.

Immigrants arrived from China to the number of 183,399, an increase of 91·5 per cent as compared with the figure for 1915 and a decrease of 32 per cent as compared with that for 1911, the highest yet recorded.

As compared with the average for the previous ten years, 1906 to 1915, the number arriving in 1916 is a decrease of only 5 per cent.

Adult males formed 78·7 per cent and adult females 11 per cent of the immigrants.

There were no restrictions on immigration during the year.

There is no indentured Chinese labour in the Colony.

(II).—SOUTHERN INDIAN.

The total number of immigrants (deck passengers) arriving at Penang from Southern India during the year was 95,566, as compared with 75,323 in 1915.

The number of Indians leaving the Colony for Southern India was 54,479, as against 50,320 in 1915.

The figures for arrivals for the last three years are as follows:—

	1914.	*1915.*	*1916.*
Assisted immigrants * ...	36,905	54,881	72,091
Other immigrants ...	14,312	20,442	23,475
Total ...	51,217	75,323	95,566

* "Assisted immigrants" are of two classes:—(i) the independent labourer who gets a free ticket from the Emigration Agent in India upon proof that he is a *bonâ fide* labourer, and who is free to work where he pleases; (ii) the Kangany labourer, who is recruited in India by a licensed Kangany, and who goes to a particular place of employment, though he is free, upon arrival there, to give a month's notice of his intention to leave. There is no indentured Tamil labour in the Colony.

The assisted immigrants consisted of 65,173 adults and 6,918 minors. Of the adults 51,611 were men and 13,562 women.

The health on estates in Penang, Province Wellesley and the Dindings was very satisfactory, the death-rate in Province Wellesley being 14·49 per mille, in the Dindings 13·93: there were no deaths among the 231 labourers employed on estates in Penang.

During 1916, 980 decrepit and destitute Indians were assisted with passages back to India.

The rate of assessment to the Tamil Immigration Fund for 1st and 2nd quarters 1916 was $1 per labourer per quarter and 3rd and 4th quarters $1.25. The income of the fund was $827,243 and its expenditure $1,053,645.

(III).—Netherlands Indian.

"The number of Netherlands Indian labourers on estates in the Colony is 2,783. No contracts under the Netherlands Indian Labourers' Protection Ordinance 1908 are in force: but approximately 955 local contracts for 300 days are in force in Province Wellesley."

METEOROLOGICAL.

The rainfall recorded was as follows:—

Singapore	... ...	94·17 inches.
Labuan	... ...	172·72 „
Penang	... ...	86·20 „
Province Wellesley	...	92·57 „
Malacca	... ...	80·63 „
Dindings	... ...	85·52 „

The mean temperature of the air throughout the year was 82·5°. The maximum recorded was 96·2° in Province Wellesley on March 7th (in Singapore 93·5° on February 24th). The minimum was 66° in Penang on January 30th.

POST AND TELEGRAPH DEPARTMENT.

The number of postal articles (excluding parcels) posted in the Colony was 11,173,357, an average of 15·64 per inhabitant, as against 14·04 the average in the previous year. The number received for delivery was 7,984,747, as compared with 7,498,634 in 1915. The number of messages transmitted over the Government telegraph lines increased from 246,384 to 330,566 and the number of subscribers to the Government telephone exchanges from 648 to 719.

The amount at the credit of depositors in the Government Savings Bank on the 31st December, 1916, was $821,955.34. The average amount at the credit of each depositor was $140.75. There was a profit on the year's working of $4,313.05. The estimated present value of the investments is $679,545.64.

In addition to the General Post Office, Singapore, and the Chief Post Offices at Penang, Malacca and Labuan, there are 26 Sub-Offices in the Colony, including the Railway Post Office at Durian Tunggal (Malacca). Of these 22 are telegraph offices.

GOVERNMENT MONOPOLIES.

Opium.—During the year 3,749 chests of opium (Indian and Persian) were cooked at the Factory. The retail price of chandu was raised on 29th April from $6.50 to $8.50 per tahil in Singapore, Penang and Malacca and from $4.80 to $5.50 per tahil in Labuan. The rise did not affect consumption to the extent anticipated and prices were again raised on 23rd November, being then fixed at $6.50 per tahil in Labuan and $10.50 per tahil in the other Settlements. The chandu sales in the Colony (including 6,600 tahils sold for consumption in Christmas Island) amounted to 1,458,615 tahils (realising $10,778,862).

Sales to the Federated Malay States Government amounted to 1,871,700 tahils, whilst 828,042 tahils were sold to the Governments of Johore, Kedah, Perlis, Kelantan and Brunei.

The market price of opium varied between $1,031 and $1,862 per chest.

10,317 tahils of opium and 1,362 tahils of chandu were seized during the year. The latter includes a number of small seizures of chandu from the Netherlands Indies and Sarawak and there is reason to believe that the illicit traffic in Sarawak chandu is considerable.

Seizures of cocaine and morphia during the year amounted to 251 ozs. and 123 ozs. respectively.

The traffic in bhang still continues. Several large captures were made, the total amount seized during the year being 14,043 bundles in Singapore and 1,099 tahils in Penang.

Liquors.—The revenue from liquors amounted to $2,389,151 as against $1,725,917 in 1915. On the 16th of June the rates of duty on claret, ale, beer, stout, porter, cider and perry were raised by 100 per cent and on other intoxicating liquors by 60 per cent with the object of raising additional revenue for the purpose of making an annual contribution to the Imperial Government towards War Expenditure.

Tobacco.—The revenue from tobacco in the Settlement of Labuan amounted to $4,386 as against $3,972 in 1915. In the other Settlements tobacco duties were imposed for the first time by an Ordinance passed on the 16th of June, the object of the measure being, as in the case of liquors, to facilitate making a substantial annual contribution towards Imperial War Expenditure. The revenue collected under this head amounted to $698,656.

Prosecutions.—The total number of cases instituted by the department during the year was 437 in Singapore, 217 in Penang, and 17 in Malacca.

MUNICIPALITIES.

The revenue of the three Municipalities amounted to $5,491,346, and their expenditure, excluding sums spent on Loan Works, to $5,172,781. The usual comparative statements of revenue and expenditure appear below.

REVENUE.

	1912.	*1913.*	*1914.*	*1915.*	*1916.*
	$	$	$	$	$
Singapore ...	3,062,526	3,202,551	3,626,243	3,696,544	3,884,353
Penang ...	1,268,267	1,321,766	1,399,639	1,404,150	1,429,251
Malacca ...	112,529	134,207	147,392	161,431	177,742
TOTAL ...	$4,443,322	4,658,524	5,173,274	5,262,125	5,491,346

EXPENDITURE.

	1912.	*1913.*	*1914.*	*1915.*	*1916.*
	$	$	$	$	$
Singapore ...	3,197,526	3,498,277	3,679,944	3,772,692	3,743,261

RURAL BOARDS.

The following return shows the revenue and expenditure of the Rural Boards, which carry out in areas outside Municipal limits such of the provisions of the Municipal Ordinance as are applicable to country districts :—

		Revenue.	*Expenditure.*
		$	$
Singapore Island	...	85,029	151,599
Penang Island	...	79,776	87,570
Province Wellesley	...	250,237	223,185
Dindings ...	...	21,647	20,944
Malacca ...	...	386,595	278,284

The deficit in the revenue of the Rural Boards is made good by contributions from the Government.

SINGAPORE HARBOUR BOARD.

The revenue and expenditure of the Board at Singapore (first as the Tanjong Pagar Dock Board and latterly as the Singapore Harbour Board) for the seven years 1910–1916 have been as follows :—

			Revenue.	*Expenditure.*
			$	$
1910	...	...	5,896,156	4,328,184
1911	...	...	5,740,965	4,074,669
1912	...	...	6,015,648	4,216,015
1913	...	...	6,091,296	4,070,912
1914	...	...	5,834,893	3,875,738
1915	...	...	5,432,425	3,421,271
1916	...	...	6,785,372	4,203,355

The capital debt due to Government stood at the end of 1916 at $51,886,735 on which the Board pays interest at 4 per cent. In addition to this capital, the Board has expended on new works and other expenditure of a permanent nature a sum of $2,283,548 from reserve fund.

The following figures are taken from the wharf tonnage returns :—

	1910.	*1911.*	*1912.*	*1913.*	*1914.*	*1915.*	*1916.*
Number of Vessels ...	2,393	2,528	2,693	2,708	2,544	2,364	2,329
Nett Tonnage	4,605,035	4,877,317	5,397,155	5,794,536	5,445,273	4,307,082	4,348,927
Coal Inwards and Outwards	1,063,768	1,084,974	1,200,545	1,338,495	1,248,032	1,021,452	1,067,824
Cargo Inwards and Outwards	1,305,014	1,285,994	1,335,846	1,462,788	1,229,205	1,323,637	1,339,129

The tonnage occupying the Graving Docks during the years 1915 and 1916 based on the daily tonnage in dock was :—

	1915.	*1916.*
No. 1 Dock	226,745	265,522
No. 2 Dock	467,945	578,967
The Victoria Dock ...	386,733	472,979
The Albert Dock ...	693,308	791,398
The King's Dock ...	944,041	1,288,098

TANJONG PAGAR MAIN WHARF RECONSTRUCTION.

The progress of the Contractors Messrs. TOPHAM, JONES & RAILTON on the Reconstruction of the Main Wharf has been well maintained :—

During the year 42,229 cubic yards have been excavated in the foundation, 75,629 cubic yards of concrete deposited in the quay wall and 246,273 cubic yards of filling deposited behind the wall, 1,350 feet of quayage have been completed, leaving 1,590 still in the hands of the Contractors.

Great incovenience has been caused by the non-delivery of material for godowns, and in order to bring the completed quayage into use, the coal sheds erected at the West Wharf were removed and re-erected on the quay as a temporary measure to meet the demands of the shipping.

PENANG HARBOUR BOARD.

The total gross earnings of the Wharf and Dock for the year 1916 was $626,943 and the expenditure $573,686.

The following figures are taken from the Wharf tonnage returns :—

	1910.	*1911.*	*1912.*	*1913.*	*1914.*	*1915.*	*1916.*
Number of Vessels			610	732	596	728	661
Nett Tonnage			1,208,503	1,532,361	1,108,319	871,524	810,675
Coal (Inwards and Outwards)	177,535	221,209	219,367	282,067	266,146	72,016	93,388
Cargo (Inwards and Outwards)	241,677	265,371	329,839	399,412	313,360	254,066	245,681

LAGOON WET DOCK AND MAIN WHARF RECONSTRUCTION.

TANJONG PAGAR.

Very satisfactory progress was made during the year by the Contractors, Messrs. TOPHAM, JONES & RAILTON, LTD., on the reconstruction of the Main Wharf.

The reinforced concrete wharf was completed and handed over for the use of the Harbour Board on 27th June, and at the end of the year a length of 1,030 feet of the new wharf on the Blockwork Wall was also in possession of the Board and in regular use for the loading and discharging of vessels alongside.

The whole of the concrete blockwork construction is completed, the last block being laid on 26th December.

The difficulty of obtaining materials from England has delayed the erection of godowns, but five of these have been completed and put into use, and foundations are being prepared for temporary godowns on the sites of the others.

The total amount paid to the Contractors in respect of work executed is £1,106,300, of which sum £252,000 is for work done during 1916.

The principal items of work done during the year are as under:—

Excavation for Blockwork Wall	...	41,339	cub. yds.
Mass-concrete in Blockwork Wall	...	10,345	,,
Concrete blocks set in Blockwork Wall	...	65,203	,,
Filling behind the wall	...	201,997	,,
Coral backing to wall	...	44,274	,,
Reinforced Concrete in Ferro Concrete Wharf	...	1,942	,,

The average number of men employed per diem on the works and at the quarries was 41 Europeans, and 1,264 Asiatics.

PUBLIC WORKS.

The expenditure of the department was as follows:—

	Singapore.		*Penang.*		*Malacca.*		*Labuan.*		*Total.*	
	$	c.	$	c.	$	c.	$	c.	$	c.

The only important works completed by the Department during the year were the extension of the Raffles Museum (Singapore) and the Wireless Station in Province Wellesley (Penang). Further progress was made with building masonry walls alongside the Rochore Canal (Singapore), the installation of a water-borne sewage system at the General Hospital, Lunatic Asylum and adjoining buildings (Singapore), and with the Revetment Walls at the Malacca River.

In Singapore, the Jurong Road Extension was continued.

In Penang, the road round the Island was completed, and in Malacca the Semabok–Kandang Road was improved.

(1) The special expenditure upon metalling or re-metalling roads was $40,530, whilst the annually recurrent expenditure upon road maintenance was $544,966.

(2) The metalled roads in the Colony are as follows:—

	Miles.
Singapore	93
Penang	68
Dindings	22
Malacca	241
Province Wellesley	164
Labuan	4½
Total ...	592½

(3) The department also has charge of 50 miles of gravelled road in Malacca and 110 miles of natural road, of which the greater part lies in Penang, the Dindings and Province Wellesley.

CHRISTMAS ISLAND.

Christmas Island is probably the only part of the Colony that has suffered seriously from the war. Its chief wealth consists in its deposits of phosphate of lime; and exports of these have decreased owing to the war from 150,003 tons in 1913 to 93,780 tons in 1914 and 25,738 tons in 1915. In 1916, however, the exports rose to 44,209 tons. The tonnage of steamers, after falling from 150,116 tons in 1913 to 96,110 tons in 1914 and 21,852 tons in 1915, rose in 1916 to 28,685 tons. In 1913 Germany, Austria and Scandinavia were the chief consumers of the Islands' produce: in 1915 the whole export went to Australia, and in 1916 Japan took 6,612 tons while the bulk of 37,597 tons went again to Australia.

Work on the railway was suspended in May, when the rails were laid and ballasted as far as the third mile from South Point, which is ten miles from Flying Fish Cove. The timber was felled right up to the end of the line. Since May the Phosphate Hill Quarries have been re-opened to meet increased sales.

Royalty on phosphate exported in 1915 was $11,517 as against $50,339 in 1914. Revenue collected locally in 1916 was $3,924.

REGISTRIES OF JOINT STOCK COMPANIES.

Last year was the first year during which the Companies Ordinance, 1915 was in force. Forty-one new companies were registered with a capital of $13,116,400, of these 30 were private companies with a capital of $9,486,400.

At the end of the year 278 companies remained on the register of which 46 were in liquidation. The total subscribed capital of the 223 companies, which carry on a business, was $54,511,771.

Three hundred and fifty-seven companies, not registered in the Colony, filed documents under the new Ordinance: of these 297 were British. Apart from these, ten British companies have complied with the Life Assurance Companies Ordinance and five foreign companies have their special Ordinances.

The total revenue of the Department was $16,383.

VETERINARY DEPARTMENT.

In Singapore the total imports of live stock were 602 horses, 26,996 cattle, 31,364 sheep, 8,835 goats, 136,056 swine, 155 dogs and 516 buffaloes as compared with 224 horses, 17,678 cattle, 21,873 sheep, 8,701 goats, 99,492 swine, 109 dogs and 253 buffaloes in 1915.

The total number of live stock exported from Singapore were 337 horses, 6,271 cattle, 9,124 sheep, 3,082 goats, 39,993 swine,

147 dogs and 80 buffaloes as compared with 167 horses, 2,515 cattle, 3,814 sheep, 1,216 goats, 18,585 swine, 95 dogs and 10 buffaloes in 1915.

The total revenue collected during 1916 amounted to $32,704.70 as compared with $19,120.65 in 1915.

The general health of animals in Singapore was very good, no cases of contagious disease having occurred during the year.

There were no cases of glanders, rabies or anthrax in Singapore.

LABUAN.

The revenue collected in Labuan amounted to $40,904, and $85,030 was expended. The total volume of trade was $2,668,468 and exports and imports show little variation from the previous year. 263,932 tons of merchant shipping entered and were cleared. A weekly service with Singapore and North Borneo was maintained. There was a general improvement in education and sanitation. The Government bought from the Labuan Coalfields Company, Limited, 10 sq. miles of land and this is being re-alienated in small holdings.

GENERAL.

1. In attempting to give a survey of matters of importance that may have occurred during the past year such an account must of necessity be one of the War in its effect on the attitude of the people, the trade and well-being of the Colony.

2. As regards trade, there is no question that the War has affected to a certain extent the fulfilling of contracts owing to the very natural shortage of shipping and the resulting rise in freights. All trades have naturally been somewhat disturbed and the necessary labour for the productive industries and further development of the Colony's resources, owing to the same causes, has to a certain extent, decreased. As against this, however, the enormous increase of revenue over all previous records indicates the prosperity of producers due to the high prices obtained during the past year. This prosperity and the consequent abundance of wealth has acted as a counterbalance against the restricted consumption of luxuries and imported articles which, of course, has in a way disturbed but only to a slight extent, the dealings of importers, but at the same time has also led to an all-round increase in prices. It may be said that, but for this increase in prosperity, the restriction, that has necessarily had to be imposed on trade, would have otherwise made itself felt, and have led perhaps to a feeling of local unrest which happily however has not been the case.

3. This Colony is fortunate that its exports are in the main necessities for the purpose of carrying on the War to a successful

conclusion, viz.: Rubber, Tin, Copra, Sago, Pepper, Gambier, Wolfram, Rattans, etc. The difficulties in obtaining shipping have not at any rate during the year 1916 been acute and no complaint should, therefore, be made by shippers if owing to the stress of the War and the shortage of cargo space, such difficulties should arise in the coming year.

4. It must always be remembered that Singapore depends greatly for its prosperity on its transhipping facilities, and, in the interests of the Colony, as long as the present War continues, as far as possible the danger of driving trade to other ports through irksome restrictions should be avoided; naturally the necessity or otherwise of these restrictions can only be regulated by the needs of the Imperial Government, and I think the trade of the Colony can safely congratulate itself that everything possible has been done to avoid all unnecessary restrictions, so far as such has been compatible with Imperial interests.

5. It may well be said that the War has brought the Government into closer touch with the community. During the past year the Muhammadan and Sikh Advisory Boards which were constituted in 1915 have worked successfully and fully justified their creation. The Government has, as heretofore, sought the advice and assistance of the Unofficial members of the community in all matters, and the services of members of the public on Boards and Committees have been utilized and have proved of the greatest value to Government.

6. The War has been responsible for unanimous expressions of loyalty from the Asiatic peoples in the Colony which is a proof of their appreciation and gratitude for the protection and prosperity they have enjoyed for so many years under the British Flag. A striking example of this was given in the very large contributions sent by the Colony and Johore towards the Red Cross. A sum of £50,000 was collected and cabled home in connection with "Our Day" to the British Red Cross Society and the Order of St. John of Jerusalem in England. All sections of the Community throughout the Settlements vied with one another in subscribing to the noble object of this Society. Numerous meetings of Indians, Muhammadans, Malays and Straits Chinese have been held at every one of which loyal addresses were given by the speakers voicing as they did the views of the communities they represented.

7. During the past year it was felt not only by the Government but by the people in general throughout the Colony that as far as possible the mother country should be assisted in the enormous expenditure involved on it in the prosecution of the present War. A voice was given to this feeling in the Legislative Council on the 31st March when a resolution to the effect that the sums of £4,258-11-5 and £111,918-17-9 being the amounts

by which the Military contribution paid by the Colony for the years 1913–1914 and 1914–1915, respectively, exceeded the cost of the garrison during those periods, be not recovered from his Majesty's Government, was proposed and unanimously agreed to. Again on the 16th June, the first Council of which the present writer had the honour of attending as Member, the following resolution was moved that "this Council resolves that an annual contribution of £200,000 be made from the funds of the Colony to the Imperial Government towards War Expenditure; such contribution to continue in the first instance for a period of five years from 1st July, 1916, and to be extended for a further period of five years if at the expiration of that period the finances of the Colony permit." The resolution was spoken to by all the Unofficial Members who not only expressed their entire agreement with the proposed contribution but urged that the Colony might contribute still further towards Imperial funds for the purposes of the War. They one and all declared in favour of an Income-tax being imposed for the period of the War for the purpose of making such a contribution to the Imperial Exchequer. The result of the debate on that day was the formation of a Committee for the purpose of reporting on the question of introducing an Income-tax and also to formulate the lines on which a Bill for that purpose should be introduced into the Legislative Council. The Committee was duly formed and during the months that followed there was widespread discussion both in the local newspapers and at meetings held in the various Chambers of Commerce and elsewhere on the question of the wisdom or otherwise of introducing an Income-tax in an Asiatic Community such as we have in the Colony. The striking note, however, of all these discussions was the practical unanimity of the whole people whether Chinese, Indians, Malays or Europeans that a larger contribution should be made from the Colony to the Empire than the £200,000 per annum already voted. Suffice it to say that although it was not possible to introduce an Income-tax before the end of the year the Ordinance at the time of writing has now been passed and is in operation.

During November an issue of 6 per cent War Loan Bonds redeemable in November, 1919, was floated in the Colony a condition of the issue being that the whole proceeds were to be placed at the disposal of His Majesty's Government.

At the outset the sales of these bonds did not reach the anticipated amount but it has to be remembered that the sales commenced only a short time after the payment of the final instalment of the Federated Malay States $15,000,000 War Loan in which residents of the Colony had invested largely.

It is satisfactory, however, to note here that in the first five months of sale more than $15,000,000 worth of bonds have been

taken up and that this amount has been lent to His Majesty's Government at 5 per cent interest, the balance of the interest being borne by the revenues of the Colony.

8. Towards the end of the year in view of the heavy fighting going on at Home and the consequent drain on the Empire's Man-Power a strong feeling was experienced throughout the Community that men of Military Age should if possible proceed Home to offer themselves for active service. To meet this wish the Government decided to appoint Advisory Man-Power Committees for the three Settlements. As regards men of Military age who had been passed fit by the Military Authorities and who were free agents there was no obstacle of course against their returning Home, but with others there were greater difficulties. There is no question that certain industries with which the future of the Straits Settlements is so closely connected are essential for the successful continuance of the present War. I would mention two only, viz.: Rubber and Tin industries. It was felt, therefore, that while no obstacle should if possible be placed in the way of young men wishing to offer their services, yet at the same time if such offers became wholesale the essential industries of the Colonies would suffer probably with no real proportionate gain to the Home country. There was also the feeling reported amongst many young men in the Colony that in the years after the War a slur would be cast on them owing to the fact that they had not taken their share in the fighting. For the dual purpose then of freeing those who would be spared as well as giving the above class of men who could not be spared some sort of certificate of indispensability, these Committees were formed. It may be stated here that the results although of course not coming within the purview of the work of the year, have proved satisfactory and justified the institution of the Committees.

9. Mr. R. J. WILKINSON, C.M.G., left the Colony on January 5th to take up the duties of Governor of Sierra Leone. From that date Mr. W. G. MAXWELL acted as Colonial Secretary until June 8th when Mr. F. S. JAMES, C.M.G., arrived in the Colony and assumed the duties. Mr. JAMES having been appointed Colonial Secretary from the 28th March.

F. S. JAMES,
Colonial Secretary, S. S.

SINGAPORE, *27th April*, 1917.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

JUL 8 - 1921
DOCUMENTS DIVISION

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1917.

FINANCIAL.

The revenue for the year 1917 amounted to $19,672,104 exceeding the estimate by $6,814,420 whilst the expenditure was $11,369,392 less by $673,451 than the estimate. Revenue from Opium was underestimated.

The revenue of the Colony in this the fourth year of war exceeded the record of 1916 by $2,346,409, a truly remarkable fact.

The actual figures for 1916 and 1917 are shown in the following statements:—

A.—Revenue.

	1916.	*1917.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Port, Harbour, Wharf and Light Dues ...	2,588	1,995	...	593
2. Licences, Excise and Internal Revenue not otherwise classified ...	13,963,722	15,425,019	1,461,297	...
3. Fees of Court or Office, Payments for Specific Services, and Reimbursements in Aid ...	614,208	754,914	140,706	...
4. Posts and Telegraphs ...	797,438	834,975	37,537	...
5. Rents on Govt. Property	704,099	858,001	153,902	...
6. Interest	531,087	1,043,917	512,830	...
7. Miscellaneous Receipts ...	465,725	402,671	...	63,054
	$17,078,867	19,321,492	2,306,272	63,647
8. Land Sales	246,828	350,612	103,784	...
Total ...	$17,325,695	19,672,104	2,410,056	63,647
		Net Increase ...	$2,346,409	

R.V.S. 7/15/21 S.N.

The principal constituents of the head "Licences, etc.," are Opium Revenue, Liquors and Stamp Duties.

Stamp duties for 1917 exceeded those for 1916 by $466,186. Estate duty brought in $408,208, against $301,737 in 1916.

The Revenue from Posts and Telegraphs shows an increase of $37,537. Interest on Investments show an increase of $282,399 over 1916. Interest on Bank Accounts show an increase of $16,206. Interest on Loans and Advances was unusually inflated by the bringing to credit of the interest paid by the Singapore Harbour Board under section 36 of the Ports Ordinance which had hitherto been paid into a Deposit Account. This alone amounted to $223,496.97.

Profits on Exchange were $28,504 less than in 1916 but the increase in the Profits on Money Order Rates due to the low rate of exchange with India amounted to $234,412.

B.—EXPENDITURE.

27. Public Works Department	329,398	321,484	...	7,914
28. Public Works, Recurrent	231,970	299,098	67,128	...
29. Public Works, Extraordinary	318,788	208,908	...	109,880
War Expenditure ...	1,046,226	(*a*)	...	1,046,226
Contribution to Imperial War Funds ...	857,143	(*b*)	...	857,143
TOTAL ...	$11,046,353	11,369,392	2,446,484	2,123,445
	Net Increase	...	$323,039	

The expenditure upon personal emoluments ($3,811,816) and Other Charges ($1,843,859) both show increases, the figures in 1916 being $3,749,326 and $1,575,415, respectively.

The Military Expenditure shows an increase of $243,719 due to payment of arrears of Defence Contribution in respect of the year 1916.

Miscellaneous Services.—The amount spent on Salaries of Acting Officers again showed a decrease of $6,626 owing to the small number of officers on leave.

Exclusive of Defence Contribution and of Special Expenditure connected with the war the Colony's Expenditure in 1914 was $7,746,594; in 1915, $7,207,478; in 1916, $6,514,527 and in 1917, $6,774,048, the corresponding expenditure on Public Works Extraordinary being $926,077, $676,463, $318,788 and $208,908.

The principal excesses of Revenue over the Estimates were in respect of Tobacco, Opium, etc., $4,305,430, (Opium Revenue $3,182,001), (Liquors $537,399), Interest $735,597, Premia on Grants $178,538, (Tobacco duties $586,030), Stamp duties $524,716, Custodian of Enemy Property

(*a*) Paid out of Suspense and vote taken in 1918 $585,065.
(*b*) Included in Item 23, $1,714,286.

Fees $102,073, Pawnbrokers Ordinance $97,779, Land Rents $66,748. The principal Savings were in respect of Public Works Extraordinary $421,105, Post Office $272,071, Police $158,947, and Miscellaneous Services $113,502. Overpayments recovered showed a sum of $31,594, not estimated for.

The following comparative statement shows the revenue and the expenditure of the Colony for the past six years :—

		Revenue.	*Expenditure.*
		$	$
1912	...	12,912,577	9,295,102
1913	...	12,397,747	10,468,618
1914	...	14,016,882	10,180,189
1915	...	14,131,691	10,196,560
1916	...	17,325,695	11,046,353
1917	...	19,672,104	11,369,392

The Assets and Liabilities of the Colony on the 31st December, 1917, were as follows :—

Liabilities.		*Assets.*	
	$		$
Deposits	8,088,593	Indian Agency Account ...	1,034,768
		Investments	17,187,193
		Advances	1,549,154
		Advances, Singapore Harbour Works	4,467,465
Suspense (Currency Commissioners) ...	1,704,082	Loans :—	
		Municipalities ...	368,360
		Sultan of Trengganu ...	20,000
Drafts and Remittances ...	143,747	Kelantan Government	120,000
		Singapore Harbour Board	5,201,138
		Penang Harbour Board	315,104
Excess of Assets over Liabilities ...	35,163,628	Imprests	28,122
		Loan Account	6,364,399
		Cash in Transit ...	2,313
		Suspense	1,088,588
		Cash	7,353,446
TOTAL ...	$45,100,050	TOTAL ...	$45,100,050

The excess of the assets over the liabilities increased during the year by $8,302,712.

MILITARY AND WAR EXPENDITURE.

The expenditure in 1917 on the Volunteers, Reserve Force and Civil Guard amounted to $258,362.

The amount paid in 1917 for Defence Contribution was $2,881,058 of which $844,419 represented arrears of Defence Contribution in respect of the actual revenue in 1916. The amount to be paid in 1918 for arrears of Defence Contribution in respect of the actual revenue for 1917 is $1,255,768.

PUBLIC DEBT.

The indebtedness of the Colony in respect of the loan raised by the issue of 3½ per cent Straits Settlements Inscribed Stock under the provisions of Ordinance IV of 1907, amounted on the 31st December, 1917, to £6,913,352 of which the equivalent in local currency is $59,257,302.

The expenditure upon services in respect of which this loan was raised stands as follows:—

		$
Singapore Harbour Board	...	47,720,526
Penang Harbour Board	...	2,093,974
Municipal Commissioners, Singapore		4,484,460
Municipal Commissioners, Penang ...		1,250,000
Government Harbour Works	...	10,834,286
		66,383,246
Loan Expenses and Cost of Conversion (1907 Loan) less interest received	... ...	3,388,205
Total	...	$69,771,451*

The charge on account of interest on this loan was $2,069,750 in 1917. This charge is, however, borne by the Singapore Harbour Board and the other bodies to whom portions of the loan have been allotted.

Under the provisions of the War Loan Ordinance XVII of 1916 an amount of $42,063,700 in 6 per cent Bonds repayable on 15th November, 1919, had been raised by 31st December, 1917.

* Practically all the balance over and above the proceeds of loans already issued has been advanced by the Colony.

EXCHANGE.

The demand rate (Bank opening rates only) ranged during the year between 2/4¼ and 2/4 9/32

CURRENCY.

Excluding subsidiary coins, the currency of the Colony in circulation in the Currency Area at the end of the year consisted of $87,068,993.60 in currency notes, and $6,634,413 in dollars and half-dollars, while there were still in circulation bank notes issued by the Hongkong and Shanghai Banking Corporation and the Chartered Bank of India, Australia and China, to the value of $169,932.

The phenomenal increase of $10,691,792 recorded last year in the currency note circulation was still further augmented by $18,674,853.60. This was almost entirely due to the issue of notes in exchange for gold in London.

The demand for currency to meet the difference between the value of exports from and imports into the currency area resulted in the purchase by the Commissioners during the year of Telegraphic Transfers on London to the extent of £2,210,000. These sterling remittances continued to be purchased at the pre-war rate of 2/4 3/16.

The coin reserve held by the Commissioners at the end of the year against the note circulation amounted to $53,013,770.39 consisting of £328,111 in gold and $12,372,459.78 in silver in Singapore and £4,413,375-4-9 in gold in London.

The investments held by the Commissioners on account of the note guarantee and depreciation funds were worth, at cash bargain or minimum prices, at the end of the year $31,542,175.89, the cost price of those investments being $39,687,448.37.

The decrease of price compared with original cost is due to the general depreciation of all securities.

The note guarantee fund at the end of the year was worth $86,260,028.61 (Coin portion $53,013,770.39, Investment portion $31,542,175.89 and on deposit with the Government pending investment $1,704,082.33), while the gold standard reserve fund at the same date was worth $3,539,037.80. The total of the funds controlled by the Commissioners was, therefore, $89,799,066.41, or $2,730,072.81 more than the total note circulation at the end of the year.

Owing to the shortage of small silver in the latter part of the year it was found necessary to legislate for the issue of notes of smaller dénomination than the $1 and by the end of the year $323,997.60 worth of the 10-cent notes had been issued.

The number of notes destroyed during the year totalled 3,228,127, against 1,076,315 in 1916. All the notes destroyed were of the denomination of $1.

At the beginning of the year the total number of notes awaiting destruction was 4,934,034. During the year there were cancelled a further 1,645,963 notes making a total of 6,579,997 for destruction and leaving a balance at the end of the year of 3,351,870 notes awaiting destruction.

It will be seen therefore that the Cancellation Branch has more than fulfilled its programme for the destruction of 3,000,000 notes a year.

ENEMY PROPERTY AND ENEMY FIRMS.

The balance to the credit of the Custodian of Enemy Property at the end of the year was $9,505,539.39 of which $6,738,904.80 was invested.

Of the twenty liquidations under the Alien Enemies (Winding-up) Ordinance, 1914 (XXIX of 1914), twelve had been completed by the end of the year 1917, and little remained to be done to complete seven of the remainder.

TRADE.

The trade of the Colony in 1917 was on the whole satisfactory, being an improvement on the two previous years, and on 1914, the year when the war broke out.

The gross trade of the Colony for the last four years 1914, 1915, 1916 and 1917 in thousands of pounds sterling was as follows:—

	Imports.	*Exports.*	*Imports. Increase over the preceding year.*	*Exports. Increase over the preceding year.*
	£	£	£	£
1914 ...	45,660	38,981	...	...
1915 ...	51,053	47,125	5,393	8,144
1916 ...	63,242	57,436	12,189	10,311
1917 ...	75,443	72,747	12,201	15,311

The following figures show the value of the foreign trade of the Colony in thousands of pounds sterling:—

Merchandise—

		Imports.	*Exports.*	*Imports Merchandise. Increase over the preceding year.*	*Exports Merchandise. Increase over the preceding year.*
		£	£	£	£
1914	...	43,856	38,032	...	...
1915	...	49,803	46,495	5,947	8,463
1916	...	61,855	56,934	12,052	10,439
1917	...	73,987	72,307	12,132	15,373

Coin and Bullion—

		Imports.	*Exports.*	*Imports. Increase or decrease over the preceding year.*	*Exports. Increase or decrease over the preceding year.*
		£	£	£	£
1914	...	1,804	949	...	...
1915	...	1,250	629	−554	−320
1916	...	1,387	503	+137	−126
1917	...	1,455	441	+ 68	− 62

The value of the inter-port trade including treasure was as follows in thousands of pounds sterling:—

		Imports.	*Exports.*	*Imports. Increase over the preceding year.*	*Exports. Increase over the preceding year.*
		£	£	£	£
1914	...	3,146	3,002	...	...
1915	...	4,220	4,249	1,074	1,247
1916	...	6,412	6,488	2,192	2,239
1917	...	8,137	8,720	1,725	2,232

The aggregate gross trade for the year 1917 was therefore £148·2 millions against £120·7 millions in 1916 and £84·6 millions in 1914, an increase of £27·5 millions over 1916 and of £63·6 millions over 1914.

Distributed according to classes the foreign trade records in thousands of pounds sterling are as follows:—

	Imports.			Exports.		
	1915.	1916.	1917.	1915.	1916.	1917.
	£	£	£	£	£	£
1. Live Animals. Foods, Drinks and Narcotics	19,161	22,045	27,761	15,717	17,751	21,447
2. Raw Materials ...	22,365	28,778	33,941	25,117	32,490	43,420
3. Manufactured and partly Manufactured Articles	8,277	11,033	12,285	5,661	6,693	7,440
4. Coin and Bullion ...	1,250	1,387	1,455	629	503	441
TOTAL ...	51,053	63,243	75,442	47,125	57,437	72,748

The figures, excluding coin and bullion, exceeded those of the previous year, as prices were on the whole much higher than they were in 1916.

Excluding Para Rubber the volume of Straits Produce shipped was slightly less than in 1916.

Articles of Straits Produce gave larger average prices in most cases.

Tin.—The imports of tin and tin ore were in 1917, 107,000 and 1,240,000 pikuls, respectively, as against 101,000 and 1,386,000 pikuls, respectively, in 1916 as shown below:—

	1916.		1917.	
	Tin.	Tin Ore.	Tin.	Tin Ore.
	Pikuls.	Pikuls.	Pikuls.	Pikuls.
Malay States ...	92,000	978,000	99,000	835,000
Netherlands Indies	...	114,000	...	133,000
Australia ...	...	35,000	...	20,000
Siam	9,000	195,000	8,000	191,000
Other Countries ...	...	64,000	...	61,000
Total ...	101,000	1,386,000	107,000	1,240,000

The exports of tin in 1916 and 1917 were as follows:—

1916.		1917.	
Pikuls.	Value.	Pikuls.	Value.
	$		$
1,096,000	97,647,000	1,076,000	117,821,000

Para Rubber.—The imports of Para Rubber in 1916 and 1917 from the following countries were as follows:—

	1916.		1917.	
	Pikuls.	*Value.*	*Pikuls.*	*Value.*
	—	—	—	—
		$		$
Malay States ...	584,000	71,878,000	928,000	105,501,000
Netherlands Indies	95,000	11,531,000	124,000	13,330,000
Other Countries...	24,000	3,020,000	40,000	4,204,000
Total ...	703,000	86,429,000	1,092,000	123,035,000

The exports of Para rubber were:—

1916.		1917.	
Pikuls.	*Value.*	*Pikuls.*	*Value.*
—	—	—	—
	$		$
966,000	130,871,000	1,623,000	208,648,000

It will thus be seen that both imports and exports of Para Rubber show large increases in value as compared with the previous year. Although there was a sharp fall in the price of this article towards the end of the year, yet this fall did not reduce the total value, as the quantity imported and exported was much in excess of that of last year.

As regards exports of tin in 1917 there was a slight decrease in quantity, but this was counterbalanced by the increase in value.

IMPORTS.

In "Foodstuffs, drinks and narcotics," increased values are seen under the sub-head animals, coffee, rice, wheat flour, milk, opium, black pepper, sugar, tobacco, cigars and cigarettes.

Under the heading "Raw Materials," enhanced values appear in tin, tin ore, wolfram ore, coal, para rubber and ground-nuts, while decreased import values are apparent in copra, gambier, raw hides, petroleum and liquid fuel.

In the "Manufactured Class" cotton piece goods, yarns, ironware, motor cars, motor cycles and accessories, cement, chemicals, matches and woodenware show increased values.

In quantities imported there was an increase under animals, coffee, wheat flour, rice, malt liquors, opium, salt, sugar, tapioca flour, para rubber, ground-nuts and benzine.

Declines in quantity are most noticeable in fish, dry and salted, bran, padi, brandy, milk, sago flour, tobacco, raw cotton, tin ore, copra, gutta inferior, raw hides, petroleum, liquid fuel, rattans and silk piece goods.

EXPORTS.

Exports of the following show increased values:—

"Foodstuffs, drinks and narcotics"—

Animals, coffee, fish, dry and salted, rice, milk, opium, salt, pepper, sugar, tapioca, tobacco, cigars and cigarettes.

"Raw Materials"—

Tin, wolfram ore, para rubber, phosphate of lime, and ground-nuts.

"Manufactured Class"—

Cotton piece goods, gunnies, machinery, chemicals, and tanned hides, while decreases are apparent in—

"Foodstuffs, drink and narcotics"—

Pineapples, preserved, and sago flour.

"Raw Materials"—

Cotton, copra, gambier, gum copal, gum dammar, raw hides, coconut oil, petroleum and liquid fuel.

"Manufactured Class"—

Sarongs, slendangs and kains and rubber tyres.

The quantities of coffee, rice, pepper, sugar, tapioca, para rubber, phosphate of lime and ground-nuts show an increase.

A decrease in volume is recorded of preserved pineapples, chandu (prepared), sago flour, arecanuts, tea, tobacco, raw cotton, tin, gambier, rattans, gutta inferior, raw hides, coconut oil, lubricating oil, petroleum, sarongs, etc., corrugated iron and iron nails.

TRADE BY COUNTRIES.

The following statement shows the position of the Colony in the years 1916 and 1917 as a market for British, European, foreign, American and Japanese goods in thousands of pounds sterling:—

(The value of the trade in merchandise with the United Kingdom, Continent of Europe, United States of America, Russia-

in-Asia and Japan is shown in thousands of pounds sterling.)

		Imports.		Exports.	
		1916.	1917.	1916.	1917.
		—	—	—	—
		£	£	£	£
United Kingdom		5,621	5,431	10,916	11,572
France	Continent of Europe.	385	272	1,314	1,770
Denmark	Continent of Europe.	45	23	223	363
Holland	Continent of Europe.	311	90	16	...
Italy	Continent of Europe.	525	261	444	838
Norway	Continent of Europe.	259	88	...	...
Sweden	Continent of Europe.	49	19	...	...
Spain	Continent of Europe.	29	22	73	75
United States of America		1,317	1,839	15,687	24,159
Russia-in-Asia		...	...	1,876	939
Japan		2,659	4,049	1,363	2,083

The articles which gave the largest increased values from the United Kingdom were cotton piece goods, apparel, sewing thread, soap and soda, sarongs, slendangs and kains and silk piece goods.

The articles showing declines in values from the United Kingdom were cement, corrugated iron, steel, tobacco, cigars and cigarettes, hardware and ironware including cooking utensils, paper and stationery, telegraph and telephone materials, coal, biscuits and India rubber goods including tyres.

From the United States of America increases in imports are seen in cigars and cigarettes, machinery, paper and stationery, motor cars, milk, hardware, ironware and cooking utensils, steel, and decreases in wire nails, petroleum, lubricating oil, roofing and building materials.

From Japan the following show advances in imports:—

Coal, matches, chemicals, wheat flour, apparel, etc., crockery and porcelain, cabinet and woodenware, cycles, parts and accessories, while hardware, ironware and cooking utensils, silk piece goods and rubber tyres show a decline.

There was a rise in the total value of exports to Australia and New Zealand, Siam and the Siamese States, Malay States, Netherlands Indies, Hongkong and China, North Borneo and Sarawak and British India and Burma.

BANKRUPTCY.

Out of 15 trade bankruptcies 13 were Chinese: in 8 of these the debtors absconded. There were no large trade bankruptcies, the greatest estimated liabilities not exceeding 64,000.

There were no registered deeds of arrangement.

AGRICULTURE.

The agriculture of the Straits Settlements continues to expand, but the conditions are very artificial in consequence of high freights and unusual demands.

Labour has been in deficit: and higher wages resulted from this and from the increased cost of all imports. Further as it has been necessary that the management of the British-owned estates should spare a part of their supervising staffs for the war, it has been difficult to attain estimates in some cases.

The premier crop, rubber, has paid very well; and the market has been without the large speculative element which was present in 1916. Local selling has greatly increased, and with profit to the Colony, because freight to Europe for re-export to America can thereby be avoided, and for the reason that the manipulation of the market becomes harder for dealers when selling can be done in many places.

But the profits from rubber production have decreased, because while prices fell throughout the year, expenses rose, both in increased wages and from the high cost of tools, machinery and chemicals. However, many estates are achieving production at what may be regarded as the minimum current rate; and the market price has been about twice this or higher.

On the other hand coconut produce paid meagrely at the beginning of the year, prices declining further as the year passed; in consequence of which the already established tendency to remove the palms for rubber took further hold, and while leading to but little destruction of trees in bearing in Malacca, led to more in Singapore and to much in Penang or Province Wellesley, until an Enactment was called for to restrain it. The crop of nuts was good in the early part of the year, and fair generally. The difficulty of selling the copra to Europe appears to have favoured crushing for oil in Penang; for exports thence continue to increase. That this should occur is good, for it is of advantage to retain the cake in the country.

The tapioca market was speculative; but prices were generally good. A slight increase of the crop in Province Wellesley has taken place, but nevertheless the total production is small, as the cultivation has moved northwards.

Pig and poultry raising, which are partly subsidiary occupations of the tapioca industry, and partly of vegetable-growing, tend more and more to desert the Colony. So much has this been so in Malacca that there is now an import of twelve thousand pigs in the year, whereas there was an export of as many in 1910: and Malacca has now but a very small export of poultry. Penang, which had a very large export of poultry,

has now a larger import than export: and its export of pigs is not half of what it was three years ago. Singapore has long had a larger import than export of both; though the by-products of its industries would seem to promise plentiful pig or poultry food.

Freights having driven up the cost of imported foodstuffs, those which can be produced in the Colony have fetched better prices in the markets, and the growing of them has received a stimulus. Rice has been more extensively sown than in any recent year, and the crop promises well. Vegetables have been grown in increased quantity in most places: ginger particularly in Malacca.

The fruit crop of 1917 was a very poor one, partly as a result of the bountiful crop of 1916, in consequence of the trees demanding a rest, but mostly because of the unseasonable weather when the trees flowered. For the same reason cloves bore badly in Penang, and the rice crop of 1916–17 was spoiled.

There is no tendency in Penang to neglect the pure clove plantations; but the mixed clove-nutmeg-areca palm gardens are suffering much from want of attention. It appears that this has been caused, like the decrease in the local fisheries and in some other occupations of men of small means, by the attractiveness of rubber-planting. It is certainly responsible for the fact that Penang no longer exports more nutmegs than it imports, and from being a producing centre has become rather an entrepôt for the Sumatra trade. It seems also to be responsible for the reduction in the exports of areca-nuts from Penang.

Similarly village fruit-growing would seem be be declining in Malacca and also the export of areca-nuts.

Gambier just persists in the Colony. As a catch crop for rubber it has virtually ceased to exist. Pineapple cultivation in Singapore is also less in use as a catch crop than formerly: but the industry of canning the fruit is suffering eclipse on account of the impossibility of obtaining tin-plate.

Owing to the good returns rubber has been cultivated on a more scientific basis. Thinning has been very extensively done, and tapping placed on to a more conservative basis: but there are an enormous number of small holdings, the owners of which cannot or will not wait for their profits, and some anxiety is caused by these plots of weakened trees. Fortunately rubber in the Settlements is very free from disease: one small outbreak occurred in Malacca, and the advice of the Department of Agriculture of the Federated Malay States was sought. It is noticeable that more attention is being given to the advantages of manuring.

Coconuts are not receiving much attention, but are generally healthy, save for insect pests, of which a new one, unrecorded, but perhaps not altogether unknown, a beetle,—has done some damage near Malacca town. The moth *Brachartona* has been prevalent in Singapore island.

LAND.

The revenue was thus distributed:—

——		Land Revenue.	Reimbursements.	Land Sales.	Total.
		$	$	$	$
Singapore ...	1916	154,171	8,738	68,659	231,568
	1917	204,768	10,602	107,066	306,686
Penang ...	1916	178,028	21,310	20,246	219,584
	1917	187,102	22,747	11,244	221,093
Malacca ...	1916	301,679	21,233	157,556	480,468
	1917	381,613	28,243	228,952	638,808
Labuan ...	1916	3,613	1,745	447	5,805
	1917	2,708	1,222	460	4,390
Total ...	1916	637,491	53,026	246,908	937,427
	1917	776,191	62,814	347,722	1,170,975

SINGAPORE.

The amount realised by the sale of Crown land as shown above increased chiefly owing to special sales including land at Telok Ayer.

About $8,000 of an increase of land rents was due to a revision of the rents on land held by Statutory Grants and Leases, made in 1915, but collected only for the first time last year. The revision was in accordance with the conditions of the Titles. Rents paid for temporary occupation of Crown land including foreshore sites amounted to the sum of $51,000—considerably more than one-third of the amount paid by holders of permanent Titles. Rents were collected without difficulty. There were no arrears of quit rent, and no land reverted to Government on account of non-payment of rent. Revenue produced by licenses issued for the sale of rubber rose from $3,494 in 1916 to $28,306, the license fee having been raised from $25 to $250.

In the second half of the year it was decided as an experiment to issue 30-year leases on easy terms with a condition requiring at least one-fifth of the area of the lease to be planted and maintained with fruit and vegetables.

For the first time since the land boom in 1903 there was a genuine demand for Telok Ayer land and 17,506 square feet with frontage on Robinson Road were sold at $4.15 a foot.

Large offers were also obtained for the site of the old Cross Street School and the vacant land behind Telok Ayer Police Station which will be sold in all probability in allotments in 1918. The terms of a lease of the island of Sebarok for a term of 50 years to the Standard Oil Company were settled and the Company entered into occupation at the beginning of this year.

Eighty-seven Statutory Grants were issued of which 21 were grants issued on the conversion of 99-year leases and 16 on the subdivision of existing titles.

A fair number of applications were made for the conversion of 99-year leases, but pressure of work in the Survey Office prevented much progress being made with them. A sum of $39,687 received as premium on conversion was placed on deposit and therefore does not appear in the ordinary revenue.

Rural Board Revenue increased by $70,000, indicating development in the country districts.

PENANG.

—	Land Revenue.	Reimbursement.	Land Sales.	Total.
	$ c.	$ c.	$ c.	$ c.
North-east District ...	44,885 46	4,282 18	713 00	49,880 64

Land rents were increased by $2,859.57. There were 25 applications for Crown Land but only a small piece in the town itself was sold to the Eastern Smelting Company for the extension of their works. Nearly every application was to plant rubber.

The Survey Office found difficulty in keeping pace with the number of applications for sub-divisional surveys and re-surveys and in consequence were able to carry out only a third of the work required.

9,345 deeds were presented for registration as against 8,764 in 1916: the increased fees for registration brought in over $5,200 additional revenue.

The last fruit season was as poor as its predecessor was superabundant.

MALACCA.

Receipts on account of rents on Grants and Leases and assessment under the Malacca Lands Ordinance amounted to $358,109 in 1917 as against $294,224 in 1916.

Fees rose to $26,737 in 1917 on account of the increase in the fees charged which has already been mentioned.

The average premium paid for land was $30 an acre.

In the Central District 258 applications for Crown Land were received: in Alor Gajah 31 and in Jasin 675. In October, 1916, the books were closed in Alor Gajah. The continued high price of rubber maintained the boom in land.

Customary holdings changed hands freely, 2,034 transfers under the Malacca Lands Transfer Ordinance being registered. During the year 3,533 acres of land under Grant tenure and 3,581 acres under Customary tenure were alienated. Four hundred and ninety-four Statutory Grants and a large number of Mukim Register Extracts were issued.

A greater number than usual of Conveyances, Mortgages and Reconveyances were registered under the Indian Act of 1839, the numbers being 1,157, 606 and 338 respectively.

ALIENATION OF LAND.

The area of Crown Land alienated, and the number of Statutory Grants issued during the last five years together with the amount of premia paid in respect of the same, are shown in the following table:—

SINGAPORE.

FORESTS.

The area of reserved forests has been increased to 105,095 acres, and now amounts to about 10·4 per cent of the lands in the Colony. The Forest Department expended $32,414 and collected $25,594 during the year under review, exclusive of $35,319, the sale proceeds of about 43 acres of rubber plantation hitherto managed by the department.

The flowering and fruiting of forest trees was very scanty everywhere. Prosecutions numbering about 85 per cent were conducted by the Department ended in convictions.

A scheme was submitted during the year for the amalgamation of the forest departments of the Federated Malay States and the Colony, and arrangements were completed for the control of the Malacca forests by the Deputy Conservator of Forests, Negri Sembilan.

REGISTRATION OF DEEDS.

The number of deeds presented for registration in Singapore and Penang was 13,287 as compared with 21,466 in 1916, and the number of deeds finally registered, 13,048, as against 20,976 in 1916. Conveyances and Assignments accounted for 5,531, Mortgages for 3,350, and Reconveyances for 2,720. Revenue amounted to $33,226.45. The Registration of Deeds Ordinance 1915 is not in force in the Settlement of Malacca.

RAFFLES MUSEUM AND LIBRARY.

Museum.—The principal donations were: the skin and skeleton of a Goat-Antelope or Serow (*Capricornis* species), with photographs, notes and measurements, from Phu'ong Mai, Annam, presented by M. LOUIS CHOCHOD and M. GABRIEL SAINT-POULOF, of Quinhon, Indo-China. The skin and skull of the Sumatran Serow (*Capricornis sumatraensis*), from Benkoelen, Sumatra, from Mr. JANSEN and Mr. C. J. BROOKS. A Wild Dog (*Cyon rutilans*), from Ulu Pahang, from H. H. the Sultan of Johore. A Wild Dog, a Wild Cat (*Felis planiceps*), and a Bird-eating Spider (*Pœcilotheria* sp.), from Kuantan, Pahang, from Mr. G. SHILLITOE. A number of Reptiles and Amphibians, from Siam, from Dr. MALCOLM SMITH, Bangkok. A number of Reptiles and an exceptionally large Spider (*Pœcilotheria* sp.), from Penang Hill, from Mr. O. FERNANDO, of the Public Works Department there. A huge Stick Insect, from Penang Hill, from Mr. TAN THIAM HOCK, of the Crag Hotel. A large nugget of Wolfram, from Dungun, Trengganu, weighing 52 catties, from Mr. LIM CHWEE CHIAN. A fine example of Stibnite, from Siam, from Mr. LOH FUK WING. The model of a Japanese Steamer, s. s. *Kinkasan Maru*, measuring 16′, from "Our Day" auction, December, 1917, presented by Mr. LIM PENG SIANG. Many additions to the collections, especially to the entomological section, were made during the Director's stay on Penang Hill, in May, and on the Assistant Curator's visit to Kota Tinggi, Johore, in August.

Library.—The number of Subscribers was 482, consisting of 108 First Class, 224 Second Class and 150 Third Class Subscribers, thus considerably exceeding the previous highest record, viz., 448 in 1916. The number of books purchased was 609, at a cost of $2,115.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 15,784,369 as compared with 19,528,671 in 1916.

Statement showing combined Arrivals and Departures of Merchant Vessels for the Years 1916 and 1917.

In the last five years the combined arrivals and departures of merchant vessels have been as follows:—

In 1913	...	...	27,124,789	tons.
1914	...	...	24,859,917	,,
1915	...	...	20,896,952	,,
1916	...	...	19,528,671	,,
1917	...	...	15,784,369	,,

In the small craft (steamers under 50 tons and native vessels) the combined arrivals and departures were 51,481 in number and 2,321,797 in tons in 1917 as compared with 52,528 and 2,321,862, respectively, in 1916.

Five new steamers with a tonnage of 312 tons gross and 23 sailing vessels of 2,728 tons were registered during the year under the Imperial Shipping Acts. Under the Merchant Shipping Ordinance 1910, twenty-four new sailing vessels of 2,279 tons were licensed under section 425, and 825 vessels of 10,741 tons were registered under section 426.

LEGISLATION.

The Ordinances passed during the year 1917 are 32 in number, including two Supply Ordinances. Twenty-two of these are amending Ordinances.

The most important of the Ordinances which are not amending Ordinances are:—

(i) The Registration of Aliens Ordinance, which provides for the registration of European Aliens and such other Aliens as the Governor may declare to be subject to the provisions of the Ordinance;

(ii) The War Tax Ordinance, which imposes a tax on incomes of $3,000 or more per annum, for the purpose of providing a contribution to the Imperial Government towards the expenses incurred in the prosecution of the present war;

(iii) The Rubber Lands (Restriction) Ordinance, which provides that no person or corporation shall be competent to acquire from any other person or corporation or from the Government any land exceeding in the aggregate 50 acres, which is cultivated with rubber or is suitable for cultivation with rubber, unless, in the case of a person, he is a British subject or a subject of a British Protected Malay State, or,

if he is not such a subject, unless he has resided in the Colony or in the Malay Peninsula for not less than seven years, and intends to continue to reside therein, and has obtained written authority to acquire such land; or, in the case of a corporation, unless it is incorporated in the United Kingdom, or in some part of the British Dominions, or in a British Protected Malay State, and has obtained written authority to acquire such land;

(iv) The Supervision of Alien Missionaries Ordinance, which provides that—

(*a*) an alien coming into the Colony after the date of the passing of this Ordinance for the purpose of engaging in missionary or educational work must have in his possession a permit from His Majesty's representative in the country from which he proceeds;

(*b*) an alien who is engaged in missionary or educational work in the Colony at the date of the passing of this Ordinance must within two months from such date furnish to the Colonial Secretary a return in the form in the Schedule to this Ordinance;

(*c*) an alien who is in the Colony at the date of the passing of this Ordinance but is not engaged in missionary work cannot subsequently engage in such work unless he furnishes to the Colonial Secretary a return in the form in the Schedule and obtains the permission of the Colonial Secretary to enter upon such work;

(v) The Increase of Rent (War Restriction) Ordinance, the object of which is to restrict the increase of the rent of dwelling-houses assessed under the Municipal Ordinance, 1913, at an annual value of not more than $720. The necessity for restriction is due to the fact that since the commencement of the war rents have been increased out of all proportion to the value of the premises let;

(vi) The Second-hand Dealers Ordinance, which requires that every dealer in second-hand goods shall be licensed, that no purchase or sale shall take place within the time specified in the Ordinance and that books shall be kept in which shall be entered the particulars of all goods bought or sold. This Ordinance was passed with the object of reducing the number of offences against property;

(vii) The Registration and Medical Examination Ordinance, which provides for the registration, medical examination and classification of every male British subject between the ages of 18 and 41 residing in the Colony.

The principal amending Ordinances are:—

(i) The Tobacco Duties (Amendment) Ordinance, the main object of which is to increase the duty on all tobaccos, except native and cheap European tobaccos, for the purpose of raising additional revenue towards making good the annual contribution to the Imperial Government voted by the Legislature in 1916;

(ii) The Courts (Amendment) Ordinance, which enables the Supreme Court Judges to be appointed Judges of the District Courts in order to set free eligible Cadets for military service outside the Colony;

(iii) The Alien Enemies Winding-up (Amendment) Ordinance, which provides

(*a*) that enemy property in liquidation under the principal Ordinance shall not be sold to anyone other than a British subject, power, however, being reserved to the Governor to permit a sale by the liquidator to a foreigner who is not an enemy subject; and

(*b*) that no owner of property which has been sold by the liquidator shall sell or transfer or demise such property to an enemy or after the war to anyone who would have been an enemy if the war had not terminated, or to a foreigner if the Governor had declared, when the property was sold by the liquidator, that such should not be sold to a foreigner;

(iv) Currency Note (Amendment) Ordinance, which empowers the Governor to defer the obligatory encashment of notes issued by the Commissioners of Currency. This Ordinance has been rendered necessary by the rise in price of silver which has made the bullion value of the dollar greater than its face value;

(v) The Theatres (Amendment) Ordinance, which provides that an officer to be styled the Official Censor of Cinematographs shall be appointed for the express purpose of passing films for exhibition in the Colony. It also provides for the establishment of a Committee of Appeal to which all persons aggrieved by any decision of the Official Censor may appeal.

(vi) Currency Note (Further Amendment) Ordinance, which empowers the Commissioners of Currency to issue notes of the denomination of five cents, ten cents, twenty-five cents and fifty cents in order to meet the shortage of subsidiary silver and copper coin in active circulation;

(vii) The Libel (Amendment) Ordinance, the effect of which is that a fair and accurate report published in any newspaper of the proceedings of a public meeting or of a public body other than the Legislative Council will not be protected if the matter published is not of public concern and its publication is not for the public benefit.

EDUCATION.

The expenditure on the eight Government English Schools was $165,401.10, on the 45 Aided Schools (English, Anglo-Tamil, Malay, Tamil and Chinese) $167,962.50 and on the 189 Government Vernacular Schools $129,373.33.

The Malacca Training College for Malay Teachers continued to do good work. Its cost, during the year under review, was $15,848.72.

The numbers in Secondary Classes again show an increase over the figures for 1916. The Normal Classes continued their work during the year, and 22 Normal Class Certificates were issued.

The Department has been (for several years) greatly handicapped by a shortage of European Masters.

It is proposed to add to the curriculum of the Malay Vernacular Schools by the introduction of industrial work and gardening. In the first place teachers of the new subjects which include all kinds of basketry work have to be trained. A basketry instructor from Manila has been engaged through the good offices of the Philippines Government. He is now at work at the Malacca College.

Considerable progress has been made in supplying new text books for use in Malay Vernacular Schools. This was very necessary, many of those in use being unsuitable.

The question of higher Education in the Colony which was already receiving the attention of Government was brought into prominence by a proposal of a missionary body to found a college for the purpose. Simultaneously suggestions were made in the Legislative Council that the time had come to revive the Queen's Scholarships. The Government has in mind the institution of a Government College for higher education. It is thought that such a scheme might well be associated with the movement now on foot to commemorate the centenary of Singapore.

THE SUPREME COURT.

The Court of Appeal sat at Singapore on the 11th June and 19th November disposing of 32 Appeals from the Supreme Court of which 24 were dismissed.

In Penang the same Court sat from the 20th February to the 2nd March and from the 14th to the 25th August dealing

with 15 Appeals, including 2 from the District Judges and 1 Criminal Appeal.

In Malacca there were two Civil Appeals. One was dismissed and the other withdrawn.

In Singapore 41 Criminal Appeals from Magistrates' decisions were entered of which 29 were dismissed.

In Penang 40 were so entered and 29 were dismissed.

In Malacca there were 21 appeals against the decisions of the District and Police Courts. (Three were confirmed, 9 quashed, 6 varied or reduced and 3 are pending).

In Singapore 470 Civil Suits were instituted as against 472 in 1916 and 694 in 1915. In Penang and Malacca 475 and 83, respectively, were entered.

Sixty-seven Bankruptcy petitions were filed in Singapore as against 63 in 1916 and 111 in 1915.

In Penang 44 petitions were filed as against 37 in 1916 and 28 in 1915. One was presented in Malacca.

The fees received were as follows:—

	1915.		*1916.*		*1917.*	
	$	c.	$	c.	$	c.
Singapore ...	32,289	40	25,654	70	25,298	95
Penang ...	19,108	30	15,811	40	16,044	40

POLICE.

The total strength of the Force at the end of the year was 2,659, which was distributed as follows:—

Singapore and Christmas Island ...	1,207
Penang, Province Wellesley and Dindings	1,036
Malacca	327
Labuan and Brunei	89

The authorized strength of the Force is 2,747.

European ranks are depleted by 40 per cent owing to the impossibility of filling vacancies during the war. In the native ranks a slight improvement in recruiting was manifested towards the end of the year, due no doubt to the 15 per cent war bonus paid on salaries to the native police. But for the greater part of the year the Force was much under strength.

Discipline was well maintained, the number of offences against police discipline showing an increase of only 66 offences over last year's total which was exceptionally small.

The health of the Force was good, malaria being the chief cause of disability. There were fewer admissions to hospital by 59 than in 1916. The actual number was 1,193 admissions.

The Department has been actively engaged in keeping within bounds the gambling craze which assumed such proportions in 1916. The cost of the Department was $907,784.

CRIME.

The returns of the more serious offences are, murder 33 (32) reports—the figures in brackets denote the corresponding number in the preceding year—gang robbery 24 (18), robbery 135 (131), house-breaking 379 (386), and theft 2,132 (2,163). It must be remembered that these are returns of reports, of which many are proved, upon investigation by the police, to be mistaken, imaginary, or false.

The total number of arrests effected in the Colony during the year was 16,409, compared with 15,933 in 1916.

One hundred and twenty-one persons, as against eighty-five in 1916, were tried before the Supreme Court.

Four hundred and one persons were banished during the year. The great majority were habitual criminals.

PRISONS.

Criminal Prisons.—At the beginning of the year there were 813 prisoners in the four Criminal Prisons of the Colony (Singapore, Penang, Malacca and Labuan); 3,804 were admitted and 3,874 discharged, etc., during the year; and 743 remained at the end of the year.

There were only 25 prisoners of the "habitual" class in prison at the end of the year. They were either British subjects who could not be banished, or men under sentence for unlawful return from banishment.

Prison offences showed an average of 1·7 per annum per convict as against 1·8 in the preceding year.

The number of "Middle-Grade" convicts—the men available for industrial labour—continued to decline (the figures being 149 in 1917, 193 in 1916, and 206 in 1915)—with the result that the work done by the convicts for various Government departments is enough to keep them fully employed, and that orders from private firms and individuals which were at one time

sought for have now to be generally refused. The "Upper-Grade" men (74 in number) are mostly employed as cooks, orderlies, clerks, etc.; the "Lower-Grade" men at stone-breaking; and the "Short Sentence" and "Revenue Grade" men at stone-breaking, husk-beating and fatigue-duties.

During the year 370 persons were banished from the Colony, and 501 banishees from the Federated Malay States passed through the Colony. It is to the purging of the Colony from this class of offender that the reduction in the number of convicts must be mainly ascribed.

There were three executions (two in Singapore and one in Malacca) in pursuance of sentences of the Supreme Court.

Civil Prisons.—There were 113 men in the Civil Prisons of the Colony at the beginning of the year: 4,376 were admitted and 4,368 discharged during the year; and there remained 121 at its end.

Houses of Detention.—In these buildings, which are part of the Civil Prisons, there were 24 men at the beginning of the year and 113 at the close of the year: 485 were admitted and 361 discharged. Of this last number 27 found employment and 344 were repatriated.

General.—The health of the prisoners was not as satisfactory as usual. There was an outbreak of beri-beri towards the close of the year. The total expenditure of the department was $213,914.91, and its revenue $39,262.50 of which $31,707 represented articles supplied to Government departments.

VITAL STATISTICS.

The number of births and deaths registered during the year was 24,826 and 29,950 respectively. The figures for the preceding year were 22,342 and 24,371.

The estimated population of the Colony was 809,869. It was estimated at 797,739 in 1916, and ascertained in 1911 (the year of the Census) to be 711,951.

The birth-rate increased from 28·15 to 30·65 per mille, against this the death-rate has slightly increased. The rate was 46·45 in 1911, 39·01 in 1912, 34·93 in 1913, 34·13 in 1914, 29·15 in 1915 and 30·70 in 1916, but 36·98 per mille in the year under review.

The principal causes of death were malaria (3,766 cases), infantile mortality (7,571), tuberculosis (3,084), beri-beri (2,075), and dysentery (1,064).

Dangerous infectious diseases notified in the Colony during the year caused 176 deaths from small-pox, 9 from cholera and 44 from plague. The corresponding figures in 1916 were 122, 17, and 23.

IMMIGRATION.

(I).—Chinese.

155,167 Immigrants arrived from China, a decrease of 15·4 per cent as compared with the figure for 1916 and a decrease of 42·5 per cent as compared with that for 1911 which year showed the highest number yet recorded.

As compared with the average for the previous ten years, 1907 to 1916, the number arriving in 1917 shows a decrease of 20 per cent.

Adult males formed 78·7 per cent and adult females 10·6 per cent of the immigrants.

There were no restrictions on immigration during the year.

There is no indentured Chinese labour in the Colony.

(II).—Southern Indian.

The total number of immigrants (deck passengers) arriving at Penang from Southern India during the year was 90,077, as compared with 95,566 in 1916.

The number of Indians leaving the Colony for Southern India was 57,583, as against 54,479 in 1916.

The figures for arrivals for the last three years are as follows:—

		1915.	*1916.*	*1917.*
Assisted immigrants *	...	54,881	72,091	78,407
Other immigrants	...	20,442	23,475	11,670
	Total ...	75,323	95,566	90,077

The assisted immigrants consisted of 71,951 adults and 6,456 minors. Of the adults 58,107 were men and 13,844 women.

The health on estates in Penang, Province Wellesley and the Dindings was very satisfactory, the death-rate in Province Wellesley being 12·79 per mille, in the Dindings 13·10: there were no deaths among the 256 labourers employed on estates in Penang.

During 1916, 913 decrepit and destitute Indians were assisted with passage back to India.

* "Assisted immigrants" are of two classes:—(i) the independent labourer who gets a free ticket from the Emigration Agent in India upon proof that he is a *bonâ fide* labourer, and who is free to work where he pleases; (ii) the Kangany labourer, who is recruited in India by a licensed Kangany, and who goes to a particular place of employment, though he is free, upon arrival there, to give a month's notice of his intention to leave. There is no indentured Tamil labour in the Colony.

The rate of assessment to the Tamil Immigration Fund for the 1st and 2nd quarters 1916 was $1.50 per labourer per quarter and for the 3rd and 4th quarters $2. The income of the fund was $1,207,685 and its expenditure $1,210,144.

(III).—NETHERLANDS INDIAN.

The number of Netherlands Indian labourers on estates in the Colony is 2,785. No contracts under the Netherlands Indian Labourers' Protection Ordinance 1908 are in force: but approximately 755 local contracts for 300 days are in force in Province Wellesley.

CHINESE PROTECTORATE.

The censorship of Chinese newspapers continued to be carried on in the Protectorate. The War Tax Ordinance was an object of concern early in the year: but when its terms were better understood, the tax was loyally accepted by the Chinese. The shortage of small coins was particularly felt by the Chinese, and more perhaps by the Pawnbrokers and Second-hand Dealers and their clientèle than by any others. The issue of 10-cent notes was highly appreciated. For the Chinese community high rates of exchange with China and shipping difficulties made living expensive, owing, however, to the demand for labour, the poorer classes did not suffer. All charitable and patriotic funds have been most generously supported by the Chinese who initiated the Hallifax Relief Fund. The Chinese community has suffered two heavy losses in the death of Mr. TAN JIAK KIM, C. M. G., and in the retirement of Mr. WALTER PEACOCK, who acted for so long as Protector of Chinese and had so exceptional an understanding of and sympathy with the Chinese.

METEOROLOGICAL.

The rainfall recorded was as follows:—

Singapore	... ...	2797·83 m. m.
Labuan	... ...	4719·50 „
Penang	... ...	2534·15 „
Province Wellesley	...	2775·22 „
Malacca	... ...	2712·12 „
Dindings	... ...	2457·26 „

The mean temperature of the air throughout the year was 81·8°. The maximum recorded was 94·0° in Penang on April 13th and in Singapore 92·5 on October 27th. The minimum was 65° in Penang on November 8th.

POST AND TELEGRAPH DEPARTMENT.

The number of postal articles (excluding parcels) posted in the Colony was 11,338,680, an average of 15·85 per inhabitant, as against 15·64 the average in the previous year. The number received for delivery was 8,447,338, as compared with 7,984,747 in 1916. The number of messages transmitted over the Government telegraph lines increased from 330,566 to 358,064 and the number of subscribers to the Government telephone exchanges from 729 to 775.

The amount at the credit of depositors in the Government Savings Bank on the 31st December, 1917, was $939,356.43, an increase of 13 per cent as compared with the amount on December 31st, 1916. The average amount at the credit of each depositor was $151.51. There was a profit on the year's working of $5,960.77. The estimated present value of the investments is $744,303.11.

The disarrangement of Mail services caused by the war resulted in the Singapore Post Office becoming the clearing depôt for mails exchanged between India and Australia and between China and Australia. A weekly homeward service *viâ* Suez was maintained but during the greater part of the year the outward service was fortnightly.

Money Order and Postal Order transactions amounted in value to $14,761,000, an increase of nearly $10,000,000. This was due principally to the fall in the Bank Rate with India, and the Post Office with a rate of Rs. 175=$100 took up most of the exchange business with India. The rate of issue on India was reduced to Rs. 165=$100 and other steps were taken to eliminate the speculator.

In addition to the General Post Office, Singapore, and the Chief Post Offices at Penang, Malacca and Labuan, there are 28 Sub-Offices in the Colony, including the Railway Post Offices at Durian Tunggal (Malacca) and Jerals and Kreh (Province Wellesley). Of these 20 are telegraph offices.

GOVERNMENT MONOPOLIES.

Opium.—During the year 3,197 chests of opium (Indian and Persian) were cooked at the Factory. The only change in the selling price of chandu was in Christmas Island, where the retail price was raised in October, from $4.50 to $5.50 per tahil. The chandu sales in the Colony (including 6,000 tahils sold for consumption in Christmas Island) amounted to 1,302,289·5 tahils realising $12,945,231.

The Governments of the Federated Malay States and of Johore, Kedah, Perlis and Brunei obtained their supplies of chandu from the Monopolies as in previous years. In addition, it was arranged to supply packed chandu to the Government of

Trengganu on the expiry of the farm lease there and the first shipment of chandu to Trengganu under this arrangement was made in February. Sales to the Federated Malay States amounted to tahils 1,499,868, whilst 828,460,9.9 tahils were sold to the other Governments mentioned (including Trengganu). In addition, 7,200 tahils were shipped to Bundi and 5,400 tahils to Dungun.

The Calcutta auction price of opium varied between $1,936 and $2,089 per chest at exchange Rupees 165 = $100.

15,131.8 tahils of opium and 4,446.4.9 tahils of chandu were seized during the year. The illicit chandu traffic appears to be mostly in the hands of Hailams, who import chandu into the Colony from Sarawak and occasionally re-ship to Australian Ports. Hokkiens and Khehs seem to be the principal offenders as regards opium, which is generally brought here from ports in India and destined for China.

Seizures of cocaine and morphia during the year amounted to 37,790 grains and 3,500 grains respectively.

As in previous years the seizures of bhang were considerable, amounting to 7,819 bundles in Singapore and to 597.6.2 tahils in Penang.

Liquors.--The revenue from liquors amounted to $2,434,940 as against $2,389,151 in 1916. The rates of duty, which had been raised in June of the preceding year, were on January 8th, 1917, further raised by 25 per cent with a view to increasing the funds available for war contributions.

Tobacco.—The duties chargeable in the Settlements of Singapore, Penang, and Malacca, on the better qualities of tobacco, cigars and cigarettes were also increased by 47 per cent to 50 per cent on 8th January, 1917, with the same object. The total duty collected during the year was $1,185,249 as against $698,656 collected in the last 6½ months of 1916.

In Labuan the rates were as previously in force there, the duty collected being $3,853.63, compared with $4,385.86 in the previous year.

Prosecutions.—The total number of cases instituted by the Department during the year was 490 in Singapore, 522 in Penang, and 32 in Malacca.

MUNICIPALITIES.

The revenue of the three Municipalities amounted to $6,136,300, and their expenditure, excluding sums spent on Loan Works, to $5,810,958. The usual comparative statements of revenue and expenditure appear below.

REVENUE.

	1913.	1914.	1915.	1916.	1917.
	$	$	$	$	$
Singapore ...	3,202,551	3,626,243	3,696,544	3,884,353	4,375,493
Penang ...	1,321,766	1,399,639	1,404,150	1,429,251	1,537,937
Malacca ...	134,207	147,392	161,431	177,742	222,870
TOTAL ...	$4,658,524	5,173,274	5,262,125	5,491,346	6,136,300

EXPENDITURE.

	1913.	1914.	1915.	1916.	1917.
	$	$	$	$	$
Singapore ...	3,498,277	3,679,944	3,772,692	3,743,261	4,244,657
Penang ...	1,306,566	1,295,549	1,308,600	1,268,865	1,380,139
Malacca ...	135,405	145,795	131,958	160,655	186,162
TOTAL ...	$4,940,248	5,121,288	5,213,250	5,172,781	5,810,958

RURAL BOARDS.

The following return shows the revenue and expenditure of the Rural Boards, which carry out in areas outside Municipal limits such of the provisions of the Municipal Ordinance as are applicable to country districts :—

	Revenue.	Expenditure.
	$	$
Singapore Island ...	148,761	171,431
Penang Island ...	59,932	91,563
Province Wellesley ...	319,930	235,255
Dindings	34,829	26,056
Malacca	592,778	530,323

The deficit in the revenue of the Rural Boards is made good by contributions from the Government.

SINGAPORE HARBOUR BOARD.

The income and expenditure of the Board at Singapore (first as the Tanjong Pagar Dock Board and latterly as the Singapore Harbour Board) for the seven years 1911–1917 have been as follows:—

	Revenue.	*Expenditure.*
	$	$
1911	5,740,965	4,074,669
1912	6,015,648	4,216,015
1913	6,091,296	4,070,912
1914	5,834,893	3,875,738
1915	5,432,425	3,421,271
1916	6,785,372	4,203,355
1917	7,931,597	4,665,596

The capital debt due to Government stood at the end of 1917 at $52,921,664 on which the Board pays interest at 4 per cent. In addition to this capital, the Board has expended on new works and other expenditure of a permanent nature a sum of $2,333,209 from the reserve account.

The following figures are taken from the wharf tonnage returns:—

	1911.	*1912.*	*1913.*	*1914.*	*1915.*	*1916.*	*1917.*
Number of Vessels ...	2,528	2,693	2,708	2,544	2,364	2,329	2,400
Nett Tonnage	4,877,317	5,397,155	5,794,536	5,445,273	4,307,082	4,348,927	3,938,659
Coal (Inwards and Outwards)	1,084,974	1,200,545	1,338,495	1,248,032	1,021,452	1,067,824	1,039,202
Cargo (Inwards and Outwards)	1,285,991	1,335,846	1,462,788	1,229,205	1,323,637	1,339,129	1,369,606

The tonnage occupying the Graving Docks during the years 1916 and 1917 based on the daily tonnage in dock was:—

	1916.	*1917.*
No. 1 Dock	265,522	239,102
No. 2 Dock	578,967	409,120
The Victoria Dock ...	472,979	445,499
The Albert Dock ...	791,398	786,100
The King's Dock ...	1,288,098	1,817,202

TANJONG PAGAR—NEW WORKS.

Messrs. THE TOPHAM, JONES & RAILTON, LTD., the Contractors for the reconstruction of the Wharves, satisfactorily completed their contract and the whole of the work has been handed over to the Board.

Godown accommodation at the Wharves is still congested owing to shortness of materials but three large Godowns will shortly be completed thereby easing the situation considerably.

PENANG HARBOUR BOARD.

The total gross earnings of the Wharf and Dock for the year 1917 was $727,343* and the expenditure $711,326*.

The following figures are taken from the Wharf tonnage returns:—

	1911.	1912.	1913.	1914.	1915.	1916.	1917.
Number of Vessels	610	732	596	728	661	532	
Nett Tonnage	1,208,503	1,532,361	1,108,319	871,524	810,675	687,377	
Coal (Inwards and Outwards)	221,209	219,367	282,067	266,146	72,016	93,388	106,676
Cargo (Inwards and Outwards)	265,371	329,839	399,412	313,360	254,066	245,681	247,051

LAGOON WET DOCK AND MAIN WHARF RECONSTRUCTION.

TANJONG PAGAR.

The whole of the above works have now been satisfactorily completed, the final portion of the new Main Wharf having been handed over to the Singapore Harbour Board on the 24th May.

The total value of the permanent work executed by the Contractors, Messrs. Topham, Jones & Railton, Ltd., amounts to £1,182,277.14.0.

PUBLIC WORKS.

The expenditure of the Department was as follows:—

	Singapore.	Penang.	Malacca.	Labuan.	Total.
ESTABLISHMENTS.	c.	$ c.	$ c.	$ c.	$ c.
(1) Salaries ...	99,212.75	72,382.73	25,176.34	4,831.57	201,603.39
(2) Other Charges	23,848.91	19,951.96	13,692.48	1,174.23	58,667.58
ANNUALLY RECURRENT.

* Subject to audit.

The important works completed by the Department during the year were as follows:—

In Singapore, the enlargement of anatomical and physiological rooms at the Medical School; four additional servants' quarters at the Nurses' quarters, General Hospital; six additional married Sikhs' quarters at Sepoy Lines Police Station; six married quarters at Geylang Police Station.

Further progress was made with the installation of a water-borne sewage system at the General and Maternity Hospitals, Criminal and Civil Prisons and Lunatic Asylum, and the Jurong Road extension was continued.

In Labuan progress was made with the construction of a new reservoir.

In Penang there were erected two reinforced concrete beacons; also quarters for the electrical wireman and assistant.

In Province Wellesley quarters for the European operator, Wireless Station, and for the Overseer of Works, Penaga District, were built.

The deviation of the road from the end of Penaga village was completed.

In Malacca the following works were carried out:—extension to Nurses' quarters, Durian Daun Hospital; Malacca River, dredging channel for reclamation; quarters for Surveyors at Alor Gajah, Jasin, Merlimau and Pengkalan Balak; rebuilding of the vernacular school at Bertam Ulu.

Progress was made with the reconstruction of the roads which was greatly needed.

In Penang the amount of special expenditure on remetalling and tarring surface roads was $13,000.

In Malacca the amount of special expenditure on metalling and remetalling, etc., was $261,672.13.

The metalled roads in the Colony are as follows:—

	Miles.
Singapore	93·44
Penang	63·43
Province Wellesley	166·25
Malacca	231·38
Labuan	4·50
Dindings	22·00
Total ...	581·00

The department also has charge of 50 miles of gravelled road in Malacca and 110 miles of natural road of which the greater part lies in Penang, the Dindings, and Province Wellesley.

CHRISTMAS ISLAND.

The excess of revenue over expenditure, originally estimated at $1,103, is now calculated at $21,529.28: this is chiefly due to the fact that the Royalty on exports of Phosphate of Lime, amounting to $32,117.50, exceeded the estimate by over $17,000.

The total revenue amounted to $37,079.06.

Exports of Phosphate of Lime have increased by 100 per cent from 44,209 tons in 1916 to 89,889 tons, and tonnage entered and cleared at Flying Fish Cove increased from 59,295 to 112,210 tons. Australia and Japan once more consumed the entire stock of exports: but whereas in 1916 Australia took 85 per cent, in 1917 68 per cent went to Japan: similarly, with regard to the tonnage of freight ships, in 1916 86 per cent of the tonnage entered and cleared flew the British flag, in 1917 73 per cent sailed under Japanese colours.

Exports of rubber, though still of small significance, rose by 25 per cent: the value of the exports in 1917 was $2,404.

The population increased from 661 to 701.

The general health has been satisfactory, though the death-rate rose from 12·2 per mille in 1916 to 13·2 in 1917.

It is satisfactory to record that the condition of the Christmas Island Phosphate Company's labour force continues to be excellent.

There were no serious crimes.

The machinery required for the incline-haulage gear has been fixed in position, but no progress has been made with the Railway, which is still 3 miles from the future quarries at South Point.

The mean annual temperature was 80·5 F.—one degree cooler than in 1916.

REGISTRIES OF JOINT STOCK COMPANIES.

Last year was the second year during which the Companies Ordinance, 1915 was in force. Forty new companies were registered with a capital of $24,545,500; of these, 28 were private companies with a capital of $10,735,500.

At the end of the year 287 companies remained on the register of which 34 were in liquidation. Ten Life Assurance Companies are registered. The total subscribed capital of the 242 companies which carry on a business was $67,978,808.

Three hundred and eighty-six companies not registered in the Colony, have filed documents under the 1915 Ordinance, of these 318 are British. Apart from these, ten British companies have complied with the Life Assurance Companies Ordinance, and private Ordinances have been enacted in respect of five foreign companies.

The total revenue of the department was $15,081.40.

VETERINARY DEPARTMENT.

In Singapore the total imports of live stock were 436 horses, 28,526 cattle, 29,237 sheep, 8,522 goats, 160,060 swine, 217 dogs and 232 buffaloes as compared with 602 horses, 26,996 cattle, 31,364 sheep, 8,835 goats, 136,056 swine, 155 dogs and 516 buffaloes in 1916.

The total number of live stock exported from Singapore were 369 horses, 6,198 cattle, 8,500 sheep, 2,861 goats, 66,708 swine, 190 dogs and 86 buffaloes as compared with 337 horses, 6,271 cattle, 9,124 sheep, 3,082 goats, 39,993 swine, 147 dogs and 80 buffaloes in 1916.

The total revenue collected during 1917 amounted to $37,404.15 as compared with $32,704.70 in 1916.

The general health of animals in Singapore was good, although Foot-and-Mouth Disease of a mild type was introduced from Siamese ports during the early part of the year.

There were no cases of Rabies or Anthrax in Singapore.

LABUAN.

The revenue collected in Labuan amounted to $37,820.76, and $77,543.79 was expended. The total volume of trade was $2,632,269 and exports and imports show little variation from the previous year. 176,714 tons of merchant shipping entered and were cleared. A weekly service with Singapore and North Borneo was maintained. There was a general improvement in education and sanitation. The 10 square miles of land bought from the Labuan Coalfields Company, Limited, is being re-alienated in small holdings.

GENERAL.

Under the heading of trade it will be noticed that the trade of the Colony is described as on the whole satisfactory. Comparing it with previous years and with 1914 the year in which the war broke out, the aggregate gross trade for the year under review was £148.2 millions, against £127.7 millions in 1916 and £84.6 in 1914—an increase of £27.5 millions over 1916 and £63.6 millions over 1914. In face of these figures it is some-

what difficult to understand that this Colony, as an integral portion of the British Empire, has been engaged in the biggest war mankind has ever known or ever will know. In fact it may be at once stated that the Colony far from feeling the effects of a war that is devastating Europe—has actually benefited from the war.

Prosperity amongst those engaged in production and in ordinary trade is pronounced but has brought in its trail the consequences of such prosperity—high prices being paid without difficulty for labour and an ever increasing rise in the price of all commodities. To a country like Malaya, which is dependent more and more for its supplies of food for its population on outside sources and from overseas it is exceedingly questionable whether the prosperity, as evinced by the figures I have quoted, is a real one.

In my view the country has been over exploited in favour of the production of rubber with the result that the indigenous population having been withdrawn from the cultivation of its own foodstuffs, such as paddy, from the rearing of its cattle and pigs, has become, together with the immigrant population, practically dependent from outside for its actual support. To contend with such a state of affairs the year 1917 has been marked by an incessant watchfulness to ensure that the amount of food necessary for the needs of the population should be safeguarded. This has been a matter of anxiety and difficulty owing to the constantly increasing dimunition of shipping and, as an inevitable result, has led to an increasing rise all round in the prices of foodstuffs brought in from overseas. Constant have been the demands in the Press and from the employers of labour that Government should step in and regulate the prices of foodstuffs. If the people so anxious on this score would take into consideration what has been stated above and realise that the prices now demanded for foodstuffs are the natural outcome of a system that has led this country to be dependent upon outside rather than grow its own food they would understand that the prices must be dictated by those who supply from outside; to such prices must be added the greatly increased charges in freight over which the Colony has had no control; this again being to a certain extent due to the increased prices of coal and other stores; and realise that any arbitrary fixing of prices would probably lead to a diminution if not a cessation of supplies.

In view of the large increase in the requisitioning of British ships by the Admiralty Authorities for Imperial purposes in the early part of the year, and the fact that the Colony is almost completely dependent on sea-borne supplies for all the main articles of food, it was considered desirable to appoint a Committee to enquire and report as to the tonnage of shipping which was absolutely necessary for the vital requirements of the Colony.

This Committee rendered a valuable report and the Shipping Committee which is now in existence has practically guided its action by the information contained therein. The Food Control Regulations, 1917, were brought into force on the 31st May and a Committee of Food Control was appointed with Sub-Committees in Penang, Malacca and Labuan. In Singapore itself three Sub-Committees were again formed to deal respectively with staple European foods, staple native foods, and Shipping; the work of the Shipping Committee was handicapped to a certain extent in the unfortunate loss of the British steamer *Hong Wan* through bad weather in the Straits of Malacca and again in the sinking of the s. s. *Laertes* through collision with another steamer in December, 1917.

As regards increasing the local production of Food in the Colony, little could be done, but steps have been taken to improve the local supply of vegetables and food by inserting "Cultivation Clauses" in all leases of newly alienated lands. A Committee was appointed to enquire into the best method of increasing the production of rice and other foodstuffs. This work is still continuing. There is no question that the high profit accruing from the cultivation of rubber is the chief obstacle. The main work of the Committee, however, has lain in ascertaining the requirements of the Colony and in concert with the Shipping Sub-Committee and the requisitioning authorities arranging that ships were available to bring absolutely vital supplies to Malaya. The import of sufficient quantities of the following have been ensured:—

Rice from Rangoon, Siam and Saigon;
Wheat flour and Cold Storage from Australia;
Wheat flour from India; and
Chinese food stuffs from the neighbourhood of Swatow.

Steps have also been taken to determine that the necessary amount of fresh meat is available. Little has been done in regulating prices for the reasons already given in the first portion of these remarks. It was found possible, however, to deal with the price charged for tinned milk.

Owing to the increased cost of food and necessaries, steps were taken to relieve those Government officials on whom the cost fell most heavily.

An allowance of 15 per cent on their salaries from the 1st July was granted to officials drawing less than $25 per mensem and of 10 per cent to those drawing from $25 per mensem to £400 per annum. Ten per cent on family remittances to the United Kingdom also was granted up to half the amount of an officer's salary in the case of those drawing £400 or less, with effect from the 1st October. Arrangements also were made to give relief to those drawing small Widows' and Orphans' Pensions in the United Kingdom after enquiry in each case.

The intricate and involved question of Housing has occupied the very serious attention of Government. In September a Rent Assessment Board was appointed and later a Commission to enquire into the cause of the difficulties of Housing and to report on the proper steps to be taken to remedy them. The report of this Commission has not yet been received but the whole question is undoubtedly a very serious one, at least as it affects Singapore. In this connection the Government is indebted to the members of these Committees. They are composed of many prominent business men whose time is already largely taken up; they have done valuable work and the Government is very grateful to them.

Again, during the year under review, an energetic "Our Day" Campaign on behalf of the funds of the Red Cross was carried on with the willing and efficient assistance of many helpers; the result was most gratifying and all those who worked so hard may assuredly feel that they have been rewarded by the result. Nearly £113,000 was collected in the Straits Settlements. All communities both European and Asiatic gave their money and services with the greatest generosity and self-sacrifice.

The Income Tax, the introduction of which in 1916 was the cause of so much controversy, has more than justified its existence and a total sum of £400,000 was realised for the year under review. This result reflects high credit on the Treasurer, Mr. A. M. POUNTNEY, who, as Collector-General, has carried out a very difficult task with a minimum of friction as well as managing to dispense with the expensive machinery which was so freely prophesied as inevitable in its collection.

During the year the price of silver rose as high as 53 pence an ounce and the local silver coins were therefore worth exporting as bullion and were exported in spite of the strong measures which were taken to prevent both exportation and hoarding. The issue of subsidiary paper, therefore, became necessary. A glance at the financial statement, however, is sufficient to show that the Colony has never been more prosperous and that the issue of the notes was due to no other reason than the one stated above.

An urgent call for men for service at Home again existed in 1917 and was answered by many who volunteered; the Government provided 160 free passages to those proceeding to the United Kingdom on war service. Tribunals were also appointed before which any man who desired to do so could appear. If his services were considered necessary for the welfare of the Colony in its relation to the trade of the Empire he was given a certificate to that effect. If not he was told by the Tribunal according to their judgment that his services were not indispensable in the Colony, *i.e.* that his place was in the fighting line. The work of the Tribunal resulted in the release of a few men from their

employment who proceeded Home. At the time of writing, the war news is, if anything, graver than ever since the outbreak of the war and the Empire requires more and ever more men; that a considerable number can yet be found in the Colony without the absolute shutting down of important, to say nothing of essential, businesses, the writer has no doubt. The Colony, in spite of the war is very prosperous and no other portion of the British Empire has, I feel sure, felt so little its privations. It must be the duty of every British subject to do his utmost to render what services he can to the Empire thus showing his realisation of the benefits that he and his have received under the British Flag. There are numbers who cannot fight for their country but every one of us can and should do something even if only in setting example to others in self-forgetfulness by saving and thrift. Those of us who cannot fight can help in this way. By husbanding our health and our resources we shall have the more to give and in doing so take our humble share in preserving the Empire, indeed the whole world, from a brutal tyranny which knows no law but that of force.

F. S. JAMES,
Colonial Secretary,
Straits Settlements.

SINGAPORE, *3rd July*, 1918.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1918.

FINANCIAL.

The revenue for the year 1918 amounted tc $23,262,015 exceeding the estimate by $8,299,165 whilst the expenditure was $15,966,145, $2,722,686 more than the estimate.

The revenue of the Colony in this the fifth year of war exceeded the record of 1917 by $3,589,911. From the revenue point of view each year of war has created a successive record, a very striking fact.

The actual figures for 1917 and 1918 are shown in the following statements:—

A.—REVENUE.

	1917.	*1918.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Port, Harbour, Wharf and Light Dues ...	1,995	1,692	...	303
2. Licences, Excise and Internal Revenue not otherwise classified ...	15,425,019	18,902,861	3,477,842	...
3. Fees of Court or Office, Payments for Specific Services, and Reimbursements in Aid ...	754,914	668,292	...	86,622
4. Posts and Telegraphs ...	834,975	906,811	71,836	...
5. Rents on Govt. Property	858,001	940,917	82,916	...
6. Interest	1,043,917	1,086,149	42,232	...
7. Miscellaneous Receipts	402,671	223,221	...	179,450
	$19,321,492	22,729,943	3,674,826	266,375
8. Land Sales... ...	350,612	532,072	181,460	...
TOTAL ...	$ 19,672,104	23,262,015	3,856,286	266,375
		Net Increase ...	$3,589,911	

The Revenue under liquors increased by $512,714 and tobacco by $477,100.

Stamp duties for 1918 were less than those for 1917 by $189,102. The major portion of this decrease was due to reduction in Estate duty which brought in $297,290 in 1918, against $408,208 in 1917.

The Revenue from Posts and Telegraphs shows an increase of $71,836. Interest on Bank Accounts shows an increase of $69,623, but on the other hand, interest on investments decreased by $34,020. Interest on loans produced $243,604 as compared with $239,878 in 1917.

Profits on Exchange were $21,542 less than in 1917 but the increase in the Profits on Money Order Rates due to the low rate of exchange with India amounted to $119,723 or about one-half the corresponding figure in 1917.

B.—Expenditure.

	1917.	*1918.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Charge on account of the Public Debt ...	18,542	37,083	18,541	...
2. Pensions	565,595	613,306	47,711	...
3. Charitable Allowances ...	10,738	10,462	...	276
4. The Governor ...	78,112	79,196	1,084	...
5. Colonial Secretary, Resident Councillor and Residents ...	166,001	204,570	38,569	...

11. Audit	60,531	59,562	...	969
12. Marine	365,725	440,692	74,967	...
13. Legal	400,221	388,517	...	11,704
14. Police	912,130	973,457	61,327	...
15. Prisons	215,960	242,472	26,512	...
16. Medical	257,865	256,626	...	1,239
17. Hospitals and Dispensaries	552,211	556,814	4,603	...
18. Veterinary	24,140	23,922	...	218
19. Education	313,181	344,793	31,612	...
20. Ecclesiastical ...	19,694	19,606	...	88
21. Transport	15,492	21,739	6,247	...
22. Military Expenditure ...	2,944,299	3,758,258	813,959	...
Carried forward ...	7,471,404	8,595,323	1,155,655	31,736

B.—EXPENDITURE—*continued.*

	1917.	*1918.*	*Increase.*	*Decrease.*
	$	$	$	$
Brought forward ...	7,471,404	8,595,323	1,155,655	31,736
23. Miscellaneous Services	2,057,774	3,132,101	1,074,327	...
24. Post Office	507,290	710,408	203,118	...
25. Government Monopolies	452,345	417,598	...	34,747
26. Botanical Gardens and Museum... ...	51,089	65,049	13,960	...
27. Public Works Department	321,484	328,865	7,381	...
28. Public Works, Recurrent	299,098	414,377	115,279	...
29. Public Works, Extraordinary ...	208,908	458,257	249,349	...
War Expenditure ...	(*a*)	1,844,167	1,844,167	...
TOTAL ...	$11,369,392	15,966,145	4,663,236	66,483
	Net Increase ...		$4,596,753	

The expenditure upon Personal Emoluments ($3,942,071) and Other Charges ($3,189,908) both show increases, the figures in 1917 being $3,811,816 and $1,843,859, respectively. The principal item in the increase in Other Charges was Interest on War Loan $588,967 which represented the Colony's share of interest for 1917 as well as 1918.

Military Expenditure shows an increase of $813,959 due to payment of arrears of Defence Contribution in respect of the year 1917.

Miscellaneous Services.—The amount spent on Salaries of Acting Officers again showed a decrease of $11,769 owing to the small number of officers on leave.

Exclusive of Defence Contribution and of Special Expenditure connected with the war the Colony's Expenditure in 1914 was $7,746,594; in 1915, $7,207,478; in 1916, $6,514,527; in 1917, $6,774,048 and in 1918, $8,687,204, the corresponding expenditure on Public Works Extraordinary being $926,077, $676,463, $318,788, $208,908 and $458,257.

Of this increase of nearly $2,000,000 over the 1917 Expenditure Miscellaneous Services accounted for over $1,000,000 the principal additions under this head being Interest on War Loan $590,000, Relief Contributions $171,000, Grant-in-aid to Rural Board, Malacca, $120,000 and amount written off in connection with the reduction of

(*a*) Paid out of Suspense and vote taken in 1918, $585,065.

the capital debt of the Penang Harbour Board $200,000, while of the balance the Post Office showed an additional cost of $200,000 and Public Works, Annually Recurrent and Extraordinary, $365,000.

Among excesses of Revenue over the Estimates were:—Interest $536,699, Premia on Grants $56,912, Stamp duties $298,113, Premia on Special Sales of Town lands $373,910, Postage Stamps $81,475 and Land Rents $103,632.

The principal savings on the Expenditure Estimates were in respect of Public Works Extraordinary $198,707, Post Office $139,875 and Police $122,159. Overpayments recovered showed a sum of $3,029, not estimated for.

The following comparative statement shows the revenue and the expenditure of the Colony for the past six years:—

		Revenue.	*Expenditure.*
		$	$
1913	...	12,397,747	10,468,618
1914	...	14,016,882	10,180,189
1915	...	14,131,691	10,196,560
1916	...	17,325,695	11,046,353
1917	...	19,672,104	11,369,392
1918	...	23,262,015	15,966,145

The Assets and Liabilities of the Colony on the 31st December, 1918, were as follows:—

Liabilities.		*Assets.*	
	$		$
Deposits	8,243,318	Indian Agency Account ...	1,347,412
		Investments	24,817,167
		Advances	1,212,718
		Advances, Singapore Harbour Works	4,429,315
Suspense (Currency Commissioners) ...	1,730,483	Loans:—	
		Municipalities ...	351,620
		Sultan of Trengganu ...	10,000
Drafts and Remittances ...	33,398	Kelantan Government	120,000
		Singapore Harbour Board	4,579,502
		Penang Harbour Board	378,932
Excess of Assets over Liabilities ...	42,459,498	Imprests	35,086
		Loan Account	6,364,399
		Cash in Transit ...	23,129
		Suspense	817,485
		Cash	7,979,932
TOTAL ...	$52,466,697	TOTAL ...	$52,466,697

The excess of the assets over the liabilities increased during the year by $7,295,870.

MILITARY AND WAR EXPENDITURE.

The expenditure in 1918 on the Volunteers, Reserve Force and Civil Guard amounted to $159,890.

The amount paid in 1918 for Defence Contribution was $3,720,489, of which $1,255,769 represented arrears of Defence Contribution in respect of the actual revenue in 1917. The amount to be paid in 1919 for arrears of Defence Contribution in respect of the actual revenue for 1918 is $1,522,040.

PUBLIC DEBT.

The indebtedness of the Colony in respect of the loan raised by the issue of 3½ per cent Straits Settlements Inscribed Stock under the provisions of Ordinance IV of 1907 amounted, on the 31st December, 1918, to £6,913,352, of which the equivalent in local currency is $59,257,302.

The expenditure upon services in respect of which this loan was raised stands as follows:—

	$
Singapore Harbour Board ...	47,720,526
Penang Harbour Board ...	2,093,974
Municipal Commissioners, Singapore	4,484,460
Municipal Commissioners, Penang...	1,250,000
Government Harbour Works ...	10,834,286
	66,383,246
Loan Expenses and Cost of Conversion (1907 Loan) less interest received	3,388,205
Total ...	$69,771,451*

The charge on account of interest on this loan was $2,070,492 in 1918. This charge is, however, borne by the Singapore Harbour Board and the other bodies to whom portions of the loan have been allotted.

Under the provisions of the War Loan Ordinance No. 17 of 1916 an amount of $42,063,700 in 6 per cent Bonds repayable on 15th November, 1919, and under the provisions of the War Loan Ordinance No. 6 of 1918 a sum of $20,665,800 in 5½ per cent Bonds redeemable on 20th July, 1928 had been raised by 31st December, 1918.

* Practically all the balance over and above the proceeds of loans already issued has been advanced by the Colony.

EXCHANGE.

The demand rate (Bank opening rates only) ranged during the year between 2/3⅞ and 2/4 9/32.

CURRENCY.

Excluding subsidiary coins, the currency of the Colony in circulation in the Currency Area at the end of the year consisted of $86,408,740.40 in currency notes and $7,303,107 in dollars and half-dollars, while there were still in circulation bank notes issued by the Hongkong and Shanghai Banking Corporation and the Chartered Bank of India, Australia and China to the value of $164,168.

The most striking feature of the year from the currency point of view was the absence of requests to the Currency Commissioners to purchase Sterling remittances. Inflation of the note circulation due to purchase of these remittances commenced at the outbreak of war and in 1917 was particularly marked.

The coin reserve held by the Commissioners at the end of the year against the note circulation amounted to $52,345,075.63 consisting of £328,111 in gold held locally and $11,703,765.02 in silver partly in the Colony and partly held by the Mint Master, Bombay, for coinage purposes, and £4,413,375.4.9 in gold in London.

The investments held by the Commissioners on account of the note guarantee and depreciation funds were worth, at cash bargain or minimum prices, at the end of the year $33,817,883.61, the cost price of those investments being $41,175,619.77.

The decrease of price compared with original cost is due to the general depreciation of all securities.

The note guarantee fund at the end of the year was worth $87,893,442.55 (Coin portion $52,345,075.63, Investment portion $33,817,883.61 and on deposit with the Government pending investment $1,730,483.31), while the gold standard reserve fund at the same date was worth $5,021,499.61. The total of the funds controlled by the Commissioners was, therefore, $92,914,942.16, or $6,506,201.76 more than the total note circulation at the end of the year.

New subsidiary silver of 400 fine to the extent of $900,000 was received from the Bombay Mint during the year and was put into circulation as fast as possible to meet insistent demands for small change. The supply of small silver was, however, quite inadequate and it was found

necessary to increase the issue of notes of denominations less than $1. $623,994.40 worth of the 10-cent notes and $215,000 worth of 25-cent notes were in circulation at the end of 1918.

The number of notes destroyed during the year totalled 2,726,037, against 3,228,127 in 1917. It is regrettable that a fall in the rate of destruction has to be reported. Sickness amongst the staff, however, militated against reaching the 1917 standard. Most of the notes destroyed during the year were $1 notes.

At the beginning of the year the total number of notes awaiting destruction was 3,351,870. During the year there were cancelled 2,229,530 notes making a total of 5,581,400 for destruction and leaving a balance at the end of the year of 2,855,363 notes awaiting destruction.

ENEMY PROPERTY AND ENEMY FIRMS.

The balance to the credit of the Custodian of Enemy Property at the end of the year was $12,369,111.97 of which $11,864,007.04 was invested.

Of the twenty liquidations under the Alien Enemies (Winding-up) Ordinance, 1914 (XXIX of 1914), fifteen had been completed by the end of the year 1918, and little remained to be done to complete the remainder.

TRADE.

The trade of the Colony in 1918 was not so satisfactory as that of the previous year, although it was an improvement on the years 1914, 1915 and 1916.

The following figures excluding Coin and Bullion show the value of the foreign trade of the Colony in thousands of pounds sterling:—

Merchandise—

	Imports.	*Exports.*	*Imports Merchandise. Increase over the preceding year.*	*Exports Merchandise. Increase or decrease over the preceding year.*
	£	£	£	£
1914 ...	43,856	38,032	...	...
1915 ...	49,803	46,495	5,947	+ 8,463
1916 ...	61,855	56,934	12,052	+10,439
1917 ...	73,987	72,307	12,132	+15,373
1918 ...	81,618	71,922	7,631	− 385

The value of the inter-port trade including treasure was as follows in thousands of pounds sterling:—

	Imports.	Exports.	Imports Increase over the preceding year.	Exports. Increase over the preceding year.
	£	£	£	£
1914 ...	3,146	3,002	...	...
1915 ...	4,220	4,249	1,074	1,247
1916 ...	6,412	6,488	2,192	2,239
1917 ...	8,137	8,720	1,725	2,232
1918 ...	*9,103	*9,501	966	781

The aggregate trade for the year 1918 was therefore £153·5 millions, against £146·3 millions in 1917 and £81·9 millions in 1914, an increase of £7·2 millions over 1917 and of £71·6 millions over 1914.

Distributed according to classes the foreign trade records in thousands of pounds sterling are as follows:—

	Imports.		Exports.	
	1917.	1918.	1917.	1918.
	£	£	£	£
1. Live Animals, Foods, Drinks and Narcotics	27,761	28,819	21,447	22,861
2. Raw Materials	33,941	37,826	43,420	40,441
3. Manufactured and partly Manufactured Articles	12,285	14,973	7,440	8,620
TOTAL ...	73,987	81,618	72,307	71,922

The figures, except for exports in "Raw Materials," exceeded those of the previous year, as prices were on the whole much higher than they were in 1917.

As regards "Raw Materials", the decrease in value was chiefly due to the fall in the price of rubber, but this was counterbalanced by the increase in prices of other articles.

Excluding Para Rubber the volume of Straits Produce shipped was less than in 1917.

Articles of Straits Produce except Para Rubber gave larger average prices in most cases.

* Excluding Coin and Bullion.

Tin.—The imports of tin and tin ore were in 1918, 85,000 and 1,059,000 pikuls, respectively, as against 107,000 and 1,240,000 pikuls, respectively, in 1917 as shown below:—

	1917.		1918.	
	Tin.	*Tin Ore.*	*Tin.*	*Tin Ore.*
	Pikuls.	*Pikuls.*	*Pikuls.*	*Pikuls.*
Malay States ...	99,000	835,000	78,000	776,000
Netherlands Indies	...	133,000	...	50,000
Australia ...	...	20,000	...	...
Siam ...	8,000	191,000	7,000	192,000
Other Countries ...	...	61,000	...	41,000
Total ...	107,000	1,240,000	85,000	1,059,000

The exports of tin in 1917 and 1918 were as follows:—

	1917.		1918.	
	Pikuls.	*Value.*	*Pikuls.*	*Value.*
		$		$
United Kingdom	450,000	49,665,000	175,000	27,425,000
United States of America ...	392,000	43,338,000	578,000	89,944,000
Other Countries	234,000	24,818,000	172,000	26,249,000
	1,076,000	117,821,000	925,000	143,618,000

Para Rubber.—The imports of Para Rubber in 1917 and 1918 from the following countries were as follows:—

	1917.		1918.	
	Pikuls.	*Value.*	*Pikuls.*	*Value.*
		$		$
Malay States ...	928,000	105,501,000	1,351,000	95,832,000
Netherlands Indies...	124,000	13,330,000	328,000	22,355,000
Other Countries	40,000	4,204,000	59,000	4,115,000
Total ...	1,092,000	123,035,000	1,738,000	122,302,000

The exports of Para Rubber in 1917 and 1918 to the following countries were as follows:—

	1917.		1918.	
	Pikuls.	*Value.*	*Pikuls.*	*Value.*
	—	—	—	—
		$		$
United Kingdom	251,000	32,056,000	159,000	13,338,000
United States of America ...	1,162,000	148,536,000	1,334,000	113,971,000
Other Countries	210,000	28,056,000	348,000	27,250,000
Total ...	1,623,000	208,648,000	1,841,000	154,559,000

It will thus be seen that there was a decrease in quantity of tin exported in 1918; but on the other hand the value increased by over 25 million dollars.

As regards Para Rubber, both Imports and Exports showed large increases in quantity as compared with the previous year. Owing, however, to the sharp fall in the price of this article during the year the value of imports decreased by over 700,000 dollars and that of exports by over 54 million dollars.

IMPORTS.

In "Foodstuffs, drinks and narcotics," increased values are seen under the sub-heads animals, rice, spirits, arecanuts, tapioca, tobacco, cigars and cigarettes.

Under the heading "Raw Materials," enhanced values appear in tin, tin ore, wolfram ore, coal, gutta percha, petroleum and ground-nuts, while decreased import values are apparent in para rubber, raw hides and liquid fuel.

In the "Manufactured Class," cotton piece goods, yarns, gunnies, silk piece goods, iron nails, tramway and railway materials, photographic and cinematographic materials, cement, paper and paperware, chemicals, matches, soap and rubber tyres show increased values.

In quantities imported there was an increase under salt, tapioca, para rubber, petroleum, ground-nuts, benzine, cotton piece goods and cement.

Declines in quantity are most noticeable in fish, dry and salted, bran, padi, rice, wheat flour, milk, sago flour, pepper, tea, tin ore, tin, copra, gutta inferior, gum copal, gum damar, raw hides, liquid fuel, rattans and tin plates.

EXPORTS.

Exports of the following show increased values:—

"Foodstuffs, drinks and narcotics"—

Animals, fish dry and salted, rice, arecanuts, tobacco, cigars and cigarettes.

"Raw Materials"—

Tin, wolfram ore, ground-nuts, gutta percha and coconut oil.

"Manufactured Class"—

Cotton piece goods, sarongs, slendang and kain, rubber tyres, gunnies, chemicals, cement and matches, while decreases are apparent in—

"Foodstuffs, drink and narcotics"—

Pineapples, preserved, sago flour, pepper and tapioca.

"Raw Materials"—

Para rubber, copra, gum copal, gum damar, raw hides, phosphate of lime, rattans and liquid fuel.

"Manufactured Class"—

Motor cars, motor cycles and accessories, and hides, tanned.

The quantities of sugar, para rubber, coconut oil, cement and ground-nuts show an increase.

A decrease in volume is recorded of coffee, fish, dry and salted, preserved pineapples, bran, rice, salt, pepper, brandy, sago flour, arecanuts, tea, tobacco, phosphate of lime, tin, rattans, gutta inferior, raw hides, lubricating oil, petroleum, sarongs etc., gunnies, corrugated iron, iron nails, tin plates and tanned hides.

TRADE BY COUNTRIES.

The following statement shows the position of the Colony in the years 1917 and 1918 as a market for British, European, American, Japanese and other foreign goods.

(The value of the trade in merchandise with the United Kingdom, Continent of Europe, United States of America,

Russia-in-Asia and Japan is shown in thousands of pounds sterling.)

		Imports. 1917.	Imports. 1918.	Exports. 1917.	Exports. 1918.
		£	£	£	£
United Kingdom		5,431	6,539	11,572	6,428
France	Continent of Europe.	272	158	1,770	2,524
Denmark	Continent of Europe.	23	9	363	35
Holland	Continent of Europe.	90	25	...	5
Italy	Continent of Europe.	261	140	838	985
Norway	Continent of Europe.	88	4	...	...
Sweden	Continent of Europe.	19	6	...	...
Spain	Continent of Europe.	22	45	75	9
United States of America		1,839	2,008	24,159	25,289
Russia-in-Asia		...	...	939	...
Japan		4,049	5,880	2,083	3,143

The articles which gave the largest increased values from the United Kingdom were cotton piece goods, apparel, soap and soda, sarongs, slendang and kain, silk piece goods, whisky, brandy and cigars and cigarettes.

The articles showing declines in values from the United Kingdom were cement, tobacco, hardware and ironware including cooking utensils, telegraph and telephone materials, biscuits and brassware.

From the United States of America increases in imports are seen in cigars and cigarettes, petroleum, paper and stationery, iron bar and nail rod, wire nails, lubricating oil, rubber tyres, hardware, ironware and cooking utensils and steel, and decreases in machinery, motor cars, tramway and railway materials, roofing and building materials and milk.

From Japan the following show advances in imports:—

Coal, matches, chemicals, beer and ale, cement, paper and stationery, cotton piece goods, apparel, etc., machinery, paints, hats and caps, hardware, ironware and cooking utensils, silk piece goods and rubber tyres, dried fish and wheat flour, while cabinet and woodenware, cycles and cycle parts show a decline.

Exports to the United Kingdom showed advances in such articles as gutta percha, gum copal, isinglass, wolfram ore, and coconut oil, but decreases took place in tin, gambier, sago, black and white pepper, tapioca, copra, para rubber, hides, preserved pineapples, illipi nuts, India rubber and coffee.

In our Exports

to France—tin, sago, black and white pepper, tapioca, para rubber, wolfram ore, and rattans,

to Italy—Coconut oil and para rubber,

to Denmark—black and white pepper and coffee

all advanced, declines being seen in copra, and illipi nuts to France, tin, sago, and black and white pepper to Italy, and tapioca and copra to Denmark.

Exports to the United States advanced in values of tin, black and white pepper and copra, but sago, tapioca, rattans, jelutong, gutta percha, para rubber and gum copal fell in values.

Exports to Japan showed increases in values of shells, raw cotton, copra, opium, para rubber, coconut oil, rattans, hides cutting, indigo, iron scrap, sugar, tapioca flour and sago flour, while declines are seen in coffee, Borneo rubber, goats' skins, cutch and tin.

There was a rise in the total value of exports to Australia and New Zealand, Siam and the Siamese States, Malay States, Netherlands Indies, Hongkong and China, North Borneo and Sarawak but British India and Burma showed a decrease.

BANKRUPTCY.

There were 49 bankruptcies, but of these 16 alone were trade bankruptcies, of which 14 were Chinese. A rubber dealer failed for $139,097 and an import and export firm for $80,870. The total estimated liabilities of the trade bankruptcies were $453,036.

No deeds of arrangement were registered.

AGRICULTURE.

During 1918 the insufficiency of shipping resulted in the accumulation of large stocks of produce in our ports; and under the influence of the congestion in the case of rubber, the estates were driven to sell without delivery. Low prices under such circumstances were inevitable and rubber realised locally on the average 40 per cent less than in 1917. At the same time, with the great increase in the price of rice, the cost of production was driven up and consequently profits were clipped at both ends.

The rubber industry passed through a crisis, and prices fell below the average cost of production.

In consequence of voluntary reduction of output upon well established estates in anticipation of the crisis and later enforced reduction upon less firmly established estates by reason of their inability to tap at a profit the total output of the Settlements seems to have been about 75 per cent of what was possible.

Fortunately the crisis lasted but a short time; and at the end of the year prices were again at a paying level.

The estates have been maintained in good condition and show great improvement compared with their state after the crisis of 1913. The trees are generally healthy.

Copra prices, calculated in cents, were a little better than in 1917, but the higher cost of production reduced the net profits. Copra is not being manufactured in Singapore Island and its production is upon a reduced scale in the other Settlements. The end of the year found large stocks held, and the London market at a figure which did not permit of sale there. Fortunately local milling was active, and absorbed an increased amount of copra. The oil supports a nascent local soap industry.

The plantations are well looked after.

Gambier persists only over very small areas. Lack of the fuel necessary for its treatment discourages its cultivation.

Tapioca production has increased in Malacca, with the use of the tapioca plant as a cover crop in young rubber. The amount of it in Penang, and in Province Wellesley is also larger than before 1917.

Swine rearing and fattening is in Malaya an industry largely dependent upon the refuse of such products as tapioca. Swine fattening, that is to say the importation of lean pigs and the feeding of them, seems to offer in Singapore and Penang profits of about 30 per cent: but so large is the local consumption of pork that Singapore has no surplus export, and the surplus in Penang has dwindled down from 20,000 head in 1914 to barely over 1,000. Penang has now no surplus of poultry to export. It seems that one cause of this is that the mills in Penang do their work more efficiently than formerly so that there is less waste available for pig or poultry feeding.

Vegetable production appears to have increased in Penang; but to have decreased slightly in Malacca. In Malacca also the cultivation of ginger has decreased slightly. This decrease seems to be due to the rubber estates demanding Chinese tappers, and may be looked on as a phase that may pass, if the estates are able to keep adequate forces of Tamil tappers.

The year was a good one for fruit everywhere. There were also good crops of nutmegs and cloves in Penang: but the Penang nutmeg industry has decayed, and the clove industry is suffering also. The clove, nutmeg and arecanut

gardens are nearly all interplanted with rubber which can hardly be expected to pay. The export of arecanuts from Penang has also decreased. Its price is slightly better than in 1917 but perhaps not sufficient to compensate for the greater cost of harvesting and drying.

Rice in the 1917—18 crop was excellent and the rice lands were very fully planted but the crop of the season 1918—19 is disappointing. In some places, such as the coastal lands of Malacca, and parts of Province Wellesley, it is excellent. In other parts it was planted too late and in the interior of Malacca there are some hundreds of acres without any crop at all, in consequence of the cultivators waiting for rain which did not come.

LAND.

The Revenue was thus distributed:—

——		Land Revenue.	Reimbursements.	Land Sales.	Total.
		$	$	$	$
Singapore ...	1917	204,768	10,602	107,066	306,686
	1918	226,575	8,958	394,954	630,487

	1918	194,370	20,708	9,810	224,888
Malacca ...	1917	381,613	28,243	228,952	638,808
	1918	453,016	21,330	117,654	592,000
Labuan ...	1917	2,708	1,222	460	4,390
	1918	2,885	501	83	3,469
Total	1917	776,191	62,814	347,722	1,170,975
	1918	876,846	51,497	522,501	1,450,844

SINGAPORE.

The large increase in the amount realised by sale of Crown Land as shown above was mainly owing to the sale of certain town lots in the neighbourhood of Cecil Street and Robinson Road.

Quit-rents again showed a considerable increase, a large part of which is due to the inclusion for the first time in the general revenue of the rents on Sultan Ali Estate.

The rents of two important leases, one of the island of Sebarok to the Standard Oil Company and the other of land

at Beach Road to the Borneo Company, also contributed to the increase.

Temporary rents continued to increase owing to the continued demand for the occupation of Crown Land in the town and its vicinity, and the extension of vegetable cultivation by permit holders in the country districts. Rents were collected without much difficulty and no land reverted to Government for non-payment of rent. In spite of the difficulties of the rubber industry there was a marked increase in the number of rubber licences and an increase of nearly $5,000 in the revenue.

Owing to the provisions of the Rubber Lands (Restriction) Ordinance, 1917, which were made more stringent by the amending Ordinance I of 1918, there was no sale of country land of any importance.

In the towns there was an increased demand for land for business premises.

Seventy-nine Statutory Grants were issued of which 27 were grants issued on conversion of 99-year leases and 15 on the subdivision of existing titles.

Owing to pressure in the Survey Office no further applications for the conversion of 99-year leases were entertained. A sum of about $65,000 received on account of conversions approved in former years was placed on deposit and does not appear in the general revenue.

Claims arising out of Municipal Back-Lane Schemes gave considerable trouble and on two occasions were taken to court.

There were no compulsory acquisitions of any importance, but several purchases of land were made by the Government in the course of the year.

Rural Board Revenue shewed an increase over 1917 of over $8,000 which may be regarded as very satisfactory in view of the fact that in many plantations the number of trees in tapping was reduced on account of the low price of rubber.

PENANG.

—	Land Revenue.	Reimbursements.	Land Sales.	Total.
	$ c.	$ c.	$ c.	$ c.
North-east District ...	46,676 76	4,638 32	Nil.	51,315 08

Land revenue was increased by $1,791.30. There were 11 applications for Crown Land but only one was approved. This was an application made by a land-owner for a foreshore accretion adjacent to his own holding. One application was definitely refused and action on the rest was suspended until the auction of Crown Land is again allowed and the other restrictions on alienation are removed.

The Survey Office staff were unable to keep pace with the number of applications for sub-divisional surveys and re-surveys and were consequently only able to deal with 9 out of 23 applications received. It is hoped that there will be an improvement in this direction during 1919.

Eight thousand five hundred and seventy-one deeds were presented for registration as against 9,345 in 1917. This decrease is probably due to the reduced activity in the land market owing to the uncertain state of the rubber position.

The last fruit season was an average one.

PROVINCE WELLESLEY.

The Revenue collected in 1918 was as follows:—

			$	c.
Land Revenue	...	...	80,166	21
Reimbursements	...	...	9,185	55
Land Sales	...	...	1,732	00

Land Rents in Province Wellesley increased by a little over $1,000 during the year 1918 as compared with 1917.

Only 27 acres 1 rood and 17 poles were alienated during the year, the premium collected amounting to $1,702. There is not much available Crown Land in Province Wellesley and alienation of what there is was restricted during war time.

The fruit season was above and the paddy harvest below the average.

MALACCA.

Receipts on account of rents on Grants and Leases and assessment under the Malacca Lands Ordinance amounted to $412,931 in 1918 as against $358,109 in 1917.

ALIENATION OF LAND.

The area of Crown Land alienated, and the number of Statutory Grants issued during the last five years together

with the amount of premia paid in respect of the same, are shown in the following table:—

FORESTS.

The area of reserved forests has been increased to 106,013 acres, and now amounts to about 11 per cent of the lands in the Colony. The Forest Department expended $33,576 and collected $35,479 during the year under review, thus showing a surplus for the first time since 1904, and for the third time only in the history of the department. This result is due chiefly to the increased exploitation of timber from reserved forests, the revenue on which more than covered the reduction in revenue on rubber.

There were 43 breaches of the forest laws of which 26 were dealt with in court and 17 compounded. Of the former, 2 were acquitted, and the remainder punished by the infliction of fines amounting to $393.75 in addition to $782.56 paid to the department for damage done to the forest. One offender went to gaol. In the compounded cases compensation of $365.68 was realized.

The Malacca forests were placed during the year under the control of the Deputy Conservator of Forests, Negri Sembilan, and the Forest Ranger in charge was transferred to Tampin. This is the first step in the amalgamation of the forest departments of the Colony and of the Federated Malay States, which will be completed as soon as officers become available.

REGISTRATION OF DEEDS.

The number of deeds presented for registration in Singapore and Penang was 13,094 as compared with 13,287 in 1917, and the number of deeds finally registered, 12,863, as against 13,048 in 1917. Conveyances and Assignments accounted for 5,394, Mortgages for 3,800, and Reconveyances for 2,643. Revenue amounted to $40,148.95. The Registration of Deeds Ordinance, 1915 is not in force in the Settlement of Malacca.

RAFFLES MUSEUM AND LIBRARY.

The principal purchases were: a kris adjad, from Trengganu, acquired through Mr. J. L. HUMPHREYS, a set of gold coins from the Kodur Treasure Trove, Nellore District, Madras Presidency and several silk sarongs, shot with gold, from Rhio and Lingga. Mr. J. A. LE DOUX presented a pair of stocks formerly used by the Gambier Farmers of Kota Tinggi, Johore, and Government handed over to the Museum two tomb stones, from Malacca, supposed to be those of Sultan MANSUR SHAH, of about the year 1475 A. D., recently described by Mr. R. O. WINSTEDT in Journal 78, Straits Branch, Royal Asiatic Society. The Director under-

took two collecting expeditions, to Gunong Angsi, Negri Sembilan, in April, and to Gali, near Raub, Pahang, in December, devoting himself on both occasions chiefly to entomology.

A collection of postage stamps was started, the following States presenting duplicate sets of recent issues: Federated Malay States, Trengganu, Kelantan, Kedah, Sarawak, Brunei and British North Borneo.

An attempt was also made to form a collection of portraits of distinguished Singapore residents, past and present. Help is gratefully acknowledged from Messrs. Donaldson and Burkinshaw, Messrs. Guthrie & Co., Messrs. Drew and Napier, the United Engineers, the Hon'ble Lieut.-Col. Sir ARTHUR ADAMS, the Hon'ble Capt. CHANCELLOR, the Hon'ble Dr. LIM BOON KENG, the Misses BROWN, Father COUVREUR, Mr. W. E. HOOPER and Mr. CHUA HONG KAY.

The collection of plans of old Singapore was much added to through Dr. G. E. BROOKE's help who had recovered them from the Record Office.

The whole of the Museum and Library was repainted and colour-washed, the ceiling in the Animal Gallery was renewed, the gateways and drives leading to Stamford Road were widened and adapted to the ever increasing motor traffic, and the boundary wall in Fort Canning Road was straightened and continued to the upper end of the compound.

The number of subscribers was the highest on record, viz., 555, against 482 in the previous year, and the receipts by subscription, etc., rose during the same period from $3,579.20 to $4,662.03. The number of books purchased was 562, at a cost of $2,212.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 13,064,270 as compared with 15,784,369 in 1917.

Statement showing combined Arrivals and Departures of Merchant Vessels for the Years 1917 and 1918.

										Net decrease ...		2,720,099

In the last five years the combined arrivals and departures of merchant vessels have been as follows:—

In 1914	...	...	24,859,917	tons.
1915	...	...	20,896,952	„
1916	...	...	19,528,671	„
1917	...	...	15,784,369	„
1918	...	...	13,064,270	„

In the small craft (steamers under 50 tons and native vessels) the combined arrivals and departures were 50,840 in number and 2,338,771 in tons in 1918 as compared with 51,481 and 2,321,797, respectively, in 1917.

Six new steamers with a tonnage of 267 tons gross and 26 sailing vessels of 2,350 tons were registered during the year under the Imperial Shipping Acts. Under the Merchant Shipping Ordinance, 1910, twenty-one new sailing vessels of 2,140 tons were licensed under section 425, and 855 vessels of 15,966 tons were registered under section 426.

LEGISLATION.

The Ordinances passed during the year 1918 are 29 in number, including two Supply Ordinances. Seventeen of these are amending Ordinances.

The most important of the Ordinances which are not amending Ordinances are:—

(i) The War Tax Ordinance, reproducing the expired War Tax Ordinance, 1917, and imposing a tax on incomes of $3,000 and more per annum for the purpose of providing a contribution to the Imperial Government towards the expenses incurred in the prosecution of the present war;

(ii) The War Loan Ordinance, authorizing the Governor to raise money by issuing bearer and registered bonds and to lend such money to His Majesty's Government;

(iii) The Military Service Ordinance, enabling the Governor to raise a force for active service beyond the limits of the Colony at any time during the war;

(iv) The War Funds Ordinance, which establishes some measure of control over the collection of money in the Colony for War Charities and legalizes, subject to certain conditions, lotteries held by the permission of the Governor for raising money for such charities.

(v) The Courts (Emergency Powers) Ordinance, which provides that any member of the Overseas Force

of the Straits Settlements called out for active service beyond the limits of the Colony—

(*a*) who is tenant of any premises under a tenancy from year to year or for any longer period, may apply to a District Court and get the tenancy determined conditionally or unconditionally, if the Court is of opinion that under the circumstances the tenancy should be determined;

(*b*) who is a party to a written contract made before the 15th July last, may apply to the Supreme Court or to a District Court and get the contract varied, suspended or cancelled if the Court is satisfied that he cannot carry out his part of the contract without suffering serious hardship.

(vi) The Singapore Railway Transfer Ordinance, which empowers the Federated Malay States Government to construct a causeway across the Johore Straits and to lay thereon railway lines for the purpose of linking up the Singapore railway with the Johore and the Federated Malay States railways.

(vii) The Agricultural Pests Ordinance, which gives power to control the introduction and spread of pests injurious to cultivation.

(viii) The Non-Ferrous Metal Industry Ordinance, restricting temporarily the persons who may engage in business connected with certain non-ferrous metals and metallic ores.

The principal amending Ordinances are:—

(i) The Quarantine and Prevention of Disease (Amendment) Ordinance, which enables the Governor to declare a port to be an infected or suspected port when any disease classified as a "dangerous infectious disease" exists in an epidemic or sporadic state at such port;

(ii) The Increase of Rent (War Restriction) (Amendment) Ordinance, which imposes a fine on any landlord or sublandlord who from and after the thirty-first day of July, 1917,

(*a*) receives or recovers the increased rent of any dwelling-house where the rent has been increased between the thirty-first day of December, 1915, and the first day of August, 1917; or

(*b*) increases the rent of any dwelling-house or part of a dwelling-house

without an order of the Board.

(iii) The Volunteer (Amendment) Ordinance, which abolishes the system of capitation grants and provides that any volunteer who fails to attend the number of drills prescribed for any period of the year shall be liable to a fine.

(iv) The Registration of Aliens (Amendment) Ordinance, which provides—

(*a*) that only aliens over 14 years of age shall be registered;

(*b*) that a certificate of registration shall be issued to every registered alien by the Chief Police Officer and that such certificates must be produced to such officers and on such occasions as are therein mentioned;

(*c*) that no alien shall leave the Colony unless his passport or, where there is no passport, his certificate of registration has been endorsed by the Chief Police Officer.

(v) The Courts (Amendment) Ordinance, which gives effect to an arrangement which has been made between the Colony and the Federated Malay States that the Judges of the Supreme Court of the Colony and the Judicial Commissioners of the Federated Malay States should *ipso facto* have jurisdiction throughout the Colony and the Federated Malay States.

EDUCATION.

The expenditure on the eight Government English Schools was $178,918.75, on the 45 Aided Schools (English, Anglo-Tamil, Malay, Tamil and Chinese) $199,304.50 and on the 193 Government Vernacular Schools $154,380.98.

The Malacca Training College for Malay Teachers continued to do good work. Its cost, during the year under review, was $21,489.47.

The numbers in Secondary Classes show an increase of 142 over the figures for 1917. The Normal Classes continued their work during the year, and 38 Normal Class Certificates were issued.

The Department has been (for several years) greatly handicapped by a shortage of European Masters.

Further progress has been made with the question of Higher Education. The Committee appointed to make recommendations for the due observance and commemo-

ration of the Centenary of Singapore suggested that the permanent memorial of the occasion should be educational, and a Special Committee was then appointed to draw up a Scheme for Education for the Colony with a view to laying the foundation on which in course of time a University might be established. This Committee was sitting at the end of the year.

On the recommendation of the Education Board the Government has approved of the principle of a policy of free compulsory English Education. Before this can be done, a Training College for Teachers will be required, and a number of new schools must be built. It is not intended to compel children already attending a Vernacular School to leave it and learn English. Rather the idea is to sweep into the net the numerous children of many nationalities who at present get no education.

A Conference of Principals of Schools and Officers of the Education Department (S. S. and F. M. S.) was held at Kuala Lumpur in August, under the chairmanship of the Director of Education.

A number of modern scientific books, a History, a Geography, a Hygiene text-book, a Teachers' Arithmetic, were introduced into the Malay Vernacular Schools. Those previously in use were unsuitable, both from their antiquated subject-matter and the poor quality of the translation into Malay. Great progress was made with basketry as a branch of Manual Training. Malays are apt at the work and in many cases interest in this manual work has been observed to develope a pupil's intelligence all round. A Lady Supervisor for Malay Girls' Schools was appointed but did not arrive East in 1918.

A New Scheme for Malay Assistant Inspectors of Schools was approved and good results are expected from having trained Malay supervision of the Vernacular Schools.

An improved Salary Scheme is attracting a superior type of Malay to take up teaching.

THE SUPREME COURT.

The Court of Appeal sat at Singapore on the 10th June and 19th November disposing of 24 Appeals from the Supreme Court of which 16 were dismissed.

In Penang the same Court sat from the 19th to the 21st February and from the 13th to the 24th August dealing with 15 Appeals and 1 Criminal Appeal.

In Malacca there were three Civil Appeals. One was dismissed and two are pending.

In Singapore 23 Criminal Appeals from Magistrates' decisions were entered of which 17 were dismissed.

In Penang 44 were so entered and 24 were dismissed.

In Malacca there were six appeals against the decisions of the District and Police Courts. (Two were confirmed, three quashed and one is pending).

In Singapore 618 Civil Suits were instituted as against 470 in 1917 and 472 in 1916. In Penang and Malacca 414 and 120, respectively, were entered.

Sixty-five Bankruptcy petitions were filed in Singapore as against 67 in 1917 and 63 in 1916.

In Penang 23 petitions were filed as against 44 in 1917 and 37 in 1916. Five were presented in Malacca.

The fees received were as follows:—

		1916.		*1917.*		*1918.*	
		$	c.	$	c.	$	c.
Singapore	...	25,654	70	25,298	95	24,422	90
Penang	...	15,811	40	16,044	40	15,707	05
Malacca	...	...		...		4,859	95

POLICE.

The total strength of the Force at the end of the year was 2,649 which was distributed as follows:—

Singapore and Christmas Island ...	1,169
Penang, Province Wellesley and Dindings	1,037
Malacca	358
Labuan and Brunei	85
The authorized strength of the Force was	2,758

Out of an approved establishment of 99 Europeans there are 37 vacancies representing a shortage of 37·37 per cent. Recruits for the Malay and Indian Contingent came forward freely in all the Settlements but the men offering were for the most part of an inferior type.

The excessively high casualties, 525, due chiefly to dismissals and resignations make it extremely difficult to keep the Force up to strength.

There was a very considerable increase in the number of offences against discipline in all the Settlements, the total being 3,323 as against 2,193 in 1917, an increase of 1,130.

There was however a decrease in the number of cases of intoxication. There were 17 cases, which is 39 less than 1917 and 71 less than in 1916. The increase was chiefly in offences of a trivial character and was due to the fact that the punishments inflicted were ordinarily very light and were not sufficiently deterrent in their effect.

The health of the Force was on the whole fairly good but during the latter part of the year a number of the men suffered from influenza. Malaria, venereal diseases and injuries of various kinds accounted for most of the admissions to hospital. The admissions were 1,716 as against 1,193 in 1917, an increase of 523.

The Chap Ji Ki craze which gave so much trouble in Singapore, during 1916 and 1917 died out during 1918 on the cessation of the Gambling Farm in Johore but other forms of gambling increased in certain localities and gave the Department a great deal to do.

The cost of the Department was $919,246.16.

The returns of the more serious offences reported are:—

			1917.	*1918.*
Murder	...	...	31	32
Gang robbery	...	...	24	32
Robbery	...	...	135	129
House-breaking	...	...	379	405
Theft	...	...	2,132	2,370

The total number of cases in which arrests were effected with or without warrant in the Colony during the year was 19,087 compared with 16,409 in 1917. 162 cases were sent for trial before the Supreme Court as against 121 in 1917.

Three hundred and seven persons, mostly habitual criminals, were banished during the year.

PRISONS.

Criminal Prisons.—At the beginning of the year there were 745 prisoners in the four Criminal Prisons of the Colony (Singapore, Penang, Malacca and Labuan), 3,692 were admitted and 3,638 discharged, etc., during the year and 799 remained at the end of the year.

There were only 34 prisoners of the "habitual" class in prison at the end of the year. They were either British subjects who are not liable to banishment, or men under sentence for unlawful return from banishment.

Prison offences showed an average of 1·1 per annum per convict as against 1·6 in the preceding year.

The number of "Middle-Grade" convicts—the men available for industrial labour—continued to decline (the figures being 134 in 1918, 150 in 1917, and 193 in 1916) with the result that the work done by the convicts for various Government departments is enough to keep them fully employed, and that orders from private firms and individuals which were at one time sought for have now to be generally refused. The "Upper-Grade" men (62 in number) are mostly employed as cooks, orderlies, clerks, etc., the "Lower-Grade" men at stone-breaking and the "Short Sentence" and "Revenue Grade" men at stone-breaking, husk-beating and fatigue-duties.

During the year 310 persons were banished from the Colony, one from Brunei, one from British North Borneo and 399 banishees from the Federated Malay States passed through the Colony. It is to the purging of the Colony from this class of offender that the reduction in the number of convicts must be mainly ascribed.

There were ten executions (two in Singapore, six in Penang and two in Malacca) in pursuance of sentences of the Supreme Court.

Civil Prisons.—There were 121 men in the Civil Prisons of the Colony at the beginning of the year: 4,740 were admitted and 4,735 discharged during the year; and there remained 126 at its end.

Houses of Detention.—In these buildings, which are part of the Civil Prisons, there were 113 men at the beginning of the year and 49 at the close of the year: 490 were admitted and 554 discharged. Of this last number 18 found employment and 486 were repatriated.

General.—The health of the prisoners for the first quarter was not good. There was an outbreak of beri-beri which was traced to prisoners having been fed on rice steamed under pressure. After the cause of the outbreak had been discovered and matters rectified there were practically no fresh cases. For the remainder of the year the general health may be considered to have been satisfactory. The total expenditure of the department was $234,104.85, and its revenue $7,189.35 besides which articles to the value of $25,878 were supplied to Government departments.

VITAL STATISTICS.

The number of births and deaths registered during the year was 23,701 and 36,294, respectively. The figures for the preceding year were 24,826 and 29,950.

The estimated population of the Colony was 827,719. It was estimated at 809,869 in 1917, and ascertained in 1911 (the year of the Census) to be 711,951.

The birth-rate decreased from 30·65 to 28·64 per mille. Against this the death-rate has increased. The rate was 46·45 in 1911, 39·01 in 1912, 34·93 in 1913, 34·13 in 1914, 29·15 in 1915, 30·70 in 1916 and 36·98 in 1917, but 43·85 per mille in the year under review.

The principal causes of death were malaria (4,783 cases), infantile mortality (6,009), influenza (3,500), tuberculosis (2,536), beri-beri (1,961) and dysentery (1,362).

Dangerous infectious diseases notified in the Colony during the year caused 55 deaths from small-pox, 68 from cholera and 204 from plague. The corresponding figures in 1917 were 176, 9, and 44.

IMMIGRATION.

(I).—Chinese.

Fifty-eight thousand four hundred and twenty-one immigrants arrived from China, a decrease of 62·4 per cent as compared with the figure for 1917 and a decrease of 78·3 per cent as compared with that for 1911 which year showed the highest number yet recorded.

As compared with the average for the previous ten years, 1908 to 1917, the number arriving in 1918 shows a decrease of 68·7 per cent.

Adult males formed 67·9 per cent and adult females 14·7 per cent of the immigrants.

Immigration from Hongkong owing to the outbreak of cerebro-spinal meningitis there was prohibited from April to October. Subsequently immigration subject to restrictions was permitted during the remainder of the year.

There is no indentured Chinese labour in the Colony.

(II).—Southern Indian.

The total number of immigrants (deck passengers) arriving at Penang from Southern India during the year was 65,291, as compared with 90,077 in 1917.

The number of Indians leaving the Colony for Southern India was 52,132, as against 57,583 in 1917.

The figures for arrivals for the last four years are as follows:—

	1915.	*1916.*	*1917.*	*1918.*
Assisted immigrants *	54,881	72,091	78,407	55,583
Other immigrants ...	20,442	23,475	11,670	9,708
Total ...	75,323	95,566	90,077	65,291

The assisted immigrants consisted of 49,694 adults and 5,889 minors. Of the adults 38,013 were men and 11,681 women.

The health on estates in Penang, Province Wellesley and the Dindings was very satisfactory in the first half of the year, but the epidemic of virulent influenza in the latter half made it one of the worst years on record, the death-rate in Province Wellesley being 34·3 per mille and in the Dindings 52·5 per mille. Among the 239 labourers employed on estates in Penang, the death-rate was 38 per mille.

During 1918, 817 adult and 51 minor decrepit and destitute Indians were assisted with a passage back to India.

The rate of assessment to the Tamil Immigration Fund was $2 for the 4 quarters of the year 1918. The income of the fund was $1,696,582.85 and its expenditure $1,074,790.16.

(III).—Netherlands Indian.

The number of Netherlands Indian labourers on estates in the Colony is 2,586. No contracts under the Netherlands Indian Labourers' Protection Ordinance, 1908 are in force but approximately 537 local contracts for 300 days are in force in Province Wellesley.

CHINESE PROTECTORATE.

For the Chinese Community prices of foodstuffs and other articles imported from China ruled higher than in 1917 for reasons similar to those influencing prices in that year. The price of rice also rose considerably towards the end of

* "Assisted immigrants" are of two classes:—(i) the independent labourer who gets a free ticket from the Emigration Agent in India upon proof that he is a *bonâ fide* labourer, and who is free to work where he pleases; (ii) the Kangany labourer, who is recruited in India by a licensed Kangany, and who goes to a particular place of employment, though he is free, upon arrival there, to give a month's notice of his intention to leave. There is no indentured Tamil labour in the Colony.

the year with the result that the very poor were finding it difficult to make ends meet, notwithstanding the fact that wages had not fallen. The "Our Day" Fund was again very generously supported by the Chinese who also gave large contributions to the Canton Flood Relief Fund. The closing of the Johore Gambling Farm has resulted in the dying out of the craze for the "Chap Ji Ki" lottery in Singapore.

The immigration of Chinese from China into the Peninsula *viâ* Bangkok, which commenced during the year on the opening of the railway to Bangkok, has raised new problems for consideration.

METEOROLOGICAL.

The rainfall recorded was as follows:—

	1918.
Singapore	2490·50 m. m.
Labuan	3128·00 „
Penang	2229·50 „
Province Wellesley ...	1837·50 „
Malacca	1860·50 „
Dindings	4111·05 „

The mean temperature of the air throughout the year was 82·0. The maximum recorded was 95·0° in Penang on March 30th, and the same in Malacca on March 5th. The maximum in Singapore was 91·5° on several dates. The minimum was 67·0° in Singapore on January 25th.

POST AND TELEGRAPH DEPARTMENT.

The number of postal articles (excluding parcels) posted in the Colony was 11,455,514, an average of 13·84 per inhabitant, as against 15·85 the average in the previous year. The number received for delivery was 8,642,343, as compared with 8,447,338 in 1917. The number of messages transmitted over the Government telegraph lines increased from 358,064 to 408,242 and the number of subscribers to the Government telephone exchanges from 775 to 846.

The amount at the credit of depositors in the Government Savings Bank on the 31st December, 1918, was $1,128,170.50 an increase of 20 per cent as compared with the amount on December 31st, 1917. The average amount at the credit of each depositor was $163.69. There was a profit on the year's working of $17,495.67. The estimated present value of the investments is $1,000,425.74.

The disarrangement of Mail services caused by the war resulted in the Singapore Post Office becoming the clearing depôt for mails exchanged between India and Australia and between China and Australia. A weekly homeward service *viâ* Suez was maintained but the outward service was irregular.

Money Order and Postal Order transactions amounted in value to $6,270,000, a decrease of nearly $8,500,000. The abnormal amount of business in 1917 was due principally to the fall in the Bank Rate with India, and the Post Office with a rate of Rs. 175 equal $100 took up most of the exchange business with India. The reduction of the rate to Rs. 165 equal $100 was followed by an immediate reduction in the amount of Money Orders issued on India.

In addition to the General Post Office, Singapore, and the Chief Post Offices at Penang, Malacca and Labuan, there are 28 Sub-Offices in the Colony, including the Railway Post Offices at Durian Tunggal (Malacca) and Jarak and Kreh (Province Wellesley). Of these 20 are telegraph offices.

GOVERNMENT MONOPOLIES.

Opium.—During the year 3,711 chests of opium (Indian and Persian) were cooked at the Factory. The retail price of chandu remained the same as at the close of the previous year, that is to say, $10.50 per tahil in Singapore, Penang and Malacca, $6.50 per tahil in Labuan and $5.50 per tahil in Christmas Island. The chandu sales in the Colony (including 4,200 tahils sold for consumption in Christmas Island) amounted to 1,575,060.5.6 tahils realising $15,706,741.60.

Sales to the Federated Malay States Government amounted to 1,779,600 tahils, whilst 870,594.9.3 tahils were sold to the Governments of Johore, Kedah, Perlis, Trengganu, Kelantan and Brunei. In addition, 7,200 tahils were shipped to Bundi and 4,400 tahils to Dungun.

The Calcutta auction price of opium varied between $1,942 and $2,107 per chest at exchange Rs. 165 equal $100.

52,810.8 tahils of opium and 15,028.0.8 tahils of chandu were seized during the year. In the latter part of the year the illicit export of Government chandu to China was attempted on a considerable scale, owing, it is believed, to the state of exchange which rendered it more profitable to send remittances in the form of chandu. The illicit chandu traffic between Sarawak and Australia *viâ* Singapore is still in evidence, and is made all the more difficult to deal with by the fact that the Hailams interested have in some cases enlisted the assistance of Europeans.

Other seizures made during the year were as follows:—

Cocaine 35,157 grains, morphia 23,644 grains, tobacco 1,055 lbs., bhang 5,604 bundles in Singapore and 425.9 tahils in Penang and Malacca, and liquors 2,367 gallons. Several Singapore firms were successfully prosecuted by the Department under the Merchandise Marks Ordinance, 1917, for applying false trade descriptions to certain liquors imported by them and labelled as "Brandy", "Port", etc., and large quantities of these liquors were confiscated.

Liquors.—The revenue from liquors amounted to $2,511,590.36 as against $2,434,940 in 1917. The collection of duty on liquors intended for consumption in Christmas Island was taken over by the Monopolies Head Office in Singapore from the month of August.

Tobacco.—The increased cost of raw materials due to the war made it necessary to revise the scale of Tobacco Duties formerly operative in the Settlements of Singapore, Penang and Malacca. According to this scale the rate of duty payable was dependent on values and its retention would have made nearly all the cheaper brands taxable at higher rates with consequent excessive increase in cost to poor consumers. A new scale was therefore introduced on the 14th October, by which specific rates of duty were fixed without reference to the value of the article.

The total revenue collected during the year was $1,434,519.60 as against $1,185,249 in 1917.

The revenue from tobacco in the Settlement of Labuan was $3,735.91, as against $3,853.63 in the preceding year.

Prosecutions.—The total number of cases instituted by the Department during the year was 326 in Singapore, 102 in Penang, and 32 in Malacca.

MUNICIPALITIES.

The revenue of the three Municipalities amounted to ($6,807,004), and their expenditure, excluding sums spent on Loan Works, to ($6,904,967). The usual comparative statements of revenue and expenditure appear below.

REVENUE.

	1914.	*1915.*	*1916.*	*1917.*	*1918.*
	$	$	$	$	$
Singapore ...	3,626,243	3,696,544	3,884,353	4,375,493	4,943,059
Penang ...	1,399,639	1,404,150	1,429,251	1,537,937	1,592,449
Malacca ...	147,392	161,431	177,742	222,870	271,496

EXPENDITURE.

	1914.	1915.	1916.	1917.	1918.
	$	$	$	$	$
Singapore ...	3,679,944	3,772,692	3,743,261	4,244,657	5,034,593
Penang ...	1,295,549	1,308,600	1,268,865	1,380,139	1,577,409
Malacca ...	145,795	131,958	160,655	186,162	292,965

RURAL BOARDS.

The following return shows the revenue and expenditure of the Rural Boards, which carry out in areas outside Municipal limits such of the provisions of the Municipal Ordinance as are applicable to country districts:—

	Revenue.	Expenditure.
	$	$
Singapore Island ...	155,456	207,761
Penang Island ...	66,368	103,450
Province Wellesley ...	285,913	266,975
Dindings	33,883	31,058
Malacca	631,461	758,138

The deficit in the revenue of the Rural Boards is made good by contributions from the Government.

SINGAPORE HARBOUR BOARD.

The income and expenditure of the Board at Singapore (first as the Tanjong Pagar Dock Board and latterly as the Singapore Harbour Board) for the seven years 1912—1918 have been as follows:—

	Revenue.	Expenditure.
	$	$
1912	6,015,648	4,216,015
1913	6,091,296	4,070,912
1914	5,834,893	3,875,738
1915	5,432,425	3,421,271
1916	6,785,372	4,203,355
1917	7,931,597	4,665,596
1918	*9,617,718	*5,388,312

* Approximate only and subject to audit.

The capital debt due to Government stood at the end of 1918 at $52,300,028* on which the Board pays interest at 4 per cent. In addition to this capital, the Board has expended on new works and other expenditure of a permanent nature a sum of $2,437,158* from the reserve account.

The following figures are taken from the wharf tonnage returns:—

	1912.	1913.	1914.	1915.	1916.	1917.	1918.
Number of Vessels ...	2,69	2,708	2,544	2,364	2,329	2,400	2,114
Nett Tonnage	5,397,155	5,794,536	5,445,273	4,307,082	4,348,927	3,938,659	3,330,791
Coal (Inwards and Outwards)	1,200,545	1,338,495	1,248,032	1,021,452	1,067,824	1,039,202	732,231
Cargo (Inwards and Outwards)	1,335,846	1,462,788	1,229,205	1,323 637	1,339,129	1,369,606	1,213,730

The tonnage occupying the Graving Docks during the years 1917 and 1918 based on the daily tonnage in dock was:—

	1917.	1918.
No. 1 Dock	239,102	233,023
No. 2 Dock	409,120	216,211
The Victoria Dock ...	445,499	253,074
The Albert Dock ...	786,100	407,319
The King's Dock ...	1,817,202	736,214

PENANG HARBOUR BOARD.

The total gross earnings of the Wharf and Dock for the year 1918 were $883,180* and the expenditure $790,821.*

The following figures are taken from the wharf tonnage returns:—

	1912.	1913.	1914.	1915.	1916.	1917.	1918.
Number of Vessels ...	610	732	596	728	661	532	513
Nett Tonnage	1,208,503	1,532,361	1,108,319	871,524	810,675	687,377	581,132
Coal (Inwards and Outwards)	219,367	282,067	266,146	72,016	93,388	106,676	60,029
Cargo (Inwards and Outwards)	329,839	399,412	313,360	254,066	245,681	247,051	251,183

* Approximate only and subject to audit.

PUBLIC WORKS.

The expenditure of the Department was as follows:—

	Singapore.	*Penang.*	*Malacca.*	*Labuan.*	*Total.*
ESTABLISHMENTS.	$ c.	$ c.	$ c.	$ c.	$ c.
(1) Salaries ...	95,646.70	68,924.99	32,882.34	5,707.46	203,161.49

The only important works completed by the department during the year were as follows:—

In Singapore, quarters for 14 married coolies for the Botanical Gardens' staff were constructed; the Dressers' quarters at the Female Lunatic Asylum, Pasir Panjang, were re-built; six quarters for Night Nurses at the General Hospital and quarters for one European Operator at the Wireless Station were erected. Groynes were constructed at the Old Fort, Tanjong Katong, and a Sub-Post Office was built at Seletar.

In Labuan, progress was made with the construction of a new reservoir.

In Penang, the operating theatre at the General Hospital was extended and improvements were made at the Post Office. Quarters of the Class III type were also erected.

In Malacca, a house was purchased at Riverside for the Government Monopolies Department and certain alterations and repairs were effected in it. Additions and alterations were carried out in the Central Police Station in order to provide 10 married quarters for constables, and the barracks at Chin Chin Police Station were reconstructed. A workshop for the Public Works Department was erected and also six coolie lines for the same department.

Progress was made with the following works:—in Singapore, with the erection of quarters for a Field Assistant,

Botanical Gardens, and of Inspector's quarters and additional barracks at Beach Road Police Station together with general repairs.

In Penang, the construction of the reinforced concrete beacon in the South channel was proceeded with.

In Malacca, progress was made with the erection of new District Offices at Alor Gajah and Jasin and also Clerks' quarters in Malacca.

In Singapore, the extension of the Jurong Road was continued.

In Province Wellesley the reconstruction of the road to Dusan Lada on the Muda River was begun during the year. Work on the new road at Jawi in the south of the Province was begun during the year.

In Malacca progress was made with the reconstruction of the roads.

Penang—amount of special expenditure spent on metalling was $23,950.96.

Malacca—amount of special expenditure spent on metalling and remetalling, etc., was $443,053.09.

The metalled roads in the Colony are as follows:—

	Miles.
Singapore	95·36
Penang and Dindings	85·43
Province Wellesley	166·25
Malacca	231·38
Labuan	4·50
Total ...	582·92

The department also has charge of 50 miles of gravelled road in Malacca and 110 miles of natural road of which the greater part lies in Penang, the Dindings and Province Wellesley.

CHRISTMAS ISLAND.

The excess of revenue over expenditure, originally estimated at $27,183, is now calculated at $9,964.46. This is chiefly due to the fact that the royalty* on export of Phosphate of Lime, amounting to $19,000, shows a decrease on the estimates of $22,440.

* Royalty for 1917 was 35¾ cents per ton. Royalty at the same rate for 1918 would be about $19,000.

The total revenue amounted to $22,722.47.

Export of Phosphate of Lime decreased from 89,889 tons in 1917 to 53,370 tons, and tonnage entered and cleared at Flying Fish Cove decreased from 112,210 tons to 71,926 tons. Australia and Japan consumed the entire stock of export, Japan taking 55 per cent. In regard to the tonnage of freight ships 48 per cent flew the British flag and 52 per cent the Japanese.

The export of rubber decreased in value from $2,404 in 1917 to $1,124.75 in 1918.

The population decreased from 701 on January 1st to 514 on December 31st.

The general health has been satisfactory though the death-rate rose from 13·2 per mille in 1917 to 22·71 in 1918 owing to 7 deaths, in November and December of which the majority were due to influenza.

There was no serious crime.

One-and-a-half miles of track were laid during the year and on the railway line a further one-and-a-half miles with sidings at South Point to complete same.

The mean temperature was 80·9 F—·4 of one degree warmer than in 1917.

REGISTRIES OF JOINT STOCK COMPANIES.

Last year was the third year during which the Companies Ordinance, 1915 was in force. Thirty-five new companies were registered with a capital of $12,493,000; of these, 19 were private companies with a capital of $5,070,000.

At the end of the year 286 companies remained on the register of which 16 were in liquidation. The total subscribed capital of the 261 companies which carry on a business was $81,089,441.

Four hundred and three companies not registered in the Colony, have filed documents under the 1915 Ordinance; of these, 326 are British. Apart from these, 11 British companies have complied with the Life Assurance Companies Ordinance, and private Ordinances have been enacted in respect of 5 foreign companies. Fifty-eight companies do Fire Insurance business.

The total revenue of the department was $14,734.10.

VETERINARY DEPARTMENT.

In Singapore the total imports of live-stock were 389 horses, 31,879 cattle, 34,156 sheep, 4,421 goats, 144,014 swine,

308 dogs and 114 buffaloes as compared with 436 horses, 28,526 cattle, 29,237 sheep, 8,522 goats, 160,060 swine, 217 dogs and 232 buffaloes in 1917.

The total number of live-stock exported from Singapore was 248 horses, 4,942 cattle, 12,857 sheep, 2,748 goats, 64,764 swine, 184 dogs, and 15 buffaloes as compared with 369 horses, 6,198 cattle, 8,500 sheep, 2,861 goats, 66,708 swine, 190 dogs and 86 buffaloes in 1917.

The total revenue collected during 1918 amounted to $36,721.00 as compared with $37,404.15 in 1917.

The general health of animals in Singapore was good, no epidemic of contagious or infectious disease occurring, though there were several deaths during the last five months from diarrhœa which did not assume an epidemic form. In some characteristics it resembled Rinderpest, but as only about one per cent of the cattle arriving from Bangkok were effected its contagious properties were practically nil. Precautions were taken however by not exporting any Bangkok cattle and limiting the import to slaughter cattle only. It was impossible to prohibit the import of cattle from Bangkok as the food supply of Singapore would have suffered very greatly in consequence. Sufficient cattle for local consumption cannot be obtained from the other East Coast ports.

LABUAN.

The revenue collected in Labuan, amounted to $35,268.86, and $84,092 was expended. The total volume of trade was $2,763,561, and exports and imports show little variation from the previous year. 150,258 tons of merchant shipping entered and cleared. A weekly service with Singapore and Borneo was maintained. There was a general improvement in sanitation. The 10 square miles of land bought from the Labuan Coalfields Company, Limited, is being re-alienated in small holdings.

GENERAL.

During the past year the influences of the great War were more directly felt in the Colony than in previous years. Our prosperity was still great but having regard to the rise in values the figures of trade do not represent the equal of the 1917 prosperity. This would not appear to mean that there was more poverty. The President, Municipal Commissioners, Singapore, expresses the opinion that the general rise in prices was due in part to increased demand and that

the increase of wages among the poorer classes has led to more luxurious living. This opinion receives support from the Saving Bank returns which shows not only that the average balance per depositor rose from $153.56 in 1917 to $163.60 in 1918 but also that the number of depositors on the books on December 31st, 1918, was 6,892 as against 6,198 on December, 1917.

At the beginning of the year the world was waiting for the final German onslaught and the call for ships needed for the transport of American Troops and supplies largely reduced local shipping facilities. The tonnage of ships which entered and cleared the ports of the Colony was less than half that in 1913. In March, 1918, occurred the requisition of the Dutch Shipping in accordance with the right of Angary but all except four of these vessels were soon released.

We were compelled to mobilize our local shipping resources and to place them under Government control.

From the 1st May, 1918, all local British tonnage was requisitioned.

After the first German attack towards the end of March it was clear that our resources in men had also to be mobilized. There had from the beginning of the war been a steady stream of Volunteer recruits and it was believed that few only could be spared, but in the Empire's great need a thorough scrutiny of our resources was called for in order that no one who could possibly be sent should be prevented from going. The way had already been prepared by the Registration and Medical Examination Ordinance in December, 1917. There were some doubts raised as to the legality of conscripting men here for service in other parts of the world but these doubts were solved and in July the necessary machinery was embodied in the Military Service Ordinance. Tribunals got to work in August but the dramatic change in the fortunes of War rendered unnecessary the services of the recruits thus obtained.

In the middle of July the Middlesex Regiment was despatched to Vladivostock for service and from their departure until the arrival of a Battalion of the Manchester Regiment in the first week of August the necessary military duties were carried out by the Singapore Volunteer Corps.

In view of the demands of Mesopotamia for skilled labour our resources in the way of skilled artisans were regulated by Regulations under the Imperial Order in Council of October, 1896, requiring a licence from this office for the engagement of any skilled artisan.

The shipping scarcity, reductions in staffs and the American restrictions on the import of rubber naturally had an unfavourable effect on the trade. From May, the United States of America limited their importation of rubber to 100,000 tons yearly and in order to conserve their shipping resources gave preference to South America for their supplies. As their 1917 imports had amounted to 177,000 tons this was a severe blow to the local industry. Auction prices fell to 39 cents a pound. A Committee to enquire into the position was appointed on the 16th August and, on the 2nd September, this was turned into a Commission. The Report was published on the 2nd October and suggested that there should be a compulsory reduction of output and that Government should guarantee purchase at 80 cents a pound. The first part of the proposal would have been difficult to execute without an international convention. The latter proposal needed the closest scrutiny and forethought as it might have led to enormous Government liabilities and losses—losses which should have been an unfair burden on the general community. Fortunately the situation was relieved by the signing of the Armistice.

The Tin industry had during the first half of the year been very prosperous in view of the war demands. The price rose to $160 per picul in July. In that month buying was prohibited except under licence and the price then rose to $185. Subsequently a single buyer was authorised and by the time the Armistice was declared the price had fallen to $143.10 per picul. Towards the end of the year when the Imperial Government ceased to buy direct the Federated Malay States found it necessary to guarantee Government purchase at $118 per picul.

To add to the difficulties experienced in our two main industries the large class of Chinese merchants was hard hit by the unrest in China which led to calls upon them from their relatives there and by the unfavourable rate of exchange which largely increased the cost of remittances to China. The rise in the price of silver had in 1917 proved a source of anxiety to Government as it rendered the export of our silver coinage to countries where notes were not acceptable a profitable undertaking and in consequence it had been found necessary to suspend the issue of silver dollars. To meet the change in price by His Majesty's Order in Council of 18th May, 1918, a fineness of 600 was substituted for 900.

The health of the community was not good and there were epidemics of influenza and plague with the result that the death-rate is the highest on record since 1911.

The housing problem became more and more urgent throughout the year. In July the Housing Commission completed its labours by the publication of its Report, and the result of its recommendations are already visible in the building activities of the Municipality and a number of the most prominent firms with a view to supplying their employees with quarters. Government also is making provision for an increase in the number of quarters available for its servants.

The news of the signing of the Armistice reached Singapore on the evening of the 11th November and that night and several days thereafter witnessed manifestations of great public rejoicing.

It was however immediately apparent that our difficulties were very far from being at an end. The floods in Siam, the demands for rice from Japan and Java and famine in India with its consequent restriction on the export of Burma rice to non-Indian ports made it evident towards the end of the year that there would be a very serious shortage of rice as regards the needs of local consumption. There had been in existence since May, 1917, a Committee of Food Control, but in the end of 1918 it was found necessary to concentrate its activities and powers in the person of a Food Controller. Mr. F. S. JAMES, the Colonial Secretary, was appointed Food Controller on December 25th.

The prices both of food and other necessities rose steadily throughout the year, and in the last quarter Government decided to increase the special temporary allowance granted to its servants in 1917 by way of relief and also to extend the scope of its application. About the same time in response to the requests contained in numerous petitions a Commission was appointed to enquire into the question of the salaries of the Public Service.

It gives me great satisfaction to record that in spite of the difficulties experienced during the year by all classes and the difficulties that loomed threateningly ahead the claims of the Red Cross met with an even more generous response than in previous years. "Our Day" was fixed for the 14th December and the total collected in 1918 amounted to the sum of £142,256 as against approximately £117,000 in 1917.

I have to record with regret the death of Mr. J. C. SUGARS which occurred in the beginning of November. Mr. SUGARS was an Officer of Class III of the Federated Malay States Civil Service but was acting in Singapore. He had held posts in every part of the Peninsula and by the attraction of his personality had at every place where he was stationed won numerous friends.

His Excellency the Governor and the Honourable Sir ARTHUR ADAMS were created Knight Commanders of the Order of the British Empire, and a number of local residents including several ladies were recipients of other honours for their services in various war activities.

We have ahead of us many difficult problems. We have lost or are losing some of the oldest members of our community and we shall lose the benefit of their experience to guide us. The staffs, Government and business alike, are much depleted and it will need many months to build them up again. The ordinary channels of circulation have been for years increasingly restricted with the result that the community is as it were in an anæmic condition.

Reconstruction is in the air, but in this Colony construction in two directions is imperative. A real active live Educational policy is called for and much is required to render the Medical and Sanitary position efficient and up-to-date. New hospitals properly constructed and well equipped are urgently required while there is room, I regret to say spacious room, for improvement in the Sanitary conditions of our principal towns. Take for instance Singapore—the Stegomyia mosquito abounds; in no town inhabited by Europeans in a West African Colony would such a state of affairs be tolerated. Here yellow-fever is not endemic but unless steps are taken quickly to rid the town of this scourge of the mosquito there is every possibility in the future of its introduction. Years ago the late Sir RUPERT BOYCE, said to the present writer—"In years to come, you will see that a port will not quarantine a ship coming from a yellow-fever port but the ship will refuse to call at a port where it is known that the Stegomyia mosquito is allowed to exist". Again in Singapore itself, growing and important town as it is, with one of the finest and busiest ports in the world, the lighting of the town is disgraceful and its tramway system archaic. It is true that these matters are now receiving attention, and one cannot too earnestly hope that that attention will be maintained without any slackening in execution.

There are many other problems in front but in view of the conditions and the strain of the past four years it is difficult to retain a normal sanity of outlook. The present

calls for great patience and restraint. It is useless to overtax the strength of the community in a premature attempt to deal conclusively with all the problems that press themselves on our attention. The arrival of new recruits will provide the additional energy for the tasks which lie before us but we must realise that high prices and economic difficulties are but the natural sequel to the Great War, that we cannot expect to rid ourselves of them for a few years but that as fortune has treated us as a community very kindly in the past it is all the more necessary to shoulder our future responsibilities with the greater readiness.

F. S. JAMES,
Colonial Secretary, S. S.

22nd August, 1919.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1919.

FINANCIAL.

The revenue for the year 1919 amounted to $34,108,465 exceeding the estimate by $17,252,873, whilst the expenditure was $34,901,233, $19,111,502 more than the estimate.

The revenue of the Colony exceeded the record of 1918 by $10,846,450. It is important, however, to call attention to the fact that the revenue of 1919 was very materially increased by transfer entries in the 1919 accounts of sums collected in previous years.

These entries included:—

	$
Sale of Singapore Railway and Railway Stores	4,149,750
Profits on Indian Exchange ...	884,909
Excess interest received from other administrations on account of loan moneys lent to them ...	749,325

Allowing for these items and for a sum of $747,580 refunded by the Currency Commissioners, the genuine revenue for 1919 exceeded that of 1918 by more than four and a quarter million dollars, a highly satisfactory result.

The actual figures for 1918 and 1919 are shown in the following statements:—

A.—Revenue.

	1918.	*1919.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Port, Harbour, Wharf and Light Dues ...	1,692	1,506	...	186
2. Licences, Excise and Internal Revenue not otherwise classified ...	18,902,861	22,302,119	3,399,258	...
3. Fees of Court or Office, Payments for Specific Services, and Reimbursements in Aid ...	668,292	736,701	68,409	...
4. Posts and Telegraphs ...	906,811	1,094,083	187,272	...
5. Rents on Govt. Property	940,917	1,240,762	299,845	...
6. Interest	1,086,149	1,374,153	288,004	...
7. Miscellaneous Receipts	223,221	2,845,879	2,622,658	...
	$22,729,943	29,595,203	6,865,446	186
8. Land Sales... ...	532,072	4,513,262	3,981,190	...
TOTAL ...	$23,262,015	34,108,465	10,846,636	186
		Net Increase ...	$10,846,450	

The Revenue under liquors increased by $597,404 and tobacco by $109,437.

Stamp duties for 1919 increased by $916,956. Estate duty brought in $740,402 in 1919 against $297,290 in 1918.

The Revenue from Posts and Telegraphs shows an increase of $187,272. Interest on Bank Accounts shows an increase of $7,250 and interest on investments increased by $283,829. Interest on loans produced $236,712 as compared with $243,604 in 1918.

Profits on Exchange amounted to $892,741 principally due to the increased value of the Rupee, but profits on Money Order Rates due to the low rate of exchange with India amounted to $81,027 as compared with $119,723 in 1918.

B.—EXPENDITURE.

27. Public Works Department	328,865	368,154	39,289	...
28. Public Works, Recurrent	414,377	488,493	74,116	...
29. Public Works, Extraordinary ...	458,257	892,571	434,314	...
War Expenditure ...	1,844,167 (*a*)	1,466,400	...	377,767
Agricultural Department	...	1,338	1,338	...
TOTAL ...	$15,966,145	34,901,233	19,370,545	435,457
	Net Increase	...	$18,935,088	

The expenditure upon Personal Emoluments ($4,685,159) and Other Charges ($22,286,362) both show increases, the figures in 1918 being $3,942,071 and $3,189,908, respectively. The major part of the increase in Other Charges was due to part of the cost of the Singapore Harbour Works ($15,063,463) being debited to Expenditure.

Military Expenditure shows an increase of $611,422 due to payment of arrears of Defence Contribution in respect of the year 1918.

Miscellaneous Services.—The amount spent on Salaries of Acting Officers increased by $76,089 over 1918, the cessation of hostilities permitting of more officers going on leave.

Exclusive of Defence Contribution and of Special Expenditure connected with the war the Colony's Expenditure in 1914 was $7,746,594; in 1915, $7,207,478; in 1916, $6,514,527; in 1917, $6,774,048; in 1918, $8,687,204; and in 1919, $29,111,433, the corresponding expenditure on Public Works Extraordinary being $926,077, $676,463, $318,788, $208,908, $458,257 and $892,571.

Of this increase of more than $20,000,000 over the 1918 Expenditure, Miscellaneous Services accounted for over $17,000,000. The principal additions under this head being part cost of Singapore Harbour Works $15,063,000, Compensation to Rice Dealers $2,625,000: while of the balance, Police showed an additional cost of $149,000, Prisons $87,000, Hospitals and Dispensaries $228,000, Military Expenditure $611,000 and Public Works Annually Recurrent and Extraordinary, $508,000.

(*a*) In addition to this a sum of $910,202 is still under suspense to be voted in 1920.

Among excesses of Revenue over the Estimates were:—

Interest $476,643, Premia on Grants $164,479, Stamp duties $1,165,070, Premia on Special Sales of Town Lands $133,133, Postage Stamps $194,785, Land Rents $310,661 and Miscellaneous Receipts $2,811,743.

The principal savings on the Expenditure Estimates were in respect of Public Works Extraordinary $651,941 and Post Office $142,186. Overpayments recovered showed a sum of $150,753 not estimated for.

The following comparative statement shows the revenue and the expenditure of the Colony for the past six years:—

	Revenue.	*Expenditure.*
	$	$
1914 ...	14,016,882	10,180,189
1915 ...	14,131,691	10,196,560
1916 ...	17,325,695	11,046,353
1917 ...	19,672,104	11,369,392
1918 ...	23,262,015	15,966,145
1919 ...	34,108,465	34,901,233

The Assets and Liabilities of the Colony on the 31st December, 1919, were as follows:—

Liabilities.	$	*Assets.*	$
Deposits	9,989,822	Indian Agency Account ...	3,616,302
		Foodstuff Agency Account	1,776,777
		Investments	18,215,251
		Advances	17,040,786
Suspense	(a) 4,022,676	Loans:—	
		Municipalities ...	312,980
		Sultan of Trengganu ...	10,000
Drafts and Remittances ...	919,976	Kelantan Government	120,000
Federated Malay States and Johore Foodstuff Account ...	6,730,838	Singapore Harbour Board	4,112,260
		Penang Harbour Board	529,867
		Ho Hong Steamship Co.	400,000
Excess of Assets over Liabilities ...	41,666,730	Imprests	43,893
		Cash in Transit ...	11,658
		Suspense (War Expenditure)	910,202
		Cash	16,230,066
TOTAL ...	$63,330,042	TOTAL ...	$63,330,042

The excess of the assets over the liabilities decreased during the year by $792,768.

(a) Includes Currency Commissioners $1,424,395.

MILITARY AND WAR EXPENDITURE.

The expenditure in 1919 on the Volunteers, Reserve Force and Civil Guard amounted to $157,704.

The amount paid in 1919 for Defence Contribution was $4,323,400, of which $1,522,040 represented arrears of Defence Contribution in respect of the actual revenue in 1918. The amount to be paid in 1920 for arrears of Defence Contribution in respect of the actual revenue for 1919 is $2,524,927.

PUBLIC DEBT.

The indebtedness of the Colony in respect of the loan raised by the issue of 3½ per cent Straits Settlements Inscribed Stock under the provisions of Ordinance IV of 1907 amounted, on the 31st December, 1919, to £6,913,352, of which the equivalent in local currency is $59,257,302.

The expenditure upon service in respect of which this loan was raised stands as follows:—

	$
Singapore Harbour Board ...	47,720,526
Penang Harbour Board ...	2,093,974
Municipal Commissioners, Singapore	4,484,460
Municipal Commissioners, Penang	1,250,000
Government Harbour Works ...	320,137
	55,869,097
Loan Expenses and Cost of Conversion (1907 Loan) less interest received	3,388,205
Total ...	$59,257,302

The charge on account of interest on and expenses of this loan was $2,086,388 in 1919. This charge is, however, borne by the Singapore Harbour Board and the other bodies to whom portions of the loan have been allotted.

Of the 6 per cent War Loan Bonds to the extent of $42,063,700 issued under the authority of Ordinance No. 17 of 1916, $36,671,900 were converted into 5½ per cent Bonds redeemable on 15th November, 1929. The balance of the 6 per cent Bonds were redeemed in cash.

The 1918 5½ per cent War Loan was closed during the year the total subscriptions amounting to $28,655,700. These bonds are redeemable on the 20th July, 1928.

EXCHANGE.

The demand rate (Bank opening rates only) ranged during the year between 2/3$\frac{31}{32}$ and 2/4$\frac{5}{16}$.

CURRENCY.

Excluding subsidiary coins, the Currency of the Colony in circulation in the Currency Area at the end of the year consisted of $174,631,973.70 in currency notes and $6,424,247 in dollars and half-dollars, while there were still in circulation bank notes issued by the Hongkong and Shanghai Banking Corporation and the Chartered Bank of India, Australia and China to the value of $156,273.

The most striking feature of the year from the currency point of view was the phenomenal demand for currency in the second half of the year. To meet this demand the Currency Commissioners had to purchase sterling remittances amounting to £10,190,000 with the remarkable result that the note circulation was within six months more than doubled. At the end of 1919 the note circulation was more than four times the pre-war figure.

The coin reserve held by the Commissioners at the end of the year against the note circulation amounted to $120,845,547.79 consisting of £328,288 in gold held locally and $8,581,963.77 in silver partly in the Colony and partly held by the Mint Master, Bombay, for coinage purposes, and £12,769,130.2.8. in gold in London.

The investments held by the Commissioners on account of the note guarantee and depreciation funds were worth, at cash bargain or minimum prices, at the end of the year $53,786,788.91, the cost price of those investments being $62,782,748.51.

The decrease in value compared with original cost is due to the general depreciation of all securities.

The note guarantee fund at the end of the year was worth $176,056,731.88 (Coin portion $120,845,547.79, Investment portion $53,786,788.91 and on deposit with the Government pending investment $1,424,395.18), while the gold standard reserve fund at the same date was worth $5,799,448.28. The total of the funds controlled by the Commissioners was, therefore, $181,856,180.16, or $7,224,206.46 more than the total note circulation at the end of the year.

New subsidiary silver of 400 fine to the extent of $1,950,000 was received from the Bombay Mint during the year and was put into circulation as fast as possible to meet insistent demands for small change. The supply of small

andronicu

silver was, however, quite inadequate and it was found necessary to increase the issue of notes of denominations less than $1. $773,606.70 worth of the 10-cent notes and $50,800 worth of 25-cent notes were in circulation at the end of 1919.

The number of notes destroyed during the year totalled 3,199,912, against 2,726,037 in 1918. It is satisfactory to be able to report that the three million mark was again passed last year as was the case in 1917. One dollar notes accounted for 2,524,238 of the total number destroyed.

At the beginning of the year the total number of notes awaiting destruction was 2,855,363. During the year there were cancelled 4,048,927 notes making a total of 6,904,290 for destruction and leaving a balance at the end of the year of 3,704,378 notes awaiting destruction.

ENEMY PROPERTY.

The balance to the credit of the Custodian of Enemy Property at the end of the year was $13,355,910,97 of which $13,212,160.25 was invested.

TRADE.

The trade of the Colony in 1919 was highly satisfactory, being a great improvement on the year 1918 and the four previous years.

The following figures excluding Coin and Bullion show the value of the foreign trade of the Colony in thousands of pounds sterling:—

Merchandise—

	Imports.	*Exports.*	*Imports Merchandise. Increase over the preceding year.*	*Exports Merchandise. Increase or decrease over the preceding year.*
	£	£	£	£
1914 ...	43,856	38,032	...	...
1915 ...	49,803	46,495	5,947	+ 8,463
1916 ...	61,855	56,934	12,052	+10,439
1917 ...	73,987	72,307	12,132	+15,373
1918 ...	81,618	71,922	7,631	— 385
1919 ...	96,664	99,318	15,046	+27,396

s publishing company, inc.
TH AVENUE, NEW YORK, N.Y. 10019 · (212) 245-8478

The value of the inter-port trade including treasure was as follows in thousands of pounds sterling:—

	Imports.	Exports.	Imports. Increase over the preceding year.	Exports. Increase over the preceding year.
	£	£	£	£
1914 ...	3,146	3,002	...	...
1915 ...	4,220	4,249	1,074	1,247
1916 ...	6,412	6,488	2,192	2,239
1917 ...	8,137	8,720	1,725	2,232
1918 ...	*9,183	*9,584	1,046	864
1919 ...	†13,164	†13,235	3,981	3,651

The aggregate trade for the year 1919 was therefore £195·9 millions, against £153·5 millions in 1918 and £81·9 millions in 1914, an increase of £42·4 millions over 1918 and of £114 millions over 1914.

Bullion and Specie.—The figures for Bullion and Specie in thousands of pounds sterling for the last six months of the year were:—

Imports.	Exports.
£	£
6,552	2,738

Distributed according to classes the foreign trade records in thousands of pounds sterling are as follows:—

	Imports.		Exports.	
	1918.	1919.	1918.	1919.
	£	£	£	£
1. Live Animals, Foods, Drinks and Narcotics	28,819	34,901	22,861	26,659
2. Raw Materials	37,826	44,767	40,441	60,112
3. Manufactured and partly Manufactured Articles	14,973	16,996	8,620	12,547
TOTAL ...	81,618	96,664	71,922	99,318

The figures in all classes exceeded those of the previous year, as prices were on the whole much higher than they were in 1918.

Excluding Gambier the volume of Straits Produce shipped was more than in 1918.

* Excluding Coin and Bullion. † Coin and Bullion included for second half of 1919 only.

andronicus

Articles of Straits Produce except Tin and Borneo Rubber gave larger average prices.

Tin.—The imports of tin and tin ore were in 1919, 179,000 and 1,038,000 pikuls, respectively, as against 85,000 and 1,059,000 pikuls, respectively, in 1918 as shown below:—

	1918.		*1919.*	
	Tin.	*Tin Ore.*	*Tin.*	*Tin Ore.*
	Pikuls.	*Pikuls.*	*Pikuls.*	*Pikuls.*
Malay States ...	78,000	776,000	133,000	686,000
Netherlands Indies	...	50,000	38,000	113,000
Siam ...	7,000	192,000	6,000	207,000
Other Countries ...	...	41,000	2,000	32,000
Total ...	85,000	1,059,000	179,000	1,038,000

The exports of tin in 1918 and 1919 were as follows:—

	1918.		*1919.*	
	Pikuls.	*Value.*	*Pikuls.*	*Value.*
		$		$
United Kingdom	175,000	27,425,000	324,000	41,347,000
United States of America ...	578,000	89,944,000	454,000	59,928,000
Other Countries	172,000	26,249,000	219,000	27,445,000
Total ...	925,000	143,618,000	997,000	128,720,000

Para Rubber.—The imports of Para Rubber in 1918 and 1919 from the following countries were as follows:—

	1918.		*1919.*	
	Pikuls.	*Value.*	*Pikuls.*	*Value.*
		$		$
Malay States ...	1,351,000	95,832,000	1,412,000	132,093,000
Netherlands Indies...	328,000	22,355,000	456,000	37,089,000
Other Countries	59,000	4,115,000	79,000	6,623,000
Total ...	1,738,000	122,302,000	1,947,000	175,805,000

ublishing company, inc.

The exports of Para Rubber in 1918 and 1919 to the following countries were as follows:—

	1918.		1919.	
	Pikuls.	*Value.*	*Pikuls.*	*Value.*
	—	—	—	—
		$		$
United Kingdom	159,000	13,338,000	406,000	44,088,000
United States of America ...	1,334,000	113,971,000	2,310,000	230,511,000
Other Countries	348,000	27,250,000	254,000	24,227,000
Total ...	1,841,000	154,559,000	2,970,000	298,826,000

It will thus be seen that there was a small increase in quantity of tin exported in 1919; but on the other hand the value decreased by over 14 million dollars.

As regards Para Rubber, both Imports and Exports showed large increases in quantity and value as compared with the previous year. The value of imports increased by over 53 million dollars and that of exports by over 144 million dollars.

Imports.

In "Foodstuffs, drinks and narcotics," increased values are seen under the sub-heads animals, coffee, rice, fish, dry and salted, beans and peas, bran, wheat flour, milk, sago flour, black pepper, white pepper and sugar.

Under the heading "Raw Materials," enhanced values appear in tin, copra, gutta inferior, para rubber, illipi nuts, petroleum and kachang oil, while decreased import values are apparent in tin ore, wolfram ore, coal and ground nuts.

In the "Manufactured Class," sarongs, slendangs and kains, gunnies, silk piece goods, machinery, ironware, motor cars, motor cycles and accessories, tin plates and woodenware show increased values, but cotton piece goods, chemicals and soap fell in values.

In quantities imported there was an increase under coffee, fish, dry and salted, beans and peas, bran, wheat flour, arrack and samsoo, milk, sago flour, tin, copra, para rubber, illipi nuts, lubricating oil, petroleum and steel.

Declines in quantity are most noticeable in rice, salt, sugar, ground nuts and cotton piece goods.

EXPORTS.

Exports of the following show increased values:—

"Foodstuffs, drinks and narcotics"—

Coffee, fish, dry and salted, preserved pineapples, beans and peas, bran, wheat flour, cigars and cigarettes, milk, sago flour, black and white pepper and tapioca.

"Raw Materials"—

Copra, gutta inferior, illipi nuts, gutta percha and para rubber.

"Manufactured Class"—

Cotton piece goods, sarongs, slendangs and kains, gunnies and yarns, while decreases are apparent in—

"Foodstuffs, drinks and narcotics"—

Rice and Persian opium.

"Raw Materials"—

Tin, wolfram ore and ground nuts.

"Manufactured Class"—

Chemicals and cement.

The quantities of coffee, fish, dry and salted, preserved pineapples, beans and peas, bran, wheat flour, arrack and samsoo, milk, sago flour, tapioca, copra, para rubber, illipi nuts and cotton piece goods show an increase.

A decrease in volume is recorded of rice, prepared chandu, sugar and ground nuts.

TRADE BY COUNTRIES.

The following statement shows the position of the Colony in the years 1918 and 1919 as a market for British, European, American, Japanese and other foreign goods.

(The value of the trade in merchandise with the United Kingdom, Continent of Europe, United States of America, and Japan is shown in thousands of pounds sterling.)

		Imports.		*Exports.*	
		1918.	*1919.*	*1918.*	*1919.*
		£	£	£	£

Japan		5,880	4,165	3,143	2,963

blishing company inc

The articles which gave the largest increased values from the United Kingdom were hardware and ironware including cooking utensils, yarns, steel, paper and stationery, linseed oil, canvas, paints, machinery including electrical goods, biscuits, tin plates and cotton handkerchiefs, sarongs, slendang and kain.

The articles showing declines in values from the United Kingdom were cotton piece goods, cigars and cigarettes, whisky, malt liquors, India rubber goods including tyres and brandy.

From the United States of America increases in imports are seen in machinery, wire nails, tinned provisions including fruits, milk, drugs and medicine, petroleum, playing cards, rubber tyres, paper and stationery, beer and ale, paints, tools and implements, lubricating oil, motor cars and accessories, tramway and railway materials, tin plates and apparel and decreases in cigars and cigarettes, corrugated iron, woodenware and iron bar.

From Japan the following show advances in imports:—

Tin plates, India rubber goods, silk piece goods, milk, canvas and cabinet and woodenware, while coal, matches, chemicals, paper and stationery, paints, hats and caps, cotton piece goods, fish, dry and salted, apparel, beer and ale and cement show a decline.

Exports to the United Kingdom showed advances in such articles as gutta percha, gum copal, tin, sago, black and white pepper, tapioca, copra, para rubber, hides, preserved pineapples, illipi nuts, rattans, shells and coffee, but decreases took place in gambier, wolfram ore, coconut oil and isinglass.

In our Exports

to France—sago, black and white pepper, gambier, copra, para rubber, hides, gum copal, shells, illipi nuts, coconut oil and coffee,

to Italy—Sago, black and white pepper and copra,

to Denmark—black and white pepper, copra and coconut oil,

all advanced, declines being seen in tin, tapioca and wolfram ore to France, tin, para rubber and coconut oil to Italy, and coffee to Denmark.

The principal exports to Belgium were sago, copra, illipi nuts and coconut oil, and to Holland copra, tin and sago, whilst copra was also the principal article exported to Spain and Sweden.

Exports to the United States advanced in values of tapioca, jelutong, gutta percha, para rubber, hides and gum copal, but tin, copra, rattans, black and white pepper fell in values.

Exports to Japan showed increases in values of raw cotton, phosphate of lime, para rubber, tin, rattans, hides cutting and gunnies, while declines are seen in shells, copra, opium, goats' skins, sugar, tapioca flour and sago flour.

There was a rise in the total value of exports to Siam and the Siamese States, Malay States, French Indo-China, Hongkong and China, North Borneo and Sarawak, British India and Burma, but Australia and New Zealand and Netherland Indies showed decreases.

BANKRUPTCY.

There were only 11 trade bankruptcies, 7 in Singapore, 2 in Malacca and 2 in Penang, with total estimated liabilities of $195,108.

No deeds of arrangement were registered.

AGRICULTURE.

During 1919 the shipping difficulties of the previous year, which had resulted in the accumulation of considerable stocks of rubber, and the consequent low price obtainable, were in part remedied and the outlook became far more promising. It was no longer found necessary to restrict output, prices continued to rise, and in the last quarter of the year there was a very marked improvement though the cost of production has continued higher. The condition of estates has been good and no serious outbreaks of disease have been recorded.

Copra prices were considerably higher than those of the previous year and continued steadily to increase. The stocks that had accumulated by the end of 1918 owing to the low prices then obtaining which did not permit of export, were practically all disposed of.

The plantations have been well looked after and the only serious pest reported was the Caterpillar pest *Brachartona Catoxantha*, which occurred on coconut trees in one locality in Province Wellesley. It was controlled by natural enemies and eventually disappeared. Canker continues to be restricted to small areas only.

Tapioca continues to be grown as a cover crop in young rubber. This and various food crops have been cultivated in large areas on estates during the year and the area actually under such foodstuffs has been considerably greater than that actually required under the Ordinance to promote their cultivation.

Vegetable production is confined mostly to the Chinese, though a certain amount was undertaken during the year by means of Municipal and Public Works labourers.

The first main fruit crop was a failure in many parts, but the second crop was somewhat better though even at that time there appears to have been very little fruit in Malacca. Prices have increased considerably and indicate a great scarcity of fruit.

Rice.—There has been a considerable increase in the area under cultivation in all parts of the Colony and the high prices obtainable have given considerable acreages to padi growing. The 1919-1920 crop appears generally to be very promising. Considerable areas have been planted up with hill padi and ragi, though there has been a certain amount of failure, due mainly to unsuitability of land and previous inexperience of padi growing. Pests have also done damage in some parts—much of which could be prevented if cultivators would keep their land under close observation and treat such pests in the early stages.

This year saw a change in the administration of the Department. It was decided that supervision by the Director of Gardens, Straits Settlements, was no longer suitable for the growing needs of the Colony while these duties interfered with the Director of Garden's proper activities. Arrangements were accordingly made to amalgamate this Department with that of the Federated Malay States and the Director of Agriculture is now in charge for both the Straits Settlements and Federated Malay States. At the same time a greatly increased local staff has been authorised though it had not been found possible at the end of the year to fill many of the appointments.

LAND.

The Revenue was thus distributed:—

—		Land Revenue.	Reimbursements.	Land Sales.	Total.
		$	$	$	$
Singapore ...	1918	226,575	8,958	394,954	630,487
	1919	256,449	12,109	152,944	421,502

Labuan ...	1918	2,885	501	83	3,469
	1919	2,692	524	36	3,252
Total...	1918	876,846	51,497	522,501	1,450,844
	1919	954,731	57,415	358,743	1,370,889

SINGAPORE.

There was very little alienation of land and quit rents remained practically stationary. There was a considerable increase in temporary rents. Rents were collected without much difficulty, there was no quit rent in arrear and no land reverted to Government or was auctioned for non-payment of rent.

The attractions of rubber dealing apparently increased as there was an increase of about 50 per cent in the revenue from rubber dealers' licences.

The Rubber Lands Restriction Ordinance remained in force until the end of August, and there was no sale of country land of any importance. In February 27,809 square feet of land with frontage on Cecil Street forming part of the old Telok Ayer Reclamation was disposed of by auction and realised a little over $129,000 and in November three building allotments fronting Tras Street fetched an average price of $3.63 per square foot.

The decision to widen Robinson Road to 70 feet and the fact that the Chamber of Commerce did not come to a decision as to the most suitable site for an Exchange Building in this street prevented the sale of any other portions of the old reclamation. Tenders were however invited for 30-year leases of a portion of the new reclamation and

the best tender that of the Federated Malay States Government was accepted for an area of about 7 acres.

Eighty-three Statutory Grants were issued of which two were grants issued on the conversion of 99-year leases and twenty-one on the subdivision of existing titles. Owing to pressure of work in the Survey Office no further applications for the conversion of 99-year leases were entertained.

Municipal Back-lane Schemes gave no trouble during the year but the acquisition of the lands required for a Chinese Cemetery was responsible for two Court cases. In one the Collector's offer was upheld, in the other when an offer of $300 an acre was made on a claim for $1,000 an acre the Court awarded $325.

In litigation arising out of the construction of the embankment between the East Reclamation, Tanjong Pagar, and Telok Ayer Reclamation the Government had a substantial measure of success and before the end of the year a settlement of this old controversy had been arrived at. In the latter part of the year acquisition work was extremely difficult and a number of Government cases were outstanding at the end of December.

In accordance with the recommendations of a Committee on open spaces the land known as Dickinson Hill was acquired at a cost of $92,000, and an area of 96,489 square feet adjoining Cantonment Road was purchased for $57,893.40 to round off a park provided by the Singapore Harbour Board while terms have been settled for the purchase of about 9½ acres of land near Jalan Besar for a public park and a recreation ground for Victoria Bridge School. At the beginning of the year the Government purchased at auction the property known as Mount Rosie for $65,000. and an area of about 16 acres of land fronting Scotts Road and Bukit Timah Road was secured privately for $71,826.50 which was subsequently extended by a number of smaller purchases on behalf of the Federated Malay States Railways. Another important purchase was that of about 50 acres of land at Thomson Road for $77,000.

In the second half of the year the land market was highly speculative and the number and magnitude of the transactions were considerably in excess of those of the land boom of 1902-1903. Towards the end of the year the market had steadied but even higher prices were paid for land and buildings in favoured localities.

North-east District ...	46,244 50	3,914 00	2,457 50	52,616 00

Land revenue decreased by $432.26 owing to the reduction of rent on Messrs. KENNEDY & Co.'s lease and a lower rent for stone and red earth quarries. There were ten applications for Crown Land. Two applications were granted, three refused and five were under consideration at the end of the year.

The Survey Office Staff were unable to keep pace with the number of applications for subdivisional surveys and re-surveys.

Action on thirty of the seventy-eight applications was completed during the year.

Thirteen thousand six hundred and seventy deeds were presented for registration as against eight thousand five hundred and seventy-one in 1918. The increase in the number of deeds is due to several transactions in the land market during a local land boom.

The last fruit season was a poor one.

PROVINCE WELLESLEY.

The Revenue collected in 1919 was as follows:—

	$ c.
Land Revenue	80,385 91
Reimbursements	7,232 19
Land Sales	1,530 25

Land Rents in Province Wellesley remained practically the same in 1919 as in 1918.

Only 18 acres and 16 poles were alienated during the year and the premium collected amounting to $1,414.

The padi harvest was poor owing to the long drought and influenza.

MALACCA.

Receipts on account of rents on Grants and Leases and assessment under the Malacca Lands Ordinance amounted to $453,251 in 1919 as against $412,931 in 1918.

ALIENATION OF LAND.

The area of Crown Land alienated, and the number of Statutory Grants issued during the last five years together with the amount of premia paid in respect of the same, are shown in the following table:—

FORESTS.

No change was made in the area of reserved forests, which remains at 106,013 acres, equivalent to about 11 per cent of the lands in the Colony. An addition of about 1,260 acres was proposed, and will shortly be gazetted.

Revenue and expenditure were $65,754 and $34,064, compared with $35,479 and $33,576 respectively in 1918, and the surplus of $31,690 exceeds by $29,787 the largest surplus recorded since 1904. This result is due to the high prices paid for mangrove coupes in Singapore, to the premia paid in Malacca on account of timber standing on newly alienated land, and to the increased exploitation of timber from the reserves in Penang and the Dindings. As very little Crown Land is left in Malacca, such a large surplus must not be expected in the future.

The total out-turn of timber was 9,055 tons and of fuel 32,526 tons. The other principal revenue-producing items are rubber, granite, canes, and tan-barks.

It is estimated that over 2,000,000 mangrove seedlings were planted out in Penang and the Dindings. The results are reported to be good and the expenditure was confined almost entirely to the purchase of the seedlings, most of the planting work being done free of cost either by the subordinate staff or by the holders of permits to take timber and fuel from the reserves.

There were 42 breaches of the forest laws, of which 18 were dealt with in Court and 24 compounded. Of the former, 3 were acquitted and the remainder punished by the infliction of fines amounting to $68 in addition to $43 paid to the department for damage to the forest. In the compounded cases compensation of $369.60 was demanded, of which $21 still remain to be paid.

No further progress was made with the amalgamation of the forest departments of the Colony and of the Federated Malay States owing partly to the want of officers and partly to the fact that sanction has not yet been accorded by the Secretary of State to the Conservator's scheme of reorganization.

REGISTRATION OF DEEDS.

The number of deeds presented for registration in Singapore was 6,561 as compared with 4,523 in 1918, and the number of deeds finally registered, 5,915, as against 4,377 in 1918. Conveyances and Assignments accounted for 3,367, Mortgages for 1,506, and Reconveyances for 1,157. Revenue amounted to $21,650.20. The Registration of Deeds Ordinance, 1915, is not in force in the Settlement of Malacca.

publishing company inc

RAFFLES MUSEUM AND LIBRARY.

The purchases during the year have been few and comparatively unimportant, as little was brought in that was not already represented in the Collections. One cause may be that native collectors of curios have found it more difficult to travel in view of passport regulations and increased passage rates. Among the more interesting donations was a Dyak woman's corsage of brass wire and rattan presented by His Excellency Sir ARTHUR YOUNG, G.C.M.G., and Lady EVELYN. A large bronze medal awarded to the Raffles Museum and Gardens at the Melbourne Exhibition 1875 and lost for many years was found at Bedoh, Singapore, by Mr. JANTAN BUSU who returned it to the Museum. Miss BROWN presented a collection of Coins and Medals, the Hon'ble W. G. MAXWELL, C.M.G., a gold coin from Rhio and Mr. LEE WARNER some silver coins from Southern Arabia. A silver medal struck to Commemorate the investiture of the Prince of Wales at Carnarvon was presented by Her Majesty the Queen and an Iron Cross (Second Class) by Lieut. A. S. HARRISON, R.F.A.

Probably the most interesting exhibit acquired during the year was a fragment of the large inscribed stone that stood at the mouth of the Singapore river. Many attempts have been made to decipher the writing which is believed to be Pali. This fragment is the property of the Indian Museum, Calcutta, and is placed on indefinite loan in this Museum.

Dr. A. ANNESLEY WOODS presented two sets of old leg irons from Seremban, one weighing 8 and the other 17 lbs.

The collection of Postage Stamps made great progress during the year, the Government having presented the sample stamps received during many years from other countries within the Postal Union. Many interesting portraits were added to the collection of photographs started in 1918. The roof of the old Museum building was completely renewed, and Marseilles tiles substituted for slates.

The number of books purchased were 546 at a cost of $2,867. The number of subscribers to the Library increased to 589 as against 555 in 1918 and the receipts by subscriptions, etc., rose from $4,462 to $4,641.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 18,885,183 as compared with 13,064,270 in 1918.

Statement showing combined Arrivals and Departures of Merchant Vessels for the Years 1918 and 1919.

										Net Increase ...		5,820,913

In the last five years the combined arrivals and departures of merchant vessels have been as follows:—

In 1915	...	...	20,896,952 tons.
1916	...	...	19,528,671 ,,
1917	...	...	15,784,369 ,,
1918	...	...	13,064,270 ,,
1919	...	...	18,885,183 ,,

In the small craft (steamers under 50 tons and native vessels) the combined arrivals and departures were 63,770 in number and 2,566,091 in tons in 1919 as compared with 50,840 and 2,338,771, respectively, in 1918.

Twelve new steamers with a tonnage of 2,580 tons gross and 37 sailing vessels of 3,026 tons were registered during the year under the Imperial Shipping Acts. Under the Merchant Shipping Ordinance, 1910, sixteen new sailing vessels of 1,364 tons were licensed under section 425, and 713 vessels of 10,575 tons were registered under section 426.

LEGISLATION.

1. The Ordinances passed during the year 1919 were 42 in number, including two Supply Ordinances. Twenty-five of these are amending Ordinances.

2. The most important of the Ordinances which are not amending Ordinances are:—

(i) The War Tax Ordinance, (No.3) reproducing the expired War Tax Ordinance, 1918, and imposing a tax on incomes of $3,000 and more per annum for the purpose of providing a contribution to the Imperial Government towards the expenses incurred in the prosecution of the present war.

(ii) The Change of Names Ordinance, (No. 5) which prohibits any person, who is not a natural born British Subject, from changing his surname after the 4th day of August, 1914, except with the permission of the Governor in Council.

(iii) The Trade Marks Prohibition Ordinance, (No. 8) prohibiting the representation on trade marks of the Royal Arms, the National flags, or the flags of any of the British Dominions, or any colourable imitation of such arms or flags, unless such representation is authorised by Royal Warrant or by Order of the Governor in Council or is on a trade mark which is registered in the Register of Trade Marks kept under the Trade Marks Act, 1905.

(iv) The War Loan (Conversion Loan) Ordinance, (No. 10) which provides for the issue of bonds payable to bearer in exchange for the bonds issued under the authority of the War Loan Ordinance, 1916.

(v) The Termination of the War (Definition) Ordinance, (No. 13) which provides that the date of the termination of the war for purposes of the Emergency legislation operative in the Colony shall be the date which is fixed by His Majesty by Order in Council under the determination of the Present War (Definition) Act, 1918.

(vi) The Indemnity Ordinance, (No. 17) which indemnifies all persons in respect of any acts done by them in good faith while martial law was in force in the Settlement of Singapore.

(vii) The Food Production Ordinance, (No. 19) designed to compel and encourage the production of local foodstuffs in order to supplement the anticipated shortage of rice.

(viii) The Former Enemy Aliens Admission Ordinance, (No. 28) which provides that no former enemy alien may enter or remain in the Colony without a permit signed by the Colonial Secretary. This Ordinance remains in force for a period of three years.

3. The principal amending Ordinances are:—

(i) The Sale of Food and Drugs (Amendment) Ordinance, (No. 2) which empowers

(*a*) The Governor in Council to make regulations

(1) prohibiting the importation of specified articles which are either dangerous or unsuitable as articles of food or medicine;

(2) requiring the poisonous ingredients of patent or proprietary medicines to be disclosed at or prior to the sale of such medicines; and

(*b*) empowering any officer within the meaning of the principal Ordinance to take samples of milk in the course of delivery from the vendor to the purchaser and of any other article of food at the place of delivery upon the request, or with the consent of, the purchaser.

(ii) The Increase of Rent (War Restriction) (Amendment) Ordinance, (No. 4) which explains that a house let as a dwelling-house does not include a house let chiefly for purposes of business.

(iii) The Board of Education (Amendment) Ordinance, (No. 7) which increases the Education rate from 1 per cent to 2 per cent of the annual value of all property rateable under the Municipal Ordinance, 1913. This increase is required to pay increased grants-in-aid to Non-Government Schools and to contribute towards the upkeep of the proposed Free Elementary English Schools.

(iv) The Civil Procedure (Amendment) Code Ordinance, (No. 15) enabling Writs of Summons issued in the Colony to be served in the State of Johore and service of such Writs in that State to be proved in the manner in which service of such Writs in the Federated Malay States is proved.

(v) The Straits Settlements Ports (Amendment) Ordinance, (No. 16) which permits the establishment by the Singapore and Penang Harbour Boards of a Superannuation Fund, which will be distinct from the Joint Provident Fund to be established by the two Boards. The Superannuation Fund is for the benefit of subordinate officers and servants who are in receipt of salaries less than a sum to be fixed by the Regulations. The Joint Provident Fund is for the benefit of the officers and servants who are in receipt of salaries exceeding that sum.

(vi) The Currency Note (Amendment) Ordinance, (No. 21) which empowers the Treasurer to destroy forged or counterfeit notes on presentation at the Treasury and gives him discretion to grant or refuse compensation to the holder thereof. The previous practice was to stamp the words "Forged" or "Counterfeit" on forged or counterfeit currency notes.

(vii) The Naturalisation (Amendment) Ordinance, (No. 24) which gives the Governor in Council power to revoke local certificates of naturalisation similar to the power given by the Imperial Act to any of His Majesty's Principal Secretaries of State to revoke certificates of Imperial Naturalisation.

EDUCATION.

The expenditure on the eight Government English schools was $194,811.36, on the 45 aided schools (English, Anglo-Tamil, Malay, Tamil and Chinese) $234,535.48 and on the 193 Government vernacular schools $174,475.06.

The Malacca Training College for Malay Teachers continued to do good work. Its cost, during the year under review, was $21,569.53.

The numbers in Secondary Classes show an increase of 8 over the figures for 1917. The Normal Classes continued their work during the year, and 27 Normal Class Certificates were issued.

The Department was still very shorthanded. One master retired, while on furlough, on account of ill-health. No new masters had arrived before the end of the year.

The Committee appointed to make recommendations as to what permanent form of educational memorial should mark the Centenary of Singapore sent in its report in due course. The proposal is to found an institution for higher education to be known as Raffles College, and to reorganise the work and curriculum of the schools. The Government of the Straits Settlements has promised a donation of $1,000,000 towards building the College, and has undertaken to contribute $50,000 annually towards its maintenance. Generous help has been promised by the Governments of the Federated Malay States and Johore, and handsome subscriptions have been received from merchants and others.

To ensure the success of the College it is necessary, as recommended by the Committee, to raise the present level of the schools. For this, Training for Teachers is required, and a sufficient and competent European staff.

The present schools are crowded and steps are being taken to provide new schools.

Approval has been given for two new appointments:—(1) a Chief Inspector of English Schools, who will supervise the work of all Secondary Classes in the Colony and the Federated Malay States and (2) an Inspectress of Schools, who will be in charge of the Elementary work of the Girls' schools.

Progress was made with the preparation of the new series of modern Malay text-books for the Malay Vernacular schools. An advanced Teachers' Arithmetic, four new Readers and a Guide to Malay Letter-Writing were printed during the year; and a Physical Geography and a Malay Dictionary for Malays were nearly completed for the press.

Further progress was made with Basketry, and it is now taught by many Trained Teachers in the Malay village schools.

A Lady Supervisor for Malay Girls' Schools arrived towards the end of the year.

The building of a Central Training College for the Malay Teachers of the Colony and the Federated Malay States was commenced in Perak. As soon as it is erected and staffed, elementary botany and agriculture will be taught in all Malay village schools.

THE SUPREME COURT.

The Court of Appeal sat at Singapore on the 10th June and 25th November disposing of 32 Appeals from the Supreme Court of which 27 were dismissed.

In Penang the same Court sat from the 25th February to the 4th March and from the 12th to the 26th August dealing with 16 Appeals and 2 Criminal Appeals.

In Singapore 47 Criminal Appeals from Magistrates' decisions were entered of which 24 were dismissed.

In Penang 44 were so entered and 32 were dismissed.

In Malacca there were 6 appeals against the decisions of the District and Police Courts. Four were dismissed.

In Singapore 639 Civil Suits were instituted as against 618 in 1918 and 470 in 1917. In Penang and Malacca 479 and 139, respectively, were entered.

Sixty-eight Bankruptcy petitions were filed in Singapore as against 65 in 1918 and 67 in 1917.

In Penang 17 petitions were filed as against 23 in 1918 and 44 in 1917. Two were presented in Malacca.

The fees received were as follows:—

		1917.		*1918.*		*1919.*	
		$	c.	$	c.	$	c.
Singapore	...	25,298	95	42,422	90	31,857	60
Penang	...	16,044	40	15,707	05	16,825	50
Malacca	...	4,154	05	4,859	95	5,006	40

POLICE.

The total strength of the Force at the end of the year was 2,727 which was distributed as follows:—

Singapore and Christmas Island ...	1,269
Penang, Province Wellesley and Dindings	1,026
Malacca	347
Labuan and Brunei	85
The authorized strength of the Force was	2,893

The European ranks depleted by the war were made up to strength in the latter part of the year. Recruits for the Malay and Indian Contingent came forward fairly freely in all the Settlements but the men offering were for the most part of a poor type. Recruiting for the Sikh Contingent has for the moment practically come to a standstill.

The excessively high casualties, 412, due chiefly to dismissals and resignations make it extremely difficult to keep the Force up to strength, and affects its efficiency.

There was a slight increase in the number of minor offences against discipline in Singapore and Labuan and a reduction in Penang and Malacca, the total being 3,466 as against 3,160 in 1918; the more serious offences show a reduction. There was however an increase in the number of cases of intoxication. There were 35 cases, which is 18 more than 1918.

The health of the Force was not so good as during 1918, and in Penang there was a serious out-break of Malaria amongst the Sikhs quartered in the fort. Malaria, venereal diseases and injuries of various kinds accounted for most of the admissions to hospital. The admissions were 2,382 as against 1,716 in 1918, an increase of 666.

Gambling was fairly active in Singapore and in Penang, but the Prevention of Gambling Department is being strengthened to deal with the nuisance.

The cost of the Department was $1,018,793.84.

The returns of the more serious offences reported are:—

			1918.	*1919.*
Murder	...	...	31	31
Gang robbery	...	...	32	31
Robbery	...	...	129	131
House-breaking	...	...	405	423
Theft	...	...	2,370	2,325

The total number of cases in which arrests were effected with or without warrant in the Colony during the year was 17,735, compared with 19,087 in 1918. 171 cases were sent for trial before the Supreme Court as against 162 in 1918.

Three hundred and fourteen persons, mostly habitual criminals, were banished during the year.

PRISONS.

Criminal Prisons.—At the beginning of the year there were 799 prisoners in the four Criminal Prisons of the Colony (Singapore, Penang, Malacca and Labuan); 4,235 were admitted and 4,158 discharged during the year; and 876 remained at the end of the year.

There were only 30 prisoners of the "habitual" class in prison at the end of the year.

Prison offences showed an average of 1 per annum per convict as against 1·1 in the preceding year.

The number of "Middle-Grade" convicts—the men available for industrial labour was 143 in 1919, 134 in 1918, and 150 in 1917. The "Upper-Grade" men (56 in number) are mostly employed as cooks, orderlies, clerks, etc., the "Lower-Grade" men at stone-breaking and the "Short Sentence" and "Revenue Grade" men at stone-breaking, husk-beating and fatigue-duties.

There were seven executions (five in Singapore, one in Penang and one in Malacca) in pursuance of sentences of the Supreme Court.

Civil Prisons.—There were 126 occupants of the Civil Prisons of the Colony at the beginning of the year: 5,585 were admitted and 5,555 discharged during the year; and there remained 156 at its end.

Houses of Detention.—In these buildings, which are part of the Civil Prisons, there were 49 vagrants at the beginning of the year and 56 at the close of the year: 595 were admitted and 588 discharged. Of this last number 43 found employment and 488 were repatriated.

General.—The health of the Prison has been satisfactory. The sanitary condition of the Prison has been further improved by the extension of the flush sewerage system to the Hospital and Civil Prison. There were no cases of beri-beri and enteric fever. A few mild cases of influenza were admitted to Hospital. Five cases of scurvy were treated. The history given by these men was that they had not eaten their daily ration of vegetables for some time because the kind of vegetable supplied did not appeal to their taste. An extra ration of more varied vegetables was supplied to all prisoners and no fresh cases occurred. Dysentery accounted for 28 admissions with 9 deaths, against 47 in 1918 and 74 in 1917. There were 582 admissions to Hospital and the average daily number of sick was 30, against 707 and 38 in 1918. No Europeans and Eurasians were admitted to Hospital. Eleven Long Sentence, 7 Short Sentence, 3 Revenue Grade, 1 Civil Prisoner and 8 Vagrants died—making 30 deaths out of a total Prison population of 7,661, giving a death-rate of 3 per thousand. The eight vagrants who died were all in very bad health when admitted and their deaths occurred soon after their admission to the House of Detention.

The total expenditure of the department was $295,837.64, and its revenue $6,186.09 besides which articles to the value of $2,784.32 were supplied to Government departments.

VITAL STATISTICS.

The number of births and deaths registered during the year was 25,638 and 27,957, respectively. The figures for the preceding year were 23,701 and 36,294.

The estimated population of the Colony was 846,083. It was estimated at 827,719 in 1918, and ascertained in 1911 (the year of the Census) to be 711,951.

The birth-rate increased from 28·64 to 30·30 per mille. Against this the death-rate has decreased. The rate was 46·45 in 1911, 39·01 in 1912, 34·93 in 1913, 34·13 in 1914, 29·15 in 1915, 30·70 in 1916, 36·98 in 1917, 43·85 in 1918 and 33·04 per mille in the year under review.

The principal causes of death were malaria (4,623 cases), infantile mortality (5,848), influenza (176), tuberculosis (1,778), beri-beri (1,430), dysentery (1,171) and pneumonia (1,415). (It is probable many of the deaths were due primarily to Influenza).

Dangerous infectious diseases notified in the Colony during the year caused 165 deaths from small-pox, 65 from cholera and 16 from plague. The corresponding figures in 1918 were 55, 68 and 204. Cerebro-Spinal Fever accounted for 18 deaths.

At Malacca an interesting "Wang Kang" ceremony took place in the autumn. A miniature boat (Wang Kang) was built and housed in a temporary temple at Banda Hilir until the appointed day in December, when it was dragged to the foot of St. John's Hill and burnt. This ceremony arose out of the influenza epidemic of 1918, and the underlying idea is propitiation of a deity who has become evilly disposed from neglect. It is thirty years since a similar ceremony was held in Malacca.

IMMIGRATION.

(I).—Chinese.

Seventy thousand nine hundred and twelve immigrants arrived from China, an increase of 21·4 per cent as compared with the figure for 1918, and a decrease of 73·6 per cent as compared with that for 1911 which showed the highest number yet recorded.

As compared with the average for the previous ten years, 1909 to 1918, the number arriving in 1919 shows a decrease of 60 per cent.

Adult males formed 62·4 per cent and adult females 19·5 per cent of the immigrants.

Unfavourable exchange rates with China and reports as to the high cost of living in the Straits due to the high price of rice and other foodstuffs used by the Chinese discouraged immigration during the year; other adverse influences were the institution of regular steamship communication between China and the Netherlands Indies and the continuation of immigration *viâ* Bangkok free from inconvenient restrictions.

There is no indentured labour in the Colony.

(II).—SOUTHERN INDIAN.

The total number of immigrants (deck passengers) arriving at Penang from Southern India during the year was 101,433, as compared with 65,291 in 1918.

The number of Indians leaving the Colony for Southern India was 46,767, as against 52,132 in 1918.

The figures for arrivals for the last four years are as follows:—

	1916.	*1917.*	*1918.*	*1919.*
Assisted immigrants *	72,091	78,407	55,583	88,021
Other immigrants ...	23,475	11,670	9,708	13,412
Total ...	95,566	90,077	65,291	101,433

The assisted immigrants consisted of 78,910 adults and 9,111 minors. Of the adults 62,006 were men and 16,904 women.

The health on estates in Penang, Province Wellesley and the Dindings was very satisfactory during the year, the death-rate in Province Wellesley being 15·92 per mille and in the Dindings 8·34 per mille. Among the 286 labourers employed on estates in Penang, the death-rate was 3·59 per mille.

During 1919, 751 adult and 147 minor decrepit and destitute Indians were assisted with a passage back to India.

The rate of assessment to the Tamil Immigration Fund was $2 for the 4 quarters of the year 1919. The income of the fund was $1,698,084.77 and its expenditure $1,597,387.65.

(III).—NETHERLANDS INDIAN.

The number of Netherlands Indian labourers on estates in the Colony is 2,439. No contracts under the Netherlands Indian Labourers' Protection Ordinance, 1908, are in force but approximately 477 local contracts for 300 days are in force in Province Wellesley.

* "Assisted immigrants" are of two classes:—(i) the independent labourer who gets a free ticket from the Emigration Agent in India upon proof that he is a *bonâ fide* labourer, and who is free to work where he pleases; (ii) the Kangany labourer, who is recruited in India by a licensed Kangany, and who goes to a particular place of employment, though he is free, upon arrival there, to give a months' notice of his intention to leave. There is no indentured Tamil labour in the Colony.

CHINESE PROTECTORATE.

Generally speaking the Chinese Community has had a very prosperous year, although the lower and middle classes are feeling acutely the rise in the cost of living and the high rate of exchange with China.

In connection with the anti-Japanese boycott riots occurred in Singapore and Penang in June; in Penang the situation was rendered more serious owing to dissatisfaction regarding the high price of rice.

A new society calling itself the Patriotic League gave a certain amount of trouble during the year.

An anarchical society called the Chan She (Truth Society) which is affiliated to the Communist San She (New Society) of Canton is also at work in the Colony.

METEOROLOGICAL.

The rainfall recorded was as follows:—

	1919.
Singapore	2458·50 m. m.
Labuan	2761·05 ,,
Penang	2365·00 ,,
Province Wellesley ...	1919·75 ,,
Malacca	2310·00 ,,
Dindings	1507·50 ,,

The mean temperature of the air throughout the year was 82·5. The maximum recorded was 95·0° in Penang on March 8th, 11th and 12th and 8th April, and 94·0 in Malacca on March 17th and 19th. The maximum in Singapore was 93·5 on 19th June, 1919. The minimum was 71·5 on 25th February, 1919 and 18th December, 1919 in Singapore.

POST AND TELEGRAPH DEPARTMENT.

The number of postal articles (excluding parcels) posted in the Colony was 13,182,061, an average of 15·58 per inhabitant, as against 13·84 the average in the previous year. The number received for delivery was 9,355,950, as compared with 8,642,343 in 1918. The number of messages transmitted over the Government telegraph lines increased from 408,242 to 497,843 and the number of subscribers to the Government telephone exchanges from 846 to 891.

The amount at the credit of depositors in the Government Savings Bank on the 31st December, 1919, was $1,488,266.68, an increase of 24 per cent as compared with

the amount on December 31st, 1918. The average amount at the credit of each depositor was $184.60. There was a profit on the year's working of $28,390.20. The estimated present value of the investments is $1,569,680.28.

Money Order and Postal Order transactions amounted in value to $5,796,000, a decrease of $474,000.

In addition to the General Post Office, Singapore, and the Chief Post Offices at Penang, Malacca and Labuan, there are 28 Sub-Offices in the Colony, including the Railway Post Offices at Durian Tunggal (Malacca) and Jarak and Kreh (Province Wellesley). Of these 20 are telegraph offices.

GOVERNMENT MONOPOLIES.

Opium.—During the year 4,044 chests of opium (Indian and Persian) were cooked at the Factory. On 28th October, the retail price of chandu was raised from $10.50 to $12.50 per tahil in Singapore, Penang and Malacca and from $6.50 to $8.50 per tahil in Labuan. The sale price in Christmas Island at the close of the year was still $5.50 per tahil. The chandu sales in the Colony (including 6,600 tahils sold for consumption in Christmas Island) amounted to 1,700,732-5 tahils realising $17,511,229.

In addition to the raising of the price other steps were taken to ensure a gradual reduction in the consumption of opium in the Colony.

Sales to the Federated Malay States Government amounted to 1,776,600 tahils, whilst 950,504-9-2 tahils were sold to the Governments of Johore, Kedah, Perlis, Trengganu, Kelantan and Brunei. In addition, shipments totalling 16,882-6-8 tahils were made to Bundi, Dungun, and Kretay Plantations in Trengganu.

The Calcutta auction price of opium rose from Rs. 3,829 per chest in January to Rs. 5,212 per chest in December.

Seizures made during the year included the following:—

Opium 15,219-6 tahils, chandu 8,419-0-6 tahils, Cocaine 109 grains, morphia 35,003 grains, tobacco 6,735 lbs., bhang 6,302 bundles in Singapore and 1,876-8-2 tahils in Penang and Malacca, and liquors 392-5 gallons.

Liquors.—The revenue from liquors amounted to $3,125,262.28 as against $2,511,590.36 in 1918.

This year for the first time the system of vesting the privilege of producing and selling Toddy in a single Toddy-farmer for each Settlement was departed from and licences were distributed on the basis of tenders submitted in respect of individual toddy shops. This method affords better control over the licensed Toddy retailers, more especially as

the regulations were amended in a manner designed to ensure the purity and cleanliness of the toddy supplied and to provide for all toddy which had become stale being thrown away. The results were also very satisfactory financially, the revenue from Toddy rising from $175,620 in 1918 to $275,532.78 this year.

The scale of Liquors Import Duties was amended by the addition on 19th December of two new sections fixing the duty on arrack at $20 per gallon and that on certain other liquors at $12 per gallon or $12 per proof gallon according to alcoholic strength. These amendments were introduced with the object of protecting the trade (which is mainly in the hands of allied countries) in such liquors as whisky, brandy, and rum, against unfair competition from imitations based on patent still spirit, the bulk of which is at present imported from Java.

In addition there was introduced a new proviso designed to prevent the loss of revenue which under the provisions of the old tariff was liable to be entailed by the breaking down of over-proof liquors imported in bulk.

Tobacco.—The total tobacco revenue collected in Singapore, Penang and Malacca during the year was $1,550,135.86 as against $1,434,519.60 in 1918.

The revenue from tobacco in the Settlement of Labuan was $3,894.16 as against $3,735.91 in the preceding year.

Prosecutions.—The total number of cases instituted by the Department during the year was 442 in Singapore, 110 in Penang, and 38 in Malacca.

MUNICIPALITIES.

The revenue of the three Municipalities amounted to ($7,654,117), and their expenditure, excluding sums spent on Loan Works, to ($8,133,228). The usual comparative statements of revenue and expenditure appear below.

REVENUE.

	1915.	*1916.*	*1917.*	*1918.*	*1919.*
	$	$	$	$	$
Singapore ...	3,696,544	3,884,353	4,375,493	4,943,059	5,640,304
Penang ...	1,404,150	1,429,251	1,537,937	1,592,449	1,716,350
Malacca ...	161,431	177,742	222,870	271,496	297,463

EXPENDITURE.

	1915.	*1916.*	*1917.*	*1918.*	*1919.*
	$	$	$	$	$
Singapore ...	3,772,692	3,743,261	4,244,657	5,034,593	5,904,808
Penang ...	1,308,600	1,268,865	1,380,139	1,577,409	1,870,282
Malacca ...	131,958	160,655	186,162	292,965	358,138

RURAL BOARDS.

The following return shows the revenue and expenditure of the Rural Boards, which carry out in areas outside Municipal limits such of the provisions of the Municipal Ordinance as are applicable to country districts:—

		Revenue.	*Expenditure.*
		$	$
Singapore Island	...	*144,838	237,314
Penang Island	...	66,878	112,871
Province Wellesley	...	296,321	327,672
Dindings ...	...	34,160	41,369
Malacca ...	...	566,601	735,473

The deficit in the revenue of the Rural Boards is made good by contributions from the Government.

SINGAPORE HARBOUR BOARD.

The income and expenditure of the Board at Singapore (first as the Tanjong Pagar Dock Board and latterly as the Singapore Harbour Board) for the seven-and-half years 1912—30th June, 1919 have been as follows:—

		Revenue.	*Expenditure.*
		$	$
1912	... ...	6,015,648	4,216,015
1913	... ...	6,091,296	4,070,912
1914	... ...	5,834,893	3,875,738
1915	... ...	5,432,425	3,421,271
1916	... ...	6,785,372	4,203,355
1917	... ...	7,931,597	4,665,596
1918	... ...	9,617,718	5,444,410
1919 (half-year to 30th June only)†	...	5,529,415	3,208,130

The capital debt due to Government stood at 30th June, 1919 at $52,100,660 on which the Board pays interest at 4 per cent. In addition to this capital, the Board has expended on new works and other expenditure of a permanent nature a sum of $2,505,938 from the reserve account.

* Exclusive of Education Rate but inclusive of dog tax collected by Police and bank interest.

† The preparation of interim Half-yearly Accounts to 31st December having now been discontinued in favour of Yearly Accounts to 30th June, yearly figures to December as heretofore can no longer be given.

The following figures are taken from the wharf tonnage returns:—

	1913.	1914.	1915.	1916.	1917.	1918.	Half-year to 30th June. 1919.
Number of Vessels ...	2,708	2,544	2,364	2,329	2,400	2,114	1,234
Nett Tonnage	5,794,536	5,445,273	4,307,082	4,348,927	3,938,659	3,330,791	2,245,899
Coal (Inwards and Outwards)	1,338,495	1,248,032	1,021,452	1,067,824	1,039,202	732,231	409,800
Cargo (Inwards and Outwards)	1,462,788	1,229,205	1,323,637	1,339,129	1,369,606	1,213,730	657,707

The tonnage occupying the Graving Docks during the years 1917 and 1918 and the half-year ended 30th June, 1919 based on the daily tonnage in dock was:—

	1917.	1918.	Half-year to 30th June. 1919.
No. 1 Dock	239,102	233,023	165,996
No. 2 Dock	409,120	216,211	249,528
The Victoria Dock ...	445,499	253,074	379,958
The Albert Dock ...	786,100	407,319	338,659
The King's Dock ...	1,817,202	736,214	324,461

THE PENANG HARBOUR BOARD.

The total gross earnings of the Wharf and Dock for the year 1919 were $996,372* and the expenditure $815,092.*

The following figures are taken from the wharf tonnage returns:—

	1913.	1914.	1915.	1916.	1917.	1918.	1919.
Number of Vessels ...	732	596	728	661	532	513	554
Nett Tonnage	1,532,361	1,108,319	871,524	810,675	687,377	581,132	760,100
Coal (Inwards and Outwards)	282,067	266,146	72,016	93,388	106,676	60,029	39,356
Cargo (Inwards and Outwards)	399,412	313,360	254,066	245,681	247,051	251,183	242,544

* Approximate only, and subject to audit.

PUBLIC WORKS.

The expenditure of the Department was as follows:—

	Singapore.	*Penang.*	*Malacca.*	*Labuan.*	*Total.*
ESTABLISHMENTS.	$ c.	$ c.	$ c.	$ c.	$ c.
(1) Salaries ...	113,847.42	64,574.99	33,155.41	4,972.00	216,549.82

Total ...	$1,177,462.79	844,953.53	1,063,706.42	19,109.95	3,105,232.69

The important works completed by the Department during the year were as follows:—

In Singapore—Erection of Inspectors' Quarters and additional barracks at the Beach Road Police Station; extension of the water sewage system at the Central Police Station and to the Maternity Hospital and Lunatic Asylum; quarters for the Guardian at Government House; construction of barracks at Rochore Police Station; construction of barracks at the Quarantine Station, St. John's Island; quarters for an Assistant Superintendent of Police Pearls Hill; quarters for Government Officers, five at Tanglin and two on Goodwood Hill; the extension of Victoria Bridge School and the construction of a bungalow for subordinate officers at Tanjong Rhu.

In Penang—One Class II house for Government officers; a beacon at the Southern Entrance to Penang Harbour; extensions to the Quarantine and leper camps on Pulau Jerejak; in the Dindings a Hospital Ward and a Police Station at Segari.

In Province Wellesley—A Post Office and Telephone Exchange were built at Bukit Mertajam and improvements and additions were made to the Police Station at Nibong Tebal.

In Malacca—District Offices at Alor Gajah and Jasin; a second class ward at the Durian Daun Hospital; re-erection of the Police Station at Chin-Chin; re-construction of Police barrack at Batang Malaka; re-construction of Vernacular School buildings at Sungei Rambei and Bukit Tedong and the construction of irrigation dams at Malaka Pindah and Tampin.

Progress was made with the following works:—

In Singapore—Additional accommodation at the Lunatic Asylum; renewing verandah floors of thirteen wards at the Quarantine Station, St. John's Island; erection of peons' quarters, Mackenzie Road.

In Penang—Anti-Malarial drainage scheme at Lumut.

In Malacca—Police Station and barracks at Kuala Sungei Bharu; four quarters for subordinate officers at Malacca; four clerks' quarters at Alor Gajah; four clerks' quarters at Jasin; four clerks' quarters at Malacca; quarters and kitchens for Marine Department Lascars, Malacca, and the erection of coolie lines.

Under the Heading "Roads";

In Singapore—Progress was made with the Jurong Road extension; six-and-a-half miles of road were converted from laterite to granite and seven miles of roads were re-metalled and ten miles tar painted.

In Province Wellesley—A commencement was made with the construction of a bridge over the Muda River at Dusan Lada; two miles of new road connecting with Southern Kedah were completed and metalled.

In Malacca—Sixteen miles of road were re-constructed and nearly a mile of road deviation carried out at Kajang.

The metalled roads in the Colony are as follows:—

	Miles.
Singapore	96·26
Penang and Dindings	85·93
Province Wellesley	166·00
Malacca	231·38
Labuan	4·50
Total ...	584·07

The Department has also charge of 49·60 miles of gravelled roads in Malacca and 92·94 miles of natural roads of which the greater part lies in Penang, the Dindings and Province Wellesley.

CHRISTMAS ISLAND.

The excess of revenue over expenditure, originally estimated at $15,578, is now calculated at $13,364. This is chiefly due to the fact that the royalty* on export of Phosphate of Lime, amounting to $24,500, shows a decrease on the estimates of $3,500.

The total revenue amounted to $26,154.80.

* Royalty for 1918 was 35¾ cents per ton. Royalty at the same rate for 1919 would be about $24,500.

Export of Phosphate of Lime increased from 53,370 tons in 1917 to 68,621 tons, and tonnage entered and cleared at Flying Fish Cove increased from 71,926 tons to 81,197 tons. Australia and Japan consumed the entire stock of export. Japan taking 71 per cent. In regard to the tonnage of freight ships 39 per cent flew the British flag and 61 per cent the Japanese.

The population increased from 514 on January 1st to 617 on December 31st.

The general health has been satisfactory. The death-rate fell from 22·71 per mille in 1918 to 12·9 in 1919.

There was no serious crime.

One-and-a-quarter miles of track were laid during the year on the railway line with sidings to South Point.

The mean temperature was 81·2 F—·3 of one degree warmer than in 1918.

On the 10th December there was a riot amongst the labour force of the Phosphate Co., an attempt was made to burn the manager's bungalow. Order was however quickly restored and police reinforcements were sent at once from Singapore to ensure future peace.

REGISTRIES OF JOINT STOCK COMPANIES.

Last year was the fourth year during which the Companies Ordinance, 1915, was in force. Forty-eight new companies were registered with a capital of $40,780,000; of these, 28 were private companies with a capital of $8,170,000.

At the end of the year 305 companies remained on the register of which 12 were in liquidation. The total subscribed capital of the 295 companies which carry on a business was $99,201,802.

Four hundred and fourteen companies not registered in the Colony, have filed documents under the 1915 Ordinance; of these, 325 are British. Apart from these, 13 companies of which 12 are British have complied with the Life Assurance Companies Ordinance, and private Ordinances have been enacted in respect of five foreign companies. Fifty-six companies do Fire Insurance business.

The total revenue of the department was $21,639.63.

VETERINARY DEPARTMENT.

In Singapore the total imports of live-stock were 774 horses, 31,721 cattle, 27,122 sheep, 6,111 goats, 130,911 swine, 227 dogs and 821 buffaloes as compared with 389 horses, 31,879 cattle, 34,156 sheep, 4,421 goats, 144,014 swine, 308 dogs and 114 buffaloes in 1918.

The total number of live-stock exported from Singapore was 541 horses, 4,551 cattle, 6,317 sheep, 2,387 goats, 65,784 swine, 216 dogs and 201 buffaloes as compared with 248 horses, 4,942 cattle, 12,857 sheep, 2,748 goats, 64,764 swine, 184 dogs and 15 buffaloes in 1918.

The total Revenue collected during 1919 amounted to $35,242.85 as compared with $36,721.00 in 1918.

The general health of animals in Singapore was good, no epidemic of contagious or infectious disease occurring. No case of glanders or rabies occurred in 1919 in Singapore.

FOOD CONTROL.

At the commencement of the year I was in charge of this Department.

The failure of rice crops in India, the partial failure of the local crop and the prospects of a largely increased demand on Siam by European countries in addition to the increased demand by Malaya and the Netherlands East Indies consequent on the above-mentioned failure of the crops, rendered it imperative to make prompt provision for the future.

The position was further aggravated by heavy speculations in the Siam Rice Market.

It was deemed advisable to make a special purchase of rice with a view to having a reserve to draw on towards the close of the year. Some 60,000 tons were therefore purchased in Siam.

Meanwhile India found herself compelled further to restrict exports, and the normal allowance for Malaya from Burma was reduced by over 42 per cent: the price was however controlled in Burma.

In Siam, on the other hand, owing to increased demand and heavy speculation, the price soared to such an alarming figure that the position in Malaya began to cause grave anxiety.

In order to avoid competitive buying by the two parties, this Government and the Netherlands East Indies came to an agreement in May, 1919, to purchase jointly through one agent: in June Ceylon agreed to do the same, though only a few weeks prior to Siam issuing the order prohibiting export.

At my request a conference of leading residents in Malaya was held in Singapore on May 15th, 1919, at which His Excellency the Governor presided. It was decided that Government should take over the entire control of rice as soon as possible.

On May 26th, 1919, I handed over the charge of the Department to Mr. PEEL, of the Federated Malay States Civil Service.

A Control Scheme was brought into force on July 1st: the stocks of importers and wholesale dealers were taken over and no rice or padi was allowed to be imported into the country except by the Controller. The entire movements of rice, as far as the hands of the retailers, were thenceforth entirely controlled.

These measures naturally entailed a large increase of staff.

It was decided to sell all white and parboiled rice at one flat rate: the Food Controller calculated that the figure at which it could be sold to the consumer without loss was $1 a gantang, but representations were made that this price constituted a grave hardship and the Government therefore decided to grant a subsidy to bring the price at the main distributing centres down to 75 cents.

This decision entailed of course considerable expenditure.

Compensation had to be paid to holders of stocks of Siam and Saigon rice which, after the 1st July, 1919, could only be sold at the reduced rates.

Against this, however, the Government made a profit on Rangoon rice which up to the end of the year was still imported at a figure below the controlled price.

The amount payable by way of compensation to dealers holding stocks amounted approximately to $6,900,000.

The sale of the 60,000 tons of Siam rice purchased earlier in the year at a comparatively favourable figure involved the Government in no loss. The sale of subsequent purchases of Siam rice on Government account on the basis of 75 cents per gantang entailed a considerable loss, but against this must be set a profit made on sales of Rangoon rice.

The Food Control Department decided in September to sell Government stocks in the main distributing centres direct to retailers for local consumption, and to wholesale dealers for distribution to the other districts. This procedure eliminated the whole of the Importers' profits and a considerable proportion of the Wholesalers' profits: it involved a considerable increase of work and staff, but resulted in a saving to Government of about $1,000,000.

It is anticipated that the final net loss to this Government up to the end of the year, as a result of the decision to assist the people by selling rice at less than cost price, will

be about $6,000,000. This loss will be shared by the Colony, the Federated Malay States and the State of Johore in the proportions of 3, 4 and 1.

It may be added that the amount would have been considerably less, had it not been for the rise in the exchange value of the rupee, which resulted in this Government having to pay nearly $1,000,000 more in respect of purchases made subsequent to the fixing of the rupee at 2/-.

In July, 1919, Siam issued an order prohibiting export of rice as from the 12th July except for contracts made prior to the 12th June: no appreciable supplies could therefore be looked for beyond the balance of the allotment from India and possibly some from Saigon where however the price was almost prohibitive.

Fortunately the stocks in the country were heavy and it was anticipated that with care and economy and the help of other foodstuffs such as wheat, wheat flour, and maize meal, the country would succeed in carrying on successfully until the next harvest—about the end of the year. The Control Department itself imported and also assisted private dealers in importing supplies of these foodstuffs: it circularised estates with a view to inducing their labourers to substitute a proportion of such foodstuffs for part of their rice rations and gave much assistance in supplying recipes for cooking. The result was very gratifying: the ration allowance for estates, etc., was gradually reduced with little or no hardship, and the labourers on the whole took kindly to other food to supplement the reduced supply of rice.

A Food Production department was constituted to encourage the planting of foodstuffs such as ragi and hill padi.

As a result, thousands of acres in the Peninsula were planted up with these foodstuffs, thus assisting the food position.

Towards the end of October, the Food Controller went to Bangkok with a view to making arrangements for supplies for 1920.

While he was there the news came in that the crops in many parts were an absolute failure and that there would be no rice available for export.

The Food Controller subsequently visited Saigon where the crops were reported to be considerably above the average, and there was every prospect of considerable supplies being obtainable. A large amount was actually purchased for delivery January to April.

India was approached with a view to ascertaining her policy for 1920, and was asked to allot a total of 180,000 tons

for the first six months of the year. She apparently found it difficult to come to a decision and no assurance had been received at the close of the year as to what allotment she was prepared to give.

This delay was a source of great anxiety to the Food Controller and was a contributory factor to the hoarding which took place in December. There were sufficient stocks in the country to last until new supplies were available, but the diminution of such stocks and the uncertainty of the future led to hoarding for a few weeks: this made the position temporarily somewhat difficult, but at the close of the year sufficient purchases had been made by the Controller to render the position perfectly safe for some months to come.

Food Control has been necessary to cope with a temporary situation, but it promises to bring permanent benefits to the country; the people are learning that it is possible to eat, enjoy and thrive on other foodstuffs than rice or the particular form of rice to which they have been accustomed.

The prices of foodstuffs in general rose, especially towards the end of the year. The prices of milk and flour were carefully watched and controlled, but it was not considered desirable to interfere to any great extent with other prices.

World's prices generally increased, while the high rates of exchange made the local position as to price considerably worse.

THE SHIPPING COMMITTEE.

The operations of the Shipping Committee virtually ceased in the first quarter of the year.

Some seven Meetings were held, but the ships under Liner Requisition were with one exception released at the end of February at the order of the Secretary of State for the Colonies, and the clearing up of the accounts and the settlement of certain points in dispute were left to the Chairman and Secretary.

The s.s. *Will O' the Wisp* was retained as the Owners were indebted to Government for some $102,000.00 in respect of repairs of this vessel and the *Hock Lee*, and a sum paid by Government on their account.

The s.s. *Ranee* continued to be run by the Straits Steamship Company on account of the Admiralty, pending the decision as regards its final disposal.

The Eastern Shipping Company whose fleet had been placed on Liner Requisition on the usual rates challenged the legality of Government's action and further demurred

to the rate offered. They commenced an action against the Government, but the matter was not settled at the close of the year.

Meanwhile the sums due to the Company on the working of the vessels were retained by Government.

LABUAN.

The revenue collected in Labuan amounted to $38,308.19, and $81,927.14 was expended. The total volume of trade was 3,748,930, and exports and imports show little variation from the previous year. 141,686 tons of merchant shipping entered and cleared. A weekly service with Singapore and Borneo was maintained. There was a general improvement in sanitation. The 10 square miles of land bought from the Labuan Coalfields Company, Limited, is being re-alienated in small holdings. A Company styled "The Labuan Exploration Company" has been formed in London with the object of prospecting minerals in Labuan, and the geological survey will commence early in January, 1920.

PASSAGE CONTROL.

Passage Control Regulations were introduced by the Governor on the 18th of March, 1919, under the powers conferred upon him by the Imperial Order in Council of the 26th of October, 1896, and public opinion welcomed the arrangement.

By these Regulations the Government allocated all passenger accommodation by British ships travelling to Europe. At the time when they were introduced no steamers were available, but in view of the cancellation of sailings of the *Nore* and *Novara* arrangements were made with the Admiralty for the transport *Marama* to be sent to Singapore to help in relieving the situation. She left the Straits Settlements on the 10th April, 1919, carrying 593 passengers to whom accommodation had been allotted by the Passage Controller. The accommodation provided has been the subject of much criticism. Doubtless the haste with which she had to be prepared for taking passengers Home did not allow the arrangements to be as complete as might have been possible in more favourable circumstances, but the discomforts experienced on her appear to have been unavoidable under the prevailing circumstances, and the large proportion of women and children overdue for leave certainly aggravated the situation.

The vessel was inspected by two Board of Trade Surveyors on her arrival in London and a full report on her accommodation and sanitary arrangements was published in the local papers.

After the departure of the *Marama* the Passage Controller dealt with 1,189 applications for passages. Nine hundred and ninety passages were allocated on 21 British ships up to the date when Passage Control was taken off again—the 4th October, 1919.

Since that date, though the shipping situation is not yet normal, there has not appeared to be any necessity for the re-introduction of control.

GENERAL.

The year was memorable. It was the Anniversary of the founding of Singapore by SIR STAMFORD RAFFLES, and in February great local celebrations marked the event. Much consideration was given to the most suitable method of commemoration and it was finally decided to establish a College which should bear the name of the Founder. Generous subscriptions from all sides have already assured success to the scheme and plans are being prepared for the construction of a building which shall be a centre of useful learning for the Peninsula whose great seaport it will adorn.

The provision of passages to Europe for those members of the European Community who were long overdue for leave or who had already broken down under the strain of prolonged residence in the tropics presented much difficulty, but the general shipping position was easier than it had been. At the time of writing it is satisfactory to note that the total tonnage of shipping entering and leaving the port of Singapore is considerably greater than the totals for 1917 and 1918, and shews signs of returning to the high figures of previous years.

In the year under review the question of ensuring an adequate food supply became acute. The shortage of rice has been dealt with elsewhere in this report. Complications were introduced by questions of currency and rates of exchange. The value of money, which is the same thing as the general level of prices regarded inversely, had sunk. The price of bullion had risen. Note issues had enormously increased. A great portion of the world was in a condition hardly distinguishable from anarchy. Faith of all kinds had been shaken and, most of all, faith in promises to pay.

Paper money was at a discount, and in many places, where the deliberate Bolshevik policy of ruining Government credit by a reckless inflation of the paper currency had obtained, it had become valueless. Silver and Gold and articles convenient for hoarding and barter were in extreme demand. A combination of causes had raised the price of silver bullion to hitherto undreamed-of heights. No power and no law can ultimately keep in circulation coinage whose bullion contents are worth more in exchange than the coin itself. It has been suggested that the Government of the Straits Settlements would be wise to alter the rate of exchange fixed at 2/4*d* to the dollar, but after consideration of all issues it is the declared policy of Government to adhere to the present fixed rate. The fact that our former favourable exchange position in regard to India and China has now been reversed makes the question of obtaining labour one of great difficulty. The bulk of our labour is non-indigenous and the exchange position in its relation to the diminished power of remittance home has been acutely felt. The temporary expedient has been tried by employers of labour of granting exchange allowances while the level of wages is adjusting itself to the altered conditions. Despite a great deal of increased commercial prosperity generally there is no doubt that the small wage-earning classes experienced considerable hardship, although there was probably little actual want of food.

The Housing question is still with us, and its attendant difficulties have not decreased. The inactivity of the building trade during the War still makes its effect felt. Remedies are of slow operation but the work of the Rent Board has been of great value. Plans have been settled for the erection of a large tenement building at Cross Street but the work is delayed by shortage of labour and material.

On the 19th June, Chinese Riots occurred in Singapore. They were not serious and quiet was quickly restored. They were ostensibly anti-Japanese and fomented by a few ringleaders who were responsible for the Japanese boycott and for inflammatory articles in the Chinese press on the Shantung settlement.

Similar disturbances in the Northern Settlement took somewhat longer to settle and traces of their influence are still felt in both Settlements. It would be strange indeed if the mingled influences of high prices, food shortage, anti-Japanese propaganda and Labour agitation, backed wherever they can obtain an entry by Bolshevik agents, had not produced unrest. Cheap food and all that it denotes generally

means a contented people. While all goes well the Government is a visionary figure in the background. "Whate'er is best administered is best" is the subconscious belief of each contented citizen. But the inflated prices and general derangement of economic balance brought about by the War have necessitated increasing Government intervention in affairs which normally lie outside its sphere, and thereby it has become associated in the popular mind with certain most unpopular phases of the prevailing unsettled conditions. It is the policy of the Straits Settlements Government to bring Food Control to an end at the earliest possible moment. As has been well said by a European authority: "It must never be overlooked that control of price and distribution cannot stop with a few prime commodities, but once started its repercussions drive into a succeeding chain of commodities; and that on the downward road of price control there can be no stoppage until all commodities have been placed under restriction". A consummation devoutly to be avoided.

Numbers of Asiatic labourers were employed on the various war fronts and many on return have passed through Singapore while others have remained here. They have come—many of them—with their old outlook on life changed. New wine has been put into old bottles and the consequence has been a breaking with tradition and all the customary restraints of inherited belief. In order to control certain vernacular papers whose inflammatory articles are often too indefinite to come within the sphere of the Seditious Publications Ordinance of 1915, it was found necessary to introduce new legislation.

The Public Services Salaries Commission, the Clerical Service Commission and the Committee on the Subordinate Services all completed their work. An attempt has been made to make the rates of emolument more suited to the changed value of money. The difficulty of Government has been to find a firm basis in the quicksand of changing values and rising prices, in other words, to avoid on the one hand the Scylla of a panic-stricken increase of wages which would re-act adversely on the unofficial community, and on the other the Charybdis of undue parsimony. It cannot be denied that a fair attempt has been made to face the difficulties.

The year has seen great changes in personnel. At the end of August, Sir ARTHUR YOUNG relinquished the reins of Government after remaining at his post for the whole period of the War. He carried with him into retirement the respect and loyalty of all those with whom he had come into contact. Mr. F. S. JAMES, C.M.G., Colonial Secretary,

succeeded Sir ARTHUR YOUNG as Officer Administering the Government and remained in charge until the arrival of Sir LAURENCE NUNNS GUILLEMARD, K.C.B., who was appointed Governor and High Commissioner on the 27th October, but did not arrive in Singapore until the following year. Mr. H. MARRIOTT acted as Colonial Secretary from August until the end of the year.

Another change was the departure on leave of the Attorney-General Mr. (now Sir AUBREY) GOODMAN, prior to promotion to the position of Chief Judicial Commissioner, Federated Malay States, and in November his successor Sir WILLIAM MURISON arrived.

In November, the First Battalion South Staffordshires arrived to take over garrison duties, relieving the Middlesex Regiment.

The deaths of two members of the Civil Service are recorded with regret. Mr. G. H. M. ROBERTSON, who had volunteered for military service early in the War and had been stationed in East Africa during its greater part, was attacked by influenza in the epidemic of 1919 and died in a few days.

Mr. J. W. GOLDTHORP died in Kuala Lumpur after a brief illness. The services of two valuable officers were thus lost at a time when they could least be spared.

Big plans of development are before us, but our motto, I am afraid, must be *festina lente* while an adequate staff and organisation is being built up to deal with them.

The twelve months ending December 31st, 1919, were as disturbed a year as has occurred in the history of the Colony. The Great War terminated with the capitulation of Germany in November, 1918, and Peace with Germany was celebrated officially on the 19th July, 1919.

It has been said that "Peace hath her victories no less renowned than War"; it is certain that she bears in her train problems as difficult and of no less importance to the future of the World. Many months elapsed before the effects of War were felt in this distant Colony but the economic consequences of Peace are already more than apparent. Already the swell and movement in our midst indicates how deeply the industrial waters of Europe have been stirred. The waves of unrest have but lapped our shores but it behoves the whole community ruthlessly to set its house in order against a day when the very foundations may be

tested. In the past the Straits Settlements and its hinterland have provided a Happy Hunting-Ground for all races, and it has been the pride of the Administration to secure to each man his own and to turn the industry of its settlers to the advantage of the community. Errors no doubt have been made, but the path of great achievements is marked by mistakes, and in this year of the Raffles Centenary it is well that we should borrow the spirit of the Founder of Singapore and through the clouds of to-day look with hopes as high and purpose as undaunted to an even greater future.

F. S. JAMES,
Colonial Secretary, S. S.

12th June, 1920.

HISTORICAL AND GEOGRAPHICAL NOTES.

The Straits Settlements, comprising Singapore, Penang and Malacca, were transferred from the control of the Indian Government to that of the Secretary of State for the Colonies on the 1st April, 1867, by an Order in Council, issued under the authority of an Act of the Imperial Parliament (29 and 30 Vict. c. 115).

SITUATION AND AREA.

Singapore.

Singapore is an island of which the greatest length is about 27 miles by 14 wide, containing an area of 217 square miles, situated at the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width. There are a number of small islands adjacent to it which form part of the Settlement, which now comprises also Christmas Island, and the Cocos Islands.

The seat of Government is the town of Singapore, at the southern point of the island, in latitude 1° 17′ north, and longitude 103° 50′ east.

Penang.

Penang is an island about 15 miles long and 9 broad, containing an area of 108 square miles, situated off the west coast of the Malay Peninsula in 5° north latitude, and at the northern extremity or entrance to the Straits of Malacca. On the opposite shore of the mainland, from which the island is separated by a strait from 2 to 10 miles broad, is Province Wellesley, a strip of territory forming part of the Settlement, averaging 8 miles in width, and extending 45 miles along the coast, including 10 miles of territory to the south of the Krian river (*vide infra*), the whole containing an area of 280 square miles.

The chief town is George Town, in 5° 24′ north latitude, and 100° 21′ east longitude.

Malacca.

Malacca is situated on the western coast of the peninsula between Singapore and Penang, about 110 miles from the former and 240 from the latter, and consists of a strip of

s publishing company, inc.

territory about 42 miles in length, and from 8 to 25 miles in breadth, containing an area of 720 square miles. The town, called Malacca, is in 2° 10′ north latitude, and 102° 14′ east longitude.

The Dindings.

The Dindings, area about 183 square miles, include the island of Pangkor and a strip of territory opposite on the mainland, about 80 miles from Penang, in 4° 15′ north latitude, and 100° 35′ east longitude. Lumut, the headquarters on the mainland, possesses a fine harbour with deep anchorage, and arrangements have been made for coasting steamers to call regularly.

Cocos-Keeling Islands.

The Cocos or Keeling Islands, which were declared a British possession in 1857, were placed, by Letters Patent of 13th October, 1878, under the control of the Governor of Ceylon, and by Letters Patent dated the 1st of February, 1886, under the Governor of the Straits Settlements. In 1903 they were annexed to the Straits Settlements and incorporated with the Settlement of Singapore. The islands lie between latitude 11° 50′ to 12° 45′ south, longitude 96° 50′ east, 700 miles south-west of Batavia. The largest is 5 miles by ¼ mile. There are large coconut plantations, and copra, oil, and nuts are exported. In 1902 a station on the Cape-Australia cable route was established on Direction Island, in the north-eastern part of the group. The population numbers about 795.

Christmas Island.

Christmas Island, situated in the Indian Ocean, 190 miles south of Java, latitude 10° 30′ south, longitude 105° 40′ east, was annexed in June, 1888, and placed under the administration of the Governor of the Straits Settlements by Letters Patent of 8th January, 1889. In 1900 it was annexed to the Straits Settlements and incorporated with the Settlement of Singapore.

The island, which is densely wooded, has an area of about 62 square miles. In shape it is a rough parallelogram with deeply indented sides, its greatest length being about 12 miles, and its greatest breadth about 9 miles. The inhabitants, who number about 1,100, are all, with the exception of the District Officer and his staff, employés of the Christmas Island Phosphate Company, which was formed in 1897 to work the extensive deposits of phosphate of lime, to which the island owes its importance.

The total area of the Colony with these dependencies is about 1,600 square miles.

By Letters Patent issued at the end of 1906, provision was made for the incorporation of the Colony of Labuan in that of the Straits Settlements. The provision came into effect from the 1st of January, 1907. An account of Labuan will be found below.

MALACCA.

History.

Malacca, said to have been founded by fugitives from the sack of Singapore, and known as an important independent State from early in the fifteenth century, is one of the oldest European Settlements in the East, having been captured by the Portuguese under ALBUQUERQUE in 1511, and held by them till 1641, when the Dutch, after frequent attempts, succeeded in driving them out. The Settlement remained in the possession of the Dutch till 1795, when it was taken by the English, who held it till 1818. It was then restored to Holland, but was again transferred to British rule as a consequence of the Treaty of London (17th March, 1824), being exchanged for the British Settlements in Sumatra.

When Malacca was captured by the Portuguese in 1511, it was one of the grand entrepôts for the commerce of the East, but as the Portuguese pushed their operations further to the east, in the archipelago and neighbouring countries, the trade of Malacca gradually declined and it ceased to be of consequence as a collecting centre, except for the trade of the Malay Peninsula and the Island of Sumatra. This trade it retained under Dutch rule till the establishment of Penang in 1786. In a few years from that date its trade almost ceased, and it became, what it has ever since been, a place of little commercial importance, but possessing great agricultural resources. The trade of the Malay Peninsula and Sumatra passed to Penang, which also carried on a large traffic with China, Siam, Borneo, the Celebes, and other places in the archipelago not under Dutch control; but no sooner was Singapore established than Penang in its turn had to yield the first place to Singapore, and came to depend chiefly on the local trade. At first unimportant, that trade has assumed enormous proportions, owing to the development of the rich tin areas and rubber-bearing lands of the Malay Peninsula.

PENANG.

Penang, or Prince of Wales' Island, was the first British Settlement in the Malay Peninsula, having been ceded to the East India Company by the Raja of Kedah in 1786, with the proviso that the sum of 6,000 dollars should be paid annually to the Raja of Kedah so long as the British occupied the island. In 1800, in consequence of the prevalence of piracy, a strip of the coast of the mainland, now called Province Wellesley, was acquired from the Raja, the annual payment being in return increased to $10,000. This has been subsequently enlarged from time to time, until it now extends from the Muda River to 10 miles south of the Krian River, a distance of 45 miles, containing in all 280 square miles. This province is in a high state of cultivation, the chief articles cultivated being padi, coconuts, and rubber. In 1805 Penang was made a separate Presidency, of equal rank with Madras and Bombay. In 1826 Singapore and Malacca were incorporated with it under one government, Penang still remaining the seat of government. In 1836 the seat of government was transferred to Singapore.

The island of Pangkor and the Sembilan Islands were ceded by Perak in 1826, with a view to the suppression of piracy, but no use was made of the cession at the time. In 1874 the cession of these islands was confirmed by the Treaty of Pangkor, by which a strip of territory in the mainland opposite also became British. The whole now forms, under the name of the Dindings Territory, an outlying portion of the Settlement of Penang.

SINGAPORE.

The original city of Singapore is said to have been founded by immigrants from Sumatra. It rose into prominence in the fourteenth century. Its greatness came to a sudden end in 1377, when it was sacked and destroyed by the Javanese, and thenceforth the island was scarcely inhabited until Sir STAMFORD RAFFLES took possession of it in 1819, by virtue of a treaty with the Johore princes. The new Settlement was at first subordinate to Bencoolen (Fort Marlborough) in Sumatra, but in 1823 it was placed under the Government of Bengal; in 1826 it was, as above stated, united with Penang and Malacca, under the Governor and Council of the Incorporated Settlements.

Climate.

The climate varies but little during the year. The mean temperature in Singapore for 1918 was 82·0° F.; in Penang 82·6° F.; in Province Wellesley, 82·7° F.; and in Malacca, 80·0° F. The mean maximum and minimum temperatures

were between 86·8° and 74·3° F. There are no well-marked rainy and dry seasons, the rainfall being pretty evenly distributed throughout the year. From carefully kept records of observations for a period of 10 years, from 1908 to 1917, it is found in Singapore that there is an annual average of 177 wet days; the average rainfall for the same period being 103·76 inches. In 1917 the mean rainfall in Singapore was 111·88 inches; in Penang 105·27 inches; in Province Wellesley 84·88 inches; in Malacca 109·83 inches; and in the Dindings 102·26 inches. The force of the monsoons is not much felt, though the prevailing winds are generally in the direction of the monsoon blowing at the time, viz., S.W. from May to October, N.E. from November to April. But it is nothing unusual to have south-east, south or south-west winds for portions of the day as early as March or April.

Population.

At the census taken in April, 1901 and 1911, the population of the Settlements was ascertained to be as follows:—

	1901.	*1911.*
Singapore ...	228,555	311,985
Penang, Province Wellesley and Dindings ...	258,207	278,003
Malacca	95,487	124,081
Total ...	572,249	714,069

The following Banks have establishments in the Colony:—the Chartered Bank of India, Australia and China; the Hongkong and Shanghai Banking Corporation; the Mercantile Bank of India Limited; the Netherlands Trading Society; the International Banking Corporation; the Banque de l'Indo-Chine; the Netherlands India Commercial Bank; the Sze Hai Tong Banking and Insurance Company; Bank of Taiwan; Chinese Commercial Bank; Communication Bank; the Yokohama Specie Bank; the Ho Hong Bank; the Oversea Chinese Bank, and the China and Southern Bank.

LABUAN.

The Island of Labuan is situated on the north-west coast of Borneo, in 5° 16′ North latitude, and 115° 15′ East longitude. Its area is 28·6 square miles. It is distant from the coast, at the nearest point, about six miles; from Brunei, the capital of the Protected State of that name, about forty miles; and from Singapore 725 miles, or three days' steam.

The average annual rainfall is about 168 inches, and the thermometer ranges from 71° to 93°.

An attempt was made by the East India Company's servants, who were expelled from Balambangan by Sulu pirates in 1775, to establish a trading station in Labuan, but the project was soon abandoned, and for practical purposes the history of the island begins with its cession to Great Britain in 1846 by the Sultan of Brunei. It was then uninhabited. The reason for the cession, given in the treaty, by which the island was handed over to Great Britain, was that it was "desirable that British ships shall have some port where they may careen and refit, and deposit such stores and merchandise as shall be necessary for the carrying on of the trade with the dominions of Brunei", and the consideration given by Great Britain was an undertaking to suppress piracy and protect lawful trade.

The island was at first occupied only as a naval station under the control of a naval officer, and the formal establishment of a Crown Colony was deferred until 1848. From that date until the end of 1889, Labuan was governed as a separate Colony. Until 1869 it was assisted by grants-in-aid from the Imperial Exchequer, but this help was then withdrawn, and the Colony supported itself, though with difficulty, for the next twenty years. In 1889, the financial troubles came to a head, and, as it was thought that the island could be more economically governed in connection with the territories of the British North Borneo Company, the administration was entrusted, from the 1st January, 1890, to the care of the Company, whose principal representative in Borneo was given a commission as Governor of Labuan. This arrangement was terminated at the end of 1905, when Sir J. ANDERSON, Governor of the Straits Settlements, was appointed also Governor of Labuan, the island still remaining a separate Colony. On the 1st of January, 1907, Labuan was annexed to the Straits Settlements, and declared part of the Settlement of Singapore. On the 1st of December, 1912, the island was constituted a separate Settlement.

Labuan has a fine port (Victoria Harbour), perfectly safe, and easy of access. Vessels drawing 23 feet can go alongside the outside jetty (not at present in use), and vessels drawing 15 feet alongside the coaling jetties.

It is a market for much of the produce of the neighbouring coasts of Borneo and the Sulu Archipelago, such as sago, beeswax, edible birds' nests, camphor, gutta-percha, indiarubber, rattans, tortoise-shell, and beche-de-mer, which are forwarded by the Labuan traders to Singapore. Cattle and goats are reared, and 2,000 acres are estimated to be under cultivation. There are sago factories in the island, where the raw material received from the coast is converted into sago flour, which is exported to Singapore.

There is a branch of the Government Post Office Savings Bank in Labuan, but no other bank. The currency is Straits dollars and Straits subsidiary coins. Straits notes are also available in Labuan.

The inhabitants are chiefly Malays and other natives from Brunei, and Chinese, the latter being mostly petty traders.

The Eastern Extention, Australasia and China Telegraph Company has a station on the island connected by cable with Singapore, Hongkong and North Borneo. The nearest point in telegraphic communication with Europe is Singapore.

Population.

Census of 1881, 5,995, of whom 47 were Europeans.

Census of 1891, 5,853, of whom 28 were Europeans.

Census of 1901, 8,411, of whom 51 were Europeans.

Census of 1911, 6,546, of whom 34 were Europeans.

LANDS.

SINGAPORE.

Land in the hands of private owners in Singapore is held direct from the Crown, either by lease or grant. The terms of the leases vary. A great portion of the land on which the town stands is held on building-leases for 99 years. The terms of the leases in the country are, for the most part, 99 and 999 years. A grant in a Statutory form is now the only Crown title issued. This is prescribed by Ordinance II of 1886.

The "permits", formerly issued in anticipation of survey, have all been called in and grants substituted for them. Certain Crown Reserves are held under annual licences. The quit-rent reserved in leases for lands in the country issued before October 15th, 1883, is 30 cents an acre; that on leases

issued subsequent to that date varies according to advantages of soil and situation, but is in no case less than 40 cents an acre. In all leases issued since October 15th, 1883, a condition is inserted under which the rent is re-adjustable every thirty years. Since the passing of the Crown Lands Ordinance of 1886, the only instrument of title is a Statutory Grant in perpetuity subject to a minimum quit-rent of ·50 cents an acre readjustable every thirty years.

By Ordinance I of 1901, special powers are given to the Government with regard to leases of foreshore for periods not exceeding 100 years.

Penang.

Land in Penang and Province Wellesley is held of the Crown, as in Singapore, by grant or lease. The conditions of tenure vary according to the policy of the Government at the time the documents were issued. In Singapore eighteen and in Penang twenty different kinds of title are in the hands of the public. Unoccupied Crown land is obtainable on Statutory Grants as in Singapore, and Statutory Grants are also being substituted for Permits and Expired Leases. Alienation of foreshore is subject to Ordinance I of 1901.

The rates of rent reserved in old leases vary in different localities.

Malacca.

The tenure of land in the town of Malacca has remained unchanged since the days of Dutch rule. Possession is evidenced in many cases by documents of title in Dutch. Occupied land in the country is, in some cases, held either under grant or lease from the Crown, but for the most part according to customary tenure as defined by the Malacca Lands Ordinance. There is special legislation, Ordinance I of 1901, for alienation of foreshore.

Land is now obtainable without premium if held under customary tenure, and with premium and a moderate quit-rent if held under Statutory Grant.

The principal land revenue consists of rents on rubber, tapioca and gambier leases and of mukim assessment under customary tenure.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1920.

GENERAL OBSERVATIONS.

Sir LAURENCE NUNNS GUILLEMARD, K.C.B., arrived in the Colony and assumed duty as Governor and Commander-in-Chief on the 3rd of February, 1920, Mr. F. S. JAMES, C.M.G., administering the Government from the beginning of the year until his arrival.

Mr. H. MARRIOTT acted as Colonial Secretary from the 1st January to the 3rd of February, when Mr. JAMES resumed that office. Sir J. W. MURISON acted as Colonial Secretary from the 13th of June, 1920, when Mr. JAMES went to the Federated Malay States to act as Chief Secretary, until the end of the year.

Sir J. A. S. BUCKNILL, Chief Justice of the Straits Settlements, left the Colony to take up an Indian appointment as Judge of the High Court, Patna, and Sir AUBREY GOODMAN was appointed in his place. His death early in 1921 is recorded with regret as a great loss to the public service.

The Commission on Profiteering under the Chairmanship of the Honourable Mr. W. F. NUTT, O.B.E., completed its labours in the latter half of the year and presented an extremely valuable report.

A Select Committee of the Legislative Council was appointed in November to consider "whether any and what changes are advisable in the Constitution of the Legislative Council" of the Colony.

M. CLEMENCEAU visited the Colony in October en route to Java.

The Compulsory Service Ordinance has not been put into force.

The year 1920 was not eventful in any peculiarly local sense, but it will long be remembered for its bright beginning and its gloomy end. Singapore, as the meeting place of the Eastern commerce of all nations, is naturally very sensitive to world conditions of trade. The brisk demand of the opening months and the slowness of delivery of goods caused prices to mount to unprecedented heights and tempted traders to indulge in heavy overtrading. A financial and industrial crisis in Japan and the general restriction of credit by banks in all parts of the world acted

and reacted on the falling price of rubber and tin. When the large quantities of goods ordered in the early weeks of the year began to arrive many traders were unable to take them up. Weak holders were forced to sell and prices declined from the abnormal levels of a few months earlier. Money and credit became scarcer and scarcer from June to December and anxiety increased. No money was available for any new local industries. There was also a conspicuous decline in American and Japanese competition and a number of these firms closed down. Rubber reached its highest point at $1.15 per lb. in February and had fallen to 30 cents per lb. in December.

Tin rose to $212 per picul on the 18th February and fell as low as $90 on the 1st December.

The year 1919 had been one of reconstruction. The world was busy setting its house in order and the aim of all countries was to return as speedily as possible to normal pre-war conditions. Social and economic life had been everywhere unravelled and in many places broken by war restrictions and war conditions. At the outset of 1920 hopes ran as high as prices. No hope seemed too extravagant and no price too high. An era of unexampled prosperity appeared to have set in. The golden years had returned. Throughout the British Empire manufacturers found the world at their feet, and the Straits Settlements, standing at the gates of the Far East with a hinterland producing a large portion of two important raw materials—tin and rubber—seemed destined for no mean share of the general prosperity. Local produce was in great demand and any article imported could be sold immediately at a handsome profit. British manufacturers at home could not keep pace with the demand and large orders for iron and steel goods and motor-cars were placed with American and Japanese firms. Demand seemed inexhaustible. But in June the tide began to turn. General depression followed upon financial stringency and deepened to stagnation at the close of the year. Unstable political conditions in Europe still kept closed some of the chief markets, and enormously increased costs of production together with largely diminished purchasing powers slowly but surely emphasised the necessary virtue of economy. Fantastic as the visions of February, 1920, may now appear, the disillusionment of October was none the less profound. The contrast is tropical in its intensity. Six months of unrestrained optimism were followed by six of growing and intense depression, but the sombre colouring of the second is no truer indication than the unnatural brilliance of the first.

The problem is simple but world-wide. The will to create a new Heaven and a new Earth can only take effect through a medium of hard times and hard work. It is easy to point the moral and it were idle to adorn the tale with local illustration.

The part of this Colony is perforce that of a deeply interested spectator. The raw materials of the country, the tin and rubber and copra, await the certainty of industrial recovery in Europe and it is for us to conserve our resources in confident expectation and to be ready to rise on the flood-tide of a world revival.

CHRISTMAS ISLAND.

The total revenue amounted to $26,747.81, not counting Opium and Liquor revenue and Income Tax which are collected in Singapore.

Export of Phosphate of Lime increased slightly from 68,621 tons in 1919 to 69,575 tons, and tonnage entered and cleared at Flying Fish Cove increased from 81,197 tons in 1919 to 90,150 tons.

Australia and Japan consumed the entire stock of export, Japan taking only 57 per cent as against 71 per cent in 1919.

In regard to the tonnage of freight ships 37 per cent flew the British Flag and 63 per cent the Japanese.

The population increased from 617 on 1st January to 698 on 31st December.

There was no serious crime.

In January a special Commissioner visited the Island to enquire into and report on the riot and attempted arson of December, 1919, and to deal with the charges arising out of the same, and the police reinforcements from Singapore were returned early in 1920.

LABUAN.

The revenue collected in Labuan amounted to $46,326.15, and $104,861.25 was expended. The total volume of trade was $4,872,540, and exports and imports show little variation from the previous year. 134,872 tons of merchant shipping entered and cleared. A weekly service with Singapore and Borneo was maintained. A Company styled "The Labuan Exploration Company" has been formed in London with the object of prospecting minerals in Labuan, and a geological survey has been completed.

THE SHIPPING COMMITTEE.

The Food Controller as Chairman of the Shipping Committee dealt with such matters as arose.

The s.s. *Ranee* continued to be run by the Straits Steamship Company, Limited, on behalf of the Government, the Government in turn accounting to the Imperial Government on certain terms as regards hire. The vessel latterly was run at a loss and was laid up on October 18th.

The s.s. *Will o' the Wisp* was still retained by the Government and run on its behalf by the Straits Steamship Company, Limited. This vessel also was laid up in December, 1920. The settlement with the owners is not yet completed.

BANKRUPTCY.

There were 25 trade bankruptcies, 15 in Singapore, 2 in Malacca and 8 in Penang, with total estimated liabilities of $3,369,964 (Penang $50,730 only and Malacca $7,004 only). One Singapore rubber failure accounts for $2,581,054 and two other Singapore bankruptcies for $387,537.

HIGH COST OF LIVING.

In the towns acute housing shortage and the general high cost of living everywhere pressed hard on all classes of the population.

BUILDINGS.

Progress was made with the plans for new Post Office buildings and a new General Hospital in Singapore.

INCOME TAX.

The amount of tax assessed for the year under the Income Tax Ordinance, 1920, was about $6,150,000 and the amount collected about $6,000,000.

This shows an advance of over $1,000,000 upon the 1919 results of the War Tax Ordinance, 1919, which was for all practical purposes identical in scope with the Income Tax Ordinance, 1920.

FINANCIAL.

The revenue for the year 1920 amounted to $42,469,620 exceeding the estimate by $24,011,033, whilst the expenditure was $39,260,318, being $18,614,483 more than the estimate.

The revenue figure creates a new record, exceeding the 1919 figure by $8,361,155, and when it is remembered that the figure for 1919 included a transfer entry of $4,149,750 arising out of the sale of the Singapore Railway and Railway Stores in 1913, the actual increase in 1920, as compared with 1919, may be put at over 12½ million dollars.

The actual figures for 1919 and 1920 are as follows:—

A.—REVENUE.

	1919.	*1920.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Port, Harbour, Wharf and Light Dues ...	1,506	1,610	104	...
2. Licences, Excise and Internal Revenue not otherwise classified ...	22,302,119	34,211,116	11,908,997	...
3. Fees of Court or Office, Payments for Specific Services, and Reimbursements in Aid ...	736,701	880,844	144,143	...
4. Posts and Telegraphs ...	1,094,083	1,241,071	146,988	...
5. Rents on Govt. Property	1,240,762	1,232,813	...	7,949
6. Interest	1,374,153	975,196	...	398,957
7. Miscellaneous Receipts	2,845,879	1,812,970	...	1,032,909
	$29,595,203	40,355,620	12,200,232	1,439,815
8. Land Sales... ...	4,513,262	2,114,000	...	2,399,262
TOTAL ...	$34,108,465	42,469,620	12,200,232	3,839,077
		Net Increase ...	$8,361,155	

The main increases include $4,951,192 under Income Tax Collections, a new Item of Revenue, $295,146 under liquors and $118,193 under tobacco.

Stamp duties increased by $225,805, but Estate duty fell from $740,402 in 1919 to $719,605 in 1920.

The revenue from Posts and Telegraphs shows an increase of $146,988.

Interest on Bank accounts shows an increase of $16,177, on loans an increase of $53,698 and on opium purchase money outstanding $40,875 making a total increase of $110,750. On the other hand interest on investments fell from $885,663 in 1919 to $376,707 in 1920, being a fall of $508,956. There were other decreases of $751 making a total decrease of $509,707 or a net decrease over all interest items of $398,957. The loss of interest on investments was mainly due to the necessity of applying the Colony's funds in financing Food Control, all fixed deposits with Banks had to be realised.

Profits on exchange amounted to $1,424,531; this was due to the high value of the rupee in the early part of the year. Profits on money order rates amounted to $9,330 only as compared with $81,027 in 1919.

B.—EXPENDITURE.

	1919.	*1920.*	*Increase.*	*Decrease.*
	$	$	$	$
1. Charge on account of the Public Debt ...	37,083	37,083	...	...
2. Pensions	630,636	679,920	49,284	...
3. Charitable Allowances ...	11,156	14,483	3,327	...
4. The Governor ...	82,919	171,445	88,526	...
5. Colonial Secretary, Resident Councillor and Residents ...	202,150	371,123	168,973	...
6. Government Printing Office	99,043	278,666	179,623	...
7. Land and District Offices	248,549	344,605	96,056	...
8. Forests	33,498	34,628	1,130	...
9. Chinese and Indian Immigrants' Protection	84,232	109,819	25,587	...
10. Treasury	123,348	211,719	88,371	...
11. Audit	46,742	75,243	28,501	...
12. Director of External Audit	...	4,912	4,912	...
13. Marine	455,215	612,715	157,500	...
14. Legal	386,339	486,977	100,638	...
15. Police	1,122,669	1,408,922	286,253	...
16. Prisons	330,380	464,383	134,003	...
17. Medical	286,319	465,380	179,061	...
18. Hospitals and Dispensaries	784,922	1,085,784	300,862	...
19. Veterinary	29,932	49,475	19,543	...
20. Education	385,478	562,086	176,608	...
21. Ecclesiastical ...	21,510	23,340	1,830	...
22. Transport	78,634	211,162	132,528	...
23. Military Expenditure ...	4,369,680	3,171,065	...	1,198,615
24. Miscellaneous Services ...	20,590,584	23,501,948	2,911,364	...
25. Post Office	678,006	881,517	203,511	...
26. Government Monopolies	484,808	590,825	106,017	...
27. Agricultural Department	1,338	8,550	7,212	...
28. Botanical Gardens ...	63,871	73,911	10,040	...
29. Raffles Museum and Library	16,574	35,946	19,372	...
30. Public Works Department	368,154	354,808	...	13,346
31. Survey Department ...	...	187,066	187,066	...
32. Public Works, Recurrent	488,493	576,148	87,655	...
33. Public Works, Extraordinary ...	892,571	1,465,890	573,319	...
War Expenditure ...	1,466,400	708,774	...	757,626
TOTAL ...	$34,901,233	39,260,318	6,328,672	1,969,587
	Net Increase	...	$4,359,085	

The expenditure on Personal Emoluments was $8,796,587 as compared with $4,685,159 in 1919. This advance was due to revisions of the salaries of Government Servants, and to the fact that arrears of 1919 salaries arising out of those revisions were paid in 1920.

Military expenditure shows a decrease of $1,198,615. This is due to the fact that no arrears of Defence Contribution for 1919 were paid.

The amount expended on salaries of acting officers amounted to $208,873.73 as compared with $126,083.78 in 1919. This increase may be attributed partly to the improved facilities for granting officers leave, and partly to revisions of salary.

Exclusive of Defence Contribution and of Special Expenditure connected with the war, the following table will show the Colony's expenditure for the last seven years and the portion of it which has gone in Public Works Extraordinary:—

	Total Expenditure.	*Public Works Extraordinary.*
	$	$
1914 ...	7,746,594	926,077
1915 ...	7,207,478	676,463
1916 ...	6,514,527	318,788
1917 ...	6,774,048	208,908
1918 ...	8,687,204	458,257
1919 ...	29,111,433	892,571
1920 ...	35,452,052	1,465,890

Of the large figure of expenditure for 1920, which represents an increase of nearly 27 millions over 1918 and of 6 millions over 1919, Miscellaneous Services accounted for $23,501,948 which is an increase of roughly $20,000,000 on the 1918 figure. This may be almost entirely explained by the following items, which may be classed as abnormal expenditure:—

	$ c.
Loss on Rice	9,460,200.42
Food Control Administration Expenses ...	220,356.04
Contribution to Imperial War Funds ...	7,186,222.28
Immediate and Temporary Allowances ...	2,633,567.38
Total ...	$19,500,346.12

other large, and in some respects exceptional, items of ex penditure are:—

		$ c.
Johore Causeway	...	215,599.64
Purchase of Land	...	1,093,804.00
Public Works Extraordinary		1,465,890.00

The expenditure of the various Government departments has increased in every case but the Public Works Department, the most noticeable increases being Police $286,253, Hospitals and Dispensaries $300,862, Post Office $203,511, Government Printing Office $179,623, Medical $179,061, Education $176,608, Colonial Secretary $168,973, Marine $157,500.

MILITARY AND WAR EXPENDITURE.

The figure of $708,744 entered as war expenditure does not represent expenditure actually incurred in 1920, but expenditure incurred between the 1st July, 1918 and the 31st December, 1919, which had been charged to suspense account, and which was eventually adjusted by a vote taken in 1920.

The expenditure on Volunteers, Reserve Force and Civil Guard, in 1920 amounted to $72,821.91 and several small items of expenditure arising out of the war totalled $27,132.48. This expenditure has all been included under the heading "Miscellaneous Services".

Defence Contribution for 1920 was included in the sum of £1,000,000 paid to the Imperial Government in that year.

Among excesses of Revenue over the Estimates were:—

Interest $257,275, Premia on Grants $236,676, Stamp duties $1,284,875, Premia on Special Sales of Town Lands $1,753,373, Postage Stamps $202,671, Land Rents $112,680 and Miscellaneous Receipts $1,745,700.

The principal savings on the Expenditure Estimates were in respect of Public Works Extraordinary $1,387,849, Post Office $139,162 and Military Expenditure $107,073. Overpayments recovered showed a sum of $111,637 not estimated for.

The following comparative statement shows the revenue and the expenditure of the Colony for the past seven years:—

		Revenue.	*Expenditure.*
		$	$
1914	...	14,016,882	10,180,189
1915	...	14,131,691	10,196,560
1916	...	17,325,695	11,046,353
1917	...	19,672,104	11,369,392
1918	...	23,262,015	15,966,145
1919	...	34,108,465	34,901,233
1920	...	42,469,620	39,260,318

The Assets and Liabilities of the Colony on the 31st December, 1920, were as follows:—

Liabilities.		*Assets.*	
	$		$
Deposits	16,052,071	Indian Agency Account ...	817,103
		Foodstuff Agency Account	3,375,857
		Investments	10,251,117
		Advances	3,013,702
Suspense (Currency Commissioners) ...	5,140,644		
		Loans:—	
Drafts and Remittances ...	487,090	Municipalities ...	3,396,645
		Kelantan Government	120,000
Federated Malay States and Johore Foodstuff Account ...	17,133,903	Singapore Harbour Board	3,637,124
Cash in transit ...	14,574	Penang Harbour Board	587,518
		Ho Hong Steamship Co.	300,000
Excess of Assets over * Liabilities ...	44,876,032	Imprests	54,131
		Suspense (*a*)	44,335,543
		Cash	13,815,574
TOTAL ...	$83,704,314	TOTAL ...	$83,704,314

The excess of the assets over the liabilities increased during the year by $3,209,302.

* The Cash in Treasuries and Banks amounted to $18,008,534. The readily realisable investments were worth at market prices of 31st December, 1920, $9,221,785,—a total of $27,230,319 giving, after provision of $21,192,715 to meet deposits and suspense account, an available cash balance of $6,037,604.

(*a*) Includes Suspense Account Foodstuffs $44,151,402.

PUBLIC DEBT.

The indebtedness of the Colony in respect of the loan raised by the issue of $3\frac{1}{2}$ per cent Straits Settlements Inscribed Stock under the provisions of Ordinance IV of 1907 amounted, on the 31st December, 1920, to £6,913,352, of which the equivalent in local currency is $59,257,302.

The expenditure upon service in respect of which this loan was raised stands as follows:—

	$
Singapore Harbour Board ...	47,720,526
Penang Harbour Board ...	2,093,974
Municipal Commissioners, Singapore	4,484,460
Municipal Commissioners, Penang	1,250,000
Government Harbour Works	320,137
Total ...	$55,869,097
Loan Expenses and Cost of Conversion (1907 Loan) less interest received ...	3,388,205
Total ...	$59,257,302

The charge on account of interest on and expenses of this loan was $2,082,358 in 1920. This charge is, however, borne by the Singapore Harbour Board and the other bodies to whom portions of the loan have been allotted.

The indebtedness of the Colony under the $5\frac{1}{2}$ per cent War Loan 1918 stands at $28,655,700 and under the $5\frac{1}{2}$ per cent Conversion Loan 1919 at $36,671,900.

The Straits Settlements and Federated Malay States Victory Loan was floated on the 20th January, 1920 and closed on the 31st August, 1920. Subscriptions amounted to $15,074,300. The bonds are bearer bonds at 5 per cent per annum redeemable at par on the 1st September, 1934.

EXCHANGE.

The demand rate (Bank opening rates only) ranged during the year between 2/4 $\frac{1}{32}$ and 2/3$\frac{23}{32}$.

CURRENCY.

Excluding subsidiary coins, the Currency of the Colony in circulation in the Currency Area at the end of the year consisted of $101,587,186.80 in currency notes and $6,483,003 in dollars and half-dollars, while there were still in circulation bank notes issued by the Hongkong and Shanghai Banking Corporation and the Chartered Bank of India, Australia and China to the value of $153,209.

At the beginning of the year 1920, the Currency notes in circulation amounted in value to $174,631,973.70. The demand for Currency which had maintained throughout the 2nd half of 1919 continued, with little abatement, until the 4th March, 1920, and the record value of notes in Circulation was reached on that day, when it stood at $183,212,221.80.

It is curious that within 11 days exchange so varied that the reverse process started and the Currency Commissioners were called upon to sell Sterling. With a very occasional swing back of the pendulum, this process continued until the end of the year, and the Currency Commissioners sold altogether Sterling to the amount of £11,515,000. The value of notes in circulation was reduced to $101,587,186.80 by the end of the year 1920, but even this figure is more than double the pre-war figure of $43,834,548.

The coin reserve held by the Commissioners at the end of the year against the note circulation amounted to $54,229,332.32 consisting of £328,251 in gold held locally and $8,523,208.33 in silver partly in the Colony and partly held by the Mint Master, Bombay, for coinage purposes, and £5,004,130-2-8 in gold in London.

The investments held by the Commissioners on account of the Note Guarantee and Depreciation Funds were worth, at cash bargain or minimum prices, at the end of the year, $43,731,892.30, the cost price of those investments being $57,631,185.36.

The decrease in value compared with original cost is due to the general depreciation of all securities.

The Note Guarantee Fund at the end of the year was worth $100,504,679.82 (Coin portion $54,229,332.32, Investment portion $43,731,892.30 and on deposit with the Government pending investment $2,543,455.20), while the Gold Standard Reserve Fund at the same date was worth $11,462,529.31. The total of the funds controlled by the Commissioners was, therefore, $111,967,209.13, or $10,380,022.33 more than the total note circulation at the end of the year.

New subsidiary coin of 400 fine to the extent of $621,000 was received from the Bombay Mint during the year, thus completing the number ordered. This was put into circulation without delay, but the supply of silver was still insufficient and it was found necessary to increase the issue of ten-cent notes. The new issue of ten-cent notes was obtained from England, and, as was to be expected, proved to be a vast improvement on the locally printed notes. The new notes were gladly accepted by the public. Notes in circulation of a face value less than $1 stood at the end of 1920 as follows:—

	$	c.
10-cent notes printed in United Kingdom	1,565,000	00
10-cent notes printed locally ...	1,760,934	80
25-cent notes printed locally ...	38,900	00

The number of notes destroyed during the year totalled 4,118,343 against 3,199,912 in 1919, an increase of nearly one million. This is most satisfactory but the notes presented for cancellation were still in excess of the number destroyed.

Ten-cent notes accounted for 2,000,000 of the number destroyed.

At the beginning of the year the total number of notes awaiting destruction was 3,704,378, and further 5,612,546 were presented during the year, making a total of 9,316,924 for destruction. The total number destroyed was 4,118,343 as stated in the preceding paragraph, and the balance remaining for destruction at the end of the year was consequently 5,198,581.

ENEMY PROPERTY.

The balance to the credit of the Custodian of Enemy Property at the end of the year was $13,385,245.53 of which $13,205,176.38 was invested. In addition $210,076 was specially invested for the separate accounts of certain Enemies and does not appear in either of the above figures.

FOOD CONTROL.

The position at the beginning of the year was such as to cause grave anxiety, owing to the low stocks of rice in the country. Owing to a disastrous drought in Siam, the export of rice from that country, which normally has an exportable surplus of 1,000,000 tons and supplies this country with about two-thirds of its requirements, was absolutely prohibited throughout the year 1920. The export of rice

from Burma was strictly controlled by the Government of India, and the price for export had been raised to Rs. 300 per ton, which was more than double the price at which Burma rice was obtainable in 1919. No assurance at that time could be obtained from the Government of India as to the quantity of rice that would be allotted to Malaya for the year 1920. Saigon therefore was the only available free market in which rice could be bought. Although the crops in Saigon were good, the unusual competition created by conditions in Siam and Burma forced up prices in Saigon to abnormal heights, difficulties being further increased by the very adverse rate of exchange.

Contracts were entered into between November, 1919, and April, 1920, for the purchase of 130,000 tons from Saigon, money being laid down there for that purpose. From November, 1919 to February, 1920, arrangements for purchase and shipping in Saigon were made by H. B. M. Consul, but later Mr. KNOX WILSON, of Messrs. Adamson, Gilfillan & Co., proceeded to Saigon and acted as Agent for the Government. Mr. KNOX WILSON remained from 1st March until 4th June, when he proceeded to Rangoon to act in a similar capacity regarding Government purchases of Burma rice.

The average price paid for the Saigon rice was 9.30 piastres per picul, which at the rate of exchange at which the money was laid down came to $434.48 per ton, which with charges finally came to $466.45 per ton or $1.66 a gantang.

Burma Exports.—All rice bought from Burma had to be purchased through the Rice Commissioner at Rangoon at a fixed price of Rs. 300 per ton f.o.b.* The quantity allotted to Malaya was a matter for the Government of India to decide.

In January, 1920, the Straits Settlements Government was notified that 60,000 tons would be allotted to Malaya for 1st quarter of the year. In February, a further allotment of 36,000 for the whole year was made. Later in February, the year's allotment was increased to 114,000 tons, and in April the total was increased to 240,000 tons, subject to the whole quantity being purchased before the end of June.

An effort was made to obtain a reduction of price without success. Owing to the condition of purchase mentioned above, rupees were laid down in Rangoon at a time when exchange was adverse to this Government. The rice to be obtained from Burma was both white and parboiled, and to supplement the parboiled stocks, the Central Milling Agency, Penang,

* $1.06 per gantang f.o.b.

were allowed to bring in 250,000 bags of padi from Saigon to be locally milled into parboiled rice, which Government undertook to purchase from them at 95 cents per gantang.

The brands of rice known as "puttoo" and "cargo broken"—both used for animal and poultry food—were obtained from Burma and not included in the 240,000 tons allotted to Malaya. Both kinds were imported on behalf of approved parties in Singapore and Penang, the price of "cargo broken" alone being controlled.

Applications have been made from time to time for permission to import parcels of rice of special qualities for private consumption, but it has been found necessary to refuse all such requests in order to avoid (*a*) inequality of treatment of consumers and (*b*) fraudulent practices, such as sifting, etc. In addition to the purchases of rice mentioned above, a contract for the purchase of 5,000 tons of white rice from Saigon was made in September, 1920, for delivery in February and March, 1921.

Towards the end of the year, the crop prospects in the rice-growing countries of Burma, Siam and Indo-China became very good, and as a first step towards Decontrol, purchases were made of 20,000 tons of white rice from Siam, 15,000 tons of white rice from Rangoon and 5,000 tons parboiled rice from Rangoon, all for delivery early in 1921.

The object of these purchases, which were made at about 50 cents per gantang c.i.f., was to arrange with the trade that they should take over all Government balances as on February, 1921, at an average price of old and new stocks and gradually resume the distribution and supply and generally to restore their trade. The Government policy was publicly explained to rice dealers in Singapore, Penang and Kuala Lumpur during December, 1920. A detailed account of the steps taken will more properly fall into next year's report.

Local Crops.—As little interference as possible has been exercised in respect of crops grown for the owner's consumption. Rice milled from local padi has been held at the disposal of the Food Controller and padi from certain districts could only be sold to certain mills. The price of padi is not fixed, but there is a Government guarantee of a minimum price of 13 cents a gantang for 5 years from May, 1919. Detailed arrangements for giving effect to this guarantee if and when it becomes necessary to do so have been submitted to Government by the Director of Food Production.

The mills were required to keep a record of the prices they paid for padi and the resultant rice for the season was taken over at a price of 80 cents per gantang.

Distribution of rice.—Rice on arrival in Penang was taken over by the Rice Distributing Agency, stored in godowns, white rice being issued to Wholesalers for distribution to the Federated Malay States and direct to Retailers for local consumption. Later, the Wholesalers' trade was cut out, rice being imported direct to Port Swettenham from Rangoon or shipped direct to Teluk Anson from Penang.

Parboiled rice was sent to estates direct, special arrangements being made with the Federated Malay States Railways for distribution by rail.

Rice on arrival in Singapore was stored in godowns, acquired from time to time, and thence issued to Wholesalers who supplied Wholesalers outside Singapore. Formerly, there were in Singapore some 1,300 or 1,400 Retailers, but the number was cut down to about 300. To supply the community formerly served by the numerous Retail shops, a series of Depôts were organised by a voluntary Committee of Chinese gentlemen known as The Rice Distribution Board and these Depôts were of invaluable service to the community and existed until February 15th, 1921. Special thanks are due to the members of the Board for their public-spirited action, as their labours were freely given and for the general good of the people.

Household rationing, although adopted in certain portions of the Federated Malay States, was not adopted in the Colony.

Stocks.—The stock held by Government and in sight at the end of the year amounted to 74,000 tons, the estimated monthly consumption during 1920 being about 27,000 tons.

Prices.—The average price of rice delivered in 1920 and bought during 1920 for delivery 1921 (excluding 40,000 tons bought in December, 1920, for delivery January, 1921, to restore the trade) is estimated to be $1.29¼ per gantang (1 gantang = 6 catties, 1 catty = 1⅓ lbs.).

The Controlled Retail price of rice to consumers in Singapore and Penang was on January 1st, 1920, 75 cents per gantang. On 22nd January it was raised to $1 per gantang. On the 18th May it was again raised to $1.26 per gantang. On the 13th September, the price was reduced to $1 per gantang, at which price it remained until the end of the year. It was decided in view of the serious industrial position prevailing in the Peninsula to make a further reduction to 80 cents per gantang as from January 3rd, 1921. The reduction to this latter figure took effect from January 10th (Note.—A further reduction to 70 cents per gantang took place as from February 1st, rendered possible owing

to Government having bought 40,000 tons round about 50 cents per gantang as stated above). It is estimated that the loss to the three Governments of the Straits Settlements, Federated Malay States and Johore on 1st January, 1920, stood at about $7,000,000. This was entirely accounted for by compensation to dealers for heavy stocks held in July, 1919.

A further loss of about $12,500,000 was incurred between 1st January and 18th May. This loss was increased by about $2,000,000 between the 18th May and the 13th September.

Had the remaining Government stocks, other than the 40,000 tons bought round about 50 cents per gantang been sold at $1 per gantang, it is estimated that the total loss to the three Governments concerned would amount to $39,000,000 when all Government stocks were exhausted. The effect of selling at 80 cents per gantang is estimated further to increase the loss to the three Governments by $3,700,000, making a total estimated loss of $42,700,000, of which the Colony bears $\frac{3}{8}$, *i.e.*, $16,012,500. Against this loss is to be set off the profit that will accrue on the sale of 5,000 tons parboiled purchased in the neighbourhood of 40 cents per gantang, and sold at considerably higher controlled rates, a purchase made with the object of enabling Government stocks of White and Parboiled rice to be finished simultaneously.

Other foodstuffs.—The price of Australian wheat flour was controlled until April, when control prices were removed, as it was found that flour from other sources could successfully compete with Australian flour. Export is still controlled, but export in limited quantities is allowed.

When the rice position in the early part of the year was precarious, 1,000 tons of Mealie from British East Africa and 1,000 tons from South Africa were obtained. There was a good demand at first, but this slackened as rice supplies became ensured and the balance had to be sold for what it would fetch.

The bulk of the milk imported is by one Company—the Nestles Company—and the price of their products has been controlled, and only limited export allowed. Other brands introduced by other firms are dearer than Nestles and cannot compete, and the price of such brands has not been controlled.

The price of Nestles Milkmaid Sweetened Condensed—the most largely used variety—was raised from $22 per case in December, 1919, to $24.65 per case in August.

It has not been possible to make any reduction in other foodstuffs, in view of an all-round increase in the world's prices and the rise in exchange, but steps are being taken

which it is hoped will have an appreciable and favourable effect in reducing price of local market commodities.

Mr. HOSE succeeded Mr. W. PEEL as Food Controller on 15th March, 1920, and was in turn succeeded by Mr. F. M. BADDELEY on October 1st, 1920.

IMMIGRATION.

(I).—CHINESE.

One hundred and twenty-six thousand and seventy-seven immigrants arrived from China, an increase of 77·7 per cent as compared with the figure for 1919 and a decrease of 53·2 per cent as compared with that for 1911 which showed the highest number yet recorded.

As compared with the average for the previous ten years, 1910 to 1919, the number arriving in 1920 shows a decrease of 25·3 per cent.

Adult males formed 66·5 per cent and adult females 17·7 per cent of the immigrants.

Despite unfavourable exchange rates which however improved during the year and the undoubted high cost of living in the Straits, immigration increased considerably as compared with 1919. This increase was helped by a gradual fall in the passage rates both from Amoy and Swatow and Hongkong to Singapore.

(II).—SOUTHERN INDIAN.

The total number of immigrants (deck passengers) arriving at Penang from Southern India during the year was 95,220 as compared with 101,433 in 1919.

The number of Indians leaving the Colony for Southern India was 55,481 as against 46,767 in 1919.

The figures for arrivals for the last four years are as follows:—

	1917.	*1918.*	*1919.*	*1920.*
Assisted immigrants*	78,407	55,583	88,021	78,855
Other immigrants ...	11,670	9,708	13,412	16,365
Total ...	90,077	65,291	101,433	95,220

* "Assisted immigrants" are of two classes:—(i) the independent labourer who gets a free ticket from the Emigration Agent in India upon proof that he is a *bonâ fide* labourer, and who is free to work where he pleases; (ii) the Kangany labourer, who is recruited in India by a licensed Kangany, and who goes to a particular place of employment, though he is free, upon arrival there, to give a month's notice of his intention to leave. There is no indentured Tamil labour in the Colony.

The assisted immigrant consisted of 70,514 adults and 8,341 minors. Of the adults 56,296 were men and 14,218 women.

The health of estates in Penang, Province Wellesley and the Dindings was very satisfactory during the year, the death-rate in Province Wellesley being 15·92 per mille and in the Dindings 12·16 per mille. Among the 403 labourers employed on estates in Penang the death-rate was 4·96 per mille.

During 1920, 1,331 adult and 275 minor, decrepit and destitute Indians were assisted with a passage back to India.

The rate of assessment to the Tamil Immigration Fund was fixed at $2.50 for the first quarter and $6 for the three remaining quarters of the year 1920. The rate for the last quarter was subsequently reduced to $3.

The Income of the Fund was $5,872,283.48 and its expenditure $4,701,087.03.

(III).—Netherlands Indian.

The number of Netherlands Indian labourers on estates in the Colony is 2,545. No contracts under the Netherlands Indian Labourers' Protection Ordinance, 1908, are in force but approximately 511 local contracts for 300 days are in force in Province Wellesley.

CHINESE PROTECTORATE.

The Chinese Community has suffered severely from the slump as have other communities. Wages have fallen and at the end of the year there were signs of unemployment, notably in Malacca.

Political societies gave no real trouble.

VITAL STATISTICS.

The number of births and deaths registered during the year was 25,623 and 28,710, respectively.

The estimated population of the Colony was 864,858—the ascertained population in the last census year 1911 was 711,951. The crude birth-rate was 29·63 per 1,000 against 30·30 in 1919: the percentage of males born was 52, females 48.

The infantile mortality (deaths of children under one year) gives a ratio of 194·86 per thousand births against 212·42 in 1919.

The number of deaths from infantile convulsions, 3,557 (all under 2 years of age), shows the urgent necessity for training further native midwives: many of these deaths are due to tetanus of the new born, and are preventible by ordinary cleanliness.

There were 1,189 still-births, mostly due to syphilis. The death-rate, 33·20 per thousand, is a slight increase on the rate of 33·04 in 1919. The lowest death-rates in the last 10 years were 29·15 in 1915 and 30·70 in 1916: the decrease in mortality in those years was largely due to a wartime measure, and the repatriation of thousands of decrepit Chinese to their native land. The highest death-rates in the past 10 years were 46·46 per thousand in 1911, a very malarial year, and 43·85 in 1918 when the influenza epidemic struck the country.

The deaths from Pneumonia and Broncho-pneumonia (largely influenzal) this year are 4 times the number in 1915, while 362 deaths are directly registered as due to Influenza.

The Tamil is the most delicate, and the Chinese the hardiest of our Asiatic population. The Tamil suffers most severely from influenza and pneumonia, the Chinese least, while the Malay occupies an intermediate position. Deaths from these diseases are most numerous between 25 and 40 years of age, the most productive period of life.

Beri-beri accounted for only 1,025 deaths against 1,430 in 1919, and 1,958 in 1918. This marked decrease is coincident with the use of parboiled or undermilled rice, supplemented by other articles of diet, instead of the highly polished Siam rice.

Now that the latter is again freely obtainable the Beri-beri death-rate will doubtless rise.

It may be said with confidence that rationing has benefited the health of the native races.

The two diseases to which the greatest number of deaths are attributed are Malarial Fevers, 4,690 deaths, and Tuberculosis, 3,336 deaths.

Each year since 1917, though never before, the deaths from Tuberculosis have exceeded 3,000. The deaths from malarial fevers are about the average.

Dysentery caused 1,085 deaths and Diarrhœa 337 deaths.

Dangerous infectious diseases notified in the Colony have not played a large part in our mortality. There were 20 deaths from Cerebro-Spinal Meningitis, 55 from Plague, 33 from Cholera and 3 from Small-pox.

METEOROLOGICAL.

The rainfall recorded was as follows:—

	1920.
Singapore	2340·75 m. m.
Labuan	3458·00 ,,
Penang	2584·00 ,,
Province Wellesley ...	2329·50 ,,
Malacca	2333·50 ,,
Dindings	1661·60 ,,

The mean temperature of the air throughout the year was 83·09. The maximum recorded was 95·0° in Penang on July 28th and 94·0 in Malacca on April 3rd. The minimum was 68·0 on 1st October and 27th November. The minimum in Singapore was 71·0 on 25th January, 16th February and 3rd August.

AGRICULTURE.

In the early part of 1920, the price of rubber was quite satisfactory and the industry appeared to be in a sound position. From the middle of the year onwards, however, there was a rapid fall in price due to restriction of credit universally and also to over-production such as had not been anticipated. The conditions in Central and Eastern Europe were such that there was no market in these countries, while the demand in Western Europe and America fell rapidly as a result of the restriction of credit. At the close of the year the price was such that it was insufficient to meet the cost of production in most cases and a condition of serious depression existed, which caused a reduction both of labour forces and of European supervision. Many estates have greatly restricted their output. Some have stopped tapping entirely. Many small owners have had to seek employment and leave their land to take care of itself, since they are unable to support themselves on the money realised by the sale of their rubber. In consequence the holdings have begun to be overgrown with bush and lalang grass, while the efforts of the Agricultural Department, commenced early in the year to encourage and, where necessary, to enforce better methods of cultivation and sanitation, have had recently to be suspended, as they were liable to cause undue hardship.

So far, fortunately, no serious diseases of rubber have been recorded apart from the prevalence of Pink Disease to some extent in Province Wellesley and the universal presence everywhere, as in the past few years, of Brown Bast.

The price of copra has been somewhat lower than in 1919, the average being about $22 per pickul. The price paid to the growers for nuts has ranged between $5 and $10 per hundred. Early in the year the Agricultural Department's officers found that coconut beetles had become extremely prevalent, especially in Malacca. This condition is partly due, in Malacca, to the absence of any restriction on the felling of coconut trees with the result that large numbers have been felled for various reasons and have been allowed to form very effective breeding places for these insects. All through the year active measures have been taken with a view to suppressing these breeding places. Lectures have been given to landowners all over Malacca, while throughout the Colony very vigorous steps have been taken under the Agricultural Pests Ordinance to have all accumulations of coconut, or other suitable refuse where beetles breed, thoroughly destroyed or buried. It will, however, take some time before a satisfactory condition of sanitation is reached and the work will be continued. No other pests of coconuts were worthy of mention.

Vegetables were fairly plentiful on the Malacca market until the middle of the year, but were scarce during the end of the second quarter and the beginning of the third.

The first main fruit crop was a failure generally and in Province Wellesley the second crop was also light. In Malacca, however, the second crop was satisfactory and fruit was plentiful and reasonably cheap at the close of the year. There was a considerable importation of fruit into Province Wellesley from Perak during December since it was plentiful in that State as elsewhere throughout the Federated Malay States.

Rice.—The harvest obtained in Malacca early in 1920 was somewhat disappointing owing to the damage done by rats and other pests. On the other hand the crop coming to maturity at the end of the year was very promising in appearance and on the whole free from pests.

The area under padi in Province Wellesley and Malacca has again shown considerable increase and is believed to be higher in Malacca than it has been for many years. In Penang the area is about the same as in 1919-1920. The increase is due to the high price of rice. Although a considerable extension of the area planted with padi has resulted from

the efforts of administrative officers and others to increase the local production of rice in order to supplement the restricted supplies obtainable from other countries during the last 2½ years, yet it should not be assumed that this increase will be of a permanent nature unless the price of rice remains above the local cost of production.

The Acting Assistant Agricultural Inspector remarks that in Province Wellesley the light yielding short season varieties are grown, as the cultivators avoid the heavy yielding varieties on account of their longer maturation period. The short season varieties are also grown in Malacca as is the general rule in the southern part of the Peninsula.

There was an outbreak of army worms on the padi nurseries in parts of Malacca, but natural enemies and heavy rain combined with hand picking of the insects rapidly eradicated them and no permanent harm resulted. The Officers of the Agricultural Department have paid considerable attention during the year to the question of padi pests and it is hoped that when investigations are completed the control of several of these may be effected. The problem of reducing the damage caused by rats is very difficult, but it is hoped that some good may be done in time. Much depends on the vigorous and complete co-operation of the owners of the padi land if effective results are to be obtained, and educational measures will be necessary to achieve this.

Water Hyacinth (Eichhornia crassipes).—This common water weed is to be found in considerable quantity in parts of Province Wellesley and Malacca. In some places it undoubtedly obstructs the flow of water to the padi fields and measures may have to be taken for its control.

It was not until the end of the year that a European Officer for the Straits Settlements Agricultural staff arrived in the country and he has had to obtain some knowledge of his duties before taking up his work in Malacca. During the year, therefore, the Assistant Agricultural Inspector, Negri Sembilan, has acted in Malacca and the Assistant Agricultural Inspector, Perak, acted in Province Wellesley on assuming his appointment in June.

The Department has made a good start with the work of training the necessary staff and also with the general work of improving agricultural methods in the Colony. This is in spite of the fact that the Department itself has been faced with a very serious shortage of officers especially in the Inspection Division, so that much credit is due to the officers who have performed the work in the Colony in addition to their already extensive duties in the Federated Malay States.

SHIPPING.

The total tonnage of merchant vessels arriving and departing was 24,027,912 as compared with 18,885,183 in 1919.

Statement showing combined Arrivals and Departures of Merchant Vessels for the Years 1919 and 1920.

										Net Increase ...		5,142,729

In the last five years the combined arrivals and departures of merchant vessels have been as follows:—

In 1916	...	...	19,528,671 tons.
1917	...	...	15,784,369 ,,
1918	...	...	13,064,270 ,,
1919	...	...	18,885,183 ,,
1920	...	...	24,027,912 ,,

In the small craft (steamers under 50 tons and native vessels) the combined arrivals and departures were 62,395 in number and 2,576,161 in tons in 1920 as compared with 63,770 and 2,566,091, respectively, in 1919.

Seven new steam-launches and motor-vessels with a tonnage of 149 tons gross and 48 sailing-vessels of 5,120 tons were registered during the year under the Imperial Shipping Acts. Under the Merchant Shipping Ordinance, 1910, 28 new sailing-vessels of 3,078 tons were licensed under section 425, and 560 vessels of 8,323 tons were registered under section 426.

TRADE.

The trade of the Colony in 1920, which was satisfactory for the first six months of that year, declined soon after the close of the half-year.

The following figures excluding Coin and Bullion show the value of the foreign trade of the Colony in thousands of pounds sterling for the last five years.

Merchandise—

	Imports.	*Exports.*	*Imports Merchandise. Increase over the preceding year.*	*Exports Merchandise. Increase or decrease over the preceding year.*
	£	£	£	£
1916 ...	61,855	56,934	...	...
1917 ...	73,987	72,307	12,132	+15,373
1918 ...	81,618	71,922	7,631	− 385
1919 ...	96,664	99,318	15,046	+ 27,396
1920 ...	124,216	102,536	27,552	+ 3,218

The value of the inter-port trade, including treasure for the last five years, was as follows in thousands of pounds sterling:—

	Imports.	*Exports.*	*Imports. Increase over the preceding year.*	*Exports. Increase over the preceding year.*
	£	£	£	£
1916 ...	6,412	6,488	...	...
1917	8,137	8,720	1,725	2,232
1918 ...	*9,183	*9,584	1,046	864
1919 ...	†13,164	†13,235	3,981	3,651
1920 ...	14,938	14,797	1,774	1,562

The aggregate trade for the year 1920 was therefore £226·7 millions, against £195·9 millions in 1919, an increase of £30·8 millions over 1919.

Bullion and Specie.—The figures for Bullion and Specie in thousands of pounds sterling for the year were:—

Imports.	*Exports.*
£	£
23,975	16,936

Distributed according to classes the foreign trade records in thousands of pounds sterling are as follows:—

	Imports.		*Exports.*	
	1919.	*1920.*	*1919.*	*1920.*
	£	£	£	£
1. Live Animals, Foods, Drinks and Narcotics	34,901	43,579	26,659	28,141
2. Raw Materials	44,767	47,510	60,112	59,229
3. Manufactured and partly Manufactured Articles	16,996	33,127	12,547	15,166
TOTAL ...	96,664	124,216	99,318	102,536

The figures, except exports of "Raw Materials", exceeded those of the previous year.

The volume of Straits Produce shipped was in many cases less than in 1919.

* Excluding Coin and Bullion. † Coin and Bullion included for second half of 1919 only.

Articles of Straits Produce on the whole gave larger average prices than in 1919.

Tin.—The imports of tin and tin-ore were in 1920, 84,000 and 1,068,000 pikuls, respectively, as against 179,000 and 1,038,000 pikuls, respectively, in 1919 as shown below:—

	1919.		1920.	
	Tin.	*Tin Ore.*	*Tin.*	*Tin Ore.*
	Pikuls.	*Pikuls.*	*Pikuls.*	*Pikuls.*
Malay States ...	133,000	686,000	61,000	732,000
Netherlands Indies	38,000	113,000	1,000	146,000
Siam ...	6,000	207,000	5,000	143,000
Other Countries ...	2,000	32,000	17,000	47,000
Total ...	179,000	1,038,000	84,000	1,068,000

The exports of tin in 1919 and 1920 were as follows:—

	1919.		1920.	
	Pikuls.	*Value.*	*Pikuls.*	*Value.*
		$		$
United Kingdom	324,000	41,347,000	225,000	34,344,000
United States of America ...	454,000	59,928,000	472,000	73,095,000
Other Countries	219,000	27,445,000	131,000	20,325,000
Total ...	997,000	128,720,000	828,000	127,764,000

Para Rubber.—The imports of Para Rubber in 1919 and 1920 from the following countries were as follows:—

	1919.		1920.	
	Pikuls.	*Value.*	*Pikuls.*	*Value.*
		$		$
Malay States ...	1,412,000	132,093,000	1,305,000	120,454,000
Netherlands Indies...	456,000	37,089,000	373,000	30,009,000
Other Countries	79,000	6,623,000	80,000	7,398,000
Total ...	1,947,000	175,805,000	1,758,000	157,861,000

The exports of Para Rubber in 1919 and 1920 to the following countries were as follows:—

	1919.		1920.	
	Pikuls.	*Value.*	*Pikuls.*	*Value.*
	—	—	—	—
		$		$
United Kingdom	406,000	44,088,000	406,000	40,507,000
United States of America ...	2,310,000	230,511,000	1,880,000	202,008,000
Other Countries	254,000	24,227,000	277,000	26,455,000
Total ...	2,970,000	298,826,000	2,563,000	268,970,000

It will thus be seen that there was a decrease in quantity of tin exported in 1920, and the value also decreased by nearly one million dollars.

As regards Para Rubber, both Imports and Exports showed large decreases in quantity and value as compared with the previous year. The value of imports decreased by nearly 18 million dollars and that of exports by over 29 million dollars.

IMPORTS.

In "Foodstuffs, drinks and narcotics," increased values are seen under the sub-heads rice, fish, dry and salted, preserved fruits, bran, wheat flour, milk, brandy, oilman's stores, arecanuts, cigars and cigarettes and Benares opium, but sago flour, black pepper and sugar fell in values.

Under the heading "Raw Materials," enhanced values appear in tin-ore, coal, rattans, benzine, timber and kachang oil, while decreased import values are apparent in tin, Para rubber and Illipi nuts.

In the "Manufactured Class," cotton piece-goods, yarns, apparel, sarongs, slendangs and kains, silk piece-goods, machinery, ironware, motor-cars, motor-cycles and accessories, cement, rubber tyres and woodenware show increased values, but gunnies fell in value.

In quantities imported there were increases under coffee, bran, wheat flour, salt, cotton piece-goods, cement and benzine.

Declines in quantities are most noticeable in rice, Para rubber, sugar, ground-nuts and copra.

EXPORTS.

Exports of the following show increased values:—

"Foodstuffs, drinks and narcotics"—

Coffee, fish, dry and salted, preserved pineapples, oilman's stores, arecanuts, chandu, bran, wheat flour, cigars and cigarettes and milk.

"Raw Materials"—

Copra, gum copal, gutta percha and rattans.

"Manufactured Class"—

Sarongs, slendangs and kains, yarns, motor-cars, motor-cycles and accessories and tanned hides, while decreases are apparent in—

"Foodstuffs, drinks and narcotics"—

Rice, sugar and black pepper.

"Raw Materials"—

Para rubber and Illipi nuts.

"Manufactured Class"—

Chemicals and gunnies.

The quantities of coffee, preserved pineapples, wheat flour, copra and rattans show an increase.

A decrease in volume is recorded of rice, beans and peas, sago, tapioca, Para rubber, pepper and tin.

TRADE BY COUNTRIES.

The following statement shows the position of the Colony in the years 1919 and 1920 as a market for British, European, American, Japanese and other foreign goods.

(The value of the trade in merchandise with the United Kingdom, Continent of Europe, United States of America, and Japan is shown in thousands of pounds sterling.)

		Imports.		*Exports.*	
		1919.	*1920.*	*1919.*	*1920.*
		£	£	£	£
United Kingdom		6,385	18,334	15,846	12,565
Belgium	Continent of Europe.	9	328	414	585
Denmark	Continent of Europe.	9	83	1,083	2,332
France	Continent of Europe.	267	432	3,229	2,927
Germany	Continent of Europe.	...	231	...	307
Holland	Continent of Europe.	135	729	206	1,323
Italy	Continent of Europe.	139	664	797	808
Norway	Continent of Europe.	5	64	8	...
Sweden	Continent of Europe.	6	94	25	1
Spain	Continent of Europe.	19	31	35	63
United States of America		3,441	5,595	35,271	33,846
Japan		4,165	5,437	2,963	1,918

The articles which gave the largest increased values from the United Kingdom were hardware and ironware including cooking utensils, steel, paper and stationery, linseed oil, canvas, machinery including electrical goods, cotton piece-goods, apparel, hosiery and millinery, corrugated iron and cement.

From the United States of America increases in imports are seen in cigars and cigarettes, tinned provisions including fruits, milk, rubber tyres, paper and stationery, motor-cars and accessories and decreases in tools and implements and petroleum.

From Japan the following show advances in imports:—

Coal, cotton piece-goods, apparel, and hosiery, while matches, chemicals and fishmaws show declines.

Exports to the United Kingdom showed advances in such articles as preserved pineapples and gutta percha, but decreases took place in tin, sago, pepper, tapioca, Para rubber and copra.

In our Exports

to France—Tin, rattans and coffee,

to Italy—Tin, sago and Para rubber,

to Denmark—Copra,

all advanced, declines being seen in copra, Para rubber and coconut oil to France, copra and coconut oil to Italy, and coconut oil and coffee to Denmark.

The principal exports to Belgium were sago, copra, and Para rubber; to Holland copra, rattans, sago and Para rubber; to Spain copra and sago, and to Germany copra, rattans and Para rubber.

Exports to the United States advanced in values of tin, rattans and gum copal, but copra and Para rubber fell in values.

Exports to Japan showed increases in values of phosphate of lime, while declines are seen in Para rubber, tin and gunnies.

There was a rise in the total value of exports to Australia and New Zealand, Netherlands Indies, Malay States, French Indo-China, North Borneo and Sarawak, British India and Burma, but Siam and Siamese States and Hongkong and China showed decreases.

A Committee was appointed early in the year to inquire into the present system of the Registration of Imports and Exports in the Straits Settlements and Federated Malay States and to make proposals for the proper compilation and co-ordination of the statistics of British Malaya. The Committee met in Kuala Lumpur and a report was consequently drawn up and sent in to Government in November last.

FORESTS.

The area of reserved forests was increased by the addition of 155 acres to the Tanjong Burong Reserve in the Dindings. A further 754 acres were ready for final notification at the end of the year. The total area of reserved forests amounted to 106,168 acres, being 11 per cent of the aggregate area of all Settlements.

Revenue and expenditure were $57,268 and $42,849 respectively, compared with $65,754 and $34,064 in 1919, giving a surplus of $14,419. There was an increase of revenue in Singapore due to the high prices obtained for the sale of the mangrove coupes. There were decreases in revenue in all other Settlements, that in Malacca amounting to $5,899.54. As was pointed out in the report for 1919 the revenue for that year was abnormally high. The expenditure figures exclude temporary allowances but include arrears of pay due as a result of alterations in rates of salaries.

The outturn of timber was 10,837 tons and of fuel 27,358 tons.

One hundred thousand mangrove seedlings were planted in Sungei Acheh Forest Reserve in Province Wellesley. The only expenditure incurred was $110 for the purchase of seed. Examination of the areas planted with bakau in former years in the Tanjong Burong Reserve shows that the planting has been successful. If the cost of this planting can be kept reasonably low it is likely to prove a useful silvicultural operation.

Forty-six breaches of the forest laws were reported, of which 23 were compounded and 23 taken into Court. In the latter cases the total amount of the fines was $524, and of compensation for damages $212. In the compounded cases compensation of $625 was demanded of which $65 was unpaid at the end of the year.

Toward the end of the year arrangements were being made, but were not completed, for the supervision of the forest work in Penang, Province Wellesley and the Dindings by senior officers of the Federated Malay States Forest Service. Forest operations have suffered much in the past for want of such supervision.

LAND.

The Revenue was thus distributed:—

—		Land Revenue.	Reimbursements.	Land Sales.	Total.
		$	$	$	$
Singapore ...	1919	256,449	12,109	152,944	421,502
	1920	247,794	19,028	1,792,913	2,059,735
Penang ...	1919	195,632	19,498	9,106	224,236
	1920	214,057	21,194	21,424	256,675
Malacca ...	1919	499,958	25,284	196,657	721,899
	1920	571,400	16,078	313,700	901,178
Labuan ...	1919	2,692	524	36	3,252
	1920	4,037	4,266	1,027	9,330
Total...	1919	954,731	57,415	358,743	1,370,889
	1920	—	—	—	—

PENANG.

—	Land Revenue.	Reimbursements.	Land Sales.	Total.
	$ c.	$ c.	$ c.	$ c.
North-east District ...	49,573 89	5,437 45	9,260 00	64,271 34

Land Revenue increased by $3,329 chiefly under the heading of Miscellaneous Receipts. There were seven applications for Crown Land. One was refused, one withdrawn, two are awaiting survey of Penang Hill and three are under consideration. Auction of Crown Land which had been suspended owing to restrictions on alienation was resumed during the year.

There were 47 applications for subdivisional surveys and 26 for re-surveys. Action on 27 was completed.

11,150 deeds were presented for registration as against 13,670 in 1919. There was a marked decrease in the latter part of the year owing to trade depression and tightness of the money market.

PROVINCE WELLESLEY.

Revenue collected in 1920 was as follows:—

			$ c.
Land Revenue	...	...	83,480 87
Reimbursements	...	...	7,679 73
Land Sales	...	...	6,032 00

Land Rents increased by about $1,900 over the figures of 1919.

172 acres, 3 roods and 10 poles of Crown Land were alienated during the year and the premium collected amounted to $6,032.

The padi harvest was fairly good. A threatened failure was averted by the fall of rain two or three months after the usual planting time.

MALACCA.

Receipts on account of rents on Grants and Leases and assessment under the Malacca Lands Ordinance amounted to $453,251 in 1919 as against $412,931 in 1918. In 1920 $538,420.

ALIENATION OF LAND.

The area of Crown Land alienated, and the number of Statutory Grants issued during the last five years together with the amount of premia paid in respect of the same, are shown in the following table:—

REGISTRATION OF DEEDS.

The number of deeds presented for registration in Singapore was 6,714 as compared with 6,561 in 1919, and the number of deeds finally registered, 6,835, as against 5,915 in 1919. Conveyances and Assignments accounted for 3,282, Mortgages for 1,672, and Reconveyances for 1,302. Revenue amounted to $26,967.95. The Registration of Deeds Ordinance, 1915, is not in force in the Settlement of Malacca.

REGISTRIES OF JOINT STOCK COMPANIES.

Last year was the fifth year during which the Companies Ordinance, 1915, was in force. Seventy-three new companies were registered with a capital of $83,097,015; of these, 34 were private companies with a capital of $19,707,140.

At the end of the year 345 companies remained on the register of which 30 were in liquidation. The total subscribed capital of the 335 companies which carry on a business was $145,851,250.

Four hundred and forty companies not registered in the Colony, have filed documents under the 1915 Ordinance; of these, 342 are British, 29 are Japanese, 26 are Dutch and 23 are incorporated in the United States, America. Apart

from these, 13 companies of which 12 are British have complied with the Life Assurance Companies Ordinance, and private Ordinances have been enacted in respect of five foreign companies. Fifty-seven companies do Fire Insurance business.

The total revenue of the department was $36,632.31.

LIQUORS AND TOBACCO.

Liquors.—The revenue from liquors amounted to $3,413,899.27 as against $3,125,262.28 in 1919.

The system of distributing Toddy licences on the basis of tenders submitted in respect of individual shops introduced last year continued to work well and with satisfactory financial results. The revenue from Toddy in 1920 amounted to $373,597.36, being $100,064.58 more than in 1919.

Rules under the Liquors Revenue Ordinance were passed by resolution of the Legislative Council on the 23rd of January providing for the nature and origin of European liquors being clearly described on the labels of the receptacles in which they were offered for sale by retail.

Tobacco.—The total tobacco revenue collected in Singapore, Penang and Malacca during the year was $1,668,663.42 as against $1,550,135.86 in 1919.

The revenue from tobacco in the Settlement of Labuan was $3,949.77 as against $3,894.16 in the preceding year.

Prosecutions.—The total number of cases instituted by the Department during the year was 322 in Singapore, 127 in Penang and 56 in Malacca.

POST AND TELEGRAPH DEPARTMENT.

The number of postal articles (excluding parcels) posted in the Colony was 13,917,430, an average of 16·09 per inhabitant, as against 15·58 the average in the previous year. The number received for delivery was 11,651,860, as compared with 9,355,950 in 1919. The number of messages forwarded over Government Telegraph lines during the year 1920 was 578,006 as compared with 497,843 in 1919 whilst the number received over the Government telegraph lines increased from 442,744 in 1919 to 488,931 in 1920. The number of subscribers to the Government telephone exchanges increased from 891 to 936.

The amount at the credit of depositors in the Government Savings Bank on the 31st December, 1920, was $1,761,845.48, an increase of 18 per cent as compared with the amount on

December 31st, 1919. The average amount at the credit of each depositor was $187.01. There was a profit on the year's working of $31,340.58. The estimated present value of the investments is $1,444,287.46.

Money Order and Postal Order transactions amounted in value to $7,972,307, an increase of $2,176,307.

In addition to the General Post Office, Singapore, and the Chief Post Offices at Penang, Malacca and Labuan, there are 33 Sub-Offices in the Colony, including the Railway Post Offices at Durian Tunggal (Malacca), Jarak, Kreh, Penanti, Pinang-Tunggal, and Simpang Ampat (Province Wellesley). Of these 21 are telegraph offices.

LEGISLATION.

The Ordinances passed during the year 1920 were 32 in number, including two Supply Ordinances. Seventeen of these are amending Ordinances.

2. The most important of the Ordinances which are not amending Ordinances are:—

(i) The Victory Loan Ordinance (No. 1) which authorises the Straits Settlements Government to raise a loan in order that such moneys may be lent to the Imperial Government.

(ii) The Income Tax Ordinance (No. 3) authorising the continuation of a tax on income on the same principles as those on which War Tax was levied during the continuance of the war. A total contribution to the Imperial Government of £1,000,000 in respect of the year 1920 was voted by the Legislative Council on the 19th day of December, 1919, and the principle that the proceeds of an income tax on lines similar to the former War Tax was also accepted by the Council.

(iii) The Clearing Office Ordinance (No. 18) which provides for the establishment of a Local Clearing Office in accordance with the Treaty of Peace Order in Council of 18th August, 1919.

(iv) The Registration of Schools Ordinance (No. 21) which provides for the registration of all schools (except British Military Schools) and of all teachers employed in them for the purpose of control.

3. The principal amending Ordinances are:—

(i) The Railway and Police Force (Amendment) Ordinance (No. 10) which provides that persons in the service of the Federated Malay States Railway Police when serving in the Colony shall have the same rights and be subject to the same obligations as members of the Police Force of the Colony.

(ii) The Labour Ordinance (No. 19) which consolidates the law relating to labour in the Colony. It is modelled on the Federated Malay States Labour Code, 1912, and makes the law more uniform as between the Colony and the Federated Malay States.

(iii) The Police Force Ordinance (No. 20) which consolidates the several Ordinances dealing with the constitution, powers, duties and discipline of the Police Force. It also provides for the creation of a Volunteer Police Reserve for service in each Settlement.

(iv) The Land Acquisition Ordinance, 1920 (No. 28) which consolidates and amends the existing law relating to the acquisition of land for public purposes and for Companies. The decision to recast the law arose out of the recommendation of the Singapore Housing Commission, and the law at present existing in India has been followed to a considerable extent.

(v) The Former Enemy Aliens Admission (Amendment Ordinance (No. 30) which empowers the issue of temporary permits to former enemy aliens whose passports have been visaed by British Authorities in Europe, and amends the definition of "Former Enemy Alien" in accordance with instructions from the Secretary of State.

EDUCATION.

The expenditure on the nine Government English schools was $352,424.16, on the 43 aided schools (English, Anglo-Tamil, Malay, Tamil and Chinese) $709,913.14 and on the 193 Government vernacular schools $220,236.02.

The Malacca Training College for Malay Teachers continued to do good work. Its cost, during the year under review, was $28,110.27.

The numbers in Secondary Classes show a decrease of 7 over the figures for 1919. The Normal Classes continued their work during the year, and 29 Normal Class Certificates were issued.

The Department was still very short-handed. One master retired, while on furlough, on account of ill-health. 5 new masters and 3 new mistresses had arrived before the end of the year.

The Committee appointed to make recommendations as to what permanent form of educational memorial should mark the Centenary of Singapore sent in its report in due course. The proposal is to found an institution for higher education to be known as Raffles College, and to reorganise the work and curriculum of the schools. The Government of the Straits Settlements has promised a donation of $1,000,000 towards building the College, and has undertaken to contribute $50,000 annually towards its maintenance. Generous help has been promised by the Governments of the Federated Malay States and Johore, and handsome subscriptions have been received from merchants and others.

To ensure the success of the College it is necessary, as recommended by the Committee, to raise the present level of the schools. For this, Training for Teachers is required, and a sufficient and competent European staff.

The present schools are crowded and steps are being taken to provide new schools.

Approval has been given for two new appointments:—(1) a Chief Inspector of English Schools, who will supervise the work of all Secondary Classes in the Colony and the Federated Malay States and (2) an Inspectress of Schools, who will be in charge of the Elementary work of the Girls' Schools.

Progress was made with the preparation of the new series of modern Malay text-books for the Malay Vernacular schools. An advanced Teachers' Arithmetic, four new Readers and a Guide to Malay Letter-Writing were printed during the year; and a Physical Geography and a Malay Dictionary for Malays were nearly completed for the press.

Further progress was made with Basketry, and it is now taught by many Trained Teachers in the Malay village schools.

A Lady Supervisor for Malay Girls' Schools arrived towards the end of the year.

The building of a Central Training College for the Malay Teachers of the Colony and the Federated Malay States was commenced in Perak. As soon as it is erected and staffed, elementary botany and agriculture will be taught in all Malay village schools.

RAFFLES MUSEUM AND LIBRARY.

With the retirement in 1919 of Dr. HANITSCH, Director of the Raffles Museum and Library for 24 years, an important chapter in the history of the Department was brought to a close. The arrival of his successor and a trained Librarian in May, 1920, resulted in a certain amount of reorganisation work which occupied the greater part of the year.

Accessions to the Museum were up to the average of former years. The most important was a collection of natural history specimens obtained in Borneo by the Director and Museum Collectors from September to November. Over 400 bird-skins were obtained, representing some 160 different species. Among the mammals obtained, two (a Badger and Squirrel) have been described as new to science. Useful collections of Reptiles, Invertebrates and Ethnological specimens were also made. These had not been worked out by the end of the year. Among the Miscellaneous Accessions during the year was a German Trench Mortar, deposited in the Museum by the Colonial Government.

The public interest in the Museum and Library appeared to be well-maintained. Although no regular count of visitors is kept, a count was taken at the door for one week in each of the last six months of the year. From figures thus obtained it is estimated that about 250,000 visited the Museum and Library during the year, of whom 170,000 entered the Museum only.

PUBLIC WORKS.

The expenditure of the Department was as follows :—

	Singapore.	*Penang.*	*Malacca.*	*Labuan.*	*Total.*
ESTABLISHMENTS.	$ c.	$ c.	$ c.	$ c.	$ c.
(1) Salaries ...	124,969.09	105,380.60	43,397.53	6,872.00	280,619.22
(2) Other Charges	24,254.72	18,092.66	10,437.84	1,247.08	54,032.30
ANNUALLY RECURRENT.					
(1) Roads, etc. ...	161,403.45	358,787.01	222,395.19	4,162.39	746,748.04
(2) Buildings, etc.	268,973.81	182,524.19	81,358.59	4,236.76	537,093.35
SPECIAL SERVICES.					
(1) Roads, etc. ...	35,241.38	300,057.59	683,428.98	1,999.00	1,020,726.95
(2) Buildings, etc.	1,051,136.62	256,604.04	191,569.06	7,814.09	1,507,123.81
Miscellaneous Services	114,167.33	67,825.43	6,324.67	1,420.13	189,737.56
Total ...	$1,780,146.40	1,289,271.52	1,238,911.86	27,751.45	4,336,081.23

No new public buildings of importance were completed during the year but extensive Anti-Malarial Works at the Dindings were carried out.

ROADS.

In Singapore.—Nearly five-and-half miles of roads were converted from laterite to granite and seven miles of asphalting surface applied to granite and other metalled roads.

In Penang.—Three miles of road were re-metalled and tarred.

In Province Wellesley.—Progress was made with the earthwork of the new road connecting the South of the Province with Kedah frontier.

In Malacca.—Nine miles of road were reconstructed.

The metalled roads in the Colony are as follows:—

Singapore	...	...	96·26 miles.
Penang and Dindings		...	70·55 ,,
Province Wellesley		...	167·00 ,,
Malacca	...	...	249·50 ,,
Labuan	...	...	4·50 ,,
			587·81

The Department has also charge of 49·13 miles of gravelled roads in Penang and Malacca and 97·44 miles of natural roads of which the greater part lies in Province Wellesley, Dindings, Malacca and Labuan. Main roads in the Colony will be found marked on the Map.

RURAL BOARDS.

The following return shows the revenue and expenditure of the Rural Boards, which carry out in areas outside Municipal limits such of the provisions of the Municipal Ordinance as are applicable to country districts:—

		Revenue.		*Expenditure.*	
		$	c.	$	c.
Singapore Island	...	* 201,156	00	249,219	00
Penang Island	...	77,009	00	156,510	00
Province Wellesley	...	360,123	00	504,297	00
Dindings ...	...	36,233	00	56,633	00
Malacca ...	...	608,663	00	897,176	00

The deficit in the revenue of the Rural Boards is made good by contributions from the Government.

* Exclusive of Education Rate but inclusive of dog tax collected by Police, and bank interest.

POLICE.

The total strength of the Force at the end of the year was 2714 distributed as follows:—

Singapore and Christmas Island ...	1,212
Penang, Province Wellesley and Dindings	1,014
Malacca	401
Labuan and Brunei	87
The authorised strength of the Force was	2,960

All appointments for Europeans were filled at the end of the year, except two in the rank of Assistant Superintendent of Police. The Probationary Assistant Superintendents of Police appointed and Probationary Inspectors enrolled had all served in His Majesty's Forces and all promise well. Recruiting for the Malay, Indian and Chinese Contingents was not satisfactory (though an improvement took place towards the end of the year), and for the Sikh Contingent was entirely at a standstill. The Subadar was sent to India in April on a recruiting campaign, but achieved very little success.

Gambling was not noticeably prevalent in Singapore during the year; it was active in Penang, more particularly amongst women, and in Province Wellesley, though very good work was done by the Gambling Suppression Branch; there was comparatively little gambling in Malacca, especially towards the end of the year.

The cost of the Department was $1,304,773.47.

The returns of the more serious offences reported are:—

	1919.	*1920.*
Murder	31	46
Gang robbery	31	67
Robbery	131	127
House-breaking	423	529
Theft	2,325	2,854

The total number of cases in which arrests were effected with or without warrant in the Colony during the year was 22,509, compared with 17,735 in 1919. 145 cases were sent for trial before the Supreme Court as against 171 in 1919.

PRISONS.

Criminal Prisons.—At the beginning of the year there were 867 prisoners in the three Criminal Prisons of the Colony (Singapore, Penang and Malacca); 3,847 were admitted and 3,879 discharged during the year; and 835 remained at the end of the year.

There were only 35 prisoners of the "habitual" class in prison at the end of the year.

Prison offences showed an average of ·9 per annum per convict as against 1 in the preceding year.

The number of "Middle-Grade" convicts—the men available for industrial labour was 163 in 1920, 143 in 1919, and 134 in 1918. The "Upper-Grade" men (59 in number) are mostly employed as cooks, orderlies, clerks, etc., the "Lower-Grade" men at stone-breaking and the "Short Sentence" and "Revenue Grade" men at stone-breaking, husk-beating and fatigue-duties.

There were three executions (two in Singapore, one in Penang and none in Malacca), in pursuance of sentences of the Supreme Court.

Civil Prisons.—There were 156 occupants of the Civil Prisons of the Colony at the beginning of the year: 6,136 were admitted and 6,146 discharged during the year; and there remained 146 at its end.

Houses of Detention.—In these buildings, which are part of the Civil Prisons, there were 56 vagrants at the beginning of the year and 93 at the close of the year: 677 were admitted and 633 discharged. Of this last number 47 found employment and 523 were repatriated.

General.—The sanitary condition of the Prison and the health of the prisoners have been satisfactory. The water carriage system for the removal of night-soil, etc., has been extended to the Workyards and is a great improvement.

The Prison was free from Beri-beri, Scurvy and Enteric Fever.

There was a marked decrease in the number of cases of Dysentery treated.

There were only 10 cases with 2 deaths, against 28 and 9 in 1919.

Five hundred and twenty-nine (529) prisoners were admitted to Hospital and the average daily sick was 24.

No European and Eurasian prisoners were admitted. 393 were criminal prisoners. 30 from Civil Prison and 106 vagrants.

There were 25 deaths in Hospital—13 occurred amongst Long Sentence prisoners, 5 Short Sentence, 2 Revenue Grade, 3 Vagrants and 2 Civil.

The total expenditure of the department was $489,126.24, and its revenue $27,493.23 besides which articles to the value of $4,000.42 were supplied to Government departments.

VETERINARY DEPARTMENT.

In Singapore the total imports of live-stock were 859 horses, 36,219 cattle, 25,964 sheep, 5,388 goats, 104,988 swine, 432 dogs and 683 buffaloes as compared with 774 horses, 31,721 cattle, 27,122 sheep, 6,111 goats, 130,911 swine, 227 dogs and 821 buffaloes in 1919.

The total number of live-stock exported from Singapore was 701 horses, 5,936 cattle, 6,854 sheep, 1,542 goats, 30,946 swine, 257 dogs and 104 buffaloes as compared with 541 horses, 4,551 cattle, 6,317 sheep, 2,387 goats, 65,784 swine, 216 dogs and 201 buffaloes in 1919.

The total Revenue collected during 1920 amounted to $29,943.40 as compared with $35,242.85 in 1919.

The health of animals in Singapore was generally good.

Cases of rinderpest occurred from time to time amongst cattle imported from Siam, but no epidemic occurred.

The importation of cattle from Monthon Patani, Siam, was prohibited in November on account of rinderpest.

At the end of the year an outbreak of rinderpest, introduced from India, occurred amongst milking buffaloes and the infected animals were removed to the Quarantine Station. The outbreak has so far been confined to one stable.

There was no case of glanders or anthrax during the year.

MUNICIPALITIES.

The revenue of the three Municipalities amounted to ($9,537,414), and their expenditure, excluding sums spent on Loan Works, to ($9,829,080). The usual comparative statements of revenue and expenditure appear below.

REVENUE.

	1916.	1917.	1918.	1919.	1920.
	$	$	$	$	$
Singapore ...	3,884,353	4,375,493	4,943,059	5,640,304	6,862,574
Penang ...	1,429,251	1,537,937	1,592,449	1,716,350	2,404,398
Malacca ...	177,742	210,149	226,862	242,185	270,442

EXPENDITURE.

	1916.	1917.	1918.	1919.	1920.
	$	$	$	$	$
Singapore ...	3,743,261	4,244,657	5,034,593	5,904,808	7,071,546
Penang ...	1,268,865	1,380,139	1,577,409	1,870,282	2,466,382
Malacca ...	160,655	185,682	259,283	264,562	291,152

SINGAPORE HARBOUR BOARD.

The income and expenditure of the Board at Singapore (first as the Tanjong Pagar Dock Board and latterly as the Singapore Harbour Board) for the seven-and-half years 1913—30th June, 1920, have been as follows:—

	Income.	*Expenditure*
	$	$
1913	6,091,296	4,070,912
1914	5,834,893	3,875,738
1915	5,432,425	3,421,271
1916	6,785,372	4,203,355
1917	7,931,597	4,665,596
1918	9,617,718	5,444,410
1919 (half-year to 30th June only)* ...	5,529,415	3,208,130
1920 (year ending 30th June, 1920)	20,754,623	11,079,039

The capital debt due to Government stood at 30th June, 1920, at $51,548,956 on which the Board pays interest at 4 per cent. In addition to this capital, the Board has expended on new works and other expenditure of a permanent nature a sum of $2,852,294 from reserve accounts.

* The preparation of interim Half-yearly Accounts to 31st December having now been discontinued in favour of Yearly Accounts to 30th June, yearly figures to December as heretofore can no longer be given.

The following figures are taken from the wharf tonnage returns:—

	1914.	1915.	1916.	1917.	1918.	1919.	1920.
Number of Vessels ...	2,544	2,364	2,329	2,400	2,114	2,416	2,497
Nett Tonnage	5,445,273	4,307,082	4,348,927	3,938,659	3,330,791	4,530,834	5,244,274
Coal (Inwards and Outwards)	1,248,032	1,021,452	1,067,824	1,039,202	732,231	847,691	907,554
Cargo (Inwards and Outwards)	1,229,205	1,323,637	1,339,129	1,369,606	1,213,730	1,324,116	1,642,264

The tonnage occupying the Graving Docks during the years 1918, 1919, and 1920 based on the daily tonnage in dock was:—

	1918.	1919.	1920.
No. 1 Dock	233,023	369,339	467,796
No. 2 Dock	216,211	505,270	799,425
The Victoria Dock ...	253,074	987,000	600,127
The Albert Dock ...	407,319	895,870	813,105
The King's Dock ...	736,214	1,483,460	1,283,422

PENANG HARBOUR BOARD.

The total gross earnings of the Wharf and Dock for the year 1920 were $1,577,433* and the expenditure $1,398,080.*

The following figures are taken from the wharf tonnage returns:—

	1914.	1915.	1916.	1917.	1918.	1919.	1920.
Number of Vessels ...	596	728	661	532	513	554	616
Nett Tonnage	1,108,319	871,524	810,675	687,377	581,132	760,100	1,081,414
Coal (Inwards and Outwards)	266,146	72,016	93,388	106,676	60,029	39,356	72,463
Cargo (Inwards and Outwards)	313,360	254,066	245,681	247,051	251,183	242,544	290,153

F. S. JAMES,
Colonial Secretary.

REPORT ON THE STRAITS SETTLEMENTS FOR THE YEAR 1921.

Historical and Geographical Notes.

The Straits Settlements, comprising Singapore, Penang and Malacca, were transferred from the control of the Indian Government to that of the Secretary of State for the Colonies on the 1st April, 1867, by an Order in Council, issued under the authority of an Act of the Imperial Parliament (29 and 30 Vict. c. 115).

SITUATION AND AREA.

SINGAPORE.

Singapore is an island about 27 miles long by 14 wide, containing an area of 217 square miles, situated at the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width. There are a number of small islands adjacent to it which form part of the Settlement, which now comprises also Christmas Island, and the Cocos Islands.

The seat of Government is the town of Singapore, at the southern point of the island, in latitude 1° 17′ north, and longitude 103° 50′ east.

PENANG.
